STATEMENT OF REASONS

NATIONAL FUEL GAS DISTRIBUTION CORPORATION
2026 Base Rate Case
Docket No. R-2025-3059428

STATEMENT OF REASONS

I. INTRODUCTION

National Fuel Gas Distribution Corporation's ("NFGDC") Pennsylvania Division ("National Fuel" or "Company") is filing Supplement No. 294 to National Fuel Gas Tariff – Pa. P.U.C. No. 9 ("Supplement No. 294"), with a proposed effective date of March 29, 2026.[1] The rates set forth in Supplement No. 294, if approved by the Pennsylvania Public Utility Commission ("PAPUC" or the "Commission"), would increase the Company's annual revenues by $19.7 million, or by 7.4%.[2] In addition, Supplement No. 294 also proposes additional changes to tariff rates, riders, and tariff terms and conditions as described in the filing.

The following monthly bill impact analysis applies to National Fuel's customers. It assumes that the Company's proposals for full rate relief are accepted.

Table 1 - AVERAGE MONTHLY BILL IMPACT

Customer Class	Average Usage per Month	Current Rates	Proposed Rates	($) Increase	(%) Increase
Residential	80 ccf	$83.49	$88.44	$4.95	5.9%
Commercial / Public Authority					
SCPA < 250	103 ccf	$101.91	$107.85	$5.95	5.8%
SCPA > 250	412 ccf	$276.57	$288.37	$11.80	4.3%
LCPA	340 Mcf	$1,113.90	$1,143.80	$29.89	2.7%

[1] It is anticipated that the rates proposed in Supplement No. 294 will be suspended until October 29, 2026.
[2] As explained below and in the Company's direct testimony, the Company has also proposed a new five-year energy efficiency pilot program that would recover additional program costs from residential customers annually in a separate rider.

National Fuel makes this tariff filing principally: (1) to allow it to earn a fair return on investments used and useful to continue to provide safe and reliable service to the public; (2) to support its infrastructure replacement programs designed to enhance safety and reliability; (3) to address increasing levels of operating costs, which are principally being influenced by broader macroeconomic trends; and (4) to mitigate the adverse impacts of warmer weather trends on customer usage. Each of these reasons is discussed in more detail below and in the Company's testimony. As compared to current plant and base rate levels reflected in existing rates, National Fuel projects an increase of approximately $133 million in gross plant through the Fully Projected Future Test Year ("FPFTY") ending October 30, 2027. Accordingly, this revenue increase is essential to attract the investments necessary to operate and maintain safe, reliable, and customer-focused natural gas distribution services.

II. REASONS FOR THE REQUESTED REVENUE INCREASE

1. Fair return on investments used to serve the public

A variety of circumstances will prevent the Company from earning a fair rate of return at present rate levels. As reflected in National Fuel Exhibit A (FPFTY), the Company's operations are projected to produce an overall return on rate base of 6.30%, which equates to a return on common equity of only 6.87% for the FPFTY. As explained by Company Witness Joshua C. Nowak (National Fuel Statement No. 10), those returns are not adequate based on an analysis of applicable financial market data and the risks confronted by the Company and are well below the rates of return generally afforded to public utilities. Unless National Fuel receives the requested rate relief, the Company's returns will continue to erode and jeopardize its ability to attract the capital needed to make the reasonable and necessary investments in gas infrastructure and the human resources that are necessary to maintain and enhance the provision of safe and reliable

natural gas service to its customers.

2. Support for the Company's accelerated infrastructure replacement program

Significant capital investment in the distribution system is a primary driver for the requested rate relief in this proceeding. Upgrading and modernizing the distribution system facilitates the provision of safe, reliable, and reasonable service to customers. Accordingly, the Company is replacing its non-contemporary infrastructure at an accelerated pace, as described in its recently-filed Amended Long Term Infrastructure Improvement Plan ("LTIIP").[3] The investment in net plant in-service for the FPFTY ended October 31, 2027 is projected to be $637 million. When the Company last requested a rate increase for the FPFTY ended July 31, 2024, the Company's investment in net plant was approximately $496 million. The $141 million increase in net plant has largely been the result of continued investments necessary to enhance and maintain the safety and reliability of the Company's distribution system, which include the replacement of aging gas plant infrastructure. Since 2016, the Company's Systematic Replacement Program has eliminated over 371 miles of leak-prone bare steel and wrought iron pipeline and 7,337 base steel services. This represents a significant acceleration of investment and replacement over historical levels.

3. Address Operating Cost Inflation

Like most businesses today, National Fuel has been impacted generally by the inflationary pressures that continue to challenge the economy. However, when considering the net impact of operating expenses since the last rate case, the biggest item impacting the increase in operating expenses is net labor. National Fuel's net labor expenses have been impacted in two ways. First, the Company continues to manage employee retention through competitive wages

[3] Docket No. P-2022-3034957.

and benefits to ensure that qualified and trained employees are not lost to other employers. Second, net labor has increased due to the results of recent negotiations and ratification of collective bargaining agreements impacting approximately half of National Fuel's workforce. These changes have resulted in net labor being the biggest driver of the increase in operating expenses since the Company's last rate case.

4. Address Weather Impacts on Usage

The Company's residential and commercial usage has been significantly impacted by warmer winters in the Company's service territory. The trend of warmer winters and extreme volatility in heating degree days from year to year has had a significant impact on the Company's throughput and revenues. The Company is proposing to take two steps to consider and mitigate the adverse impact of warmer weather trends on customer usage. First, the Company modified its volumetric forecasting approach to use a 10-year average of heating degree days data published by NOAA as observed at the Erie, Pennsylvania International Airport from 2015 to 2024. The Company relied on a 15-year average of annual heating degree days in the last rate case and believes that updating to a 10-year average is more indicative of a normal winter in the Company's service territory. Second, the Company is proposing to make the Weather Normalization Adjustment ("WNA") mechanism permanent to protect customers from higher bills when actual weather is colder than normal and help insulate the Company's authorized delivery revenues when actual weather is warmer than normal. The benefits and components of the proposed WNA mechanism are explained in detail in the direct testimony of Mr. John D. Taylor (National Fuel Statement No. 19).

III. MANAGEMENT EFFECTIVENESS

National Fuel has successfully provided customers safe and reliable service at the lowest

rates of all major natural gas utilities in Pennsylvania. National Fuel's management effectiveness is evidenced in the following areas:

Safety Culture

- National Fuel has a long-standing culture of safety that encourages continuous improvement of its safety performance, with demonstrated success in several areas. Principally, National Fuel has made significant progress in the modernization of its system, and the replacement of leak prone pipe. The Company plans to continue to accelerate its pipeline replacement program so that all remaining bare steel and wrought-iron mains and transmission lines will be removed by 2039. Furthermore, the Company has significantly reduced the number of leaks on its system, as well as damages to its system over the last five years.
- The Company also educates and builds awareness with its customers so they can act safely if they smell gas in their homes. In the event of an emergency, National Fuel rapidly and thoroughly responds; the Company's average emergency response time is less than 45 minutes more than 99% of the time.
- Finally, National Fuel has implemented employee training and safety initiatives including the launch of the successful Safety Improvement Team ("SIT"), whose primary job is to proactively identify potential areas of continuous safety improvement and engage employees to reinforce the Company's commitment to safety. In 2025, National Fuel Gas Company's ("NFG") consolidated operations reported the lowest Occupational Safety and Health Administration ("OSHA") Days Away, Restricted or Transferred Rate in its history.

Quality Customer Service

- National Fuel maintains high levels of customer satisfaction. The Commission's 2024 Customer Service Performance Report showed that the Company scored at or above the Pennsylvania state average for natural gas distribution companies in a majority of the report's satisfaction survey categories, including lowest in call abandonment, satisfaction with representative's handling of the contact and ease of reaching the Company, and second only to one other utility in answering customer calls within 30 seconds which is particularly impressive since the Company does not employ an automated voice system to handle customer calls. The Company has also increased customer satisfaction by acknowledging that customers' time and schedules are important, by consistently maintaining over 99% of appointments kept for the last five years.

Information Technology and Cybersecurity

- National Fuel has made significant enhancements to continue to strengthen the Company's cybersecurity posture, including increasing the number of applications with single sign-on capabilities, increasing the nature and frequency of cyber trainings for employees, aggressively managing patch management practices for applications and actively addressing system vulnerabilities, and improved response times for Security Information and Event Management alerts. The Company also recently established a 24/7 cybersecurity command center for continuous monitoring, which is significantly improving detection and response capabilities for both physical and cybersecurity threats,

while also tracking system uptime and availability to enable immediate action when issues arise. In a recent review completed by the Transportation Security Administration of cybersecurity practices at the top 100 gas companies throughout the country, National Fuel ranked among the top 10%.

Affordability and Operational Efficiencies

- National Fuel currently has the lowest total bills and delivery rates in the Commonwealth amongst large natural gas utilities. Its customers have benefited from consistently low delivery rates for more than a decade while enjoying access to the lower cost natural gas supplies produced in Pennsylvania. National Fuel's focus on cost control, productivity, and ability to optimize operational efficiencies is a major driver of the Company's ability to keep its delivery rates low. Even with the proposed rate increase, the Company anticipates that it will continue to lead its Pennsylvania natural gas peers in affordability. In addition, the Company's proposal includes a tariff rider that would reinstate a passback of Other-Post Employment Benefits ("OPEB") funds of approximately $6.2 million and also provide a one-time bill credit of $30, totaling approximately $1.025 million, to CAP, Level 1, and Level 2 customers.

Universal Services and Customer Payment Assistance

- National Fuel continues to be attentive to meeting the needs of its low-income customers through its customer assistance programs. These include the Company's Low-Income Residential Assistance program, Low-Income Usage Reduction Program, as well as the Company's diligent efforts to connect its low-income and payment troubled customers with all available forms of assistance (e.g., Low Income Home Energy Assistance Program ("LIHEAP")).

Community Engagement and Impact on Local Economies

- Finally, National Fuel and its employees support the communities where they live and work. This support includes charitable contributions and volunteer opportunities. In addition to these philanthropic endeavors, the Company and NFG as a whole continue to have a significant impact on the local economies of the communities they serve and contribute to the regional economy through employee wages, payments to local vendors, taxes, royalties and capital investment.

The identified initiatives and efforts, as described by the Company's witnesses, demonstrate National Fuel's commitment to providing safe, reliable, and high quality distribution service to its customers. The Company believes that its management efforts, system investments, and continued provision of safe and reliable service at reasonable rates, as detailed in the testimony submitted in this case, all strongly support an upward adjustment of 25 basis points to the Company's rate of return on common equity. This upward adjustment is included in

the 11.25% return on common equity requested by the Company and is discussed in the Direct Testimony of Joshua C. Nowak (National Fuel Statement No. 10).

IV. OVERVIEW OF FILING

Included with National Fuel's filing is the supporting data required by the Commission's regulations. This information includes data for the historic test year ("HTY") ended September 30, 2025, a future test year ("FTY") ending September 30, 2026, and a FPFTY ending October 30, 2027. In accordance with permitted ratemaking procedures, the Company has elected to use the FPFTY as the basis for its proposed revenue change. National Fuel has followed Commission ratemaking practice in preparing its claims for rate base, operating revenues and operating expenses.

Rate Base. Rate base was determined based on depreciated original cost values for projected plant in service at the end of the FTY and FPFTY, respectively. The Company's rate base claim also includes reasonable estimates for materials and supplies inventory and cash working capital, as well as standard deductions for accumulated depreciation, accumulated deferred income taxes, and customer deposits. The Company's rate base claim is shown in summary form in Schedule C-1 to Exhibit A (FPFTY) and is principally supported by the Direct Testimony of Monika M. Duszenko (National Fuel Statement No. 6).

Operating Revenues. National Fuel's *pro forma* test year operating revenues were derived from its annual five-year revenue forecast. As explained in the testimony of Courtney T. Mann (National Fuel Statement No. 14) and other witnesses, operating revenues were annualized, normalized, and otherwise adjusted in accordance with standard ratemaking practice,

as detailed in Schedules D-5 and D-5A of Exhibit A (FPFTY) and the exhibits attached to Ms. Mann's testimony.

Operating Expenses. National Fuel's *pro forma* test year operating expenses were derived from its annual budgeting process. As explained in the testimony of Anthony Formato (National Fuel Statement No. 3) and other witnesses, certain operating expenses were annualized, normalized, and otherwise adjusted in accordance with standard ratemaking practice, as detailed in Section D of Exhibit A (FPFTY). The Company's claim for depreciation and amortization expense is supported by Exhibit C (Fully Projected) to the filing, and exhibits developed and supported by John J. Spanos of Gannett Fleming Valuation & Rate Consultants, LLC (National Fuel Statement No. 8). Mr. Spanos's calculations are based on the straight-line, remaining life method previously approved for National Fuel's operations by the Commission.

Income Taxes. National Fuel's income tax expense was calculated using procedures previously accepted by the Commission. The Company's filing continues to reflect normalization accounting with respect to the catch-up amount of the tax repairs deduction for federal tax purposes and flow through accounting with respect to current years' federal tax deductions. The Company continues to use flow-through for rate making purposes as related to state taxes. The Company's tax claims are described and supported in the Direct Testimony of Erica L. Forcucci (National Fuel Statement No. 12).

Revenue Allocation and Class Cost of Service. National Fuel is proposing to allocate the revenue requirement to all customer classes based on the results of a cost of service study.

The Company's proposed revenue allocation will move all rate classes toward the overall system average rate of return. Additional details regarding the Company's cost of service study and revenue allocation are provided in the Direct Testimony of John D. Taylor (National Fuel Statement No. 19).

Rate Design. The Company's proposed rate design was developed in conjunction with Company Witness John D. Taylor's Allocated Cost of Service Study ("ACOSS"). The proposed revenue increases were allocated to the Company's service classes based on current rates of return for each class and the desire to gradually move toward full parity. Full parity means the revenues collected from individual service classes are aligned with the cost of service associated with that service class. After allocating the revenue increase, the rate design process consists of setting the basic service charge, resetting riders, and allocating the remaining increase to the volumetric distribution charge. As part of this case, National Fuel is proposing to increase the fixed monthly customer charges for the residential, certain commercial and large industrial classes. Details of the Company's rate design proposals are found in the Direct Testimony of Courtney T. Mann (National Fuel Statement No. 14).

Other Tariff Changes. In this filing, the Company proposes relatively few changes to the terms and conditions approved by the Commission in the Company's most recent completed rate case. One such change is a proposed Energy Efficiency tariff rider, which will collect funding for a new energy efficiency pilot program from residential customers. A list of all proposed changes is identified in the Company's proposed tariff, Supplement No. 294.

V. CONCLUSION

The proposed revenue increase is the minimum increase necessary for the Company to continue providing safe and reliable service, to maintain the integrity of its financial ratings, to attract additional capital on reasonable terms, and to have a reasonable opportunity to earn a fair rate of return on property that is used and useful in providing natural gas service to the public within its service territory. The proposals contained in this filing will provide significant benefits to all stakeholders. Moreover, the Company's proposed revenue allocation and rate design are just and reasonable and non-discriminatory, as are the proposed changes made to the Company's general terms and conditions of service. Therefore, the rates, rules, and terms and conditions of service set forth in Supplement No. 294 should be permitted to become effective as filed.

NATIONAL FUEL GAS DISTRIBUTION CORPORATION
2026 Base Rate Case
Docket No. R-2025-3059428

PLAIN LANGUAGE STATEMENT OF REASONS

National Fuel Gas Distribution Corporation's ("NFGDC") Pennsylvania Division ("National Fuel" or "Company") has asked the Pennsylvania Public Utility Commission ("PAPUC" or the "Commission") to increase its annual jurisdictional revenues by $19.7 million, or by 7.4%.[4] The percentage rate increase will vary by rate class. The main reasons for this proceeding are:

- National Fuel continues to invest in gas plant needed to provide continued safe and reliable service, and intends to accelerate these investments. Since 2016, the Company's Systematic Replacement Program has eliminated over 371 miles of leak-prone bare steel and wrought iron pipeline and 7,337 base steel services. This represents a significant acceleration of investment and replacement over historical levels.

- National Fuel seeks to recover increased labor and employee costs, which are necessary to attract, maintain, and promote a highly qualified work force.

- National Fuel proposes to make its Weather Normalization Adjustment ("WNA") pilot permanent, to limit the variability of over- or under-collections of non-gas margin revenues due to weather during the heating season (*i.e.*, October through May).

- Without substantial rate relief, the Company will not be able to earn a fair return on its investment used to serve the public and, if not addressed, this could adversely affect the integrity of its financial ratings and its ability to provide safe and reliable service to its customers.

- National Fuel is proposing to increase the fixed monthly customer charges for the residential, certain commercial and large industrial classes.

The Company designed the proposed rates for each customer class to recover its total

[4] As explained below and in the Company's direct testimony, the Company has also proposed a new five-year energy efficiency pilot program that would recover program costs from residential customers annually in a separate rider.

required revenue. In allocating the revenue increase to the residential and non-residential customer classes, National Fuel was guided by detailed studies of each rate class's cost of service. The Company also considered and balanced other principles of rate design consistent with the Commission's approach to ratemaking.

Along with its rate increase, National Fuel has filed all supporting data required by the Commission's regulations, as well as the written statements of twenty witnesses and numerous exhibits prepared by those witnesses. The data, testimony, and exhibits submitted by the Company comply with the Commission's filing requirements. The proposed distribution revenue increase is the minimum increase necessary for National Fuel to continue providing safe and reliable service to the public within its service territory.

SECTION 53.52 - FILING REQUIREMENTS

NATIONAL FUEL GAS DISTRIBUTION CORPORATION

Proposed Changes to NFGDC – PA Division, Supplement No. 294 to Original Tariff No. 9

Information furnished with the filing of rate changes under
52 Pa. Code, Section 53.52

(a) WHEN a public utility files a tariff, revision or supplement effecting changes IN RATES, INCLUDING RATE INCREASES AND RATE DECREASES, AND CHANGES TO the terms and conditions of service rendered or to be rendered, it shall [submit to] file with the Commission [with the tariff, revision or supplement,] statements showing all of the following:

(a)(1) The specific reason for each change.

National Fuel Gas Distribution Corporation's ("NFGDC") PA Division ("National Fuel" or "Company") has provided a Statement of Reasons describing the necessity for the changes proposed within this filing.

(a)(2) The total number of customers served by the public utility.

213,407 total customers served as of September 30th, 2025.

(a)(3) A calculation of the number of customers, by tariff subdivision, whose bills will be affected by the change.

This information is shown in National Fuel Exhibit E – Proof of Revenue.

(a)(4) The effect of the change on the utility's customers.

This information is shown in National Fuel Exhibit E – Proof of Revenue.

(a)(5) The effect, whether direct or indirect, of the proposed change on the utility's revenue and expenses.

The Company's proposal will change revenues and expenses, as shown in National Fuel Exhibit A (FPFTY), Schedule A-1. Individual adjustments to revenues and expenses are described in testimony and exhibits supporting the filing.

(a)(6) The effect of the change on the service rendered by the public utility.

The filing will allow the Company to continue to provide safe and reliable service to its customers while maintaining high levels of customer satisfaction.

(a)(7) A list of factors considered by the utility in its determination to make the change.

The list shall include a comprehensive statement as to why these factors were chosen and the relative importance of each. This subsection does not apply to a portion of the tariff change seeking a general rate increase as defined in 66 Pa.C.S. Section 1308 (relating to voluntary changes in rates).

Not applicable.

(a)(8) Studies undertaken by the public utility in order to draft its proposed change. This paragraph does not apply to a portion of the tariff change seeking a general rate increase as defined in 66 Pa.C.S. Section 1308.

Not applicable.

(a)(9) Customer polls taken and other documents, which indicate customer acceptance and desire for the proposed change.

No customer polls or other documentation regarding customer acceptance or desire for the proposed change exists.

(a)(10) Plans the public utility has for introducing or implementing the change with respect to its customers.

The Company will notify its customers of the proposed increase by means of a billing insert in compliance with the Commission's Regulations as codified at 52 PA Code Section 53.45.

(a)(11) ORDERS or rulings, OR BOTH, applicable to the filing FROM THE FOLLOWING:

(a)(11)(i) THE FEDERAL ENERGY REGULATORY COMMISSION (FERC).
(a)(11)(ii) THE FEDERAL COMMUNICATIONS COMMISSION (FCC).
(a)(11)(iii) THE COMMISSION.
(a)(11)(iv) COURTS OF COMPETENT JURISDICTION.

There are no rulings directly applicable to this change.

(b) When a public utility files a tariff, revision or supplement which will increase or decrease the bills to its customers, it shall file with the Commission in addition to the requirements of subsection (a)[, to the Commission, with the tariff, revision or supplement,] statements showing all of the following:

(b)(1) Specific reason for each change.

The Company has provided a Statement of Reasons describing the necessity of this filing.

(b)(2) Utility's operating income statement ending not more than 120 days prior to filing date – historic year.

Please refer to National Fuel Exhibit A (HTY), Schedule B-2.

(b)(3) Number of customers, by tariff subdivision, whose bills will be increased.

This information is shown in National Fuel Exhibit E – Proof of Revenue.

(b)(4) Total increases, in dollars, by tariff subdivision, projected to an annual basis.

This information is shown in National Fuel Exhibit E – Proof of Revenue.

(b)(5) Number of customers, by tariff subdivision, whose bills will be decreased.

This information is shown in National Fuel Exhibit E – Proof of Revenue.

(b)(6) Total decreases, in dollars, by tariff subdivision, projected to an annual basis.

This information is shown in National Fuel Exhibit E – Proof of Revenue.

(c) If a public utility files a tariff, revision or supplement which it is calculated will increase the bills of a customer or a group of customers by an amount, when projected to an annual basis, exceeding 3% of the operating revenues of the public utility—subsection (b)(4) divided by the operating revenues of the public utility for [a 12-month period as defined in subsection (b)(2)] the HTY—or which it is calculated will increase the bills of 5% or more of the number of customers served by the public utility—subsection (b)(3) divided by subsection (a)(2)—it shall submit to the Commission with the tariff, revision or supplement, in addition to the statements required by subsections (a) and (b), all of the following information:

(c)(1) Rate of return for historic year and anticipated for future year.

Please refer to National Fuel Exhibit A (HTY), Schedule A-1, National Fuel Exhibit A (FTY), Schedule A-1, and National Fuel Exhibit A (FPFTY), Schedule A-1.

(c)(2) Detailed balance sheet at the end of the historic year.

See refer to Regulation Response 53.53 - III-F.1 for a comparative balance sheet of NFGDC at September 30, 2025. The balance sheet provided is for the entirety of NFGDC. Balance sheets are not maintained separately for National Fuel and NFGDC's NY Division ("National Fuel – NY").

(c)(3) Summary, by detailed plant accounts, of book value of property of utility at end of

historic year.

Please refer to National Fuel Exhibit A (HTY), Schedule C-2, for the original cost book value of the property of the utility.

(c)(4) Respective amount of the depreciation reserve applicable to each detailed plant account.

Please refer to National Fuel's Exhibit A (HTY), Schedule C-3, for the depreciation reserve as of September 30, 2025 Exhibit A (FTY), Schedule C-3, for the depreciation reserve as of September 30,2025, and Exhibit A (FPFTY), Schedule C-3, for the depreciation reserve as of October 31, 2025. Please also refer to the depreciation study sponsored by Company witness John J. Spanos in National Fuel Exhibit C.

(c)(5) Statement of operating income, setting forth the operating revenues and expenses by detailed accounts [for the 12-month period ending on the date of the balance sheet required by paragraph (2)] at the END of the HTY.

Please refer to National Fuel Exhibit A (HTY), Schedule B-2, for the historic year operating revenue and expenses.

(c)(6) Description of any major changes in the operating or financial condition of the utility occurring between the [date of the balance sheet required by paragraph (2)] END of the HTY and the date of transmittal of the tariff, revision or supplement. As used in this paragraph, a major change is one which materially alters the operating or financial condition of the public utility [from that] as reflected in paragraphs (1)—(5).

National Fuel has had no major changes in its operating or financial condition from September 30, 2025, through the filing date.

(d) N/A

SECTION 53.53E - FILING REQUIREMENTS

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-A - General
Delivered on January 28, 2026

III-A.1

Request:

Provide a statement indicating that the public utility is subject to the Commission's jurisdiction.

Response:

National Fuel Gas Company's public utility operations in the state of Pennsylvania are carried out by National Fuel Gas Distribution Corporation's Pennsylvania division (the "Company"). The Company is subject to the jurisdiction of the Pennsylvania Public Utility Commission.

Prepared by or under the supervision of: Rebecca E. Hillery

2026 Base Rate Case
Responses to Section 53.53 - III-A - General
Delivered on January 28, 2026

III-A.2

Request:

Provide a statement of the total amount and percentage of the base rate increase being sought for recovery in rates under 66 Pa.C.S. § 1308(d).

Response:

The Company is seeking a filed for revenue requirement increase of $19,680,000 (exclusive of proposed Energy Efficiency rider) which represents a delivery increase of 14.09% and an overall total bill increase of 7.41%.

Prepared by or under the supervision of: Donald N. Koch

2026 Base Rate Case
Responses to Section 53.53 - III-A - General
Delivered on January 28, 2026

III-A.5

Request:

Provide the following supplemental information when providing the information required by this regulation and in response to each discovery request relative to the current base rate case proceeding, as applicable:

III.A.5.a Provide the data for the HTY and the first year that new rates were in effect from the immediately preceding base rate case if the time periods for the data requested relative to the current base rate case do not include the HTY and first year under new rates from the immediately preceding base rate case.
III.A.5.b Explain the difference in projections and adjustments made for the immediately preceding base rate case as compared to the projections and assumptions made relative to the current base rate case.
III.A.5.c Provide details of any reconciliations and adjustments made relative to the immediately preceding base rate case and explain whether (and how) they would be expected to be rolled into base rates in the current base rate case or whether they are expected to arise relative to rates as may be established in the current base rate case.

Response:

a. Please see III-A.5 Attachment 1 for a summary comparison of the HTY September 30, 2025 ("HTY") relative to TME July 31, 2024, the first full year new rates were in effect from Docket No. R-2022-3035730 ("Last BRC"). Due to TME July 31, 2024 being a time period that crosses fiscal years and ends during a mid-quarter, TME Sept 30, 2024 ("FY 24") is also being provided for a normalized comparison to the HTY.

b. Please refer to the direct testimony of Company witnesses for any specific differences in projections and assumptions made from the Last BRC relative to the current base rate case.

c. Please refer to the direct testimony of Company witnesses for details of any specific reconciliations and adjustments made relative to the the Last BRC relative to the current base rate case.

Prepared by or under the supervision of: Donald N. Koch

III-B.3

Request:

Provide the following schedules at **present rates**. In each schedule, provide references in the pro forma adjustments column for each adjustment which ties to corresponding supporting schedule detailing and explaining each PRO FORMA adjustment.

III.B.3.a	Income Statement
III.B.3.b	Cash Flow Statement
III.B.3.c	Debt-Service Coverage Ratio schedule
III.B.3.d	Balance Sheet, showing individual columns for the following:
III.B.3.d.i	Actual amounts for each of the 2 years immediately preceding the HTY
III.B.3.d.ii	HTY actual amounts
III.B.3.d.iii	Pro forma adjustments between HTY and FTY, including the adjusted HTY for known and measurable changes between the HTY and FTY
III.B.3.d.iv	FTY claimed amounts
III.B.3.d.v	Pro forma adjustments between FTY and FPFTY, including THE 12-CONSECUTIVE-MONTH PERIOD beginning with the first [full] month that new rates will be in effect after the application of the full suspension period permitted under Section 1308(d) amounts;
III.B.3.d.vi	FPFTY claimed amounts.

Response:

3.a - Please refer to National Fuel Exhibit A, Schedule B-2 for the Income Statement at present rates for each of the three test periods.

3.b - c – The Company does not maintain these items at the PA distribution level. Due to financial system limitations, the Company is precluded from trying to do so at a Pro-Forma level.

3.d.i - See attached Pages 2 and 3 for a comparative balance sheet of National Fuel Gas Distribution Corporation at September 30, 2024 and 2023. The balance sheet provided is for the entirety of National Fuel Gas Distribution Corporation, including both the Pennsylvania and New York Divisions. Balance sheets are not maintained separately for the two divisions.

3.d.ii - See attached Pages 2 and 3 for a comparative balance sheet of National Fuel Gas

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III- B – Summary of Filing
Delivered on January 28, 2026

III-B.4

Request:

Provide the following schedules at **proposed rates**. In each schedule, provide references in the pro forma adjustments column for each adjustment which ties to corresponding supporting schedule detailing and explaining each PRO FORMA adjustment.

III.B.4.a	Income Statement
III.B.4.b	Cash Flow Statement
III.B.4.c	Debt-Service Coverage Ratio schedule
III.B.4.d	Balance Sheet, showing individual columns for the following:
III.B.4.d.i	Actual amounts for each of the 2 years immediately preceding the HTY
III.B.4.d.ii	HTY actual amounts
III.B.4.d.iii	Pro forma adjustments between HTY and FTY, including the adjusted HTY for known and measurable changes between the HTY and FTY
III.B.4.d.iv	FTY claimed amounts
III.B.4.d.v	Pro forma adjustments between FTY and FPFTY, including THE 12-CONSECUTIVE-MONTH PERIOD beginning with the first [full] month that new rates will be in effect after the application of the full suspension period permitted under Section 1308(d) amounts;
III.B.4.d.vi	FPFTY claimed amounts.

Response:

3.a - Please refer to National Fuel Exhibit A_FPFTY Schedule A-1 for the Income Statement at proposed rates.

3.b - c – The Company doesn't maintain these items at the PA distribution level. Due to financial system limitations, the Company is precluded from trying to do so at a Pro-Forma level.

3.d.i – ii - See response to Section 53.53-III-B.3.d.i - ii for information requested.

3.d.iii – vi - National Fuel Gas Distribution Corporation does not maintain a separate balance sheet for the Pennsylvania division. All accounting records and financial statements are prepared on a consolidated basis for the entire Distribution Corporation. As a result, jurisdiction-specific balance sheet data is not available at proposed rates.

Request:

Provide a statement of past and anticipated changes since the immediately preceding base rate case in major accounting procedures.

Response:

Since the immediately preceding base rate case in 2022, National Fuel Gas Distribution Corporation has not made any significant changes to its accounting procedures, and none are anticipated.

The Company maintains full compliance with all applicable FASB standards, GAAP requirements, and regulatory accounting guidelines. Any minor updates implemented during this period were routine in nature and did not materially affect accounting practices or financial reporting.

III-B.9

Request:

Identify each major addition to plant or facilities to be placed in service or removed from service DURING THE FTY OR THE FPFTY FOR EACH PROJECT IDENTIFIED IN D.2.A OR D.11.B THAT WILL CHANGE UTILITY PLANT BY MORE THAN 3% OF THE CHANGE IN PLANT IN SERVICE SINCE THE PUBLIC UTILITY'S LAST RATE CASE. The supporting documentation shall indicate the effect of the plant addition or removal from service upon THE PUBLIC UTILITY'S rate base, revenue, expense, tax, income and revenue requirement.

Response:

Utility plant for 12 months ended July 31, 2024 (R-2022-3035730): $781,188,473

3% of the change in utility plant in service: $24,435,654

The Company does not have any major additions/removals in D.2.A or D.11.B that meet these criteria to change plant in service by more than 3%.

III-C.1

Request:

Provide a corporate history including the date of original incorporation and [any] EACH subsequent merger or acquisition.

Response:

National Fuel Gas Distribution Corporation ("NFGDC") is a corporation organized and existing under the laws of the State of New York. Its certificate of incorporation was filed April 11, 1973. NFGDC was qualified to do business in Pennsylvania on December 26, 1973.

NFGDC is a wholly owned subsidiary of National Fuel Gas Company ("NFG"). NFG is a public utility holding company registered with the Federal Energy Regulatory Commission ("FERC") under the Public Utility Holding Company Act of 2005. NFG was organized under the laws of the State of New Jersey on December 8, 1902. Its principal office is located at 6363 Main Street, Williamsville, New York 14221. In addition to its ownership of 100% of the capital stock of NFGDC, NFG owns, directly or indirectly, 100% of the capital stock of the following companies:

Company	Incorporation / Formation
Leidy Hub, Inc.	New York, 1981
National Fuel Gas Supply Corporation	Pennsylvania, 1951
Empire Pipeline, Inc.	New York, 2005
Pennsylvania Gas Holdings Corporation	Pennsylvania, 2018
Seneca Resources Company, LLC	Pennsylvania, 1913
National Fuel Gas Midstream Company, LLC	Pennsylvania, 2008
Highland Field Services, LLC	Pennsylvania, 2014
NFG Midstream Covington, LLC	Pennsylvania, 2009
NFG Midstream Processing, LLC	Pennsylvania, 2009
NFG Midstream Trout Run, LLC	Pennsylvania, 2010
NFG Midstream Tionesta, LLC	Pennsylvania, 2012
NFG Midstream Clermont, LLC	Pennsylvania, 2013
National Fuel Resources, Inc.	New York, 1991

The present responsibilities of NFGDC resulted from a corporate reorganization of NFG and certain of its subsidiaries, effective July 1, 1974. Prior to July 1, 1974, three wholly owned subsidiaries of NFG were engaged in retail distribution of gas service. The subsidiaries were Pennsylvania Gas Company, United Natural Gas Company, and Iroquois Gas Corporation.

As of July 1, 1974, the assets of Pennsylvania Gas Company, United Natural Gas Company and Iroquois Gas Corporation associated with gas distribution and the intrastate transmission of gas were transferred to NFGDC. The assets of those companies associated with the storage, production and interstate transmission of gas were transferred to National Fuel Gas Supply Corporation at the same time. The required regulatory approvals were secured for the corporate reorganization, including a certificate of public convenience, docketed at A.97939, and dated August 17, 1973, issued by Pennsylvania Public Utility Commission ("PAPUC").

Since July 1, 1974, NFGDC has furnished retail gas service to the public within the Commonwealth of Pennsylvania and the state of New York. NFGDC also furnished retail gas service to the public within the state of Ohio until 1986, when it sold its Ohio utility properties. A list of counties, cities and other governmental subdivisions in which such service is provided (including areas outside of Pennsylvania), and total population served, follows this narrative.

Since July 1, 1974, NFGDC has acquired the properties of three companies furnishing retail gas service. On May 22, 1975, the PAPUC at A-99200 issued a certificate of public convenience authorizing, inter alia, the transfer, by sale, by Gasco, Inc. to NFGDC of the transmission and distribution property used by Gasco, Inc. in furnishing retail gas service to the public in the Borough of Karns City and in the Townships of Concord, Fairview, Parker Washington and Venango, Butler County. On February 25, 2977, the PAPUC, at A-99910 issued a certificate of public convenience authorizing, inter alia, the transfer, by sale, by Edward S. Dewey and Laurie T. Dewey Trust t/a Dewey Gas Company to NFGDC, of the transmission and distribution property used by Dewey Gas Company in a portion of the Township of Brady's Bend, Armstrong County. On October 31, 1989, NFGDC acquired certain assets of Mercer Gas Company in a transaction approved by both the PAPUC and the United States Bankruptcy Court for the Western District of Pennsylvania. The PAPUC approved the transfer by order of September 14, 1989, at Docket Nos. T-880494, A-121650 F200, A-121850, A-97939, and P-890378. The bankruptcy court issued its order on October 17, 1989, confirming the sale at Case No. 88-00465E. These actions assured continuation of service to approximately 1,420 customers in Mercer Borough and the Townships of East Lackawannock, Findley and Cool Spring.

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-C-Utility Operations
Delivered on January 28, 2026

On January 31, 1989, NFGDC sold to T.W. Philips Gas & Oil Co. a portion of its assets associated with gas utility service in Mars and Callery Boroughs, and Adams, Butler, Forward, Oakland, Penn and Summit Townships Butler County, Pennsylvania. A certificate of public convenience, docketed at A-122350, and dated January 12, 1989, was issued by the PAPUC approving the transfer which affected approximately 1,250 residential and commercial customers.

In the matter of application, A-121850 F0014, the PAPUC issued a certificate of public convenience on November 29, 2007, for application of NFGDC to transfer by sale of real estate property located in the City of Warren, Warren County, Pennsylvania to Mr. John D. Anderson. On August 1, 2020, National Fuel Resources, Inc. (“NFR”), which operated an energy marketing business, completed the sale of its commercial and industrial contracts and certain other assets to Marathon Power LLC. A notice of customer transfer dated July 28, 2020, was filed, and docketed at A-125010. This sale, in conjunction with the turn back of NFR’s residential customers to NFGDC, effectively ended NFR’s operations.

On October 20, 2025, National Fuel Gas Company entered into a Securities Purchase Agreement with CenterPoint Energy Resources Corp., pursuant to which National Fuel will acquire all of the issued and outstanding equity interests of Vectren Energy Delivery of Ohio, LLC, a natural gas local distribution company serving the Dayton, Ohio region. The transaction is expected to close in the fourth calendar quarter of 2026.

National Fuel Gas Distribution Corporation has entered into an agreement to acquire North East Heat & Light Co. (NEHL). On October 7, 2025, NFG and NEHL filed a Joint Application with the Commission for NFG to acquire NEHL. This application is currently pending Commission approval. NEHL is a corporation formed under the laws of the Commonwealth of Pennsylvania. NEHL provides natural gas transmission, distribution, and supplier of last resort services, and is subject to the regulatory jurisdiction of the Pennsylvania Public Utility Commission. NEHL is classified as both a "public utility" and a "natural gas distribution company" under Sections 102 and 2202 of the Public Utility Code (66 Pa.C.S. §§ 102, 2202). NEHL serves approximately 2,900 customers, including about 2,600 residential meters, 200 commercial/public building meters, 70 large commercial meters, two industrial customer meters, and six large industrial customer meters. Additionally, NEHL provides transportation service to eight customers. Its service territory covers North East Township and the Borough of North East.

Provide a list and brief description of internal audit reports and independent audit reports for the most recent 2-year period.

Response:

Information related to internal audit reports and independent audit reports are CONFIDENTIAL. The Company is providing CONFIDENTIAL Attachment III.C.5 in a separately sealed envelope that is marked "CONFIDENTIAL". The Company hereby requests that the content of such envelope be placed in the Commission's NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding.

INTRODUCTION

A. Purpose

This Cost Assignment and Allocation Manual ("CAAM") was developed to identify the procedures that National Fuel Gas Company, ("NFG") and its affiliates follow in assigning and allocating costs among business units, among regulated services and non-regulated business activities and among jurisdictions.

B. Definitions of Terms and Concepts

Affiliate – within this manual, an affiliate may include a subsidiary or division within a business unit.

Affiliate Transaction – refers to the purchase, trade or lease of a good, service, cost or asset between or among affiliates.

Business Unit – within the PeopleSoft Financial System, a business unit refers to a business entity. The business entity may be a company or division within a company.

Common Cost – a cost incurred by one affiliate that benefits one or more affiliates and the nature of which is more general than costs that are directly assigned or that use a cost causative assignment.

Common Department – a department within the New York Division of NFG Distribution Corporation that has been specifically identified as performing work of a general nature which benefits one or more affiliates and whose costs are allocated based on a general multi-factor formula.

Cost Allocation – a process of assigning costs between and among affiliates based on a pre-determined methodology.

Cost Causative Factors – assignment of costs affecting more than one affiliate based on an identified unit of measure.

Direct Costs - costs that are specifically incurred on behalf of one or more affiliates that require no assignment or allocation factor.

FERC Accounts – the Uniform System of Accounts prescribed for natural gas companies subject to the provisions of the Natural Gas Act, published at Title 18 of the Code of Federal Regulations, Subchapter F, Part 201

Non-Regulated Affiliate – an affiliate that is not a regulated utility or pipeline.

Regulated Affiliate – an affiliate that is regulated by the FERC, NY PSC or PA PUC or any other regulatory body.

C. Acronyms and Abbreviations

FERC – Federal Energy Regulatory Commission

GAAP – Generally Accepted Accounting Principles

NFG – National Fuel Gas Company (Parent Company)

NFGDC – National Fuel Gas Distribution Corporation

NY PSC – New York Public Service Commission

NYD – National Fuel Gas Distribution Corporation – New York Division

PA PUC – Pennsylvania Public Utility Commission

PAD – National Fuel Gas Distribution Corporation – Pennsylvania Division

SEC – United States Securities and Exchange Commission

D. Cost Allocation Philosophy

Cost allocations are premised on the use of a fully distributed cost allocation methodology. A fully distributed cost allocation is based on the concept of distributing all costs to business activities, either through direct charges or allocations, based on a consistent method of determining cost causation from period to period so that reasonable cost attribution occurs. Under a fully distributed cost allocation, all direct and indirect expenses such as labor, materials, and other related expenses are included in the cost of the various business activities performed.

In addition, overhead charges, which include fringe benefits, department overhead, and corporate overhead, are applied to the direct and indirect labor charges captured to arrive at the fully distributed cost for each business activity performed. All resultant cost allocations are predicated on some relevant measure of cost causation for that business activity. This overall approach to cost allocation is followed to the extent it is administratively efficient, i.e., following the procedures does not result in incurring a cost that is uneconomical in relation to the benefits achieved.

For NFG's regulated utility affiliates, transactions with other regulated affiliates and payments of interest to NFG constitute a great majority of total affiliate transactions. For example, for PAD in calendar year 2024, transactions with NYD, transactions with NFG's regulated pipeline subsidiaries, and payments of interest to NFG collectively accounted for approximately 96% of total affiliate transactions. Interest payments by PAD and NYD to NFG are made pursuant to (i) long-term notes issued by NFGDC to NFG in accordance with orders of the PA PUC and NY PSC, and (ii) the corporate money pool agreement, which provides that borrowers of short-term funds from the money pool pay interest to NFG in its capacity as administrator of the money pool.

Given the very high percentage of utility affiliate transactions that involve other regulated affiliates or payments of interest to NFG, NFG has, across all affiliate transactions, generally applied a fully distributed cost allocation methodology. NFG's use of fully distributed costs promotes efficiency in accounting for affiliate transactions and seeks to ensure that all parties to affiliate transactions receive fair treatment.

In consideration of the application of an asymmetric pricing principle to transactions between utility affiliates and non-regulated affiliates, Common Departments will periodically evaluate their services and consider the feasibility of market alternatives. These assessments will review various service aspects, including, for example, service descriptions and associated budgets; cost competitiveness for the services provided; metrics, goals and results related to the provision of service; agreed-upon service level expectations; service level performance in comparison to agreed-upon service levels; and consequences for not meeting service level expectations.

E. Three-Step Approach

The "three-step" allocation process begins with the premise that to the maximum extent practical, all costs that can be specifically attributed to a business unit are directly charged to that business unit. Secondly, indirect costs that cannot be directly charged are allocated to business units on the basis of a causal relationship such as the level of activity within various business units, the level of output for each business unit, or the resources consumed by each business unit. The indirect costs are accumulated into clearing accounts or homogeneous pools and are allocated to various business units on the basis of such causal relationships. In the third step, any remaining costs, which cannot be associated with a specific, identifiable, causal relationship, are pooled and allocated to business units on the basis of "common" factors.

This philosophy avoids cross-subsidization between the regulated entities and the non-regulated business activities of NFG, because using this process ensures that all operations are charged for their appropriate share of costs.

SECTION I. CORPORATE ORGANIZATION

A. Corporate Overview

NFG was incorporated in 1902 under the laws of New Jersey and was established as a registered holding company under the Public Utility Holding Company Act of 1935 ("PUHCA 1935"), with oversight by the Securities and Exchange Commission ("SEC").

On August 8, 2005, the Energy Policy Act of 2005 was signed into law. This repealed PUHCA 1935 and enacted the Public Utility Holding Company Act of 2005 ("PUHCA 2005"), which became effective on February 8, 2006. Responsibility for oversight of public utility holding companies was transferred from the SEC to the Federal Energy Regulatory Commission ("FERC") as a result of the Energy Policy Act of 2005.

NFG owns the following direct subsidiaries:

Subsidiary	Abbreviation	Business Type	Regulator
National Fuel Gas Distribution Corporation	NFGDC	Regulated	NYPSC PAPUC
National Fuel Gas Supply Corporation	NFGSC	Regulated	FERC
Empire Pipeline, Inc	Empire	Regulated	FERC
National Fuel Resources, Inc	NFR	Non-Regulated	
Leidy Hub, Inc	Leidy	Non-Regulated	
Pennsylvania Gas Holdings Corporation	PGHC	Non-Regulated	

PGHC owns the following direct subsidiaries:

Subsidiary	Abbreviation	Business Type	Regulator
Seneca Resources Company, LLC	Seneca	Non-Regulated	
National Fuel Gas Midstream Company, LLC	Midstream	Non-Regulated	

B. Description of System Subsidiaries:

National Fuel Gas Distribution Corporation

National Fuel Gas Distribution Corporation is a regulated natural gas utility that operates in both Western New York and Northwestern Pennsylvania. NFGDC is regulated in the New York jurisdiction by the NY Public Service Commission, while the PA Public Utility Commission regulates the Pennsylvania jurisdiction.

National Fuel Gas Supply Corporation

National Fuel Gas Supply Corporation (NFGSC) provides affiliated and non-affiliated companies with transportation and storage services through the operation of an integrated interstate natural gas pipeline system and underground storage fields. NFGSC is regulated by the Federal Energy Regulatory Commission (FERC).

Empire Pipeline, Inc.

Empire Pipeline, Inc. (Empire) operates a natural gas pipeline and provides affiliated and non-affiliated companies with gas transportation and storage services. Empire is regulated by the Federal Energy Regulatory Commission (FERC).

Seneca Resources Company, LLC

Seneca Resources Company, LLC (Seneca) explores for, develops and produces natural gas in the Appalachian region of the United States. Seneca is a wholly owned subsidiary of Pennsylvania Gas Holdings Corporation, which in turn is a wholly owned subsidiary of NFG.

National Fuel Resources, Inc.

National Fuel Resources, Inc. (NFR) marketed gas to industrial, wholesale, commercial, public authority and residential customers in western and central New York and northwestern Pennsylvania. On August 1, 2020, NFR completed the sale of its commercial and industrial contracts and certain other assets. This sale, in conjunction with the turn back of NFR's residential customers to Distribution Corporation, effectively ended NFR's operations.

National Fuel Gas Midstream Company, LLC

National Fuel Gas Midstream Company, LLC (Midstream) operates natural gas gathering and processing facilities in the Marcellus Shale production region of Pennsylvania. Midstream is a wholly owned subsidiary of Pennsylvania Gas Holdings Corporation which in turn is a wholly owned subsidiary of NFG.

Leidy Hub, Inc.

Leidy Hub, Inc. has limited partnership interests in Inter-Atlantic Energy Capital Ventures, L.P. and Energy Capital Ventures Fund II, L.P., which make capital investments in technology-based businesses focused on the natural gas industry and gas distribution companies as well as the broader energy sector.

SECTION II. AFFILIATE SERVICES

A. Affiliate Services Provided

NFG and its affiliated subsidiaries provide a variety of service amongst and between each other. Some services are directly related to the individual company's line of business, such as providing transportation or gas storage services. Other services take advantage of synergies such as operating employees maintaining closely located facilities of other companies. Additionally, there are administrative and general services, which are performed that benefit some or all of the affiliates. This would be true of Accounting, Human Resources, Audit Services, Finance and Corporate Communications.

REGULATED SERVICES:

Service	Provider	Recipient
Administrative	Distribution, Supply	All affiliates
Finance	Distribution	All affiliates
Human Resources	Distribution	All affiliates
Legal	Distribution, Supply	All affiliates
Gas Distribution	Distribution	3rd Party
Gas Measurement	Distribution, Supply	Distribution, Supply, Empire
Gas Transmission	Supply, Empire	Distribution, 3rd Party
Gas Storage	Supply, Empire	Distribution, Empire, 3rd Party
Gas Transportation	Distribution, Supply, Empire	3rd Party
Gas Gathering	Supply	Seneca
Gas Dispatch	Supply	Distribution, Supply, Empire
Operating & Maintenance	Distribution, Supply	All Affiliates

NON-REGULATED SERVICES:

Service	Provider	Recipient
Gas Gathering	Midstream	Seneca, 3rd Party
Gas Processing	Midstream	Seneca
Office Space rental	NFG Co.	Distribution, Supply, Midstream, Empire

B. Services Provided By NFG Co

DEPARTMENT	DESCRIPTION
Executive	Provide management services for all aspects of the business.
Financing	Provides financing for affiliates through issuance of commercial paper, bank lines of credit and equity. Additionally, monitors corporate credit rating and bank relationships.

C. Services Provided By NFGDC – NYD

DEPARTMENT	DESCRIPTION
Accounting	Provide accounting services to maintain the books and records of the company, provide financial reports and analysis, prepare statutory reports, provide accounting research, set accounting policy, maintain allocations and inter-company billings. Maintain the general ledger (GL) system.
Accounts Payable	Provide non-payroll disbursement processing and analysis including account distribution to the general ledger. Resolve problems associated with invoice processing and maintain the accounts payable system.
Asset Management	Provide services to maintain and manage plant accounting and depreciation for affiliate assets.
Audit Services	Perform audit services for management and the Board of Directors, assist external auditors, provide analysis and safeguard company assets.
Benefit Administration	Provide services to design, implement and administer employee benefit programs.
Budget	Develop and maintain an operating budget, provide management with variance reports and analysis. Provide training and instruction to budget preparers.
Cash Management	Provide services to plan, manage and maintain corporate cash flow, maintain the 'money pool', track miscellaneous billings and cash related items.
Corporate Communications	Provides services related to public and media relations, as well as communicating company information to employees and retirees.
Credit, Collections & Receivables Management	Provide services to maximize customer collections and reduce bad debt write-offs. Additionally, provide credit risk analysis of customers and marketers.
Engineering	Provide engineering service and support functions for pipelines and construction projects.

DEPARTMENT	DESCRIPTION
Executive	Provides management and administrative services related to the overall operation and direction of the affiliates.
Executive – Distribution	Provides management and administrative services related to the overall operation and direction of NFGDC.
Finance - General	Provides services to analyze, maintain and monitor corporate financing activities.
Financial Planning	Provide services to prepare, analyze and maintain the corporate earnings forecast, cash and financing needs.
Government Affairs	Provides services to monitor the political arena and maintain relationships with governmental institutions on a state and federal level.
Human Resources	Provide services to manage and maintain employee compensation policies, recruiting and training programs and worker's compensation and disability programs. Additionally, implement and maintain employee programs and statutory programs.
Information Technology	Provide services to manage, design, develop, implement, monitor and maintain information technologies, application systems, networks, mainframe, software, data security, data recovery and data backup.
Investor Relations	Develop and implement programs to educate and inform potential investors, and communicate information to current investors.
Land	Provide service related to facilities management and land support for operations and construction.
Legal	Provide service related to labor and employment law, litigation, contracts, environmental matters, financial reporting and advice on other legal matters.
Materials Management	Manage and maintain material inventories and material logistics. Additionally, monitor material requirements planning (MRP) activity and project material planning.
Payroll	Provide services related to wage distribution, including the distribution of accounting charges to the GL. Manage withholding liabilities and coordinate filing of statutory reports.
Purchasing	Provide services to procure material, equipment and services, analyze corporate spending and support the materials management function. Provide services to manage and maintain leasing activities and disposition of leased materials.

DEPARTMENT	DESCRIPTION
Rates & Regulatory Affairs	Provide services to manage regulatory activities and relationships for NFGDC. Manage, monitor and implement regulatory programs, provide direct support for customer pricing and billing, and develop sales and load forecasts.
Risk	Provide service related to Risk mitigation, Insurance, Environmental issues and compensation and damage claims.
Safety	Provides services to strengthen our safety culture and promote continuous improvement throughout the organization.
Security	Provide security services for company buildings, structures, work sites and personnel.
Tax	Provide services related to tax filing compliance requirements and perform research and consulting on tax issues.
Telecommunications	Provide services to design, implement, monitor and maintain telecommunication networks throughout the affiliates for voice, data, cellular and satellite communication.
Operating & Maintenance – Distribution	Provides service to operate and maintain lines, including changing charts, servicing valves and meters, and other routine maintenance.
Operating & Maintenance – Transmission	Performs routine maintenance and operating functions on transmission lines of affiliates.

D. Services Provided By NFGDC - PAD

DEPARTMENT	DESCRIPTION
Corporate Communications	Provides services related to public and media relations, as well as communicating company information to employees and retirees.
Engineering	Provide engineering service and support functions for pipelines and construction projects.
Executive – Distribution	Provides management and administrative services related to the overall operation and direction of NFGDC.
Government Affairs	Provides services to monitor the political arena and maintain relationships with governmental institutions on a state and federal level.
Human Resources	Provide services to manage and maintain employee compensation policies, recruiting and training programs

	and worker's compensation and disability programs. Additionally, implement and maintain employee programs and statutory programs.
Land	Provide service related to facilities management and land support for operations and construction.
Legal	Provide service related to labor and employment law, litigation, contracts and advice on other legal matters.
Risk	Provide service related to Risk mitigation, Insurance, Environmental issues and compensation and damage claims.
Safety	Provides services to strengthen our safety culture and promote continuous improvement throughout the organization.
Security	Provide security services for company buildings, structures, work sites and personnel.
Operating & Maintenance – Distribution	Provides service to operate and maintain distribution lines for NYD, including changing charts, servicing valves and meters, and other routine maintenance.
Operating & Maintenance – Gathering	Performs routine maintenance and operating functions on gathering lines of affiliates.
Operating & Maintenance – Transmission	Performs routine maintenance and operating functions on transmission lines of affiliates.

E. Services Provided By NFGSC

DEPARTMENT	DESCRIPTION
Commercial Services	Provides marketing services for pipeline affiliates.
Engineering	Provide engineering service and support functions for pipelines and construction projects.
Executive – Supply	Provides management and administrative services related to the overall operation and direction of NFGSC.
Land	Provide service related to facilities management and land support for operations and construction.
Legal	Provides legal services for NFGSC and Empire.
Regulatory	Provides regulatory services for Empire.
Operating & Maintenance – Distribution	Provides service to operate and maintain distribution lines of affiliates, including changing charts, servicing valves and meters, and other routine maintenance.
Operating & Maintenance – Gathering	Performs routine maintenance and operating functions on gathering lines of affiliates.
Operating & Maintenance – Transmission	Performs routine maintenance and operating functions on transmission lines of Empire.

F. Services Provided By Midstream

SERVICE	DESCRIPTION
Gathering Service	Provides natural gas gathering services for Seneca Resources.
Gas Processing	Provides natural gas processing services for Seneca Resources.

Note: Leidy Hub and NFR do not provide services to the other affiliates at this time. As previously mentioned, the August 1, 2020 sale of NFR's commercial and industrial contracts and certain other assets combined with the turn back of NFR's residential customers to Distribution Corporation has effectively ended NFR's operations.

SECTION III. TRANSACTIONS WITH AFFILIATES

A. Overview

As a diversified energy company with an integrated product and service line, transactions between affiliates take place and must be accounted for properly. Each affiliate must be sure to accurately record the transaction in accordance with the rules and regulations set forth by the various regulatory bodies, SEC and GAAP.

The following are typical transactions between the affiliates.

TRANSACTION	DESCRIPTION
Money Pool	Invest in or borrow funds from the corporate money pool - includes the receipt or payment of interest.
Pay Dividends to Affiliates or NFG Co.	Individual affiliates pay dividends to parent entities.
Purchase Gas Transportation Services	Certain affiliates will purchase gas transportation services from affiliates.
Purchase Gas Storage Service	Certain affiliates will purchase gas storage services from affiliates.
Purchase Gas Gathering Services	Certain affiliates will purchase gas gathering services from affiliates.
Purchase Gas Processing Services	Certain affiliates will purchase gas processing services from affiliates.
Gas Used By Company	Under certain circumstances, provide gas to affiliates to heat or operate facilities.

SECTION IV. ACCOUNTING CHARGE APPLICATION

A. Accounting Charges

National Fuel Gas and most of its affiliates employs a responsibility based accounting charge methodology. This means that every charge is tied back to an individual responsibility center so someone is responsible for the cost. Seneca Resources, being a self-contained entity, employs a system driven by the account number.

Here we will focus on the responsibility-based system used by NFG and the regulated affiliates. In this system, the responsibility center is identified as a department.

Accounting charges are made up of four items – business unit, account number, department ID and product. All four pieces are required for every financial transaction.

In addition, if the charges are related to capital expenditures, a project and activity ID are also needed by the project costing system. The project costing system is used to track and analyze project expenditures, while the general ledger system only records the expenditures going into the appropriate ledger account associated with the project.

1. Business Unit:

The business unit (BU) is a code that indicates which affiliate is associated with the charges. Each affiliate has a unique BU.

Affiliate	BU	Affiliate	BU
National Fuel Gas Co	NFGG1	NFG Midstream – Covington	M01G1
NFG Distribution – NY	DNYG1	NFG Midstream – Processing	M02G1
NFG Distribution – PA	DPAG1	NFG Midstream – Trout Run	M03G1
Empire Pipeline, Inc	EMPG1	NFG Midstream – Tionesta	M06G1
NFG Supply	SUPG1	NFG Midstream - Clermont	M07G1
NFG Midstream Co LLC	MIDG1	NFG Midstream – Wellsboro	M08G1

The Organization Chart in Appendix B will display the structure and most current affiliate listing.

2. Account Number:

NFG's regulated affiliates follow the FERC Chart of Accounts – also known as the Uniform System of Accounts (USoA). The USoA account numbers group the costs at a level of detail that can be used by all utility and pipeline companies and are then comparative from a regulatory standpoint. For our purposes at NFG, we have expanded the chart of accounts to include much more detail to provide us with the ability to budget and analyze our costs in greater detail.

For instance, while the USoA specifies the use of account 816 – Storage Well Expenses, NFG adds another layer of accounts below that to provide detail for analysis of the storage well costs.

FERC	816	Storage Well Expense
NFG	520200	Sonolog Well
	520240	Bail / Swab Well
	520260	Flow Testing
	520390	Storage Well – Water Sampling

NFG's non-regulated affiliates follow a separate chart of accounts that parallels the FERC chart of accounts, but is more in line with their business.

Both the regulated and non-regulated charts of account are available on the Infonet under the E-Docs heading.

3. Department ID:

NFG's PeopleSoft entities use a Department ID to indicate the department or area that is responsible for the charges that were incurred. Each department is unique to a business unit as a control to make sure that costs are charged to the proper affiliate.

For analysis, this provides an audit trail to the source of the charges and is the key to determine the proper department for budgeting purposes.

The Department listing is available on the Infonet under the E-Docs heading.

4. Product:

NFG's PeopleSoft entities use a Product code to classify the type of cost being incurred. It categorizes the costs for analysis purposes.

For instance, while an overall cost might be considered as an Outside Service, the product will classify that Outside Service as an engineering service, legal service, computer consultant or construction contractor.

The product is valuable for budgeting, rate case analysis for the regulated companies and financial statement analysis.

A list of the products is available on the Infonet under the E-Docs heading.

5. Project ID

Project ID is used in NFG's PeopleSoft entities to group and analyze costs related to work being performed on a project. It is used to track the project costs at a detailed level, whereas the general ledger will only keep summarized information. Each project is assigned an individual project id to keep the costs separate.

The detailed information is necessary for the unitization process, which is the process that moves the costs from the in-progress construction phase into a completed asset. It is also used for analysis purposes for project management and capital budgeting.

6. Activity ID

Activity ID goes together with the Project ID and is used in NFG's PeopleSoft entities. It is a code that is the link between the general ledger account number and the project. Each project can only have one activity ID and therefore one account number. Generally speaking, a construction project will be charged to account 107000 – Construction Work in Progress.

SECTION V. COST COLLECTION AND COST ASSIGNMENT

A. Cost Collection

Costs are collected by the various accounting sub-systems and general ledger systems employed by the various affiliates. The majority of the business units use the PeopleSoft general ledger system while Seneca uses the Quorum system. The sub-systems used to collect accounting charges would include Accounts Payable, Accounts Receivable, Payroll, Inventory, Plant Accounting, Asset Management, Customer Information System, Supply Billing System, Empire Billing System, Cash Management and the Local Production System.

Within each system, specific accounts or account and department combinations are applied to transactions to assign the costs to the proper affiliate and financial line item. In most cases, these would be direct charges to O&M expenses or capital expenditures. In other cases, a specific account or groups of accounts are used to gather the costs that are to be allocated.

B. Cost Assignment

Individuals familiar with the various transactions or under the guidance of those individuals perform cost assignment following established guidelines.

The basic guideline for cost assignment can be summarized as follows:

(1) Directly assign as many costs as possible;
(2) Allocate based on cost causative factors; or
(3) Use a general allocation when costs cannot be assigned based on a cost causative factor. Costs related to Common Departments are allocated across the affiliates based on the pre-determined common cost allocation.

1. Direct Charging of Costs

Whenever possible, costs are directly assigned to specific affiliates. This is true for all transactions including labor, inventory, vendor invoices and any others.

A major portion of the directly assigned costs will be labor and labor-related items. For example, when a Supply employee works on a Supply storage well, the costs are charged to an account in the FERC detail range for storage expense with the proper Supply department ID for the storage field where the well is located. If that Supply field person performed work for Distribution, the individual's time will be charged to a FERC account for distribution expense with an associated Distribution department ID which will then generate a loaned and borrowed labor transaction and create a receivable and payable transaction between the two companies.

The same is true for vehicle charges, accounts payable invoices, and inventory transactions. When the costs pertain to a specific affiliate, they should be charged to that affiliate.

2. Indirect Charging of Costs

Where direct charging is not feasible, costs should be assigned to affiliates based on pre-determined or causal factors. There should be solid rationale for the assigning of the costs.

One example of indirect charging would be when paying sales tax and freight on an invoice. If the invoice was paying for the purchase of four items with two going to Supply and two going to DNY, the tax and freight could be charged 50% to each affiliate based on the fact that the material was split 50/50.

Another example would be labor that was used to build a report for use by DNY, Supply, and NFG. In a case where the work is being done and will benefit multiple affiliates, the charges should be split among the affiliates. The question to ask is should it be 1/3 each or is there some other mitigating factor that should be considered. If it is an equal effort, the charges should be split 1/3 each.

A third example of indirect charging is through the use of clearing accounts. In the general ledger, these are a series of accounts used to accumulate costs and then, on a monthly basis and using a causal relationship, the costs are allocated to appropriate business units and/or departments. These accounts are in the 184xxx series.

Assignment of charges should not be based on the budget; rather budgets should reflect the reality of the charges. When possible, documented surveys or studies should be used to back up the decision.

3. General (Common) Allocation

In cases where the department charging the costs is considered a Common Department, the accounting charges will be accumulated and then allocated to affiliates based on the Common Expense Formula. Common charges occur when the costs are generic in nature and benefit all or some of the affiliates. In this case, the charges are allocated based on a formula with multiple factors that attempts to provide a relative weighting that is fair to each affiliate.

As an example, an Accounting department employee working on the consolidated financial statements would need to charge all the affiliates. Unless the work could somehow be divided up by individual affiliate, an overall allocation would be used to spread the costs to each one.

The common cost should be used as a last resort method to apply accounting charges, as it applies a generic methodology to cost assignment. Costs should only be charged to the pool for those expenses that are not directly or indirectly assignable.

4. Convenience or Accommodation Payments

Payments made by one affiliate on behalf of another affiliate are considered convenience or accommodation payments. Not to be confused with actual transactions between affiliates where a good, service or product is provided, convenience or accommodation payments occur when a single payment is made to a vendor that includes amounts for multiple entities.

For example, an invoice from a legal firm is paid by NFG Co. The invoice may have amounts that relate to services provided to NFG Co., Dist-NY, and Supply. The legal service was not provided by NFG Co., but the affiliates would still book an Inter-company payable to NFG Co. and then reimburse NFG Co. for the payment.

While this is convenient, we encourage employees and vendors to identify the individual affiliates and bill them directly.

SECTION VI. LABOR CHARGES

A. Overview

Labor is generally reported to the Payroll Department through the use of a timesheet or entered directly into the Time & Labor system. In some cases, the timesheet is used to report the number of hours worked, the accounting charges, plus any exception time. This would be considered positive time reporting and is mainly used by hourly field personnel. The other method, considered exception reporting, is used mainly to report exception hours, plus any accounting charge exceptions. This is typically used for salaried employees and administrative hourly employees. Labor is reported weekly for hourly employees and monthly for salaried employees.

Within the payroll system, every employee is assigned to a home company and a home department. When time is recorded, the system compares the employee's information to the recorded company and department to determine if the labor is regular labor or loaned and borrowed labor.

Regular labor generates accounting charges within the employee's home company only. The employee's hourly pay rate is multiplied by the hours and applied to the accounting charges that were indicated. In addition, vacation & holiday load is added to the same accounting charges as the labor. If the employee indicated the use of a vehicle, the vehicle & tool load is also applied and charged to follow the labor. Fringe benefits would also be added if required.

Fringe benefits are not added on to regular labor charged to O&M. The fringe benefits related to that labor remains in the home company's fringe benefit expense accounts. Fringe benefits are loaded on to labor that is charged to a capital account, clearing account, inter-company account, and other accounts as specified. (See fringe benefit load chapter for more details).

B. Accounting Charges

Labor can be charged to O&M expense, capital accounts, undistributed accounts, clearing accounts, inter-company accounts or OID or "below the line" accounts for specific costs such as lobbying.

O&M charges are determined based on the type of work being performed. This is especially important for field personnel, as administrative employees will usually charge a more generic A&G account.

Capital work is charged by the use of a project number. Each project number has an associated capital account – CWIP, RWIP or Preliminary Survey based on the nature of the project.

Undistributed accounts are used by a small group of employees performing work that has been specifically identified as requiring special treatment based on regulatory requirements.

Clearing accounts are used by specific departments whose costs are allocated after the costs for the month have been collected.

Inter-company accounts are used when direct charging labor to the non-regulated affiliates not included in the PeopleSoft accounting system. The charges are accumulated and then billed to those companies manually each month.

Other Income and Deduction accounts are used when the charges are not to be included in the cost of service. These would specifically relate to time charged for lobbying by identified employees.

C. Direct Labor

When work is performed relating to a specific task within a specific affiliate, the labor hours and accounting charges should be directly charged. There would be no need for any breakdown or allocation of the charges or costs. This would be considered direct charging of labor.

Direct labor can be charged to any of the accounts indicated in section B.

D. Loaned & Borrowed Labor

When an employee from one affiliate performs work for another affiliate, the time spent is charged to the affiliate for which the work was performed. The charging is accomplished by indicating to payroll that a number of hours in the pay period were worked outside of the employee's home department.

Within the payroll system, the above action triggers the generation of multiple entries to record the loaned and borrowed labor. Included in the entries are: the recording of the inter-company payable and receivable, the recording of the proper accounting charges, and the loading of vacation & holiday and fringe benefits. Additionally, vehicle and tool usage would be applied as required.

SECTION VII. COMMON COST ALLOCATION

A. Background

The Common Cost Allocation is a monthly allocation of "common" administrative and general department costs. The common costs represent costs incurred in New York Distribution departments that have a benefit to the Pennsylvania jurisdiction and/or to other NFG subsidiaries. While some costs may be direct charged to the subsidiaries receiving the benefits, others are more generic in nature and cannot be specifically charged. The common cost allocation seeks to allocate these charges using a three factor formula in a fair manner.

The common cost formula was developed as part of a NYD rate proceeding and has been consistently used in PAD rate proceedings and Supply FERC proceedings. The three factors included in the formula are: Net Plant, O&M expense, and Total Throughput. The formula is updated at the beginning of each fiscal year using the prior year's fiscal results in the computation. The formula will be updated during the fiscal year if there is a significant acquisition or disposition that materially impacts the three factors in the formula. See the attached Common Cost Allocation Summary for a listing of the Departments included in the Common Cost allocation.

B. Application

On a monthly basis, just prior to the O&M close, the allocation is run. The specific Department and Account combinations' charges are gathered and then allocated based on the predetermined allocation percentages. The system generates the appropriate journal entries to book the expense credit in NYD and off-setting receivable from the companies being charged. For PAD, Supply, and Empire Corporation, the system also generates the appropriate expense charges and offsetting payable to NYD. For the non-regulated companies, the system generates a receivable on NYD's books and then a manual bill is prepared for the subsidiaries. The subsidiaries record the charges and remit payment to NYD for services rendered.

The allocation is done in total. Allocations are not generated on individual invoices or separate source transactions. The audit trail is the allocation summary and the various feeder system audit trail reports.

Notes:

The common cost allocation is a last resort type of allocation.

SECTION VIII. OTHER ALLOCATION METHODS

A. Allocation Factors

When costs cannot be directly charged to an affiliate company, an allocation is used to apply the accounting charges. Since many costs are shared between the affiliates, it is important to ensure that the costs are applied fairly.

While the Common Cost Allocation Methodology is used for more of the administrative and general or governance costs, NFG employs various other methods to allocate costs between and among affiliates. These allocations are based on factors that are more causative in nature. The following is a list of the various factors employed:

A	Number of customers	For costs driven by the number of Utility Customers, the ratio of customers between NYD and PAD is used.
B	Number of customer bills	For costs driven by the number of Utility Bills, the ratio of bills between NYD and PAD is used.
C	Ratio of Throughput	For gas supply administration costs between NYD and PAD.
D	Ratio of Transportation Sales	For costs related to transportation activities, the ratio of transportation sales between NYD and PAD will be used.
E	Ratio of Meters – Small	For costs related to the maintenance of small and large meters, the factor is based on the number of meters worked on by state.
F	Ratio of Meters – Large	For costs related to the maintenance of small and large meters, the factor is based on the number of meters worked on by state.
G	Percentage of IS Analyst Time Used	For IS labor costs, time is collected and then a percentage is calculated based on the work performed.
H	Number of Temperature Correctors	For costs related to the maintenance of pressure and temperature correctors, the allocation is based on the percentage of pressure and temperature correctors in the field.
I	Number of Pressure Relief Valves	For costs related to the maintenance of regulators and pressure reliefs, the factor is based on the percentage of regulators and pressure reliefs in the field.
J	Number of Employees	For costs driven by number of employees receiving the services or benefits of the department's activities.

K	Number of Messenger Stops	For messenger service costs, a ratio based on the number of messenger stops is used.
L	Number of Computers	For costs driven by computer connectivity to various systems through the NFG intranet.
M	Number of Telecommunication Basic Licenses	For telecom costs driven by connectivity to the telecom system.
N	Number of Internet connection ports.	For costs driven by computer connectivity to various systems through the NFG intranet.
O	Square footage	For costs driven by the square footage by department at the Main Office making use of the service or equipment, or costs driven by square footage occupied by affiliates at other shared locations.
P	Placement after Training	For costs related to HR rotators during their rotation.
Q	Time study, meter study, invoice analysis and shipper volume schedules for throughput	For gas measurement expense for Supply and Empire.

B. Methodology Application

The following table contains information regarding the current clearing accounts, their home business unit (BU) and the methodology used to allocate the costs:

1. Information Technology:

These are the costs to operate and maintain the Information Technology department and the various computer networks and systems. In the case of account 184150, the costs are related to capital additions and will be charged to capital accounts in the various subsidiaries.

Account	BU	Cost To Be Allocated	Allocation Methodology
184140	DNYG1	Information Technology expenses, which includes labor and benefits.	Costs are allocated based on analyst hours charged to various IT time reporting groups.
184170	DNYG1	Information Technology Network costs, which include labor, benefits, professional service provider (PCI), equipment leases, maintenance agreements, telecommunication costs, utilities and other miscellaneous costs.	Costs are allocated based on a percentage of system connections, including PCs and Tough books.
184150	DNYG1	Information Technology costs primarily related to the roll-out of new computer equipment or software (such as a new firewall) that will be capitalized across the subsidiaries.	Costs are allocated based on a percentage of system connections for each subsidiary.

2. Telecommunications:

These are the various costs of operating and maintaining the Company's telecommunication and data network. Costs include labor, contractor charges, maintenance agreements, leased lines and equipment and various other charges related to providing service.

Account	BU	Cost To Be Allocated	Allocation Methodology
184430	DNYG1	Telecom Costs for Phone Usage & Equipment	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.
184435	DNYG1	Telecom - Tie Lines & Wats	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.
184445	DNYG1	Telecom - Remote Terminal Usage	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.

Account	BU	Cost To Be Allocated	Allocation Methodology
184450	DNYG1	Telecom - Pa Phone Use & Equipment	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.
184455	DNYG1	Telecom - MSW	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.
184460	DNYG1	Telecom - Erie SC	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.

3. Messenger Expense:

These are costs related to the delivery of material and mail between NFG locations.

Account	BU	Cost To Be Allocated	Allocation Methodology
184300	DNYG1	Messenger Expense	Costs are allocated on the basis of number of messenger stops.
184300	DPAG1	Messenger Expense	Costs are allocated on the basis of number of messenger stops.
184300	SUPG1	Messenger Expense	Costs are allocated on the basis of number of messenger stops.

4. Meter Shop:

These are the costs related to maintaining the various meters and metering equipment used by affiliates.

Account	BU	Cost To Be Allocated	Allocation Methodology
184700	DNYG1	Meter Shop expenses – Regulators and Pressure Relief, includes labor, benefits, materials, repair parts	Costs are allocated based on the percentage of regulators and pressure reliefs in the field.
184705	DNYG1	Meter Shop expenses – Temperature corrector, includes labor, benefits, materials, repair parts	Costs are allocated based on the percentage of pressure and temperature connectors in the field.
184707	DNYG1	Meter Shop expenses – general shop / warehousing, includes labor, benefits, materials, repair parts	Costs are allocated based on the average of the percentages of the small and large meter programs plus temperature correction and meter regulators.
184710	DNYG1	Meter Shop expenses – small meter, includes labor, benefits, materials, repair parts	Costs are allocated based on the meters worked on by state in prior 12 months.
184720	DNYG1	Meter Shop expenses – large meter, includes labor, benefits, materials, repair parts	Costs are allocated based on the meters worked on by state in prior 12 months.

5. Miscellaneous Customer Services:

These are costs related to producing and mailing bills to customers.

Account	BU	Cost To Be Allocated	Allocation Methodology
184240	DNYG1	Customer Billing	Costs are allocated based on the ratio of customer bills between NYD & PAD.
184245	DNYG1	Customer Postage	Costs are allocated based on postage usage.

6. Supply Services:

The following are costs related to the movement of gas through the pipeline network.

Account	BU	Cost To Be Allocated	Allocation Methodology
184220	SUPG1	Gas Measurement Expenses, including labor, benefits, and contractor and office expenses.	Costs are allocated based on departmental labor hours. Study performed by department.
184250	SUPG1	Gas Supply Administration, including labor, benefits, and contractor and office expenses.	Costs are allocated based on a rolling three-year average of the throughput of Distribution NY and Distribution PA.
184270	SUPG1	Gas Control including labor, benefits, and contractor and office expenses.	Costs are allocated based on departmental labor hours. Study performed by department.

7. Miscellaneous Services:

These are costs related to the shared use of the mail, print and copy rooms throughout the main office, and also the cost of confidential document destruction.

Account	BU	Cost To Be Allocated	Allocation Methodology
184617	DNYG1	MPC Room Clearing	Costs are allocated based on the number of employees at 6363 Main St
184618	DNYG1	Certified Document Destruction	Costs are allocated based on the number of employees at 6363 Main St

8. Human Resources Management Trainees

These costs are related to the labor, benefits loads, and office supplies for the employees participating in the Management Trainee program. The employees use one home department but work in various departments throughout the company. At the end of the two years, employees are assigned a permanent work location and begin recording expense under that department ID.

Department	BU	Cost To Be Allocated	Allocation Methodology
1457	DNYG1	HR Management Trainees	Costs are allocated based on historical placement of employees upon completion of two-year program

SECTION IX. ALLOCATION OF RENT

A. Main Office Rent

There is one transaction that begins in the non-regulated affiliates that includes costs that are allocated to both regulated and other non-regulated affiliates. The one allocation based transaction is the rent for 6363 Main St.

NFG Co. owns the leasehold for the office building at 6363 Main St. in Williamsville, NY and leases space in the building to Distribution, Supply, Empire, and Midstream. The lease costs are based on an allocation related to the square footage of office space for each entity.

The lease affiliates also allocate the charges to individual departments using the square footage basis, so that the charges can be allocated across affiliates based on the work performed by the individual departments.

For instance: In NFGDC, DNY is allocated rent based on the square footage of space used. DNY then further allocates the cost to each of its departments located in the building. The individual departments then charge or allocate their costs based on the work they perform across the affiliates. So while DNY may be allocated 80% of the lease costs, they may end up with only 55% of the total costs once the allocation cycle is complete.

B. Other Rent

In addition to the Main Office, affiliates of NFG Co. may share other offices, service centers and field locations. Rent is allocated among affiliates that share space based on the square footage occupied by each affiliate.

SECTION X. OVERHEADS

Many transactions between affiliates can be directly measured and priced out based on contracted rates or tariff rates. In these transactions, multiplying a quantity and price results in the cost. Many other transactions, however, involve indirect costs.

For example, when borrowing an employee the cost includes not only the employee's labor rate, but also their fringe benefits, vacation & holiday load, and possibly vehicle charges. Constructing a pipeline results in engineering overhead being added to the costs, and requesting material from a warehouse or stockroom includes an inventory overhead.

These overheads are calculated and reviewed on a regular basis, usually annually, to ensure that the transactions between affiliates are equitable.

A. Employee Benefits

Labor transactions between affiliates are charged not only the actual labor cost, but also an amount for fringe benefits and vacation & holiday load. The purpose of loading the labor with these costs is to ensure that the total cost of labor follows the accounting charges. In addition to labor between affiliates, benefits are also included on all capitalized labor and all labor charged to clearing accounts. From a regulatory standpoint, benefits are not just expensed, but follow all labor.

There are two benefit loads within our employee benefits –Vacation & Holidays and Fringe Benefits:

Vacation & Holidays Load (V&H) is a means of spreading the cost of vacation time and holiday time across the actual work performed by the employee. Employees may spend a majority of their time performing capital work or loaning their labor to another affiliate. By adding the V&H to the labor, the actual employee labor costs directly follow the labor.

V&H is calculated annually and is the cost of vacation and holidays divided by total labor.

Fringe Benefit Load (FB) is the method of burdening the labor costs with the cost of fringe benefits when the labor is not charged to home company O&M expense. The fringe benefits represent the cost of non-labor benefits, such as medical insurance, pension, dental care, post-employment benefits, and life insurance.

Fringe benefits are added to all non-home company O&M labor, including affiliate labor, clearing account labor, capital labor and labor charged below the line. Once again, from a regulatory standpoint, fringe benefits are not just expensed, but follow the labor charges.

Fringe benefit loading is calculated based on the total fringe benefits divided by total labor. (See appendix for a sample fringe benefit and vacation & holiday calculation.)

B. Vehicle & Tools

Vehicle & Tool load (VT) is the method of distributing the costs related to operating and maintaining a fleet of vehicles and construction tools. Direct costs such as lease payments, depreciation, fuel, maintenance and repairs are coupled with indirect costs such as garage costs, fuel tank maintenance and back office expenses to determine a fair hourly rate to charge when the vehicles are used.

Vehicle costs are accumulated in clearing accounts and subsequently cleared using an hourly usage rate. The rates are calculated annually, then reviewed and adjusted throughout the fiscal year as required. The rates are calculated by taking the total cost of the vehicles divided by the number of working hours in the fiscal year. (See appendix for an example of the calculation methodology and sample rate schedule.)

Separate vehicle fleets are kept by Dist-NY, Dist-PA, Supply, and Midstream, and separate rates are determined for each entity. In cases where employees are loaned to an affiliate, the vehicle cost is also loaned using the rates of the employee's home company.

The vehicle usage is recorded through the payroll time reporting system. Employees include the Vehicle ID that they used along with their payroll hours. The system then charges the vehicle to the same accounting charges that were used for the labor. The rate is applied and charged along with other payroll overheads using a transportation product to identify the charges.

Vehicle & Tool Accounts:

Account	Tools - Description	Account	Vehicles - Description
184015	Main Line Trucks	184510	Transport Vehicles for Repair/Maint.
184020	Main Line Trucks - Leased	184515	Transportation Equipment
184025	Excavating Equipment	184520	Auto Compact
184030	Excavating Equipment - Leased	184530	Meter Reading Vehicle
184035	Miscellaneous Equipment	184532	Meter Reading Vehicle - Electric
184038	Other Construction Equipment	184535	Meter Reading Vehicle - Leased
184040	Miscellaneous Equipment - Leased	184540	Auto - Non-Compact
184050	Cranes	184545	Auto - Non-Compact - Leased
184055	Welding Equipment	184550	Trucks - 1/2 & 3/4 Ton
184060	Welding Equipment - Leased	184555	Trucks - 1/2 & 3/4 Ton - Leased
184065	General Construction Equipment	184560	Trucks - 1 Ton and Larger
184070	Construction Equipment - credit	184565	Trucks - 1 Ton and Larger - Leased
		184570	General Transportation Equipment
		184575	Transportation Vehicle - Credit
		184580	Transportation Expense Split
		184585	Vehicle Breakdown

C. Engineering (Unicap)

The Engineering Department provides many services which can be directly and indirectly related to work performed by the operations and construction groups. In cases where an engineer is directly assigned to a large project, their labor and benefit costs can be easily charged to the project. However, when the work being done provides benefits to many projects, it is much more difficult to directly assign the costs. For this reason, an engineering overhead factor is used to allocate a portion of the Engineering Department's costs across all on-going construction projects.

Each Engineering Department accumulates its own A&G costs. On a periodic basis, the department reviews the work being performed by its employees to determine the percentage to be charged to the capital projects. This percentage is then used to apply the Engineering Overhead or Unicap (IRS Sec 263 Uniform Capitalization) amount to the various projects.

The amounts are applied to the projects via an allocation in the PeopleSoft system. First an amount is determined from the department's actual expenses, then that amount is spread across the open projects.

D. Inventory

Inventory overheads are collected in account 163 as directed by the FERC instructions. Inventory and warehousing costs such as labor, rent, utilities and maintenance of the warehouse facilities, as well as freight charges, sales tax, inventory price adjustments and other inventory overheads are accumulated and form the basis for the inventory overhead.

The Inventory Overhead is added to each inventory issue by the PeopleSoft Inventory Module. The item price is multiplied by the number of units issued to determine the inventory issue value. That value is then multiplied by the overhead rate to determine the amount of inventory overhead to add to the transaction. The issue and the overhead are accounted for separately for auditing purposes, but are charged to the same accounting charges. Overhead is added to all inventory transactions whether in the home company or inter-company.

E. AFUDC

AFUDC or Allowance for Funds Used During Construction is a construction overhead related to the cost of borrowed funds or other funds used for utility construction projects. Since the construction costs aren't included in "rate base" during the construction period, the company does not earn a return on such costs. AFUDC can be viewed as a means of making us whole during the construction period.

By official definition, it is a component of the construction of Property, Plant and Equipment ("PP&E") defined in the applicable regulatory system of accounts as

including “the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate on other funds when so used.” AFUDC is capitalized in those instances in which the related construction work in progress is not afforded rate base treatment and is reflected in the Statements of Income as a reduction to “Interest expense” and “Other income and expense, net” to the extent it represents borrowed funds and other funds used in construction, respectively.

SECTION XI. ALLOCATION PROCESS

A. Overview

Costs collected during the accounting month are aggregated and allocated as part of the month end closing process. The majority of the allocations are processed automatically through the PeopleSoft allocation module, while the three Information Services allocations are processed using a spreadsheet.

B. Processing

Allocations are performed once a month during the monthly closing process. They can be run once the feeder system journal entries are received and posted, as well as all manual journal entries that contain O&M or clearing accounts.

There is a specific order in which the allocations are run, which is detailed in the monthly processing checklist. The order is important as one allocation may generate charges that are further allocated in a later step. In most cases, the previous allocation must also be posted before continuing.

Once the allocation process is completed, report GL1601 is run to verify the allocations. This report shows the activity or balance in the accounts. If the process ran correctly, the balances in the accounts should be zero.

SECTION XII. BILLING AND PAYMENT

Once the closing cycle is complete and all the affiliate charges are identified, an inter-company billing process takes place to provide an invoice for the affiliates so that payments can be made.

A. Procedures

1. Billing:

Services and shared costs between affiliates are generated throughout the accounting month and accounting close cycle. As near as possible to the end of the monthly closing, the affiliate charges are reconciled and a detailed invoice is prepared. The invoice includes detail and references back to the transactions that generated the entries.

The review and analysis of the costs is managed through the budgetary process. Each department receives reports outlining the costs charged to them on a monthly basis. As many administrative departments within NFGDC and NFGSC perform functions that cross affiliates, the department heads review the detail costs and manage the expenditures. Variances from budget are analyzed and reported during the budget review meetings held monthly.

Additionally, an accountant reviews the inter-company reports and makes sure that the Inter-Company Receivables and Payables reconcile. Two reports are used in this process, GL1650 and GL10610.

2. Payment:

Once the invoice is reviewed and approved for payment by the Controller, monies are wired between affiliates (checks are cut for the smaller amounts).

updated for FY2026

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-D-Rate Base
Delivered on January 28, 2026

III-D.14

Request:

IF THE PUBLIC UTILITY FURNISHES MORE THAN ONE TYPE OF PENNSYLVANIA JURISDICTIONAL SERVICE AND HAS INCLUDED IN RATE BASE PLANT IN SERVICE THAT IS USED FOR MORE THAN ONE TYPE OF SERVICE, IDENTIFY THE PLANT, INCLUDING THE APPLICABLE PLANT ACCOUNT NUMBERS, AND PROVIDE THE ESTIMATED PERCENTAGES AND AMOUNTS OF THE ASSETS USED FOR EACH TYPE OF JURISDICTIONAL SERVICE.

Response:

The Company has not included rate base that is used for more than one type of Pennsylvania jurisdictional service.

Prepared by or under the supervision of: Monika M. Duszenko

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-D-Rate Base
Delivered on January 28, 2026

III-D.15

Request:

Provide all workpapers and supporting documentation showing the derivation of the projected balances for the FTY and the FPFTY of each of the following:

III.D.15.a Contributions in aid of construction.
III.D.15.b Customer and developer advances for construction
III.D.15.c Customer deposits.

Response:

15.a. and b. The Company is not making any claims for projected balances.

15.c. Please refer to the direct testimony of Monika M. Duszenko.

Prepared by or under the supervision of: Monika M. Duszenko

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-D-Rate Base
Delivered on January 28, 2026

III-D.16

Request:

Provide schedules supporting claimed amounts for plant in service by function and by account for the HTY, the FTY and the FPFTY.

Response:

Please refer to National Fuel's Exhibit A (Historic), Exhibit A (Future) and Exhibit A (Fully Projected), Schedule C for plant balances.

Prepared by or under the supervision of: Monika M. Duszenko

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-D-Rate Base
Delivered on January 28, 2026

III-D.17

Request:

Provide supporting schedules which indicate the procedures and calculations employed to develop the original cost OF plant and applicable ACCUMULATED DEPRECIATION INCLUDED IN THE PUBLIC UTILITY'S CLAIMED RATE BASE FOR the HTY, the FTY and the FPFTY as APPLICABLE

Response:

The attached schedules set forth the bring forward of the original cost for the historic test year (September 30, 2025), future test year (September 30, 2026), and fully projected future test year (October 31, 2027). The attached schedule III.D.17 – Attachment 4 Reserve Bringforward.pdf set forth the development of the book reserve as of the historic test year (September 30, 2025). The schedules for the development of the book reserve for the future test year and fully projected test year are included in Exhibit C-Future and Exhibit C-Fully Projected, respectively.

Prepared by or under the supervision of: John C. Spanos

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-D-Rate Base
Delivered on January 28, 2026

III-D.18

Request:

Provide a schedule showing details of THE ADJUSTMENTS TO plant in service and accumulated depreciation THAT WERE MADE TO DERIVE THE AMOUNTS INCLUDED IN THE PUBLIC UTILITY'S RATE BASE CLAIMS for the HTY, the FTY and the FPFTY AS APPLICABLE.

Response:

Please refer to National Fuel Exhibit A, Schedule C.2 HTY; FTY; and FPFTY for adjustments to plant in service.

Please refer to National Fuel Exhibit A, Schedule C.3 HTY; FTY; and FPFTY for adjustments to accumulated depreciation.

Prepared by or under the supervision of: Monika M. Duszenko

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-E-Rate of Return
Delivered on January 28, 2026

III-E.6

Request:

Provide a schedule of debt and preferred stock of the public utility, the parent company and the consolidated group as of the HTY year-end and most current date. Note projected new issues, retirements, and other major changes from the comparable historical data. Include all of the following details:

III.E.6.a Date of issue.
III.E.6.b Date of maturity.
III.E.6.c Amount issued.
III.E.6.d Amount outstanding.
III.E.6.e Amount retired.
III.E.6.f Amount reacquired.
III.E.6.g Gain or loss on reacquisition.
III.E.6.h Coupon rate.
III.E.6.i Discount or premium at issuance.
III.E.6.j Issuance expenses.
III.E.6.k Net proceeds.
III.E.6.l Sinking fund requirements.
III.E.6.m Effective interest rate.
III.E.6.n Dividend rate.
III.E.6.o Effective cost rate.
III.E.6.p Total WEIGHTED average effective cost RATES FOR DEBT AND PREFFED STOCK.

Response:

Please see attached. Note there is no preferred stock in the capital structure.

Prepared by or under the supervision of: James C. Welch

Responses to Section 53.53 - III-E-Rate of Return
Delivered on January 28, 2026

III-E.7

Request:

If a claim is made for a cost of debt that exceeds the cost of debt shown in the nominal cost schedule under E.6 because of, for example, convertible features, sale with warrants or other reason, provide a full statement of the basis for such claim.

Response:

Not applicable. The Company is not claiming a cost of debt exceeding the cost of debt supported in III-E.6.

III-E.8

Request:

PROVIDE AVAILABLE DETAILS ON COMMON STOCK OFFERINGS OF THE PUBLIC UTILITY, IF PUBLICLY TRADED, AND OF THE PARENT COMPANY, IF PUBLICLY TRADED, FOR THE FIVE-YEAR PERIOD INCLUDING THE HTY AND FOR ANY PLANNED ISSUANCE THAT OCCURRED BETWEEN THE HTY AND THE FILING DATE AND PLANNED FOR THE FTY AND THE FPFTY, INCLUDING:

III.E.8.a	Date of prospectus.
III.E.8.b	Date of offering.
III.E.8.c	Record date.
III.E.8.d	Offering period including dates and number of days.
III.E.8.e	Amount and number of shares of offering.
III.E.8.f	Offering ratio, if rights offering.
III.E.8.g	Percent subscribed.
III.E.8.h	Offering price.
III.E.8.i	Gross proceeds per share.
III.E.8.j	Expenses per share.
III.E.8.k	Net proceeds per share in previously listed 8.i and 8.j.
III.E.8.l	"Market price per share to include each of the following: i. At record date. ii. At offering date. iii. One month after close of offering."
III.E.8.m	"Average market price during offering to include each of the following: i. Price per share. ii. Rights per share-average value of rights."
III.E.8.n	Most current reported earnings per share at time of offering.
III.E.8.o	Most current reported dividends at time of offering.

Response:

For the five fiscal years ended September 30, 2025, National Fuel Gas Company issued 1,434,000 shares of common stock, issued solely under its stock and benefit plans.

Details of historical stock offerings are based on information presented in Note H in the Company’s annual 10-K filings:

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-E-Rate of Return
Delivered on January 28, 2026

(III-E.8 cont'd)

Stock issued (in thousands of shares):

Fiscal Year	Number of Shares
2025	237
2024	333
2023	341
2022	296
2021	227
Total	1,434

National Fuel Gas Company has not issued any stock aside from issuances related to its benefit plans since the end of the HTY. National Fuel Gas Company will likely have a common stock issuance in connection with its recently announced Ohio Gas acquisition, but timing and size of issuance is not definitively known at this time.

III-E.11

Request:

Provide an AFUDC schedule that includes all of the following:

III.E.11.a AFUDC rate charged by the public utility at the end of the HTY, the FTY and the FPFTY.
III.E.11.b How the AFUDC rate was calculated.
III.E.11.c Explanation of the method used to calculate the AFUDC amounts.
III.E.11.d Cross-reference to where each of the items in previously listed 11.a—11.c is reflected in the current base rate case filing.

Response:

Please refer to ROR-005 for NFGDC's AFUDC rate calculation effective at the end of the HTY. The Company has not included AFUDC in its calculation of customer rates for the FTY and FPFTY and therefore does not have AFUDC rates to report for those periods.

(III-E.12 cont'd)

D. Use of Proceeds

It is anticipated that, from time-to-time, the subsidiaries of National Fuel will need to incur short-term borrowings from sources external to the individual subsidiary. Each subsidiary may have different capital requirements in connection with their respective operations, including but not limited to, construction and development programs, margin calls on derivative financial instruments, financing of deferred accounts receivable, and general corporate purposes.

Specific to National Fuel Gas Distribution Corporation, it is anticipated that, from time-to-time, Distribution will need to incur short-term borrowings from sources external to Distribution. This capital requirement arises in connection with Distribution's construction program, the purchase of gas to be placed in storage during the summer months and withdrawn for sale in the winter months, the financing of deferred purchased gas costs and accounts receivable, and other general corporate purposes.

E. Prospective Future Needs

Because of the seasonal nature of the natural gas business and its effect on cash flow during certain periods, it is necessary for National Fuel Gas to establish lines of credit with banks and other lending institutions. Availability of these lines would provide capital for the purposes discussed under "Use of Proceeds".

III-E.15

Request:

Provide the charter and indentures provisions, if applicable, for the public utility and the parent company that describe coverage requirements, limits on proportions of types of capital outstanding, and restrictions on dividend payouts.

Response:

Restrictions contained in the National Fuel Gas Company Restated Certificate of Incorporation, as amended ("Charter")

The Charter provides that dividends may be declared and paid on National Fuel Gas Company stock only out of the funds legally available for the payment of such dividends. Otherwise, the Charter contains no currently effective restrictions on the payment of dividends, as there currently is no outstanding preferred stock issued by National Fuel Gas Company.

However, if any shares of preferred stock are outstanding, the authority of the Board of Directors to declare and pay dividends on National Fuel Gas Company common stock is subject to the rights and preferences of each series of preferred stock outstanding, as such rights and preferences may be determined by the Board of Directors (See Article FOURTH, Paragraph 4 on Schedule 1, Exhibit No. 409, page 3 of 3.)

The Board of Directors may determine the designation, the number and the special and relative rights, powers, preferences and limitations of each series of preferred stock created. This power includes, among other things, the power to determine the following terms:

- The preference or relation that dividends on any series of preferred stock shall bear to the dividends payable on any other class or classes or any other series of capital stock; and
- The limitations and restrictions, if any, to be effective while any shares of any series of preferred stock are outstanding, upon the payment of dividends on the common stock or any other class or

classes or any other series of capital stock of the corporation ranking junior to the shares of such series.

(See Article FOURTH, Paragraphs 1(c) and 1(h) on schedule 1, Exhibit No. 409, pages 1 and 2 of 3.)

The Charter does not contain any coverage requirements or any currently effective restrictions on the proportions of types of capital outstanding. However, the Board of Directors has the authority to determine the conditions and restrictions, if any, to be effective while any shares of any series of preferred stock are outstanding, upon the creation of indebtedness of the corporation or upon the issuance of any additional stock ranking on a parity with or prior to the shares of such series. (See Article FOURTH, Paragraph 1(i) on Schedule 1, Exhibit 409, page 2 of 3.)

Prepared by or under the supervision of: James C. Welch

mortgage and convey real estate and personal property outside of the State of New Jersey.

ARTICLE FOURTH

Capital Stock

The total authorized capital stock of this corporation shall consist of Ten Million (10,000,000) shares of Preferred Stock having the par value of One Dollar ($1.00) per share and Two Hundred Million (200,000,000) shares of Common Stock having the par value of One Dollar ($1.00) per share.

The designations and relative rights, powers, preferences and limitations of the different classes of capital stock of this corporation are as follows:

1. Characteristics of Common Stock and Preferred Stock.

The Board of Directors shall have the authority to amend this Certificate of Incorporation from time to time to divide the shares of the Preferred Stock into one or more series and to determine the designation, the number, and the special and relative rights, powers, preferences and limitations of the shares of each series so created. For illustrative purposes only, the forgoing power of the Board of Directors shall include, but shall not be limited to, the determination of the following terms:

(a) the maximum number of shares to constitute each such series, which may subsequently be increased or decreased (but not below the number of shares of such series then outstanding) by resolution of the Board of Directors, the distinctive designation thereof and the stated value thereof if different from the par value thereof;

(b) whether the shares of each such series shall have voting rights and, if such shares are given voting rights, the terms of such voting rights, subject to the provisions of paragraph 7 hereof;

(c) the dividend rate or rates, if any, on the shares of each such series or the manner in which such rate or rates shall be determined, the conditions and dates upon which such dividends shall be payable, the preference or relation that such dividends shall bear to the dividends payable on any other class or classes or any other series of capital stock (including whether such dividends shall be participating or non-participating with respect to any other class or classes or any other series of capital stock), whether such dividends shall be cumulative or noncumulative, and if cumulative, the date or dates from which any such dividends shall be cumulative;

(d) whether the shares of each such series shall be subject to redemption, and, if made subject to redemption, the time or times, price or prices and other terms, limitations, restrictions or conditions of such redemption, including whether such redemption shall be made at the election of the corporation or the holders of such shares;

(e) the relative amounts, and the relative rights or preferences, if any, of payment in respect of shares of each such series which the holders of shares of each such series shall be entitled to receive upon the voluntary or involuntary liquidation, dissolution or winding-up of the corporation, including whether such rights shall be limited or participating with respect to shares of any other class or classes or any other series of capital stock upon the voluntary or involuntary liquidation, dissolution or winding up of the corporation;

(f) whether or not the shares of each such series shall be subject to the operation of a retirement or sinking fund and, if so, the terms and provisions relative to the operation of such retirement or sinking fund;

(g) whether or not the shares of each such series shall be convertible into, or exchangeable for, shares of any other class or classes or any other series of capital stock, or other securities, whether or not issued by the corporation, and if so convertible or exchangeable, the price or prices or the rate or rates of conversion or exchange, the method, if any, of adjusting any such price or prices or rate or rates and whether such shares shall be convertible or exchangeable at the election of the corporation or the holders of such shares;

(h) the limitations and restrictions, if any, to be effective while any shares of each such series are outstanding, upon the payment of dividends or the making of other distributions on, and upon the purchase, redemption or other acquisition by the corporation of, the Common Stock or any other class or classes or any other series of capital stock of the corporation ranking junior to the shares of such series either as to dividends or upon liquidation, dissolution or winding-up of the corporation;

(i) the conditions or restrictions, if any, to be effective while any shares of each such series are outstanding, upon the creation of indebtedness of the corporation or upon the issuance of any additional stock (including additional shares of such series or of any other class) ranking on a parity with or prior to the shares of such series as to dividends or distribution of assets upon liquidation, dissolution or winding-up of the corporation; and

(j) any other preference, relative, participating, optional or other special rights, and the qualifications, limitations or restrictions thereof, as shall

not be inconsistent with law, this Article FOURTH or any amendment creating such series.

Each share of Common Stock shall be equal in all respects to every other share of the Common Stock. The Common Stock shall be subject to the express terms of the Preferred Stock and any series thereof.

2. Dividends on Preferred Stock.

No holder of outstanding shares of any series of the Preferred Stock shall be entitled to receive any dividends thereon other than the dividends provided therefor pursuant to paragraph 1 hereof.

3. Redemption and Repurchase of Preferred Stock.

If, on or before the redemption date with respect to any shares of any series of Preferred Stock that are subject to redemption, as fixed or determined pursuant to paragraph 1 hereof, this corporation shall deposit with a bank, trust company or other financial institution monies necessary for the redemption of such shares, then, notwithstanding that any certificate for such shares so redeemed shall not have been surrendered for cancellation, from and after such redemption date, all rights and preferences with respect to such shares so redeemed shall forthwith on such redemption date cease and terminate, except only the right of the holders thereof to receive, out of the monies so deposited, the amount payable upon redemption of such shares, without interest. Any such monies so deposited by this corporation and unclaimed at the end of six (6) years from such redemption date shall be repaid to this corporation upon its request, after which repayment the holders of the shares so called for redemption shall look only to this corporation for the payment thereof.

Nothing herein contained shall limit any legal right of this corporation to purchase or otherwise acquire any shares of the Preferred Stock to the extent permitted by law. All or any shares of Preferred Stock at any time redeemed, purchased or otherwise acquired by this corporation may thereafter, in the discretion of the Board of Directors, be reissued or otherwise disposed of at any time or from time to time, to the extent and in the manner now or hereafter permitted by law.

4. Dividends on Common Stock.

Subject to the rights and preferences of each series of Preferred Stock, as determined pursuant to paragraph 1 hereof, such dividends (payable in cash, stock or otherwise) as may be determined by the Board of Directors may be declared and paid on the Common Stock, but only out of funds legally available for the payment of such dividends.

III-E.16

Request:

Provide copies of the summaries of the public utility's projected revenues, expenses and capital budgets for the FTY and the FPFTY.

Response:

Please reference National Fuel Exhibit A (FPFTY) which details information on the Company's projected revenue and expenses. National Fuel's fiscal year 2025 actual capital expenditures and fiscal year 2026 and 2027 capital budgets are shown below:

	Fiscal 2025 Actual	Fiscal 2026 Budget	Fiscal 2027 Budget
Production Plant	143,000	438,000	444,000
Transmission Plant	10,911,000	13,230,000	17,000,000
Distribution Plant	32,845,000	44,517,000	49,975,000
General Plant	11,502,000	10,047,000	9,739,000
Total	55,401,000	68,232,000	77,158,000

Delivered on January 28, 2026

III-E.17

Request:

Describe long-term debt reacquisition by issue by the public utility and the parent company FOR THE MOST RECENT FIVE-YEAR PERIOD as follows including all of the following:

III.E.17.a Reacquisition by issue by year.
III.E.17.b Total gain or loss on reacquisitions by issue by year.
III.E.17.c Accounting for gain or loss for income tax and book purposes.
III.E.17.d Proposed treatment of gain or loss on such reacquisition for ratemaking purposes.

Response:

Please reference 53.53.III.E.6 regarding National Fuel Gas Company reacquisition of long term debt by issue and the proposed treatment of gains or losses. Note that NFGDC did not reacquire any long-term debt over the most recent five-year period.

Responses to Section 53.53 - III-E-Rate of Return
Delivered on January 28, 2026

III-E.18

Request:

Provide a schedule showing the major components of claimed capitalization and the derivation of the weighted costs of capital to support the claim. Include a descriptive statement concerning the major elements of changes in claimed capitalization, cost rates and overall return from comparable historical data.

Response:

The major components of claimed capitalization and the derivation of the weighted costs of capital are provided in a table below. Please see 53.53.III-E.1, III-E.6 and Statements 10 and 11 for further detail on changes in claimed capitalization, cost rates and overall return from comparable historical data.

FPFTY 10/31/2027	**Capital Ratios**	**Cost**	**Weighted Cost**
Long-Term Debt	43.6%	5.58%	2.44%
Common Equity	56.4%	11.25%	6.34%
Weighted Average Cost			8.78%

National Fuel Gas Distribution Corporation
Docket No. R-2026-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-E-Rate of Return
Delivered on January 28, 2026

III-E.28

Request:

Provide a listing of common equity infusions from the parent company to the public utility during the HTY if applicable. Indicate any common equity infusions made or anticipated in the FTY and anticipated in the FPFTY calculations. Identify date, dollar amount and intended use of the funds for each infusion.

Response:

The following table summarizes equity infusions from the parent company to the public utility with no change in shares during the HTY and anticipated equity infusions during the FTY and FPFTY based on the current forecast. Equity infusions from NFG to NFGDC are intended to be used in conjunction with long term debt infusions to term out short term debt balances related to the company's capital spending program.

Date	Period	Infusion Amount ($ Millions)
August 1, 2025	HTY	$50
April 2026	FTY	$50
November 2026	FPFTY	$50
August 2027	FPFTY	$50

III-E.30

Request:

Identify the public utility's capital structure targets (percentages of capital types) for the FTY and the FPFTY. Explain the basis for the capital structure targets. Provide a schedule showing targets and actuals for the HTY and the 2 years immediately preceding the HTY.

Response:

The table below provides the historical and forecasted capital structure for National Fuel Distribution Corp. (NFGDC). The capital structure presented is consistent with the forecasted financials provided as part of this proceeding. Please refer to testimony provided by witness Nowak regarding NFGDC's capital structure targets along with an explanation of the basis for these targets.

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-F-Balance Sheet
Delivered on January 28, 2026

III-F.2

Request:

Provide a comparative balance sheet for the HTY and the year immediately preceding the HTY.

Response:

See Attachment III.F.2 for a comparative balance sheet of National Fuel Gas Distribution Corporation at September 30, 2024 and 2025. The balance sheet provided is for the entirety of National Fuel Gas Distribution Corporation, including both the Pennsylvania and New York Divisions. Balance sheets are not maintained separately for the two divisions.

Prepared by or under the supervision of: Michael J. Maggioli

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-F-Balance Sheet
Delivered on January 28, 2026

III-F.3

Request:

Provide a detail of other physical property, investments in affiliated companies, and other investments for the HTY. Provide a schedule showing any anticipated changes for the FTY and the FPFTY, if applicable.

Response:
Major items included in Account 121 - Non-Utility property and Account 124 - Other Investments for National Fuel Gas Distribution Corporation at September 30, 2025, are detailed

ACCOUNT 121 - Non-Utility Property (New York Jurisdiction only; none in Pennsylvania Jurisdiction)	$1,162,034
in the following towns, villages and cities within New York State; Amherst, Andover, Belmont, Boston, Buffalo, Clarksville, Chautauqua, Evans, Grand Island, Genesee, Hamburg, Hanover, Lancaster, North Collins, North Tonawanda, Olean, Wellsville and Wheatfield.	

There are no anticipated changes to the Non-Utility Property account for the FTY and FPFTY, as this balance has historically remained unchanged.

ACCOUNT 124 - Other Investments (Pennsylvania Jurisdiction only; none in New York Jurisdiction)	$4,132,720
Balance includes shares of MetWest Low Duration Bond Fund held by Grantor Trust	

The Other Investments account reflects market activity and transactions within a grantor trust, including the sale of shares. Due to the nature of these activities, future balances cannot be reasonably projected for the FTY and FPFTY.

Delivered on January 28, 2026

III-F.4

Request:

Supply the amounts and purpose of special cash accounts of all types, including any of the following:

III.F.4.a Interest and dividend special deposits.
III.F.4.b Working funds other than general operating cash accounts.
III.F.4.c Other special cash accounts and amounts (e.g., temporary cash investments).

Response:

The amounts and purpose of Special Cash Accounts for National Fuel Distribution Corporation at September 30, 2025 are as follows:

III.F.4.a
No interest or dividend special deposit cash accounts.

III.F.4.b
Account 135 – Working Fuds (Total Corporation) $ 157,600.00
The balance is comprised of petty cash and working funds for use by commercial offices and various operating departments. Funds are used for small business expenses.

III.F.4.c
Account 136 – Temporary Cash Investments (Total Corporation) $ 8,642,762.15
The balance is largely composed of funds held in a grantor trust that are being used to refund overcollected other post-employment benefit (OPEB) expenses to Pennsylvania customers pursuant to a tariff supplement that went into effect on October 1, 2021.

Responses to Section 53.53 - III-F-Balance Sheet
Delivered on January 28, 2026

III-F.5

Request:

Describe the nature, origin and amounts of notes receivable, accounts receivable and accounts payable to and from affiliates, and any other receivables or payables, other than customer accounts, which appear on the HTY balance sheet. Identify amounts that are greater than 15% of total receivables and payables respectively. Do not net receivables and payables unless there is a master agreement between the public utility and the third party that permits the netting of accounts receivable and accounts payable.

Response:

III-F.6

Request:

Provide the amount of accumulated reserve, method and rate of accrual, amounts accrued, and amounts written-off for uncollectible accounts in the HTY and the 2 years immediately preceding the HTY.

Response:

Account 144 - Accumulated Provision for Uncollectible Accounts
Accruals, Write-Offs & Recoveries for the Twelve Months Ended
September 30, 2023, 2024, and 2025

National Fuel Gas Distribution Corporation - PA Rate Jurisdiction

Period Ending	Beginning Balance	Accruals	Write-Offs	Recoveries & Other	Ending Balance
9/30/23	5,525,782	3,572,047	(2,963,333)	403,028	6,537,523
9/30/24	6,537,523	3,096,597	(4,420,277)	223,226	5,437,069
9/30/25	5,437,069	4,395,579	(6,213,281)	273,773	3,893,141

The allowance method is used for book purposes. Each of the years shown are actual per book amounts. The accrual is based upon Management's analysis of receivables.

The monthly accrual rate is based upon the estimated percentage of each month's sales to estimated annual sales. Uncollectible account write-offs are made after an unpaid final bill is at least twelve months old.

1 Account is permanent and does not have a discrete origin date; established as part of standard accounting structure.

2 Account established under Commission tariff or regulation; no specific docket order.

3 Excluded from rate base. Amounts remain deferred pending Commission approval. Any recovery/return and amortization methodology/period will be established by Commission order (or via the applicable rider reconciliation). No carrying costs unless explicitly authorized.

4 Amount represents environmental insurance proceeds that have been deferred as a regulatory liability since the rate payor paid for the premiums on the original policy. Environmental claims are processed against this account as they arise.

5 Amount represents a fringe benefit load adjustment that will reduce the cost of labor charged to capital projects and affiliates during fiscal 2026.

N/A Not Applicable - excluded from rate base.

III-G.3

Request:

Provide a summary income statement showing all of the following:

III.G.3.a Per book income statement for the HTY.
III.G.3.b FTY adjustments to annualize and normalize revenue and expenses under present rates.
III.G.3.c Pro forma FTY income statement at present rates.
III.G.3.d FPFTY adjustments to revenues and expenses at present rates.
III.G.3.e Pro forma FPFTY income statement at present rates.
III.G.3.f Requested increase and corresponding iterative changes (e.g., uncollectible accounts, assessments and income taxes) with increase.
III.G.3.g Pro forma FPFTY income statement at proposed rates.
III.G.3.h References to schedules that contain supporting details for corresponding adjustments.

Response:

a – g. Please refer to National Fuel Exhibit A (HTY), National Fuel Exhibit A (FTY), and National Fuel Exhibit A (FPFTY), schedules in Section D, for the Company's presentation of the requested Statements of Income and adjustments to operating revenues and expenses at present and proposed rates.

h. Please refer to the Direct Testimony of Donald N. Koch, National Fuel Statement No. 2, Direct Testimony of Anthony Formato, National Fuel Statement No. 3 and the Direct Testimony of Courtney Mann, National Fuel Statement No. 14, for explanations of the Statements of Income and adjustments to operating revenues and expenses depicted in the Section D schedules of National Fuel Exhibit A (HTY), (FTY) and (FPFTY), the underlying sources of budgeted information, and the basis for the adjustments.

Please refer to the Direct Testimony of Joshua Nowak, National Fuel Statement No. 10, Direct Testimony of James Welch, National Fuel Statement No. 11 and related National Fuel Exhibit B, Schedule 6, for the derivation of the weighted average cost of debt used in the Company's debt interest synchronization adjustment, including the treatment of debt issuance expense, premiums and discounts used in calculating the effective cost rate for each series of long-term debt.

Please refer to the Direct Testimony of Courtney Mann, National Fuel Statement No. 14,

for an explanation on the derivation of future test year and fully projected year sales and revenues.

Please refer to the Direct Testimony of Erica Forcucci, National Fuel Statement No. 12, for an explanation of the Company's income tax adjustments.

III-G.4

Request:

Provide comparative income statements showing increases and decreases between the following two periods of time: (1) Two years prior to the HTY and one year prior to the HTY. (2) One year prior to the HTY and the HTY. Provide explanations for each comparison for variances that are greater than 15% of the summary level account type.

Response:

National Fuel Gas Distribution Corporation (Pennsylvania Division)
Comparative Statements of Income
(In Thousands)

	Twelve Months Ended 9/30/2023	Twelve Months Ended 9/30/2024	Variance $	Variance %
Revenue				
Gas Service Revenue	$ 273,903	$ 204,763	$ (69,140)	-33.8%
Other Operating Revenue	829	1,559	730	46.9%
Total Operating Revenues	274,732	206,322	(68,411)	-33.2%
Expenses				
Operating and Maintenance Expense	229,626	141,184	(88,441)	-62.6%
Depreciation and Amortization Expense	16,200	17,846	1,645	9.2%
Other Taxes	2,041	2,326	285	12.3%
Interest (Income) / Expense	7,726	10,010	2,284	22.8%
Miscellaneous (Income) / Expense	443	(410)	(853)	207.9%
Total Expenses Before Income Taxes	256,036	170,956	(85,079)	-49.8%
Income Before Taxes	18,696	35,365	16,669	47.1%
Tax Expense/(Benefit)	1,344	(316)	(1,660)	525.4%
Net Income	$ 17,352	$ 35,681	$ 18,329	51.4%

Explanations of major variances, defined as 15% or greater of the summary level account type, are shown below (in thousands):

Gas Service Revenue – Decrease of $69,140 primarily due to a decrease in gas costs (Account 481).

Other Operating Revenue – Increase of $730 primarily due to an increase in the estimated refund of tax benefit resulting from the 2017 Tax Reform (Account 495).

Operating and Maintenance Expense – Decrease of $88,441 primarily due to a decrease in gas costs (Account 401.999).

Interest (Income)/Expense - Increase of $2,284 relates to higher interest on long term debt as a result of higher outstanding debt balances (Account 430.0), higher interest rates for money pool funds (Account 430.004), and a larger amount of overcollection of gas costs (Account 431.401).

Miscellaneous Income / Expense – Decrease of $853 primarily due to a decrease in realized losses on Grantor Trust investments partially offset by unrealized gains on such investments (Account 421).

Tax Expense – Decrease of $1,660 primarily due to permanent differences associated with repairs and maintenance deduction calculation methodology offset by an increase in federal tax credits not yet utilized.

Response:

National Fuel Gas Distribution Corporation (Pennsylvania Division)
Comparative Statements of Income
(In Thousands)

	Twelve Months Ended 9/30/2024	Twelve Months Ended 9/30/2025	Variance $	Variance %
Revenue				
Gas Service Revenue	$ 204,763	$ 238,277	$ 33,514	14.1%
Other Operating Revenue	1,559	1,463	(96)	-6.6%
Total Operating Revenues	206,322	239,740	33,417	13.9%
Expenses				
Operating and Maintenance Expense	141,184	173,226	32,042	18.5%
Depreciation and Amortization Expense	17,846	19,244	1,398	7.3%
Other Taxes	2,326	2,151	(175)	-8.1%
Interest (Income) / Expense	10,010	12,184	2,174	17.8%
Miscellaneous (Income) / Expense	(410)	(123)	287	-232.2%
Total Expenses Before Income Taxes	170,956	206,682	35,725	17.3%
Income Before Taxes	35,365	33,058	(2,307)	-7.0%
Tax (Benefit)/Expense	(316)	2,820	3,136	111.2%
Net Income	$ 35,681	$ 30,239	$ (5,442)	-18.0%

Explanations of major variances, defined as 15% or greater of the summary level account type, are shown below (in thousands):

Operating and Maintenance Expense – Increase of $32,042 primarily due to an increase in gas costs (Account 401.999)

Interest (Income)/Expense - Increase of $2,174 relates to higher interest on long term debt as a result of higher outstanding debt balances (Account 430.0), offset by lower interest rates for money pool funds (Account 430.004), offset by smaller amount of overcollection of gas costs (Account 431.401) and offset by decrease in interest income earned for Grantor Trust (Account 419.001).

Miscellaneous Income / Expense – Decrease of $287 due to a decrease in unrealized losses on Grantor Trust investments, an increase in realized losses on such investments along with an offset increase of gain on disposal of property (Account 421).

Tax Expense – Increase of $3,136 due to permanent differences associated with repairs and maintenance deduction calculation methodology, changes in credit carryforward utilization between periods, amortization of Medicare subsidy amounts pursuant to the PA PUC 2022 rate case settlement, and higher state income tax resulting from a reduced repairs and maintenance deduction.

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

III-H.2

Request:

State the manner in which revenues are being presented for ratemaking purposes, and provide details, using one of the following methods:

III.H.2.a Unbilled Revenues.
III.H.2.b Billed Revenues.
III.H.2.c Cash Revenues.

Response:

Revenues are reported for rate making purposes on an "as billed" basis. Unbilled revenues are not included in the Future Test Year or Fully Projected Future Test Year.

Prepared by or under the supervision of: Courtney T. Mann

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

III-H.3

Request:

If unbilled revenue is recorded at the end of the public utility's fiscal period, provide unbilled revenue at the end of the HTY, at the year-end immediately preceding the HTY and at the beginning of the FTY. State whether recovery is reversed for ratemaking purposes and the impact on the FPFTY. Provide a detailed explanation of the procedures and methods used in developing unbilled revenues and the impact on the FTY and the FPFTY.

Response:

Please see Exhibit CTM-5-1 for HTY Unbilled Revenue. See below for the year-end preceding HTY unbilled revenue. Unbilled revenues are not included in the Future Test Year or Fully Projected Future Test Year.

TME 09/30/2024	Total Revenue	Total Gas Cost	Total Delivery
Gas Revenue	(87,750)	(89,669)	1,919
Transportation Revenue	44,083	0	44,083
Total Unbilled Revenue	**(43,667)**	**(89,669)**	**46,002**

Prepared by or under the supervision of: Courtney T. Mann

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

III-H.4

Request:

Provide a schedule of present rates and proposed rates showing dollar change and percent of change by customer class. Prepare a comparative schedule of monthly (or quarterly where applicable) billings at present rates and at proposed rates to demonstrate the impact of proposed rates over a range of usages. Identify any changes in rate design or any rate re-structure and provide supporting explanations.

Response:

Please see Exhibit CTM-8 for a schedule of present and proposed rates and Exhibit CTM-9 for a comparative schedule of monthly bills. Please refer to the testimony and exhibits of Courtney T. Mann for changes in rate design and supporting explanations.

Prepared by or under the supervision of: Courtney T. Mann

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

III-H.5

Request:

Provide a detailed breakdown of miscellaneous revenues for the HTY and the 2 years immediately preceding the HTY. For the HTY, provide a monthly breakdown and an explanation of monthly variances greater than 15%. Detail any anticipated variances in the FTY and the FPFTY ON AN ANNUAL BASIS.

Response:

Please see attachment III-H-5 for a monthly breakdown of miscellaneous revenues for the HTY and 2 years immediately preceding the HTY. Forfeited discounts variances are due to seasonality of late payment charges. Rent from gas property variances greater than 15% are due to annual adjustments. Capacity release variances are due to seasonality/random variation. TCJA variances are due to monthly revenue seasonality and adjusted provision estimates throughout the fiscal year. Other gas revenues variances are due to miscellaneous activity. Rent is held flat in the FTY and FPFTY. Within other revenues, capacity release has been removed from the FTY, FPFTY, and HTY normalized schedules. In the FTY and FPFTY, late payment charges are forecasted by applying a percentage to total forecasted revenues by month.

Prepared by or under the supervision of: Courtney T. Mann

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

III-H.7

Request:

Provide growth patterns of usage and customer numbers by customer class, using historical and projected data.

Response:

Please see Attachment III-H.7.

Prepared by or under the supervision of: Cathryn E. Hilliard

National Fuel Gas Distribution Corporation
Docket No. R- 2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

III-H.8

Request:

If the public utility is affiliated with another public utility within a consolidated group, explain the effects, if any, upon allocation factors used in the current base rate case or in any recent rate increases allowed to the other public utility segment (or segments) of the consolidated group.

Response:

The National Fuel Gas Distribution Corporation (National Fuel) does not have another segment, such as water or electric segment. However, National Fuel does have a New York Division jurisdictional segment (NYD) that is part of National Fuel. Please refer to the Direct Testimony of James Welch, Statement No. 11 for more detail regarding Capital Structure and to the Direct Testimony of Michael J. Maggioli, Statement No. 7 regarding historic balance sheet as the limited areas where NYD affects any of the allocations utilized in this current base rate case.

Prepared by or under the supervision of: Donald N. Koch

Delivered on January 28, 2026

III-H.9

Request:

If the public utility has a curtailment rate in its current or proposed tariff, provide supporting data detailing curtailment adjustments, procedures and policies.

Response:

There is no specific monetary curtailment rate charge detailed in the Company's tariff. Curtailments are enforced administratively via Rule 26 and Operational Flow Orders (OFOs), specified in the Company's respective tariff and Gas Transportation Operating Procedures.

Prepared by or under the supervision of: Christopher A. Cej

III-H.10

Request:

Provide details of the public utility's attempts, since the immediately preceding rate case filing, to recover uncollectible and delinquent accounts.

Response:

ACTIVE DELINQUENT RESIDENTIAL COLLECTIONS

Residential collection activity in Pennsylvania is governed by Title 52 Pennsylvania Code Chapter 56, Chapter 14, and other guidelines and/or directives issued by the Bureau of Consumer Services.

1. The net amount billed becomes due for all residential accounts no less than twenty (20) days after the mailing of the monthly bill. Industrial, commercial and public authority accounts are due no less than fifteen (15) days after the mailing of the monthly bill.
2. Approximately thirty-one (31) days following the mailing of the monthly bill, residential accounts considered "sufficiently delinquent" are mailed a final termination notice.

   A formula is used to determine those accounts which are "sufficiently delinquent." Among other things, the formula considers the following:
   a. the amount of the arrears
   b. any energy assistance pledges
   c. any credit in the balanced billing plan associated with the prior balance

3. The final termination notice states that service will be terminated no less than (10) days from the date of mailing unless one of the following occurs:
   a. A payment is received
   b. A satisfactory payment arrangement is made
   c. A billing dispute is filed with National Fuel Gas Distribution Corporation ("Company") or the Pennsylvania Public Utility Commission; or
   d. A certified medical emergency exists

National Fuel Gas Distribution Corporation
Docket No. R-2026-3059428

Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

4. The Company must review with the customer certain items prior to discussing payment agreements.

   When a customer contacts the Company before termination, we must first explain:

   56.97(a)(1) The reasons for the proposed termination.

   56.97(a)(2) All available methods for avoiding a termination, including:

   i. Tendering payment in full or otherwise eliminating the grounds for termination

   ii. Entering a payment arrangement.

   iii. Paying what is past due on the most recent previous company negotiated or Commission payment arrangement.

   56.97(a)(3) Information about the universal service programs, including customer assistance program. Refer customer to the program to determine eligibility and to apply for enrollment.

   56.97(a)(4) The medical emergency procedures.

   After explaining the above, the Company may negotiate a payment arrangement. If the Company and the customer are not successful in negotiating an agreement, then 56.97(b)(1)(2) and (3) would be provided when appropriate.

   56.97(b)(1) The right of the customer to file a dispute with the utility and, thereafter, an informal complaint with the Commission.

   56.97(b)(2) The procedures for resolving disputes and informal complaints, including the address and telephone number of the Commission.

   56.97(b)(3) The duty of the customer to pay any portion of a bill which the customer does not dispute.

5. For those customers who have not taken steps to avoid termination, the Company "shall attempt to contact the customer or occupant, to provide notice of the proposed termination at least three days prior to the scheduled termination, using one or more of the following methods" [1406 (b)(1)(ii)]

   a. in person;

   b. by telephone. Phone contact shall be deemed complete upon attempted calls on two separate days to the residence between the hours of 8 a.m. and 9 p.m. if the calls were made at various times each day; or

   c. by e-mail, text message or other electronic messaging format consistent with the commission's privacy guidelines and approved by commission order.

   d. In the case of electronic notification only, the customer must affirmatively consent to be contacted using a specific electronic messaging format for purpose

Delivered on January 28, 2026

of termination.

6. On the proposed termination date, the serviceperson will: (1) accept payment of arrears or a specified amount, leaving service on; or (2) determine a medical emergency exists, leaving service on; or (3) see a receipt, leaving service on; or (4) terminate service. "During the months of December through March, unless personal contact has been made with the customer or responsible adult by personally visiting the customer's residence, the public utility shall, 48 hours of the scheduled date of termination, post a notice of the proposed termination at the service location." [1406(b)(1)(iii)]
7. For Winter Termination 1406(e)(1) severely restricts service terminations for customers with household incomes at or below 250% of the Federal Poverty Level.
8. Per 56.100(h), a survey of terminated accounts is conducted for premises where heat related service has been terminated within the past year for any of the grounds in 56.81 (relating to authorized termination of service). The survey is completed by December 1 and results reported to the Bureau of Consumer Services on or before December 15 of each year. On February 1 of each year, updated survey results are reported to the Bureau of Consumer Services reflecting any change in the status of the accounts subsequent to the December 15 filing, including any accounts terminated in December. A recent copy of the letter from the Bureau of Consumer Services and survey dated August 15, 2025, are part of the exhibit at pages 5 to 7.

FINAL BILL COLLECTIONS

Below is a description of the final bill placement process:

1. Approximately twenty-two (22) days after posting of the final statement, the net bill becomes due.
2. Approximately forty-seven (47) days after posting or twenty-five (25) days past due, the final bill is outsourced to a primary collection agency. The primary collection agency attempts telephone contact, mails additional past due notices and performs skip tracing where applicable. Past due accounts are credit reported at the time the debt is submitted to a primary collection agency.
3. Approximately four-hundred-twelve (412) days after posting of the final statement or three-hundred-ninety (390) days past due, the final bill is returned to National Fuel Gas Distribution Corporation from the primary collection agency.
4. Approximately four-hundred-fifteen (415) days after posting of the final statement or three-hundred-ninety-three (393) days past due, the final bill is referred to a secondary collection agency. Additional telephone contact is attempted by the agency, notices are mailed and skip tracing occurs. The debtors are also credit reported.

Docket No. R-2026-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

5. Approximately seven-hundred-eighty (780) days after posting of the final statement or seven-hundred-fifty-eight (758) days past due, the secondary placement is returned to National Fuel Gas Distribution Corporation from the secondary collection agency.
6. Approximately seven hundred-eighty-three (783) days after mailing of the final statement or seven-hundred-sixty-one (761) days past due, the final bill is referred to a tertiary collection agency. Additional telephone contact is attempted, notices are mailed and skip tracing occurs. Once again, the debtors are credit reported.
7. Approximately one-thousand-one-hundred-forty-eight (1,148) days after posting or one-thousand-one-hundred-twenty-six (1,126) days past due, the account is returned to National Fuel Gas Distribution Corporation. The account is no longer actively pursued by the collection agency but remains assigned to the agency for warehousing purposes.

UNCOLLECTIBLE ACCOUNTS

Unpaid finals are determined to be uncollectible and are written off to Bad Debt approximately ninety (90) days after the mailing of the final statement or sixty-seven (67) days past due. As indicated above final bill collection activity may continue up to two (2) years after write-off, for a total of three (3) years.

COMMONWEALTH OF PENNSYLVANIA
PENNSYLVANIA PUBLIC UTILITY COMMISSION
COMMONWEALTH KEYSTONE BUILDING
400 NORTH STREET
HARRISBURG, PENNSYLVANIA 17120

August 15, 2025

Dear Utility Company Executive:

In accordance with 52 Pa. Code § 56.100(h) and § 56.100(i), all utilities subject to this Chapter are required to conduct the Cold Weather Survey (CWS) for premises where heat-related services, including any landlord-ratepayer accounts, have been terminated during the year. Utilities are reminded that all heating accounts terminated in accordance with the regulations at § 56.81 (relating to authorized termination of service) or § 56.98 (relating to termination for unauthorized use, fraud, tampering, or tariff violations) must be included in the survey results – including those terminated for failure to permit access to meters.

The regulations require utilities to survey, within 90 days prior to December 1, and attempt to make post-termination personal contact with an occupant or responsible adult at the premises. Utilities must make a good faith attempt to reach an agreement regarding payment of any arrearages and restoration of service. To ensure personal contact is made prior to December 1, the Bureau of Consumer Services (BCS) recommends beginning to survey off accounts starting September 1, 2025.

The primary goal of this survey is to afford occupants at the affected premises the opportunity to avoid going through the winter months without heat-related services. BCS is particularly concerned about residential service accounts where service was terminated on or after January 1, 2025, and has not been reconnected.

For any accounts terminated in 2025, utilities should make at least four attempts to contact a responsible adult occupant at properties where services were terminated and remain off. These four contact attempts should include a combination of telephone calls, letters, emails, texts, and personal visits to the premises. Utility representatives should make attempts to establish contact on different days of the week and at different times of the day (including evening hours). If these attempts are unsuccessful, BCS requests a personal visit to the premises for a final attempt to communicate with the occupants or to determine that the premises is vacant.

National Fuel Gas Distribution Corporation
Docket No. R-2026-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

When reporting the results of the 2025 CWS, please use the attached *2025 Cold Weather Survey A Template* (Excel Workbook) to report the status of accounts terminated through November 30, 2025. The report should be returned to BCS no later than the close of business on December 15, 2025. Reporting instructions are provided with the template.

In addition to the 2025 CWS results, BCS requests that utilities provide a follow-up count of premises where services were terminated and reported in the 2024-2025 CWS, not re-established, and have remained off through 2025. Please submit 2024 follow-up data on the separate spreadsheet tab of the template labeled "2024 Follow-up." BCS asks that you make sure to include these premises in your 2025-2026 contact attempts, but they should not be reported again.

BCS monitors accounts categorized and reported as vacant in the survey and requests detailed information for each property, including the address, zip code, date verified, and means of determination. Please provide this information by completing the 2025 Vacant List tab on the template.

BCS strongly encourages utilities to refer consumers to available low-income assistance programs and 211 resources (e.g., Customer Assistance Program, the Low-Income Home Energy Assistance Program, Hardship Fund Program, 211 website, and county assistance offices). Utilities should also leave special information packets at premises where service is off. The packets should contain information about contacting the utility directly, applications for energy assistance, and information about any other special assistance programs.

Thank you for your continued cooperation with this important health and safety matter. Please direct your responses or any questions to Kathy Collins at kathecolli@pa.gov and Sarah Dewey sdewey@pa.gov.

Sincerely,

Lori Mohr

Lori Mohr, Director
Bureau of Consumer Services

Form A

2025 Cold Weather Survey
Pennsylvania Public Utility Comission
Bureau of Consumer Services

	Only HEAT-related properties should be included in the survey	Initial Survey (1/1 - 11/30)	Update to Initial Survey (1/1 - 11/30)	December Survey (12/1 - 12/31)	Final Survey Results (As of 2/1/2025)
		Due 12/15	*Due 2/1*		
1	Total Number of heat-related residential premises terminated.		(SAME as Initial Survey)		0
2	Number of heat-related residential premises to be surveyed (those your records show as not reconnected).		(SAME as Initial Survey)		0
	Total of A through E below: #2 above must match this total	*0*	*0*	*0*	0
			See Regs Tab	See Regs Tab	
3	Number of heat-related residential premises terminated this year but reconnected prior to Cold Weather Survey (i.e., NOT included in the survey)				

Results

Place each of the premises from Item #2 above into one of the following categories:

A	**Number of vacant premises (reasonably sure), service is still off.**				**0**
B	**Number of premises where contact was made and service was reconnected with a payment arrangement/settlement agreement, or service was connected in a new name, or service was reconnected for other reasons.**				**0**
	(ii.) WATER Utilities ONLY: Number of premises where heat-related water service was only discovered after service was terminated on or after December 1st; therefore, service was immediately reconnected.	N/A	N/A		0
C	**Number of premises where unauthorized use was discovered. No payment arrangement established, service will remain on (with or without contact).**				**0**
D	**Number of premises where no contact was made, premises appear to be occupied, and service is still off:**				**0**
	(i.) Number of premises in D (above) identified as non-low-income customers or income is unknown.				0
	(ii.) Number of premises in D (above) identified as low-income customers (Do not include CAP customers, report CAP customers in (iii) below).				0
	(iii.) Number of premises in D (above) identified as CAP customers who have defaulted on their agreement				0
	Total of D(i) through D(iii) above: D must match this total	*0*	*0*	*0*	0
E	**Number of premises that are occupied, contact was made, and service is still off:**				**0**
	(i.) Number of premises in E (above) identified as non low income customers or income is unknown.				0
	(ii.) Number of premises in E (above) identified as low income customers (Do not include CAP customers, report CAP customers in (iii) below).				0
	(iii.) Number of premises in E (above) identified as CAP customers who have defaulted on their agreement				0
	Total of E(i) through E(iii) above: E must match this total	*0*	*0*	*0*	0
	(iv.) Number of premises in E (above) who are using an alternative heating source.				0
	Identify Alternative Heating Sources from E(iv):				
	1. Kerosene Heater				0
	2. Electric Space Heater				0
	3. Wood/Coal Stove or Furnace				0
	4. Fireplace				0
	5. Kitchen Stove/Oven				0
	6. Oil-Filled Space Heater				0
	7. Other (Specify):				0
	Total of 1 through 7 (heat source) above: E(iv) must match this total	*0*	*0*	*0*	0
	For December only, EXPLAIN why any CAP/low-income premises were terminated (in D(ii), D(iii), E(ii), and/or E(iii) above):

III-H.11

Request:

Describe the procedures involved in determining whether forfeited discounts or penalties are applied to customer billing.

Response:

The following is contained in the Rules and Regulations section of the Company's current tariff.

Section 15 (Billing): "The late payment date specified on the monthly bill is not less than fifteen days from date the bill is mailed except that, for service under, or billed in conjunction with, residential rate schedules, the late payment date is not less than twenty days from the date the bill is mailed."

Section 16 (Penalty Charges): "If the customer fails to pay his gas bill by the late payment date, a penalty will be charged. Payments received by mail will be considered paid on the date of the postmark. Where a customer receives natural gas supply service from a qualified Supplier under Rate Schedule SATS but is not participating in the Company POR program, late payment charges will be applied to the Supplier charges only if the customer has agreed to pay Supplier late payment charges. Otherwise, late payment charges will be based on the distribution charges of the Company and natural gas supply charges of either the Company or Supplier. The penalty charged to all customers shall be 1.50% on the full unpaid and overdue balance."

III-H.12

Request:

Provide annualization of revenues as a result of rate changes occurring during the test year, at the level of operations as of the end of the test year.

Response:

Please refer to the testimony and exhibits of Company witness Courtney T. Mann, Statement No. 14. Monthly revenue calculations are provided for the fully projected future test year, future test year, and historic test year. Schedule 4 of each of Ms. Mann's exhibits show a monthly revenue price out of customer counts and volumes, which both fluctuate seasonally. Historical and projected rate changes are reflected in the appropriate effective month. The annual revenue totals from Schedule 4 are summarized by service class on Schedule 2 of each of Ms. Mann's exhibits.

III-H.13

Request:

Provide a schedule showing sales from all customer classes by unit per month for the HTY and for each of the 2 years immediately preceding the HTY. Provide the projections for the FTY and the FPFTY.

Response:

Please refer to National Fuel Exhibit CTM-1-4 for FPFTY, CTM-3-4 for FTY and CTM-5-4 for HTY. Refer to Attachment III-H.1 showing the 2 years immediately preceding the HTY.

III-H.14

Request:

Provide an analysis showing the average usage per customer by rate schedule in the operating revenue detailed in previously listed 13. If the public utility is projecting a change in the average usage per customer, provide all of the following for each rate schedule listed in the tariff:

III.H.14.a A monthly history of the average usage per rate schedule that the public utility is projecting will change covering at least 5 years; indicate if data are weather normalized.
III.H.14.b A detailed description, analysis and rationale for historical or projected, or both, changes in usage per customer and support for the change by rate schedule.
III.H.14.c The proposed year-end usage per rate schedule that the public utility is projecting for the FPFTY.
III.H.14.d The change in volume in the HTY, the FTY and the FPFTY.
III.H.14.e The dollar impact in the HTY, the FTY and the FPFTY.

Response:

Please see Attachment FRR-III.H.14

2026 Base Rate Case
Filing Requirement Response III.H.14.b

III.H.14.b A detailed description, analysis and rationale for historical or projected, or both, changes in usage per customer and support for the change by rate schedule.

Usage per customer is forecasted for each service class using econometric models informed by recent historical data. For further details regarding the forecasting methodology, please refer to the direct testimony of Cathryn E. Hilliard and Exhibit CEH-3.

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

III-H.15

Request:

If the public utility uses an alternative ratemaking mechanism, provide an analysis showing the alternative ratemaking mechanism's proposed impact on revenues in the FTY and the FPFTY. If the public utility is projecting an increase or decrease in the average usage per customer as a result of the alternative ratemaking mechanism, provide all of the following for each rate schedule listed on the tariff:

III.H.15.a The non-adjusted sales used in the calculation.
III.H.15.b The alternative ratemaking mechanism used.
III.H.15.c The proposed average usage per rate schedule that the public utility is projecting for the FPFTY.
III.H.15.d The change in volume in the HTY, the FTY and the FPFTY.
III.H.15.e The dollar impact in the HTY, the FTY and the FPFTY.

Response:

The Company has a weather normalization adjustment mechanism as an alternative ratemaking mechanism for the HTY. Please see testimony and exhibits of witness Courtney T. Mann and see Exhibit CTM-5 for HTY. Since the FTY and FPFTY utilize a demand forecast based on normal weather, the weather normalization adjustment is assumed to have no impact on the FTY and FPFTY.

Prepared by or under the supervision of: Courtney T. Mann

Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

III-H.16

Request:

If the public utility uses an alternative ratemaking mechanism adjustment in the tariff, provide the most recent 2-year calculation of the alternative ratemaking calculation used to adjust rates, summarizing the revenue received by the public utility or credited to the customers by rate schedule each year.

Response:

The Company uses a Weather Normalization Adjustment which is found on page 158 of Pa. P.U.C No. 9 (Included in this filing under National Fuel Gas Exhibit F – Current Tariff). Please see Exhibit CTM-5-4 for a breakdown of revenues by rate schedule associated with the Weather Normalization Adjustment. The Company does not consider the Distribution System Improvement Charge as an alternative ratemaking adjustment.

Prepared by or under the supervision of: Courtney T. Mann

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

III-H.17

Request:

If the public utility's present tariff uses an alternative ratemaking adjustment, describe how the revenue received by the public utility or credited to customers was reflected in the filing.

Response:

The Company uses a Weather Normalization Adjustment as an alternative ratemaking adjustment. The Weather Normalization Adjustment revenue is reflected in Exhibit CTM-5. The Company does not consider the Distribution System Improvement Charge as an alternative ratemaking adjustment.

Prepared by or under the supervision of: Courtney T. Mann

2026 Base Rate Case
Responses to Section 53.53 - III-H-Operating Revenues
Delivered on January 28, 2026

III-H.18

Request:

Provide a schedule that shows the actual monthly amount received from each of the following sources for the HTY and the 2 years immediately preceding the HTY. State how revenues are presented for ratemaking purposes. Provide a breakdown of the amount projected to be received from each of the following sources that supports the amount reflected on the FTY and the FPFTY Income Statements:

III.H.18.a Forfeited discounts.
III.H.18.b Late payment fees.
III.H.18.c Miscellaneous revenues.
III.H.18.d Other revenues.
III.H.18.e Interest and Dividend Income.
III.H.18.f Other public utility Operating Income.
III.H.18.g Revenues from merchandising, jobbing and contract work.
III.H.18.h Revenues from non-public utility operations.
III.H.18.i Rental income.
III.H.18.j Equity in earnings of subsidiary companies.
III.H.18.k Interest and dividend income.
III.H.18.l AFUDC.
III.H.18.m Miscellaneous nonoperating income.
III.H.18.n Gain on disposition of property.
III.H.18.o Rent from public utility property.
III.H.18.p Revenues from transporting water, gas or electricity for others.

Response:

a. Not applicable. Any amounts shown under FERC Account 487 (Forfeited Discounts) throughout the Company's filing represent late payment fees – see (b).
b. See Attachment III-H.5 for the HTY and two years preceding the HTY. Late payment fees are reflected in Other Operating Revenues for ratemaking purposes. For the projected periods, see National Fuel Exhibit CTM-1, Schedule 5 (FPFTY at Current Rates) and National Fuel Exhibit CTM-3, Schedule 5 (FTY at Current Rates).
c. The Company has not booked any amounts to FERC Account 488 (miscellaneous revenues) in historical periods and is not claiming any miscellaneous revenue in its projections for ratemaking purposes.
d. For other revenues booked to FERC Account 495, see Attachment III-H.5 for the HTY and two years preceding the HTY. Other revenues are reflected in Other Operating Revenues for ratemaking purposes. For the projected periods, see National Fuel Exhibit CTM-1, Schedule 1 (FPFTY at Current Rates) and National Fuel Exhibit CTM-3,

Schedule 1 (FTY at Current Rates). The amounts presented match the HTY (excluding capacity release revenues as discussed in the testimony of Courtney T. Mann (National Fuel Statement No. 14).

e. Interest and dividend income is reflected in FERC Account 419. See III.H.18 Attachment 1 for the HTY and two years preceding the HTY. Amounts for interest and dividend income are not reflected in my FTY or FPFTY exhibits.
f. Not applicable.
g. See III.H.18 Attachment 1 for the HTY and two years preceding the HTY. Jobbing revenue is reflected as a credit to O&M expense on the Company's books and for ratemaking purposes. In the FTY and FPFTY, these amounts are reflected in National Fuel Exhibit A, Schedule B-4 under FERC Account 903.
h. Not applicable.
i. For rental income booked to FERC Account 493, see Attachment III-H.5 for the HTY and two years preceding the HTY. Other revenues are reflected in Other Operating Revenues for ratemaking purposes. For the projected periods, see National Fuel Exhibit CTM-1, Schedule 1 (FPFTY at Current Rates) and National Fuel Exhibit CTM-3, Schedule 1 (FTY at Current Rates). The amounts presented match the HTY amounts.
j. Not applicable.
k. See subpart (e).
l. See III.H.18 Attachment 1 for the HTY and two years preceding the HTY. The Company is not making a claim for construction work in progress in the FTY or FPFTY and has not included any AFUDC in its revenue requirement.
m. Miscellaneous nonoperating income is booked to FERC Account 421. See III.H.18 Attachment 1 for the HTY and two years preceding the HTY. The amounts for misc. nonoperating revenue are booked to general ledger account 421000. No amounts for this item are reflected in my FTY or FPFTY exhibits for ratemaking purposes.
n. Gains on disposition of property are booked to FERC Account 421. See III.H.18 Attachment 1 for the HTY and two years preceding the HTY. No amounts for this item are reflected in my FTY or FPFTY exhibits for ratemaking purposes.
o. Not applicable.
p. Amounts booked to FERC Account 489 are presented in National Fuel Exhibits CTM-5 (HTY), CTM-3 (FTY at Current Rates) and CTM-1 (FPFTY at Current Rates). Amounts for the two years preceding the HTY can be found in my response to III.H.1.

Prepared by or under the supervision of: Courtney T. Mann

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-I-Operating Expenses
Delivered on January 28, 2026

III-I.1

Request:

Provide a list of operating expenses BY ACCOUNT for the HTY, the 2 years immediately preceding the HTY, the FTY and the FPFTY. THE PUBLIC UTILITY SHALL EXPLAIN ADJUSTMENTS TO OPERATING EXPENSES IN FILED TESTIMONY AND IN ADDITIONAL SCHEDULES SHOWING DETAILS OF THE CLAIMED EXPENSES.

Response:

Please see III-I.1 Attachment A for operating expenses by account for the HTY, 2 years immediately prior to the HTY. Please refer to National Fuel Exhibit A_FTY and National Fuel Exhibit A_FPFTY, Schedules D-1 for operating expenses of the projected test periods. Please refer to the direct testimony of Anthony Formato, Statement No. 3 for explanations of any adjustments to O&M operating expenses. Please refer to the direct testimony of Michael Weidner, Statement No. 5 for explanations of any adjustments to benefit expenses.

Prepared by or under the supervision of: Donald N. Koch

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-I-Operating Expenses
Delivered on January 28, 2026

III-I.2

Request:

Provide a summary of claimed operating expenses for the HTY (with similar account breakdown to previously listed H.1), including annualizing and normalizing adjustments fully supported (including explanations, documentation and calculations) to arrive at adjusted future operating expenses for ratemaking, including supporting data for the FTY and the FPFTY.

Response:

For all benefit related operating expenses please refer to Exhibit No. MPW-1 Schedule 1 (Pages 1 and 2) and Schedule 2 (Pages 1-16). For the remainder of operating expenses, refer to National Fuel Exhibit ATF-1 which summarizes O&M expenses for the HTY, FTY, and the FPFTY. Additionally, National Fuel Exhibit ATF-2, ATF-3, and ATF-4 provide details on the adjustments for the FTY and FPFTY.

Prepared by or under the supervision of: Michael P. Weidner & Anthony Formato

National Fuel Gas Distribution Corporation
Docket No. R-2026-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-I-Operating Expenses
Delivered on January 28, 2026

III-I.3

Request:

List extraordinary property losses as a separate item, not included in operating expenses or depreciation and amortization (not included in cost of service when the gain or loss on this property has occurred or is likely to occur in the FTY or the FPFTY). Provide the proposed ratemaking treatment of extraordinary gains and losses. Provide supporting data including an explanation and breakdown of costs.

Response:

The Company has not incurred any extraordinary gains or losses during the HTY, FTY or FPFTY and has not included any extraordinary gains or losses in proposed rates.

Responses to Section 53.53 - III-I-Operating Expenses
Delivered on January 28, 2026

III-I.4

Request:

For the base rate case expense claim, provide all of the following:

III.I.4.a Detailed calculations of normalized base rate case expense, including supporting data for outside services rendered.
III.I.4.b Justification for the proposed normalization period for the current base rate case.
III.I.4.c Details and related dollar amounts by category of the base rate case expense claim. Include the actual billings or invoices and the applicable contracts in support of each category of base rate case expense.
III.I.4.d Docket numbers and filing dates, indicating fully litigated or settled, for the immediately preceding three base rate cases filed with the Commission.
III.I.4.e Details and related dollar amounts by category of the PUBLIC UTILITY'S actual RATE CASE expenses FOR BASE RATE CASES FILED WITH THE COMMISSION DURING THE preceding FOUR YEARS OR THE PRECEDING BASE RATE CASE, WHICHEVER IS GREATER.

Response:

a. Refer to National Fuel Exhibit ATF-2, Schedule 10.
b. The Company is proposing a 3-year normalization period based on the time between the Company's prior filing in October 2022 and this filing in January 2026.
c. Refer to National Fuel Exhibit ATF-2, Schedule 10. The Company will provide updated actuals as the case progresses. Information related to contracted rate case support is CONFIDENTIAL. The Company is providing CONFIDENTIAL Attachment III.I.4 in a separately sealed envelope that is marked "CONFIDENTIAL". The Company hereby requests that the content of such envelope be placed in the Commission's NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding.

III-I.5

Request:

Provide a list by applicable industry's USoA of charges by affiliates (service corporations, and the like) to the public utility, grouped by the claimed operating expenses and capitalized amounts for the HTY, the 2 years immediately preceding the HTY, the FTY and the FPFTY. Include all of the following:

III.I.5.a Copy of contract(s) governing the services provided and charges, if any.
III.I.5.b Explanation of the nature of the services provided.
III.I.5.c Explanation of the basis on which charges are made.
III.I.5.d If charges are allocated to the public utility, identify the affiliate provider of the charges, allocation factors and dollar amounts used for all affiliated companies not receiving allocation and explain why there is no allocation.

Response:

III.I.5.a – Copy of Contract(s) Governing Services and Charges

The governing Service Agreement among National Fuel Gas Company and its affiliates is provided on pages 7–17 of the attached document.

Compliance Note: While the version provided does not display executed signature pages, this agreement is the operative version currently in effect and on file with the Pennsylvania Public Utility Commission. Executed copies are maintained internally. The omission of signatures does not alter the applicability or enforceability of the agreement for purposes of cost assignment and affiliate transactions.

III.I.5.b – Explanation of the Nature of Services Provided

Descriptions of affiliate services are included in Exhibit B – Cost Assignment and Allocation Manual, Section II (Affiliate Services) on pages 19–23. These descriptions cover regulated and non-regulated services.

III.I.5.c – Explanation of the Basis on Which Charges Are Made

Articles III and IV of the Service Agreement (pages 9–12) explain the principles for cost assignment and determination of charges. Exhibit C – Section VIII (Other Allocation Methods) on pages 24–31 details allocation factors and methodologies applied to clearing accounts.

III.I.5.d – Allocation Details and Non-Allocation Explanation

Affiliate providers, allocation factors, and methodologies are identified in Exhibit C (pages 24–31). The document also notes affiliates that do not currently provide services and explains why no allocation applies in those cases (page 23).

Affiliate Charges by USoA – HTY and Two Preceding Years

Detailed tables of charges to National Fuel Gas Distribution Corporation – Pennsylvania Division by USoA account, grouped into capitalized amounts and operating expenses are provided for:

Historic Test Year (HTY): Twelve months ended September 30, 2025 (pages 40–43)

Two immediately preceding years: Twelve months ended September 30, 2024 (pages 36–39) and September 30, 2023 (pages 32–35).

Affiliates covered: National Fuel Gas Supply Corporation, Empire Pipeline, National Fuel Gas Midstream Corporation, and National Fuel Gas Company.

Future Test Year (FTY) and Fully Projected Future Test Year (FPFTY)

For affiliate charge detail for the FTY and FPFTY, please refer to National Fuel Exhibits ATF-1 and ATF-4.

Matthew L. Homsher, Secretary
Pennsylvania Public Utility Commission
Commonwealth Keystone Building
400 North Street, 2nd Floor North
Harrisburg, Pennsylvania 17105-3265

Re: National Fuel Gas Distribution Corporation – Service Agreement with National Fuel Gas Company and Subsidiary Companies
Docket No. G-2025-

Dear Secretary Homsher:

Enclosed for filing on behalf of National Fuel Gas Distribution Corporation ("Distribution" or the "Company") is a revised Service Agreement between Distribution and National Fuel Gas Company ("National"), including certain subsidiaries of National. This Service Agreement is being filed pursuant to Chapter 21 of the Public Utility Code, 66 Pa. C.S. Ch. 21, governing relationships with affiliates.

The Company's currently existing Service Agreement was approved by the Pennsylvania Public Utility Commission ("Commission") on September 21, 2018, at Docket No. G-2018-3002838. Distribution is proposing to make changes to its existing Service Agreement as recommended in the Management and Operations Audit Docket No. D-2023-3040107. The proposed changes are to: (1) update the Service Agreement to include a description of permitted transfers of assets (new Article II of the proposed Service Agreement); and (2) revise the Service Agreement to add detail and terms consistent with National's Cost Assignment and Allocation Manual (the "Manual").

Regarding the addition of detail and terms consistent with the Manual, the Company proposes to replace the description of services found in Exhibit B of the existing Service Agreement with the description found in Section II of the Manual (entitled "Affiliate Services). The Company also proposes to add a new Exhibit C to the Service Agreement consisting of Section VIII of the Manual (entitled "Other Allocation Methods"), which sets forth factors and methodologies used for the allocation of indirect costs.

The proposed Service Agreement expands, consistent with the Manual, the terms governing assignment of costs (Article III of the proposed Service Agreement) and determination of cost (Article IV of the proposed Service Agreement). The proposed Service Agreement adds terms governing billing practices and, consistent with the Manual, addresses convenience payments

(Article V of the proposed Service Agreement). Finally, the proposed Service Agreement provides that the Company shall re-file the agreement with the Commission when subsidiaries are added as parties (Article VI of the proposed Service Agreement).

Clean and red-lined versions of the Service Agreement are provided in Attachment 1 hereto.

Please direct any questions regarding this matter to the undersigned.

Respectfully submitted,

James P. Baetzhold

James P. Baetzhold
Associate General Counsel

Enclosure

CERTIFICATE OF SERVICE

I hereby certify that I have this day served a true copy of the foregoing document upon the participants listed below in the manner indicated, in accordance with the requirements of 52 Pa. Code § 1.54 (relating to service by a participant).

Attachment 1

SERVICE AGREEMENT

AGREEMENT, dated as of the ___ day of _____, ____, among National Fuel Gas Company, a New Jersey corporation (“National”), and the undersigned subsidiaries of National.

WITNESSETH:

WHEREAS, National is a holding company that owns, directly or indirectly, voting securities of the undersigned subsidiary companies;

WHEREAS, National and the undersigned subsidiary companies are referred to herein as the National Fuel Gas System ("System"), which is organized for, and presently engaged primarily in, the business of exploring for, producing, storing, transporting, gathering, and distributing natural gas; and

WHEREAS, System companies desire, need and require from time to time the administrative, engineering and technical aid, assistance and advice of personnel experienced in the operation and management of natural gas and other properties who are employed by members of the System, and have agreed concerning the nature and extent of the assistance and service required, and the amounts to be paid as compensation therefor, and do hereby desire to evidence their agreement in writing;

NOW, THEREFORE, in consideration of the mutual covenants and undertakings herein contained, the parties hereto agree as follows:

ARTICLE I

SERVICES TO BE FURNISHED

National Fuel Gas Distribution Corporation (“Distribution Corporation”) or any of the other affiliated members of the System may from time to time perform, on a regular

or temporary basis, administrative, engineering, accounting, maintenance, management or other services, for one or more of the other companies in the System. Distribution Corporation and companies in the System that receive services from, or provide services to, Distribution Corporation are listed in Exhibit A to this Agreement. Descriptions of services are included in Section II of National's Cost Assignment and Allocation Manual, which section is filed as Exhibit B to this Agreement. In addition to the services listed in Exhibit B, National leases office space at its corporate headquarters, 6363 Main Street, Williamsville, NY (the "Main Office") to certain affiliates, and affiliates lease space to each other at various other offices, service centers and field locations.

Notwithstanding anything to the contrary in this Agreement, no System company may perform any service for any other System company in contravention of any applicable law, regulation, rule, order, judgment or decision of any governmental entity ("Applicable Laws"), including, without limitation, any Applicable Laws governing transactions or communications between utility companies and their affiliates or natural gas companies and their affiliates.

ARTICLE II

CERTAIN ASSET TRANSFERS

Distribution Corporation's Pennsylvania operating division (the "PA Division") may from time to time wish to transfer assets to, or receive assets from, Distribution Corporation's New York operating division (the "NY Division") or other affiliated members of the System. The PA Division may, pursuant to this agreement, participate in the following types of asset transfers: (i) emergency transfers, and (ii) non-

emergency transfers where the amount of consideration involved is not in excess of $10,000. Emergency transfers may occur, for example, to address breakdowns in vehicles, equipment, tools, systems or other assets, or to restore or ensure safe, reliable service in response to disruptions or other incidents or circumstances impacting service. With respect to non-emergency transfers permitted under this agreement, regularly recurring payments under a general or continuing arrangement which aggregate a greater annual amount shall not be broken down into a series of transactions each within the $10,000 limit.

The PA Division and its counterparties to transfers permitted under this agreement shall adjust their books in an appropriate manner to reflect such transfers.

Asset transfers in which the PA Division wishes to participate, other than those permitted under this agreement, require the prior written approval of the Pennsylvania Public Utility Commission, under Section 2102 of the Pennsylvania Public Utility Code.

ARTICLE III

ASSIGNMENT OF COSTS

In consideration of services rendered, the companies receiving such services agree to reimburse their share of the costs thereof, as it is the intention of this Agreement that the reimbursement for services rendered to System companies shall cover the costs of providing said services, including overhead expenses. Costs are assigned pursuant to the following guidelines:

1. To the maximum extent practical, costs that can be specifically attributed to a business unit are directly charged to that business unit. For example, labor costs,

inventory costs and vendor invoices that pertain to a specific business unit are charged to that unit.

2. Costs that cannot be directly charged are allocated to business units on the basis of a causal relationship where applicable, such as the level of activity within various business units, the level of output for each business unit, or the resources consumed by each business unit. The indirect costs are accumulated into clearing accounts or homogeneous pools and are allocated to various business units on the basis of such causal relationships. For example, for costs driven by the number of employees, the factor used to allocate the costs among affiliates is relative number of employees. As another example, for costs driven by computer connectivity to various systems through the System's intranet or mainframe, the factor used to allocate the costs among affiliates is relative number of computers. Factors and methodologies employed for the allocation of indirect costs are included in Section VIII of National's Cost Assignment and Allocation Manual, which section is filed as Exhibit C to this Agreement.

3. Remaining costs that are not associated with a specific, identifiable, causal relationship are pooled and allocated to business units on the basis of "common" factors. This allocation method is used for administrative and general costs related to common departments (those departments whose services benefit some or all affiliates). The costs are allocated across the affiliates based on a three-factor common expense formula. The three factors included in the formula are: net plant, operation and maintenance expense, and total throughput. The formula is updated annually on a fiscal basis using the prior year's fiscal results in the computation.

ARTICLE IV

DETERMINATION OF COST

In determining the cost to be assessed as provided in Article III, there shall be added to the salaries of all employees for whom service charges are to be made, a percentage sufficient to cover the general overhead associated with such personnel which will include an allowance for vacation and holiday pay, payroll taxes and all employee benefits. Unit hourly equipment costs shall be developed based on operating expenses, insurance, maintenance and depreciation costs attributable to each individual class of equipment. Costs of materials shall be computed based on the cost of the item as shown on the books of account of the individual company supplying the item plus the standard inventory overhead charge.

In making the foregoing calculations, no overhead shall be charged by National, and no general overhead of any System company shall be added to costs incurred for services of nonaffiliated consultants employed by such company.

For National's regulated utility affiliates, transactions with other regulated affiliates and payments of interest to National constitute a great majority of total affiliate transactions. For example, for the PA Division in calendar year 2024, transactions with the NY Division, transactions with National's regulated pipeline subsidiaries, and payments of interest to National collectively accounted for approximately 96% of total affiliate transactions. Interest payments by the PA Division and NY Division to National are made pursuant to (i) long-term notes issued by Distribution Corporation to National in accordance with orders of the Pennsylvania Public Utility Commission and New York Public Service Commission, and (ii) the corporate money pool agreement, which

provides that borrowers of short-term funds from the money pool pay interest to National in its capacity as administrator of the money pool.

Given the very high percentage of utility affiliate transactions that involve other regulated affiliates or payments of interest to National, National has, across all affiliate transactions, generally applied a fully distributed cost allocation methodology. National's use of fully distributed costs promotes efficiency in accounting for affiliate transactions and seeks to ensure that all parties to affiliate transactions receive fair treatment.

In consideration of the application of an asymmetric pricing principle to transactions between utility affiliates and non-regulated affiliates, common departments will periodically evaluate their services and consider the feasibility of market alternatives. These assessments will review various service aspects, including, for example, service descriptions and associated budgets; cost competitiveness for the services provided; metrics, goals and results related to the provision of service; agreed-upon service level expectations; service level performance in comparison to agreed-upon service levels; and consequences for not meeting service level expectations.

ARTICLE V

BILLING PRACTICES

As soon as practical after the last day of each month, or such other period as may be agreed upon by the respective companies, a billing shall be rendered for all amounts due for services and expenses for such period, computed pursuant to this Agreement. Bills shall identify services and expenses in reasonable detail and include itemized charges. Amounts billed shall be due and payable upon receipt. If an invoice

remains outstanding after 30 days, the service provider may assess interest upon the unpaid amount at a rate equal to 2% per annum above the Daily Rate, as calculated pursuant to National's then effective money pool agreement. The System companies shall keep their books and records available for inspection by representatives of the other companies and, upon request by any System company, shall furnish information required by such System company with respect to services rendered, the costs thereof and the allocation of such costs among the System companies.

Payments to third parties made by one affiliate on behalf of another affiliate are considered convenience or accommodation payments. Not to be confused with actual transactions between affiliates where a good, service or product is provided, convenience or accommodation payments occur when a single payment is made to a vendor that includes amounts for multiple entities. Affiliates on whose behalf a convenience or accommodation payment is made shall, within 30 days of receipt of an invoice with respect to such payment, reimburse the affiliate that made the payment.

ARTICLE VI

MISCELLANEOUS

This Agreement sets forth the System's general principles relating to the determination and allocation of costs among System companies.

This Agreement shall be in full force and effect as of the date first mentioned above, subject to any necessary approval of governmental agencies having jurisdiction over this matter.

National may from time to time consent to the addition of other subsidiaries as parties to this Agreement, including without limitation subsidiaries that may be formed or

acquired after the date hereof. With such consent, any such additional subsidiary shall become a party to this Agreement by executing a signature page hereto. Distribution Corporation shall re-file this Agreement with the PUC when subsidiaries are added.

This Agreement shall terminate with regard to any System company upon not less than ninety days written notice of termination from such company to the other System companies; provided, however, this Agreement shall terminate immediately with regard to any company as of the date such company ceases to be an affiliated member of the System.

This Agreement may be executed in counterparts, each of which shall be deemed an original, and all of which taken together shall constitute one instrument.

IN WITNESS WHEREOF, the parties have hereunto executed this Agreement as of the date first written above.

COST ASSIGNMENT AND ALLOCATION MANUAL

SECTION II AFFILIATE SERVICES

A. Affiliate Services Provided

NFG and its affiliated subsidiaries provide a variety of service amongst and between each other. Some services are directly related to the individual company's line of business, such as providing transportation or gas storage services. Other services take advantage of synergies such as operating employees maintaining closely located facilities of other companies. Additionally, there are administrative and general services, which are performed that benefit some or all of the affiliates. This would be true of Accounting, Human Resources, Audit Services, Finance and Corporate Communications.

REGULATED SERVICES:

Service	Provider	Recipient
Administrative	Distribution, Supply	All affiliates
Finance	Distribution	All affiliates
Human Resources	Distribution	All affiliates
Legal	Distribution, Supply	All affiliates
Gas Distribution	Distribution	3rd Party
Gas Measurement	Distribution, Supply	Distribution, Supply, Empire
Gas Transmission	Supply, Empire	Distribution, 3rd Party
Gas Storage	Supply, Empire	Distribution, Empire, 3rd Party
Gas Transportation	Distribution, Supply, Empire	3rd Party
Gas Gathering	Supply	Seneca
Gas Dispatch	Supply	Distribution, Supply, Empire
Operating & Maintenance	Distribution, Supply	All Affiliates

NON-REGULATED SERVICES:

Service	Provider	Recipient
Gas Gathering	Midstream	Seneca, 3rd Party
Gas Processing	Midstream	Seneca
Office Space rental	NFG Co.	Distribution, Supply, Midstream, Empire

B. Services Provided By NFG Co

DEPARTMENT	DESCRIPTION
Executive	Provide management services for all aspects of the business.
Financing	Provides financing for affiliates through issuance of commercial paper, bank lines of credit and equity. Additionally, monitors corporate credit rating and bank relationships.

C. Services Provided By NFGDC – NYD

DEPARTMENT	DESCRIPTION
Accounting	Provide accounting services to maintain the books and records of the company, provide financial reports and analysis, prepare statutory reports, provide accounting research, set accounting policy, maintain allocations and inter-company billings. Maintain the general ledger (GL) system.
Accounts Payable	Provide non-payroll disbursement processing and analysis including account distribution to the general ledger. Resolve problems associated with invoice processing and maintain the accounts payable system.
Asset Management	Provide services to maintain and manage plant accounting and depreciation for affiliate assets.
Audit Services	Perform audit services for management and the Board of Directors, assist external auditors, provide analysis and safeguard company assets.
Benefit Administration	Provide services to design, implement and administer employee benefit programs.
Budget	Develop and maintain an operating budget, provide management with variance reports and analysis. Provide training and instruction to budget preparers.
Cash Management	Provide services to plan, manage and maintain corporate cash flow, maintain the 'money pool', track miscellaneous billings and cash related items.
Corporate Communications	Provides services related to public and media relations, as well as communicating company information to employees and retirees.
Credit, Collections & Receivables Management	Provide services to maximize customer collections and reduce bad debt write-offs. Additionally, provide credit risk analysis of customers and marketers.
Engineering	Provide engineering service and support functions for pipelines and construction projects.
Executive	Provides management and administrative services related to the overall operation and direction of the affiliates.

DEPARTMENT	DESCRIPTION
Executive – Distribution	Provides management and administrative services related to the overall operation and direction of NFGDC.
Finance - General	Provides services to analyze, maintain and monitor corporate financing activities.
Financial Planning	Provide services to prepare, analyze and maintain the corporate earnings forecast, cash and financing needs.
Government Affairs	Provides services to monitor the political arena and maintain relationships with governmental institutions on a state and federal level.
Human Resources	Provide services to manage and maintain employee compensation policies, recruiting and training programs and worker's compensation and disability programs. Additionally, implement and maintain employee programs and statutory programs.
Information Technology	Provide services to manage, design, develop, implement, monitor and maintain information technologies, application systems, networks, mainframe, software, data security, data recovery and data backup.
Investor Relations	Develop and implement programs to educate and inform potential investors, and communicate information to current investors.
Land	Provide service related to facilities management and land support for operations and construction.
Legal	Provide service related to labor and employment law, litigation, contracts, environmental matters, financial reporting and advice on other legal matters.
Materials Management	Manage and maintain material inventories and material logistics. Additionally, monitor material requirements planning (MRP) activity and project material planning.
Payroll	Provide services related to wage distribution, including the distribution of accounting charges to the GL. Manage withholding liabilities and coordinate filing of statutory reports.
Purchasing	Provide services to procure material, equipment and services, analyze corporate spending and support the materials management function. Provide services to manage and maintain leasing activities and disposition of leased materials.
Rates & Regulatory Affairs	Provide services to manage regulatory activities and relationships for NFGDC. Manage, monitor and implement regulatory programs, provide direct support for customer pricing and billing, and develop sales and load forecasts.
Risk	Provide service related to Risk mitigation, Insurance, Environmental issues and compensation and damage claims.

DEPARTMENT	DESCRIPTION
Safety	Provides services to strengthen our safety culture and promote continuous improvement throughout the organization.
Security	Provide security services for company buildings, structures, work sites and personnel.
Tax	Provide services related to tax filing compliance requirements and perform research and consulting on tax issues.
Telecommunications	Provide services to design, implement, monitor and maintain telecommunication networks throughout the affiliates for voice, data, cellular and satellite communication.
Operating & Maintenance – Distribution	Provides service to operate and maintain lines, including changing charts, servicing valves and meters, and other routine maintenance.
Operating & Maintenance – Transmission	Performs routine maintenance and operating functions on transmission lines of affiliates.

D. Services Provided By NFGDC - PAD

DEPARTMENT	DESCRIPTION
Corporate Communications	Provides services related to public and media relations, as well as communicating company information to employees and retirees.
Engineering	Provide engineering service and support functions for pipelines and construction projects.
Executive – Distribution	Provides management and administrative services related to the overall operation and direction of NFGDC.
Government Affairs	Provides services to monitor the political arena and maintain relationships with governmental institutions on a state and federal level.
Human Resources	Provide services to manage and maintain employee compensation policies, recruiting and training programs and worker's compensation and disability programs. Additionally, implement and maintain employee programs and statutory programs.
Land	Provide service related to facilities management and land support for operations and construction.
Legal	Provide service related to labor and employment law, litigation, contracts and advice on other legal matters.
Risk	Provide service related to Risk mitigation, Insurance, Environmental issues and compensation and damage claims.

Safety	Provides services to strengthen our safety culture and promote continuous improvement throughout the organization.
Security	Provide security services for company buildings, structures, work sites and personnel.
Operating & Maintenance – Distribution	Provides service to operate and maintain distribution lines for NYD, including changing charts, servicing valves and meters, and other routine maintenance.
Operating & Maintenance – Gathering	Performs routine maintenance and operating functions on gathering lines of affiliates.
Operating & Maintenance – Transmission	Performs routine maintenance and operating functions on transmission lines of affiliates.

E. Services Provided By NFGSC

DEPARTMENT	DESCRIPTION
Commercial Services	Provides marketing services for pipeline affiliates.
Engineering	Provide engineering service and support functions for pipelines and construction projects.
Executive – Supply	Provides management and administrative services related to the overall operation and direction of NFGSC.
Land	Provide service related to facilities management and land support for operations and construction.
Legal	Provides legal services for NFGSC and Empire.
Regulatory	Provides regulatory services for Empire.
Operating & Maintenance – Distribution	Provides service to operate and maintain distribution lines of affiliates, including changing charts, servicing valves and meters, and other routine maintenance.
Operating & Maintenance – Gathering	Performs routine maintenance and operating functions on gathering lines of affiliates.
Operating & Maintenance – Transmission	Performs routine maintenance and operating functions on transmission lines of Empire.

F. Services Provided By Midstream

SERVICE	DESCRIPTION
Gathering Service	Provides natural gas gathering services for Seneca Resources.
Gas Processing	Provides natural gas processing services for Seneca Resources.

Note: Leidy Hub and NFR do not provide services to the other affiliates at this time. As previously mentioned, the August 1, 2020 sale of NFR's commercial and industrial contracts and certain other assets combined with the turn back of NFR's residential customers to Distribution Corporation has effectively ended NFR's operations.

EXHIBIT C

COST ASSIGNMENT AND ALLOCATION MANUAL

SECTION VIII OTHER ALLOCATION METHODS

A. Allocation Factors

When costs cannot be directly charged to an affiliate company, an allocation is used to apply the accounting charges. Since many costs are shared between the affiliates, it is important to ensure that the costs are applied fairly.

While the Common Cost Allocation Methodology is used for more of the administrative and general or governance costs, NFG employs various other methods to allocate costs between and among affiliates. These allocations are based on factors that are more causative in nature. The following is a list of the various factors employed:

A	Number of customers	For costs driven by the number of Utility Customers, the ratio of customers between NYD and PAD is used.
B	Number of customer bills	For costs driven by the number of Utility Bills, the ratio of bills between NYD and PAD is used.
C	Ratio of Throughput	For gas supply administration costs between NYD and PAD.
D	Ratio of Transportation Sales	For costs related to transportation activities, the ratio of transportation sales between NYD and PAD will be used.
E	Ratio of Meters – Small	For costs related to the maintenance of small and large meters, the factor is based on the number of meters worked on by state.
F	Ratio of Meters – Large	For costs related to the maintenance of small and large meters, the factor is based on the number of meters worked on by state.
G	Percentage of IS Analyst Time Used	For IS labor costs, time is collected and then a percentage is calculated based on the work performed.
H	Number of Temperature Correctors	For costs related to the maintenance of pressure and temperature correctors, the allocation is based on the percentage of pressure and temperature correctors in the field.
I	Number of Pressure Relief Valves	For costs related to the maintenance of regulators and pressure reliefs, the factor is based on the percentage of regulators and pressure reliefs in the field.

J	Number of Employees	For costs driven by number of employees receiving the services or benefits of the department's activities.
K	Number of Messenger Stops	For messenger service costs, a ratio based on the number of messenger stops is used.
L	Number of Computers	For costs driven by computer connectivity to various systems through the NFG intranet.
M	Number of Telecommunication Basic Licenses	For telecom costs driven by connectivity to the telecom system.
N	Number of Internet connection ports.	For costs driven by computer connectivity to various systems through the NFG intranet.
O	Square footage	For costs driven by the square footage by department at the Main Office making use of the service or equipment, or costs driven by square footage occupied by affiliates at other shared locations.
P	Placement after Training	For costs related to HR rotators during their rotation.
Q	Time study, meter study, invoice analysis and shipper volume schedules for throughput	For gas measurement expense for Supply and Empire.

B. Methodology Application

The following table contains information regarding the current clearing accounts, their home business unit (BU) and the methodology used to allocate the costs:

1. Information Technology:

These are the costs to operate and maintain the Information Technology department and the various computer networks and systems. In the case of account 184150, the costs are related to capital additions and will be charged to capital accounts in the various subsidiaries.

Account	BU	Cost To Be Allocated	Allocation Methodology
184140	DNYG1	Information Technology expenses, which includes labor and benefits.	Costs are allocated based on analyst hours charged to various IT time reporting groups.
184170	DNYG1	Information Technology Network costs, which include labor, benefits, professional service provider (PCI), equipment leases, maintenance agreements, telecommunication costs, utilities and other miscellaneous costs.	Costs are allocated based on a percentage of system connections, including PCs and Tough books.
184150	DNYG1	Information Technology costs primarily related to the roll-out of new computer equipment or software (such as a new firewall) that will be capitalized across the subsidiaries.	Costs are allocated based on a percentage of system connections for each subsidiary.

2. Telecommunications:

These are the various costs of operating and maintaining the Company's telecommunication and data network. Costs include labor, contractor charges, maintenance agreements, leased lines and equipment and various other charges related to providing service.

Account	BU	Cost To Be Allocated	Allocation Methodology
184430	DNYG1	Telecom Costs for Phone Usage & Equipment	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.
184435	DNYG1	Telecom - Tie Lines & Wats	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.
184445	DNYG1	Telecom - Remote Terminal Usage	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.

Account	BU	Cost To Be Allocated	Allocation Methodology
184450	DNYG1	Telecom - Pa Phone Use & Equipment	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.
184455	DNYG1	Telecom - MSW	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.
184460	DNYG1	Telecom - Erie SC	Costs are allocated based on a count of all computing devices used for telecom purposes. That is PC hardware (including PC's, laptops tablets, etc.), cellular devices, and desk phones. All device counts were applied to the companies that use them. The totals for each company then determine the new percentage allocation when compared to the overall count.

3. Messenger Expense:

These are costs related to the delivery of material and mail between NFG locations.

Account	BU	Cost To Be Allocated	Allocation Methodology
184300	DNYG1	Messenger Expense	Costs are allocated on the basis of number of messenger stops.
184300	DPAG1	Messenger Expense	Costs are allocated on the basis of number of messenger stops.
184300	SUPG1	Messenger Expense	Costs are allocated on the basis of number of messenger stops.

4. Meter Shop:

These are the costs related to maintaining the various meters and metering equipment used by affiliates.

Account	BU	Cost To Be Allocated	Allocation Methodology
184700	DNYG1	Meter Shop expenses – Regulators and Pressure Relief, includes labor, benefits, materials, repair parts	Costs are allocated based on the percentage of regulators and pressure reliefs in the field.
184705	DNYG1	Meter Shop expenses – Temperature corrector, includes labor, benefits, materials, repair parts	Costs are allocated based on the percentage of pressure and temperature connectors in the field.
184707	DNYG1	Meter Shop expenses – general shop / warehousing, includes labor, benefits, materials, repair parts	Costs are allocated based on the average of the percentages of the small and large meter programs plus temperature correction and meter regulators.
184710	DNYG1	Meter Shop expenses – small meter, includes labor, benefits, materials, repair parts	Costs are allocated based on the meters worked on by state in prior 12 months.
184720	DNYG1	Meter Shop expenses – large meter, includes labor, benefits, materials, repair parts	Costs are allocated based on the meters worked on by state in prior 12 months.

5. Miscellaneous Customer Services:

These are costs related to producing and mailing bills to customers.

Account	BU	Cost To Be Allocated	Allocation Methodology
184240	DNYG1	Customer Billing	Costs are allocated based on the ratio of customer bills between NYD & PAD.
184245	DNYG1	Customer Postage	Costs are allocated based on postage usage.

6. Supply Services:

The following are costs related to the movement of gas through the pipeline network.

Account	BU	Cost To Be Allocated	Allocation Methodology
184220	SUPG1	Gas Measurement Expenses, including labor, benefits, and contractor and office expenses.	Costs are allocated based on departmental labor hours. Study performed by department.
184250	SUPG1	Gas Supply Administration, including labor, benefits, and contractor and office expenses.	Costs are allocated based on a rolling three-year average of the throughput of Distribution NY and Distribution PA.
184270	SUPG1	Gas Control including labor, benefits, and contractor and office expenses.	Costs are allocated based on departmental labor hours. Study performed by department.

7. Miscellaneous Services:

These are costs related to the shared use of the mail, print and copy rooms throughout the main office, and also the cost of confidential document destruction.

Account	BU	Cost To Be Allocated	Allocation Methodology
184617	DNYG1	MPC Room Clearing	Costs are allocated based on the number of employees at 6363 Main St
184618	DNYG1	Certified Document Destruction	Costs are allocated based on the number of employees at 6363 Main St

8. Human Resources Management Trainees

These costs are related to the labor, benefits loads, and office supplies for the employees participating in the Management Trainee program. The employees use one home department but work in various departments throughout the company. At the end of the two years, employees are assigned a permanent work location and begin recording expense under that department ID.

Department	BU	Cost To Be Allocated	Allocation Methodology
1457	DNYG1	HR Management Trainees	Costs are allocated based on historical placement of employees upon completion of two-year program

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-I-Operating Expenses
Delivered on January 28, 2026

III-I.6

Request:

For the HTY, the FTY and the FPFTY, describe costs relative to leasing equipment, computer rentals, and office space, including terms and conditions of the lease (including but not limited to, beginning and end date(s) of lease(s), monthly or annual dollar amount of payment(s)) and copies of contracts for each. Explain the method of calculating monthly or annual payments. If allocated from the parent company or an affiliated company, provide an explanation and supporting documentation for the method of allocation.

Response:

Information related to fund availability arrangements is CONFIDENTIAL. The Company is providing CONFIDENTIAL Attachment III.I.6 pages 6 through I06 in a separately sealed envelope that is marked "CONFIDENTIAL". The Company hereby requests that the content of such envelope be placed in the Commission's NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding.

Please see Attachment III.I.6 as follows:

HTY, FTY and FPFTY describe costs relative to leasing equipment, computer rentals, and office space, including terms and conditions of the lease (including but not limited to, beginning and end date(s) of lease(s), monthly or annual dollar amount of payment(s))

Costs for HTY, FTY and FPFTY are presented on pages 2-4 of the attached document.

Copies of contracts for each

Contracts for each lease are included on pages 6-106, while a summary of contracts is available on page 5 of the attached document.

Explain the method of calculating monthly or annual payments. If allocated from the parent company or an affiliated company, provide an explanation and supporting documentation for the method of allocation

The method of calculating monthly or annual payments are presented on pages 2-4 of the

attached document. The amounts presented are exclusive of National Fuel Gas Distribution Corporation (Pennsylvania Division) and are not allocated to or from the parent company or an affiliated company.

Prepared by or under the supervision of:

Michael J. Maggiol

National Fuel Gas Distribution Corporation
Pennsylvania Division
Costs Relative to Leasing Equipment, Computer Rental, and Office Space
12 Months Ended 9/30/2025

	Annual Expense	Method of Computing Payment	Terms of Lease or Rental Agreements
Land	$ 29,580.31	Monthly payments per lease or rental agreements	2020-2050
Office Space	18,315.57	Monthly payments per lease or rental agreements	Auto-renews annually
Office Equipment	967.12	Monthly payments per lease or rental agreements	Auto-renews monthly
	$ 48,863.00		

Footnotes:

The balances above include both long-term (12 months or more) and short-term (12 months or less) leases and rental agreements.

Method of Computing Payments for HTY: Monthly or annual payments are determined in accordance with the rate schedule in the prior executed agreement.

Terms of Lease or Rental Agreements HTY: Certain agreements reached the end of their initial term and continue under auto-renewal provisions (monthly or annual) in the absence of newly executed contracts. For these items, the "Terms of Lease or Rental Agreements" column indicates "auto-renews monthly" or "auto-renews annually," and we have provided the last executed agreement.

2026 Base Rate Case
Responses to Section 53.53 - III-I-Operating Expenses
Delivered on January 28, 2026

III-I.9

Request:

For the HTY, the FTY and the FPFTY, provide a schedule showing insurance expense (other than employee benefits) for each type of insurance coverage. Include all of the following:

III.I.9.a A statement as to whether the public utility is self-insured or third-party insured.
III.I.9.b Amounts of any reserves for claims.
III.I.9.c Explanation of how insurance expense claims in the FPFTY are calculated.

Response:

A schedule providing details on insurance expense by each type of coverage is provided on page two of this document.

III.I.9.a The Company maintains a self-insured retention for general liability, auto, and property coverages, and has a self-insured retention for workers' compensation and cyber coverages. The Company procures excess third-party coverage as detailed on the next page.

III.I.9.b The Company currently has $268,937 booked as reserves for ongoing workers' compensation claims. The Company has no other reserves booked.

III.I.9.c Insurance expense for the FPFTY has been calculated using a compound annual growth rate based on actuals from FY2023 to FY2025.

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-I-Operating Expenses
Delivered on January 28, 2026

III-I.11

Request:

Submit costs claimed for recovery in the FTY associated with cancelled construction projects or obsolete inventory. Separately identify all of the following:

III.I.11.a Projects (including employee costs broken down by payroll and benefits) or inventory.
III.I.11.b All other expense categories.
III.I.11.c Related amounts and explain the reason for the cancellation or obsolescence.

Response:

There are no costs in the FTY forecast for canceled construction projects or obsolete inventory. During the HTY, there were no cancelled construction projects and the only obsolete inventory was a $8.09 clamp.

Prepared by or under the supervision of: Anthony Formato

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-J-Payroll, Benefits, and Retiree Costs
Delivered on January 28, 2026

III-J.1

Request:

Provide all of the following information for employee counts for the HTY, the 2 years immediately preceding the HTY, the FTY and the FPFTY:

III.J.1.a Actual and projected month-end employee counts by union, nonunion and temporary employee categories.
III.J.1.b Explanation of any material changes in employee counts.

Response (III.J.1.a):
Please see Attachments 1-5 (III.J.1.a)_Employee Counts for the union and nonunion employee counts for the HTY the 2 years preceding the HTY, the FTY and the FPFTY. National Fuel Gas Distribution Corporation does not have a temporary workforce.

Response (III.J.1.b):

There were no material changes in employee counts.

III-J.2

Request:

Provide all of the following payroll expense information, by union, nonunion and temporary employee categories:

III.J.2.a	Total annual payroll and overtime for the HTY, the 2 years immediately preceding the HTY, the FTY and the FPFTY.
III.J.2.b	Percentage and annual amount of payroll expense increases for the HTY, the FTY and the FPFTY. For increases not attributable to routine cost of living wage rate increases or union contracts, provide the percentage and annual amount of payroll expense increases for the 2 years immediately preceding the HTY.
III.J.2.c	Percentage and annual amount of payroll expense increases attributable to incentive plans or bonuses for the HTY, the 2 years immediately preceding the HTY, the FTY and the FPFTY.
III.J.2.d	Dates and percentages of pay increases for the 2 years immediately preceding the HTY in the same format for test year data provided in response to previously listed J.2.c.
III.J.2.e	Document(s) or statement(s) verifying that the actual payroll plus the increases equal the payroll expense claimed in the supporting data (by categories of expenses) for the HTY.
III.J.2.f	Document(s) or statement(s) showing that the verification shown in J.2.e will be conducted for the FTY and the FPFTY. Indicating the procedures for addressing any material differences between estimated expenses and actual expenses for the FTY and the FPFTY.
III.J.2.g	Copy of incentive compensation and bonus compensation plan documents.

Response:

III.J.2.a Please see summary on page 2 of this document for detail on the HTY and the preceding 2 years. Please refer to National Fuel Exhibit ATF-4 for detailed support on the FYT and FPFTY.

Responses to Section 53.53 - III-J-Payroll, Benefits, and Retiree Costs
Delivered on January 28, 2026

III-J.3

Request:

Provide all of the following employee benefit information by union, nonunion and temporary employee categories:

III.J.3.a Actual and projected expenses, by benefit type, for the HTY, the 2 years immediately preceding the HTY, the FTY and the FPFTY, separately identifying specific benefits and costs for executives and officers.

III.J.3.b Total annual insurance premiums for each type of employee insurance coverage for the HTY, the FTY and the FPFTY, indicating whether the public utility is self-insured or third-party-insured.

III.J.3.c Explanation of any projected increases in employee insurance expenses for the FTY and the FPFTY.

III.J.3.d Actual and projected total annual contributions by employees for insurance coverage for the HTY, the FTY and the FPFTY.

Response:

III.J.3.a Please see National Fuel Exhibit MPW-1 and note that, where possible, benefit costs have been broken down by employee type.

III.J.3.b Please see National Fuel Exhibit MPW-1 and note that hospitalization (including prescription drug coverage) is self-insured, and group life insurance is third-party-insured.

III.J.3.c For medical and prescription insurance, a trend rate is established based on rolling twelve month claims data in which the rolling twelve month average claims per enrolled participant at the end of the HTY is compared to the rolling twelve month average claims per enrolled participant at the beginning of the HTY. This trend rate is then applied to the estimated claims per enrolled participant from HTY to FTY and FPFTY. These trend rates are shown on National Fuel Exhibit No. MPW-1 Pages 5 and 6. In addition, expected changes in participant counts are also taken into consideration. For life insurance (including AD&D), since the Company has entered into a multi-year rate agreement with the carrier, the only expected increases are due to increases in expected participants.

III.J.3.d Please see National Fuel Exhibit MPW-1.

III-J.6

Request:

Provide all of the following pension information for the HTY, the FTY and the FPFTY:

III.J.6.a Total annual pension expense claimed.
III.J.6.b Method used to develop the pension plan claim.
III.J.6.c Breakdown between capitalized and expensed pension amounts.
III.J.6.d Actual cash pension contribution amounts for the HTY and 2 years immediately preceding the HTY, and projected cash pension contributions for the FTY and the FPFTY.
III.J.6.e Most recent actuarial studies for the pension plan.
III.J.6.f Actuarial support, if any, for actual and projected pension cash contribution amounts for the FTY, the FPFTY and any additional future periods.
III.J.6.g Credit balance in the test year used to make the base rate claim. If not reflected in the claim, state why not.
III.J.6.h Copy of the pension funding policy.
III.J.6.i Copy of retirement plan documents.
III.J.6.j If the pension cost figures include any unfunded pension costs, state the unfunded portion.

Response:

III.J.6.a There is no requested pension expense rate recovery.
III.J.6.b Pension rate recovery is derived from forecasted contributions, and there are no forecasted contributions.
III.J.6.c There are no contributions in the HTY or forecasted contributions in the FTY or FPFTY, and there no requested rate recovery. As such, there is no breakdown between capitalized and expensed amounts.
III.J.6.d There were contributions of $971,989 and $2,325,957 during the 12 months ended 9/30/2024 and 9/30/2023, respectively. There are no contributions in the HTY or forecasted contributions for the FTY or FPFTY.
III.J.6.e Information related to actuarial studies is CONFIDENTIAL. The Company is providing CONFIDENTIAL Attachment III.6.e in a separately sealed envelope that is marked “CONFIDENTIAL”. The Company hereby requests that the content of such envelope be placed in the Commission’s NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order

issued in this proceeding

III.J.6.f There are no contributions for the FTY. At the time of the filing, there is no requested rate recovery, as there were no projected contributions for the FTY, FPFTY or additional future periods. As such, this is not applicable.

III.J.6.g Based on the responses above, there is no credit balance that is part of a base rate claim.

III.J.6.h National Fuel Gas Company's ("NFG's") policy is to fund the Retirement Plan ("Plan") with an amount necessary to satisfy the minimum funding requirements of applicable laws and regulations and not more than the maximum amount deductible for federal income tax purposes. The calculation of NFG's annual cash contribution to the Plan requires the extensive use of assumptions including, but not limited to, projections of future discount rates, returns on plan assets, compensation levels, mortality, and employee turnover. To assist it in developing reasonable estimates of prospective pension contributions, NFG utilizes the services of Mercer Human Resource Consulting ("Mercer"), its outside actuarial consultant. Working with NFG's personnel, Mercer prepares a report annually that analyzes past financial results, evaluates current and future economic conditions and quantifies a range of amounts that NFG may contribute for pensions in a given year. The low end of the range represents the minimum contribution necessary to comply with the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). The top end of the range represents the maximum pension contribution that is deductible on a current basis under the Internal Revenue Code.

Using this information NFG determines the amount it will fund for a given year. In making that determination, NFG considers, among other things, the funded status of the plan, the current and expected return on the plan's investments, the level of cash expected to flow out of the plan in the form of retiree benefits, and estimates of future minimum funding requirements. The amount of the contribution is then allocated to each portion of the NFG's system, including the Company, on the basis of normal pension cost (that is, based upon each subsidiary's share of the pension plan's service and interest cost).

III.J.6.i Information related to retirement plan documents is CONFIDENTIAL. The Company is providing CONFIDENTIAL Attachment III.6.i in a separately sealed envelope that is marked "CONFIDENTIAL". The Company hereby requests that the content of such envelope be placed in the Commission's NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding

III.J.6.j Not applicable.

ASC 715 (US GAAP) Actuarial Valuation Report as of September 30, 2025

National Fuel Gas Company Postretirement Benefits

National Fuel Gas Company
November 4, 2025

Contents

1. Highlights 1

2. Accounting information 6

3. Plan assets 24

4. Basis of valuation 32

Appendix A: NPPBC for fiscal year ending September 30, 2025 by division and employment status

Appendix B: Reconciliation of funded status as of September 30, 2025 by division and employment status

Section 1

Highlights

This report presents the results under US accounting standards for the National Fuel Gas Company postretirement medical and life insurance plans for management's use in the preparation of the Company's financial statements for the accounting period October 1, 2024 through September 30, 2025.

Section 2 presents the basic valuation results and disclosures, including the components of the net periodic postretirement benefit cost (NPPBC) and a reconciliation of the financial information. **Section 3** presents information regarding plan assets. **Section 4** describes the actuarial basis on which the results of an application of the standards are founded.

The other comprehensive income/(loss) items for the fiscal year ending September 30, 2025 due to plan changes and net gain/(loss) arising during the year were $0 and $(19,722,202), respectively. The sources of the net loss are described in Section 2.4.

For the fiscal year ending September 30, 2025, reclassification adjustments of other comprehensive income/(loss) recognized as components of NPPBC consist of $(428,689) of prior service cost/(credit) and $37,012 of net loss/(gain).

The total other comprehensive income/(loss) for the fiscal year ending September 30, 2025 is $(20,113,879).

This valuation reflects the impact of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003.

Summary of principal plan results

	Fiscal year ending	
	September 30, 2025	September 30, 2024
Service cost with interest to end of year	$ 518,981	$ 434,446
Net periodic postretirement benefit cost/(income)	(11,515,835)	(13,341,794)
Estimated pay-as-you-go cost	24,040,094	23,547,335

	Fiscal year ending	
	September 30, 2025	September 30, 2024
Accumulated postretirement benefit obligation (APBO)		
Inactives	$ 283,976,937	$ 272,096,832
Actives fully eligible	34,719,004	34,995,147
Actives not yet fully eligible	11,887,766	13,932,887
Total	$ 330,583,707	$ 321,024,866
Fair value of assets	496,105,580	496,064,799
Unfunded APBO	$ (165,521,873)	$ (175,039,933)

	Fiscal year ending	
	September 30, 2025	September 30, 2024
Number of participants in the medical valuation		
Inactives	1,904	1,960
Actives	180	212
Total	2,084	2,172

Important notices

Mercer has prepared this report exclusively for National Fuel Gas Company. Subject to this limitation, National Fuel Gas Company may direct that this report be provided to its auditors in connection with an audit of its financial statements. Mercer is not responsible for use of this report by any other party.

The only purpose of this report is to present Mercer's actuarial estimates of liabilities as of September 30, 2025 for the National Fuel Gas Company postretirement medical and life insurance benefits for National Fuel Gas Company to incorporate, as it deems appropriate, in its financial statements under US accounting standards.

This report may not be used for any other purpose. Mercer is not responsible for the consequences of any unauthorized use. Its contents may not be modified, incorporated into or used in other material, sold or otherwise provided, in whole or in part, to any other person or entity without Mercer's permission.

This report was prepared in accordance with generally accepted actuarial principles and procedures. The results reported herein are based on the assumptions and methods described in Section 4 of this report. The actuarial assumptions were selected by National Fuel Gas Company. Based on the information provided to us, we believe that the actuarial assumptions are reasonable for the purposes described in this report.

All parts of this report, including any documents incorporated by reference, are integral to understanding and explaining its contents. No part may be taken out of context, used, or relied upon without reference to the report as a whole.

Decisions about benefit changes, granting new benefits, investment policy, funding policy, benefit security, and/or benefit-related issues should not be made solely on the basis of this valuation, but only after careful consideration of alternative economic, financial, demographic, and societal factors, including financial scenarios that assume future sustained investment losses.

National Fuel Gas Company is ultimately responsible for selecting the plan's accounting policies, methods, and assumptions. The policies, methods, and assumptions used for the valuation are described in Section 4 of this report. National Fuel Gas Company is solely responsible for communicating to Mercer any changes required to the policies, methods, or assumptions.

National Fuel Gas Company is solely responsible for selecting the plan's investment policies, asset allocations, and individual investments. The Mercer consultants who prepared this report have not provided any investment advice to National Fuel Gas Company.

This report is based on our understanding of applicable law and regulations as of the valuation date. Mercer is not an accountant or auditor and is not responsible for the interpretation of, or compliance with, accounting standards. Citations to and descriptions of accounting standards provided in this report are for reference purposes only. Mercer is not a law firm and this analysis is not intended to be a legal opinion. National Fuel Gas Company should consider securing the advice of legal counsel with respect to any legal matters related to this document and any attachments.

To prepare this report, we have used Mercer's suite of proprietary valuation software and tools. The purpose of a valuation is to measure the plan's liabilities, reflecting the applicable census data and provisions and using the methods and assumptions selected by National Fuel Gas Company based on

the applicable laws, regulations, and other guidance in effect as of the measurement date. We have relied on the experts who developed each of the following:

- Mercer's portfolio return calculator
- Mercer's capital market assumptions
- Mercer's yield curve models
- Mercer's retiree medical trend model
- Mercer's retiree aging model

The first three tools were used in setting the discount rate and in evaluating the reasonableness of the economic assumptions, such as the expected rate of return on plan assets. The final two tools were used in developing the trend table and in developing the aging table.

Actuarial Standard of Practice No. 56 requires the actuary to identify and disclose any material inconsistencies among actuarial assumptions, and, for assumptions that are not prescribed by applicable law, the reason for such inconsistencies. To our knowledge, there are no material inconsistencies in assumptions.

National Fuel Gas Company should notify Mercer promptly after receipt of this report if it disagrees with anything contained herein or is aware of any information that would affect the results of the valuation that has not been communicated to Mercer or incorporated herein. This report will be deemed final and acceptable to National Fuel Gas Company unless such notice is promptly provided to Mercer.

Professional qualifications

We are available to answer any questions on the material contained in this report or to provide explanations or further detail as may be appropriate. Collectively, the undersigned credentialed actuaries meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained in this report. We are not aware of any direct or material indirect financial interest or relationship, including investment consulting or other services provided to National Fuel Gas Company by the actuaries signing this report that could create a conflict or impair the objectivity of this work. To the extent that other Mercer professionals have provided investment services to National Fuel Gas Company, we do not believe those services would result in a conflict of interest nor affect the objectivity of this work.

Section 2

Accounting information

US accounting standards require that certain information about postretirement benefits other than pension benefits be disclosed in the footnotes to the sponsor's financial statements. The disclosures include a statement of the net periodic postretirement benefit cost, a reconciliation of the plan's funded status, a statement of assumptions and methods, and benefit payments expected to be paid in the next ten years. Presented in this section are illustrations of this information.

Section 2.1 Disclosure of net periodic postretirement benefit cost for fiscal year ending September 30, 2025

Section 2.2 Reconciliation of funded status

Section 2.3 Disclosure of sensitivity to changes in health care cost trend rates for fiscal year ending September 30, 2025

Section 2.4 Supporting documentation

A. Reconciliation of cumulative employer contributions in excess of net periodic postretirement benefit cost during fiscal year ending September 30, 2025
B. Determination of net (gain)/loss for fiscal year ending September 30, 2025
C. Effect of assumption changes for fiscal year ending September 30, 2025
D. Amortization of (gains)/losses applicable to entities other than NY Distribution Corporation for the period October 1, 2024 to September 30, 2025
E. Amortization of vintage (gains)/losses applicable to NY Distribution Corporation for the period October 1, 2024 to September 30, 2025
F. Amortization of prior service (credit)/cost for fiscal year ending September 30, 2025
G. Other changes recognized in other comprehensive income

Section 2.5 Employer disclosure information

Section 2.1: Net periodic postretirement benefit cost for fiscal year ending September 30, 2025

		Fiscal year ending September 30, 2025
1.	**Service cost**	$ 518,981
2.	**Interest cost**	$ 14,501,221
3.	**Actual return on assets**	
	a. Expected return	$ 26,144,360
	b. Asset (gain)/loss	2,650,462
	c. Actual return (a. – b.)	$ 23,493,898
4.	**Other NPPBC components**	
	a. Amortization of prior service (credit)/cost	$ (428,689)
	b. Amortization of (gain)/loss	37,012
	c. Deferral of asset (gain)/loss	2,650,462
	d. Total (a. + b. - c.)	$ (3,042,139)
5.	**Net periodic postretirement benefit cost** (1. + 2. – 3.c. + 4.d.)	**$ (11,515,835)**

Section 2.2: Reconciliation of funded status

		Fiscal year ending	
		September 30, 2025	September 30, 2024
1.	Accumulated postretirement benefit obligation	$ 330,583,707	$ 321,024,866
2.	Fair value of assets	496,105,580	496,064,799
3.	Funded status (2. – 1.)	$ 165,521,873	$ 175,039,933
4.	Net amount recognized	$ 165,521,873	$ 175,039,933
Amounts not yet reflected in net periodic postretirement benefit cost and included in accumulated other comprehensive income			
5.	Prior service credit/(cost)	$ 257,210	$ 685,899
6.	Accumulated gain/(loss)	(19,813,186)	(127,996)
7.	Accumulated other comprehensive income/(loss) (5. + 6.)	$ (19,555,976)	$ 557,903
8.	Cumulative employer contributions in excess of net periodic postretirement benefit cost	$ 185,077,849	$ 174,482,030
9.	**Net amount recognized in statement of financial position** (7. + 8.)	**$ 165,521,873**	**$ 175,039,933**

Section 2.3: Supporting documentation

Sensitivity to changes in health care cost trend rates for fiscal year ending September 30, 2025

	Valuation trend	Valuation trend +1%	Difference	% change
The aggregate of the service cost and interest cost	$ 15,020,202	$ 16,800,767	$ 1,780,565	11.85%
Accumulated postretirement benefit obligation as of September 30, 2025	$ 330,583,707	$ 362,507,371	$ 31,923,664	9.66%

	Valuation trend	Valuation trend -1%	Difference	% change
The aggregate of the service cost and interest cost	$ 15,020,202	$ 13,582,616	$ (1,437,586)	(9.57)%
Accumulated postretirement benefit obligation as of September 30, 2025	$ 330,583,707	$ 302,979,911	$ (27,603,796)	(8.35)%

Trend rate assumptions

Health care cost trend rates on eligible charges as of September 30, 2025	Medical		Prescription drug	Medicare Part B premium	Retiree drug subsidy
	Pre 65	Post 65			
Initial trend (2025)	7.25%	5.75%	11.75%	5.75%	4.00%
Ultimate trend	4.00%	4.00%	4.00%	4.00%	4.00%
Number of years to ultimate trend	25	25	25	25	25

Section 2.4: Supporting documentation

A. Reconciliation of cumulative employer contributions in excess of net periodic postretirement benefit cost

			Fiscal year ending September 30, 2025
1.	Cumulative employer contributions in excess of net periodic postretirement benefit cost at September 30, 2024	$	174,482,030
2.	Employer contributions during fiscal 2025		593,848
3.	Net periodic postretirement benefit (cost)/income for fiscal 2025		11,515,835
4.	Subsidy payment received		(1,513,864)
5.	**Cumulative employer contributions in excess of net periodic postretirement benefit cost at September 30, 2025** (1. + 2. + 3. + 4.)	**$**	**185,077,849**

The net contributions shown in item 2 above include funding contributions and benefit payments made by National Fuel Gas Company on a pay-as-you-go basis as follows:		
Contributions to trust	$	0
Benefits paid by employer on a pay-as-you-go basis		593,848
Total	$	593,848

B. Determination of net (gain)/loss for fiscal year ending September 30, 2025

Components of net (gain)/loss for fiscal year ending September 30, 2025		
1. Change in demographics/claims experience		
a. Projected APBO as of September 30, 2025	$	312,004,974
b. APBO as of September 30, 2025 before change in assumptions		322,507,932
c. (Gain)/loss from change in demographics/claims[1] (b. – a.)	$	10,502,958
2. Change in assumptions		
a. APBO as of September 30, 2025 before change in assumptions	$	322,507,932
b. APBO as of September 30, 2025 after change in assumptions		330,583,707
c. (Gain)/loss due to assumption changes (b. – a.)	$	8,075,775
3. Net benefit payments		
a. Expected net benefit payments for fiscal year ending September 30, 2025	$	24,040,094
b. Actual net benefit payments for fiscal year ending September 30, 2025		22,533,101
c. (Gain)/loss from benefit payments (b. – a.)	$	(1,506,993)
4. Investment results		
a. Expected return on assets for fiscal year ending September 30, 2025	$	26,144,360
b. Actual return on assets for fiscal year ending September 30, 2025		23,493,898
c. (Gain)/loss from investment results (a. – b.)	$	2,650,462

Summary of net (gain)/loss arising during 2025		
1. Change in demographics/claims experience	$	10,502,958
2. Change in assumptions		8,075,775
3. Net benefit payments		(1,506,993)
4. Investment results		2,650,462
Net (gain)/loss arising during 2025 (1. + 2. + 3. + 4.)	**$**	**19,722,202**

(Gain)/loss balance as of September 30, 2025		
1. (Gain)/loss balance as of September 30, 2024	$	127,996
2. Amount amortized during 2025		37,012
3. Net (gain)/loss arising during 2025		19,722,202
(Gain)/loss balance as of September 30, 2025 (1. – 2. + 3.)	**$**	**19,813,186**

[1] Reflects a loss of $4,077,506 due to demographic experience and a loss of $6,425,452 due to claims experience.

C. Effect of assumption changes for fiscal year ending September 30, 2025

The effective discount rate for determining the benefit obligation increased from 4.98% per annum as of September 30, 2024 to 5.30% per annum as of September 30, 2025. This assumption change decreased the APBO by $9,913,263 as of the end of the period. Effective September 30, 2025, the mortality improvement projection scale assumption was updated to reflect the publication of additional mortality data. This assumption change decreased the APBO by $243,484 as of the end of the period. Effective September 30, 2025, the trend assumption was updated to better reflect anticipated experience. This assumption change increased the APBO by $18,232,522 as of the end of the period.

D. Amortization of (gains)/losses applicable to entities other than NY Distribution Corporation for the period October 1, 2024 to September 30, 2025

			Total	PA Distribution	Supply	SRC	Parent	Empire Pipeline	Midstream
1.	**Accumulated postretirement benefit obligation (APBO)**	$	142,264,070	57,874,500	80,878,458	1,712,928	1,614,830	0	183,354
2.	**Fair value of plan assets**	$	215,539,005	106,314,575	109,224,430	0	0	0	0
3.	**Prior service (credit)/cost**	$	(282,708)	(116,204)	(162,298)	(3,702)	(504)	0	0
4.	**Cumulative employer contributions in excess of net periodic postretirement benefit cost**	$	93,313,270	61,532,824	36,237,633	(1,969,886)	(2,041,074)	(7,712)	(438,515)
5.	**Unrecognized (gain)/loss** (1. – 2. – 3. + 4.)	$	20,321,043	13,208,953	8,053,959	(253,256)	(425,740)	(7,712)	(255,161)
6.	**Market-related value of plan assets (MRV)**	$	215,539,005	106,314,575	109,224,430	0	0	0	0
7.	**Excess of fair value over market-related value** (2. – 6.)		0	0	0	0	0	0	0
8.	**Unrecognized (gain)/loss potentially subject to amortization** (5. + 7.)			13,208,953	8,053,959	(253,256)	(425,740)	(7,712)	(255,161)
9.	**Corridor (calculated separately for union and nonunion based on 10% of the larger of APBO or MRV)**			10,631,458	10,922,443	171,293	161,483	0	18,335
10.	**Unrecognized (gain)/loss subject to amortization**[2]			3,435,261	1,317,990	(81,963)	(264,257)	(7,712)	(236,826)
11.	**Average future service of active participants**			4.06	4.06	4.06	4.06	4.06	4.06
12.	**Weighted amortization amount** (10. ÷ 11.)	**$**	**1,025,244**	**846,123**	**324,628**	**(20,188)**	**(65,088)**	**(1,900)**	**(58,331)**

[2] Generally, this is the excess of the absolute value of 8. over 9. However, the unrecognized (gain)/loss subject to amortization is determined separately for collectively and non-collectively bargained employees, which can produce a different result. See Appendix A for additional details.

E. Amortization of vintage (gains)/losses applicable to NY Distribution Corporation for the period October 1, 2024 to September 30, 2025

	Summary for fiscal year 2025		
	Balance at beginning of period	Amount recognized	Balance at end of period
Prior vintage year	$ 1,830,358	1,830,358	$ 0
Vintage year 1	7,738,368	3,869,186	3,869,182
Vintage year 2	(12,999,293)	(4,333,099)	(8,666,194)
Vintage year 3	(3,194,472)	(798,618)	(2,395,854)
Vintage year 4	10,870,194	2,174,039	8,696,155
Vintage year 5	(865,995)	(144,333)	(721,662)
Vintage year 6	(28,132,320)	(4,018,903)	(24,113,417)
Vintage year 7	1,565,223	195,653	1,369,570
Vintage year 8	(5,580,399)	(620,044)	(4,960,355)
Vintage year 9	8,575,289	857,529	7,717,760
Vintage year 10	N/A	N/A	9,614,932
Total	**$ (20,193,047)**	**(988,232)**	**$ (9,589,883)**

The base associated with vintage year 10 was established as of September 30, 2025, the base associated with vintage year 9 was established as of September 30, 2024, etc.

F. Amortization of prior service (credit)/cost for fiscal year ending September 30, 2025

Description	Amortization period			Balances		Payment
	Date created	Initial years	Years left	Initial	Outstanding	
Prior service (credit)/cost						
Plan amendment – 2011	10/1/2011	14.60	0.60	$ (6,258,856)	$ (257,210)	$ (257,210)
Total				**$ (6,258,856)**	**$ (257,210)**	**$ (257,210)**

Prior service (credit)/cost amount		
1.	Amount of base	$ (6,258,856)
2.	Amortization period	14.60 years
3.	Effective date	10/01/2011

Amortization schedule

Year	Beginning balance	Amortization amount	Ending balance
2011	$ 0	$ 0	$ (6,258,856)
2012	(6,258,856)	(428,689)	(5,830,167)
2013	(5,830,167)	(428,689)	(5,401,478)
2014	(5,401,478)	(428,689)	(4,972,789)
2015	(4,972,789)	(428,689)	(4,544,100)
2016	(4,544,100)	(428,689)	(4,115,411)
2017	(4,115,411)	(428,689)	(3,686,722)
2018	(3,686,722)	(428,689)	(3,258,033)
2019	(3,258,033)	(428,689)	(2,829,344)
2020	(2,829,344)	(428,689)	(2,400,655)
2021	(2,400,655)	(428,689)	(1,971,966)
2022	(1,971,966)	(428,689)	(1,543,277)
2023	(1,543,277)	(428,689)	(1,114,588)
2024	(1,114,588)	(428,689)	(685,899)
2025	(685,899)	(428,689)	(257,210)
2026	(257,210)	(257,210)	0

G. Other changes recognized in other comprehensive income

	Fiscal year ending September 30, 2025	Fiscal year ending September 30, 2024
Prior service cost/(credit) arising during period	$ 0	$ 0
Net loss/(gain) arising during period	19,722,202	16,301,573
Amortizations		
Prior service (cost)/credit	428,689	428,689
(Loss)/gain	(37,012)	2,266,499
Total recognized in other comprehensive (income)/loss	**$ 20,113,879**	**$ 18,996,761**
Total recognized in NPPBC and other comprehensive (income)/loss	**$ 8,598,044**	**$ 5,654,967**

Section 2.5: Employer disclosure information

	Fiscal year ending September 30, 2025	Fiscal year ending September 30, 2024
Change in benefit obligation		
Benefit obligation at beginning of period	$ 321,024,866	$ 274,278,704
Service cost	518,981	434,446
Interest cost	14,501,221	15,560,929
Plan participants' contributions	3,597,332	3,401,115
Retiree drug subsidy receipts[3]	1,513,864	1,207,655
Actuarial (gain)/loss	17,071,740	54,441,980
Amendments	0	0
Special termination benefits	0	0
Benefits paid	(27,644,297)	(28,299,963)
Benefit obligation at end of period	**$ 330,583,707**	**$ 321,024,866**
Change in plan assets		
Fair value of plan assets at beginning of period	$ 496,064,799	$ 455,702,334
Actual return on plan assets	23,493,898	64,782,388
Employer contributions	593,848	478,925
Plan participants' contributions	3,597,332	3,401,115
Benefits paid	(27,644,297)	(28,299,963)
Fair value of assets at end of period	**$ 496,105,580**	**$ 496,064,799**
Funded status	**$ 165,521,873**	**$ 175,039,933**
Amounts recognized[4] in the statement of financial position consist of		
Noncurrent assets	$ 169,227,570	$ 178,551,045
Current liabilities	(224,452)	(220,156)
Noncurrent liabilities	(3,481,245)	(3,290,956)
Net amount recognized at year-end	**$ 165,521,873**	**$ 175,039,933**

[3] National Fuel Gas Company recognizes Retiree Drug Subsidy (RDS) receipts as they are received.

[4] Amounts are determined on a company by company basis and then aggregated.

	Fiscal year ending September 30, 2025	Fiscal year ending September 30, 2024
Amounts not yet reflected in net periodic benefit cost and included in accumulated other comprehensive income/(loss)		
Transition asset/(obligation)	$ 0	$ 0
Prior service credit/(cost)	257,210	685,899
Accumulated gain/(loss)	(19,813,186)	(127,996)
Accumulated other comprehensive income/(loss)	**$ (19,555,976)**	**$ 557,903**
Cumulative employer contributions in excess of NPPBC	185,077,849	174,482,030
Net amount recognized in statement of financial position	**$ 165,521,873**	**$ 175,039,933**

Weighted-average assumptions used to determine benefit obligations as of September 30		
Effective discount rate	5.30%	4.98%
Average rate of compensation increase	N/A	N/A
	See Exhibit A	See Exhibit B
Components of net periodic benefit cost		
Service cost	$ 518,981	$ 434,446
Interest cost	14,501,221	15,560,929
Expected return on plan assets	(26,144,360)	(26,641,981)
Amortization of transition (asset)/obligation	0	0
Amortization of prior service (credit)/cost	(428,689)	(428,689)
Amortization of actuarial (gain)/loss	37,012	(2,266,499)
Net periodic benefit cost	**$ (11,515,835)**	**$ (13,341,794)**

Weighted-average assumptions used to determine net periodic postretirement benefit cost		
Effective discount rate for benefit obligation	4.98%	5.99%
Effective rate for interest on benefit obligation	4.69%	5.93%
Effective discount rate for service cost	5.21%	5.99%
Effective rate for interest on service cost	5.14%	6.01%
Expected long-term rate of return on plan assets	5.40%	6.00%
Average rate of compensation increase	N/A	N/A
Health care trend rates	See Exhibit B	See Exhibit C

	Fiscal year ending September 30, 2025	Fiscal year ending September 30, 2024
Expected cash flows		
Expected employer contributions for fiscal year ending September 30, 2026	$ 224,452	
Expected future benefit payments, net of retiree contributions and Medicare subsidy receipts, for fiscal year ending:		
September 30, 2026	$ 25,339,394	
September 30, 2027	25,981,651	
September 30, 2028	26,482,955	
September 30, 2029	26,767,306	
September 30, 2030	26,837,918	
Next five years	127,760,656	
Expected Medicare subsidy receipts for fiscal year ending:		
September 30, 2026	$ (1,559,756)	
September 30, 2027	(1,574,137)	
September 30, 2028	(1,576,905)	
September 30, 2029	(1,576,656)	
September 30, 2030	(1,568,152)	
Next five years	(7,535,970)	
Effect of one percentage point change in the assumed health care cost trend rates		
One percentage point increase		
Effect on total of service and interest cost components	$ 1,780,565	$ 1,676,000
Effect on postretirement benefit obligation	31,923,664	32,128,111
One percentage point decrease		
Effect on total of service and interest cost components	$ (1,437,586)	$ (1,408,162)
Effect on postretirement benefit obligation	(27,603,796)	(27,699,518)

	Fiscal year ending September 30, 2025	Fiscal year ending September 30, 2024
Cumulative employer contributions in excess of net periodic benefit cost		
Amount as of beginning of year	$ 174,482,030	$ 161,868,966
Net periodic benefit (cost)/income for year	11,515,835	13,341,794
Employer contributions made in fiscal year	593,848	478,925
Subsidy payments received	(1,513,864)	(1,207,655)
Amount as of end of year	**$ 185,077,849**	**$ 174,482,030**
Reconciliation of prior service cost/(credit)		
Amount at beginning of year	$ (685,899)	$ (1,114,588)
Amortization	428,689	428,689
Amount arising during year due to plan change	0	0
Amount at end of year	**$ (257,210)**	**$ (685,899)**
Reconciliation of net loss/(gain)		
Amount at beginning of year	$ 127,996	$ (18,440,076)
Amortization	(37,012)	2,266,499
Obligation loss/(gain) during year	17,071,740	54,441,980
Asset loss/(gain) during year	2,650,462	(38,140,407)
Amount at end of year	**$ 19,813,186**	**$ 127,996**

Section 4

Basis of valuation

In this section, the basis of the valuation is presented. The provisions of the plan and the participant census are the foundation of the valuation, since these are the present facts upon which the projection of benefit payments depends. The valuation is based on the premise that the plan will continue in existence, so that future events must also be considered. These future events are assumed to occur in accordance with the actuarial assumptions and methods described in this section.

Section 4.1 Plan participants

Section 4.2 Actuarial basis

Section 4.3 Summary of plan provisions

Section 4.4 Claim cost development and medical rate information

Section 4.1: Plan participants

Mercer has used and relied on participant data supplied by National Fuel Gas Company. National Fuel Gas Company is responsible for ensuring that the participant data provides an accurate description of all persons who are participants under the terms of the plan or otherwise entitled to benefits as of January 1, 2025 and that the data is sufficiently comprehensive and accurate for its intended purpose. If the data supplied is not sufficiently comprehensive and accurate for its intended purpose, the results of our calculations may differ significantly from the results that would be obtained with such data. Although Mercer has reviewed the suitability of the data for its intended use in accordance with Actuarial Standard of Practice No. 23, Mercer has not verified or audited any of the data or information provided.

Section 4.2: Actuarial basis

An actuarial valuation is only a snapshot of a plan's estimated financial condition at a particular point in time; it does not predict a plan's future financial condition or its ability to pay benefits in the future and does not provide any guarantee of future financial soundness of a plan. Over time, a plan's total cost will depend on a number of factors, including the amount of benefits the plan pays, the number of people paid benefits, the period of time over which benefits are paid, plan expenses, and the amount earned on any assets invested to pay benefits. These amounts and other variables are uncertain and unknowable at the valuation date.

Because modeling all aspects of a situation is not possible or practical, we may use summary information, estimates, or simplifications of calculations to facilitate the modeling of future events in an efficient and cost-effective manner. We may also exclude factors or data that, if used, would not, in our judgment, significantly affect our results. Use of such simplifying techniques does not, in our judgment, affect the reasonableness of valuation results for a plan.

Valuations do not affect the ultimate cost of a plan, only the timing of when benefit costs are recognized. Cost recognition occurs over time. If the costs recognized over a period of years are lower or higher than necessary, for whatever reason, normal and expected practice is to adjust future cost levels to recognize the entire cost of a plan over time.

A. Accounting methods

Actuarial cost method

Benefit obligations are estimated using the Projected Unit Credit method. The objective under this method is to expense each participant's benefits under the plan as they would accrue, taking into consideration the plan's benefit allocation formula. Thus, the estimated total benefit to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future service.

An individual's estimated accrued benefit for valuation purposes is the projected benefit at full eligibility date, or current age if later, multiplied by the ratio of service at the valuation date over service at full eligibility date. Service for this purpose is measured from date of hire. The portion of the present value which is attributed to the current year is the service cost. The portion of the present value attributed to prior periods is the accumulated postretirement benefit obligation (APBO) or accrued liability. The APBO can also be viewed as the accumulated value of past service costs. This amount includes the entire present value for actives who are eligible to retire and those who are already retired.

The plan's service cost is estimated by combining the individual service costs, and the plan's APBO is estimated by combining the individual benefit obligations.

Asset method

The market-related value of assets is equal to the market value.

Changes since prior valuation

None.

B. Accounting policies

Measurement date

September 30.

Amortization of prior service costs/credits
Prior service costs/credits that arise due to a plan change during a fiscal year are amortized on a straight-line basis over the average remaining service period to full eligibility of participants who are expected to receive a benefit and are active at the date of the plan amendment.

Amortization of gains/losses
New York Distribution: Gains/losses are amortized on a vintage-year basis over 10 years. This is the method prescribed by the New York Public Service Commission in their policy statement for rate reimbursement in New York and is acceptable under US GAAP since it results in more rapid amortization of gains/losses than the minimum imposed under the standards.

All entities other than New York Distribution: Gains/losses in excess of 10% of the greater of the APBO or market-related value of plan assets (determined solely with respect to those entities) are amortized on a straight-line basis over the average future working lifetime of the employees of those entities expected to receive benefits under the plan.

Changes since prior valuation
None.

C. Valuation procedures

Financial and claims data
We have used financial data, claims, and premiums supplied by the plan sponsor, without further audit. Customarily, this information would not be verified by a plan's actuary. We have reviewed the information for internal consistency and we have no reason to doubt its substantial accuracy.

Determination of benefit obligations
The benefit obligations are determined by discounting each year's cash flows using the corresponding rate from the Above Mean Mercer Yield Curve as of the measurement date.

Calculation of interest
Interest on the benefit obligations for purposes of determining the interest cost and service cost components of the net periodic postretirement benefit cost is calculated by applying interest to the present value of the expected payment at each payment date. For this purpose, interest is determined using the same spot rate used to determine the present value of the associated payment.

Effective discount rate
The effective discount rate is the single equivalent rate such that the present value of the plan's APBO cash flows using the single rate equals the present value of those cash flows using the corresponding spot rates along the Above Mean Mercer Yield Curve. The same process is applied to the plan's service cost cash flows to determine the effective discount rate associated with the service cost.

Effective rate for interest
The effective rate for interest on the benefit obligation is the single equivalent rate such that interest on the plan's APBO using the single rate equals the sum of the interest on each year's discounted cash flow determined using the corresponding spot rates along the Above Mean Mercer Yield Curve. The same process is applied to the plan's discounted service cost cash flows to determine the effective rate for interest on the service cost.

Projection of obligations

APBO and service cost cash flows are determined as of the census date reflecting disclosed assumption changes and then adjusted to the measurement date to reflect additional service accruals during the interim period and to exclude payments expected to be made prior to the measurement date. Differences between actual and expected benefit payments for the period between the census date and the measurement date are recognized proportionally in all future cash flows.

Changes since prior valuation

None.

D. Actuarial assumptions

To prepare an actuarial valuation, assumptions are used in a forward-looking financial and demographic model to present a single scenario from a wide range of possibilities. The future is uncertain and the plan's actual experience will differ from those assumptions. These differences may be significant or material because actuarial estimates can be very sensitive to the assumptions made and, in some cases, to the interaction between the assumptions.

Different assumptions or scenarios within the range of possibilities may also be reasonable and results based on alternative assumptions would be different. As a result of the uncertainty inherent in a forward-looking projection over a very long period of time, no one projection is uniquely "correct" and many alternative projections of the future could also be regarded as reasonable. Two different actuaries could, quite reasonably, arrive at different results based on the same data and different views of the future. A "sensitivity analysis" shows the degree to which results would be different if alternative assumptions are used for the actuarial estimates. At National Fuel Gas Company's request, Mercer is available to perform such an analysis.

Assumptions may change from one valuation to the next because of changes in requirements, plan experience, changes in expectations about the future, and other factors. A change in assumptions is not an indication that prior assumptions were unreasonable when made.

Economic assumptions

Effective discount rate for benefit obligation

- 5.99% per annum for determining the 2024 net periodic postretirement benefit cost.
- 4.98% per annum for determining the September 30, 2024 benefit obligation and the 2025 net periodic postretirement benefit cost.
- 5.30% per annum for determining the September 30, 2025 benefit obligation.

Effective rate for interest on the benefit obligation

- 5.93% per annum for determining the 2024 net periodic postretirement benefit cost.
- 4.69% per annum for determining the 2025 net periodic postretirement benefit cost.

Effective discount rate for service cost

- 5.99% per annum for determining the 2024 net periodic postretirement benefit cost.
- 5.21% per annum for determining the 2025 net periodic postretirement benefit cost.

Effective rate for interest on the service cost

- 6.01% per annum for determining the 2024 net periodic postretirement benefit cost.
- 5.14% per annum for determining the 2025 net periodic postretirement benefit cost.

Rationale: The effective rates are determined using Mercer's proprietary Above Mean Yield Curve, under which the plan's projected benefit payments are matched against a series of spot rates derived from a market basket of high-quality fixed income securities.

Expected long-term rate of return on assets

- 6.00% per annum for determining the 2024 net periodic postretirement benefit cost.
- 5.40% per annum for determining the 2025 net periodic postretirement benefit cost.

Rationale: To develop the expected rate of return on assets, the Company considered the current level of expected returns on risk-free investments (primarily government bonds), the historical level of the risk premium associated with the other asset classes in which the portfolio is invested, and the expectations for future returns of each asset class. The expected rate of return for each asset class was then weighted based on the asset allocation to develop the expected rate of return on assets for the plan.

Salary increases

Age	Rate
25	9.50%
30	8.50
35	6.50
40	6.00
45	5.50
50	5.00
55	4.50
60	4.00

Rationale: These rates have been used historically and have not produced significant gains or losses.

Demographic assumptions

Mortality

- Pri-2012 mortality tables (with no collar adjustment), with separate rates for males/females, healthy/disabled participants, and annuitants/non-annuitants, projected with generational improvement using scale MSS-2023 for determining the 2024 net periodic postretirement benefit cost.
- Pri-2012 mortality tables (with no collar adjustment), with separate rates for males/females, healthy/disabled participants, and annuitants/non-annuitants, projected with generational improvement using Scale MSS-2024 for determining the September 30, 2024 benefit obligation and the 2025 net periodic postretirement benefit cost.
- Pri-2012 mortality tables (with no collar adjustment), with separate rates for males/females, healthy/disabled participants, and annuitants/non-annuitants, projected with generational improvement using Scale MSS-2025 for determining the September 30, 2025 benefit obligation.

Rationale: Mortality is based on the Society of Actuaries' Pri-2012 tables. The rates based on the full data set are used because the plan's participants are a mix of blue-collar and white-collar individuals. Future mortality improvement is based on the 2025 Trustees Report of the Social Security Administration, as reflected in the Mercer-developed MSS-2025 improvement scale. The improvement rates implied by the report's mortality projections are based on an analysis of the specific factors that impact mortality improvement as well as potential long-term trends for those factors.

Termination rates

0.50% of the active population is assumed to terminate employment annually.

Retirement rates

Age	Rate
55 - 56	7%
57 - 59	10
60 - 61	25
62	75
63 - 64	50
65	100

Rationale: These rates have been used historically and have not produced significant gains or losses.

Disability incidence

1985 pension disability class 1 incidence rates.

Spouse assumptions

80% of active male participants and 60% of active female participants are assumed to be married, and a female is assumed to be three years younger than her spouse. Actual spousal data was used for participants in pay status if available.

Participation	**Medical and Drug coverage:** 100% of eligible retirees are assumed to elect coverage. 100% of retirees electing coverage who have spouses are assumed to elect spousal coverage. It is assumed that upon retiring, participants remain in the same medical plan category (PPO, traditional, or Independent Health). For participants who do not have coverage as active employees, it is assumed that they elect coverage under the traditional plan upon retirement. Upon reaching age 65, it is assumed that participants in the PPO plan elect a traditional plan, and that all others remain in the same plan category (traditional or Independent Health). Further, it is assumed that actives in medical grid numbers 7, 8, 11, and 12 will remain in those groups at retirement and, therefore, receive prescription drug coverage through the Medical Plan. For all other eligible actives, it is assumed that they will have prescription drug coverage under a 3-tier plan upon retirement. **Life Insurance coverage:** It is assumed that upon retiring, all employees who are eligible for Basic Life Insurance will be covered. Only those employees who elect Supplemental Life Insurance as active employees are assumed to elect Supplemental Life Insurance upon retirement. Note that National Fuel Gas Company does not subsidize any portion of the Supplemental Life Insurance with the exception of a small group of retirees hired prior to 1978.

Rationale: Assumed participation is based on recent plan experience and the options available to retirees.

Claims assumptions

Medical and prescription drug starting claim costs

The starting claim costs for National Fuel Gas Company's Independent Health Plan are based on the premium rates shown in Section 4.4 since that plan is community rated. Since all other plans are self-insured, the average per person gross costs of medical and prescription drug benefits, excluding expenses, were derived from claims data provided by National Fuel Gas Company. These starting claim costs are shown below. A description of the methodology used to develop these claim costs is contained in Section 4.4.

Annual age 65 per capita claim costs

	2024 Disclosure/ 2025 NPPBC	2025 Disclosure/ 2026 NPPBC
Prescription drug plans		
$0/$1 Plan and $0/$2 Plan	$4,484	$4,974
$5/$10 Plan	$4,191	$4,648
Tier Plans[7]	$3,366	$3,733
Rx for grids 7/8/11/12	$3,834	$4,253

Medical plans	Pre 65	Post 65	Pre 65	Post 65
PPO Plan	$8,629	$2,136	$8,496	$2,394
Traditional Plans[8]	$8,865	$2,136	$8,728	$2,394
Forever Blue	N/A	$1,580	N/A	$1,687
Independent Health	$7,992	$2,338	$8,639	$2,394

Rationale: The development of the average annual age 65 per capita claim costs is described in Section 4.4.

[7] Includes prescription drug plans with tier copayments of $12.50/$24/$40 for generic/brand/specialty.

[8] For participants in the medical plan "comprehensive with Rx" (medical grids 7, 8, 11, and 12), the drug portion of the benefit was valued separately using the claim costs shown for that plan in the prescription drug section, above.

Medicare reform

The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (the "Act") is reflected assuming that National Fuel Gas Company will continue to provide a post-65 prescription drug benefit to retirees that is at least actuarially equivalent to Medicare Part D and that National Fuel Gas Company will receive the federal subsidy for all retirees and their spouses.

The Act was recognized for the 2024 disclosure and 2025 net periodic postretirement benefit cost by assuming an annual savings of $548 at age 65, and for the 2025 disclosure by assuming an annual savings of $537 at age 65.

Rationale: The RDS assumption was developed based on actual claims and enrollment from the 2021, 2022 and 2023 RDS applications, trended forward to the valuation year, and adjusted for plan design changes and participation.

Medicare Part B premium

In addition to medical costs, National Fuel Gas Company pays the Medicare Part B premium for retirees and their spouses (except for post-12/31/2000 non-union and IBEW Local 2199 and 2199-J retirements) until the death of the retiree. The assumed Medicare Part B premiums are shown below.

	2024 Disclosure/ 2025 NPPBC	2025 Disclosure/ 2026 NPPBC
Monthly	$174.70	$185.00
Annual	$2,096.40	$2,220.00

Rationale: The 2025 Medicare Part B premium rate is the rate as announced by the Centers for Medicare & Medicaid Services.

Life insurance costs

Life insurance coverage is provided to eligible retirees as summarized in Section 4.3. Note that National Fuel Gas Company does not subsidize any portion of the Supplemental Life Insurance with the exception of a small group of retirees hired prior to 1978.

Administrative expenses

Expenses are assumed to be equal to the following, where percentages represent a percentage of the respective claim costs:

	2024 Disclosure/ 2025 NPPBC	2025 Disclosure/ 2026 NPPBC
Life insurance	10%	10%
Medical[9]	$993.41 per contract	$1,104.34 per contract
Drug	0% (Included in claim costs)	0% (Included in claim costs)

Administrative expenses on a per capita basis for the Medical Plan are expected to grow at 4% per year.

Life Insurance expenses are assumed to remain at 10% of claims.

Rationale: Assumed administrative expenses for the life insurance are based on the actuary's experience with similar plans. Assumed administrative expenses for the self-insured medical plans are based on administrative fees provided by National Fuel Gas. The premiums for insured coverage are assumed to include administrative fees.

Retiree contributions

See Section 4.4.

For non-grandfathered[10] participants, the contribution amounts shown in Section 4.4 are allocated to medical versus drug coverage as follows:

	Medical	Drug
Pre-65	61.2%	38.8%
Post-65	39.6%	60.4%

Assumed retiree contributions are based on per capita claims costs and the provisions of the plan.

Future increases in retiree contribution levels

For grandfathered participants, no increases in retiree contribution amounts are assumed.

For non-grandfathered participants, retiree contribution amounts are assumed to increase at assumed health care trend rates.

Rationale: This assumption is based on our understanding that future increases to healthcare costs for non-grandfathered participants will be passed on to the participants.

[9] For the 2024 disclosure/2025 NPPBC, this represents the weighted administrative expense assumption for the 2024 calendar year, based on $990.05 per non-executive contract and $2,505.84 per executive contract. For the 2025 disclosure/2026 NPPBC, this represents the weighted administrative expense assumption for the 2025 calendar year, based on $1,100.54 per non-executive contract and $2,769.72 per executive contract.

[10] Participants who are grandfathered, and therefore unaffected by the 2008 and 2009 plan changes, include those already retired at the plan change date for their respective employee group. All others are non-grandfathered.

Death benefits

Medicare Part B reimbursement benefits cease upon death of the retiree. Spouses are assumed to continue medical and prescription drug coverage for life, 3 years, or not at all (COBRA), depending on their eligibility as defined in Section 3.3. Spouses of post-12/31/2000 non-union and IBEW Local 2199 and 2199-J retirees continue to contribute the amount the retiree was contributing before death. For all others, the spousal death benefit coverage is offset by the widow rate reimbursement identified in Section 4.3. Widow rates are increased in the future for health care trend.

Rationale: This assumption has been used historically and has not produced significant gains or losses.

Aging

The Medical Aging Factors shown below apply to all medical plans offered. The Drug Aging Factors apply to all drug plans offered.

Attained age	Medical Aging Factor	Drug Aging Factor
55	0.680	0.780
60	0.820	0.899
65	1.000	1.000
70	1.130	1.077
75	1.245	1.097
80	1.330	1.097
85	1.370	1.097
90+	1.390	1.097

Rationale: The aging assumption was based on a review of health care costs by age sponsored by the Society of Actuaries titled ***Health Care Costs – From Birth to Death*** *and published in June 2013 as well as Mercer and vendor databases of prescription drug cost results by age.*

Health care trend

- Trend rates for determining the benefit obligation at September 30, 2025:

2048+	4.00	4.00	4.00	4.00	4.00

Rationale: Initial rates are based on market assessments and surveys and take into account actual historical experience, expected unit cost information, changes in utilization, plan design leveraging, cost shifting, and new technology. The assumed ultimate trend rate and grade-down period are based on a long term projection of Gross Domestic Product (GDP) per capita.

Changes reflected in the September 30, 2025 benefit obligation

- The effective discount rate increased from 4.98% per annum to 5.30% per annum.
- The mortality improvement projection scale was updated from Scale MSS-2024 to Scale MSS-2025.
- The starting per-capita claims cost, premiums, retiree contributions, and RDS assumptions were updated to better reflect anticipated experience, taking into account actual experience over the past year, actual rates provided, and actual claims and enrollment from the RDS applications.
- The healthcare cost trend rates were updated to reflect Mercer’s most up-to-date trend model.

Section 4.3: Summary of plan provisions

				Deductible				Coinsurance			Copayment					
Grid #	Class ID's	Active Retire	Medical Program	Hospital	Medical / Surgical	Major Medical (MM)	Combined	Hospital	Medical / Surgical	Major Medical	PCP	Specialist	ER	OOP Maximum (deduct. not included)	Lifetime Maximum	Prescription Drugs

Additional Plan Details:

Prescription Drug Plan

Retiree copayments in the Core Plan are $0/$1 (generic/brand).
Retiree copayments in the $5/$10 Plan are $5/$10 (generic/brand).
Retiree copayments in the 3-tier Plan are $12.50/$24/$40 (generic/brand/specialty).

Basic Life Insurance Plan

Retirement Reduction Schedule 1
(Pennsylvania - Union & Non-Union Hourly)

60 & under	$12,500
61	$11,500
62	$10,500
63	$9,500
64	$8,500
65-69	$7,500
70 & over	$5,000

Retirement Reduction Schedule 2
(New York - Union & Non-Union Hourly)

60 & under	$12,500
61	$11,500
62	$10,500
63	$9,500
64	$8,500
65 & over	$7,500

Section 4.4: Claims cost development and medical rate information

Claim cost development

The claim costs were developed using the aggregate claims experience, separately for pre-65 and post-65 retirees, for the 36-month period ending December 2024 (for the 2025 disclosure) and December 2023 (for the 2024 disclosure and 2025 NPPBC) adjusted for the relative plan value, trend, and demographics of each individual plan. The prescription drug claim cost was also adjusted to reflect historical drug rebate information provided by National Fuel Gas Company. The pre-65 retiree experience was given credibility of 69% and the post-65 retiree experience was given full credibility.

Note, the medical plans described under grids 7, 8, 11, and 12 include prescription drug coverage. For valuation purposes, the prescription drug portion of the cost of these plans was valued separately. Since the prescription drug claims for plans under these grids were unavailable, this claim cost was developed by applying a relative value factor determined using actuarial equivalent rate relationships to the $5/$10 copayment plan claim cost.

Summary of premium rates for community rated plans

	Monthly premiums	
	2025	2024
Under 65 Rates (Independent Health FlexFit)		
Single, with Caremark	per Rx plan	per Rx plan
Single, w/o Caremark	$635.76	$582.62
Family, with Caremark	per Rx plan	per Rx plan
Family, w/o Caremark	1,716.54	1,573.08
Over 65 Rates (Independent Health Encompass 65)		
Single over	$240.00	$233.00
Two person over	480.00	466.00
One under/one over	875.76	815.62
Family, 1/more over	1,956.54	1,806.08

Retiree healthcare plan rates as of 1/1/2025

Below is a summary of the monthly retiree healthcare contribution amounts for those who retire after the 2008/2009 plan changes. For such retirees, the rates are assumed to change with healthcare trend throughout retirement, as described in Section 4.2. The contribution amounts shown are for medical and prescription drug coverage. For valuation purposes, they are allocated between medical and drug as described in Section 4.2.

Summary of historical retiree healthcare plan rates

Below is a summary of the monthly retiree healthcare contribution amounts for those who retired prior to the 2008/2009 plan changes. For such retirees there is no additional contribution for spousal/dependent coverage and the contribution amount determined at retirement does not change with healthcare trend or Medicare status. Further, the whole contribution is allocated to medical coverage.

Blue Cross/Blue Shield Plan	Monthly Contribution	Effective Date
1. Participants who retired prior to 1/1/1991	$0.00	N/A
2. Participants who retired 1/1/1991 - 2/29/2008:		
a) Comprehensive 80/20 Plan[1]	$0.00	N/A
b) Locals 2154, 2199, and 2199J IBEW (NY)	$21.66	2/17/1991
Hired on/before 4/13/1996	$26.00	2/16/1992
	$30.33	2/16/1993
	$34.66	2/13/1994
	$39.00	2/11/1996
	$39.00	thru 2/14/2008
c) Local 2154P (formerly Local 2279 IBEW) (PA)[2]	$21.66	4/13/1991
Hired on/before 4/13/1996, retired prior to 5/1/2009 and selected Indemnity Plan (Note: retirees that selected the PPO Plan have no monthly contributions).	$22.53	4/13/1992
	$28.16	4/13/1993
	$28.16	4/13/1994
	$28.16	4/13/1995
	$34.58	6/1/1996
	$44.29	6/1/1997
	$50.40	7/1/1998
	$63.14	4/13/2002
	$70.46	4/13/2003
	$68.00	1/1/2004
	$71.00	4/13/2005
	$88.00	4/10/2006
	$113.00	1/1/2007
	$117.05	1/1/2008
	$117.05	thru 5/1/2009
d) NCFO/SEIU, Chapter 22	$11.91	5/1/1991
Hired on/before 5/1/1996	$21.66	5/1/1992
	$28.16	5/1/1993
	$34.66	5/1/1994
	$39.00	5/1/1995
	$43.33	5/1/1999
	$47.66	5/1/2000
	$52.00	5/1/2001
	$52.00	thru 5/1/2009

[1] Amount applies to union and non-union retirees in the comprehensive plan.

[2] If the company cost increases over 5%, the percentage above 5% will be shared jointly 50/50 between the employee and the Company.

Summary of historical retiree healthcare plan rates (continued)

Blue Cross/Blue Shield Plan		Monthly Contribution	Effective Date

		$120.00	thru 1/1/2008

Summary of historical retiree healthcare plan rates (continued)

Retirees under age 65 who participate in a community rated plan pay the contribution amount identified earlier in this section– based on the group they are in – plus an active differential. Retirees who are age 65 and over and participate in a community rated plan pay only the amount identified earlier in this section.

The monthly active differentials for 1991 through 2025 are as follows:

Year of Retirement	Independent Health	
	Single	Family
1991	$4.48	$9.36
1992	$5.40	$11.76
1993	$5.01	$11.05
1994	$0.00	$0.00
1995	$2.40	$2.88
1996	$11.12	$25.60
1997	$0.00	$0.00
1998	$0.00	$0.00
1999	$0.00	$29.92
2000	$0.00	$0.00
2001	$3.92	$45.64
2002	$0.00	$41.40
2003 - 2025	$0.00	$0.00

Surviving spouse contribution rates

If a participant retires on or after 1/1/2001 and is either 1) management, 2) non-union hourly, 3) union division 2199, or 4) union division 2199-J, then the surviving spouse contribution upon that retiree's death is the same amount that the retiree was contributing. For all other retirees, the surviving spouse contribution is as shown in this section.

Vintage Total	(1,373,921)							(1,373,921)
d. Total amortizations	(1,558,233)	(49,131)	(66,795)	0	0	0	0	(1,674,159)
5. Net Postretirement Benefit Cost / (Income) = 1. + 2.e. - 3.f. + 4.d.	**(6,250,442)**	**(1,913,015)**	**(1,258,531)**	**0**	**0**	**0**	**0**	**(9,421,988)**

[1] The Interest Cost is determined using a spot-rate approach by applying the specific rates along the Above Mean Mercer Yield Curve to the relevant cash flows. The calculation presented here shows the application of the resulting effective rate for interest applied to the APBO (adjusted for expected benefit payments), which yields the same result. Although the effective rate for interest on the APBO is shown to two decimal places, the actual rate is unrounded.

A business of Marsh McLennan

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-J-Payroll, Benefits, and Retiree Costs
Delivered on January 28, 2026

III-J.8

Request:

List and explain all non-recurring abnormal or extraordinary expenses related to employee costs incurred in the HTY which will not be present in the FTY or the FPFTY. List and explain all non-recurring abnormal or extraordinary expenses related to employee costs expected to be incurred in the FTY or FPFTY which were not present in the HTY.

Response:

There are no expenses of this nature.

Prepared by or under the supervision of: Michael P Weidner

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-J-Payroll, Benefits, and Retiree Costs
Delivered on January 28, 2026

III-J.9

Request:

List and explain expenses related to employee costs included in the HTY, the FTY and the FPFTY which do not occur yearly but are of a nature that they do occur within an extended period of years.

Response:

There are no expenses of this nature.

Prepared by or under the supervision of: Michael P Weidner

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-K-Depreciation
Delivered on January 28, 2026

III-K.1

Request:

Provide a description of the depreciation methods used to calculate annual depreciation amounts and depreciation reserves, together with a discussion of the factors which were considered in arriving at estimates of service life and dispersion by account. Provide a comprehensive statement of any changes made in the method of depreciation since the immediately preceding base rate case

Response:

The depreciation methods utilized in calculating annual and accrued depreciation are discussed in Exhibit No. C-Future in the section titled, "Calculation of Annual and Accrued Depreciation" beginning on page IV-2. The factors considered in arriving at estimates of service life and dispersion by account, begin in the section on page III-2 and continuing through page III-7.

The depreciation methods and procedures used in this filing are the same as those used in previous filings. Explanations of the depreciation methods and procedures are presented in Exhibit No. C-Future.

The estimated survivor curves used in this filing have not changed from those used in the most recent service life study filed in May 2023 and annual depreciation report filed in March 2025.

Field trips and facilities visited over the years for National Fuel Gas Distribution Corporation are presented in Exhibit No. C-Future, in the section "Field Trips", beginning on page III-2.

Responses to Section 53.53 - III-K-Depreciation
Delivered on January 28, 2026

III-K.2

Request:

Provide a description of the amortization methods used to calculate annual amortization amounts and amortization reserves FOR THOSE PROPERTY ACCOUNTS FOR WHICH AN AMORTIZATION METHOD IS EMPLOYED. Provide a comprehensive statement of any changes made in the method of amortization since the immediately preceding base rate case.

Response:

Please see pages II-7 through II-61 of Exhibit C-Historic for the surviving original cost as of September 30, 2025 by vintage by account with the applicable book reserve, future accruals and annual accruals.

Prepared by or under the supervision of: John J. Spanos

Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-K-Depreciation
Delivered on January 28, 2026

III-K.3

Request:

Provide an exhibit and charts depicting the original and estimated survivor curves and a table presenting the original life table plotted on the chart for each account where the retirement rate method of analysis is used. THE ORIGINAL SURVIVOR CURVE IS THE SURVIVOR CURVE DRAWN THROUGH THE POINTS CALCULATED FROM THE ORIGINAL DATA WITHOUT ADJUSTMENT. WHERE AN ORIGINAL SURVIVOR CURVE ENDS AT A PERCENT SURVIVING THAT IS GREATER THAN ZERO, OR WHERE IT IS DESIRABLE TO ELIMINATE IRREGULARITIES, THE ORIGINAL SURVIVOR CURVE MAY BE SMOOTHED USING AN ADJUSTED, OR ESTIMATED, SURVIVOR CURVE. DIFFERENT ADJUSTED SURVIVOR CURVES MAY BE EVALUATED TO DECIDE WHICH CURVE APPEARS TO BE THE BEST FIT.

Response:

The service life statistics which sets forth smooth survivor curves and original life tables by account are set forth in the section beginning on page VI-1 of Exhibit No. C-Future. These service life statistics set forth the last service life study performed consistent with Pennsylvania regulations.

Delivered on January 28, 2026

III-K.4

Request:

Provide the surviving original cost at the HTY year-end by vintage by account and include applicable depreciation reserves and accruals. Provide these calculations for plant in service as well as other categories of plant, including contributions in aid of construction and customers' advances for construction, and anticipated retirements associated with any CWIP claims if applicable.

Response:

Please see pages II-7 through II-61 of Exhibit C-Historic for the surviving original cost as of September 30, 2025 by vintage by account with the applicable book reserve, future accruals and annual accruals.

Prepared by or under the supervision of: John J. Spanos

National Fuel Gas Distribution Corporation

2026 Base Rate Case
Responses to Section 53.53 - III-K-Depreciation
Delivered on January 28, 2026

III-K.5

Request:

Provide a comparison of the calculated depreciation reserve used for ratemaking purposes compared to the book reserve by account at the end of the HTY, the FTY and the FPFTY.

Response:

A comparison of the calculated accrued depreciation (calculated depreciation reserve) vs. book reserve by account as of September 30, 2025, is listed on Pages 2 and 3 of this response.

See Pages 4 through 7 for the comparison of the calculated accrued depreciation (calculated depreciation reserve) vs. book reserve as of September 30, 2026 and as of October 31, 2027.

2026 Base Rate Case
Responses to Section 53.53 - III-K-Depreciation
Delivered on January 28, 2026

III-K.6

Request:

Provide a schedule by account and depreciable group showing the survivor curve and annual accrual rate estimated to be appropriate and changes in annual accrual rates by account or by depreciable group for all of the following:

III.K.6.a For the purposes of this current filing.
III.K.6.b For the purposes of the immediately preceding rate increase filing prior to the current proceeding.

Response:

a. Please refer to pages I-3 and I-4 in Exhibit No. C-Historic; pages VI-3 throughVI-7 in Exhibit No. C-Future; and pages I-3 and I-4 in Exhibit No. C-Fully Projected.

b. Please refer to the attached, Pages 2 through 7 for the most recent prior filing of all three test years.

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-K-Depreciation
Delivered on January 28, 2026

III-K.7

Request:

Provide a comprehensive statement of any changes made in method of depreciation and in the selection of average service lives

Response:

Please see the response to III.K.1 and III.K.6

Prepared by or under the supervision of: John J. Spanos

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-K-Depreciation
Delivered on January 28, 2026

III-K.8

Request:

Provide a table showing the cumulative depreciated original cost by year of installation for public utility plant by USOA in service at the end of the HTY, the FTY and the FPFTY (depreciable plant only) as claimed in the measures of value. Formulate the table with all of the following:

III.K.8.a Column 1: Year installed.
III.K.8.b Column 2: Original cost.
III.K.8.c Column 3: Accrued depreciation.
III.K.8.d Column 4: Depreciated original cost (which is original cost minus accrued depreciation); total this column.
III.K.8.e Column 5: Cumulative depreciated original cost, increased year by year.
III.K.8.f Column 6: Cumulative depreciated original cost, year by year, divided by the total of column 4, shown as a percent.

Response:

Please reference pages II-3 through II-5 of National Fuel's Historic Test Year depreciation study included in Exhibit No. C-Historic.

Please refer to pages VII-3 through VII-5 of National Fuel's Future Test Year depreciation study included in Exhibit No. C-Future.

Please refer to pages II-3 through II-5 of National Fuel's Fully Projected Future Test Year depreciation study included in Exhibit No. C-Fully Projected.

Prepared by or under the supervision of: John J. Spanos

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-K-Depreciation
Delivered on January 28, 2026

III-K.9

Request:

Provide an exhibit showing, by account, the gross salvage, cost of removal, and net salvage for the HTY and the 4 years immediately preceding the HTY.

Response:

Please refer to pages III-2 and III-3 of National Fuel's Historic Test Year depreciation study included in Exhibit No. C-Historic.

Please refer to pages VIII-2 and VIII-3 of National Fuel's Future Test Year depreciation study included in Exhibit No. C-Future.

Please refer to pages III-2 and III-3 of National Fuel's Fully Projected Future Test Year depreciation study included in Exhibit No. C-Fully Projected.

Prepared by or under the supervision of: John J. Spanos

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-L-Taxes
Delivered on January 28, 2026

III-L.1

Request:

Provide a copy of the Federal Tax Returns and State Tax Returns and amended returns, including supporting schedules, for the most recent 3 tax years for the public utility.

Response:

Please refer to Exhibit SDR-RR-55 for the CONFIDENTIAL Federal Tax Return excerpts for the most recent three tax years.

Please refer to Exhibit III.L.3 for the State Tax Returns filed for the most recent three tax years.

III-L.10

Request:

To account for the difference between tax depreciation and ratemaking depreciation include all of the following:

III.L.10.a Provide detailed computations showing the deferred income taxes derived by using accelerated tax depreciation applicable to post-1969 public utility property for both increasing and non-increasing productive capacity, and accelerated depreciation rates (ADR) on property, separating between Federal and State and rate used. Justify if based on the HTY.

III.L.10.b State whether tax depreciation is based on all rate base items claimed as of the end of the FTY, and whether it is the annual tax depreciation at the end of the FTY.

III.L.10.c Reconcile any difference between the deferred tax balance as shown as a reduction to measures of value (rate base) and the deferred tax balance as shown on the balance sheet.

III.L.10.d Make appropriate adjustment and projections for the FPFTY.

Response:

a. Please refer to Schedules D-11 in Exhibit A (Historic), Exhibit A (Future), and Exhibit A (Fully Projected) for the computation of federal and state deferred income taxes.

b. There is no difference between tax depreciation and ratemaking depreciation. Tax depreciation is based on all rate base items claimed as of the end of the FTY. The tax depreciation presented reflects the annual tax depreciation applicable at the end of the FTY.

c. The accumulated deferred income tax balance ("ADIT") as shown on the balance sheet represents the net tax effects of the timing differences between book depreciation and tax depreciation of plant assets that are placed in service. The tax basis of the plant assets is based on book basis, adjusted by tax repairs, Contributions in Aid of Construction ("CIAC") and Uniform Capitalization Rules under IRC § 263A ("UNICAP"). The ADIT also includes Average Rate of Assumption Method ("ARAM") amortization related to the excess ADIT from the Tax Cuts and Jobs Act ("TCJA ").

The ADIT balance used as a reduction to rate base includes projected plant activities for the FPFTY. Also, the ADIT balance is prorated according to the normalization rules under Treasury Regulation 1.167(l)-1(h)(6)(ii).

d. Please refer to Schedules D-11 in Exhibit A (Historic), Exhibit A (Future) and Exhibit A (Fully Projected) for the projections for the FPFTY.

III-L.12

Request:

Regarding the Tax Cuts and Jobs Act of 2017 (TCJA) (Pub.L. No. 115-97) which became effective January 1, 2018, provide all of the following:

III.L.12.a Explanation of the method used to return excess accumulated deferred income tax (ADIT) to ratepayers as a result of the TCJA and the resulting reduced Federal income tax rate.

III.L.12.b Verification that the remaining excess ADIT balance is being subtracted from rate base in the FPFTY claim.

III.L.12.c Breakdown between ADIT and excess ADIT (broken down by protected and unprotected) and explain how many years remain on the amortization.

III.L.12.d Amount of excess ADIT being flowed back to ratepayers in the HTY, the FTY and the FPFTY, indicating where this is accomplished in the base rate case filing schedules.

Response:

a. The protected excess ADIT is being amortized under the tax normalization requirements per IRC Section 168(i)(9). The amortization is calculated using the Average Rate of Assumption Method ('ARAM"). The Company utilizes the PowerTax software to calculate ARAM and maintain the ADIT balance. The deficient unprotected ADIT balance is amortized over a ten-year period from 2018 through 2027 on a straight-line basis. The result is annual amortization of approximately $1.0 million. The treatment of protected excess ADIT and deficient unprotected ADIT balances were previously documented and explained in Dockets M-2018-2641242 and R-2018-3000527. This was also discussed in the tax testimony of Case-R-2022-3035730.

b. The remaining unamortized excess ADIT balance is included in the total ADIT balance, and is subtracted from the rate base in the FPFTY claim. It will continue to reduce the rate base until it is fully returned to ratepayers.

c. The total ADIT balance in HTY is $(76,126,283), which included $(22,887,501) remaining excess protected ADIT and $(53,238,782) of ADIT. The remaining deficient unprotected ADIT balance of $2,063,866 is not included in the total ADIT balance that is included in the rate base.

d. Please refer to Exhibit EF-1 in Exhibit A (Historic), Exhibit A (Future), and Exhibit A (Fully Projected) for the amortization of excess protected ADIT being flowed back to ratepayers.

III-L.16

Request:

State the public utility's policy and practice on capitalization of repairs maintenance. If the public utility has opted out of Treasury Regulations 26 CFR 1.162—1.263, submit a depreciation/amortization schedule to reflect depreciation as taken over the useful life of the asset(s).

Response:

The Company treats certain expenditures that are capitalized for book purposes as deductible for tax repair purposes. The Company has not opted out of Treasury Regulations 26 CFR 1.162-1.263. For linear property, the Company follows the guidance detailed in Revenue Procedure 2023-15. For non-linear property, the Company deducts the costs of repairs incurred in connection with the repair and maintenance of their network assets pursuant to Internal Revenue Code Section 162.

In 2009, the Company filed an application for change in method of accounting with the IRS National Office to change its accounting method to treat certain expenditures that were capitalized for book purposes as deductible repairs for tax purposes. The IRS National Office approved the request, subject to review by local IRS examiners. This application was for both linear and non-linear property. As discussed in Case R-2022-3035730 Statement No. 12, the IRS neither accepted nor rejected the position taken in the tax returns related to the proper method of accounting for expenditures related to natural gas transmission and distribution property due to lack of guidance at the time. On April 14, 2023, the IRS released Revenue Procedure 2023-15, providing a "natural gas transmission and distribution property safe harbor method of accounting" ("NGSH Method") that taxpayers may use to determine whether expenses to repair, maintain, replace, or improve natural gas transmission and distribution property must be capitalized or be allowable as deductions for repairs. The revenue procedure is effective for taxable years ending after May 1, 2023. Adopting the NGSH Method requires a change in accounting method, and the new guidance provides detailed implementation procedures.

For the Company's fiscal year 2023 tax return, an application for change in method of accounting was filed to adopt Revenue Procedure 2023-15 for linear property only. The fiscal year 2023 application for change in accounting method and corresponding section 481(a) adjustment were reviewed and accepted by the IRS. In conformity with the Revenue Procedure 2023-15, the Company notified the Pennsylvania Public Utility Commission in August 2024 of the change in the method of accounting and provided the related IRS Form 3115 at that time. The Company has since followed Revenue Procedure 2023-15 in determining linear property tax repairs.

III-L.17

Request:

Submit detailed calculations OF THE AMORTIZATION OF ANY ADJUSTMENT MADE BY THE PUBLIC UTILITY UNDER INTERNAL REVENUE CODE SECTION 481(a) DUE TO A CHANGE IN ACCOUNTING METHOD TO REFLECT EXPENDITURES THAT ARE CAPITALIZED PER BOOKS AND TREATED AS DEDUCTIBLE REPAIR EXPENSES FOR FEDERAL INCOME TAX PURPOSES. Submit schedules for each accounting area if the public utility has more than one accounting area.

Response:

The Company made two Internal Revenue Code Section 481(a) adjustments for expenditures that are capitalized per books and treated as deductible repair expenses for federal income tax purposes. The first Section 481(a) adjustment was made for fiscal year 2009. The second Section 481(a) adjustment was made for fiscal year 2023. Amortization was not taken for either Section 481(a) adjustments. Both Section 481(a) adjustments made by the Company were negative and limited to an adjustment period of one year per the Internal Revenue Service Instructions for Form 3115, line 25.

III-L.21

Request:

Explain whether the public utility MADE AN ACCOUNTING METHOD CHANGE TO TREAT CERTAIN EXPENDITURES THAT ARE CAPITALIZED PER BOOKS AS DEDUCTIBLE REPAIR EXPENSES AND, IF SO, THE FIRST TAXABLE YEAR TO WHICH SUCH CHANGE APPLIED. IDENTIFY THE AMOUNTS OF PER BOOK CAPITAL EXPENDITURES THAT ARE BEING DEDUCTED AS REPAIR EXPENSES IN CALCULATING TAX EXPENSE INCLUDED IN REVENUE REQUIREMENT FOR THE HTY AND, AS APPLICABLE, THE FTY AND THE FPFTY.

Response:

The Company has made two accounting method changes to treat certain expenditures that are capitalized per books as deductible repair expenses. The first accounting method change was made for fiscal year 2009. The second accounting method change was made for fiscal year 2023 to adopt Revenue Procedure 2023-15. See III.L.16 for more information.

The amounts of per book capital expenditures that are being deducted as repair expenses are as follows:

- HTY: $27,430,000
- FTY: $34,340,000
- FPFTY: $37,685,000

Prepared by or under the supervision of: Erica Forcucci

Delivered on January 28, 2026

III-L.22

Request:

Show any income tax loss/gain carryovers from previous years that may affect the HTY income taxes, the FTY income taxes or the FPFTY Income Taxes. Show loss or gain carryovers by years of origin and amounts remaining by years at the end of the HTY.

Response:

The Company does not have any income tax loss/gain carryovers from previous years that may affect test year income taxes or future year income taxes.

For ratemaking purposes, income tax expense is calculated using the standalone methodology required by the PAPUC. Under this approach, the Company's taxable income excludes certain book to tax differences (Schedule M adjustments). Although the Company's separate Pennsylvania tax return reflects a net operating loss (NOL) due to Schedule M adjustments, the ratemaking calculation results in taxable income for the Historic Test Year (HTY), Future Test Year (FTY), and Fully Projected Future Test Year (FPFTY). While the Company's actual tax filings may include NOL carryforwards, these do not impact the ratemaking calculation.

Accordingly, there are no NOL carryovers applicable to the ratemaking income tax computation for HTY, FTY, or FPFTY. No loss or gain carryovers by year of origin or remaining amounts exist at the end of the HTY for ratemaking purposes.

III-L.23

Request:

STATE WHETHER THE INTEREST COMPONENT OF AFUDC IS CALCULATED ON A PRE-TAX BASIS (I.E., WITHOUT REFLECTING TAX SAVINGS FOR INTEREST DEDUCTIBILITY) OR ON AN AFTER-TAX BASIS (I.E., BY REDUCING THE AFUDC INTEREST RATE TO REFLECT THE TAX SAVINGS FOR INTEREST DEDUCTIBILITY). IF THE FORMER, STATE HOW THE TAX SAVING IS RECOGNIZED, IF AT ALL, IN ESTABLISHING THE BASE-RATE REVENUE REQUIREMENT IN THE FOLLOWING:

III.L.23.a Amount of construction claimed in this tax savings reduction. Explain the basis for this amount.
III.L.23.b MANNER in which the debt portion of this construction is determined for purposes of the deferral calculations.
III.L.23.c Interest rate used to calculate interest on this construction debt portion and the manner in which it is derived.
III.L.23.d Details of calculation to determine tax savings reduction. State whether state taxes are increased to reflect the construction interest elimination.

Response:

The interest component of AFUDC is calculated on a pre-tax basis by NFGDC.

a. The amount of construction claimed is $56,242,685. This is calculated by determining the 13-month average balance of: Construction Work in Process (CWIP), less Construction Completed Not Capitalized (CCNC) less any quarterly accruals recorded in the General Ledger (these are not made on a project level and AFUDC is applied at the project level, thus accruals are not reflected at the project level). However, since the calculated short-term debt balance is higher than the calculated construction balance for the year, the construction balance is set to equal the short-term debt balance and the assumption is that the construction would be totally funded by short-term debt.

b. The manner in which the debt portion of this construction is determined for purposes of the deferral calculations is:
   – Not Applicable. There are no tax deferrals as a result of this calculation because there is no book to tax difference.

NATIONAL FUEL GAS DISTRIBUTION CORPORATION

ACCRUED TAXES AND BASIS FOR ACCRUALS
TWELVE MONTHS ENDED SEPTEMBER 30, 2025

Taxes Accrued	Pennsylvania Rate Jurisdiction	Basis for Accrual of Tax	Amount of Tax Accrued Monthly
Taxes Other than Income			
Federal Insurance Contribution Act	1,952,468	FICA includes a 6.2% Social Security tax and 1.45% Medicare tax on gross earnings. The earnings base subject to tax is adjusted annually. Taxes are accrued at a rate of 7.65% of these wages. The monthly accrual is based on payroll data for the period.	Accrual is computed monthly by applying the tax rate to taxable earnings.
Federal Unemployment Compensation	10,732	Tax is based on the first $7,000 of wages paid to an employee. The monthly accrual is based on payroll data for the period.	Accrual is computed monthly by applying the tax rate to taxable earnings.
State Unemployment Compensation	98,722	State Unemployment taxes are based on rates set by the state and applied to gross earnings. The earnings base subject to tax is adjusted annually by the state. Taxes are accrued at various rates depending upon experience. The monthly accrual is based on payroll data for the period.	Accrual is computed monthly by applying the tax rate to taxable earnings.
Utility Realty Tax	112,501	Tax is based on the market value of public utility land, building, and other structures. The monthly accrual is based on an estimate of the final tax liability that the Company will incur	Monthly accrual is one twelfth of total estimated tax.
Property Tax	83,601	Tax is based on the assessed valuation of property owned by the Company in various municipalities where the Company operates. The tax rate varies with each locale.	Monthly accrual is one twelfth of total estimated tax.
Income Taxes			
Federal Income Tax	2,902,138	Tax is based on the taxable net income as defined and reported to the Internal Revenue Service. The tax rate is 21% of taxable income. The monthly accrual is based on the taxable income achieved from our level of operations for that month.	Accrual is computed monthly by applying the rate to taxable income for the month.
State Corporate Net Income Tax	-	Tax is based on the taxable net income as defined by the Internal Revenue Service before the deduction for the Pennsylvania corporate net income tax. The tax rate is 8.49% of taxable income. The monthly accrual is based on the taxable income achieved from our level of operations for that month.	Accrual is computed monthly by applying the rate to taxable income for the month.

Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-L-Taxes
Delivered on January 28, 2026

III-L.25

Request:

For the HTY as recorded on the HTY's operating statement, supply all of the following:

III.L.25.a Amount of Federal income taxes actually paid.
III.L.25.b Amount of the Federal income tax normalizing charge to tax expense due to excess of accelerated tax depreciation over book depreciation.
III.L.25.c Normalizing tax charge to Federal income taxes for the 10% Job Development Credit during the test year.
III.L.25.d Amount of the credit of Federal income taxes due to the amortization or normalizing yearly debit to the reserve for the 10% Job Development Credit.
III.L.25.e Amount of the credit to Federal income taxes for the normalizing of any 3% Investment Tax Credit Reserve that may remain on the public utility's books.

Response:

a & b. Refer to NFGDC Exhibit A, Schedule D-11 for the Historic test year.

c. None.

d. None.

e. None.

2026 Base Rate Case
Responses to Section 53.53 - III-M-Rate Structure, COSS, Bill Freq, and Special Contracts
Delivered on January 28, 2026

III-M.1

Request:

Rate Structure:

III.M.1.a Provide copies of THE present TARIFF OR TARIFFS and THE proposed TARIFF OR tariffs OR TARIFF SUPPLEMENT OR TARIFF SUPPLEMENTS.

III.M.1.b Provide a redlined document showing the changes [to a tariff] between the present tariff OR TARIFFS and the proposed tariff OR TARIFFS OR TARIFF SUPPLEMENT OR TARIFF SUPPLEMENTS.

III.M.1.c "Provide a schedule SHOWING, FOR each tariffed rate, all of the following information for the FPFTY:

i. Rate schedule designation.

ii. At present rates each of the following:

(a) Customers served as of end of FPFTY.

(b) Annual sales per billing determinant.

(c) Base rate revenues ANNUALIZED AT THE RATES IN EFFECT AS OF THE END OF the FPFTY.

(d) Tax surcharge revenues.

(e) Revenues received from other clauses or riders separately accounted for.

(f) Total of all revenues for FPFTY.

iii. At proposed rates, each of the following:

(a) Estimated number of customers whose charges for service will be increased or decreased as a result of this filing.

(b) The increase or decrease in base rate revenues and THE RESULTING percentage change.

(c) ANNUALIZED TAX SURCHARGE REVENUES UNDER PRESENT RATES AND AMOUNTS ROLLED-INTO BASE RATES.

(d) Revenues received from other clauses or riders separately accounted for.

(e) The increase or decrease in total of all revenues shown in annual dollar amount change and percentage change.

iv. PROVIDE A SUMMARY OF TOTAL revenue THAT SHOWS UTILITY REVENUE FROM ALL SOURCES, INCLUDING UTILITY OPERATING REVENUE (SEPARATELY FOR SALES AND OTHER OPERATING REVENUE), REVENUE FROM NON-JURISDICTIONAL SALES, AND NON-UTILITY REVENUE.

v. Provide the grand total revenue requirement showing both total sales and

revenues, as adjusted, and the various increases and decreases in rates, including percentage effects, at present and proposed rates.

Response:

a. Please see National Fuel Exhibit F.

b. Please see National Fuel Exhibit F.

c. (i) Please see Exhibits CTM-1-4 and CTM-2-4 for FPFTY rate schedule.

(ii) Please see testimony and exhibits of Company witness Courtney T. Mann, statement No. 14. The information requested in subparts (a) through (f) is summarized in Exhibit CTM-1.

(iii) Please see the testimony and exhibits of Company witness Courtney T. Mann, Statement No. 14. The information requested in subparts (a) through (e) is summarized in Exhibit CTM-2 and Exhibit E.

(iv) Not applicable.

(v) Please see Exhibit E – Proof of Revenue.

III-M.2

Request:

Cost of Service Allocation Study.

III.M.2.a	PROVIDE A COST OF SERVICE ALLOCATION STUDY ALLOCATING THE RATE BASE AND CLAIMED TOTAL COST OF SERVICE, OR REVENUE REQUIREMENT, TO EACH PROPOSED TARIFF RATE SCHEDULE. RATE SCHEDULES MAY BE COMBINED INTO CUSTOMER CLASSES FOR THIS PURPOSE. PROVIDE A STATEMENT DESCRIBING WHICH RATE SCHEDULES WERE COMBINED AND THE SUPPORTING EXPLANATIONS.
III.M.2.b	PROVIDE A COMPARATIVE SCHEDULE SHOWING THE REVENUES, FULLY ALLOCATED COSTS, AND RATE OF RETURN FOR EACH CUSTOMER CLASS, AND SERVICE AREA, IF APPLICABLE, AT BOTH PRESENT RATES AND PROPOSED RATES. IF THE STUDY CONSIDERS REVENUE SOURCES OTHER THAN BASE RATE REVENUES, PROVIDE AN EXPLANATION OF OTHER REVENUE SOURCES INCLUDED AND REASONS THEREFOR.
III.M.2.c	Provide a description of the complete methodologies used in the cost of service allocation study.
III.M.2.d	PROVIDE A STATEMENT ALONG WITH THE NECESSARY DATA SHOWING HOW THE PUBLIC UTILITY'S PROPOSED ASSIGNMENT OF THE OVERALL RATE CHANGE AMONG CUSTOMER CLASSES IS CONSISTENT WITH THE RESULTS OF THE COST OF SERVICE ALLOCATION STUDY AND OTHER ESTABLISHED REGULATORY CRITERIA.
III.M.2.e	Provide a statement along with the necessary data showing how the rate structure is JUST AND REASONABLE to all customer classes.
III.M.2.f	Provide a complete description and back-up calculations for each allocation factor. Provide a description of the allocation method used, such as, peak responsibility, average and excess, or any other method.
III.M.2.g	Provide a schedule of the allocated revenue requirement by customer class, and service area, if applicable, at both present rates and proposed rates.
III.M.2.h	Indicate if the allocation method used for the current rate case is consistent with the ALLOCATION METHOD USED IN THE immediately preceding base rate case. Explain the impact of any changes.
III.M.2.i	Provide a detailed cost analysis supporting the customer charges, showing all direct and indirect costs included.
III.M.2.j	Supply the average day, the maximum day and the maximum hour deliveries to the system, adjusted for storage, for the HTY and the 2 years immediately preceding the HTY.
III.M.2.k	Provide workpapers, analyses, comparative data or other documentation supporting the estimated maximum day and peak hour demands by customer class for the HTY, the FTY and the FPFTY.

2026 Base Rate Case
Responses to Section 53.53 - III-M-Rate Structure, COSS, Bill Freq, and Special Contracts
Delivered on January 28, 2026

III.M.2.l PROVIDE THE FOLLOWING:
(2) FOR NATURAL GAS PUBLIC UTILITIES: EXPLAIN THE METHODOLOGY USED TO IDENTIFY TRANSMISSION MAINS FROM DISTRIBUTION MAINS."

III.M.2.m Provide a detailed explanation of how storage is used to meet base maximum day and maximum hour demands if applicable.

Response:

Please refer to Exhibit D and the Direct Testimony of John D. Taylor, National Fuel Gas Statement No. 19.

The response to III.M.2.j is attached.

Prepared by or under the supervision of: John D. Taylor

National Fuel Gas Distribution Corporation

Question: III.M.2.j - Supply the average day, the maximum day and the maximum hour deliveries to the system, adjusted for storage, for the HTY and the 2 years immediately preceding the HTY.

Response: Below is the Average and Max Day deliveries to the NFGDC PA Distribution system by month. Please note that this includes storage volumes delivered to the system as storage is upstream of the Distribution system.
The maximum hourly data is not available at this time.

Month	Average Day Dth	Max Day Dth

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 - III-M-Rate Structure, COSS, Bill Freq, and Special Contracts
Delivered on January 28, 2026

III-M.3

Request:

Bill Frequency Analysis.

III.M.3.a Submit a bill frequency analysis for each tariffed rate schedule. The billing analysis may consist of the use of bill frequency distributions or individual customer billing records for the most recent annual periods available. Display all billing determinants. Apply the blocking and corresponding prices of the present rates and the proposed rates to the determinants to derive the base rate revenues under both present rates and proposed rates. Use the derived base rate revenues as the basis for measuring the annual base rate effect of the rates in question for the test year.

III.M.3.b Supply a chart or tabulation of base rate bills for each rate schedule comparing the present rates to proposed rates. Show the dollar difference and the per cent increase or decrease.

Response:

Please see Exhibit CTM-9 for bill frequency analysis and tabulation.

Prepared by or under the supervision of: Courtney T. Mann

Delivered on January 28, 2026

III-M.4

Request:

Special Rate Contracts:

III.M.4.a State whether the public utility has negotiated special rates not specified in the currently effective tariff.

III.M.4.b Provide a listing of negotiated special rate contracts. Include a comparison of revenues for special rate contracts and under tariff rates.

Response:

The Company has negotiated special rates not specified in the currently effective tariff. Information related to these rates is CONFIDENTIAL. The Company is providing CONFIDENTIAL Attachment III-M-4 in a separately sealed envelope that is marked "CONFIDENTIAL". The Company hereby requests that the content of such envelope be placed in the Commission's NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding.

Responses to Section 53.53 – IV-B-Natural Gas Utilities
Delivered on January 28, 2026

IV-B.1

Request:

Address lost and unaccounted-for gas:

IV.B.1.a Provide a schedule that shows the percentage of lost and unaccounted-for gas for the natural gas distribution system for the HTY and 2 years immediately preceding the HTY.

IV.B.1.b Describe how the amount in previously listed B.1. was determined and explain any steps taken to reduce lost and unaccounted-for gas.

Response:

a. Please see Attachment IV-B.1 for a schedule that shows the percentage of lost and unaccounted-for gas for the natural gas distribution system for the HTY and 2 years immediately preceding the HTY.
b. The Company's method for calculating lost and unaccounted-for gas, as well as the steps taken to reduce it, is detailed in 1307(f) (Docket No. R-2026-3059551), within the direct testimony of Shannon Putnam, detailed in Exhibit CEH-2.

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 – IV-B-Natural Gas Utilities
Delivered on January 28, 2026

IV-B.2

Request:

Supply an exhibit showing the gas deliveries to each customer class for the most recent 24-month period. Identify the source of the gas, such as "purchased" (pipeline), "production" (includes purchases from local producers), "storage withdrawal," "propane/air" and "unaccounted-for."

Response:

Please see Attachment IV-B.2 for a schedule that shows the gas deliveries to each customer class for the most recent 24-month period and the source of the gas.

Prepared by or under the supervision of: Cathryn E. Hilliard and Courtney T. Mann.

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 – IV-B-Natural Gas Utilities
Delivered on January 28, 2026

IV.B.3

Request:

Provide, with respect to the scope of operations of the utility, a description of all property, including an explanation of the system's operation, and plans for significant future expansion, modification or other alteration of facilities. Include all of the following:

IV.B.3.a If the public utility has multiple natural gas service areas, indicate if the service areas are integrated such that the gas supply is available to all customers.

IV.B.3.b Provide pertinent data regarding policy related to the addition of new consumers in the public utility's service area.

Response:

IV.B.3.a
See attached and please note these pages are CONFIDENTIAL. The Company is providing these pages in a separately sealed envelope that is marked "CONFIDENTIAL." The Company hereby requests that the content of such envelope be placed in the Commission's NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding.

The National Fuel Gas Distribution Corporation ("Distribution") – Pennsylvania Rate Jurisdiction is a public utility providing, in a 14-county area of northwestern Pennsylvania, gas service to 195,342 residential, 16,021 commercial and public authority customers and 591 industrial customers as of October 2025. All of the many local distribution systems are interconnected although, in many instances, they are interconnected by means of pipelines of National Fuel Gas Supply Corporation ("Supply"). Major municipalities located within the area serviced by Distribution include Erie, Meadville, Sharon, Franklin, Oil City, Clarion, Corry, Warren, DuBois, and Bradford. The majority of gas supplies for the Pennsylvania Division gas requirement are brought to Distribution through Supply and three other interstate pipelines. These pipelines are Tennessee Gas Pipeline Company ("TGP"), Texas Eastern Transmission, LP ("TETCO"), and Columbia Gas Transmission, LLC ("Columbia"). See attached Schedule No. 1 for a summary and the most recent agreements with the pipelines listed above Distribution

IV.B.3 (Continued)

allocates portions of the Supply EFT Service Agreement #E00528 contract and the TGP Service Agreement 2752 contract to New York and Pennsylvania.

IV.B.3.b

Distribution is permitted to attach new customers under the terms and conditions contained in the Company's tariff, the Commission's regulations codified at 52 Pa. Code Ch. 59 and orders of the Commission adopted pursuant thereto.

Prepared by or under the supervision of: Christopher A. Cej

2026 Base Rate Case
Responses to Section 53.53 – IV-B-Natural Gas Utilities
Delivered on January 28, 2026

IV-B.4

Request:

Explain how the public utility obtains its gas supply for each of the following:

IV.B.4.a Explain how it stores or manufactures gas if applicable.
IV.B.4.b State whether it has peak shaving facilities.
IV.B.4.c Provide details of coal-gasification programs if any.
IV.B.4.d Describe the potential and process for emergency purchases of gas.
IV.B.4.e Provide the amount of gas in MCF supplied by various suppliers in the test year. (Include a copy of all contracts).
IV.B.4.f Provide the amount of gas in MCF supplied from public utility-owned wells during the HTY and projected for the FTY and FPFTY.

Response:

IV.B.4.a See attached and please note these pages are CONFIDENTIAL. The Company is providing these pages in a separately sealed envelope that is marked "CONFIDENTIAL." The Company hereby requests that the content of such envelope be placed in the Commission's NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding.

Distribution has no facilities to store or manufacture gas but has entered into gas storage service agreements with Supply and Columbia. Of these storage agreements, Distribution relies most heavily on the Supply services. Pursuant to the governing procedures for confidential treatment of submitted materials, a summary and the most recent storage agreements with Supply and Columbia are attached in Schedule No. 2. Distribution allocates portions of the Supply Service Agreement #G00539 contract to New York and Pennsylvania.

IV.B.4.b Distribution does not own or operate peak shaving facilities.

IV.B.4.c Distribution is unaware of gas supplies obtained from its suppliers as produced through coal gasification processes or programs.

IV.B.4.d Distribution does not expect to make any emergency purchases of gas.

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 – IV-B-Natural Gas Utilities
Delivered on January 28, 2026

IV.B.4.e Please refer to Exhibit No. IV.B.14 for the gas supplied by upstream suppliers. This is the volume figure noted in the row called "Upstream Purchases" at pages 2 and 3. Gas purchased from independent producers is shown in total in the next row. Pursuant to the governing procedures for confidential treatment of submitted materials, a copy of Distribution's confidential standard long-term contracts (Master Agreement & NAESB) for supplies is provided at Schedule No. 3 and will be available subject to a protective order.

IV.B.4.f Distribution does not own gas wells.

Prepared by or under the supervision of: Christopher A. Cej

National Fuel Gas Distribution Corporation
Docket No. R-2025-3059428
2026 Base Rate Case
Responses to Section 53.53 – IV-B-Natural Gas Utilities
Delivered on January 28, 2026

IV.B.5

Request:

Address plans for future gas supply including each of the following:

IV.B.5.a Supply details of anticipated gas supply from its near-term development of gas wells, if any.

IV.B.5.b Provide gas supply agreements and well development ventures and identify the parties thereto.

Response:

IV.B.5.a Distribution does not own gas wells, nor does it plan to drill or otherwise acquire gas wells in the future.

IV.B.5.b

See attached and please note these pages are CONFIDENTIAL. The Company is providing these pages in a separately sealed envelope that is marked "CONFIDENTIAL." The Company hereby requests that the content of such envelope be placed in the Commission's NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding.

Schedule No. 3 contains sample copies of Distribution's Master and NAESB contracts. Distribution would execute a NAESB contract for future gas supply transactions with future suppliers. As stated in response (a), Distribution does not plan to participate in future gas well development ventures.

IV.B.7

Request:

Provide current data on any FERC action or programs that may affect or tend to affect the natural gas supply to the public utility.

Response:

Distribution can be impacted by Federal regulations and actions covering the sources, transportation, and prices associated with suppliers providing gas to Distribution.

Distribution participates and actively represents its position as a local distribution company in FERC proceedings that may have a direct impact on it. Distribution's activity at the FERC during the past year was provided in Distribution's 1307(f) proceeding at PGC Exhibit No. 6 which is incorporated in Exhibit No. 12, Schedule No. 8.

SUPPLEMENTAL DATA REQUESTS

COST OF SERVICE

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Cost of Service

Question No. COS-01:

Please explain the Company's policy with regard to when customer advances and contributions in aid of construction must be made.

Response:

The Company's policy on customer advances is found on Page 16B of Pa. P.U.C No. 9 (included in this filing under National Fuel Gas Exhibit F - Current Tariff). The tariff language states that "Construction of any extension or installation of excess flow valves or natural gas related equipment or facilities not otherwise required by regulation will not be undertaken until the amount of the applicant's contribution has been paid to the Company by the applicant. In the case of an excess flow valve or natural gas related equipment or facilities not otherwise required by regulation, the amount of the applicant's contribution will be determined based upon the Company's cost to install such equipment. The actual construction of the extension shall be scheduled at the Company's discretion."

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Cost of Service

Question No. COS-02:

Please provide a detailed explanation describing how contributions in aid of construction and customer advances are reflected in the Company's cost of service study.

Response:

The cost and plant information provided in the cost of service study is based on the Company costs and investments net of any customer contributions in aid of construction and customer advances.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Cost of Service

Question No. COS-09:

Please provide a copy of the Company's current customer extension policy. Provide a representative sample of the analyses conducted by the Company when deciding whether service to a new customer qualifies under the Company's customer extension policy.

Response:

The Company's current customer extension policy is found on Pages 10 through 17 of Pa. P.U.C. No. 9 (included in this filing as part of National Fuel Gas Exhibit F – Current Tariff and as Attachment SDR-COS-09). The tariff language describes the methodology for evaluating whether service to a new customer qualifies under the current policy. The Company's services application ("PFI") calculates projected annual revenues and determines the justified Company investment based on the factors outlined in the tariff. Attachment SDR-COS-09 includes screenshots from PFI for a residential and non-residential example.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED

1. RULES AND REGULATIONS

The customer's application for service, the Pennsylvania Public Utility Code and the rules and regulations promulgated by the Pennsylvania Public Utility Commission, as amended from time to time, and the rules and regulations contained herein are a part of the contract with each Customer, and each Customer agrees to be bound thereby.

2. APPLICATIONS FOR SERVICE

The Company may require any applicant for service to sign an application. Regardless of the manner in which an application is made, the acceptance of such application by the Company shall result in a contract service governed by Rule 1.

3. DETERMINATION OF COMPANY INVESTMENT FOR UPGRADE/EXTENSION OF FACILITIES

A. Maximum Company Investment Level

The Company investment for upgrade/extension of facilities for a firm gas customer shall be limited to an amount determined as follows:

Maximum Company Investment = Additional Annual Revenues x Justified Company Investment per Dollar of Additional Annual Revenue

B. Determination of Additional Annual Revenues

The Additional Annual Revenues are calculated as follows:

(1) The Company will estimate the customer's projected firm annual volumes as follows:

(a) Residential

For guideline purposes, the Company shall use annual gas consumption figures for gas space heating and for various gas appliances as shown below (These figures are based on current insulation standards as well as 92% efficient furnaces): (C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

3. DETERMINATION OF COMPANY INVESTMENT FOR UPGRADE/EXTENSION OF FACILITIES (Cont'd)

Gas Space Heating:
Single Family Home - [(square footage x .029) – 5.4] Mcf
Apartment/Condominium - [(square footage x .024) + 3.14] Mcf
Manufactured Home - [(square footage x .0267) + 6.98] Mcf

Gas Appliances:

Gas Water Heater – 20.4 Mcf
Gas Dryer – 3.6 Mcf
Gas Range – 7.6 Mcf
Other Gas Appliances – Determined by the Company on a case-by-case basis.

(b) Commercial or Public Authority: Industrial

The Company shall estimate projected firm annual volumes on a case-by-case basis.

(2) This annual volume is then distributed into 12 monthly amounts based on an average distribution in the appropriate revenue classification. (Alternatively, the customer's annual usage estimate may be distributed according to his own historic or projected monthly load profile pursuant to the Company's review and approval.)

(3) The appropriate rate schedule is applied to each monthly volume, and the results are added to produce annual gross revenues.

(4) For each monthly volume the costs shall be determined for the portion of monthly gross revenues for recovery of purchased gas costs pursuant to applicable provisions of Rider A to this tariff and the applicable rate schedule. (C)

The portion of monthly gross revenues for recovery of Purchased Gas Costs and Transition Costs for each month shall be added together to produce annual revenues for recovery of Purchased Gas Costs and Transition Costs.

(5) The amount calculated under item (4) above, shall be subtracted from the amount calculated under item (3) above.

(6) Additional annual revenues resulting from the upgrade/extension shall be determined by reducing the annual revenues for recovery of non-gas costs as calculated in (5) above, by the customer's currently generated annual revenues for recovery of non-gas costs, if any, as determined by the Company.

(C) Indicates Change
(D) Indicates Decrease
(I) Indicates Increase

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

3. DETERMINATION OF COMPANY INVESTMENT FOR UPGRADE/EXTENSION OF FACILITIES (Cont'd)

C. Determination of Justified Company Investment Per Dollar of Additional Annual Revenue

(1) Residential

The Justified Company Investment Per Dollar of Additional Annual Revenue for residential customers is $6.93. (I)

(2) Commercial and Public Authority; Industrial

The Justified Company Investment Per Dollar of Additional Annual Revenue for commercial, public authority or industrial customers shall be selected from the table below based upon the projected term of use by the customer of the new or upgraded facilities.

Projected Term of Use of New/Upgraded Facilities (Years)	Justified Company Investment Per Dollar of Additional Annual Revenue
1	$ 0.63
2	1.21
3	1.76
4	2.27
5	2.74
6	3.18
7	3.59
8	3.97
9	4.32
10	4.65
Greater than 10	6.93

(I)

Because the term of use has a substantial effect on the determination of the Justified Company Investment Per Dollar of Additional Annual Revenue, the Company may require a letter of intent from commercial, public authority and industrial customers projecting the term of use of the new or upgraded extension of facilities being requested.

The Company reserves the right to require a guaranteed revenue contract if the customer projects a term of use of the new or upgraded facilities in excess of 10 years or if the customer does not demonstrate that the customer's term of use is reasonable.

(D) Indicates Decrease

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

3. DETERMINATION OF COMPANY INVESTMENT FOR UPGRADE/EXTENSION OF FACILITIES (Cont'd)

Additionally, the Company reserves the right to require a guaranteed revenue contract from a commercial, public authority or industrial customer if any of the following conditions exist:

(1) The investment is for a dual fuel or partially dual fueled facility;

(2) The Company determines that a customer's financial status does not demonstrate that the customer will be able to pay bills for the projected term of use of the facilities; or

(3) The actual investment by the Company is greater than $50,000.

(3) Recomputation

The Company may recompute, modify, alter or amend the foregoing Justified Company Investment Per Dollar of Additional Annual Revenue amounts as the Company may deem necessary or convenient in the conduct of its business, provided, however, that such recomputation, modification, alteration or amendment shall not become effective unless and until included in this tariff. (C)

D. Application of Maximum Company Investment

The Maximum Company Investment as determined above shall be applied, first, to the installed meter cost, if any, and then will be applied towards any mainline and/or service line extension, service connection, and/or the upgrade of any of the Company's facilities to accommodate increased volumes of sales or transportation. However, if the Maximum Company Investment is less than the installed meter cost, Company will provide and install the meter at no cost to the Customer.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES

A. Residential

Whenever the owner or occupant of any property eligible for service as a residential customer makes a written application for service to the Company, and the Company has authority to render service to said applicant, the Company shall extend its facilities so as to serve said property or new residential development, provided that the applicant shall first have executed an agreement to pay to the company the rate charged under the appropriate service classification and to contribute to the cost of extending facilities, an amount equal to the difference between the total cost of construction of facilities less the Company's Maximum Investment (as calculated in Rule No. 3, above).

Income taxes, if any, paid with respect to the Contribution will be recorded in a deferred account and such taxes, less the income tax effect of depreciation received with respect to the property constructed with the Contribution, will be included in the Company's rate base in subsequent rate case proceedings.

B. Commercial or Public Authority; Industrial

Whenever the owner or occupant of any property eligible for service as a Commercial or Public Authority customer, or as an Industrial customer, makes a written application for service to the Company, and the Company has authority to render service to said applicant, the Company shall extend its system so as to serve said property, provided said applicant shall first have executed an agreement to pay to the Company the rates charged under the appropriate service classification and to contribute to the cost of extending facilities, an amount equal to the difference between the total cost of construction of facilities less the Company's Maximum Investment (as calculated in Rule No. 3, above).

Income taxes, if any, paid with respect to the Contribution will be recorded in a deferred account and such taxes, less the income tax effect of depreciation received with respect to the property constructed with the Contribution, will be included in the Company's rate base in subsequent rate case proceedings.

The Company's Maximum Investment for Commercial or Public Authority and Industrial customers shall equal the Maximum Company Investment as calculated in Rule No. 3 above; provided, however, that, in the event that the Company reasonably believes that the Company's installation of facilities will be completed substantially in advance of date that the Customer's use will equal projected annual volumes used to calculate the Maximum Company Investment as calculated in Rule No. 3 above, the Company may discount the Maximum Company

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES (Cont'd)

Investment as calculated in Rule No. 3 above to present value based upon the Company's most recent Commission-approved fair rate of return. (C)

C. Developer/Builder - Residential

Whenever the Developer/Builder of a residential property eligible for service makes a written application for service to the Company, and the Company has authority to render service to the property to be developed, the Company shall extend its system to serve said property, provided that, if the cost to extend the facilities exceeds the Maximum Company Investment, as calculated below, the Developer/Builder shall have entered into an agreement to contribute to the cost of extending facilities. (C) (C) (C)

The Maximum Company Investment for extensions involving a Developer/Builder shall be calculated as follows:

(1) The Developer/Builder shall provide a reasonable schedule of unit completion within the property to be developed;

(2) The Maximum Company Investment shall be calculated (as provided in Section 3) separately based on the number of units scheduled to be completed:

(a) within twelve months from the date of the estimated completion of construction of the new facilities; and

(b) during each successive twelve month period following the date of the estimated completion of construction of the new facilities.

(3) For all units not scheduled for completion within twelve months from the estimated date of completion of the construction of the new facilities, the Maximum Company Investment, as calculated above, shall be discounted to present value at the projected date of the completion of Company installed facilities using the Company's most recent Commission-approved fair rate of return.

(4) The sum of the discounted Maximum Company Investment for units to be installed more than twelve months after construction of Company facilities and the Maximum Company Investment for units scheduled for completion within twelve months of the estimated date of completion of construction of Company facilities shall equal the total Maximum Company Investment for the extension.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES (Cont'd)

The Developer/Builder shall contribute to the cost of extending facilities, an amount equal to the difference between the total cost of construction of facilities less the Maximum Company Investment (as calculated above).

Income taxes, if any, paid with respect to the Contribution will be recorded in a deferred account and such taxes, less the income tax effect of depreciation received with respect to the property constructed with the Contribution, will be included in the Company's rate base in subsequent rate case proceedings.

In the event that the Developer/Builder does not achieve the projected annual completion rate, the Maximum Company Investment and the amount to be contributed will be recalculated, in the same manner stated above, based upon actual units completed. If the recalculated amount to be contributed is greater than the previously calculated amount to be contributed, the Developer/Builder will be required to pay such difference to the Company; provided, however, that no amount will be required to be paid if the recalculated amount to be contributed exceeds the Company's actual cost of construction less the recalculated Maximum Company Investment.

C1. Developer/Builder Commercial or Industrial

Whenever the Developer/Builder of a commercial or industrial property eligible for service makes a written application for service to the Company, and the Company has authority to render service to the property to be developed, the Company shall extend its system to serve said property, provided that, if the cost to extend the facilities exceeds the Maximum Company Investment, as calculated below, the Developer/Builder shall have entered into an agreement to contribute to the cost of extending facilities.

The Maximum Company Investment for extensions involving a Developer/Builder shall be calculated as follows:

(1) The Developer/Builder shall provide a reasonable schedule of customer attachments and projected additional annual revenues from volumes to be transported by or purchased from the Company and consumed by the attaching customers;

(2) The Maximum Company Investment shall be calculated (as provided in Section 3) separately based on the historical and projected additional annual revenues from volumes to be transported by or purchased from the Company and consumed by the attaching customers: (C)

(a) within twelve months from the date of the estimated completion of construction of the new facilities; and

(b) during each successive twelve month period following the date of the estimated completion of construction of the new facilities.

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES (Cont'd)

(3) For all customer attachments not scheduled for completion within twelve months from the estimated date of completion of the construction of the new facilities, the Maximum Company Investment, as calculated above, shall be discounted to present value at the projected date of the completion of Company installed facilities using the Company's most recent Commission-approved fair rate of return. (C)

(4) The sum of the discounted Maximum Company Investment for customers to be attached more than twelve months after construction of Company facilities and the Maximum Company Investment for customer attachments scheduled for completion within twelve months of the estimated date of completion of construction of Company facilities shall equal the total Maximum Company Investment for the extension.

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES (Cont'd)

The Developer/Builder shall contribute to the cost of extending facilities, an amount equal to the difference between the total cost of construction of facilities less the Maximum Company Investment (as calculated above).

Income taxes, if any, paid with respect to the Contribution will be recorded in a deferred account and such taxes, less the income tax effect of depreciation received with respect to the property constructed with the Contribution, will be included in the Company's rate base in subsequent rate case proceedings.

In the event that the Developer/Builder does not achieve the projected annual completion rate, the Maximum Company Investment and the amount to be contributed will be recalculated, in the same manner stated above, based upon actual additional annual revenues from volumes transported by or purchased from the Company and consumed by the attaching customers during the 60-month period following completion of the extension and the projected additional annual revenues from volumes to be transported by or purchased from the Company and consumed by the customers attached as of the last day of such 60-month period. If the recalculated amount to be contributed is greater than the previously calculated amount to be contributed, the Developer/Builder will be required to pay such difference to the Company; provided, however, that no amount will be required to be paid if the recalculated amount to be contributed exceeds the Company's actual cost of construction less the recalculated Maximum Company Investment.

D. Upgrade

The Company's investment for the upgrade of facilities shall be subject to the formula described in Rule No. 3. An upgrade is required when the customer needs dictate increasing, decreasing or otherwise changing the current service line, main line or meter size for the increased, decreased or otherwise changed volume or pressure requirements or when the customer requests installation of an excess flow valve or natural gas related equipment or facilities not otherwise required by regulation and the Company has deemed such installation appropriate. (C)

E. Advance Payment and Construction

Construction of any extension or installation of excess flow valves or natural gas related equipment or facilities not otherwise required by regulation will not be undertaken until the amount of the applicant's contribution has been paid to the Company by the applicant. In the case of an excess flow valve or natural gas related equipment or facilities not otherwise required by regulation, the amount of the applicant's contribution will be determined based upon the Company's cost to install such equipment. The actual construction of the extension shall be scheduled at the Company's discretion. (C) (C)

(C) Indicates Change

RULES AND REGULATIONS APPLYING TO ALL TERRITORIES SERVED (Cont'd)

4. UPGRADE/EXTENSION OF FACILITIES (Cont'd)

F. Refunds of Customer Investment

Any customer attaching to a facility extended/upgraded within five (5) years of completion thereof will be required to contribute to the cost of the extension/upgrade in accordance with Rules 3 and 4. In the event a new customer attaches to an extension/upgrade of the Company's facilities paid for by a customer or a developer/builder, within five (5) years of the date of completion thereof, a pro rata refund will be made to customers or developer/builder who were charged for such extension. In the alternative, the customer or builder/developer and Distribution may mutually agree in writing that the refund, if any, shall equal the Company's Maximum Company Investment for the attaching customer less the Company's actual attachment cost of construction. An annual review of such extensions is made on the anniversary date of completion thereof, during said five (5) years, and any refunds due are made at that time except for extensions for a developer/builder of commercial or industrial property which shall be reviewed at the end of year five (5) and any refunds due will be made at that time. No refunds will be paid for attachments occurring more than five (5) years after the completion date and in no case will the aggregate amount of refunds to a customer or developer/builder exceed the amount which the customer or developer/builder paid for the mainline extension/upgrade. (C)

5. MAINTENANCE OF FACILITIES

After initial installation of facilities has been made, pursuant to Rule Nos. 3 and 4, above, all facilities including mains, customer service lines (i.e., the portion of the service line from the outlet of the Company's service stop cock to the inlet of the meter) and Company service lines (i.e. the portion of the service line from the gas main to and including the curb box and service stop cock), shall be maintained, replaced or renewed, as required, at the expense of the Company.

5A. SPECIAL UTILITY SERVICES

The provisions of Rules 3 and 4 do not apply to applications for special utility service. "Special utility service" shall include (a) a request for utility service when the applicant has an installed alternative fuel capability, including service from a natural gas well; (b) a request for utility service when the applicant is already receiving natural gas service from another Pennsylvania public utility; (c) a request for utility service from an applicant located in an area in which another natural gas utility is authorized to serve the applicant; (d) a request for utility service by an applicant who was the owner or ratepayer of record for the premises at the time the Company last provided service to the premises; (e) any request for service by an applicant who, in the Company's view, is unlikely to remain on the Company's system for a sufficient period of time to justify the extension. Applications for special utility service shall be resolved on a case-by-case basis through negotiations between the applicant and the company.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Cost of Service

Question No. COS-10:

Please provide a detailed supply and requirement schedule for the Company's three most recent annual peak days and for design day. The schedules should include deliveries by source and requirements by rate schedule. Identify sources and requirements for transportation customers separately. Also include the Company's daily sendout sheet for each peak day and applicable weather data.

Response:

The Company is providing CONFIDENTIAL SDR-COS-10 (Pages 2 through 6 of this response) in a separately sealed envelope that is marked "CONFIDENTIAL". The Company hereby requests that the content of such envelope be placed in the Commission's NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding.

Confidential pages:
Page 2 contains the supply and requirement schedule for the three most recent annual peak days for National Fuel Gas Distribution Corporation.
The requirements are segregated into sales and transportation service in section 1 (Firm Retails Sales and Transportation Requirements). The deliveries to the Company's system are identified by source in section 2 (Deliveries to the Company (Sources of Supply)) which includes deliveries by the Company from pipeline and storage for retail customers and deliveries by third party suppliers for transportation customers from local production and NFGSC pipeline. Weather data is included in section 3. Pages 3 through 5 are the Daily Gas Throughput Summary Reports for the most recent three peak days. Page 6 is the supply and requirements schedule for the Company's 2025-2026 design day.

Standard Data Request

Cost of Service

Question No. COS-12:

Please provide a copy of the load duration curve used by the Company for capacity planning purposes. Please also identify the numerical data points shown for each day on the curve.

Response:

Please see Page 2 of the attached for the Company's Load duration curve for winter 2025 through 2026. The Company's load duration curve illustrates the utilization of its contracted firm transportation and storage capacity and winter gas call to serve the demand for a projected design day and 15% colder than normal "CTN" forecasted winter. Pages 3-4 include the numerical data points for each day of the curve.

The abbreviations referenced in pages 2 through 4 are as follows:
Columbia Gas Transmission, LLC – "COL"
Texas Eastern Transmission, LP – "TETCO"
National Fuel Gas Supply Corporation – "NFGSC"
Tennessee Gas Pipeline Company – "TGP"
Enhanced Storage Service – "ESS"
Firm Storage Service – "FSS"

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Cost of Service

Question No. COS-13:

Please provide the following for the Company's ten largest transportation customers during peak month of the most recent heating season:

a. Actual consumption;
b. Volume delivered to the Company on their behalf, if applicable;
c. Daily nomination.

Response:

Please see attached COS-13.

Standard Data Request

Cost of Service

Question No. COS-14:

Please provide a summary identifying the salient features of each of the following. Salient features include contract party, effective term and applicable contract quantities (daily, annual, seasonal, etc.).

a. All firm transportation agreements by type greater than one month in length. Indicate whether the capacity is available at the Company's citygate to meet design day requirements or is upstream capacity. Identify the downstream pipeline for each upstream arrangement.
b. All firm storage, gathering and exchange agreements. Indicate if each agreement provides design day capacity at the citygate or requires separate transportation (identify) service to effectuate delivery. Include on-system storage and peak shaving facilities used by the Company and identify all ratching provisions applicable to the Company's contractual and on-system storage arrangements.

Response:

Please see attached pages 2-5 for a list and salient features of NFGDC's firm transportation, storage agreements and winter gas calls which meet the design day requirements for winter 2025-2026.

a.) National Fuel Gas Distribution Company ("NFGDC") utilizes a unique delivery system that integrates all of its pipeline network with National Fuel Gas Supply Corporation's ("NFGSC") transmission system. NFGDC maintains contracts for firm transportation and storage capacity on NFGSC and on pipelines upstream of NFGSC that include Columbia Gas Transmission, Inc. ("Columbia"), Tennessee Gas Pipeline ("TGP") and Texas Eastern Transmission LP ("TETCO"), to meet the gas supply requirements of its firm sales and transportation customers.

b.) NFGDC does not own or operate on-system storage or peak shaving facilities. Pages 3 through 5 provide ratchet information related to the NFGDC's off-system storage contracts with Columbia and NFGSC.

Cost of Service

Question No. COS-15:

For the most recent annual period available, please identify the applicable monthly volumes and revenues under each rate schedule which were:

a. Sold under a negotiated or market-based rate.
b. Transported under a negotiated or market-based rate.
c. Transported at full margin transportation rates.

Response:

Please see Attachment COS-15.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Cost of Service

Question No. COS-16:
Please provide the following for each curtailment during the last three years:

a. Dates of curtailment.
b. Type of curtailment (firm service, interruptible service, both).
c. Whether curtailment was related to amount of capacity on the Company's system, other capacity or supply related.
d. Rate schedule that curtailed volumes would have been billed under.
e. Curtailed volumes by rate schedule.
f. Actual volumes moved by rate schedule.

Response:
National Fuel Gas Distribution - Pennsylvania Division has not experienced a curtailment situation during the last decade.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Cost of Service

Question No. COS-19:

Please provide workpapers showing the development of each allocation factor reflected in the Company's cost of service study. Include a description of each allocation factor, all calculations performed to develop the allocators and all supporting documentation, studies or other information relied upon to determine the allocators.

Response:

Please refer to National Fuel Gas Exhibit D – Cost of Service Study for a description and development of each allocation factor. Please refer to Attachment COS-19 for the supporting workpapers provided in electronic format on USB flash drive.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Cost of Service

Question No. COS-20:

Please provide all workpapers, calculations and supporting documentation for the functionalization and classification performed for the Company's cost of service study.

Response:

Please refer to the response to COS-08.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Cost of Service

Question No. COS-21:

If not provided elsewhere, please provide a detailed proof of revenues at both present and proposed rates.

Response:

See National Fuel Gas Exhibit E – Proof of Revenue.

SUPPLEMENTAL DATA REQUESTS

RATE OF RETURN

National Fuel Gas Distribution Corporation PA Division
Standard Data Request

Rate of Return

Question No. ROR-01:

Please supply copies of the following documents for the Company and, if applicable, its parent:

a. Most recent Annual Report to shareholders (including any statistical supplements);
b. Most recent SEC Form 10K;
c. All SEC Form 10Q reports issued within last year.

Response:

a. NFG Annual reports are available at the following link: https://investor.nationalfuelgas.com/financials/annual-reports/default.aspx

b. NFG SEC filings including the 10-K are archived at the following link: https://investor.nationalfuelgas.com/financials/sec-filings/default.aspx

c. NFG SEC filings including the 10-Q are archived at the following link: https://investor.nationalfuelgas.com/financials/sec-filings/default.aspx

National Fuel Gas Distribution Corporation PA Division
Standard Data Request

Rate of Return

Question No. ROR-02:

Please supply copies of the Company's balance sheets for each month/quarter for the last two years.

Response:

See attached for NFGDC’s balance sheets.

Question No. ROR-03:

Please provide the bond rating history for the Company and, if applicable, its parent from the major credit rating agencies for the last five years.

Response:

The credit rating is held by the Parent. The Company is not rated as a standalone company.

The following security ratings of the Parent are for long-term debt at September 30:

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
S&P	BBB-	BBB-	BBB-	BBB-	BBB-
Moody's	Baa3	Baa3	Baa3	Baa3	Baa3
Fitch	BBB	BBB	BBB	BBB	BBB

The following security ratings of the Parent are for commercial paper at September 30:

	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025
S&P	A-3	A-3	A-3	A-3	A-3
Moody's	P-3	P-3	P-3	P-3	P-3
Fitch	F-2	F-2	F-2	F-2	F-2

Question No. ROR-04:

Please provide copies of all bond rating reports relating to the Company and, if applicable, its parent for the past two years.

Response:

Information related to the bond rating report National Fuel Gas Company is CONFIDENTIAL. The Company is providing CONFIDENTIAL Attachment ROR-004 in a separately sealed envelope that is marked “CONFIDENTIAL.” The Company hereby requests that the content of such envelope be placed in the Commission’s NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such CONFIDENTIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding.

National Fuel Gas Distribution Corporation PA Division
Standard Data Request Rate of Return

Question No. ROR-05:

Please provide a workpaper showing the derivation of the Company's current AFUDC rate.

Response:

See the most recent derivation of the NFGDC AFUDC rate in the table below.

		✔✔ Estimate for Calendar 2024	Actual for Calendar 2024	Estimate for Calendar 2025
S = Average Short Term Debt (Schedule I)		$38,286,548	$34,581,848	$56,242,685
s = Short Term Debt Interest Rate (Schedule I)		6.25%	6.39%	5.09%
D = Long Term Debt (Prior Year End)		$2,400,000,000	$2,400,000,000	$2,700,000,000
d = Long Term Debt Interest Rate (Weighted Average)		4.66%	4.66%	4.79%
P = Preferred Stock (Prior Year End)		$0.00	$0.00	$0.00
p = Preferred Stock Cost Rate (Weighted Average)		0.00%	0.00%	0.00%
C = Common Equity B4 Accum. Other Comprehensive Income (Prior Year End)		$3,106,621,626	$3,106,621,626	$2,828,966,077
c = Common Equity Cost Rate (Rate Granted in Last Rate Preceedings)		8.95%	9.40%	9.40%
W = Average Balance in CWIP (13 Month Average) (Schedule II)		$38,286,548	$40,947,629	$56,242,685 [A]
Ai = Gross Allowance For Borrowed Funds Used During Construction Rate Ai = s(S/W) + (d(D/(D+P+C)) * (1-(S/W))	Ai =	6.25%	5.71%	5.09%
Ae = Allowance For Other Funds Used During Construction Rate Ae = [(1-S/W)] * [(p*(P/(D+P+C)) + (c*(C/(D+P+C))]	Ae =	0.00%	0.82%	0.00%
		6.25%	6.53%	5.09%
	Ai =	6.25%	5.71%	5.09%
	Ae =	0.00%	0.82%	0.00%
✔✔ - Per prior year workpapers./SM		6.25%	6.53%	5.09%
	Ai =	0.0006250	0.0005712	0.0005093
	Ae =	0.0000000	0.0000824	0.0000000
		0.0006250	0.0006536	0.0005093

[A] Short Term Debt balance exceeded the projected CWIP balance for the calendar year, therefore the CWIP balance has been set equal to STD balance.
STD should be used first to fund the cost of construction (CWIP), Since Short term debt exceeds the average CWIP balance it is assumed the CWIP would be fully funded by STD.

Question No. ROR-015:

Please identify the Company's and, if applicable, its parent's capital structure targets (percentages of capital types). Provide the complete basis for the capital structure targets.

Response:

Capital Structures at the Company and its Parent target the mix of capital that accounts for the risk of the underlying business and provides for an adequate return to investors.

For the Company, the capital structure target falls within the range of comparable natural gas distribution companies. Please refer to the direct Testimony of Mr. Josh Nowak for further detail.

Question No. ROR-017:

If applicable, please provide the currently authorized returns on equity for each of the parent's utility subsidiaries of the same industry type as the Company. In each case identify the approximate date when the current return on equity was approved by the state commission.

Response:

National Fuel Gas Distribution Corporation ("NFGDC"), the utility subsidiary of National Fuel Gas Company, has operations in the states of New York and Pennsylvania. The operations of NFGDC are subject to the jurisdictions of the Pennsylvania Public Utility Commission ("PaPUC") and New York Public Service Commission ("NYPSC").

Authorized Return on Equity	Date Approved	State Commission

Question No. ROR-018:

Has the Utility reacquired or repurchased any debt within the last five years? If so, provide a summary of each gain or loss on reacquired debt, the date on which the utility commenced amortization of such a gain or loss, the regulatory commission decision addressing the treatment of such gain or loss on reacquired debt, if any, on interest expense.

Response:

National Fuel Gas Distribution Corporation ("NFGDC") has not repurchased any debt in the last five years. The $49,000,000 of notes due in 2023 and the $50,000,000 of notes due in 2025 represent the total maturities for NFGDC over the last five years, and both were retired at maturity.

Standard Data Request

Revenue Requirement

Question No. RR-05:

If past weather normalized sales or sales trends are used in models or otherwise relied on in reaching sales projections, please provide actual and normalized throughput by rate schedule as of December 31 for the last three years. Where applicable, separately identify sales and transportation throughput.

Response:

Please see Attachment RR-05.

For column C, select two lowest consecutive values (base months), can be row 10 & row 21
For column E, the two lowest consecutive months highlighted in C are equal zero, all else is a formula

Note:
Normal Degree Days Based on NOAA 2015-2024 (5,485 Degree Days).
"Base Mcf/Acct" calculated over a 2 month time period.
Control Degree Days used in Normalization calculation.
Summary Degree Days based on the Average of 21 Controls.
"Normal Mcf/Acct" = "Normalized MCF" divided by "Accounts".
Number of Accounts has been adjusted for Initial/Final Bills.
Number of Accounts has been adjusted for Converting Customers.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-08:

Please provide a complete copy of the computer output generated by the Company's statistical analysis package for all residential, commercial, public authority and industrial econometric models of gas demand estimated by the Company, but not presented in the filing.

Response:

The Company did not analyze any econometric variables that were not utilized in the gas demand estimate.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-09:

Identify the historical data source(s) for each dependent and independent variable utilized to develop the econometric models of gas demands for each forecasted customer group.

Response:

The variables noted below were utilized for the development of the forecasted normalized consumption and customer growth trends.

(1) Monthly Consumption – The monthly consumption is a dependent variable in the gas forecast model. These consumptions are expressed in use (Mcf) per customer which are developed from the reported monthly sales and customer accounts.

(2) Monthly Accounts – The number of accounts is an independent variable. The reported end of month customer accounts are used in conjunction with the monthly consumption to develop a customer usage per account.

(3) Monthly Heating Degree Days – The actual monthly Heating Degree Days ("HDD") is an independent variable. The HDD are calculated based on a 65-degree Fahrenheit temperature base using the daily average temperature of a Gas Day and then summed by month to arrive at the Monthly Heating Degree Days. Each Gas Day is based upon the North American Standards board definition of a Gas Day which encompasses the 24-hour period from 10:00 a.m. to 10:00 a.m. The recording location for temperature weather data used to calculate HDD for NFG is Erie, PA (Station: ERIE INTL AP, PA US USW 00014860).

(4) Heating Season – Heating Season is an independent variable. This variable identifies the major heating months (November through March) when heat-sensitive accounts are expected to have a substantially increased consumption compared to other months. This variable was statistically significant within the Public Authority Retail Group and was used for forecasting.

(5) Weighted Time Trend – Weighted Time Trend is an independent variable. This variable captures trends in customer usage which include both known and unknown factors such as structure conservation related to more efficient building envelop construction, regular cycle appliance change-outs to more efficient units, upgrades to more efficient units, installation of energy conservation measures such as set-back thermostats and manual consumer behavior changes such as lowering thermostat settings in response to higher energy prices. This variable is weighted based on industry knowledge in order to capture trend impacts during the forecasted periods. This variable was statistically significant within the within the Residential Retail, Residential Transportation, and Public Authority Retail groups, and used for forecasting.

(6) Large Volume Customer Consumption – Large Volume customer consumptions are an independent variable. These consumptions are used to create an annual consumption profile for the majority of the highest users consuming over 25,000 Mcf annually, within the Industrial Transportation, Commercial Transportation, Commercial Retail, and Public Authority Transportation, groups. These profiles are used to spread consumption on a monthly basis, based on annual consumption estimates provided by customers. This spread is not used in instances where Large Volume customers provide monthly projections. If contact with a large volume customer is unable to be established, monthly historical usage is analyzed to determine their projected annual throughput.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-10:

Identify the source(s) and supporting documentation for the FTY value of each independent variable which required forecasting in the Company's gas demand models.

Response:

The variables noted below were utilized for the development of the forecasted normalized consumption and customer growth trends.

(1) Monthly Customers – Monthly customer counts utilized are produced by a Market Planning forecast through the Fully Projected Future Test Year. Attachment SDR-RR-11 provides the supporting data.

(2) Monthly Heating Degree Days – Normal Monthly Heating Degree Days ("HDD") are utilized for forecasting. National Fuel Gas Company utilizes a 10-year Normal HDD, which is based on officially recorded daily temperatures (on a Gas day basis) over the period of January 1, 2015 to December 31, 2024. The actual system HDD is calculated using temperature as identified in SDR-RR-09. Please see the Direct Testimony of Cathryn E. Hilliard, National Fuel Statement No. 13, National Fuel Exhibit CEH-1 for HDD Values.

(3) Heating Season – Heating season is a binary value assigned to each month within the heating season.

(4) Weighted Time Trend – The Weighted Time Trend variable is a projection of the future gas prices based on the January 10, 2025 publication of the "Blue Chip Economic Indicators®." This variable is weighted based on industry knowledge in order to capture trend impacts during the forecasted periods.

(5) Large Volume Customer Survey – A survey of the highest users (>25,000

Mcf/year) within the Industrial, Commercial, and Public Authority groups is completed to best determine their projected usage during the FTY and beyond. These customers provide monthly or annual usage, depending on their capabilities. For customers that only provide annual usage, the customer profile detailed in RR-9-(6) is used to create a monthly consumption forecast. If contact with a large volume customer is unable to be established, monthly historical usage is analyzed to determine their projected annual throughput.

Revenue Requirement

Question No. RR-11:

Please provide in hard copy and on a computer diskette in Lotus 1-2-3, QuattroPro or other spreadsheet format, the dependent and independent variable databases relied upon to produce the Company's gas demand models. For variables based on averages, include the observations which comprise the average (e.g., gas prices).

Response:

For Gas Price variables and Heating Degree Days relied upon to produce the Company gas demand model and for regression results, please see Attachment RR-11 which has been provided in electronic format.

Question No. RR-13:

For each customer receiving service at less than the maximum applicable tariff rate, please provide:

a. Actual consumption for the two most recent calendar years;
b. Actual consumption for the HTY and the most recent twelve month period for which data is available;
c. The currently applicable rate;
d. An explanation for the rate discount.

Response:

Information related to customer-specific usage and rate information is HIGHLY CONFIDENTIAL PROTECTED MATERIAL. The Company is providing HIGHLY CONFIDENTIAL PROTECTED SDR-RR-13 (Pages 2 through 36 of this response) in a separately sealed envelope that is marked "HIGHLY CONFIDENTIAL PROTECTED MATERIAL". The Company hereby requests that the content of such envelope be placed in the Commission's NON-PUBLIC FOLDERS, and that any employee of the Commission that may have access to such material be directed to maintain its confidentiality. National Fuel will provide copies of such HIGHLY CONFIDENTIAL PROTECTED MATERIAL materials to parties that execute an appropriate Stipulated Protective Agreement or pursuant to a Protective Order issued in this proceeding.

Standard Data Request

Revenue Requirement

Question No. RR-20:

Please state whether the future test year budgeted labor includes any increases or decreases in the number of employees during the future test year. If increases have been budgeted, please state whether the future test year includes budgeted positions which have not been filled.

Response:
To determine the fully projected future test year labor forecast, the Company first started with the actual headcount as of 9/30/25 which was 436 employees. The Company then utilized the approved budgeted headcount of 453 employees for the future test year and added another 6 positions for the FPFTY (459 total). Below is a breakdown of the 23 open positions:

- 9 Union Hourly Field Employees
- 10 Non-Union Hourly Call Center Representatives
- 4 Salaried Employees

As described in RR-21, the Company has developed a methodology to account for the fact that it has historically operated at less than 100% of budgeted headcount. As such, and as detailed in RR-21, the FTY and FPFTY labor forecast was reduced by 9 employees per year to arrive at a headcount level of 444 employees for the FTY and 450 employees for the FPFTY.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-21:

Please explain how the Company has treated routine or normal position vacancies which occur as a result of terminations or retirements in its budgeted labor projections.

Response:

As part of the Company's annual budget process, each department submits a proposed headcount which incorporates the number of individuals necessary to effectively operate the division. As it is understood that there will be some level of terminations and retirements that occur, the Company has developed a labor adjustment that reduces the budgeted labor amount to account for these dynamics. The adjustment considers that staffing levels will not be at 100% as presented in the annual budgets and makes an adjustment on the wage rate assumed for the new hires who are replacing employees who are projected to retire. Details of the adjustment calculation can be found on pg.2 of this response. These adjustment amounts are included in the calculation of the FTY and FPFTY labor figures.

Question No. RR-28:

Please provide the percentage wage rate increases granted by the Company by date and employee category for the three most recent calendar years and the current year to date.

Response:

See attached SDR-RR-28 (pages 1, 2, and 3), which shows the Important Changes pages from the last three Company filings with the PaPUC. During the HTY, the following wage rate increases were noted:

- On December 29, 2024, approximately 109 Pennsylvania Division non-union hourly employees received an average 3.94% wage increase.

- On January 1, 2025, approximately 119 Pennsylvania Division salaried employees received an average 4.22% wage increase.

- On April 13, 2025, approximately 106 union employees in 2154P and 2154PS received an average 2.50% wage increase per the union contract.

- On May 5, 2025, approximately 94 union employees in N.C.F.O/S.E.I.U Chapter 22S received an average 2.00% wage increase per the union contract.

IMPORTANT CHANGES DURING YEAR

Hereunder give particulars concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry must be answered. However, if the word "None" states the fact, it may be used in answering any inquiry.

1. Changes in, and additions to franchise rights; describing (a) the actual consideration given therefor, and (b) from whom acquired. If acquired without the payment of any consideration, state that fact.
2. Acquisition of other companies, reorganization, merger or consolidation with other companies: give names of companies involved, particulars concerning the transactions, and references to Commission authorization, if any.
3. Purchase or sale of substantial operating units, such as generating stations, transmission lines or distribution lines, specifying items, parties, effective dates and also reference to Commission authorization, if any.
4. Important leaseholds (other than leaseholds for natural gas lands) acquired, given, assigned, or surrendered, giving effective dates, lengths of terms, names of parties, rents, Commission authorization, if any, and other conditions.
5. Important extensions of system, giving location, new territory covered by distribution systems, and dates of beginning operations. Give, also, the number of new customers of each class, and for each class of customers the estimated annual revenues.
6. Estimated increase or decrease in annual revenues due to important rate changes, and the approximate extent to which such increase or decrease is reflected in revenues for the reporting year.
7. Important wage scale changes, showing dates of changes, effect on operating expenses for the year, and estimated annual effect of such wage scale changes on operating expenses.
8. Obligations incurred or assumed by respondent as guantantor for the performance by another of any agreement for the performance by another of any agreement or obligation, excluding ordinary commercial paper maturing on demand or not later than one year after date of issue, and giving Commission authorization, if any.
9. Changes in articles of incorporation or amendments to charter: explain the nature and purpose of such changes or amendments.
10. Other important changes not elsewhere provided for.

Inquiries 1 - 6: None

7 On December 31, 2023 approximately 107 Pennsylvania Division non-union hourly employees received an average 3.93% wage increase.

On January 1, 2024 approximately 113 Pennsylvania Division supervisory employees received an average 6.29% wage increase.

On April 14, 2024 approximately 105 union employees in 2154P and 2154PS received an average 2.50% wage increase per the union contract.

On April 28, 2024 approximately 94 union employees in N.C.F.O/S.E.I.U Chapter 22S received an average 2.00% wage increase per the union contract.

On November 15, 2024 approximately 118 Pennsylvania Division supervisory employees received an average 6.90% annual bonus payment.

On December 29, 2024 approximately 109 Pennsylvania Division non-union hourly employees received an average 3.94% wage increase.

Inquiries 8 - 10: None

IMPORTANT CHANGES DURING YEAR

Hereunder give particulars concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry must be answered. However, if the word "None" states the fact, it may be used in answering any inquiry.

1. Changes in, and additions to franchise rights; describing (a) the actual consideration given therefor, and (b) from whom acquired. If acquired without the payment of any consideration, state that fact.
2. Acquisition of other companies, reorganization, merger or consolidation with other companies: give names of companies involved, particulars concerning the transactions, and references to Commission authorization, if any.
3. Purchase or sale of substantial operating units, such as generating stations, transmission lines or distribution lines, specifying items, parties, effective dates and also reference to Commission authorization, if any.
4. Important leaseholds (other than leaseholds for natural gas lands) acquired, given, assigned, or surrendered, giving effective dates, lengths of terms, names of parties, rents, Commission authorization, if any, and other conditions.
5. Important extensions of system, giving location, new territory covered by distribution systems, and dates of beginning operations. Give, also, the number of new customers of each class, and for each class of customers the estimated annual revenues.
6. Estimated increase or decrease in annual revenues due to important rate changes, and the approximate extent to which such increase or decrease is reflected in revenues for the reporting year.
7. Important wage scale changes, showing dates of changes, effect on operating expenses for the year, and estimated annual effect of such wage scale changes on operating expenses.
8. Obligations incurred or assumed by respondent as guantantor for the performance by another of any agreement for the performance by another of any agreement or obligation, excluding ordinary commercial paper maturing on demand or not later than one year after date of issue, and giving Commission authorization, if any.
9. Changes in articles of incorporation or amendments to charter: explain the nature and purpose of such changes or amendments.
10. Other important changes not elsewhere provided for.

Inquiries 1 - 5: None

6 On August 1, 2023, Pennsylvania Distribution implemented a base rate increase designed to increase base delivery revenues by $23 million annually in compliance with the June 15, 2023 Commission Order in Docket No. R-2022-3035730, Pennsylvania Distribution's Base Rate Case. For the period of August 1, 2023 through December 31, 2023, the increase in base delivery revenues was approximately $6 million.

7 On January 1, 2023 approximately 102 Pennsylvania Division non-union hourly employees received an average 3.78% wage increase.

On January 1, 2023 approximately 105 Pennsylvania Division supervisory employees received an average 4.54% wage increase.

On April 30, 2023 approximately 90 union employees in N.C.F.O/S.E.I.U Chapter 22S received an average 2.00% wage increase per the union contract.

On November 15, 2023 approximately 109 Pennsylvania Division supervisory employees received an average 7.48% annual bonus payment.

Inquiries 1 - 6: None

7 On January 1, 2022 approximately 107 Pennsylvania Division supervisory employees received an average 3.43% wage increase.

On January 2, 2022 approximately 99 Pennsylvania Division non-union hourly employees received an average 2.89% wage increase.

On April 1, 2022 approximately 70 Pennsylvania Division supervisory employees received an average 11.28% market adjustment.

On April 10, 2022, approximately 5 union employees in Local 2154P I.B.E.W. received an average 4.00% wage increase and approximately 96 union employees in Local 2154PS I.B.E.W. received an average 18.69% wage increase.

On May 1, 2022, approximately 3 union employees in N.C.F.O/S.E.I.U Chapter 22 received an average 2.00% wage increase and approximately 90 union employees in N.C.F.O/S.E.I.U Chapter 22S received an average 20.08% wage increase.

On May 15, 2022 approximately 102 Pennsylvania Division non-hourly employees received an average 6.88% wage increase.

On May 15, 2022, approximately 82 union employees in N.C.F.O/S.E.I.U Chapter 22S received an average 5.59% wage increase per union negotiations.

On October 16, 2022, approximately 5 union employees in Local 2154P I.B.E.W. received an average 3.00% wage increase and approximately 98 union employees in Local 2154PS I.B.E.W. received an average 3.00% wage increase.

On October 31, 2022 approximately 107 Pennsylvania Division supervisory employees received an average 7.43% bonus payment.

Inquiries 8 - 10: None

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-29:

Please provide an analysis (description, dates and amounts) of any gains or losses on utility property sold for the lesser of the last three years or since the Company's last rate case or anticipated during the FTY. Explain how such amounts have been treated for ratemaking purposes.

Response:

The Company has not sold any major property in the last 3 years.

The normal process for handling gains or losses on the sale of utility property is to credit Gas Plant in Service (Account 101) and debit the Reserve (Account 108) plus the cost of the removal, salvage value, and any proceeds. The gain or loss is then included in the annual depreciation calculation.

Over the past three years, proceeds on the sale of vehicles averaged $320,000 each year. For ratemaking purposes, these proceeds are treated as net salvage.

IMPORTANT IRS REQUIRED NOTICE

Dues payments, contributions or gifts to the American Gas Association are not tax deductible as charitable contributions for federal income tax purposes. However, they may be deductible as ordinary and necessary business expenses subject to restrictions imposed as a result of AGA's lobbying activities as defined by the Budget Reconciliation Act of 1993. AGA estimates that the nondeductible portion of your 2025 dues -- **the portion that is allocable to lobbying is 3.78%.**

AMERICAN GAS ASSOCIATION
2025 DUES RULES

U.S. Energy Utilities

1. AGA Dues for U.S. Energy Utility members are based on the average of 2021, 2022 and 2023 gas operating income* and the following income blocks and rates:

Block 1	First	$ 10,000,000	1.0468%
Block 2	Next	$ 7,500,000	.6710%
Block 3	Next	$ 20,000,000	.4481%
Block 4	Next	$ 40,000,000	.3200%
Block 5	Next	$ 80,000,000	.2550%
Block 6	Over	$ 157,500,000	.1500%

   In applying the above formula, the maximum annual increase for any company equals 7.09%, and the maximum decrease equals 0%.

2. For companies that merge or are acquired whose dues would have decreased, the dues of the resulting company will equal the combined dues of the merging companies immediately prior to the merger for 4 years with no dues increases for increased operating income. After 4 years, the company's dues will be assessed via the formula structure, and any reduction in dues will be phased-in over a 4-year period or until the phased-in amount equals the formula dues, whichever comes first.

3. If necessary, the Board may approve the redistribution of any remaining AGA budget deficit to the members based on each company's share of total dues revenue.

4. For distribution companies with less than 75,000 meters, the maximum distribution company dues are equal to $0.90/meter**. When dues are capped at $0.90/meter, the maximum annual increase/decrease provision does not apply.

5. No company, whose consolidated or subsidiary meets the eligibility standards of a U.S. Energy Utility company, will be allowed to join a different AGA membership class. All regulated U.S. gas distribution subsidiaries of a parent organization must be included in the dues calculations.

6. Minimum Gas Company 2025 dues are $2,538.

*Gas operating income is defined as Line 11, Schedule II of the Uniform Statistical Report.

**Meters are defined as Line 17 (total), Schedule XX of the Uniform Statistical Report.

Please contact Terri Oliva, Chief Financial Officer at (202) 824-7092 regarding any questions about the invoice or rules.

ASC 715 (US GAAP) Actuarial Valuation Report as of September 30, 2025

National Fuel Gas Company Postretirement Benefits

National Fuel Gas Company
November 4, 2025

Contents

1. Highlights 1

2. Accounting information 6

3. Plan assets 24

4. Basis of valuation 32

Appendix A: NPPBC for fiscal year ending September 30, 2025 by division and employment status

Appendix B: Reconciliation of funded status as of September 30, 2025 by division and employment status

Section 1
Highlights

This report presents the results under US accounting standards for the National Fuel Gas Company postretirement medical and life insurance plans for management's use in the preparation of the Company's financial statements for the accounting period October 1, 2024 through September 30, 2025.

Section 2 presents the basic valuation results and disclosures, including the components of the net periodic postretirement benefit cost (NPPBC) and a reconciliation of the financial information. **Section 3** presents information regarding plan assets. **Section 4** describes the actuarial basis on which the results of an application of the standards are founded.

The other comprehensive income/(loss) items for the fiscal year ending September 30, 2025 due to plan changes and net gain/(loss) arising during the year were $0 and $(19,722,202), respectively. The sources of the net loss are described in Section 2.4.

For the fiscal year ending September 30, 2025, reclassification adjustments of other comprehensive income/(loss) recognized as components of NPPBC consist of $(428,689) of prior service cost/(credit) and $37,012 of net loss/(gain).

The total other comprehensive income/(loss) for the fiscal year ending September 30, 2025 is $(20,113,879).

This valuation reflects the impact of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003.

Summary of principal plan results

	Fiscal year ending	
	September 30, 2025	September 30, 2024
Service cost with interest to end of year	$ 518,981	$ 434,446
Net periodic postretirement benefit cost/(income)	(11,515,835)	(13,341,794)
Estimated pay-as-you-go cost	24,040,094	23,547,335

	Fiscal year ending	
	September 30, 2025	September 30, 2024
Accumulated postretirement benefit obligation (APBO)		
Inactives	$ 283,976,937	$ 272,096,832
Actives fully eligible	34,719,004	34,995,147

Important notices

Mercer has prepared this report exclusively for National Fuel Gas Company. Subject to this limitation, National Fuel Gas Company may direct that this report be provided to its auditors in connection with an audit of its financial statements. Mercer is not responsible for use of this report by any other party.

The only purpose of this report is to present Mercer's actuarial estimates of liabilities as of September 30, 2025 for the National Fuel Gas Company postretirement medical and life insurance benefits for National Fuel Gas Company to incorporate, as it deems appropriate, in its financial statements under US accounting standards.

This report may not be used for any other purpose. Mercer is not responsible for the consequences of any unauthorized use. Its contents may not be modified, incorporated into or used in other material, sold or otherwise provided, in whole or in part, to any other person or entity without Mercer's permission.

This report was prepared in accordance with generally accepted actuarial principles and procedures. The results reported herein are based on the assumptions and methods described in Section 4 of this report. The actuarial assumptions were selected by National Fuel Gas Company. Based on the information provided to us, we believe that the actuarial assumptions are reasonable for the purposes described in this report.

All parts of this report, including any documents incorporated by reference, are integral to understanding and explaining its contents. No part may be taken out of context, used, or relied upon without reference to the report as a whole.

Decisions about benefit changes, granting new benefits, investment policy, funding policy, benefit security, and/or benefit-related issues should not be made solely on the basis of this valuation, but only after careful consideration of alternative economic, financial, demographic, and societal factors, including financial scenarios that assume future sustained investment losses.

National Fuel Gas Company is ultimately responsible for selecting the plan's accounting policies, methods, and assumptions. The policies, methods, and assumptions used for the valuation are described in Section 4 of this report. National Fuel Gas Company is solely responsible for communicating to Mercer any changes required to the policies, methods, or assumptions.

National Fuel Gas Company is solely responsible for selecting the plan's investment policies, asset allocations, and individual investments. The Mercer consultants who prepared this report have not provided any investment advice to National Fuel Gas Company.

This report is based on our understanding of applicable law and regulations as of the valuation date. Mercer is not an accountant or auditor and is not responsible for the interpretation of, or compliance with, accounting standards. Citations to and descriptions of accounting standards provided in this report are for reference purposes only. Mercer is not a law firm and this analysis is not intended to be a legal opinion. National Fuel Gas Company should consider securing the advice of legal counsel with respect to any legal matters related to this document and any attachments.

To prepare this report, we have used Mercer's suite of proprietary valuation software and tools. The purpose of a valuation is to measure the plan's liabilities, reflecting the applicable census data and provisions and using the methods and assumptions selected by National Fuel Gas Company based on

the applicable laws, regulations, and other guidance in effect as of the measurement date. We have relied on the experts who developed each of the following:

- Mercer's portfolio return calculator
- Mercer's capital market assumptions
- Mercer's yield curve models
- Mercer's retiree medical trend model
- Mercer's retiree aging model

The first three tools were used in setting the discount rate and in evaluating the reasonableness of the economic assumptions, such as the expected rate of return on plan assets. The final two tools were used in developing the trend table and in developing the aging table.

Actuarial Standard of Practice No. 56 requires the actuary to identify and disclose any material inconsistencies among actuarial assumptions, and, for assumptions that are not prescribed by applicable law, the reason for such inconsistencies. To our knowledge, there are no material inconsistencies in assumptions.

National Fuel Gas Company should notify Mercer promptly after receipt of this report if it disagrees with anything contained herein or is aware of any information that would affect the results of the valuation that has not been communicated to Mercer or incorporated herein. This report will be deemed final and acceptable to National Fuel Gas Company unless such notice is promptly provided to Mercer.

Professional qualifications

We are available to answer any questions on the material contained in this report or to provide explanations or further detail as may be appropriate. Collectively, the undersigned credentialed actuaries meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained in this report. We are not aware of any direct or material indirect financial interest or relationship, including investment consulting or other services provided to National Fuel Gas Company by the actuaries signing this report that could create a conflict or impair the objectivity of this work. To the extent that other Mercer professionals have provided investment services to National Fuel Gas Company, we do not believe those services would result in a conflict of interest nor affect the objectivity of this work.

Section 2
Accounting information

US accounting standards require that certain information about postretirement benefits other than pension benefits be disclosed in the footnotes to the sponsor's financial statements. The disclosures include a statement of the net periodic postretirement benefit cost, a reconciliation of the plan's funded status, a statement of assumptions and methods, and benefit payments expected to be paid in the next ten years. Presented in this section are illustrations of this information.

Section 2.1 Disclosure of net periodic postretirement benefit cost for fiscal year ending September 30, 2025

Section 2.2 Reconciliation of funded status

Section 2.3 Disclosure of sensitivity to changes in health care cost trend rates for fiscal year ending September 30, 2025

Section 2.4 Supporting documentation

A. Reconciliation of cumulative employer contributions in excess of net periodic postretirement benefit cost during fiscal year ending September 30, 2025
B. Determination of net (gain)/loss for fiscal year ending September 30, 2025
C. Effect of assumption changes for fiscal year ending September 30, 2025
D. Amortization of (gains)/losses applicable to entities other than NY Distribution Corporation for the period October 1, 2024 to September 30, 2025
E. Amortization of vintage (gains)/losses applicable to NY Distribution Corporation for the period October 1, 2024 to September 30, 2025
F. Amortization of prior service (credit)/cost for fiscal year ending September 30, 2025
G. Other changes recognized in other comprehensive income

Section 2.5 Employer disclosure information

Section 2.1: Net periodic postretirement benefit cost for fiscal year ending September 30, 2025

		Fiscal year ending September 30, 2025
1.	**Service cost**	$ 518,981
2.	**Interest cost**	$ 14,501,221
3.	**Actual return on assets**	
	a. Expected return	$ 26,144,360
	b. Asset (gain)/loss	2,650,462
	c. Actual return (a. – b.)	$ 23,493,898
4.	**Other NPPBC components**	
	a. Amortization of prior service (credit)/cost	$ (428,689)
	b. Amortization of (gain)/loss	37,012
	c. Deferral of asset (gain)/loss	2,650,462
	d. Total (a. + b. - c.)	$ (3,042,139)
5.	**Net periodic postretirement benefit cost** (1. + 2. – 3.c. + 4.d.)	**$ (11,515,835)**

Section 2.2: Reconciliation of funded status

		Fiscal year ending	
		September 30, 2025	September 30, 2024
1.	Accumulated postretirement benefit obligation	$ 330,583,707	$ 321,024,866
2.	Fair value of assets	496,105,580	496,064,799
3.	Funded status (2. – 1.)	$ 165,521,873	$ 175,039,933
4.	Net amount recognized	$ 165,521,873	$ 175,039,933
Amounts not yet reflected in net periodic postretirement benefit cost and included in accumulated other comprehensive income			
5.	Prior service credit/(cost)	$ 257,210	$ 685,899
6.	Accumulated gain/(loss)	(19,813,186)	(127,996)
7.	Accumulated other comprehensive income/(loss) (5. + 6.)	$ (19,555,976)	$ 557,903
8.	Cumulative employer contributions in excess of net periodic postretirement benefit cost	$ 185,077,849	$ 174,482,030
9.	**Net amount recognized in statement of financial position** (7. + 8.)	**$ 165,521,873**	**$ 175,039,933**

Section 2.3: Supporting documentation

Sensitivity to changes in health care cost trend rates for fiscal year ending September 30, 2025

	Valuation trend	Valuation trend +1%	Difference	% change
The aggregate of the service cost and interest cost	$ 15,020,202	$ 16,800,767	$ 1,780,565	11.85%
Accumulated postretirement benefit obligation as of September 30, 2025	$ 330,583,707	$ 362,507,371	$ 31,923,664	9.66%

	Valuation trend	Valuation trend -1%	Difference	% change
The aggregate of the service cost and interest cost	$ 15,020,202	$ 13,582,616	$ (1,437,586)	(9.57)%
Accumulated postretirement benefit obligation as of September 30, 2025	$ 330,583,707	$ 302,979,911	$ (27,603,796)	(8.35)%

Trend rate assumptions

Health care cost trend rates on eligible charges as of September 30, 2025	Medical		Prescription drug	Medicare Part B premium	Retiree drug subsidy
	Pre 65	Post 65			
Initial trend (2025)	7.25%	5.75%	11.75%	5.75%	4.00%
Ultimate trend	4.00%	4.00%	4.00%	4.00%	4.00%
Number of years to ultimate trend	25	25	25	25	25

Section 2.4: Supporting documentation

A. Reconciliation of cumulative employer contributions in excess of net periodic postretirement benefit cost

			Fiscal year ending September 30, 2025
1.	Cumulative employer contributions in excess of net periodic postretirement benefit cost at September 30, 2024	$	174,482,030
2.	Employer contributions during fiscal 2025		593,848
3.	Net periodic postretirement benefit (cost)/income for fiscal 2025		11,515,835
4.	Subsidy payment received		(1,513,864)
5.	**Cumulative employer contributions in excess of net periodic postretirement benefit cost at September 30, 2025** (1. + 2. + 3. + 4.)	**$**	**185,077,849**

The net contributions shown in item 2 above include funding contributions and benefit payments made by National Fuel Gas Company on a pay-as-you-go basis as follows:		
Contributions to trust	$	0
Benefits paid by employer on a pay-as-you-go basis		593,848
Total	$	593,848

B. Determination of net (gain)/loss for fiscal year ending September 30, 2025

Components of net (gain)/loss for fiscal year ending September 30, 2025		
1. Change in demographics/claims experience		
a. Projected APBO as of September 30, 2025	$	312,004,974
b. APBO as of September 30, 2025 before change in assumptions		322,507,932
c. (Gain)/loss from change in demographics/claims[1] (b. – a.)	$	10,502,958
2. Change in assumptions		
a. APBO as of September 30, 2025 before change in assumptions	$	322,507,932
b. APBO as of September 30, 2025 after change in assumptions		330,583,707
c. (Gain)/loss due to assumption changes (b. – a.)	$	8,075,775
3. Net benefit payments		
a. Expected net benefit payments for fiscal year ending September 30, 2025	$	24,040,094
b. Actual net benefit payments for fiscal year ending September 30, 2025		22,533,101
c. (Gain)/loss from benefit payments (b. – a.)	$	(1,506,993)
4. Investment results		
a. Expected return on assets for fiscal year ending September 30, 2025	$	26,144,360
b. Actual return on assets for fiscal year ending September 30, 2025		23,493,898
c. (Gain)/loss from investment results (a. – b.)	$	2,650,462

Summary of net (gain)/loss arising during 2025		
1. Change in demographics/claims experience	$	10,502,958
2. Change in assumptions		8,075,775
3. Net benefit payments		(1,506,993)
4. Investment results		2,650,462
Net (gain)/loss arising during 2025 (1. + 2. + 3. + 4.)	**$**	**19,722,202**

(Gain)/loss balance as of September 30, 2025		
1. (Gain)/loss balance as of September 30, 2024	$	127,996
2. Amount amortized during 2025		37,012
3. Net (gain)/loss arising during 2025		19,722,202
(Gain)/loss balance as of September 30, 2025 (1. – 2. + 3.)	**$**	**19,813,186**

[1] Reflects a loss of $4,077,506 due to demographic experience and a loss of $6,425,452 due to claims experience.

C. Effect of assumption changes for fiscal year ending September 30, 2025

The effective discount rate for determining the benefit obligation increased from 4.98% per annum as of September 30, 2024 to 5.30% per annum as of September 30, 2025. This assumption change decreased the APBO by $9,913,263 as of the end of the period. Effective September 30, 2025, the mortality improvement projection scale assumption was updated to reflect the publication of additional mortality data. This assumption change decreased the APBO by $243,484 as of the end of the period. Effective September 30, 2025, the trend assumption was updated to better reflect anticipated experience. This assumption change increased the APBO by $18,232,522 as of the end of the period.

D. Amortization of (gains)/losses applicable to entities other than NY Distribution Corporation for the period October 1, 2024 to September 30, 2025

			Total	PA Distribution	Supply	SRC	Parent	Empire Pipeline	Midstream
1.	**Accumulated postretirement benefit obligation (APBO)**	$	142,264,070	57,874,500	80,878,458	1,712,928	1,614,830	0	183,354
2.	**Fair value of plan assets**	$	215,539,005	106,314,575	109,224,430	0	0	0	0
3.	**Prior service (credit)/cost**	$	(282,708)	(116,204)	(162,298)	(3,702)	(504)	0	0
4.	**Cumulative employer contributions in excess of net periodic postretirement benefit cost**	$	93,313,270	61,532,824	36,237,633	(1,969,886)	(2,041,074)	(7,712)	(438,515)
5.	**Unrecognized (gain)/loss** (1. – 2. – 3. + 4.)	$	20,321,043	13,208,953	8,053,959	(253,256)	(425,740)	(7,712)	(255,161)
6.	**Market-related value of plan assets (MRV)**	$	215,539,005	106,314,575	109,224,430	0	0	0	0
7.	**Excess of fair value over market-related value** (2. – 6.)		0	0	0	0	0	0	0
8.	**Unrecognized (gain)/loss potentially subject to amortization** (5. + 7.)			13,208,953	8,053,959	(253,256)	(425,740)	(7,712)	(255,161)
9.	**Corridor (calculated separately for union and nonunion based on 10% of the larger of APBO or MRV)**			10,631,458	10,922,443	171,293	161,483	0	18,335
10.	**Unrecognized (gain)/loss subject to amortization**[2]			3,435,261	1,317,990	(81,963)	(264,257)	(7,712)	(236,826)
11.	**Average future service of active participants**			4.06	4.06	4.06	4.06	4.06	4.06
12.	**Weighted amortization amount** (10. ÷ 11.)	**$**	**1,025,244**	**846,123**	**324,628**	**(20,188)**	**(65,088)**	**(1,900)**	**(58,331)**

[2] Generally, this is the excess of the absolute value of 8. over 9. However, the unrecognized (gain)/loss subject to amortization is determined separately for collectively and non-collectively bargained employees, which can produce a different result. See Appendix A for additional details.

E. Amortization of vintage (gains)/losses applicable to NY Distribution Corporation for the period October 1, 2024 to September 30, 2025

	Summary for fiscal year 2025		
	Balance at beginning of period	Amount recognized	Balance at end of period
Prior vintage year	$ 1,830,358	1,830,358	$ 0
Vintage year 1	7,738,368	3,869,186	3,869,182
Vintage year 2	(12,999,293)	(4,333,099)	(8,666,194)
Vintage year 3	(3,194,472)	(798,618)	(2,395,854)
Vintage year 4	10,870,194	2,174,039	8,696,155
Vintage year 5	(865,995)	(144,333)	(721,662)
Vintage year 6	(28,132,320)	(4,018,903)	(24,113,417)
Vintage year 7	1,565,223	195,653	1,369,570
Vintage year 8	(5,580,399)	(620,044)	(4,960,355)
Vintage year 9	8,575,289	857,529	7,717,760
Vintage year 10	N/A	N/A	9,614,932
Total	**$ (20,193,047)**	**(988,232)**	**$ (9,589,883)**

The base associated with vintage year 10 was established as of September 30, 2025, the base associated with vintage year 9 was established as of September 30, 2024, etc.

F. Amortization of prior service (credit)/cost for fiscal year ending September 30, 2025

Description	Amortization period			Balances		Payment
	Date created	Initial years	Years left	Initial	Outstanding	
Prior service (credit)/cost						
Plan amendment – 2011	10/1/2011	14.60	0.60	$ (6,258,856)	$ (257,210)	$ (257,210)
Total				**$ (6,258,856)**	**$ (257,210)**	**$ (257,210)**

Prior service (credit)/cost amount		
1. Amount of base	$	(6,258,856)
2. Amortization period		14.60 years
3. Effective date		10/01/2011

Amortization schedule

Year	Beginning balance	Amortization amount	Ending balance
2011	$ 0	$ 0	$ (6,258,856)
2012	(6,258,856)	(428,689)	(5,830,167)
2013	(5,830,167)	(428,689)	(5,401,478)
2014	(5,401,478)	(428,689)	(4,972,789)
2015	(4,972,789)	(428,689)	(4,544,100)
2016	(4,544,100)	(428,689)	(4,115,411)
2017	(4,115,411)	(428,689)	(3,686,722)
2018	(3,686,722)	(428,689)	(3,258,033)
2019	(3,258,033)	(428,689)	(2,829,344)
2020	(2,829,344)	(428,689)	(2,400,655)
2021	(2,400,655)	(428,689)	(1,971,966)
2022	(1,971,966)	(428,689)	(1,543,277)
2023	(1,543,277)	(428,689)	(1,114,588)
2024	(1,114,588)	(428,689)	(685,899)
2025	(685,899)	(428,689)	(257,210)
2026	(257,210)	(257,210)	0

G. Other changes recognized in other comprehensive income

	Fiscal year ending September 30, 2025	Fiscal year ending September 30, 2024
Prior service cost/(credit) arising during period	$ 0	$ 0
Net loss/(gain) arising during period	19,722,202	16,301,573
Amortizations		
Prior service (cost)/credit	428,689	428,689
(Loss)/gain	(37,012)	2,266,499
Total recognized in other comprehensive (income)/loss	**$ 20,113,879**	**$ 18,996,761**
Total recognized in NPPBC and other comprehensive (income)/loss	**$ 8,598,044**	**$ 5,654,967**

Section 2.5: Employer disclosure information

	Fiscal year ending September 30, 2025	Fiscal year ending September 30, 2024
Change in benefit obligation		
Benefit obligation at beginning of period	$ 321,024,866	$ 274,278,704
Service cost	518,981	434,446
Interest cost	14,501,221	15,560,929
Plan participants' contributions	3,597,332	3,401,115
Retiree drug subsidy receipts[3]	1,513,864	1,207,655
Actuarial (gain)/loss	17,071,740	54,441,980
Amendments	0	0
Special termination benefits	0	0
Benefits paid	(27,644,297)	(28,299,963)
Benefit obligation at end of period	**$ 330,583,707**	**$ 321,024,866**
Change in plan assets		
Fair value of plan assets at beginning of period	$ 496,064,799	$ 455,702,334
Actual return on plan assets	23,493,898	64,782,388
Employer contributions	593,848	478,925
Plan participants' contributions	3,597,332	3,401,115
Benefits paid	(27,644,297)	(28,299,963)
Fair value of assets at end of period	**$ 496,105,580**	**$ 496,064,799**
Funded status	**$ 165,521,873**	**$ 175,039,933**
Amounts recognized[4] in the statement of financial position consist of		
Noncurrent assets	$ 169,227,570	$ 178,551,045
Current liabilities	(224,452)	(220,156)
Noncurrent liabilities	(3,481,245)	(3,290,956)
Net amount recognized at year-end	**$ 165,521,873**	**$ 175,039,933**

[3] National Fuel Gas Company recognizes Retiree Drug Subsidy (RDS) receipts as they are received.

[4] Amounts are determined on a company by company basis and then aggregated.

	Fiscal year ending September 30, 2025	Fiscal year ending September 30, 2024
Amounts not yet reflected in net periodic benefit cost and included in accumulated other comprehensive income/(loss)		
Transition asset/(obligation)	$ 0	$ 0
Prior service credit/(cost)	257,210	685,899
Accumulated gain/(loss)	(19,813,186)	(127,996)
Accumulated other comprehensive income/(loss)	**$ (19,555,976)**	**$ 557,903**
Cumulative employer contributions in excess of NPPBC	185,077,849	174,482,030
Net amount recognized in statement of financial position	**$ 165,521,873**	**$ 175,039,933**
Weighted-average assumptions used to determine benefit obligations as of September 30		
Effective discount rate	5.30%	4.98%
Average rate of compensation increase	N/A	N/A
	See Exhibit A	See Exhibit B
Components of net periodic benefit cost		
Service cost	$ 518,981	$ 434,446
Interest cost	14,501,221	15,560,929
Expected return on plan assets	(26,144,360)	(26,641,981)
Amortization of transition (asset)/obligation	0	0
Amortization of prior service (credit)/cost	(428,689)	(428,689)
Amortization of actuarial (gain)/loss	37,012	(2,266,499)
Net periodic benefit cost	**$ (11,515,835)**	**$ (13,341,794)**
Weighted-average assumptions used to determine net periodic postretirement benefit cost		
Effective discount rate for benefit obligation	4.98%	5.99%
Effective rate for interest on benefit obligation	4.69%	5.93%
Effective discount rate for service cost	5.21%	5.99%
Effective rate for interest on service cost	5.14%	6.01%
Expected long-term rate of return on plan assets	5.40%	6.00%
Average rate of compensation increase	N/A	N/A
Health care trend rates	See Exhibit B	See Exhibit C

	Fiscal year ending September 30, 2025	Fiscal year ending September 30, 2024
Expected cash flows		
Expected employer contributions for fiscal year ending September 30, 2026	$ 224,452	
Expected future benefit payments, net of retiree contributions and Medicare subsidy receipts, for fiscal year ending:		
September 30, 2026	$ 25,339,394	
September 30, 2027	25,981,651	
September 30, 2028	26,482,955	
September 30, 2029	26,767,306	
September 30, 2030	26,837,918	
Next five years	127,760,656	
Expected Medicare subsidy receipts for fiscal year ending:		
September 30, 2026	$ (1,559,756)	
September 30, 2027	(1,574,137)	
September 30, 2028	(1,576,905)	
September 30, 2029	(1,576,656)	
September 30, 2030	(1,568,152)	
Next five years	(7,535,970)	
Effect of one percentage point change in the assumed health care cost trend rates		
One percentage point increase		
Effect on total of service and interest cost components	$ 1,780,565	$ 1,676,000
Effect on postretirement benefit obligation	31,923,664	32,128,111
One percentage point decrease		
Effect on total of service and interest cost components	$ (1,437,586)	$ (1,408,162)
Effect on postretirement benefit obligation	(27,603,796)	(27,699,518)

	Fiscal year ending September 30, 2025	Fiscal year ending September 30, 2024
Cumulative employer contributions in excess of net periodic benefit cost		
Amount as of beginning of year	$ 174,482,030	$ 161,868,966

Section 4

Basis of valuation

In this section, the basis of the valuation is presented. The provisions of the plan and the participant census are the foundation of the valuation, since these are the present facts upon which the projection of benefit payments depends. The valuation is based on the premise that the plan will continue in existence, so that future events must also be considered. These future events are assumed to occur in accordance with the actuarial assumptions and methods described in this section.

Section 4.1 Plan participants

Section 4.2 Actuarial basis

Section 4.3 Summary of plan provisions

Section 4.4 Claim cost development and medical rate information

Section 4.1: Plan participants

Mercer has used and relied on participant data supplied by National Fuel Gas Company. National Fuel Gas Company is responsible for ensuring that the participant data provides an accurate description of all persons who are participants under the terms of the plan or otherwise entitled to benefits as of January 1, 2025 and that the data is sufficiently comprehensive and accurate for its intended purpose. If the data supplied is not sufficiently comprehensive and accurate for its intended purpose, the results of our calculations may differ significantly from the results that would be obtained with such data. Although Mercer has reviewed the suitability of the data for its intended use in accordance with Actuarial Standard of Practice No. 23, Mercer has not verified or audited any of the data or information provided.

Section 4.2: Actuarial basis

An actuarial valuation is only a snapshot of a plan's estimated financial condition at a particular point in time; it does not predict a plan's future financial condition or its ability to pay benefits in the future and does not provide any guarantee of future financial soundness of a plan. Over time, a plan's total cost will depend on a number of factors, including the amount of benefits the plan pays, the number of people paid benefits, the period of time over which benefits are paid, plan expenses, and the amount earned on any assets invested to pay benefits. These amounts and other variables are uncertain and unknowable at the valuation date.

Because modeling all aspects of a situation is not possible or practical, we may use summary information, estimates, or simplifications of calculations to facilitate the modeling of future events in an efficient and cost-effective manner. We may also exclude factors or data that, if used, would not, in our judgment, significantly affect our results. Use of such simplifying techniques does not, in our judgment, affect the reasonableness of valuation results for a plan.

Valuations do not affect the ultimate cost of a plan, only the timing of when benefit costs are recognized. Cost recognition occurs over time. If the costs recognized over a period of years are lower or higher than necessary, for whatever reason, normal and expected practice is to adjust future cost levels to recognize the entire cost of a plan over time.

A. Accounting methods

Actuarial cost method

Benefit obligations are estimated using the Projected Unit Credit method. The objective under this method is to expense each participant's benefits under the plan as they would accrue, taking into consideration the plan's benefit allocation formula. Thus, the estimated total benefit to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future service.

An individual's estimated accrued benefit for valuation purposes is the projected benefit at full eligibility date, or current age if later, multiplied by the ratio of service at the valuation date over service at full eligibility date. Service for this purpose is measured from date of hire. The portion of the present value which is attributed to the current year is the service cost. The portion of the present value attributed to prior periods is the accumulated postretirement benefit obligation (APBO) or accrued liability. The APBO can also be viewed as the accumulated value of past service costs. This amount includes the entire present value for actives who are eligible to retire and those who are already retired.

The plan's service cost is estimated by combining the individual service costs, and the plan's APBO is estimated by combining the individual benefit obligations.

Asset method

The market-related value of assets is equal to the market value.

Changes since prior valuation

None.

B. Accounting policies

Measurement date

September 30.

Amortization of prior service costs/credits
Prior service costs/credits that arise due to a plan change during a fiscal year are amortized on a straight-line basis over the average remaining service period to full eligibility of participants who are expected to receive a benefit and are active at the date of the plan amendment.

Amortization of gains/losses
New York Distribution: Gains/losses are amortized on a vintage-year basis over 10 years. This is the method prescribed by the New York Public Service Commission in their policy statement for rate reimbursement in New York and is acceptable under US GAAP since it results in more rapid amortization of gains/losses than the minimum imposed under the standards.

All entities other than New York Distribution: Gains/losses in excess of 10% of the greater of the APBO or market-related value of plan assets (determined solely with respect to those entities) are amortized on a straight-line basis over the average future working lifetime of the employees of those entities expected to receive benefits under the plan.

Changes since prior valuation
None.

C. Valuation procedures

Financial and claims data
We have used financial data, claims, and premiums supplied by the plan sponsor, without further audit. Customarily, this information would not be verified by a plan's actuary. We have reviewed the information for internal consistency and we have no reason to doubt its substantial accuracy.

Determination of benefit obligations
The benefit obligations are determined by discounting each year's cash flows using the corresponding rate from the Above Mean Mercer Yield Curve as of the measurement date.

Calculation of interest
Interest on the benefit obligations for purposes of determining the interest cost and service cost components of the net periodic postretirement benefit cost is calculated by applying interest to the present value of the expected payment at each payment date. For this purpose, interest is determined using the same spot rate used to determine the present value of the associated payment.

Effective discount rate
The effective discount rate is the single equivalent rate such that the present value of the plan's APBO cash flows using the single rate equals the present value of those cash flows using the corresponding spot rates along the Above Mean Mercer Yield Curve. The same process is applied to the plan's service cost cash flows to determine the effective discount rate associated with the service cost.

Effective rate for interest
The effective rate for interest on the benefit obligation is the single equivalent rate such that interest on the plan's APBO using the single rate equals the sum of the interest on each year's discounted cash flow determined using the corresponding spot rates along the Above Mean Mercer Yield Curve. The same process is applied to the plan's discounted service cost cash flows to determine the effective rate for interest on the service cost.

Projection of obligations

APBO and service cost cash flows are determined as of the census date reflecting disclosed assumption changes and then adjusted to the measurement date to reflect additional service accruals during the interim period and to exclude payments expected to be made prior to the measurement date. Differences between actual and expected benefit payments for the period between the census date and the measurement date are recognized proportionally in all future cash flows.

Changes since prior valuation

None.

D. Actuarial assumptions

To prepare an actuarial valuation, assumptions are used in a forward-looking financial and demographic model to present a single scenario from a wide range of possibilities. The future is uncertain and the plan's actual experience will differ from those assumptions. These differences may be significant or material because actuarial estimates can be very sensitive to the assumptions made and, in some cases, to the interaction between the assumptions.

Different assumptions or scenarios within the range of possibilities may also be reasonable and results based on alternative assumptions would be different. As a result of the uncertainty inherent in a forward-looking projection over a very long period of time, no one projection is uniquely "correct" and many alternative projections of the future could also be regarded as reasonable. Two different actuaries could, quite reasonably, arrive at different results based on the same data and different views of the future. A "sensitivity analysis" shows the degree to which results would be different if alternative assumptions are used for the actuarial estimates. At National Fuel Gas Company's request, Mercer is available to perform such an analysis.

Assumptions may change from one valuation to the next because of changes in requirements, plan experience, changes in expectations about the future, and other factors. A change in assumptions is not an indication that prior assumptions were unreasonable when made.

Economic assumptions

Effective discount rate for benefit obligation

- 5.99% per annum for determining the 2024 net periodic postretirement benefit cost.
- 4.98% per annum for determining the September 30, 2024 benefit obligation and the 2025 net periodic postretirement benefit cost.
- 5.30% per annum for determining the September 30, 2025 benefit obligation.

Effective rate for interest on the benefit obligation

- 5.93% per annum for determining the 2024 net periodic postretirement benefit cost.
- 4.69% per annum for determining the 2025 net periodic postretirement benefit cost.

Effective discount rate for service cost

- 5.99% per annum for determining the 2024 net periodic postretirement benefit cost.
- 5.21% per annum for determining the 2025 net periodic postretirement benefit cost.

Effective rate for interest on the service cost

- 6.01% per annum for determining the 2024 net periodic postretirement benefit cost.
- 5.14% per annum for determining the 2025 net periodic postretirement benefit cost.

Rationale: The effective rates are determined using Mercer's proprietary Above Mean Yield Curve, under which the plan's projected benefit payments are matched against a series of spot rates derived from a market basket of high-quality fixed income securities.

Expected long-term rate of return on assets

- 6.00% per annum for determining the 2024 net periodic postretirement benefit cost.
- 5.40% per annum for determining the 2025 net periodic postretirement benefit cost.

Rationale: To develop the expected rate of return on assets, the Company considered the current level of expected returns on risk-free investments (primarily government bonds), the historical level of the risk premium associated with the other asset classes in which the portfolio is invested, and the expectations for future returns of each asset class. The expected rate of return for each asset class was then weighted based on the asset allocation to develop the expected rate of return on assets for the plan.

Salary increases

Age	Rate
25	9.50%
30	8.50
35	6.50
40	6.00
45	5.50
50	5.00
55	4.50
60	4.00

Rationale: These rates have been used historically and have not produced significant gains or losses.

Demographic assumptions

Mortality

- Pri-2012 mortality tables (with no collar adjustment), with separate rates for males/females, healthy/disabled participants, and annuitants/non-annuitants, projected with generational improvement using scale MSS-2023 for determining the 2024 net periodic postretirement benefit cost.
- Pri-2012 mortality tables (with no collar adjustment), with separate rates for males/females, healthy/disabled participants, and annuitants/non-annuitants, projected with generational improvement using Scale MSS-2024 for determining the September 30, 2024 benefit obligation and the 2025 net periodic postretirement benefit cost.
- Pri-2012 mortality tables (with no collar adjustment), with separate rates for males/females, healthy/disabled participants, and annuitants/non-annuitants, projected with generational improvement using Scale MSS-2025 for determining the September 30, 2025 benefit obligation.

Rationale: Mortality is based on the Society of Actuaries' Pri-2012 tables. The rates based on the full data set are used because the plan's participants are a mix of blue-collar and white-collar individuals. Future mortality improvement is based on the 2025 Trustees Report of the Social Security Administration, as reflected in the Mercer-developed MSS-2025 improvement scale. The improvement rates implied by the report's mortality projections are based on an analysis of the specific factors that impact mortality improvement as well as potential long-term trends for those factors.

Termination rates

0.50% of the active population is assumed to terminate employment annually.

Retirement rates

Age	Rate
55 - 56	7%
57 - 59	10
60 - 61	25
62	75
63 - 64	50
65	100

Rationale: These rates have been used historically and have not produced significant gains or losses.

Disability incidence

1985 pension disability class 1 incidence rates.

Spouse assumptions

80% of active male participants and 60% of active female participants are assumed to be married, and a female is assumed to be three years younger than her spouse. Actual spousal data was used for participants in pay status if available.

Participation	**Medical and Drug coverage:** 100% of eligible retirees are assumed to elect coverage. 100% of retirees electing coverage who have spouses are assumed to elect spousal coverage. It is assumed that upon retiring, participants remain in the same medical plan category (PPO, traditional, or Independent Health). For participants who do not have coverage as active employees, it is assumed that they elect coverage under the traditional plan upon retirement. Upon reaching age 65, it is assumed that participants in the PPO plan elect a traditional plan, and that all others remain in the same plan category (traditional or Independent Health). Further, it is assumed that actives in medical grid numbers 7, 8, 11, and 12 will remain in those groups at retirement and, therefore, receive prescription drug coverage through the Medical Plan. For all other eligible actives, it is assumed that they will have prescription drug coverage under a 3-tier plan upon retirement. **Life Insurance coverage:** It is assumed that upon retiring, all employees who are eligible for Basic Life Insurance will be covered. Only those employees who elect Supplemental Life Insurance as active employees are assumed to elect Supplemental Life Insurance upon retirement. Note that National Fuel Gas Company does not subsidize any portion of the Supplemental Life Insurance with the exception of a small group of retirees hired prior to 1978.

Rationale: Assumed participation is based on recent plan experience and the options available to retirees.

Claims assumptions

Medical and prescription drug starting claim costs

The starting claim costs for National Fuel Gas Company's Independent Health Plan are based on the premium rates shown in Section 4.4 since that plan is community rated. Since all other plans are self-insured, the average per person gross costs of medical and prescription drug benefits, excluding expenses, were derived from claims data provided by National Fuel Gas Company. These starting claim costs are shown below. A description of the methodology used to develop these claim costs is contained in Section 4.4.

Annual age 65 per capita claim costs

	2024 Disclosure/ 2025 NPPBC	2025 Disclosure/ 2026 NPPBC
Prescription drug plans		
$0/$1 Plan and $0/$2 Plan	$4,484	$4,974
$5/$10 Plan	$4,191	$4,648
Tier Plans[7]	$3,366	$3,733
Rx for grids 7/8/11/12	$3,834	$4,253

Medical plans	Pre 65	Post 65	Pre 65	Post 65
PPO Plan	$8,629	$2,136	$8,496	$2,394
Traditional Plans[8]	$8,865	$2,136	$8,728	$2,394
Forever Blue	N/A	$1,580	N/A	$1,687
Independent Health	$7,992	$2,338	$8,639	$2,394

Rationale: The development of the average annual age 65 per capita claim costs is described in Section 4.4.

[7] Includes prescription drug plans with tier copayments of $12.50/$24/$40 for generic/brand/specialty.

[8] For participants in the medical plan "comprehensive with Rx" (medical grids 7, 8, 11, and 12), the drug portion of the benefit was valued separately using the claim costs shown for that plan in the prescription drug section, above.

Medicare reform

The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (the "Act") is reflected assuming that National Fuel Gas Company will continue to provide a post-65 prescription drug benefit to retirees that is at least actuarially equivalent to Medicare Part D and that National Fuel Gas Company will receive the federal subsidy for all retirees and their spouses.

The Act was recognized for the 2024 disclosure and 2025 net periodic postretirement benefit cost by assuming an annual savings of $548 at age 65, and for the 2025 disclosure by assuming an annual savings of $537 at age 65.

Rationale: The RDS assumption was developed based on actual claims and enrollment from the 2021, 2022 and 2023 RDS applications, trended forward to the valuation year, and adjusted for plan design changes and participation.

Medicare Part B premium

In addition to medical costs, National Fuel Gas Company pays the Medicare Part B premium for retirees and their spouses (except for post-12/31/2000 non-union and IBEW Local 2199 and 2199-J retirements) until the death of the retiree. The assumed Medicare Part B premiums are shown below.

	2024 Disclosure/ 2025 NPPBC	2025 Disclosure/ 2026 NPPBC
Monthly	$174.70	$185.00
Annual	$2,096.40	$2,220.00

Rationale: The 2025 Medicare Part B premium rate is the rate as announced by the Centers for Medicare & Medicaid Services.

Life insurance costs

Life insurance coverage is provided to eligible retirees as summarized in Section 4.3. Note that National Fuel Gas Company does not subsidize any portion of the Supplemental Life Insurance with the exception of a small group of retirees hired prior to 1978.

Administrative expenses

Expenses are assumed to be equal to the following, where percentages represent a percentage of the respective claim costs:

	2024 Disclosure/ 2025 NPPBC	2025 Disclosure/ 2026 NPPBC
Life insurance	10%	10%
Medical[9]	$993.41 per contract	$1,104.34 per contract
Drug	0% (Included in claim costs)	0% (Included in claim costs)

Administrative expenses on a per capita basis for the Medical Plan are expected to grow at 4% per year.

Life Insurance expenses are assumed to remain at 10% of claims.

Rationale: Assumed administrative expenses for the life insurance are based on the actuary's experience with similar plans. Assumed administrative expenses for the self-insured medical plans are based on administrative fees provided by National Fuel Gas. The premiums for insured coverage are assumed to include administrative fees.

Retiree contributions

See Section 4.4.

For non-grandfathered[10] participants, the contribution amounts shown in Section 4.4 are allocated to medical versus drug coverage as follows:

	Medical	Drug
Pre-65	61.2%	38.8%
Post-65	39.6%	60.4%

Assumed retiree contributions are based on per capita claims costs and the provisions of the plan.

Future increases in retiree contribution levels

For grandfathered participants, no increases in retiree contribution amounts are assumed.

For non-grandfathered participants, retiree contribution amounts are assumed to increase at assumed health care trend rates.

Rationale: This assumption is based on our understanding that future increases to healthcare costs for non-grandfathered participants will be passed on to the participants.

[9] For the 2024 disclosure/2025 NPPBC, this represents the weighted administrative expense assumption for the 2024 calendar year, based on $990.05 per non-executive contract and $2,505.84 per executive contract. For the 2025 disclosure/2026 NPPBC, this represents the weighted administrative expense assumption for the 2025 calendar year, based on $1,100.54 per non-executive contract and $2,769.72 per executive contract.

[10] Participants who are grandfathered, and therefore unaffected by the 2008 and 2009 plan changes, include those already retired at the plan change date for their respective employee group. All others are non-grandfathered.

Death benefits

Medicare Part B reimbursement benefits cease upon death of the retiree. Spouses are assumed to continue medical and prescription drug coverage for life, 3 years, or not at all (COBRA), depending on their eligibility as defined in Section 3.3. Spouses of post-12/31/2000 non-union and IBEW Local 2199 and 2199-J retirees continue to contribute the amount the retiree was contributing before death. For all others, the spousal death benefit coverage is offset by the widow rate reimbursement identified in Section 4.3. Widow rates are increased in the future for health care trend.

Rationale: This assumption has been used historically and has not produced significant gains or losses.

Aging

The Medical Aging Factors shown below apply to all medical plans offered. The Drug Aging Factors apply to all drug plans offered.

Attained age	Medical Aging Factor	Drug Aging Factor
55	0.680	0.780
60	0.820	0.899
65	1.000	1.000
70	1.130	1.077
75	1.245	1.097
80	1.330	1.097
85	1.370	1.097
90+	1.390	1.097

Rationale: The aging assumption was based on a review of health care costs by age sponsored by the Society of Actuaries titled ***Health Care Costs – From Birth to Death*** *and published in June 2013 as well as Mercer and vendor databases of prescription drug cost results by age.*

Health care trend

- Trend rates for determining the benefit obligation at September 30, 2025:

	Medical				
Year	Pre-65	Post-65	Drug	Medicare Part B	Retiree drug subsidy

Rationale: Initial rates are based on market assessments and surveys and take into account actual historical experience, expected unit cost information, changes in utilization, plan design leveraging, cost shifting, and new technology. The assumed ultimate trend rate and grade-down period are based on a long term projection of Gross Domestic Product (GDP) per capita.

Changes reflected in the September 30, 2025 benefit obligation

- The effective discount rate increased from 4.98% per annum to 5.30% per annum.
- The mortality improvement projection scale was updated from Scale MSS-2024 to Scale MSS-2025.
- The starting per-capita claims cost, premiums, retiree contributions, and RDS assumptions were updated to better reflect anticipated experience, taking into account actual experience over the past year, actual rates provided, and actual claims and enrollment from the RDS applications.
- The healthcare cost trend rates were updated to reflect Mercer's most up-to-date trend model.

Section 4.3: Summary of plan provisions

				Deductible				Coinsurance			Copayment					
Grid #	Class ID's	Active Retire	Medical Program	Hospital	Medical / Surgical	Major Medical (MM)	Combined	Hospital	Medical / Surgical	Major Medical	PCP	Specialist	ER	OOP Maximum (deduct. not included)	Lifetime Maximum	Prescription Drugs

New Entrants	National Fuel Gas Company's postretirement medical and life insurance benefits plan was closed to new entrants at various dates in 2002 and 2003 for each employee group. The closed group is generally made up of "Variable Annual Rate Retirees and Future Retirees", "Post 2001 Grandfathered Retirees", and "Pre 2001 Grandfathered Retirees". Active employees who are in the closed group and therefore eligible for postretirement medical and life insurance benefits upon retirement must also meet the eligibility requirement below in order to receive benefits.											
Eligibility	10 years of service at age 55, or age 50 if disabled	10 years of service at age 55, or age 50 if disabled	10 years of service at age 55, or age 50 if disabled	10 years of service at age 55, or age 50 if disabled	10 years of service at age 55, or age 50 if disabled	10 years of service at age 55, or age 50 if disabled	10 years of service at age 55, or age 50 if disabled	10 years of service at age 55, or age 50 if disabled	10 years of service at age 55, or age 50 if disabled	10 years of service at age 55, or age 50 if disabled	12 years of service at age 55, or age 50 if disabled	10 years of service at age 55, or age 50 if disabled

Additional Plan Details:

Prescription Drug Plan

Retiree copayments in the Core Plan are $0/$1 (generic/brand).
Retiree copayments in the $5/$10 Plan are $5/$10 (generic/brand).
Retiree copayments in the 3-tier Plan are $12.50/$24/$40 (generic/brand/specialty).

Basic Life Insurance Plan

Retirement Reduction Schedule 1
(Pennsylvania - Union & Non-Union Hourly)

60 & under	$12,500
61	$11,500
62	$10,500
63	$9,500
64	$8,500
65-69	$7,500
70 & over	$5,000

Retirement Reduction Schedule 2
(New York - Union & Non-Union Hourly)

60 & under	$12,500
61	$11,500
62	$10,500
63	$9,500
64	$8,500
65 & over	$7,500

Section 4.4: Claims cost development and medical rate information

Claim cost development

The claim costs were developed using the aggregate claims experience, separately for pre-65 and post-65 retirees, for the 36-month period ending December 2024 (for the 2025 disclosure) and December 2023 (for the 2024 disclosure and 2025 NPPBC) adjusted for the relative plan value, trend, and demographics of each individual plan. The prescription drug claim cost was also adjusted to reflect historical drug rebate information provided by National Fuel Gas Company. The pre-65 retiree experience was given credibility of 69% and the post-65 retiree experience was given full credibility.

Note, the medical plans described under grids 7, 8, 11, and 12 include prescription drug coverage. For valuation purposes, the prescription drug portion of the cost of these plans was valued separately. Since the prescription drug claims for plans under these grids were unavailable, this claim cost was developed by applying a relative value factor determined using actuarial equivalent rate relationships to the $5/$10 copayment plan claim cost.

Summary of premium rates for community rated plans

	Monthly premiums	
	2025	2024
Under 65 Rates (Independent Health FlexFit)		
Single, with Caremark	per Rx plan	per Rx plan
Single, w/o Caremark	$635.76	$582.62
Family, with Caremark	per Rx plan	per Rx plan
Family, w/o Caremark	1,716.54	1,573.08
Over 65 Rates (Independent Health Encompass 65)		
Single over	$240.00	$233.00
Two person over	480.00	466.00
One under/one over	875.76	815.62
Family, 1/more over	1,956.54	1,806.08

Retiree healthcare plan rates as of 1/1/2025

Below is a summary of the monthly retiree healthcare contribution amounts for those who retire after the 2008/2009 plan changes. For such retirees, the rates are assumed to change with healthcare trend throughout retirement, as described in Section 4.2. The contribution amounts shown are for medical and prescription drug coverage. For valuation purposes, they are allocated between medical and drug as described in Section 4.2.

Summary of historical retiree healthcare plan rates

Below is a summary of the monthly retiree healthcare contribution amounts for those who retired prior to the 2008/2009 plan changes. For such retirees there is no additional contribution for spousal/dependent coverage and the contribution amount determined at retirement does not change with healthcare trend or Medicare status. Further, the whole contribution is allocated to medical coverage.

Blue Cross/Blue Shield Plan	Monthly Contribution	Effective Date
1. Participants who retired prior to 1/1/1991	$0.00	N/A
2. Participants who retired 1/1/1991 - 2/29/2008:		
a) Comprehensive 80/20 Plan[1]	$0.00	N/A
b) Locals 2154, 2199, and 2199J IBEW (NY)	$21.66	2/17/1991
Hired on/before 4/13/1996	$26.00	2/16/1992
	$30.33	2/16/1993
	$34.66	2/13/1994
	$39.00	2/11/1996
	$39.00	thru 2/14/2008
c) Local 2154P (formerly Local 2279 IBEW) (PA)[2]	$21.66	4/13/1991
Hired on/before 4/13/1996, retired prior to 5/1/2009 and selected Indemnity Plan (Note: retirees that selected the PPO Plan have no monthly contributions).	$22.53	4/13/1992
	$28.16	4/13/1993
	$28.16	4/13/1994
	$28.16	4/13/1995
	$34.58	6/1/1996
	$44.29	6/1/1997
	$50.40	7/1/1998
	$63.14	4/13/2002
	$70.46	4/13/2003
	$68.00	1/1/2004
	$71.00	4/13/2005
	$88.00	4/10/2006
	$113.00	1/1/2007
	$117.05	1/1/2008
	$117.05	thru 5/1/2009
d) NCFO/SEIU, Chapter 22	$11.91	5/1/1991
Hired on/before 5/1/1996	$21.66	5/1/1992
	$28.16	5/1/1993
	$34.66	5/1/1994
	$39.00	5/1/1995
	$43.33	5/1/1999
	$47.66	5/1/2000
	$52.00	5/1/2001
	$52.00	thru 5/1/2009

[1] Amount applies to union and non-union retirees in the comprehensive plan.

[2] If the company cost increases over 5%, the percentage above 5% will be shared jointly 50/50 between the employee and the Company.

Summary of historical retiree healthcare plan rates (continued)

Blue Cross/Blue Shield Plan		Monthly Contribution	Effective Date
e)	Non-Union Non-Supervisory Employees	$21.66	7/1/1991

		$120.00	thru 1/1/2008

Summary of historical retiree healthcare plan rates (continued)

Retirees under age 65 who participate in a community rated plan pay the contribution amount identified earlier in this section– based on the group they are in – plus an active differential. Retirees who are age 65 and over and participate in a community rated plan pay only the amount identified earlier in this section.

The monthly active differentials for 1991 through 2025 are as follows:

Year of Retirement	Independent Health	
	Single	Family
1991	$4.48	$9.36
1992	$5.40	$11.76
1993	$5.01	$11.05
1994	$0.00	$0.00
1995	$2.40	$2.88
1996	$11.12	$25.60
1997	$0.00	$0.00
1998	$0.00	$0.00
1999	$0.00	$29.92
2000	$0.00	$0.00
2001	$3.92	$45.64
2002	$0.00	$41.40
2003 - 2025	$0.00	$0.00

Surviving spouse contribution rates

If a participant retires on or after 1/1/2001 and is either 1) management, 2) non-union hourly, 3) union division 2199, or 4) union division 2199-J, then the surviving spouse contribution upon that retiree's death is the same amount that the retiree was contributing. For all other retirees, the surviving spouse contribution is as shown in this section.

5. Net Postretirement Benefit Cost / (Income) = 1. + 2.e. - 3.f. + 4.d.	**(6,250,442)**	**(1,913,015)**	**(1,258,531)**	**0**	**0**	**0**	**0**	**(9,421,988)**

[1] The Interest Cost is determined using a spot-rate approach by applying the specific rates along the Above Mean Mercer Yield Curve to the relevant cash flows. The calculation presented here shows the application of the resulting effective rate for interest applied to the APBO (adjusted for expected benefit payments), which yields the same result. Although the effective rate for interest on the APBO is shown to two decimal places, the actual rate is unrounded.

5. Net Postretirement Benefit Cost / (Income) = 1. + 2.e. - 3.f. + 4.d.	**(1,367,013)**	**(293,122)**	**(453,409)**	**55,861**	**7,711**	**(1,900)**	**(41,975)**	**(2,093,847)**

[1] The Interest Cost is determined using a spot-rate approach by applying the specific rates along the Above Mean Mercer Yield Curve to the relevant cash flows. The calculation presented here shows the application of the resulting effective rate for interest applied to the APBO (adjusted for expected benefit payments), which yields the same result. Although the effective rate for interest on the APBO is shown to two decimal places, the actual rate is unrounded.

www.mercer.com

A business of Marsh McLennan

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-39:

Please reconcile the historical and future test year SFAS No. 106 expense levels with the amount identified in the actuarial report.

Response:

Refer to Page 78 of 82 of the response to SDR-RR-38 (Appendix A NPPBC [Net Periodic Postretirement Benefit Cost] for fiscal year ended September 30, 2025), which shows SFAS 106 income of ($2,206,137). The Company requests zero rate recovery for OPEBs (SFAS No. 106). This is consistent with the Company's filing in Docket Nos. R-2021 3027406 and C-2021 3028654, which reduced base rates, and Docket Nos. R-2022-3035730 in which OPEB rate recovery remained at zero.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-40:

Please identify the actual or projected amounts contributed to SFAS No. 106 funds for the historic and future test years. Identify the actual or projected dates and amounts of the contributions.

Response:

In conjunction with the Company's filing in Docket Nos. R-2021-3027406 and C-2021-3028654, the Company recognized zero recovery of OPEB costs, and, as a result, ceased any funding. There were no actual or projected contributions in the historic or future test years. The Company is not pursuing any OPEB cost recovery in this proceeding.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-41:

Please explain the funding options or plans which are being used for SFAS No. 106 costs. Identify the portion of the costs which are eligible for tax preferred funding.

Response:

The Company historically contributed to Voluntary Employees' Beneficiary Association (VEBA) trusts (a collectively bargained trust and a non-collectively bargained trust) and a 401(h) account, which is part of the Company's Master Retirement Trust, to pay for other post-employment benefits (OPEBs). Funding to the collectively bargained VEBA trust and the 401(h) was eligible for a full tax deduction (i.e., tax preferred funding). Funding to the non-collectively bargained VEBA trust was eligible for a tax deduction subject to IRS rules and limitations. Also, the Company previously contributed towards a grantor trust, which is not tax preferred funding (i.e., the Company did not receive a tax deduction for funding). However, it should be noted that the Company is not seeking recovery of SFAS No. 106 costs nor is it planning on additional funding in this rate case due to OPEBs being more than fully funded.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-42:

Is the Company studying and/or anticipating any changes to its postretirement benefits offered to employees as a result of SFAS No. 106 or for other reasons? If yes, please provide such study and/or explain the anticipated change.

Response:

While the Company is always evaluating its benefit offerings, there are no changes that would result in any additional SFAS 106 costs for which the Company is seeking rate recovery in this rate case. The Company is seeking no recovery of SFAS No. 106 costs in this rate case.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-43:

Please state whether the Company has included expenses related to SFAS No. 112 in its test year claim. If so, please provide complete details and include a copy of the actuarial study.

Response:

The Company has not included any such expenses in its claim.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-44:

Please provide all documentation supporting the uncollectible accrual rate reflected in the Company's filing.

Response:

The documentation for the accrual rate can be found in the following schedules:

- FTY – National Fuel Exhibit ATF-2, Schedule 5
- FPFTY – National Fuel Exhibit ATF-3, Schedule 1

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-45:

Please provide all workpapers and documentation supporting the Company's claimed balance of gas stored underground – current. Include support for the monthly injections and withdrawals and the gas cost rate.

Response:

See pages 2 through 61 for supporting documentation.

New FY 24 Incremental Layer rate added and ties to 9/30/24 file

W/S C
PRODUCT# 1902

**Please Note: First month following fiscal YE (Oct) when adding PY layer ensure that columns R-W are updated (copy & paste values) w/ PY ending balances (Sep 30 current month amounts at layer rates (X-AA). Also please note that formulas need to be reviewed & updated in rows V45-Z71 to ensure correct prior month reserve balance is referenced. The cell reference will shift due to added layer rate insert in Oct.

**Please Note: First month following fiscal YE (Oct)- Make sure to update the formulas of new years layer rate row for X,Y,Z,AA columns.

PA Rate - Q1 2025

To: M. Maggioli

From: C. Mann

Date: November 12, 2024

Re: PAD Storage Rates

The storage rates in effect for the 1st Quarter of FY25 are derived as follows:

	($/Mcf) (a)
Demand	$2.5567
Commodity	$2.7882
Total	$5.3449

Qtrly PA Stroage Rates- Updated on Schedules Tab

Notes:
(1) Storage Rates are derived at Delivered Volume to NFGDC with 12 months of projected values.

11/30/2024

W/S C
PRODUCT# 1902

**Please Note: First month following fiscal YE (Oct) when adding PY layer ensure that columns R-W are updated (copy & paste values) w/ PY ending balances (Sep 30 current month amounts at layer rates (X-AA). Also please note that formulas need to be reviewed & updated in rows V45-Z71 to ensure correct prior month reserve balance is referenced. The cell reference will shift due to added layer rate insert in Oct.

**Please Note: First month following fiscal YE (Oct)- Make sure to update the formulas of new years layer rate row for X,Y,Z,AA columns.

Michael Maggioli:
Begg. In Nov and through April- Reminder to update formula to pull Weighted Avg Rate (7 columns) instead of Commodity Rate (3 columns).

Michael Maggioli:

Begg. In May and through October- Reminder to update formula to pull Commodity Rate (3 columns) instead of Weighted avg. Rate (7 columns).

PA Rate - Q1 2025

To: M. Maggioli

From: C. Mann

Date: November 12, 2024

Re: PAD Storage Rates

The storage rates in effect for the 1st Quarter of FY25 are derived as follows:

	($/Mcf) (a)
Demand	$2.5567
Commodity	$2.7882
Total	$5.3449

Qtrly PA Stroage Rates- Updated on Schedules Tab

Notes:
(1) Storage Rates are derived at Delivered Volume to NFGDC with 12 months of projected values.

Michael Maggioli:

Begg. In May and through October- Reminder to update formula to pull Commodity Rate (3 columns) instead of Weighted avg. Rate (7 columns).

PA RATE - Q1 2025

To: M. Maggioli

From: C. Mann

Date: November 12, 2024

Re: PAD Storage Rates

The storage rates in effect for the 1st Quarter of FY25 are derived as follows:

	($/Mcf) (a)
Demand	$2.5567
Commodity	$2.7882
Total	$5.3449

Qtrly PA Stroage Rates- Updated on Schedules Tab

Notes:
(1) Storage Rates are derived at Delivered Volume to NFGDC with 12 months of projected values.

NFG Distribution Corporation
Storage Gas Inventory Priced at Layer Rates
1/31/2025

W/S C
PRODUCT# 1902

**Please Note: First month following fiscal YE (Oct) when adding PY layer ensure that columns R-W are updated (copy & paste values) w/ PY ending balances (Sep 30 current month amounts at layer rates (X-AA). Also please note that formulas need to be reviewed & updated in rows V45-Z71 to ensure correct prior month reserve balance is referenced. The cell reference will shift due to added layer rate insert in Oct.

**Please Note: First month following fiscal YE (Oct)- Make sure to update the formulas of new years layer rate row for X,Y,Z,AA columns.

Re: PAD Storage Rates

The storage rates in effect for the 2nd Quarter of FY25 are derived as follows:

	($/Mcf) (a)
Demand	$2.5371
Commodity	$3.1539
Total	$5.6910

Qtrly PA Stroage Rates- Updated on Schedules Tab

Notes:
(1) Based on the PGC 2024 February Quarterly Filing of projected values.

(2) Using 1.051 Dth/Mcf conversion factor

(3) Storage Rates are derived at Delivered Volume to NFGDC with 3 months of actuals & 9 months of projections

W/S C
PRODUCT# 1902

**Please Note: First month following fiscal YE (Oct) when adding PY layer ensure that columns R-W are updated (copy & paste values) w/ PY ending balances (Sep 30 current month amounts at layer rates (X-AA). Also please note that formulas need to be reviewed & updated in rows V45-Z71 to ensure correct prior month reserve balance is referenced. The cell reference will shift due to added layer rate insert in Oct.

**Please Note: First month following fiscal YE (Oct)- Make sure to update the formulas of new years layer rate row for X,Y,Z,AA columns.

Michael Maggioli:

Begg. In May and through October- Reminder to update formula to pull Commodity Rate (3 columns) instead of Weighted avg. Rate (7 columns).

PA Rate - Q2 2025

To: M. Maggioli

From: C. Mann

Date: February 7, 2025

Re: PAD Storage Rates

The storage rates in effect for the 2nd Quarter of FY25 are derived as follows:

	($/Mcf) (a)
Demand	$2.5371
Commodity	$3.1539
Total	$5.6910

Qtrly PA Stroage Rates- Updated on Schedules Tab

Notes:
(1) Based on the PGC 2024 February Quarterly Filing of projected values.

(2) Using 1.051 Dth/Mcf conversion factor

(3) Storage Rates are derived at Delivered Volume to NFGDC with 3 months of actuals & 9 months of projections

Begg. In Nov and through April- Reminder to update formula to pull Weighted Avg Rate (7 columns) instead of Commodity Rate (3 columns).

Michael Maggioli:

Begg. In May and through October- Reminder to update formula to pull Commodity Rate (3 columns) instead of Weighted avg. Rate (7 columns).

PA Rate - Q2 2025

To: M. Maggioli

From: C. Mann

Date: February 7, 2025

Re: PAD Storage Rates

The storage rates in effect for the 2nd Quarter of FY25 are derived as follows:

	($/Mcf) (a)
Demand	$2.5371
Commodity	$3.1539
Total	$5.6910

Qtrly PA Stroage Rates- Updated on Schedules Tab

Notes:
(1) Based on the PGC 2024 February Quarterly Filing of projected values.

(2) Using 1.051 Dth/Mcf conversion factor

(3) Storage Rates are derived at Delivered Volume to NFGDC with 3 months of actuals & 9 months of projections

PA Rate - Q3 2025

To: M. Maggioli

From: C. Mann

Date: May 6, 2025

Re: PAD Storage Rates

The storage rates in effect for the 3rd Quarter of FY25 are derived as follows:

	($/Mcf)
Demand	**$2.5808**
Commodity	**$3.4138**
Total	**$5.9946**

Qtrly PA Storage Rates- Updated on Schedules Tab

Notes:

(1) Based on the PGC 2024 May Quarterly Filing of projected values.

(2) Using 1.051 Dth/Mcf conversion factor

(3) Storage Rates are derived at Delivered Volume to NFGDC with 6 months of actuals & 6 months of projections

Storage Gas Inventory Priced at Layer Rates
5/31/2025

W/S C
PRODUCT# 1902

**Please Note: First month following fiscal YE (Oct) when adding PY layer ensure that columns R-W are updated (copy & paste values) w/ PY ending balances (Sep 30 current month amounts at layer rates (X-AA). Also please note that formulas need to be reviewed & updated in rows V45-Z71 to ensure correct prior month reserve balance is referenced. The cell reference will shift due to added layer rate insert in Oct.

**Please Note: First month following fiscal YE (Oct)- Make sure to update the formulas of new years layer rate row for X,Y,Z,AA columns.

Michael Maggioli:
Begg. In Nov and through April- Reminder to update formula to pull Weighted Avg Rate (7 columns) instead of Commodity Rate (3 columns).

Michael Maggioli:

Begg. In May and through October- Reminder to update formula to pull Commodity Rate (3 columns) instead of Weighted avg. Rate (7 columns).

Payne:
Prepare schedule E for correct value for year end.

Maggioli: Includes YE adj to bring reserve replacement bal to 0. (Review to add if formula specific to period 12.)

To: M. Maggioli

From: C. Mann

Date: May 6, 2025

Re: PAD Storage Rates

The storage rates in effect for the 3rd Quarter of FY25 are derived as follows:

	($/Mcf)
Demand	**$2.5808**
Commodity	**$3.4138**
Total	**$5.9946**

Qtrly PA Storage Rates- Updated on Schedules Tab

Notes:

(1) Based on the PGC 2024 May Quarterly Filing of projected values.

(2) Using 1.051 Dth/Mcf conversion factor

(3) Storage Rates are derived at Delivered Volume to NFGDC with 6 months of actuals & 6 months of projections

Storage Gas Inventory Priced at Layer Rates
6/30/2025

W/S C
PRODUCT# 1902

**Please Note: First month following fiscal YE (Oct) when adding PY layer ensure that columns R-W are updated (copy & paste values) w/ PY ending balances (Sep 30 current month amounts at layer rates (X-AA). Also please note that formulas need to be reviewed & updated in rows V45-Z71 to ensure correct prior month reserve balance is referenced. The cell reference will shift due to added layer rate insert in Oct.

**Please Note: First month following fiscal YE (Oct)- Make sure to update the formulas of new years layer rate row for X,Y,Z,AA columns.

Michael Maggioli:
Begg. In Nov and through April- Reminder to update formula to pull Weighted Avg Rate (7 columns) instead of Commodity Rate (3 columns).

Michael Maggioli:

Begg. In May and through October- Reminder to update formula to pull Commodity Rate (3 columns) instead of Weighted avg. Rate (7 columns).

Payne:
Prepare schedule E for correct value for year end.

Maggioli: Includes YE adj to bring reserve replacement bal to 0. (Review to add if formula specific to period 12.)

To: M. Maggioli

From: C. Mann

Date: May 6, 2025

Re: PAD Storage Rates

The storage rates in effect for the 3rd Quarter of FY25 are derived as follows:

	($/Mcf)
Demand	**$2.5808**
Commodity	**$3.4138**
Total	**$5.9946**

Qtrly PA Storage Rates- Updated on Schedules Tab

Notes:

(1) Based on the PGC 2024 May Quarterly Filing of projected values.

(2) Using 1.051 Dth/Mcf conversion factor

(3) Storage Rates are derived at Delivered Volume to NFGDC with 6 months of actuals & 6 months of projections

Michael Maggioli:
Begg. In Nov and through April- Reminder to update formula to pull Weighted Avg Rate (7 columns) instead of Commodity Rate (3 columns).

Michael Maggioli:

Begg. In May and through October- Reminder to update formula to pull Commodity Rate (3 columns) instead of Weighted avg. Rate (7 columns).

Payne:
Prepare schedule E for correct value for year end.

Maggioli: Includes YE adj to bring reserve replacement bal to 0. (Review to add if formula specific to period 12.)

To: M. Maggioli

From: C. Mann

Date: August 4, 2025

Re: PAD Storage Rates

The storage rates in effect for the 4th Quarter of FY25 are derived as follows:

	($/Mcf)	
Demand	**$2.5798**	
Commodity	**$3.1072**	Qtrly PA Storage Rates- Updated on Schedules Tab
Total	**$5.6870**	

Notes:

(1) Based on the PGC 2025 August Compliance Filing of projected values.

(2) Using 1.049 Dth/Mcf conversion factor

(3) Storage Rates are derived at Delivered Volume to NFGDC with 9 months of actuals & 3 months of projections

PRODUCT# 1902

**Please Note: First month following fiscal YE (Oct) when adding PY layer ensure that columns R-W are updated (copy & paste values) w/ PY ending balances (Sep 30 current month amounts at layer rates (X-AA). Also please note that formulas need to be reviewed & updated in rows V45-Z71 to ensure correct prior month reserve balance is referenced. The cell reference will shift due to added layer rate insert in Oct.

**Please Note: First month following fiscal YE (Oct)- Make sure to update the formulas of new years layer rate row for X,Y,Z,AA columns.

Michael Maggioli:
Begg. In Nov and through April- Reminder to update formula to pull Weighted Avg Rate (7 columns) instead of Commodity Rate (3 columns).

Michael Maggioli:

Begg. In May and through October- Reminder to update formula to pull Commodity Rate (3 columns) instead of Weighted avg. Rate (7 columns).

Payne:
Prepare schedule E for correct value for year end.

Maggioli: Includes YE adj to bring reserve replacement bal to 0. (Review to add if formula specific to period 12.)

To: M. Maggioli

From: C. Mann

Date: August 4, 2025

Re: PAD Storage Rates

The storage rates in effect for the 4th Quarter of FY25 are derived as follows:

	($/Mcf)	
Demand	**$2.5798**	
Commodity	**$3.1072**	Qtrly PA Storage Rates- Updated on Schedules Tab
Total	**$5.6870**	

Notes:

(1) Based on the PGC 2025 August Compliance Filing of projected values.

(2) Using 1.049 Dth/Mcf conversion factor

(3) Storage Rates are derived at Delivered Volume to NFGDC with 9 months of actuals & 3 months of projections

Storage Gas Inventory Priced at Layer Rates
9/30/2025

W/S C
PRODUCT# 1902

**Please Note: First month following fiscal YE (Oct) when adding PY layer ensure that columns R-W are updated (copy & paste values) w/ PY ending balances (Sep 30 current month amounts at layer rates (X-AA). Also please note that formulas need to be reviewed & updated in rows V45-Z71 to ensure correct prior month reserve balance is referenced. The cell reference will shift due to added layer rate insert in Oct.

**Please Note: First month following fiscal YE (Oct)- Make sure to update the formulas of new years layer rate row for X,Y,Z,AA columns.

Re: PAD Storage Rates

The storage rates in effect for the 4th Quarter of FY25 are derived as follows:

	($/Mcf)	
Demand	**$2.5798**	
Commodity	**$3.1072**	Qtrly PA Storage Rates- Updated on Schedules Tab
Total	**$5.6870**	

Notes:

(1) Based on the PGC 2025 August Compliance Filing of projected values.

(2) Using 1.049 Dth/Mcf conversion factor

(3) Storage Rates are derived at Delivered Volume to NFGDC with 9 months of actuals & 3 months of projections

Totals	**$71,006,536**	**$73,538,072**	**$2,531,535**	3.4%

Cost elements with variances in excess of 10% for the TME 9/30/25 are described below:

- Outside Services - Third-party savings primarily due to lower restoration, mowing and cross bore expenses, coupled with savings related to CAP work being brought in-house and lower collection agency fees.

- Gas Purchases – Minor variance due to increased gas quality and meter maintenance for producers.

- Research/Development – Lower spending due to delays in demonstration project implementation.

- Dues and Memberships - Lower dues coupled with prior year accounting corrections.

- Other Expense – Favorable collections for line hits.

- Revenue Income - Volume of reconnections in excess of budget.

- Uncollectibles - Increased expense to ensure adequate reserve exists in allowance for doubtful accounts.

- Injuries & Damages – Lower claims (both employee and third-party).

- Postage - Lower postage expense due to lower volumes of material to be mailed.

- Information Services – Lower labor due to vacant positions coupled with lower contractor utilization and savings on software expenses.

- Messenger Expense – Lower costs for messenger expenses.

- Environmental – Higher than expected costs for transport and disposal of waste.

- Accounting Adj & Accr - Lower MFC Uncollectibles due to lower gas costs in actuals than base plan.

Question No. RR-47:

Please provide the most recent actual number of eligible participants in each of the employee medical and dental plans reflected in the Company's filing.

Response:

As of 9/2025:

Eligible Employees:
- Health Insurance: 436 employees
- Pharmacy Prescription Drug Benefits administered by CVS Caremark: 226
- Dental: 433

Participating employees:
- Health Insurance: 373 employees
- Pharmacy Prescription Drug Benefits administered by CVS Caremark: 205
- Dental: 357

Note: With the exception of 3 Part-Time Non-Union Employees, all employees have the option to elect prescription coverage through either their Health Insurance Plan or the Pharmacy Prescription Drug Benefits administered by CVS Caremark. Eligibility depends on their employee type/union classification.

* Negative amount reflects a vendor credit issued during the test year related to the resolution of a prior contractual matter.

** This amount represents costs aggregated at the National Fuel Gas Distribution Corporation level and allocated to the PA Division based on established allocation methodologies. Detailed vendor-level information is not available because these expenses are recorded in consolidated accounts.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-53:

Please describe each budgeted or planned cost savings program to be implemented during the historic or future year. Please identify the cost of implementing the program and the anticipated annual savings.

Response:

There are currently no such programs that are planned to be implemented in this period of time.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-54:

Please explain how the Company has treated reserve accruals and balances for ratemaking purposes and provide the requested level of any self-funded reserve accruals by type of item.

Response:

The Company has not made any ratemaking adjustments based on self-funded reserve accruals.

National Fuel Gas Distribution Corporation
PA Division

Standard Data Request

Revenue Requirement

Question No. RR-55:

Please provide a copy of the corporate federal tax returns and supporting schedules for the preceding three years and, if applicable, a copy of the calculation workpapers for the Company's consolidated tax savings adjustment.

Response:

The Company is included as part of a consolidated federal income tax return. Since the complete federal tax return is a voluminous document, only CONFIDENTIAL excerpts from the preceding three years' returns are provided. These excerpts include Federal Form 1120 (Pages 1-6), consolidating income statement and balance sheet supporting schedules. Please see CONFIDENTIAL Exhibit SDR-RR-55 for these excerpts. The complete CONFIDENTIAL tax returns will be made available to appropriate parties upon request.

There are no consolidated tax savings adjustments applicable to the Company due to being in a taxable loss each year for fiscal years 2023 through 2025.

I. INTRODUCTION

The purpose of this document is to discuss the development and results of the Allocated Cost of Service Study ("ACOSS") model and related schedules prepared for National Fuel Gas Distribution Corporation ("National Fuel" or the "Company") based on the Fully Projected Future Test Year ended October 31, 2027 ("FPFTY").

The document is organized into three sections. The first section discusses the purpose of cost allocation and includes an overview of Atrium's ACOSS model used to develop the cost allocation study. The second section, National Fuel Cost of Service Procedures, includes details of the methodologies adopted in the development of the study. The last section presents the results of the cost-of-service allocation.

1. Purpose of Cost Allocation

The purpose of an ACOSS is to determine the cost-of-service responsibilities of each customer class upon which the base rates may be established. The revenue requirement studies provide the overall level of costs of providing service, while the ACOSS is used to change the basic rate structures and/or the relative overall cost responsibility of each customer class. Based on the functionalization and classification of costs and allocation methodologies used in the ACOSS, the revenue requirement by customer class is determined and used in designing the Company's proposed base rates. In other words, the ACOSS measures each class's contribution to the Company's overall cost of service. Comparing the costs to serve any customer class with that class's rate revenues provides a measure of the return realized from that class and their associated revenue-to-cost ratio. This allows for a comparison across classes to ascertain the presence and extent of interclass subsidization (i.e., when one class pays more than its cost to serve and another pays less than its cost to serve).

2. ACOSS Procedures

Cost of service studies utilize a three-step process: functionalization, classification, and allocation.

In the first step, the functionalization sets off with assigning the Federal Energy Regulatory Commission ("FERC") plant accounts and associated investment balances to appropriate cost of service functions, such as Production, Distribution, On-Site and Metering, Customer Services, and Gas Supply. The expenses related to particular property investments or groups of investments can often follow the same functionalization and are allocated based on the ratios of gas plant assigned to each function. These plant ratios can be used to functionalize most other cost items.

In the second step, classification, each functional cost category is further separated by cost causation. There are three basic cost-defining characteristics of natural gas services: demand, commodity, and customer.

- Demand (Capacity) related costs are associated with the peak usage of the utility system. These costs are necessary to maintain the system at a level sufficient to satisfy the greatest demand that all the customers could place upon the system.
- Commodity-related costs are variable costs that vary with the quantity of gas consumed. These costs reflect the number of units consumed or supplied during a period of time.

- Customer-related costs are associated with serving customers regardless of their usage or demand characteristics. Customer-related costs are incurred to attach a customer to the distribution system, meter any gas usage and maintain the customer's account. Customer costs are a function of the number of customers served and continue to be incurred whether or not the customer uses any gas. They generally include capital costs associated with minimum size distribution mains, services, meters, regulators and customer service and accounting expenses.

The last step is to allocate these cost components among customer classes. An analysis of the utility's records may indicate specific costs that should be isolated and directly assigned to a particular customer or group of customers in the same class of service. Direct assignments best reflect the cost causation characteristics of serving individual customers or groups of customers. Therefore, in performing an ACOSS, the cost analyst seeks to maximize the amount of plant and expense directly assigned to particular customer groups to avoid the need to rely upon other more generalized allocation methods. Where costs cannot be directly assigned, the development of allocation factors by customer class use principles of both economics and engineering. This results in appropriate allocation factors for different elements of costs based on cost causation.

3. Atrium Economics Cost of Service Study Model Overview

The ACOSS is submitted in support of the direct testimony of John D. Taylor as Schedule 6. The ACOSS model presented in this proceeding is a Microsoft Excel based model that allows the user to modify various inputs and assumptions.

ACOSS Model Capabilities

The Atrium Economics' ACOSS model provides a large range of analytical capabilities including:

- Unbundling of operations into functions: (i.e. production/supply, storage, transmission, distribution, metering, and billing services.)
- Classification and allocation of costs into customer classes.
- Reports on Rate of Return, Revenue Requirement, and Revenue-to-Cost ratio for each function and rate class.
- Development of unit costs of each functional classification for each rate class.
- Specification of the individual rate of return targets for each function or customer class.
- Provides detailed analyses of costs of gas, income taxes, working capital, depreciation reserve, and depreciation expenses.
- Use of detailed analysis of labor expenses by account to facilitate the analyses of administrative and general expenses and overhead costs.
- Facilitation of direct assignment of plant investment, expenses, and revenue dollars to individual functions, classifications, or customer classes.

Follows Standard 3-Step Allocation

The Atrium ACOSS Model follows the standard three-step analysis process:1) functionalization of rate base and expenses into various functional categories; 2) classification of functionalized

components into demand, energy/commodity, and customer cost categories; and 3) allocation of each component among the customer classes.

As part of the functionalization process, accounts for common costs that are not specifically related to the primary functions, such as general plant and administrative and general expenses, are automatically allocated to the proper function based on internally defined allocation factors. All components of the utility's total cost of service are grouped into one of the functions.

The Atrium ACOSS Model provides unbundled functionalized and classified cost information by customer class; develops unbundled revenue requirements by functional classification for each customer class; and calculates unit costs by function for customer, commodity, and demand categories. Accounting costs are reported by the FERC account level, and the allocation of administrative and general ("A&G") expenses, general taxes, and income taxes are clearly reported.

Revenue requirements are calculated from the allocated rate base and expenses and are adjusted to reflect the user-determined target rate of return and statutory tax adjustments. The actual revenues collected are compared to the calculated cost-based revenue requirements to determine class-specific, revenue-to-cost ratios to assist in revenue allocation and pricing activities.

Unit Cost Output Functionality

The ACOSS model calculates the unit cost of each functional classification separately for each rate class based on the user-specified billing determinants. These unit cost data are among the most important outputs from an embedded cost of service analysis. They are defined as the average cost of providing service to customers per measure of service (i.e., per therm or ccf, per dekatherm or mcf of daily demand, and per customer). Unit costs are a key consideration in developing prices for bundled, unbundled, and re-bundled services.

Acceptance by Utility Regulatory Commissions

The format and presentation of the model's outputs have been used in many rate case proceedings and conform to standard utility commission requirements. Where necessary the ACOSS model outputs can be easily modified to meet specific jurisdictional filing requirements.

II. NATIONAL FUEL's COST OF SERVICE PROCEDURES

1. Functionalization

The following functional cost categories were identified for purposes of National Fuel's cost allocation:

- Gas Supply
- Production
- Transmission
- Distribution

- Customer

National Fuel's assigned functional categories are presented on Schedule 1.

2. Classification

The following classification categories were identified for purposes of National Fuel's cost allocation:

- Commodity
- Demand
- Customer

National Fuel's assigned classification categories are presented on Schedule 1.

3. Allocation

The allocation step involves assigning classified costs to the customer classes based on cost causation. Therefore, the allocation of costs is usually based on some measure of class loads or class service characteristics. The External and Internal Allocation Factors are utilized to allocate costs among various customer classes. National Fuel's assigned Allocation Factors are presented on Schedule 1.

3.1.Customer Classes and Tariff Schedules

The following customer classes were identified for purposes of cost allocation:

- Residential Service
- Small Commercial & PA Service (LE 250)
- Small Commercial & PA Service (GT 250)
- Large Comm PA Service
- Natural Gas Vehicles ("NGV")
- Small Volume Industrial Service ("SVIS")
- Intermediate Volume Industrial Service ("IVIS")
- Large Volume Industrial Service ("LVIS")
- Large Industrial Service ("LIS")

3.2.External Allocation Factors

National Fuel's External Allocation Factors are presented on Schedule 2. The External Allocation Factors are developed based on the special studies conducted using various detailed data.

Commodity and Revenue Allocation Factors

Costs classified as "Commodity" are allocated among customer classes based on the weather-normalized volumes for the test year.

COM - Factor developed to directly assign Weather Normalized Volumes/Throughput to the specific class in the FPFTY, based on all customers' volumes.

SALES_COM – Factor developed to directly assign Weather Normalized Volumes/Throughput to the specific class in the FPFTY, based on sales customers' volumes.

INCR_WNTR – Factor used to allocate base storage gas and calculated by taking the difference between average winter daily volumes and average summer daily volumes for sales customers.

GASCOST – Factor developed to directly assign associated gas costs and revenues to the specific class in the FPFTY.

REV – Factor developed to directly assign associated current base rate revenues to the specific class in the FPFTY.

REV_DSCNT – Factor derived to allocate forfeited discounts to the specific class on a historical basis.

Customer Allocation Factors

Customer-related costs are generally allocated based on the number of customers within each class of service, with appropriate weighting to recognize specific service characteristics.

CUST – Factor based on the average number of customers per customer class in the FPFTY.

MTRS – Factor based on the weighted customer unit cost of meters used to serve gas customers in different rate classes. The analysis relies upon the Company's records, which provide an inventory of each type and size of meter for a specific rate schedule, and the records of FERC Account 381 investment balances. The original cost data was restated in terms of current cost using Handy-Whitman indices for meters to determine current unit cost. Next, the derived average meter current cost was linked to the meter records dataset to develop the total current cost of the investment for each customer class. Then the relative customer class unit cost was developed and multiplied by the forecasted customer count for each customer class.

M&R – The Company's property records were used to directly assign investment of FERC Account 385 to the appropriate customer classifications. The factor was derived based on the allocated historical investment cost.

SERV – The analysis relies upon the data contained in the Company's property records which provide an inventory and original cost of the service lines, and additional distribution records that provide data on customer classes and service lines by diameter. The method employed to develop the service allocator was similar to that used for the meter allocator.

ACT_904 – Uncollectible Account - The factor is based on the historical statistics related to uncollectable accounts.

Demand Allocation Factors

Demand-related costs are generally allocated based on peak capacity demand for each customer class.

DEMAND (PDAY) – The factor is based on Peak Day capacity demand for each customer class.

PEAK_AVRG – The factor is based on the weighting of the factors derived from average weather normalized throughput volumes (COM) and from the Peak Day capacity demand factor (PDAY) for each customer class.

CUST_DEMAND – The composite factor is based on the CUST and DEMAND factors prorated to the customer and demand components determined in Mains Analysis.

Mains Analysis

The allocation of investment in facilities serving a distribution function should recognize that the cost of these facilities is driven by two principal factors. First is the cost of extending the system to connect individual customers. Second is the cost associated with the capacity requirements of the customers connected.

There are two widely accepted methods for the classification of mains between customer-related costs and demand-related costs. The two methods are the Minimum System Method and the Zero Intercept Method, both relying on the Company's property record data to determine the cost of pipe by size and type. The unit cost for pipe in any year is determined by dividing the booked costs by the amount of pipe installed in a standard unit of measurement. A variety of factors, such as the length of pipe installed, location, installation conditions, etc., cause the annual unit cost of pipe by size and type to vary significantly. Thus, a simple average of the yearly costs is not adequate for a determination of the cost for each size of the pipe as it will not reflect a consistent set of data. Therefore, the original cost data was restated in terms of current cost using the Handy-Whitman index.

Minimum System Study:

The minimum system study is based on a selected minimum plastic pipe size of 2" and minimum steel pipe size of 2" and associated current unit cost to determine a minimum system cost over the total system cost as depicted below.

Minimum System Summary

Material	Quantity	Cost 2025$	Minimum Size Cost (2025$)	Customer Component	Customer Component Percentage
Plastic	17,245,444	$666,658,923	$29.60	$510,404,171	76.6%
Steel	7,086,234	$674,600,477	$45.68	$323,683,034	48.0%
Total	**24,331,678**	**$1,341,259,399**		**$834,087,205**	**62.2%**

Zero Intercept Study:

The zero intercept study was performed using a Weighted Linear Regression on the cost per foot by pipe diameter. Based on this relationship, the study estimates the cost of installing a hypothetical pipe with zero capacity, which is where the estimated diameter is zero (i.e., the zero-

intercept). The zero-intercept determined value is then multiplied by all quantities of distribution mains currently installed by the utility to arrive at a total minimum system cost. Total minimum system cost divided by total system cost derives the portion of the system that is considered a fixed investment and is classified as customer-related.

Zero-Intercept Summary

Material	Quantity	Cost 2025$	Zero-Intercept Cost (2025$)	Customer Component	Customer Component Percentage
Plastic	17,245,444	$ 666,658,923	$ 25.60	$ 441,467,384	66.2%
Steel	7,086,234	$ 674,600,477	$ 52.91	$ 374,936,509	55.6%
Total	**24,331,678**	**$ 1,341,259,399**		**$ 816,403,894**	**60.9%**

The distribution main investment is functionalized to distribution, classified based on the results of the zero-intercept study to demand (39.1%) and customer (60.9%). The demand component of the mains investment is allocated based on each class' allocation of peak day. The customer component of the mains investment is allocated based on each class' number of customers.

3.3.Internal Allocation Factors

National Fuel's Internal Allocation Factors are presented on Schedule 3. Internal Allocation Factors are developed within the ACOSS model based on the cost ratios of allocated cost using the external allocation factors.

INT_RATEBASE – Total Rate Base – The factor is based on the derived rate base by customer class.

INT_REV_REQ – Total Revenue Requirement – The factor is based on the derived revenue requirement by customer class.

INT_REQ_INCOME – Required Return on Rate Base – The factor is based on the derived customer class required return on the rate base.

INT_TOTPLT – Production Plant Total - The factor is based on the allocated total plant balance by customer class.

INT_PRODPT – Total Plant - The factor is based on the allocated Production plant balance by customer class.

INT_PROD_TRANSM_DIST_SUBTOTAL – Production, Transmission, and Distribution Plant Total- The factor is based on the allocated Production, Transmission, and Distribution plant balance by customer class.

INT_DIST_SUBTOTAL – Distribution Plant Subtotal – The factor is based on the allocated Distribution plant balance by customer class excluding FERC Account 375, Structures and Improvements.

INT_DISTPT – Distribution Plant Total – The factor is based on the allocated total Distribution plant balance by customer class.

INT_DMAINS_SERV – Distribution Plant Mains and Services – The factor is based on the allocated plant balances by customer class of FERC Accounts 376 and 380, Mains and Services.

INT_GENPLT – General Plant Total – The factor is based on the allocated total General plant balance by customer class.

INT_TRANSPT – Transmission Plant Total – The factor is based on the allocated total Transmission plant balance by customer class.

INT_CUSTACC – Customer Account – The factor is based on the total customer class allocated Customer Account expenses excluding FERC Account 901 and 905, Supervision and Miscellaneous Customer Accounts expenses.

INT_OM_DIST_SUBTOTAL – Distribution Operation and Maintenance Expense Subtotal – The factor is based on the total customer class allocated Distribution Operation and Maintenance Expenses, excluding FERC Accounts 870, 880, 881, 885, and 894, Operation supervision and engineering, Other Expenses, Rents, Maintenance Supervision and Engineering, and Maintenance of other Equipment.

INT_OM_Excl_A&G – Operation and Maintenance Expense excluding Administrative and General Expenses – The factor is based on the total customer class allocated Operation and Maintenance Expenses, excluding Administrative and General Expenses.

INT_OML – Operation and Maintenance Labor Expense Total – The factor is based on the total customer class allocated labor-related Operation and Maintenance Expenses.

INT_DIST_OL - Distribution related Operation Labor Expense subtotal - The factor is based on the customer class allocated Distribution labor-related Operation and Maintenance Expenses

INT_DIST_ML - Distribution related Maintenance Labor Expense subtotal - The factor is based on the customer class allocated Distribution labor-related Maintenance Expenses.

III. NATIONAL FUEL'S COST OF SERVICE RESULTS

1. Schedule 1 - Account Balances and Allocation Methods

Attention Brian M. Welsch
Vice President

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant as of October 31, 2027. The results of our study as of September 30, 2026 are presented in our report titled "2026 Depreciation Study - Calculated Annual Depreciation Accruals Related to Gas Plant as of September 30, 2026". The same methods, procedures and estimates are used in both studies.

Summaries of the original cost, annual accruals, book depreciation reserve and amortization of net salvage are presented in Tables 1 through 4, beginning on page I-3 of the attached report.

Respectfully submitted,

GANNETT FLEMING VALUATION

DEPRECIATION STUDY

PART I. RESULTS OF STUDY

DESCRIPTION OF SUMMARY TABULATIONS

Tables 1 through 4 presented on pages I-3 through I-8 summarize the results of the depreciation study as of October 31, 2027. Table 1 sets forth, by depreciable group, the estimated survivor curve, original cost, book depreciation reserve as of October 31, 2027, future book accruals, calculated annual accrual amount and rate, and composite remaining life for plant in service. Table 2 presents the bringforward of the book reserve to October 31, 2027. Table 3 sets forth the calculations of the depreciation accruals for the thirteen months ended October 31, 2027. Table 4 presents the annual amortization of experienced and estimated net salvage based on the period 2023 through 2027.

DESCRIPTION OF DETAILED TABULATIONS

The supporting data for the depreciation calculations are presented in account sequence in the section beginning on page II-7. The original cost, calculated accrued depreciation, allocated book reserve, future accruals, remaining life and annual accrual are shown for each vintage of each account or subaccount. The amounts of regular retirements, gross salvage and cost of removal are set forth by account for the years 2023 through 2027, on pages III-2 and III-3.

Williamsville, NY 14221-5887

Attention Brian M. Welsch
Vice President

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant in service. The results of our study as of September 30, 2026 are presented in the attached report. The results of our study as of September 30, 2025 are presented in our report titled "2025 Depreciation Study- Calculated Annual Depreciation Accruals Related to Gas Plant as of September 30, 2025". The same methods, procedures and estimates are used in both studies.

The attached report sets forth a description of the methods and procedures upon which the studies were based, the estimates of survivor curves and the calculated annual depreciation rates as of September 30, 2026.

Respectfully submitted,

GANNETT FLEMING VALUATION
AND RATE CONSULTANTS, LLC

DEPRECIATION STUDY

PART I. INTRODUCTION

SCOPE

This report sets forth the results of the depreciation study conducted for National Fuel Gas Distribution Corporation – Pennsylvania Division to determine the annual depreciation accrual rates and amounts for ratemaking purposes applicable to the original cost of gas plant as of September 30, 2026.

The depreciation accrual rates and amounts presented herein are based on estimated survivor curves and methods and procedures set forth in previous orders approved by the Pennsylvania Public Utility Commission. The estimated survivor curves presented herein were based on the results of a service life study incorporating statistical analyses of data through 2022.

BASIS OF STUDY

Depreciation and Amortization

Depreciation, as defined in the Uniform System of Accounts, is the loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of gas plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand, and requirements of public authorities.

Depreciation, as used in accounting, is a method of distributing fixed capital costs over a period of time by allocating annual amounts to expense. Each annual amount of such depreciation expense is part of that year's total cost of providing utility service. Normally, the period of time over which the fixed capital cost is allocated to the cost of service is equal to the period of time over which an item renders service, that is, the item's service life. The most prevalent method of allocation is to distribute an equal amount of cost to each year of service life. This method is known as the straight line method of depreciation.

The calculation of annual and accrued depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. These subjects are discussed in the sections which follow.

For most plant accounts, depreciation accruals and accrued depreciation were calculated using the straight line method, the remaining life basis, the average service life (ASL) procedure for plant installed prior to 1982 and the equal life group (ELG) procedure for 1982 and subsequent vintages. The calculations were based on the attained ages and estimated service life characteristics for each depreciable group of gas property. For certain general plant accounts, the amortization amounts, annual and accrued, were based on the age of the vintage and the selected amortization period.

Survivor curves were used to reflect the expected dispersion of retirements, thus providing a consistent method of estimating service lives and depreciation for mass property. Iowa type curves were used to depict the estimated survivor curves. For life span groups, the estimate of life characteristics is consistent because the calculated lives of the units within a group are obtained by employing a single probable retirement date for the entire group.

Service Life Estimates

The method of estimating service life consisted of compiling the service life history of the plant accounts, subaccounts or depreciable groups, reducing this history to trends through the use of acceptable actuarial techniques, and forecasting the trend of survivors for each depreciable group on the basis of interpretations of past trends and consideration of Company plans for the future. The combination of the historical trend and the estimated future trend yielded a complete pattern of life characteristics from which the average service life was derived.

The Company's service life estimates used in the depreciation calculation incorporated historical data compiled through 2022 from the property records of the Company. Such data included plant additions, retirements, transfers and other activity. The period of experience studied and the method of historical analysis used for each group depended upon the availability of data from the Company's records.

A general understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirement was obtained through field trips conducted during the course of the service life study. Discussions with operating and management personnel also provided information regarding plans for the future which were incorporated in the interpretation and extrapolation of the statistical analyses.

AMORTIZATION OF NET SALVAGE

Inasmuch as this report relates primarily to Pennsylvania rate regulation practices, under which experienced costs of negative net salvage are amortized after their occurrence, no adjustments for expected net salvage were made to either the annual depreciation accrual or the calculated accrued depreciation for the individual accounts. The annual provision for recovering negative net salvage is based on the amortization of net

salvage over a five-year period, as established in the Stipulation and Commission order at Docket No. R-832469.

PART II. ESTIMATION OF SURVIVOR CURVES

PART II. ESTIMATION OF SURVIVOR CURVES

The calculation of annual depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. The estimation of survivor curves is discussed below, and the development of net salvage is discussed in later sections of this report.

SURVIVOR CURVES

The use of an average service life for a property group implies that the various units in the group have different lives. Thus, the average life may be obtained by determining the separate lives of each of the units or by constructing a survivor curve by plotting the number of units which survive at successive ages.

The survivor curve graphically depicts the amount of property existing at each age throughout the life of an original group. From the survivor curve, the average life of the group, the remaining life expectancy, the probable life, and the frequency curve can be calculated. In Figure 1, a typical smooth survivor curve and the derived curves are illustrated. The average life is obtained by calculating the area under the survivor curve, from age zero to the maximum age, and dividing this area by the ordinate at age zero. The remaining life expectancy at any age can be calculated by obtaining the area under the curve, from the observation age to the maximum age, and dividing this area by the percent surviving at the observation age. For example, in Figure 1, the remaining life at age 30 is equal to the crosshatched area under the survivor curve divided by 29.5 percent surviving at age 30. The probable life at any age is developed by adding the age and remaining life. If the probable life of the property is calculated for each year of age, the probable life curve shown in the chart can be developed. The frequency curve presents the number of units retired in each age interval. It is derived by obtaining the differences between the amount of property surviving at the beginning and at the end of each interval.

This study has incorporated the use of Iowa curves developed from a retirement rate analysis of historical retirement history. A discussion of the concepts of survivor curves and of the development of survivor curves using the retirement rate method is presented below.

Iowa Type Curves

The range of survivor characteristics usually experienced by utility and industrial properties is encompassed by a system of generalized survivor curves known as the Iowa type curves. There are four families in the Iowa system, labeled in accordance with the location of the modes of the retirements (or the portion of the frequency curve with the highest level of retirements) in relationship to the average life and the relative height of the modes. The left moded curves, presented in Figure 2, are those in which the greatest frequency of retirement occurs to the left of, or prior to, average service life. The symmetrical moded curves, presented in Figure 3, are those in which the greatest frequency of retirement occurs at average service life. The right moded curves, presented in Figure 4, are those in which the greatest frequency occurs to the right of, or after, average service life. The origin moded curves, presented in Figure 5, are those in which the greatest frequency of retirement occurs at the origin, or immediately after age zero. The letter designation of each family of curves (L, S, R or O) represents the location of the mode of the associated frequency curve with respect to the average service life. The numbers represent the relative heights of the modes of the frequency curves within each family. A higher number designates a higher mode curve.

The Iowa curves were developed at the Iowa State College Engineering Experiment Station through an extensive process of observation and classification of the ages at which industrial property had been retired. A report of the study which resulted in the classification of property survivor characteristics into 18 type curves, which constitute three of the four families, was published in 1935 in the form of the Experiment Station's Bulletin 125.

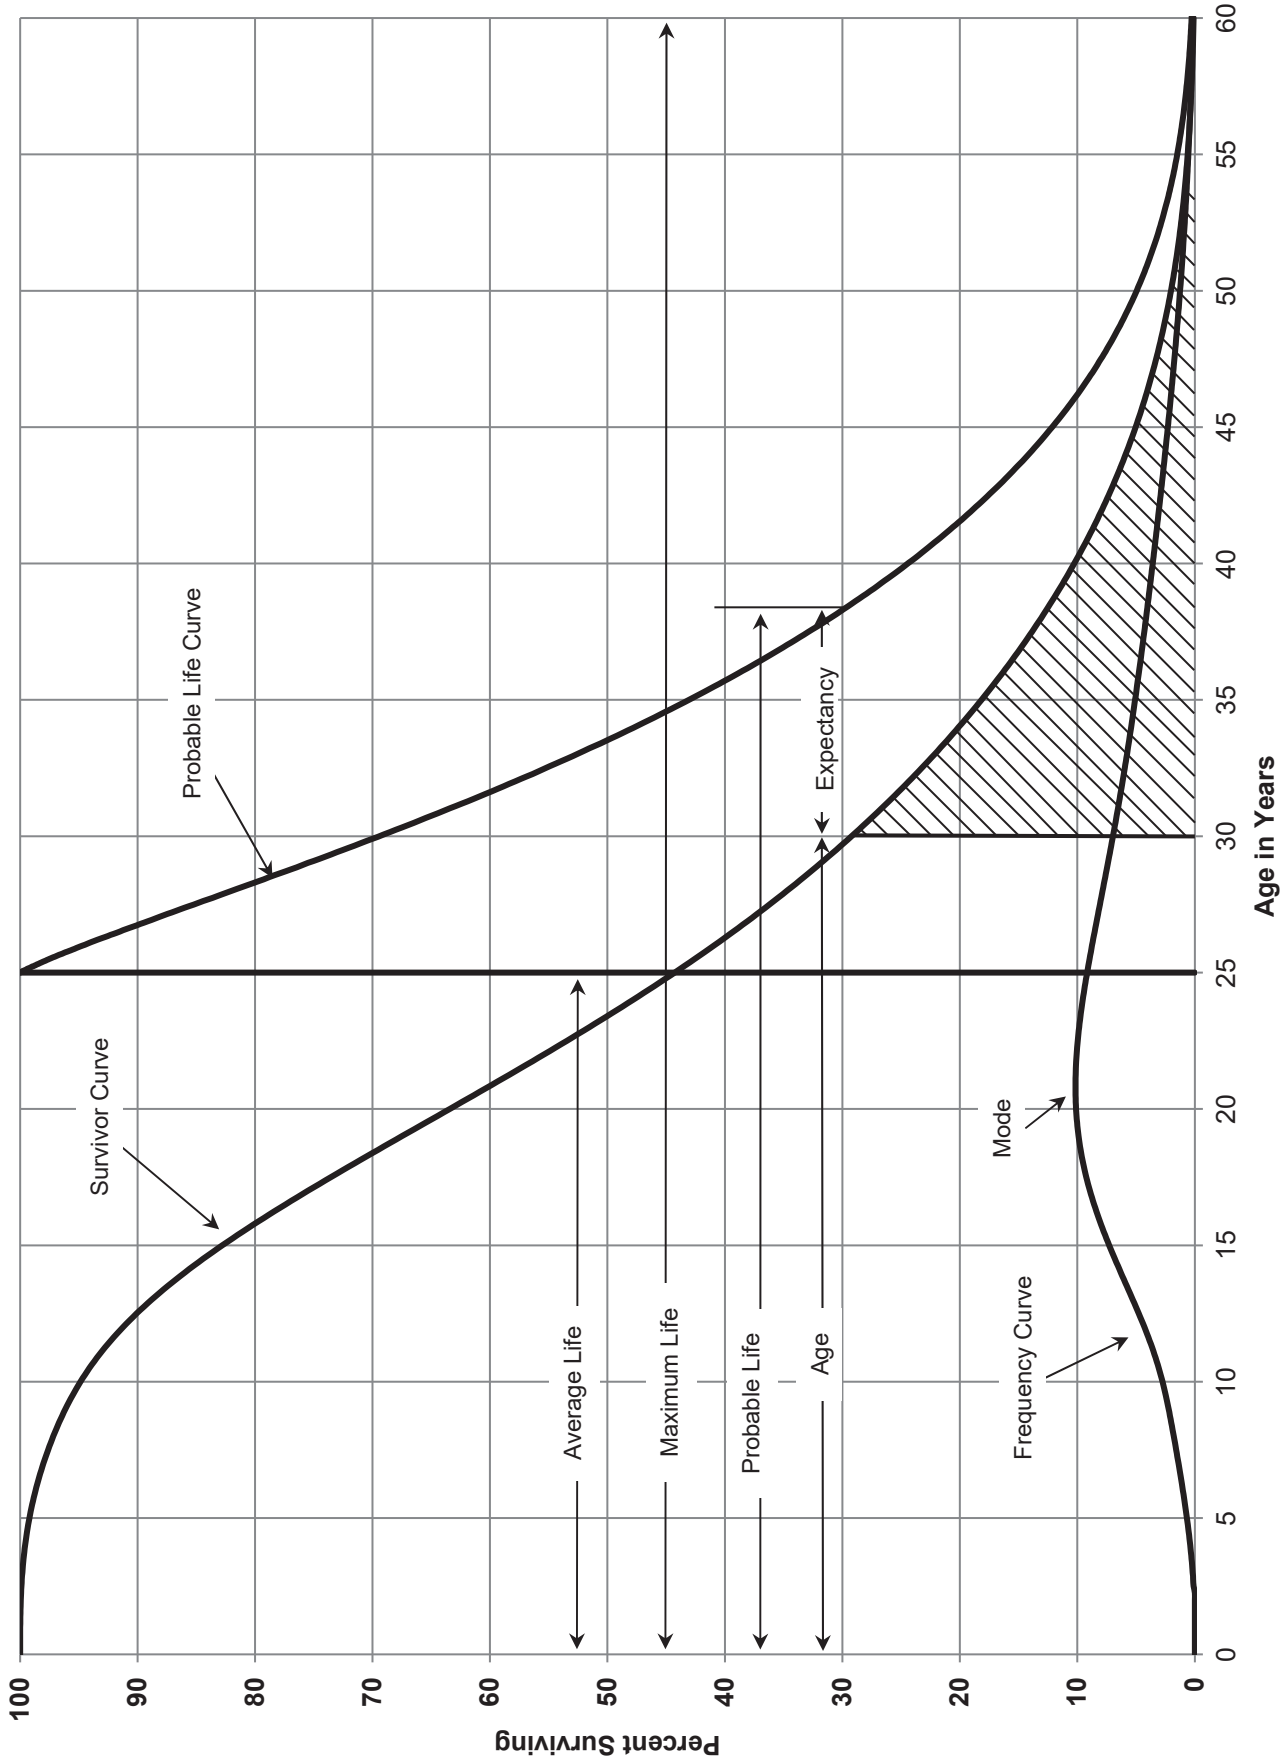

FIGURE 1. TYPICAL SURVIVOR CURVE AND DERIVED CURVES

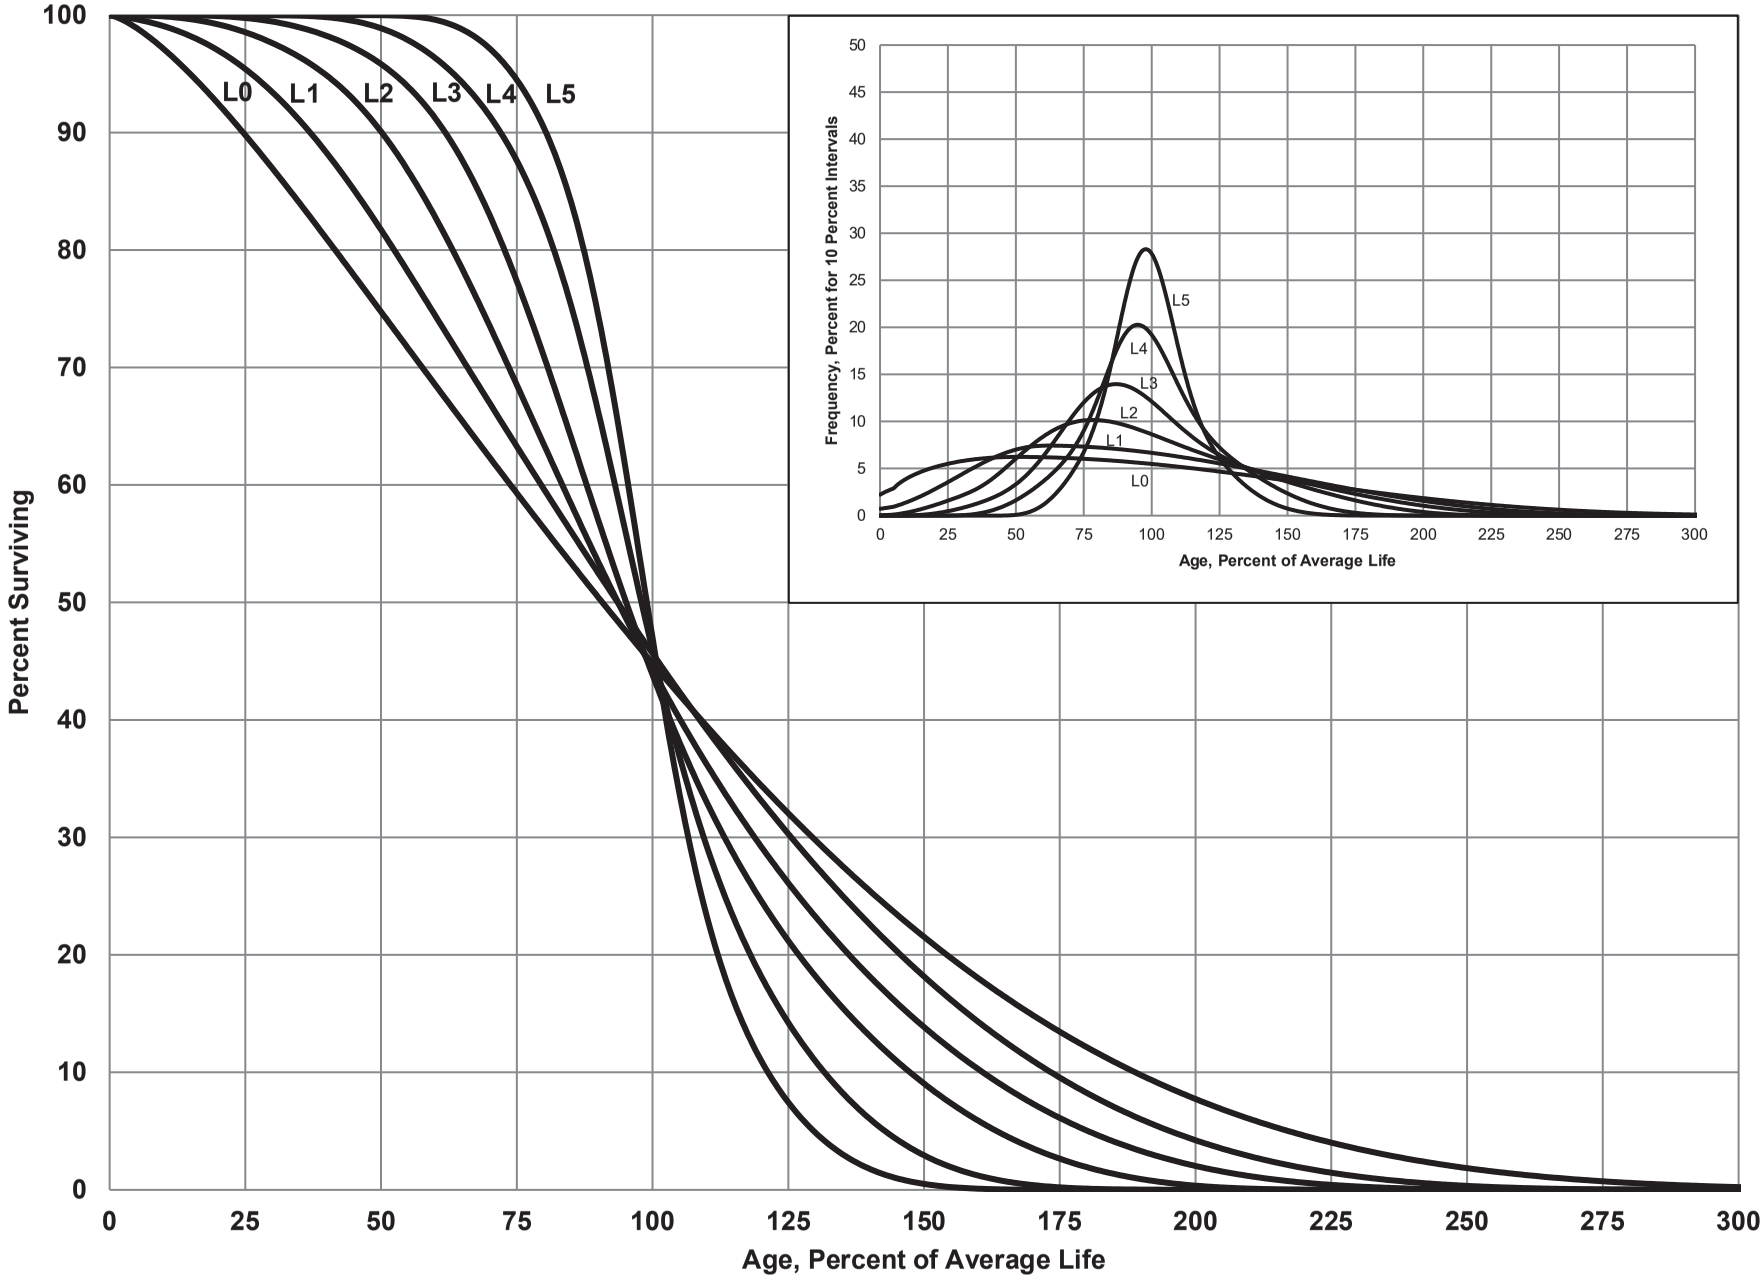

FIGURE 2. LEFT MODAL OR "L" IOWA TYPE SURVIVOR CURVES

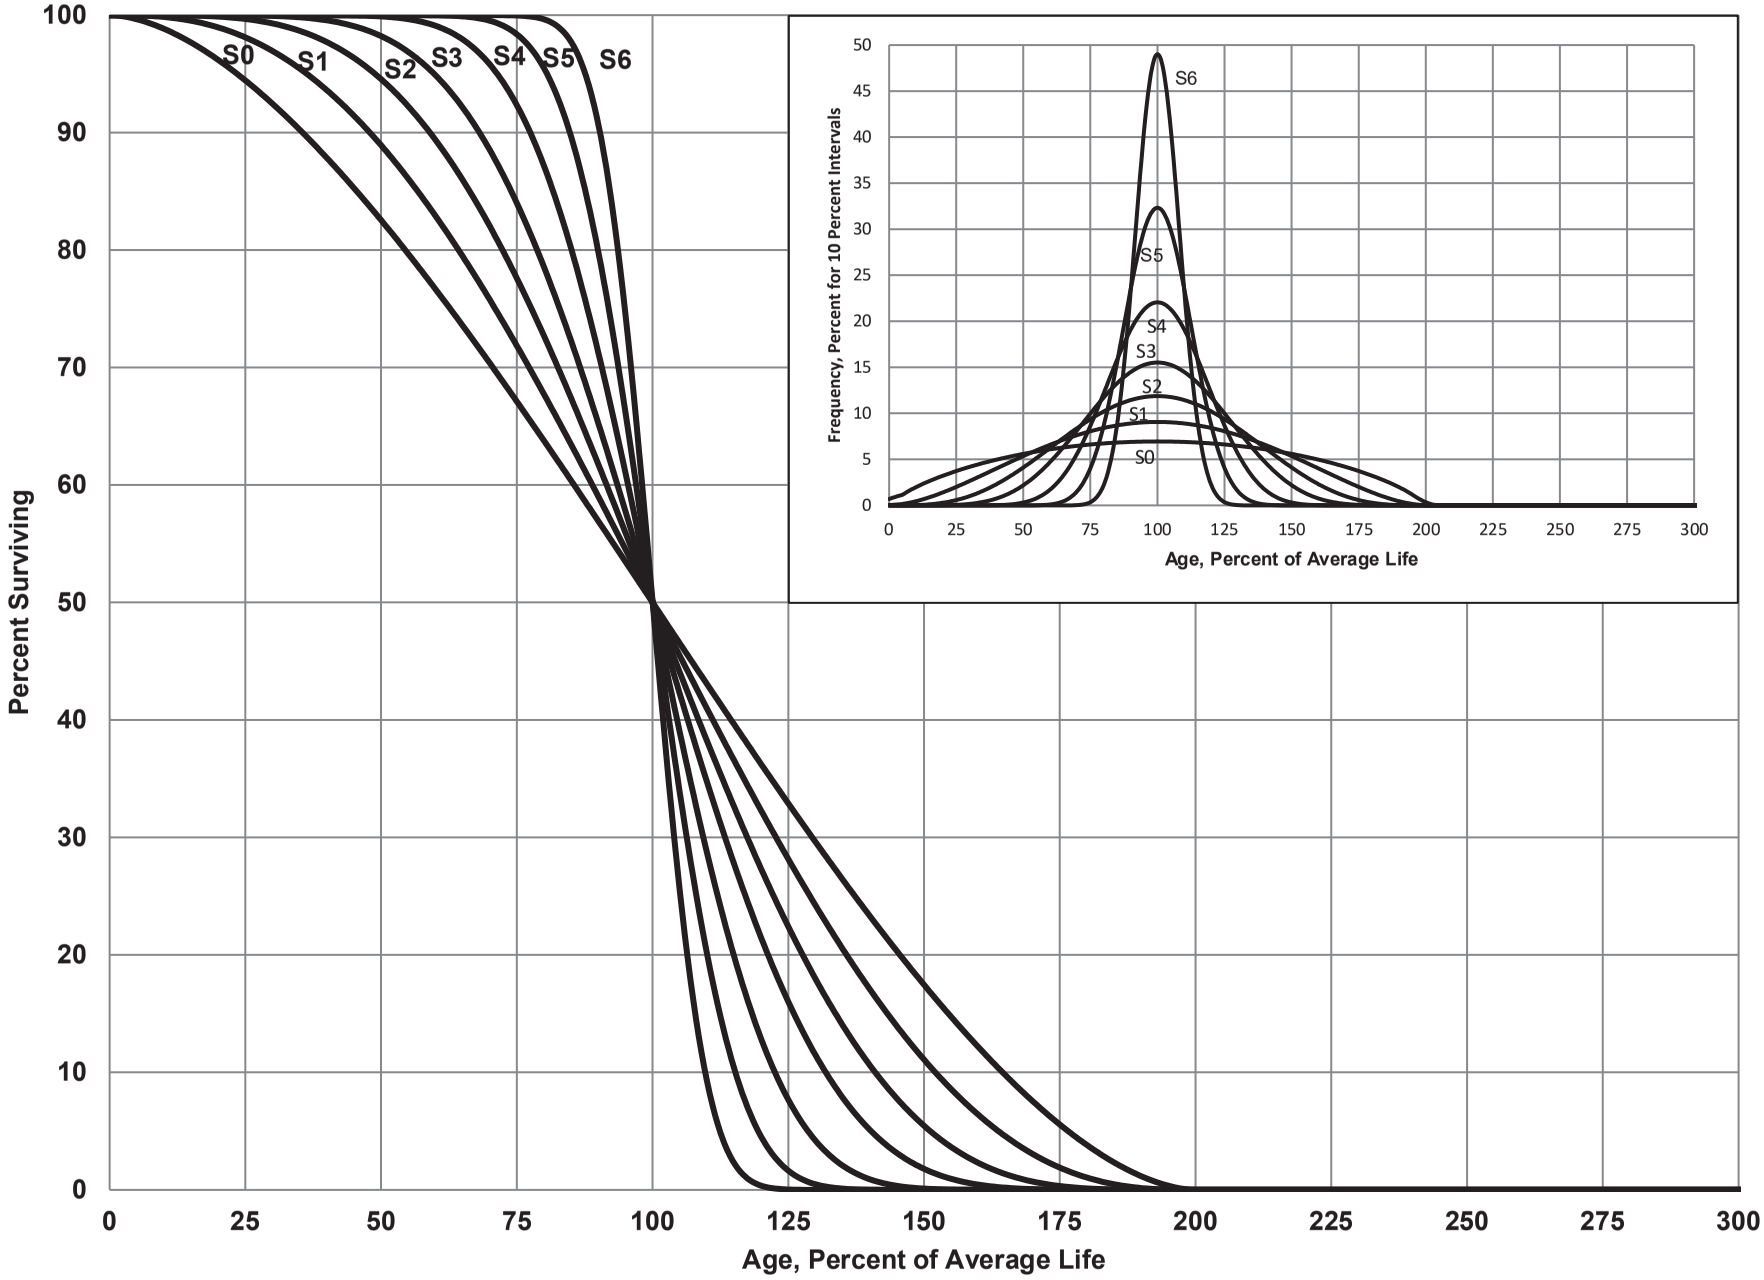

FIGURE 3. SYMMETRICAL OR "S" IOWA TYPE SURVIVOR CURVES

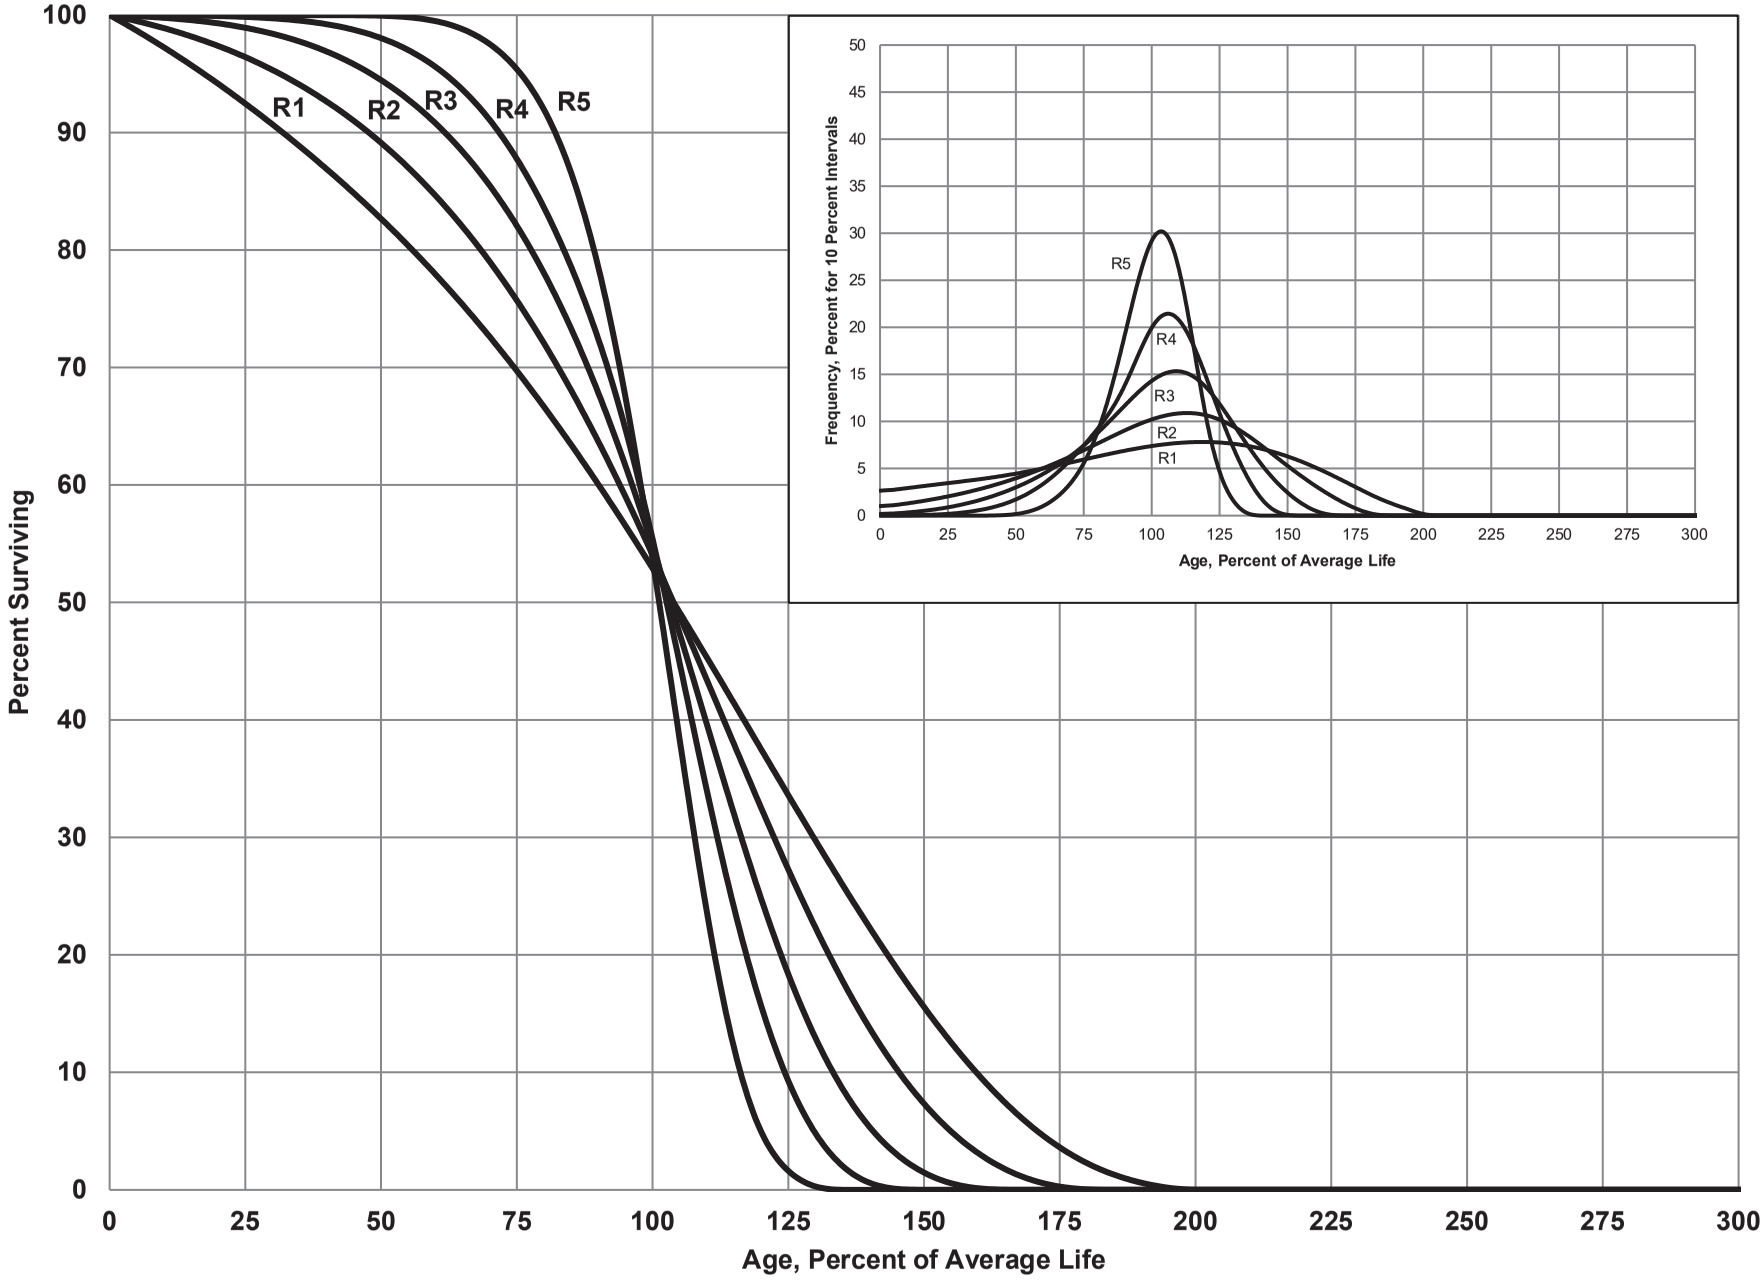

FIGURE 4. RIGHT MODAL OR "R" IOWA TYPE SURVIVOR CURVES

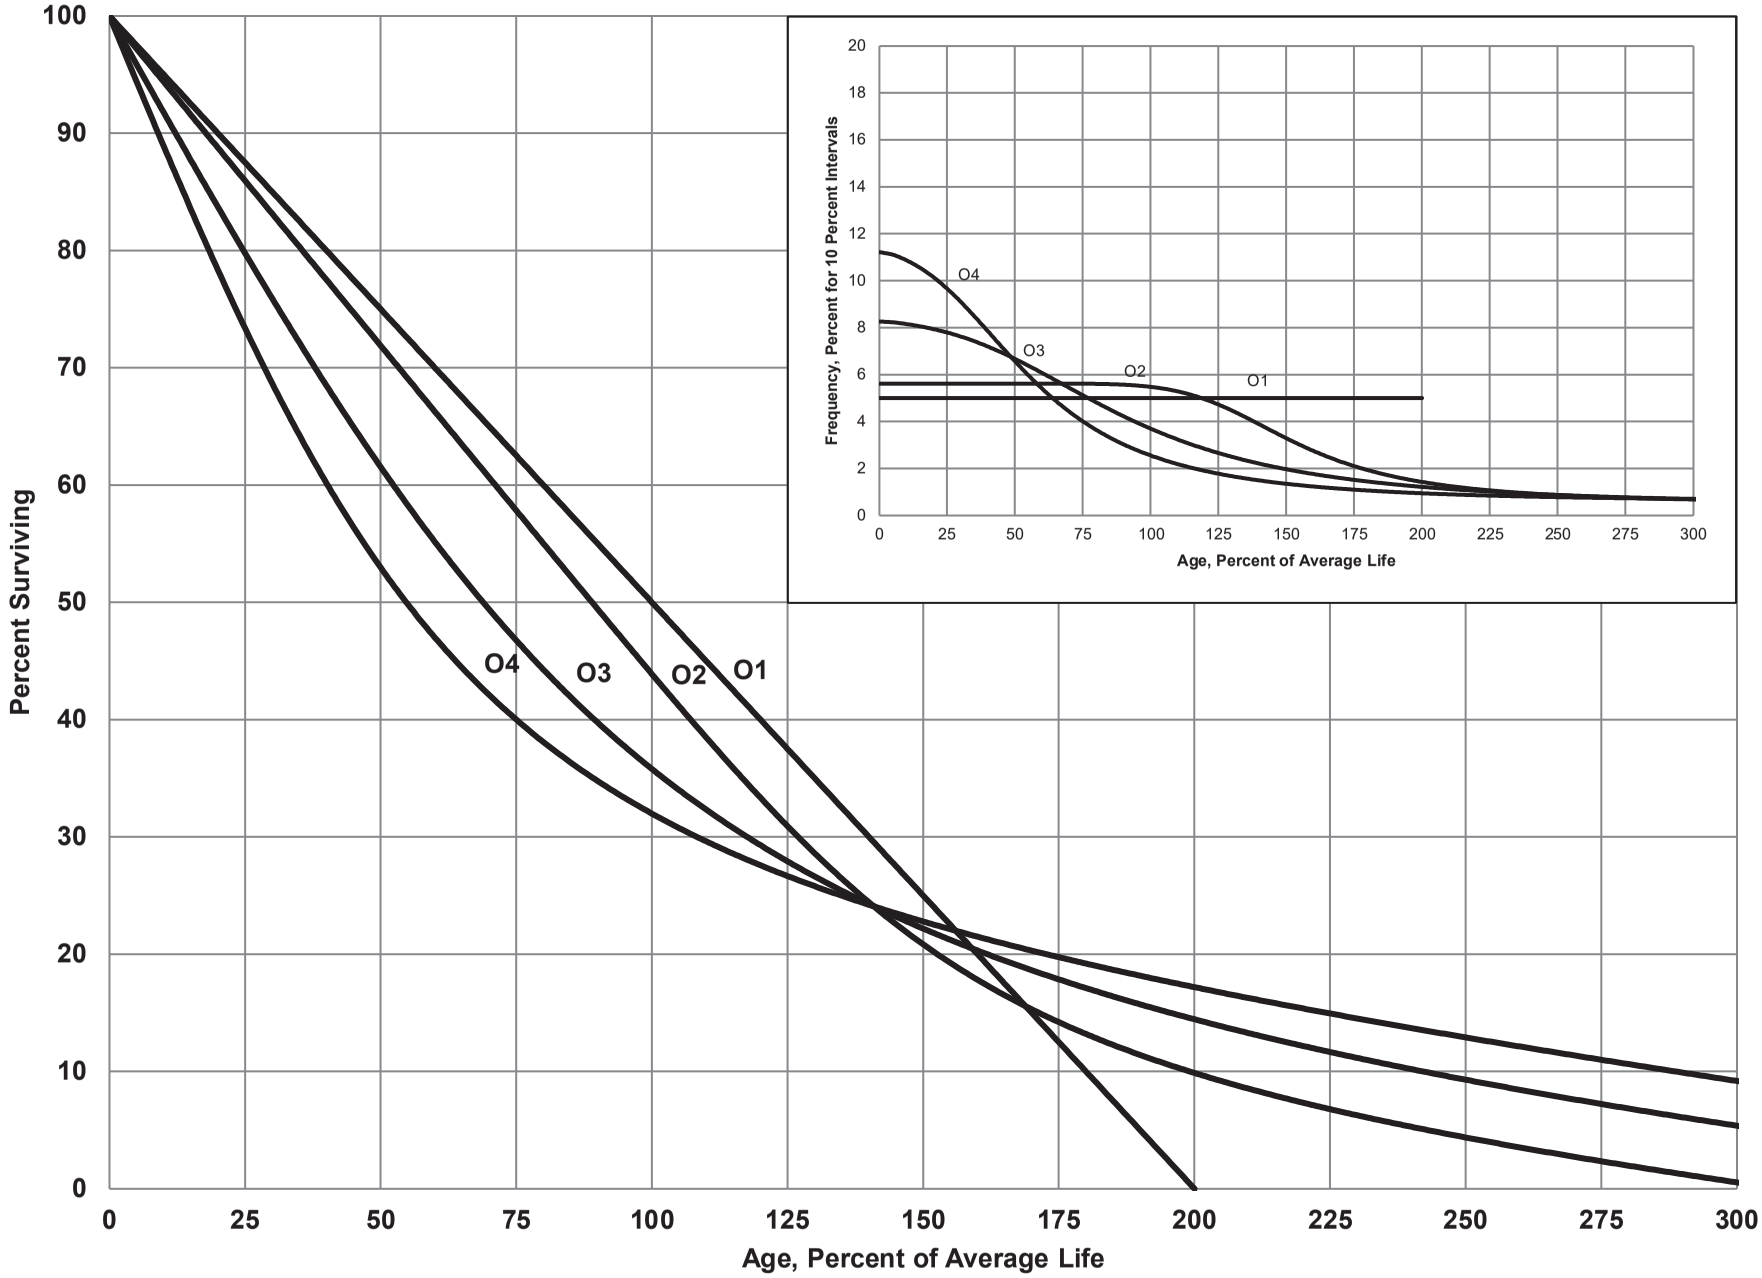

FIGURE 5. ORIGIN MODAL OR "O" IOWA TYPE SURVIVOR CURVES

These curve types have also been presented in subsequent Experiment Station bulletins and in the text, "Engineering Valuation and Depreciation."[1] In 1957, Frank V. B. Couch, Jr., an Iowa State College graduate student, submitted a thesis presenting his development of the fourth family consisting of the four O type survivor curves.

Retirement Rate Method of Analysis

The retirement rate method is an actuarial method of deriving survivor curves using the average rates at which property of each age group is retired. The method relates to property groups for which aged accounting experience is available and is the method used to develop the original stub survivor curves in this study. The method (also known as the annual rate method) is illustrated through the use of an example in the following text and is also explained in several publications including "Statistical Analyses of Industrial Property Retirements,"[2] "Engineering Valuation and Depreciation,"[3] and "Depreciation Systems."[4]

The average rate of retirement used in the calculation of the percent surviving for the survivor curve (life table) requires two sets of data: first, the property retired during a period of observation, identified by the property's age at retirement; and second, the property exposed to retirement at the beginning of the age intervals during the same period. The period of observation is referred to as the experience band. The band of years which represent the installation dates of the property exposed to retirement during the experience band is referred to as the placement band. An example of the calculations used in the development of a life table follows. The example includes schedules of annual aged property transactions, a schedule of plant exposed to retirement, a life table and illustrations of smoothing the stub survivor curve.

Schedules of Annual Transactions in Plant Records

The property group used to illustrate the retirement rate method is observed for the experience band 2016-2025 for which there were placements during the years 2011-2025. In order to illustrate the summation of the aged data by age interval, the data were compiled in the manner presented in Schedules 1 and 2 on pages II-11 and II-12. In Schedule 1, the year of installation (year placed) and the year of retirement are shown. The age interval during which a retirement occurred is determined from this information. In the example which follows, $10,000 of the dollars invested in 2010 were retired in 2016. The $10,000 retirement occurred during the age interval between 4½ and 5½ years on the basis that approximately one-half of the amount of property was installed prior to and subsequent to July 1 of each year. That is, on the average, property installed during a year is placed in service at the midpoint of the year for the purpose of the analysis. All retirements also are stated as occurring at the midpoint of a one-year age interval of time, except the first age interval which encompasses only one-half year.

The total retirements occurring in each age interval in a band are determined by summing the amounts for each transaction year-installation year combination for that age interval. For example, the total of $143,000 retired for age interval 4½-5½ is the sum of the retirements entered on Schedule 1 immediately above the stair step line drawn on the table beginning with the 2016 retirements of 2011 installations and ending with the 2025 retirements of the 2020 installations. Thus, the total amount of 143 for age interval 4½-5½ equals the sum of:

10 + 12 + 13 + 11 + 13 + 13 + 15 + 17 + 19 + 20.

[a] Transfer Affecting Exposures at Beginning of Year
[b] Transfer Affecting Exposures at End of Year
[c] Sale with Continued Use
Parentheses Denote Credit Amount.

In Schedule 2, other transactions which affect the group are recorded in a similar manner. The entries illustrated include transfers and sales. The entries which are credits to the plant account are shown in parentheses. The items recorded on this schedule are not totaled with the retirements, but are used in developing the exposures at the beginning of each age interval.

Schedule of Plant Exposed to Retirement

The development of the amount of plant exposed to retirement at the beginning of each age interval is illustrated in Schedule 3 on page II-14. The surviving plant at the beginning of each year from 2016 through 2025 is recorded by year in the portion of the table headed "Annual Survivors at the Beginning of the Year." The last amount entered in each column is the amount of new plant added to the group during the year. The amounts entered in Schedule 3 for each successive year following the beginning balance or addition are obtained by adding or subtracting the net entries shown on Schedules 1 and 2. For the purpose of determining the plant exposed to retirement, transfers-in are considered as being exposed to retirement in this group at the beginning of the year in which they occurred, and the sales and transfers-out are considered to be removed from the plant exposed to retirement at the beginning of the following year. Thus, the amounts of plant shown at the beginning of each year are the amounts of plant from each placement year considered to be exposed to retirement at the beginning of each successive transaction year. For example, the exposures for the installation year 2021 are calculated in the following manner:

Exposures at age 0	= amount of addition	= $750,000
Exposures at age ½	= $750,000 - $ 8,000	= $742,000
Exposures at age 1½	= $742,000 - $18,000	= $724,000
Exposures at age 2½	= $724,000 - $20,000 - $19,000	= $685,000
Exposures at age 3½	= $685,000 - $22,000	= $663,000

SCHEDULE 3. PLANT EXPOSED TO RETIREMENT
JANUARY 1 OF EACH YEAR 2016-2025
SUMMARIZED BY AGE INTERVAL

Experience Band 2016-2025

Placement Band 2011-2025

Year Placed	Exposures, Thousands of Dollars Annual Survivors at the Beginning of the Year 2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Total at Beginning of Age Interval	Age Interval
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
2011	255	245	234	222	209	195	239	216	192	167	167	13½-14½
2012	279	268	256	243	228	212	194	174	153	131	323	12½-13½
2013	307	296	284	271	257	241	224	205	184	162	531	11½-12½
2014	338	330	321	311	300	289	276	262	242	226	823	10½-11½
2015	376	367	357	346	334	321	307	297	280	261	1,097	9½-10½
2016	420[a]	416	407	397	386	374	361	347	332	316	1,503	8½-9½
2017		460[a]	455	444	432	419	405	390	374	356	1,952	7½-8½
2018			510[a]	504	492	479	464	448	431	412	2,463	6½-7½
2019				580[a]	574	561	546	530	501	482	3,057	5½-6½
2020					660[a]	653	639	623	628	609	3,789	4½-5½
2021						750[a]	742	724	685	663	4,332	3½-4½
2022							850[a]	841	821	799	4,955	2½-3½
2023								960[a]	949	926	5,719	1½-2½
2024									1,080[a]	1,069	6,579	½-1½
2025										1,220[a]	7,490	0-½
Total	1,975	2,382	2,824	3,318	3,872	4,494	5,247	6,017	6,852	7,799	44,780	

[a]Additions during the year

For the entire experience band 2016-2025, the total exposures at the beginning of an age interval are obtained by summing diagonally in a manner similar to the summing of the retirements during an age interval (Schedule 1). For example, the figure of 3,789, shown as the total exposures at the beginning of age interval 4½-5½, is obtained by summing:

255 + 268 + 284 + 311 + 334 + 374 + 405 + 448 + 501 + 609.

Original Life Table

The original life table, illustrated in Schedule 4 on page II-16, is developed from the totals shown on the schedules of retirements and exposures, Schedules 1 and 3, respectively. The exposures at the beginning of the age interval are obtained from the corresponding age interval of the exposure schedule, and the retirements during the age interval are obtained from the corresponding age interval of the retirement schedule. The retirement ratio is the result of dividing the retirements during the age interval by the exposures at the beginning of the age interval. The percent surviving at the beginning of each age interval is derived from survivor ratios, each of which equals one minus the retirement ratio. The percent surviving is developed by starting with 100% at age zero and successively multiplying the percent surviving at the beginning of each interval by the survivor ratio, i.e., one minus the retirement ratio for that age interval. The calculations necessary to determine the percent surviving at age 5½ are as follows:

Percent surviving at age 4½	=	88.15				
Exposures at age 4½	=	3,789,000				
Retirements from age 4½ to 5½	=	143,000				
Retirement Ratio	=	143,000	÷	3,789,000	=	0.0377
Survivor Ratio	=	1.000	-	0.0377	=	0.9623
Percent surviving at age 5½	=	(88.15)	x	(0.9623)	=	84.83

The totals of the exposures and retirements (columns 2 and 3) are shown for the purpose of checking with the respective totals in Schedules 1 and 3. The ratio of the total retirements to the total exposures, other than for each age interval, is meaningless.

SCHEDULE 4. ORIGINAL LIFE TABLE
CALCULATED BY THE RETIREMENT RATE METHOD

Experience Band 2016-2025 Placement Band 2011-2025

(Exposure and Retirement Amounts are in Thousands of Dollars)

Age at Beginning of Interval	Exposures at Beginning of Age Interval	Retirements During Age Interval	Retirement Ratio	Survivor Ratio	Percent Surviving at Beginning of Age Interval
