Exhibit BA-9

AEP Energy fixed rate offer included in Exhibit BA-8

Electric Generation Supplier Disclosure Statement and Contract Summary ("Contract Summary")

RESIDENTIAL - FIXED PRICE – PENNSYLVANIA	
Electric Generation Supplier (EGS) Information	AEP Energy, Inc. 1 Riverside Plaza, 20th Floor, Columbus, OH 43215, Attn: Customer Care AEPenergy.com/contact-us | 866-258-3782 AEP Energy is responsible for the generation charges shown on your bill.
Price Structure	Fixed Price: This Agreement is for an all-inclusive per kilowatt-hour ("kWh") price that will remain the same for the Term of the Agreement. See Section 2 for details.
Generation/Supply Price	**12.85** cents per kWh for Generation and Transmission Services. Price excludes taxes, utility Distribution Service charges and other non-bypassable utility charges and fees. See Section 2 for details.
Statement Regarding Savings	AEP Energy does not represent any guaranteed savings. The prices and charges paid to AEP Energy under this Agreement may not always provide savings to you. See "Other Important Disclosures" for details.
Deposit Requirements	None.
Contract Start Date	This Agreement will start upon the start of service date provided by the Electric Distribution Company in the Electric Distribution Company's confirmation letter to you ("Start Date"). See Section 4 for details.
Contract Duration/Length	6 monthly billing cycles ("Term").
Cancellation/Early Termination Fees	You may cancel this Agreement at any time during the Term for any reason and will not be assessed a penalty or fee. See Section 6 for details.
End of Contract	***This Agreement may be automatically renewed with advance written notices. The Initial Notice will be sent to you forty-five (45) to sixty (60) calendar days prior to the expiration of this Agreement and the second notice will be sent to you no fewer than thirty (30) calendar days prior to the expiration of this Agreement. If you fail to respond to these notifications, this Agreement can be converted to a renewal agreement that will not include any cancellation/early termination fees. See Section 8 for details.***

Right of Rescission	You have the right to rescind your enrollment without penalty in writing or orally or by submitting an electronic rescission request to care@aepenergy.com at any time before midnight of the third (3rd) business day following your receipt of this Agreement.

Electric Generation Supplier Terms and Conditions and Disclosure Statement

TERM	GENERATION/ SUPPLY PRICE	CANCELLATION/ EARLY TERMINATION FEE	CONTRACT RENEWAL	OTHER
6 monthly billing cycles ("Term").	**12.85** cents per kWh for Generation and Transmission Services. Price excludes taxes, utility Distribution Service charges and other non-bypassable utility charges and fees.	You may cancel this Agreement at any time during the Term for any reason and will not be assessed a penalty or fee. See **Section 6** for details.	Your Agreement may be automatically renewed with advance written notices. See Section 8 for details.	

TERMS AND CONDITIONS: These Electric Generation Supplier Terms and Conditions and Disclosure Statement and the attached Contract Summary, which is incorporated herein by reference, form your agreement ("Agreement") for Retail Electric Supply with AEP Energy. The words "we" and "our" also refer to AEP Energy, and the words "you", "your", and "I" refer to the customer.

BACKGROUND

- AEP Energy, Inc. ("AEP Energy") is licensed by the Pennsylvania Public Utility Commission ("PUC") to offer and supply electric generation services in Pennsylvania. Our PUC license number is A-2009-2132755.
- As an Electric Generation Supplier ("EGS"), AEP Energy will supply the electric generation and provide applicable transmission services to the interconnection (the "Delivery Point") of your Electric Distribution Company ("EDC") based on your usage. Your EDC will then distribute or deliver the electricity to you. Your Distribution Service will remain with your EDC, which is regulated by the PUC.
- You will receive a single bill from your EDC that will contain the EDC's charges and AEP Energy's charges.
- AEP Energy sets the generation prices and charges that you pay. The PUC regulates distribution prices and services. The Federal Energy Regulatory Commission regulates transmission prices and services.
- This is an agreement for Retail Electric Supply (as hereinafter defined) between you and AEP Energy. **Please keep a copy of this Agreement for your records.**
- Right of Rescission – You may cancel this Agreement in writing or orally at any time before midnight of the third (3rd) business day after receiving this Agreement. See Section 11 for details.

DEFINITIONS:

- "Generation Charge" means the charge for producing electricity. Generation service is competitively priced and is not regulated by the PUC. If you purchase electricity from an EGS, your generation charge will depend on the contract between you and your supplier.
- "Generation Service" means the production of electricity. This service is included in the price that AEP Energy charges you, as described herein.
- "Generation-Related Charges" means those charges or costs associated with the procurement and supply of electricity.
- "Transmission Charge" means the cost for transporting electricity from the generation source to your EDC. For most electric customers who select a new supplier, transmission costs will be included in the charges from your new supplier. The Federal Energy Regulatory Commission regulates retail transmission prices and services. This charge will vary with your source of supply.
- "Transmission Service" means moving high voltage electricity from a generation facility to the distribution lines of an EDC. This service is included in the price that AEP Energy charges you, as described in the herein.
- "Distribution Service" means the physical delivery of electricity to customers by the EDC. The PUC regulates distribution prices and services.
- "Non-bypassable utility charges and fees" means those EDC charges and fees payable by you regardless of whether the EDC or an EGS provides Generation Service.

OTHER IMPORTANT DISCLOSURES. I affirm my agreement that AEP Energy and entities calling on AEP Energy's behalf may make calls to the number(s) I have provided, or will provide during the term of this Agreement, regarding my account, including about amounts due. **Price Comparison Qualification.** Please be advised that the EDC's default service rates generally change from time to time. AEP Energy therefore does not provide any guarantee of savings in comparison to the EDC's default service rates during the Term or the term of any renewals of this Agreement. If you received any price comparison(s) in connection with your enrollment, by accepting this offer from AEP Energy, you understand and agree that AEP Energy has informed you, prior to entering into this Agreement, that no guarantee of savings during the Term or the term of any renewal is being provided.

1. **Eligibility.** Residential customer accounts that are on residential

rates codes are eligible for this offer from AEP Energy. AEP Energy reserves the right to refuse enrollment to any customer who is not current on their EDC charges. If you are now or become enrolled in a utility's customer assistance program, we reserve the right to cancel this contract pursuant to its cancellation terms.

2. **Price.** During the initial "Term" (as described in the Contract Summary and listed on the first page above) of this Agreement, you agree to pay AEP Energy the price stated in the Contract Summary and on the first page above under the heading "Generation/Supply Price" for all kilowatt-hours ("kWh") of electric energy metered by the EDC, which is inclusive of all applicable combined Generation Charges, Transmission Charges and Transmission Services (if bypassable), Generation Service, Generation-Related Charges, energy losses, capacity, Renewable Energy Credits (RECs), if purchasing a renewable energy plan, and estimated current total state taxes, including any applicable taxes and including current Gross Receipts Tax (GRT), and is applicable 24 hours a day ("Retail Electric Supply"). In addition to AEP Energy's charges, you will be charged by your EDC for Distribution Service and other EDC charges and fees. Your price does not include any EDC or otherwise non-bypassable charges for services under the applicable electric rate tariff or any applicable (and not expressly included) state and local taxes.

3. **Material Adverse Change.** To the extent you have a fixed rate for Retail Electric Supply from AEP Energy and performance of this Agreement becomes uneconomical for AEP Energy due to events that are beyond AEP Energy's reasonable control and/or AEP Energy is subject to additional or increased costs that are imposed by law, rule, regulation or tariff, or PUC rule or order, AEP Energy may propose change(s) to the terms of this Agreement, including, but not limited to, passing through such additional costs and, thus, increasing your price. If any of the above situations occur, AEP Energy may offer you new terms for this Agreement, in which case you will receive the notices described in Section 8 below. You must indicate your acceptance of the new terms as specified in the notices. If you do not contact AEP Energy to accept the new terms, (a) this Agreement will end on the date specified in the notices, (b) you may be returned to your EDC for Retail Electric Supply, (c) you will not be responsible for any cancellation/termination fee (if any) set forth in the Contract Summary and Section 6 and (d) you must still pay all AEP Energy charges through the date you are returned to your EDC or switched to another EGS for service.

4**. Term (Length of Agreement).** Your service from AEP Energy will begin with the start of service date provided by the EDC in the EDC's confirmation letter to you, and this Agreement shall be considered executed by AEP Energy, following: (a) the end of the Rescission Period; (b) the acceptance of your enrollment request by AEP Energy (at its discretion and consistent with Section 7 below); and (c) acceptance of your enrollment by your EDC, and will continue for the Term, unless otherwise cancelled or renewed, ending on the date your EDC effectuates your switch back to EDC default service or to another EGS. The Term (in months) is shown in the Contract Summary. Your start of service date is determined by your EDC; therefore we are not liable for any resulting delay in commencement of your service.

5. **Billing.** You will continue to receive a single bill, typically on a monthly basis, from your EDC that will contain both your EDC and AEP Energy charges. AEP Energy offers budget billing for AEP Energy's charges. If you do not pay your bill by the due date, AEP Energy may cancel this Agreement. Upon termination you will be returned to your EDC as a customer. You will remain responsible to pay AEP Energy for any electricity used before this Agreement ends. Further, your failure to pay EDC charges may result in your electric service being disconnected in accordance with the EDC tariff.

6. **Cancellation/Termination Provisions/Failure to Pay.** After your service begins, you may cancel this Agreement at any time during the Term for any reason and will not be assessed a penalty or fee. You may cancel this Agreement by contacting AEP Energy using the contact information set forth in Section 18. At that time, you will be required to select another supplier or return to the EDC for electric generation service. When you cancel, you will remain responsible to pay AEP Energy for all kWh of electric energy used before this Agreement is cancelled.

Any failure to pay your bill shall be deemed a breach of this Agreement permitting AEP Energy to cancel this Agreement. AEP Energy may decide to cancel this Agreement if there is a Material Adverse Change as described in Section 3. If we cancel this Agreement for any reason other than customer non-payment, we will provide you thirty (30) days written notice.

This Agreement is automatically cancelled if (a) your electric service is terminated by your EDC or (b) your EDC switches your Retail Electric Supply to another EGS or to the EDC.

If you relocate to a new address within the service territory of your current EDC, this contract may, at the discretion of AEP Energy, either continue under the same terms and conditions or be cancelled with your Retail Electric Supply switched to your current EDC.

7. **Your Consent and Information Release Authorization.** By accepting this offer from AEP Energy, you understand and agree to the terms and conditions of this Agreement with AEP Energy. You authorize AEP Energy to obtain information from the EDC that includes, but is not limited to: your billing history, payment history, historical and expected electricity usage, meter-readings, characteristics of electricity service, address, telephone number, and account number(s). AEP Energy will maintain the confidentiality of your personal information including name, address, telephone number, electric usage and historic payment information as required by applicable PUC regulations and federal and State laws.

You agree that AEP Energy may share your information with its subsidiaries and/or affiliates, your utility, and any service vendor or others AEP Energy uses to support its business, including any third-party entities with whom we have relationships. You may rescind these authorizations and restrict the release of your information by

contacting us by phone at 1-866-258-3782. AEP Energy reserves the right, to the extent permitted by law, to reject your enrollment or terminate this contract and cancel your service in accordance with this contract in the event these authorizations are rescinded.

8. **Contract Renewal/Change in Terms.** If you have a fixed term contract approaching the expiration date, or whenever AEP Energy wants to change the contract, you will receive two separate notices before the contract ends or the changes happen. You will receive the first notice 45-60 days before, and the second notice 30 days before the expiration date or the date the change becomes effective. These notices will explain your options. If you fail to respond within ten (10) calendar days after your receipt of the second notice, this Agreement can be automatically renewed or changed in accordance with the terms in the notices. Any automatic renewal of this Agreement will not include any cancellation/early termination fees. Consistent with applicable rules, AEP Energy can convert a fixed term contract into either a month-to-month contract, terminable by either Party upon thirty (30) days prior written notice, or another fixed term contract. This Agreement will end, and your customer account will return to the EDC, without penalty or prejudice to either Party, upon the occurrence of any of the following: (1) in its sole discretion, AEP Energy chooses not to renew or convert this Agreement; or (2) at any time and at such Party's option, either you or AEP Energy elect to cancel a renewal or month-to-month term contract under this Agreement. By providing AEP Energy your email address, you agree to receive notices for contract renewal and changes to terms and conditions electronically, where permitted under applicable law.

9. **Dispute Procedures**. Prior to initiating any action, suit or proceeding, you and AEP Energy both agree to try to resolve any dispute informally. To initiate informal dispute resolution, including with any questions concerning the terms of service, billing questions, disputes and complaints, contact AEP Energy by phone at 1-866-258-3782 (toll-free) M-F 8 AM – 7 PM & Sa 9 AM - 1 PM, ET or in writing at AEP Energy, 1 Riverside Plaza, 20th Floor, Columbus, OH 43215, Attn: Customer Care. Our web address is AEPenergy.com/contact-us. If your complaint is not resolved after you have called AEP Energy, you may call the PUC. The PUC can be reached toll free at 1-800-692-7380.

10. **CLASS ACTION WAIVER AND WAIVER OF JURY TRIAL**. Both you and AEP Energy agree that all actions, suits and/or proceedings arising out of, related to, or in connection with this Agreement shall be brought in the plaintiff's or claimant's individual capacity and not as a plaintiff, class member, or representative class member in any purported class action, collective action, or representative action or proceeding. THE PARTIES WAIVE ANY RIGHT TO ASSERT ANY CLAIMS AGAINST THE OTHER PARTY (INCLUDING ITS AFFILIATES, AGENTS, EMPLOYEES, DIRECTORS, OFFICERS, AND ASSIGNS) AS A REPRESENTATIVE OR MEMBER IN ANY CLASS ACTION, COLLECTIVE ACTION, OR REPRESENTATIVE ACTION OR PROCEEDING, EXCEPT WHERE SUCH WAIVER IS PROHIBITED BY LAW OR DEEMED BY A COURT OF LAW TO BE AGAINST PUBLIC POLICY. TO THE EXTENT EITHER PARTY IS PERMITTED BY LAW OR COURT OF LAW TO PROCEED WITH A CLASS OR REPRESENTATIVE ACTION AGAINST THE OTHER, THE PARTIES AGREE THAT: (A) THE PREVAILING PARTY SHALL NOT BE ENTITLED TO RECOVER ATTORNEYS' FEES OR COSTS ASSOCIATED WITH PURSUING THE CLASS OR REPRESENTATIVE ACTION (NOT WITHSTANDING ANY OTHER PROVISION IN THIS AGREEMENT); AND (B) THE PARTY WHO INITIATES THE PROCEEDING OR PARTICIPATES AS A NAMED REPRESENTATIVE OF ANY PURPORTED CLASS WILL NOT SUBMIT A CLAIM OR OTHERWISE PARTICIPATE IN ANY RECOVERY SECURED THROUGH THE CLASS OR REPRESENTATIVE ACTION. Nothing in this Agreement shall impair your right to make an informal or a formal complaint to the PUC. YOU AND AEP ENERGY BOTH AGREE THAT BOTH PARTIES ARE WAIVING A RIGHT TO A JURY TRIAL. The dispute resolution provisions set forth in Section 9 and this section shall survive termination of the Agreement.

11. **RIGHT OF RESCISSION.** You have the right to rescind your enrollment without penalty in writing or orally or by submitting an electronic rescission request to care@aepenergy.com at any time before midnight of the third (3rd) business day following your receipt of this Agreement (the "Rescission Period"). If this Agreement is not rescinded during this period, your enrollment will be sent to your EDC. A confirmation notice of enrollment with AEP Energy will be sent to you by your EDC.

12. **Warranty and Force Majeure.** AEP Energy warrants title to all electricity sold hereunder. THE WARRANTY SET FORTH IN THE PRECEDING SENTENCE IS EXCLUSIVE, AND AEP ENERGY EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES, WHETHER STATUTORY, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR ARISING OUT OF ANY COURSE OF DEALING OR PURPOSE OR USAGE OF TRADE. AEP Energy will make commercially reasonable efforts to provide your electric service but does not guarantee a continuous supply of electricity. AEP Energy will not be responsible for any failure to commence or end Generation Service on the relevant date described herein. Certain causes and events are out of the reasonable control of AEP Energy ("Force Majeure Events") and may result in interruptions in service. AEP Energy is not liable for damages caused by acts of God, changes in laws, rules or regulations or other acts of any governmental authority (including the PUC or Regional Transmission Organization), accidents, strikes, labor troubles, required maintenance work, inability to access the EDC's system, nonperformance by the EDC, terrorism, sabotage, or any other cause beyond AEP Energy's reasonable control. If a Force Majeure Event occurs which renders AEP Energy unable to perform in whole or in part under this Agreement, our performance under this

Agreement shall be excused for the duration of such event.

13. **LIMITATION OF LIABILITY AND REMEDIES.** UNLESS OTHERWISE EXPRESSLY PROVIDED HEREIN, TO THE EXTENT PERMITTED BY APPLICABLE LAWS AND REGULATIONS, ANY LIABILITY UNDER THIS AGREEMENT WILL BE LIMITED TO DIRECT, ACTUAL DAMAGES AS THE SOLE AND EXCLUSIVE REMEDY, AND ALL OTHER REMEDIES OR DAMAGES AT LAW OR IN EQUITY ARE WAIVED. NEITHER PARTY WILL BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL, PUNITIVE, TREBLE, EXEMPLARY OR INDIRECT DAMAGES, WHETHER IN TORT OR CONTRACT, UNDER ANY INDEMNITY PROVISIONS OR OTHERWISE, IN CONNECTION WITH THIS AGREEMENT. THE LIMITATIONS IMPOSED ON REMEDIES AND DAMAGE MEASUREMENT WILL BE WITHOUT REGARD TO CAUSE, INCLUDING NEGLIGENCE OF ANY PARTY, WHETHER SOLE, JOINT, CONCURRENT, ACTIVE OR PASSIVE AND SHALL SURVIVE TERMINATION, CANCELLATION, SUSPENSION, COMPLETION OR EXPIRATION OF THIS AGREEMENT; PROVIDED NO SUCH LIMITATION SHALL APPLY TO DAMAGES RESULTING FROM THE WILLFUL MISCONDUCT OF ANY PARTY. AEP ENERGY'S TOTAL LIABILITY UNDER THIS AGREEMENT WILL NOT EXCEED AN AMOUNT EQUAL TO THE CHARGES ON YOUR SINGLE LARGEST MONTHLY INVOICE FOR GENERATION SERVICE DURING THE TWELVE (12) MONTHS PRECEDING THE APPLICABLE CLAIM. NOTHING IN THIS AGREEMENT SHALL CONSTITUTE A WAIVER OF ANY RIGHTS YOU HAVE UNDER PENNSYLVANIA OR FEDERAL CONSUMER PROTECTION LAWS.

14. **Your Liability and Indemnification of AEP Energy.** You assume full responsibility for retail electricity supplied to you at and after the Delivery Point and agree to and shall indemnify, defend, and hold harmless AEP Energy, its parent company and all of its affiliates, and all of their respective managers, members, officers, directors, shareholders, associates, employees, servants, and agents from and against all claims, losses, expenses (including attorneys' fees), damages, demands, judgments, causes of action, and suits of any kind (hereinafter collectively referred to as "Claims"), including Claims for personal injury, death, or damages to property occurring at and after the Delivery Point, including upon your residential premises, arising out of or related to the Generation Service and/or your performance under this Agreement.

15. **Assignment and Severability.** You shall not assign this Agreement or your rights hereunder without the prior written consent of AEP Energy. AEP Energy may, without your consent, assign this Agreement to another EGS, including any successor, in accordance with the rules and regulations of the PUC. Any provision or section of this Agreement declared or rendered void, unlawful, or otherwise unenforceable shall not otherwise affect the lawful obligations that arise under this Agreement.

16. **Choice of Law and Venue.** This Agreement shall be construed and enforced in accordance with the laws of the Commonwealth of Pennsylvania without giving effect to any conflicts of law principles which otherwise might be applicable. Any action arising out of this Agreement shall be litigated exclusively in the federal court, if it has jurisdiction over the matter, or the state court, if there is no federal jurisdiction, located within Allegheny County, Pennsylvania. You and AEP Energy expressly consent and irrevocably submit to the jurisdiction of said courts for purpose of any such actions and covenant not to sue in any other court. You and AEP Energy further agree not to raise, and waive, any objections or defenses based upon venue or forum non conveniens.

17. **Miscellaneous.** AEP Energy assumes no responsibility or liability for the following items that are the responsibility of the EDC: operation and maintenance of the EDC's electrical system, any interruption of service, termination of service, or deterioration of the EDC's service. In the event of a power outage, you should contact your local EDC (see Section 18 below). You are responsible for providing AEP Energy with accurate account information. If said information is incorrect, AEP Energy reserves the right to re-price the applicable account(s). AEP Energy reserves the right to re-price any account(s) or return you to the EDC if your rate code or meter type is changed and/or the account is no longer eligible for the retail electricity choice program. Any notice, demand or other communication to be given hereunder, including, without limitation, any renewal or termination notice, shall be in writing and sent to the address or email address maintained on file for you. By entering this Agreement, you represent and agree that the account served by AEP Energy under this Agreement is a residential account, in the EDC's service territory, and you are not an existing AEP Energy customer. AEP Energy reserves the right, at any time, to not enroll or to cancel service to customer locations that do not meet the preceding criteria and return you to the EDC (or previous AEP Energy product, if applicable) with no penalty to AEP Energy. This Agreement supersedes all prior written or oral agreements or understandings.

You agree and authorize that AEP Energy and/or its third-party service providers may listen to, monitor, and/or record telephone your calls with us and/or any of our affiliates, agents, and/or contractors as part of providing services under this Agreement. You expressly agree that these contacts are not unsolicited for purposes of any state or federal law. You also agree to receive communications from AEP Energy via email at the email address you provide (if any) to AEP Energy. It is your responsibility to notify AEP Energy of any changes to your contact information, including your email address.

18. **Contact Information.**

AEP Energy, 1 Riverside Plaza, 20th Floor, Columbus, OH 43215, Attn: Customer Care. For more information, call 1-866-258-3782 or visit AEPenergy.com/contact-us.

Information on generation energy sources, energy efficiency, environmental impacts or historical billing data is available from AEP Energy upon request.

Information about shopping for an electric supplier is available at www.PaPowerSwitch.com, by calling the Commission at (800) 692-7380 and the Office of Consumer Advocate at (800) 684-6560 or at www.oca.state.pa.us.

AEP Energy is an Electric Generation Supplier (EGS) and is not soliciting on behalf of and is not affiliated with or an agent of your Electric Distribution Company. Electricity is the product of a mix of generation energy sources that is delivered over a system of wires. Customers do not need to purchase electric generation supply from AEP Energy in order to continue to receive regulated service from their utility.

Exhibit BA-10

APG&E fixed rate offer included in Exhibit BA-8

Terms of Service: The following are the Terms of Service for this Agreement between APG&E and Customer for the purchase of electricity.

1. Agreement to Purchase Energy: APG&E is certified as a REP by PUC and is not affiliated with any Utility. Customer hereby appoints APG&E as its limited agent for the purpose of acquiring the supplies necessary to meet its electricity needs. Delivery of electricity to Customer's Service Locations and maintenance of the electric delivery system is performed by Utility. PUC regulates distribution prices and services. FERC and ISO/RTO regulates transmission prices and services. APG&E agrees to sell, and Customer agrees to purchase and accept the quantity of electricity necessary to meet Customer's requirements based upon consumption data obtained by APG&E or the delivery schedule of Utility.

2. Eligibility: This Terms of Service is intended for Residential meters, as defined herein, but all Customers who enter into this Agreement are bound by its terms.

3. Enrollment: This Agreement shall be effective upon return of Customer-signed Agreement to, and acceptance by, APG&E. For the duration of the Rescission Period Residential have the right to cancel this Agreement free of penalty or fee. Following the applicable Rescission Period, APG&E will use commercially reasonable efforts to commence service on the next available meter read date on or after Start Date.

4. Duration: The Initial Duration shall commence on the date Utility switches service to APG&E and will continue for the number of months thereafter as indicated by Contract Duration selected on Schedule A. APG&E will provide Customer at least thirty (30) calendar days' notice in advance of the end of Initial Duration. For Customers returning to Utility service or switching to another REP at the end of Initial Duration, it may take up to sixty (60) days for Customer's accounts to be returned to Utility depending on Utility switching procedures, and Customer is responsible for all APG&E supply charges until Customer returns to Utility or switches to another REP. A final bill will be rendered after the final meter reading. Upon completion of the Initial Duration, if Customer does not provide consent to renewal terms, this Agreement will automatically renew, and Customer shall continue to receive electric service from APG&E at a month-to-month variable Holdover Rate, until Customer renews with APG&E or switches to another REP or back to Utility. If Customer automatically renews on Holdover Rate, Customer may Terminate at any time without penalty. If Customer Terminates without selecting another REP Customer will be returned to the Utility. Customer may obtain the previous 24 months' average monthly billed Holdover Rates by visiting www.apge.com or calling APG&E (toll free). Historical pricing is not necessarily indicative of present or future pricing.

5. Intentionally left blank.

6. Metering and Measurement: Customer and APG&E accept the quantity, quality, and measurement determined by Utility providing delivery service to Service Location, for purposes of accounting for electricity supplied under this Agreement, in accordance with the terms of the applicable tariff for retail delivery service.

7. Switching to APG&E: Utility may, at its discretion, charge a fee to switch Customer to APG&E. This charge will be passed through to Customer at cost.

8. Rate Plan: Customer's Product Information and Contract Price are set forth in Schedule A to this Agreement. If this Agreement was transacted using the services of a Broker or Aggregator, then the fee charged by Broker or Aggregator to Customer for such services may be included in Price. Customer may also pay a Base Charge per month, the amount of which, if applicable, is disclosed in Agreement.

9. Energy Usage Variance: Energy Usage Variance is **Full Swing**. Customer's Energy Usage is not subject to a maximum or a minimum.

10. Intentionally left blank.

11. Credit Requirements: APG&E may use credit reporting agencies to document and evaluate Customer's credit and/or payment history. At the discretion of APG&E and to the extent allowed by law, APG&E may require a deposit from Customer or refuse service in accordance with PUC rules and regulations. In no event shall APG&E require security from Customer in excess of one-fifth (1/5th) of Customer's estimated annual billing.

12. Deposits: APG&E may require an additional deposit from Customer if Customer has two (2) or more late payments or has had one (1) Disconnection of Service in the previous twelve (12) months. Service may be disconnected or Terminated if a deposit is not paid within (10) days of any request for deposit. APG&E will apply any deposit held plus accrued interest, calculated at the rate approved by PUC, to the outstanding balance on the account's final bill or to the account's current balance when all of the following are satisfied: (i) Customer has paid bills for service for twelve (12) consecutive billings without having service disconnected for nonpayment and has not on more than two (2) occasions been delinquent; and (ii) the account is current. APG&E may disconnect service with or without prior written notice in accordance with PUC rules and regulations. No such deposit shall be required if the Customer is a governmental entity.

13. Billing: If actual meter readings are unavailable, invoices may be calculated based on estimated meter readings. Once actual meter readings are received, adjustments will be made on a subsequent invoice. Disconnection of electric service will not excuse Customer from paying any outstanding amounts owed to APG&E and Customer will be responsible to pay APG&E for any electricity used prior to Termination of this Agreement as well as any late payment charges. Customer may request up to twenty-four (24) months of billing/payment history without charge no more than twice within a twelve (12) month period. Any additional requests shall result in a fee of $5.00 per bill period requested. Utility Billed Customers will receive a consolidated bill from Utility for both APG&E and Utility Charges, at the billing intervals used by the Utility. Electricity usage will be measured or estimated by the Utility. Customer acknowledges and consents that Utility may provide

APG&E Customer's billing and payment information as part of the billing process.

14. Payment: Customer payment will be due to the Utility by the date specified in the Utility consolidated bill. If Customer fails to pay on time, Customer could be subject to interest, and late charges imposed by Utility, and service could be disconnected. Utility may offer budget, leveled or other payment plans. APG&E does not offer budget billing for the generation portion of the bill. Dual billed or APG&E consolidated billed Customers will receive a monthly invoice from APG&E in either paper or electronic format, or both, as requested. There is no charge for electronic formatted bills or electronic payment. All invoices rendered are due when received and are past due if not paid within sixteen (16) days of the date of the bill ("Due Date"). Late payments, delinquent or past due balances will result in a late payment fee equal to 5% of the month's past due amount. If Customer fails to pay for electric service, the above listed late fees may be applied, and APG&E will have the right to authorize disconnection of Customer's electric service, in lieu of terminating this Agreement. APG&E will notify Customer fourteen (14) calendar days prior to termination of this Agreement for non-payment. Upon satisfactory correction of the reasons for disconnection, Customer may reinstate electric service and will be charged a $50 reconnect fee. A $30 insufficient funds fee per transaction shall be assessed against any transaction not processed due to insufficient funds or credit availability for any method of payment including checks, bank drafts or credit card transactions. Customer is responsible for payment of all electricity consumed at the contracted Service Locations; hence, APG&E may auto-debit Customer's account without notice for any and all final amounts due after the account is in non-active status with APG&E. If a check is returned to APG&E for any reason, APG&E may auto-debit the Customer's account without notice for the amount due plus the $30 returned check fee.

15. Collections: APG&E reserves the right to automatically charge the credit/debit card and/or checking account for any unpaid balances that are deemed past due and/or in collection status. If the account is referred to a collection company, APG&E reserves the right to bill a fee not to exceed 33% of the amount being collected. If the account is referred for legal action, any and all attorney fees and court costs will be billed to Customer. Customer shall be responsible for any and all fees associated with collecting on any amounts owed to APG&E, including but not limited to any fees charged by the collection agency or other entity.

16. Taxes: Customer will pay all applicable taxes, fees and charges associated with the purchase of electric service under this Agreement. APG&E will not be liable for any taxes not paid by Customer.

17. APG&E Termination Rights: Customer affirms to APG&E that Customer has provided APG&E with the correct and complete Customer name, address and contact information, and Customer does not have any outstanding balance or conflicting contractual obligations with APG&E or any other REP. If there is any evidence that any of these statements are or become untrue, that Customer has withheld pertinent information, or that Customer otherwise provided fraudulent or misrepresented information, APG&E may Terminate this Agreement immediately. APG&E may end this Agreement, at no cost to APG&E, if (a) required or allowed by law, (b) Utility is unable to service Customer's Service Locations, or (c) Customer defaults or breaches this Agreement. APG&E will provide Customer (i) at least thirty (30) calendar days' notice of termination under this section, and (ii) at least five (5) calendar days to cure such Customer default or breach of this Agreement. If APG&E Terminates this Agreement, Customer must still pay all APG&E charges through the date Customer is switched to Utility or another REP and any applicable ETFs.

18. Intentionally left blank.

19. Early Termination: If Customer Terminates this Agreement prior to the Options Notice Date of the Initial Duration for any other reason, except as expressly provided herein, Customer will be charged an Early Termination Fee ("ETF") for such meters.

20. Early Termination Fee: For **Residential** Service Locations ETF will be charged as detailed in Schedule A. For **non-Residential** Service Locations ETF will be applied as follows:

Annual kWh of Dropped Meters	Early Termination Fee
<100,000	$50 per unused month
100,001 - 200,000	$100 per unused month
200,001 - 300,000	$150 per unused month
300,001 - 400,000	$200 per unused month
400,001+	$250 per unused month

21. Customer Information Release: Customer's execution of this Agreement shall constitute authorization for APG&E to obtain and review certain information from Customer's Utility, including consumption history. This authorization will remain in effect during Initial Duration and any Renewal Duration of this Agreement. APG&E will take reasonable steps to protect Customer's personal information as required by applicable law and PUC. APG&E is prohibited from disclosing certain Customer Information (Social Security number, account number(s), phone number, or billing data) without Customer's written consent except as required for APG&E collections and reporting, participating in Universal Service Fund programs, or assigning a Customer's Agreement to another REP.

22. Disputes or Complaints: Customer shall contact APG&E with any questions or concerns. If a dispute arises, APG&E and Customer agree to negotiate in good faith. If negotiations fail, then APG&E and Customer may by mutual agreement submit the dispute to mediation or may choose to submit the dispute for a final and binding arbitration conducted in accordance with the American Arbitration Association (AAA) by a single arbitrator selected through the procedures of the AAA. Arbitrations shall be held in Harris County, Texas. At any time during a dispute Customer may contact PUC. During the pendency of a dispute Customer is not obligated to pay specific disputed amounts. Medium, Mercantile, and Large Commercial Customers, as defined herein, understand and agree that PUC Customer Protection Rights afforded to

Residential and Small Commercial Customers, as defined herein, are not applicable.

23. Non-Discrimination: APG&E does not discriminate, deny service, or require a prepayment or deposit for service based on a customer's race, creed, color, religion, national origin, ancestry, sex, gender, marital status, sexual preference, age, lawful source of income, level of income, disability, familial status, geographic location, location of a customer in an economically distressed geographic area, receipt of public assistance income, or qualification for low income or energy efficiency services.

24. Regulatory Change: If there is a Regulatory Change which causes APG&E to incur new or additional, fees, costs, or charges, APG&E reserves the right to pass through such fees, costs or charges associated with Regulatory Change to Customer without markup. The changes addressed in this Section may impact any, or all, of the fees, costs, charges, prices, rates, or components covered in this Agreement, whether such items are described as "fixed," "variable," "included," "passed through" or otherwise.

25. Force Majeure: "Force Majeure" shall mean any cause not reasonably within the control of the party claiming suspension and which by exercise of due diligence, such party is unable to prevent or overcome, including but not limited to, any act or cause which is deemed a Force Majeure by Utility or any transmitting entity. If either party is unable, wholly or in part, by Force Majeure to perform or comply with any obligations or conditions of this Agreement, such party shall give immediate written notice, to the maximum extent practicable, to the other party. Such obligations or conditions, so far as they are affected by such Force Majeure, shall be suspended during the continuance of any inability so caused, and such party shall be relieved of liability and shall suffer no prejudice for failure to perform the same during the period. The party claiming suspension of obligations must in good faith attempt to mitigate and/or terminate the Force Majeure.

26. Governing Law and Venue: This Agreement shall be governed by, construed, and enforced in accordance with the laws of the State of Texas and venue shall be proper in Harris County, Texas. The provisions of the Uniform Commercial Code ("UCC") shall apply to this Agreement and electricity shall be a "good" for purposes of the UCC. The UCC can be viewed at www.statutes.legis.state.tx.us.

27. Assignment: Customer may not assign this Agreement, in whole or in part, or any of its rights or obligations hereunder without the prior written consent of APG&E. APG&E may without Customer's consent: (a) transfer, sell, pledge, encumber or assign this Agreement or the accounts, revenues or proceeds hereof in connection with any financing or other financial agreement; (b) transfer or assign this Agreement to an affiliate of APG&E; (c) transfer or assign this Agreement to any person or entity succeeding to all or substantially all of the assets of APG&E; and/or (d) transfer or assign this Agreement to another REP. Upon any such assignment, Customer agrees that APG&E shall have no further obligations hereunder.

28. Limitations of Liability: FOR BREACH OF ANY PROVISION OF THIS AGREEMENT FOR WHICH AN EXPRESS REMEDY IS PROVIDED, SUCH EXPRESS REMEDY SHALL BE THE SOLE AND EXCLUSIVE REMEDY. THE BREACHING PARTY'S LIABILITY SHALL BE LIMITED AS SET FORTH IN SUCH PROVISION AND ALL OTHER DAMAGES AT LAW OR IN EQUITY SHALL NOT APPLY. IF NO EXPRESS REMEDY IS PROVIDED, APG&E'S LIABILITY SHALL BE LIMITED TO DIRECT ACTUAL DAMAGES ONLY. SUCH DIRECT ACTUAL DAMAGES SHALL BE THE SOLE AND EXCLUSIVE REMEDY AND ALL OTHER REMEDIES AT LAW OR IN EQUITY ARE HEREBY WAIVED. IN NO EVENT SHALL CUSTOMER OR APG&E BE LIABLE FOR ANY PUNITIVE, INCIDENTAL, CONSEQUENTIAL, EXEMPLARY, INDIRECT, THIRD-PARTY CLAIMS OR OTHER DAMAGES WHETHER BASED ON CONTRACT, WARRANTY, TORT, NEGLIGENCE, STRICT LIABILITY OR OTHERWISE, OR FOR LOST PROFITS ARISING FROM A BREACH OF THIS AGREEMENT.

29. Severability: If any provision of this Agreement is held by a court or regulatory agency of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions shall continue in full force without being invalidated in any way.

30. Representations and Warranties: UNLESS OTHERWISE EXPRESSLY SET FORTH IN THIS AGREEMENT, APG&E PROVIDES, AND CUSTOMER RECEIVES NO WARRANTIES, EXPRESS OR IMPLIED, STATUTORY, OR OTHERWISE AND APG&E SPECIFICALLY DISCLAIMS ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. The electricity sold under this Agreement will meet the applicable Utility's quality standards and will be supplied from a variety of sources. Customer represents and warrants that Service Location identified on Schedule A is strictly a residential facility.

31. Delay or Failure to Exercise Rights: No partial performance, delay or failure on the part of APG&E in exercising any rights under this Agreement and no partial or single exercise thereof shall constitute a waiver of such rights or of any other rights hereunder.

32. Parties Bound: This Agreement is binding upon the parties hereto and their respective successors and legal assigns.

33. Customer Protection Rights: Residential and Small Commercial Customers may enjoy certain customer protections relating to termination, suspension, disconnection, or restoration of service, special medical or physical conditions, aged persons, recipients of social services assistance, budget billing, complaints and disputes, and deferred payment agreements. For information please contact PUC. Medium, Mercantile or Large Commercial Customers, as defined herein, hereby waive these Customer Protections.

34. Change in these Terms of Service: APG&E will provide Customer with no less than thirty (30) calendar days' advance written notice of any material change in these Terms of Service. Upon receiving notice of Change in Terms, Customer shall have the right to Terminate service with APG&E until the effective date of Change in Terms, with no ETF due.

35. Intentionally left blank.

36. Assistance Paying Your Bill: Benefits may be available to qualified low-income Residential Customers. For more information contact Utility.

37. Budget Billing: Utility may offer levelized monthly payments ("Budget Billing") to Residential and Small Commercial Customers based on (i) the previous 12 months of usage at Customer's Service Locations or (ii) the estimated annual usage for Service Locations if a full 12-months of history is unavailable. APG&E does not offer Budget Billing.

Definitions

- **Agreement** – applicable Schedule A, Terms of Service, and any Amendment(s) or Addendum(s) thereto.
- **Ancillary Services** – costs associated with services necessary to support the transmission of electricity from generating sources to Customer and other ISO costs not otherwise included in any of the defined cost components in this Agreement.
- **Annual kWh** – commercially reasonable calculation or estimate of annualized kWh used or to be used by service location.
- **APG&E** – DBA for contracting entity identified as Seller in Schedule A to this Agreement.
- **Auction Revenue Rights ("ARR") Credits** – revenue credits resulting from the relevant financial transmission rights auctions conducted by ISO.
- **Basis** – difference in price between energy delivered to the hub and Energy delivered to Customer's load zone.
- **Capacity** – Capacity Peak Load Contribution ("PLC") is determined and provided by Utility for each of Customer's Utility account number(s). Capacity obligations are administered by applicable ISO/RTO and are determined using Customer's PLC and applicable rates. Changes in Capacity Costs are based on adjustments by ISO/RTO or Utility to applicable rates or Customer's PLC.
- **Capacity Costs** – Charge for fulfilling the capacity requirements for Customer as imposed by ISO/RTO or otherwise.
- **Customer** – Buyer as identified in Schedule A to this Agreement. Referred to as Customer, Buyer, or you.
- **Energy** – electrical energy supplied to load zone corresponding to Customer's Service Locations as required to meet Customer's usage requirements. If Energy is listed as passed through on Schedule A such Energy will be settled day-ahead.
- **Energy Usage** – Customer's metered kWh.
- **Energy Usage Variance** – is the amount by which Customer's Energy Usage may surpass or fall short of the monthly expected kWh without incurring an Energy Usage Variance Charge.
- **Energy Usage Variance Charge** – is the incremental charge to Customer for Energy Usage Variances in excess of allowable Energy Usage Variance per Schedule A.
- **Governmental Authority** – any federal, state, local, municipal or other governmental, regulatory or administrative agency, commission or other authority lawfully exercising or entitled to exercise jurisdiction over APG&E or Customer or any transaction contemplated herein.
- **Holdover Rate** – a market-based month-to-month energy supply charge calculated using APG&E costing methodology, that may change with changes in market inputs. There is not a limit on how much the Holdover Rate may change from one billing cycle to the next.
- **Hub Energy** – energy delivered to the commercial energy trading hub corresponding with Customer's delivery point.
- **Initial Duration** – the number of Month(s) as specified in Schedule A of this Agreement.
- **ISO/RTO –** Independent System Operators or Regional Transmission Organizations that manage the flow of electricity on the electric grid.
- **Kilowatt (kW)** – a measure of demand for power; 1,000 watts.
- **Kilowatt-hour (kWh)** – basic unit of measure of electric energy consumption.
- **Large Commercial Customer** – in Maryland a non-residential meter with a metered 30-minute demand that equals or exceeds 25kW, energy consumption in excess of 6,000 kWh in any 2 consecutive winter` billing months, or 7,500 kWh for a single summer billing month; in New Jersey a non-coincident peak demand meter with 50 kW or greater over a 12 month calendar period; in Pennsylvania a meter with peak demand 25 kW or greater within the last 12 month calendar period; in Ohio a Mercantile Customer.
- **Line Losses** – cost of energy that is lost during transmission from the energy source (generators) to Customer, including Unaccounted for Energy (UFE).
- **Medium Commercial Customer** – a non-residential retail customer with peak demand of 50 kW or greater, but less than 1,000 kW, in the previous 12-month period.
- **Mercantile Customer –** in Ohio a commercial or industrial customer if the electricity consumed is for nonresidential use and Customer consumes more than 700,000 kWh per year or is part of a national account involving multiple facilities in one or more states.
- **MW –** a measure of demand for power; 1,000,000 watts.
- **Options Notice Date –** Date 30 days prior to the end of the Initial Duration where Customer is notified the contract end date is approaching.
- **PUC** – Public Utility Commission, the regulatory body in various states.
  - MPSC – Maryland Public Service Commission for the State of Maryland.
  - NJBPU – New Jersey Board of Public Utilities for the State of New Jersey.
  - PAPUC – Pennsylvania Public Utility Commission for the Commonwealth of Pennsylvania.
  - PUCO – Public Utilities Commission of Ohio for the State of Ohio.
- **Regulatory Change** – means the introduction of any new, or change in, law, rate, charge, Capacity obligation, PLC or NSPL determinants, load profiles, network transmission obligations, demand response programs, resource or fuel adequacy programs, RPS or other renewable energy

requirements, Utility or ISO/RTO operations, market structure, congestion zone design, Utility tariffs and/or ISO/RTO rules or protocols.

- **REP –** Retail Electric Provider. An entity licensed by the PUC to offer and supply electric generation services. Also referred to as Electric Supplier in Maryland, Third Party Supplier or TPS in New Jersey, Competitive Retail Electric Service provider or CRES in Ohio, or Electric Generation Supplier or EGS in Pennsylvania A REP buys wholesale electricity, delivery service, and related services, prices electricity for customers, and sells electricity at retail. Under this Agreement your REP is APG&E.
- **Renewable Portfolio Standards ("RPS") Costs** – means the costs associated with meeting renewable portfolio standards at the levels required by currently applicable law.
- **Rescission Period** – Residential and Small Commercial Customers have the right to cancel this agreement by contacting APG&E (toll free) or via email with their name, address, phone number, account number, and the last four (4) digits of your Social Security Number as follows:
  - Pennsylvania and Maryland within three (3) federal business days of receiving this Terms of Service, and
  - Ohio New and Jersey within seven (7) days of receiving confirmation from EDU or LDC.
- **Residential –** non-Commercial Customer that is (1) an end user, consuming energy at Customer's place of residence for personal, family or household purposes, (2) not a re-seller of electricity and (3) classified as residential by applicable Utility.
- **Small Commercial** – in Maryland a non-residential meter that does not meet the definition of a Large Commercial Customer; in New Jersey a meter with non-coincident peak demand of 49 kW or less over a 12-month calendar period; in Ohio a commercial customer that is not a Mercantile Commercial customer; in Pennsylvania a non-residential meter with maximum registered peak load of less than 25 kW over the last 12 months.
- **Taxes** – any and all taxes and fees imposed on purchase or sale of electricity by any Governmental Authority. Customer will be responsible for, pay, and indemnify APG&E for all Taxes hereunder where not already included in Contract Price on Schedule A, whether imposed on Customer or APG&E. APG&E may collect such Taxes from Customer by increasing APG&E's charges for such Taxes.
- **Transmission** – Network Service Peak Load ("NSPL") is determined and provided by Utility for each of Customer's Utility account number(s). Transmission obligations are administered by applicable ISO/RTO and are determined using Customer's NSPL and applicable rates. Changes in Transmission Costs are based on adjustments by ISO/RTO or Utility to applicable rates or Customer's NSPL.
- **Transmission Costs** – charge for Network Integration Transmission Service ("NITS") and Transmission Enhancement Charges ("TEC"), each as identified in the applicable Open Access Transmission Tariff ("OATT") for the provision of transmission service by ISO within Utility's service territory**.**
- **Utility** – utility providing facilities for the jurisdictional transmission and distribution of electricity to retail customers. Generally referred to as Local Energy Distribution Utility or **LDU** in Maryland, Local Distribution Company or **LDC** in New Jersey, Electric Distribution Company or **EDC** in Pennsylvania, and Electric Distribution Utility or **EDU** in Ohio.
- **Utility (LDU, LDC, EDC, or EDU) and PUC Charges** – charges or surcharges from a Utility arising from or related to and including but not limited to (i) transmission and distribution of electricity (other than Network Integration Transmission Service), (ii) stranded or transition costs and any other similar types of costs, and (iii) system reliability, rate recovery, future payback of under-collections, amortization of above market purchases or energy load repurchases, public purpose programs and all similar items.
- **Voluntary Renewable Energy Credits** ("RECs") – renewable energy sold by APG&E will be supplied from a variety of renewable generating sources including but not limited to wind, solar, biomass, or small hydro generators. APG&E will ensure that the appropriate number of RECs are retired to authenticate the amount of renewable energy purchased by Customer.
- **ZEC Costs** – costs associated with "Zero Emission Certificates", issued under legislation passed by relevant Governmental Authority, or designee, representing fuel diversity, air quality, and other environmental attributes of one MWh of electricity generated by an eligible source.

Exhibit BA-11

Reliant Energy (via American Electric Rates LLC) fixed rate offer included in Exhibit BA-8

NRG HOME TERMS OF SERVICE FOR ELECTRICITY SUPPLY

We appreciate your business. This document is a contract between us, NRG Home, and you that allows us to switch your electricity account(s) to our service or to continue service. We will supply your electricity under this contract, but your utility will continue to be responsible for delivering your electricity and sending you a bill for both of our services. This contract may be referred to as the "Terms of Service" or "Disclosure Statement."

Electric Generation Supplier Contract Summary	
Electric Generation Supplier Information	Reliant Energy Northeast LLC d/b/a NRG Home and NRG Retail Solutions (Electric License # A-2010-2192350) Mailing address: P.O. Box 38781, Philadelphia, PA 19104 Email address: support@picknrg.com Telephone number: 1-855-500-8703 Fax: 1-866-472-1415 Internet: www.picknrg.com Historical Pricing: https://www.picknrg.com/en/legal/State_information You have chosen Reliant Energy Northeast LLC d/b/a NRG Home and NRG Retail Solutions ("NRG Home") as your electric generation supplier. NRG Home is not affiliated with your local utility. NRG Home's charges for electric supply will appear on your utility bill separate and apart from your utility's charges for delivering your electricity. Your utility will continue to deliver your electricity, read your meter, send your bill, and make necessary repairs.
Price Structure	**Variable. We will determine the variable supply price at our discretion based on many different factors, which may include prices charged by competitors, industry charges we are responsible for, our costs to procure and sell energy, customer retention rates, applicable state and local taxes, changes in weather, legal and regulatory issues, profit margins, or other business conditions.** Your price also reflects our costs to obtain any renewable energy content specified under this contract, which contributes to the premium we may charge over the local utility supply rate. **Your variable supply price may change monthly, but no matter what, we will not increase your variable price in any given month by more than 30% from the prior month's supply price.**
Generation/Supply Price	You'll receive an introductory electricity supply price of $0.12300 per kWh for your first 3 bill(s) and your price will be variable after that. The initial price after the introductory period expires will be $0.12300 per kWh. **Thereafter, the price can change each month and will be shown on your monthly bill.** **This does not include the price that your electric utility will charge you for the delivery component of your electric service. Note: Customers previously on a fixed-term product who do not respond to our end-of-term notifications will be notified in advance of any price changes.**
Statement Regarding Savings	Savings are not guaranteed nor implied with this contract and our price may be higher than the supply rate charged by the utility or other suppliers. Our current and historical prices are not an indicator of our future prices. You may contact us at the telephone number or internet address listed above to obtain historical price information.
Deposit Requirements	None.
Incentives	Rewards Program. Your plan may include rewards such as enrollment incentives and loyalty incentives. Please refer to the Reward Terms contained in your Welcome Confirmation for the details regarding your individual rewards.
Contract Start Date	We will begin providing service to you after your utility processes our request to switch your service, which occurs within 10 days from the date you agreed to switch.
Contract Duration/ Length	Month-to-month. We will begin providing service to you after your utility processes our request to switch your service, which occurs within 10 days from the date you agreed to switch.
Cancellation/Early Termination Fees	**None.**
End of Contract	This is a month-to-month contract which continues until either of us cancels the service. You may cancel without a cancellation fee.
Right of Rescission	You have 3 business days to rescind this contract by contacting us at the telephone number or email address listed below. This is called your "Right to Rescind" period, which means you will not start service with us until after this period.

Note on Dispute Resolution: This contract limits the circumstances under which you can bring a dispute to court, and does not permit class actions or a jury trial. Review the section "Customer Complaints and Dispute Resolution" below for details.

A. Important Information and Terms

Contract Duration: Month-to-Month. We will begin providing service to you after your utility processes our request to switch your service, which occurs within 10 days from the date you agreed to switch. The switch will not occur before the expiration of your "Right to Rescind" period. Our service will continue until either of us cancels the contract.

Price Structure: You'll receive an introductory electricity supply price of $0.12300 per kWh for your first 3 bill(s) and your price will be variable after that. The initial price after the introductory period expires will be $0.12300 per kWh.

Thereafter, the price can change each month and will be shown on your monthly bill. We will not provide advance notice of any price changes.

This does not include the price that your electric utility will charge you for the delivery component of your electric service.

No matter what, we will not increase your variable price in any given month by more than 30% from the prior month's supply price.

If there is a monthly customer charge, it is noted in the Contract Summary above.

After the introductory period, your prices with us will be variable. We will determine the variable supply price in our discretion based on many different factors, which may include prices charged by our competitors, industry charges we are responsible for, our costs to procure and sell energy, customer retention rates, applicable state and local taxes, changes in weather, legal and regulatory issues, profit margins, or other business conditions, and you'll see it listed on your monthly bill.

For your reference, our electricity supply prices include generation and transmission charges and Gross Receipts Tax only, but they do not include any utility distribution charges or other utility fee or charge. If you enrolled in a plan with a percentage of green power, your price includes the cost for us to purchase Renewable Energy Certificates (RECs). Electricity is the product of a mix of generation energy sources that is delivered over a system of wires. Information about generation resources is included in the annual licensing report provided by the PUC. Information about energy efficiency is available from the PUC or your local utility.

Our current and historical prices are not an indicator of our future prices and we do not guarantee any savings. Our prices may be higher than your utility's supply rate. You may contact us at the telephone number or internet address listed below to obtain historical price information.

Billing: Your local utility is responsible for sending you a bill that includes the charges for our service and charges for the utility's service. You also agree to review your bills in a timely manner, and if there are any inaccuracies with the portion of the bill for our services, you agree to notify us within ninety days after the date of the bill. If we do not hear from you, you are agreeing that the billed amounts are correct and you are waiving any right to dispute the billed amounts to the extent permitted by law. If we later assume responsibility to bill for our charges and the utility's charges, we will provide 30 days' advance notice to you and you will begin to pay us as directed in the notice.

If you have a net meter, you will no longer receive energy credits from your utility. NRG Home is not responsible for paying any net metering credits.

Right to Rescind: You have the "Right to Rescind" this contract for three business days, which means you can cancel your request to switch your electricity service and never start service with us. You will receive a Welcome Confirmation from us, which will include this contract, and you will have until midnight of the third business day after receipt of the Welcome Confirmation to rescind this contract by contacting us at the telephone number or email address listed below. This contract is not binding until your "Right to Rescind" period has ended with no action on your part to rescind the contract.

End of Contract and Expiration Provisions or Change in Terms: This is a month-to-month contract which continues until either of us cancels the service.

You may cancel without a cancellation fee by calling us at our contact information listed below.

We will request that the utility cancel your service with us, but the utility controls the effective date of your cancellation. The effective date is usually the next date that your meter is read after the utility has processed our request to cancel your service with us.

Incentives: Rewards Program. Please refer to your Welcome Confirmation for the terms regarding your rewards program. If you cancel this contract, you may forfeit some or all of the rewards described in your Welcome Confirmation.

Applicable Fees: If you are currently in a contract with another electric supplier, the request to switch you to our service will automatically cancel your service with the other electric supplier. You are responsible for any penalties the other electric supplier may charge.

Your Right to Cancel and Cancellation Provisions:

You may cancel this contract without having to pay a cancellation fee by calling us at our contact information listed below.

We will request that the utility cancel your service with us, but the utility controls the effective date of your cancellation. It may take up to 30 calendar days before the cancellation is finalized, depending on your utility's timeframe. If you do cancel this contract, you may forfeit some of the rewards that we describe in your Welcome Confirmation, and you will be responsible for unpaid balances as of the cancellation date.

Our Right to Cancel and Cancellation Provisions:

We have the right to cancel this contract for any reason as long as we give you thirty days' written notice (you will not be charged a fee),

but if we are canceling the contract due to your conduct or your breach of this contract, you will have an opportunity to fix this condition within the thirty days. Your utility will control the effective date of our cancellation request, but this is usually the next date that your meter is read. If your utility terminates your service, this contract will be automatically cancelled.

Your Authorization to Release Your Information for Use and Sharing: By entering into this contract, you authorize us to act on your behalf under your utility's tariffs in accordance with the rules and regulations of the state public utility commission ("PUC") where you take service. You further acknowledge that this contract provides authorization for your local utility to release all information regarding your energy supply account(s) to us so we can provide the services described herein. This

information may include, but is not limited to, usage information, billing determinants, bill cycle, budget billing status, address, account type, tax exemption status, rate service class, load profile, demand data, meter number, special account exceptions, public assistance status, existence of medical emergencies or disability, tax status and eligibility for economic development or other incentives, standard service status, electronic interval data when available, credit information when applicable, and all other data and information permitted by law to be disclosed to us to provide our services.

We also obtain information about you as outlined in our privacy policy (posted on our website) such as when you voluntarily provide personal information to us, use our website or mobile applications, or when we add information about you to your account profile from publicly available sources.

We will maintain the confidentiality of your personal information including your name, address, telephone number, email, account numbers, energy usage and historic payment information as required by applicable PUC regulations as well as federal and state laws.

Our use and sharing of your information will be consistent with the purposes and uses disclosed in our privacy policy, as amended from time to time and posted on our website. Your information may be disclosed if required by law, such as pursuant to a lawfully issued subpoena or other legal process. Further, you understand that your information may be disclosed to an affiliate or a third-party to provide services or products to you, and any disclosure of such information will be made under confidentiality obligations not to disclose such information and to use it solely for the purpose of providing services to you or improved products to us. This authorization also allows us to contact you about our other products and services and to share information about your account with any designated rewards partner or with any affiliate, third-party vendor or marketing partner we use to provide services and rewards to you. We reserve the right to share your information with our affiliates and marketing partners, to the extent permitted by law and/or as authorized when you provide your consent.

If you do not wish for us to use or share information about your account in the manner described above, you may cancel this contract by calling us at our contact information listed herein.

Electronic Communication: If you provide us with your Email address, you are consenting to this contract and other forms of communication being provided to you in electronic form and you must provide us with any update to your valid Email address should it change. You are required to notify us of any change in Email address and/or any withdrawal of consent for the electronic transmission of contracts or other customer information. If you enroll electronically, please note that our website and application is best viewed in Internet Explorer 9.0 or higher.

Taxes: Applicable tax charges are included on the one bill you will receive from your utility. If you are exempt from any taxes, you are responsible for requesting an exemption by filing all required documentation with us and/or your utility..

Insolvency: You represent that you are financially able and willing to fulfill the terms and conditions of this Agreement and that you have not filed, are not in the process of filing or plan to begin any bankruptcy proceedings. You acknowledge and agree that this Agreement and the transaction(s) contemplated under this Agreement constitute a “forward contract” within the meaning of the United States Bankruptcy Code. To the fullest extent possible, you agree to waive the provisions afforded by Section 366 of the United States Bankruptcy Code and acknowledge that for purposes of the application of principles afforded “forward contracts” the provisions of Section 366 shall not apply to you or to this Agreement.

Background: We are licensed by the Pennsylvania Public Utility Commission (PUC) to offer and supply electric generation and related services in Pennsylvania and our license number is A-2010-2192350. We set the generation prices and charges that you pay. The Public Utility Commission regulates distribution prices and services. The Federal Energy Regulatory Commission regulates transmission prices and services. .

Definitions:
Generation Charge - Charge for producing electricity. Generation prices and charges are set by the electric generation supplier you have chosen.

Transmission Charge - Cost for transporting electricity from a generation source to your electric distribution company (your utility). The Federal Energy Regulatory Commission regulates transmission prices and services.

Distribution Charge - Cost for delivering electricity from your electric distribution company (your utility) to your home or business. These charges continue to be regulated by the PUC.

Contract Details: Our full, legal name is Reliant Energy Northeast LLC d/b/a NRG Home and NRG Retail Solutions, but we have used “we”, “us”, or “our” to refer to ourselves for the purposes of this contract. We use “you” or “your” to refer to you, the customer. This contract is for the sale and purchase of all of your electricity for the account(s) listed in your Welcome Confirmation (letter or email). If a new customer, by entering into this contract, you are authorizing us to take the steps necessary to switch your electricity supply service to us, and you agree to appoint us as your agent to acquire the necessary information to meet your electricity needs as required by your “utility”, which we use to refer to your local distribution company. Your utility is responsible for the delivery of electricity to you, and we are not. This contract and the Welcome Confirmation (letter or email) you received create your entire contract with us and replace any prior oral or written statements or representations.

Contract Changes: Whenever we propose to change the terms of service in any type of contract, you will receive two separate written notifications that precede the effective date of the proposed changes. These notifications will explain your options going forward. We will not change or alter the waiver of jury trial provision under any circumstances, and any changes to this contract must be made in writing.

Customer Complaints and Dispute Procedures: If you have questions about our prices or our service, you should call us at the contact information listed below. If you are not satisfied with the response from our Customer Care representative, you may ask that your questions be referred to one of our supervisors, who will respond promptly. If you remain unsatisfied with our attempts to resolve the issue, you may seek assistance from the PUC or request information from the PUC regarding your consumer protection rights. The PUC’s contact information is listed below.

Please note that information about shopping for an electric supplier is available at www.PaPowerSwitch.com or other successor media platform as determined by the PUC, by calling the Commission at (800) 692-7380 and the Office of Consumer Advocate at (800) 684-6560 or at www.oca.state.pa.us

CAPs Notice: We reserve the right to send any ineligible account to default utility supply service if required by law or PUC regulation, without regard to any reward or incentive program you may be enrolled in. Please note that if you enroll in the PPL-CAP during your term and stay enrolled in that

program through the duration of your contract, you will be returned to PPL default service at the end of your contract term.

B. Other Important Information

Assignment and Binding Effects: We may sell, transfer, pledge or assign the accounts, revenues or proceeds associated with this contract in connection with any financial contract, and we may assign the rights and obligations under this contract to another energy supplier consistent with applicable law. You may not assign this contract.

No Reliance: You acknowledge that (1) you are not relying on any advice, statements, recommendations or representations of ours other than the written representations in this contract; (2) that you consulted with your own advisors to the extent you deemed necessary; and (3) that you understand the risks of entering into this contract, including the risk that our prices may be higher than your utility's rates. You acknowledge that you are capable and willing to assume those risks (whether financial, economic or otherwise) and that you have made your own decision to enter into this contract.

Force Majeure: We will use commercially reasonable efforts to provide electricity supply to you pursuant to this contract, but we do not guarantee a continuous supply of electricity. Certain Force Majeure events outside of our control may cause interruptions in service. If a Force Majeure event prevents us from performing any of our obligations in any way, our performance shall be excused for the duration of such event, and we will not be liable for damages associated with any delay or failure to perform as a result. "Force Majeure" includes, without limitation, acts outside of our control, sabotage, riots or civil disturbances, acts of God, acts of the public enemy, acts of vandalism, terrorist acts, natural disasters, explosions, fires, pandemics or governmental shutdown order, or similarly cataclysmic occurrence, failure, shortage or unavailability of generating units, storage, distribution or transmission facilities, nonperformance by your local utility, or any change in law or any other action by a governmental authority that materially impairs our ability to perform our obligations under this contract. We will give you reasonably prompt notice of any Force Majeure occurrence.

Severability: Each provision of this contract is made subject to the maximum extent permitted by law. If any are held to be unenforceable or invalid by any arbitrator or court of competent jurisdiction, we will negotiate an equitable adjustment to or an amendment of the affected provisions with you with a view toward effecting the purpose of this contract. In this case, the validity and enforceability of the remaining provisions shall not be affected.

LIMITATIONS ON WARRANTY AND DAMAGES: THE ELECTRICITY PROVIDED UNDER THIS CONTRACT WILL MEET THE QUALITY STANDARDS OF YOUR UTILITY. YOU UNDERSTAND AND AGREE THAT THERE ARE NO OTHER WARRANTIES, EITHER EXPRESS OR IMPLIED, ASSOCIATED WITH THE SERVICE PROVIDED BY US. WE HAVE NO LIABILITY FOR SERVICE INTERRUPTIONS NOR ANY ASSOCIATED LOSS OR DAMAGE RESULTING FROM SUCH INTERRUPTIONS. TO THE MAXIMUM EXTENT PERMITTED BY PENNSYLVANIA LAW, LIABILITIES NOT EXCUSED BY REASON OF FORCE MAJEURE OR OTHERWISE SHALL BE LIMITED TO DIRECT ACTUAL DAMAGES. WE WILL BEAR NO LIABILITY TO YOU OR ANY THIRD PARTY FOR CONSEQUENTIAL, PUNITIVE, INCIDENTAL, SPECIAL, EXEMPLARY OR OTHER INDIRECT DAMAGES OR LOST PROFITS. THE LIMITATIONS IMPOSED ON REMEDIES AND THE MEASURE OF DAMAGES ARE WITHOUT REGARD TO THE CAUSE OR CAUSES OF THE HARM OR LOSS, INCLUDING THE NEGLIGENCE OF ANY PARTY, WHETHER SUCH NEGLIGENCE BE SOLE, JOINT OR CONCURRENT, OR ACTIVE OR PASSIVE.

ARBITRATION AND WAIVER OF JURY TRIAL: TO THE FULLEST EXTENT PERMITTED BY PENNSYLVANIA LAW, ANY DISPUTE, CONTROVERSY OR CLAIM ARISING OUT OF, RELATING TO OR IN CONNECTION WITH THIS CONTRACT, SHALL BE FINALLY RESOLVED BY ARBITRATION BEFORE THE AMERICAN ARBITRATION ASSOCIATION ("AAA") CONDUCTED UNDER THE AAA COMMERCIAL RULES AND THE CONSUMER-RELATED DISPUTES SUPPLEMENTARY PROCEDURES, OR, AT THE ELECTION OF EITHER PARTY, BROUGHT AS A SMALL CLAIMS ACTION, IN THE MAGISTERIAL DISTRICT COURT OF PENNSYLVANIA OR PHILADELPHIA MUNICIPAL COURT, JUDICIAL SYSTEM OF PENNSYLVANIA ("SMALL CLAIMS COURT"), IF THE DISPUTE OR CLAIM IS WITHIN THE SCOPE OF ITS JURISDICTION.

BY ENTERING INTO THIS CONTRACT, YOU ARE GIVING UP YOUR RIGHTS TO SEEK REMEDIES IN COURT, OTHER THAN IN SMALL CLAIMS COURT, AND THE RIGHT TO A JURY TRIAL.

THE ABILITY TO CONDUCT DISCOVERY IN ARBITRATION IS LIMITED AND THE ARBITRATOR'S DECISION IS SUBJECT TO VERY LIMITED REVIEW BY COURTS. THE ARBITRATOR CAN AWARD THE SAME DAMAGES AND OTHER RELIEF THAT A COURT CAN AWARD. JUDGMENT ON THE ARBITRATOR'S AWARD CAN BE ENTERED IN ANY COURT HAVING JURISDICTION.

THE PARTIES AGREE THAT ALL CLAIMS INCLUDING STATUTORY, STATE OR FEDERAL CLAIMS, MAY BE MADE SOLELY ON AN INDIVIDUAL BASIS, AND THAT THIS CONTRACT DOES NOT PERMIT CLASS ACTIONS, EITHER IN ARBITRATION OR THROUGH A COURT PROCEEDING. AAA MAY NOT CONSOLIDATE MORE THAN ONE PERSON'S CLAIMS, AND MAY NOT OTHERWISE PRESIDE OVER ANY FORM OF A REPRESENTATIVE OR CLASS PROCEEDING.

IF YOU FILE FOR ARBITRATION, THE AAA RULES LIMIT THE FEES AND COSTS THAT YOU WILL PAY TO THE AAA AND ARBITRATOR. YOU WILL STILL BE RESPONSIBLE FOR YOUR OWN LEGAL FEES AND COSTS, AS IF YOU WERE IN COURT, BUT THE ARBITRATOR MAY AWARD YOU THOSE FEES TO THE EXTENT AUTHORIZED BY LAW. THE ARBITRATION WILL BE HELD IN PENNSYLVANIA IN A LOCATION DETERMINED BY THE ARBITRATOR. THE ARBITRATOR SHALL HAVE THE POWER TO RULE ON ANY CHALLENGE TO HIS OR HER JURISDICTION OR TO THE VALIDITY OR ENFORCEABILITY OF THIS ARBITRATION PROVISION, AS WELL AS THE CLASS ACTION WAIVER SET OUT ABOVE.

COPIES OF THE AAA CONSUMER ARBITRATION RULES AND ADDITIONAL INFORMATION ABOUT ARBITRATION ARE AVAILABLE AT THE AAA'S WEBSITE: HTTPS://WWW.ADR.ORG/RULES.

AAA MAY NOT CONSOLIDATE MORE THAN ONE PERSON'S CLAIMS AND MAY NOT OTHERWISE PRESIDE OVER ANY FORM OF A REPRESENTATIVE OR CLASS PROCEEDING. IF A COURT OR THE AAA DETERMINES THAT THE PRECEDING SENTENCE PROHIBITING CLASS ARBITRATION IS INVALID OR UNENFORCEABLE, THEN THE REMAINING PORTIONS OF THIS ARBITRATION PROVISION WILL REMAIN IN FORCE.

THIS ARBITRATION PROVISION SHALL SURVIVE TERMINATION OF THIS AGREEMENT.

Other Provisions: This contract can change based on any future legislation, orders, rules, regulations , decisions of a duly constituted governmental authority or independent system operator having jurisdiction over this contract or the services provided hereunder or your local utility tariff or policy changes. If at some future date there is a change in any law, rule, regulation, tariff, or regulatory structure ("Regulatory Change") which impacts any term, condition or provision of this contract including, but not limited to price, we shall have the right to modify this contract in accordance with applicable law to reflect such Regulatory Change by providing 30 days' written notice of such modification to you. This contract is made and shall be construed in accordance with the laws of Pennsylvania. There are no third-party beneficiaries to this contract. This contract is binding upon us and you, as well as any successors or legal assigns. Failure to exercise any right we have under this contract should not be considered as a waiver of the right to exercise any such right at a later date. The headings and Summary of Important Information chart in this contract are for reference only and do not affect the interpretation of this contract.

NRG-PA-PEV10-20220929

NRG Home Rewards Program Terms

Eligibility: Your rewards are offered by Reliant Energy Northeast LLC, d/b/a NRG Home and NRG Retail Solutions ("NRG Home"). Rewards are subject to the following terms and conditions. For purposes of receiving rewards, active accounts are defined as those (i) that are billing more than $0 and (ii) for which we have not received a request to discontinue (drop) service or change programs and (iii) for MA customers, for which NRG Home has received at least one full payment. NRG Home may at its discretion send a combined reward payment if you have more than one account enrolled. Rewards are also subject to the Terms of Service between NRG Home and you, including, but not limited to, all terms related to dispute resolution. NRG Home reserves the right to disqualify any account holder from participation in reward programs.

Rebate Information: Any tax liability relating to a rebate is your sole responsibility. NRG Home is not responsible for resolving any conflicting claims to rebates. Rebates may not be applied as credits or offsets to reduce the amount owed on your account. Rebates shall have no cash value until the rebates are issued. You have no property rights or other legal interest in rebates until rebates are received. You may not assign, transfer or pledge rebates. The terms and conditions of rebates may be modified or rebates may be discontinued at any time at NRG Home's sole discretion. If NRG Home discontinues the rebate programs, you will be eligible for a pro-rated rebate, based on the portion of your Program or Rebate Period that has been completed. However, if rebates are found to be in violation of any applicable law, then NRG Home will not have any obligation to provide any rebates to you.

Electric Bonus Information: A $25 Enrollment Bonus will be mailed to new electricity accounts after 3 full month(s) of active service from NRG. You may only receive one Enrollment Bonus for each of your accounts. Further, your account status must be active for 3 full months of active service in order to receive the Enrollment Bonus.

Electric Cash Back Information: Cash Back is a rebate program offered by NRG. Your participation in the Cash Back program starts on the first day of your first billing cycle with NRG and ends when your account is no longer active. Your account will automatically be enrolled in the Cash Back program, and you will receive a 2% Cash Back rebate every 12 full billing cycles on the total dollar amount of the NRG's Supply Charges on your electricity bills for as long as your account is active. At the end of every 12 full billing cycles, NRG will calculate and automatically mail your rebate and your first Cash Back rebate will also include any partial month if you switched service to us mid-billing cycle. Please allow 60 days after the close of every 12 full billing cycles to receive each Cash Back rebate. If your account is closed for any reason within one of the 12 month periods, you will forfeit all existing rebate values for that period. Budget billing customers will be awarded based on the monthly budget billing amount, plus or minus any periodic reconciliation or true-up that is required.

AEP Energy 100% renewable rate offer
included in Exhibit BA-8

Electric Generation Supplier Disclosure Statement and Contract Summary ("Contract Summary")

RESIDENTIAL - FIXED PRICE – PENNSYLVANIA	
Electric Generation Supplier (EGS) Information	AEP Energy, Inc. 1 Riverside Plaza, 20th Floor, Columbus, OH 43215, Attn: Customer Care AEPenergy.com/contact-us | 866-258-3782 AEP Energy is responsible for the generation charges shown on your bill.
Price Structure	Fixed Price: This Agreement is for an all-inclusive per kilowatt-hour ("kWh") price that will remain the same for the Term of the Agreement. See Section 2 for details.
Generation/Supply Price	**15.55** cents per kWh for Green-e® Energy Certified wind-generated renewable energy certificates equal to 100% of your usage and Generation and Transmission Services and Gross Receipts Tax (GRT). Price excludes taxes, utility Distribution Service charges and other non-bypassable utility charges and fees. See Section 2 for details.
Statement Regarding Savings	AEP Energy does not represent any guaranteed savings. The prices and charges paid to AEP Energy under this Agreement may not always provide savings to you. See "Other Important Disclosures" for details.
Deposit Requirements	None.
Contract Start Date	This Agreement will start upon the start of service date provided by the Electric Distribution Company in the Electric Distribution Company's confirmation letter to you ("Start Date"). See Section 4 for details.
Contract Duration/Length	36 monthly billing cycles ("Term").
Cancellation/Early Termination Fees	You may cancel this Agreement at any time during the Term for any reason and will not be assessed a penalty or fee. See Section 6 for details.

End of Contract	***This Agreement may be automatically renewed with advance written notices. The Initial Notice will be sent to you forty-five (45) to sixty (60) calendar days prior to the expiration of this Agreement and the second notice will be sent to you no fewer than thirty (30) calendar days prior to the expiration of this Agreement. If you fail to respond to these notifications, this Agreement can be converted to a renewal agreement that will not include any cancellation/early termination fees. See Section 8 for details.***
Right of Rescission	You have the right to rescind your enrollment without penalty in writing or orally or by submitting an electronic rescission request to care@aepenergy.com at any time before midnight of the third (3rd) business day following your receipt of this Agreement.

Electric Generation Supplier Terms and Conditions and Disclosure Statement

TERM	GENERATION/ SUPPLY PRICE	CANCELLATION/ EARLY TERMINATION FEE	CONTRACT RENEWAL	OTHER
36 monthly billing cycles ("Term").	**15.55** cents per kWh for Green-e® Energy Certified wind-generated renewable energy certificates equal to 100% of your usage and Generation and Transmission Services and Gross Receipts Tax (GRT). Price excludes taxes, utility Distribution Service charges and other non-bypassable utility charges and fees.	You may cancel this Agreement at any time during the Term for any reason and will not be assessed a penalty or fee. See **Section 6** for details.	Your Agreement may be automatically renewed with advance written notices. See Section 8 for details.	

TERMS AND CONDITIONS: These Electric Generation Supplier Terms and Conditions and Disclosure Statement and the attached Contract Summary, which is incorporated herein by reference, form your agreement ("Agreement") for Retail Electric Supply with AEP Energy. The words "we" and "our" also refer to AEP Energy, and the words "you", "your", and "I" refer to the customer.

BACKGROUND

- AEP Energy, Inc. ("AEP Energy") is licensed by the Pennsylvania Public Utility Commission ("PUC") to offer and supply electric generation services in Pennsylvania. Our PUC license number is A-2009-2132755.
- As an Electric Generation Supplier ("EGS"), AEP Energy will supply the electric generation and provide applicable transmission services to the interconnection (the "Delivery Point") of your Electric Distribution Company ("EDC") based on your usage. Your EDC will then distribute or deliver the electricity to you. Your Distribution Service will remain with your EDC, which is regulated by the PUC.
- You will receive a single bill from your EDC that will contain the EDC's charges and AEP Energy's charges.
- AEP Energy sets the generation prices and charges that you pay. The PUC regulates distribution prices and services. The Federal Energy Regulatory Commission regulates transmission prices and services.
- This is an agreement for Retail Electric Supply (as hereinafter defined) between you and AEP Energy. **Please keep a copy of this Agreement for your records.**
- Right of Rescission – You may cancel this Agreement in writing or orally at any time before midnight of the third (3rd) business day after receiving this Agreement. See Section 11 for details.

DEFINITIONS:

- "Generation Charge" means the charge for producing electricity. Generation service is competitively priced and is not regulated by the PUC. If you purchase electricity from an EGS, your generation charge will depend on the contract between you and your supplier.
- "Generation Service" means the production of electricity. This service is included in the price that AEP Energy charges you, as described herein.
- "Generation-Related Charges" means those charges or costs associated with the procurement and supply of electricity.
- "Transmission Charge" means the cost for transporting electricity from the generation source to your EDC. For most electric customers who select a new supplier, transmission costs will be included in the charges from your new supplier. The Federal Energy Regulatory Commission regulates retail transmission prices and services. This charge will vary with your source of supply.
- "Transmission Service" means moving high voltage electricity from a generation facility to the distribution lines of an EDC. This service is included in the price that AEP Energy charges you, as described in the herein.
- "Distribution Service" means the physical delivery of electricity to customers by the EDC. The PUC regulates distribution prices and services.
- "Non-bypassable utility charges and fees" means those EDC charges and fees payable by you regardless of whether the EDC or an EGS provides Generation Service.

OTHER IMPORTANT DISCLOSURES. I affirm my agreement that AEP Energy and entities calling on AEP Energy's behalf may make calls to the number(s) I have provided, or will provide during the term of this Agreement, regarding my account, including about amounts due. **Price Comparison Qualification.** Please be advised that the EDC's default service rates generally change from time to time. AEP Energy therefore does not provide any guarantee of savings in comparison to the EDC's default service rates during the Term or the term of any renewals of this Agreement. If you received any price comparison(s) in connection with your enrollment, by

accepting this offer from AEP Energy, you understand and agree that AEP Energy has informed you, prior to entering into this Agreement, that no guarantee of savings during the Term or the term of any renewal is being provided.

1. **Eligibility.** Residential customer accounts that are on residential rates codes are eligible for this offer from AEP Energy. AEP Energy reserves the right to refuse enrollment to any customer who is not current on their EDC charges. If you are now or become enrolled in a utility's customer assistance program, we reserve the right to cancel this contract pursuant to its cancellation terms.

2. **Price.** During the initial "Term" (as described in the Contract Summary and listed on the first page above) of this Agreement, you agree to pay AEP Energy the price stated in the Contract Summary and on the first page above under the heading "Generation/Supply Price" for all kilowatt-hours ("kWh") of electric energy metered by the EDC, which is inclusive of all applicable combined Generation Charges, Transmission Charges and Transmission Services (if bypassable), Generation Service, Generation-Related Charges, energy losses, capacity, Renewable Energy Credits (RECs), if purchasing a renewable energy plan, and estimated current total state taxes, including any applicable taxes and including current Gross Receipts Tax (GRT), and is applicable 24 hours a day ("Retail Electric Supply"). In addition to AEP Energy's charges, you will be charged by your EDC for Distribution Service and other EDC charges and fees. Your price does not include any EDC or otherwise non-bypassable charges for services under the applicable electric rate tariff or any applicable (and not expressly included) state and local taxes.

3. **Material Adverse Change.** To the extent you have a fixed rate for Retail Electric Supply from AEP Energy and performance of this Agreement becomes uneconomical for AEP Energy due to events that are beyond AEP Energy's reasonable control and/or AEP Energy is subject to additional or increased costs that are imposed by law, rule, regulation or tariff, or PUC rule or order, AEP Energy may propose change(s) to the terms of this Agreement, including, but not limited to, passing through such additional costs and, thus, increasing your price. If any of the above situations occur, AEP Energy may offer you new terms for this Agreement, in which case you will receive the notices described in Section 8 below. You must indicate your acceptance of the new terms as specified in the notices. If you do not contact AEP Energy to accept the new terms, (a) this Agreement will end on the date specified in the notices, (b) you may be returned to your EDC for Retail Electric Supply, (c) you will not be responsible for any cancellation/termination fee (if any) set forth in the Contract Summary and Section 6 and (d) you must still pay all AEP Energy charges through the date you are returned to your EDC or switched to another EGS for service.

4**. Term (Length of Agreement).** Your service from AEP Energy will begin with the start of service date provided by the EDC in the EDC's confirmation letter to you, and this Agreement shall be considered executed by AEP Energy, following: (a) the end of the Rescission Period; (b) the acceptance of your enrollment request by AEP Energy (at its discretion and consistent with Section 7 below); and (c) acceptance of your enrollment by your EDC, and will continue for the Term, unless otherwise cancelled or renewed, ending on the date your EDC effectuates your switch back to EDC default service or to another EGS. The Term (in months) is shown in the Contract Summary. Your start of service date is determined by your EDC; therefore we are not liable for any resulting delay in commencement of your service.

5. **Billing.** You will continue to receive a single bill, typically on a monthly basis, from your EDC that will contain both your EDC and AEP Energy charges. AEP Energy offers budget billing for AEP Energy's charges. If you do not pay your bill by the due date, AEP Energy may cancel this Agreement. Upon termination you will be returned to your EDC as a customer. You will remain responsible to pay AEP Energy for any electricity used before this Agreement ends. Further, your failure to pay EDC charges may result in your electric service being disconnected in accordance with the EDC tariff.

6. **Cancellation/Termination Provisions/Failure to Pay.** After your service begins, you may cancel this Agreement at any time during the Term for any reason and will not be assessed a penalty or fee. You may cancel this Agreement by contacting AEP Energy using the contact information set forth in Section 18. At that time, you will be required to select another supplier or return to the EDC for electric generation service. When you cancel, you will remain responsible to pay AEP Energy for all kWh of electric energy used before this Agreement is cancelled.

Any failure to pay your bill shall be deemed a breach of this Agreement permitting AEP Energy to cancel this Agreement. AEP Energy may decide to cancel this Agreement if there is a Material Adverse Change as described in Section 3. If we cancel this Agreement for any reason other than customer non-payment, we will provide you thirty (30) days written notice.

This Agreement is automatically cancelled if (a) your electric service is terminated by your EDC or (b) your EDC switches your Retail Electric Supply to another EGS or to the EDC.

If you relocate to a new address within the service territory of your current EDC, this contract may, at the discretion of AEP Energy, either continue under the same terms and conditions or be cancelled with your Retail Electric Supply switched to your current EDC.

7. **Your Consent and Information Release Authorization.** By accepting this offer from AEP Energy, you understand and agree to the terms and conditions of this Agreement with AEP Energy. You authorize AEP Energy to obtain information from the EDC that includes, but is not limited to: your billing history, payment history, historical and expected electricity usage, meter-readings, characteristics of electricity service, address, telephone number, and account number(s). AEP Energy will maintain the confidentiality of your personal information including name, address, telephone number, electric usage and historic payment information as required by applicable PUC regulations and federal and State laws.

You agree that AEP Energy may share your information with its subsidiaries and/or affiliates, your utility, and any service vendor or others AEP Energy uses to support its business, including any third-party entities with whom we have relationships. You may rescind these authorizations and restrict the release of your information by contacting us by phone at 1-866-258-3782. AEP Energy reserves the right, to the extent permitted by law, to reject your enrollment or terminate this contract and cancel your service in accordance with this contract in the event these authorizations are rescinded.

8. **Contract Renewal/Change in Terms.** If you have a fixed term contract approaching the expiration date, or whenever AEP Energy wants to change the contract, you will receive two separate notices before the contract ends or the changes happen. You will receive the first notice 45-60 days before, and the second notice 30 days before the expiration date or the date the change becomes effective. These notices will explain your options. If you fail to respond within ten (10) calendar days after your receipt of the second notice, this Agreement can be automatically renewed or changed in accordance with the terms in the notices. Any automatic renewal of this Agreement will not include any cancellation/early termination fees. Consistent with applicable rules, AEP Energy can convert a fixed term contract into either a month-to-month contract, terminable by either Party upon thirty (30) days prior written notice, or another fixed term contract. This Agreement will end, and your customer account will return to the EDC, without penalty or prejudice to either Party, upon the occurrence of any of the following: (1) in its sole discretion, AEP Energy chooses not to renew or convert this Agreement; or (2) at any time and at such Party's option, either you or AEP Energy elect to cancel a renewal or month-to-month term contract under this Agreement. By providing AEP Energy your email address, you agree to receive notices for contract renewal and changes to terms and conditions electronically, where permitted under applicable law.

9. **Dispute Procedures**. Prior to initiating any action, suit or proceeding, you and AEP Energy both agree to try to resolve any dispute informally. To initiate informal dispute resolution, including with any questions concerning the terms of service, billing questions, disputes and complaints, contact AEP Energy by phone at 1-866-258-3782 (toll-free) M-F 8 AM – 7 PM & Sa 9 AM - 1 PM, ET or in writing at AEP Energy, 1 Riverside Plaza, 20th Floor, Columbus, OH 43215, Attn: Customer Care. Our web address is AEPenergy.com/contact-us. If your complaint is not resolved after you have called AEP Energy, you may call the PUC. The PUC can be reached toll free at 1-800-692-7380.

10. **CLASS ACTION WAIVER AND WAIVER OF JURY TRIAL**. Both you and AEP Energy agree that all actions, suits and/or proceedings arising out of, related to, or in connection with this Agreement shall be brought in the plaintiff's or claimant's individual capacity and not as a plaintiff, class member, or representative class member in any purported class action, collective action, or representative action or proceeding. THE PARTIES WAIVE ANY RIGHT TO ASSERT ANY CLAIMS AGAINST THE OTHER PARTY (INCLUDING ITS AFFILIATES, AGENTS, EMPLOYEES, DIRECTORS, OFFICERS, AND ASSIGNS) AS A REPRESENTATIVE OR MEMBER IN ANY CLASS ACTION, COLLECTIVE ACTION, OR REPRESENTATIVE ACTION OR PROCEEDING, EXCEPT WHERE SUCH WAIVER IS PROHIBITED BY LAW OR DEEMED BY A COURT OF LAW TO BE AGAINST PUBLIC POLICY. TO THE EXTENT EITHER PARTY IS PERMITTED BY LAW OR COURT OF LAW TO PROCEED WITH A CLASS OR REPRESENTATIVE ACTION AGAINST THE OTHER, THE PARTIES AGREE THAT: (A) THE PREVAILING PARTY SHALL NOT BE ENTITLED TO RECOVER ATTORNEYS' FEES OR COSTS ASSOCIATED WITH PURSUING THE CLASS OR REPRESENTATIVE ACTION (NOT WITHSTANDING ANY OTHER PROVISION IN THIS AGREEMENT); AND (B) THE PARTY WHO INITIATES THE PROCEEDING OR PARTICIPATES AS A NAMED REPRESENTATIVE OF ANY PURPORTED CLASS WILL NOT SUBMIT A CLAIM OR OTHERWISE PARTICIPATE IN ANY RECOVERY SECURED THROUGH THE CLASS OR REPRESENTATIVE ACTION. Nothing in this Agreement shall impair your right to make an informal or a formal complaint to the PUC. YOU AND AEP ENERGY BOTH AGREE THAT BOTH PARTIES ARE WAIVING A RIGHT TO A JURY TRIAL. The dispute resolution provisions set forth in Section 9 and this section shall survive termination of the Agreement.

11. **RIGHT OF RESCISSION.** You have the right to rescind your enrollment without penalty in writing or orally or by submitting an electronic rescission request to care@aepenergy.com at any time before midnight of the third (3rd) business day following your receipt of this Agreement (the "Rescission Period"). If this Agreement is not rescinded during this period, your enrollment will be sent to your EDC. A confirmation notice of enrollment with AEP Energy will be sent to you by your EDC.

12. **Warranty and Force Majeure.** AEP Energy warrants title to all electricity sold hereunder. THE WARRANTY SET FORTH IN THE PRECEDING SENTENCE IS EXCLUSIVE, AND AEP ENERGY EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES, WHETHER STATUTORY, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR ARISING OUT OF ANY COURSE OF DEALING OR PURPOSE OR USAGE OF TRADE. AEP Energy will make commercially reasonable efforts to provide your electric service but does not guarantee a continuous supply of electricity. AEP Energy will not be responsible for any failure to commence or end Generation Service on the relevant date described herein. Certain causes and events are out of the reasonable control of AEP Energy ("Force Majeure Events") and may result in interruptions in service. AEP Energy is not liable for damages caused by acts of God, changes in laws, rules or regulations or other acts of any governmental authority (including the PUC or Regional Transmission Organization), accidents, strikes, labor troubles,

required maintenance work, inability to access the EDC's system, nonperformance by the EDC, terrorism, sabotage, or any other cause beyond AEP Energy's reasonable control. If a Force Majeure Event occurs which renders AEP Energy unable to perform in whole or in part under this Agreement, our performance under this Agreement shall be excused for the duration of such event.

13. **LIMITATION OF LIABILITY AND REMEDIES.** UNLESS OTHERWISE EXPRESSLY PROVIDED HEREIN, TO THE EXTENT PERMITTED BY APPLICABLE LAWS AND REGULATIONS, ANY LIABILITY UNDER THIS AGREEMENT WILL BE LIMITED TO DIRECT, ACTUAL DAMAGES AS THE SOLE AND EXCLUSIVE REMEDY, AND ALL OTHER REMEDIES OR DAMAGES AT LAW OR IN EQUITY ARE WAIVED. NEITHER PARTY WILL BE LIABLE TO THE OTHER PARTY FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL, PUNITIVE, TREBLE, EXEMPLARY OR INDIRECT DAMAGES, WHETHER IN TORT OR CONTRACT, UNDER ANY INDEMNITY PROVISIONS OR OTHERWISE, IN CONNECTION WITH THIS AGREEMENT. THE LIMITATIONS IMPOSED ON REMEDIES AND DAMAGE MEASUREMENT WILL BE WITHOUT REGARD TO CAUSE, INCLUDING NEGLIGENCE OF ANY PARTY, WHETHER SOLE, JOINT, CONCURRENT, ACTIVE OR PASSIVE AND SHALL SURVIVE TERMINATION, CANCELLATION, SUSPENSION, COMPLETION OR EXPIRATION OF THIS AGREEMENT; PROVIDED NO SUCH LIMITATION SHALL APPLY TO DAMAGES RESULTING FROM THE WILLFUL MISCONDUCT OF ANY PARTY. AEP ENERGY'S TOTAL LIABILITY UNDER THIS AGREEMENT WILL NOT EXCEED AN AMOUNT EQUAL TO THE CHARGES ON YOUR SINGLE LARGEST MONTHLY INVOICE FOR GENERATION SERVICE DURING THE TWELVE (12) MONTHS PRECEDING THE APPLICABLE CLAIM. NOTHING IN THIS AGREEMENT SHALL CONSTITUTE A WAIVER OF ANY RIGHTS YOU HAVE UNDER PENNSYLVANIA OR FEDERAL CONSUMER PROTECTION LAWS.

14. **Your Liability and Indemnification of AEP Energy.** You assume full responsibility for retail electricity supplied to you at and after the Delivery Point and agree to and shall indemnify, defend, and hold harmless AEP Energy, its parent company and all of its affiliates, and all of their respective managers, members, officers, directors, shareholders, associates, employees, servants, and agents from and against all claims, losses, expenses (including attorneys' fees), damages, demands, judgments, causes of action, and suits of any kind (hereinafter collectively referred to as "Claims"), including Claims for personal injury, death, or damages to property occurring at and after the Delivery Point, including upon your residential premises, arising out of or related to the Generation Service and/or your performance under this Agreement.

15. **Assignment and Severability.** You shall not assign this Agreement or your rights hereunder without the prior written consent of AEP Energy. AEP Energy may, without your consent, assign this Agreement to another EGS, including any successor, in accordance with the rules and regulations of the PUC. Any provision or section of this Agreement declared or rendered void, unlawful, or otherwise unenforceable shall not otherwise affect the lawful obligations that arise under this Agreement.

16. **Choice of Law and Venue.** This Agreement shall be construed and enforced in accordance with the laws of the Commonwealth of Pennsylvania without giving effect to any conflicts of law principles which otherwise might be applicable. Any action arising out of this Agreement shall be litigated exclusively in the federal court, if it has jurisdiction over the matter, or the state court, if there is no federal jurisdiction, located within Allegheny County, Pennsylvania. You and AEP Energy expressly consent and irrevocably submit to the jurisdiction of said courts for purpose of any such actions and covenant not to sue in any other court. You and AEP Energy further agree not to raise, and waive, any objections or defenses based upon venue or forum non conveniens.

17. **Miscellaneous.** AEP Energy assumes no responsibility or liability for the following items that are the responsibility of the EDC: operation and maintenance of the EDC's electrical system, any interruption of service, termination of service, or deterioration of the EDC's service. In the event of a power outage, you should contact your local EDC (see Section 18 below). You are responsible for providing AEP Energy with accurate account information. If said information is incorrect, AEP Energy reserves the right to re-price the applicable account(s). AEP Energy reserves the right to re-price any account(s) or return you to the EDC if your rate code or meter type is changed and/or the account is no longer eligible for the retail electricity choice program. Any notice, demand or other communication to be given hereunder, including, without limitation, any renewal or termination notice, shall be in writing and sent to the address or email address maintained on file for you. By entering this Agreement, you represent and agree that the account served by AEP Energy under this Agreement is a residential account, in the EDC's service territory, and you are not an existing AEP Energy customer. AEP Energy reserves the right, at any time, to not enroll or to cancel service to customer locations that do not meet the preceding criteria and return you to the EDC (or previous AEP Energy product, if applicable) with no penalty to AEP Energy. This Agreement supersedes all prior written or oral agreements or understandings.

You agree and authorize that AEP Energy and/or its third-party service providers may listen to, monitor, and/or record telephone your calls with us and/or any of our affiliates, agents, and/or contractors as part of providing services under this Agreement. You expressly agree that these contacts are not unsolicited for purposes of any state or federal law. You also agree to receive communications from AEP Energy via email at the email address you provide (if any) to AEP Energy. It is your responsibility to notify AEP Energy of any changes to your contact information, including your email address.

18. **Contact Information.**

AEP Energy, 1 Riverside Plaza, 20th Floor, Columbus, OH 43215,

Attn: Customer Care. For more information, call 1-866-258-3782 or visit AEPenergy.com/contact-us.

Information on generation energy sources, energy efficiency, environmental impacts or historical billing data is available from AEP Energy upon request.

Information about shopping for an electric supplier is available at www.PaPowerSwitch.com, by calling the Commission at (800) 692-7380 and the Office of Consumer Advocate at (800) 684-6560 or at www.oca.state.pa.us.

AEP Energy is an Electric Generation Supplier (EGS) and is not soliciting on behalf of and is not affiliated with or an agent of your Electric Distribution Company. Electricity is the product of a mix of generation energy sources that is delivered over a system of wires. Customers do not need to purchase electric generation supply from AEP Energy in order to continue to receive regulated service from their utility.

19. The electricity supply provided to you during the term of this Agreement will include renewable energy certificates sourced from renewable resources of the type and in an amount equal to the percentage of your usage as stated in the table above under "Generation Service Charges." ECO-Advantage is a nationally wind-generated REC product, is Green-e® Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. For more information about Green-e Energy, visit www.green-e.org or contact energy@resource-solutions.org .

2026 PROSPECTIVE PRODUCT CONTENT LABEL[1]

AEP Energy's ECO-Advantage® is a Renewable Energy Certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, see www.green-e.org/rec.

AEP Energy's ECO-Advantage matches 100% of your electricity usage. In 2026, ECO-Advantage will be made up of the following renewable resources.

Green-e Energy Certified New[2] Renewables in ECO-Advantage		Generation Location
-Wind	100%	National supply could be sourced from any of the following states including but not limited to: Texas, Iowa, Kansas and Minnesota.
TOTAL	100%	

1. These figures reflect the renewables that AEP Energy has contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the RECs you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying the United States includes: Coal (21.8%), Nuclear (18.9%), Oil (<1%), Natural Gas (38.3%), Hydroelectric (7.5%), Other Fossil (<1 %), and Renewables (20.1%; Hydropower 6.3%, Wind 9.2%, Biomass 1.3%, Solar 2.8%, and Other <1%). This resource mix was prepared in accordance with the U.S. Department of Energy/ Energy Information Administration.

The average home in the United States uses 11,000 kWh per year. Source: U.S. EIA, 2019.

For specific information about this product, please contact AEP Energy via phone at (866) 258-3782, by email at care@aepenergy.com, or visit AEPenergy.com.

Green-e Energy CERTIFIED

ECO-Advantage is Green-e Energy certified, and meets the environmental and consumer-protection standards set forth by the non-profit Center for Resource Solutions. Learn more at www.green-e.org.

You have decided to purchase Renewable Energy Certificates for all or a portion of your total electricity usage through AEP Energy, Inc.'s (AEP Energy) ECO-Advantage® Plan. AEP Energy does not purchase supplies of renewable electricity directly. Instead, AEP Energy purchases RECs, on your behalf, to offset your usage. RECs represent the environmental attributes and benefits of power generated from renewable resources. ECO-Advantage is Green-e Energy certified, and meets the environmental and consumer- protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org.

Price, Terms, and Conditions	
Green-e Energy CERTIFIED	AEP Energy's ECO-Advantage Plan is certified by Green-e Energy, which requires companies to provide their customers with this notice of Price, Terms and Conditions of service. You have the right to rescind your enrollment without penalty by contacting AEP Energy at the toll- free number specified below. Your rescission period depends upon the state in which your service area is located and is specified in your AEP Energy contract. For more information about Green-e Energy, write Green-e Energy, PO Box 29512, San Francisco, CA 94129 or log onto www.green-e.org.
Company:	AEP Energy, a competitive retail electric generation supplier and an affiliate of Ohio Power Company (AEP Ohio). Electricity is the product of a mix of generation energy sources that is delivered over a system of wires. Customers do not need to purchase electric generation supply from AEP Energy in order to continue to receive regulated service from their utility. Switching to AEP Energy is not mandatory and you have the option of remaining with your local distribution company for basic generation service. AEP Energy's Maryland license is IR-757.
Whom should I contact for more information?	AEP Energy Customer Care: 866-258-3782 or care@aepenergy.com AEP Energy, Inc. 1 Riverside Plaza, 20th Floor Columbus, OH 43215. Attn: Customer Care www.AEPenergy.com
How will I be billed?	Your utility will bill you for total electricity services. This invoice will include your contracted energy charge that is equal to the sum of your electric supply charge and your REC purchase.
How will my bill be calculated?	Based on a monthly average usage of 1,000 kWh, the following example provides you an estimate of your monthly power charge. This is an example only. Your actual bill will vary based on your use of electricity and the price per kWh of power in your AEP Energy contract. Monthly kWh usage: 1,000 Percentage of power: 100% Price per kWh of power $0.047 Total power charge: $47.00
Will my rates change over time?	Your rate for renewable energy will not change during the initial term of your AEP Energy contract. Please refer to section 8 of your AEP Energy contract (Terms and Conditions) for information related to contract renewal.

What sources will be used in my certified product?	Please see the attached product content label.
If I want to terminate this agreement/ contract, what is the early termination fee?	Please refer to your AEP Energy contract (Terms and Conditions) for information related to any early termination fee.
What length of agreement/ contract is required?	Please refer to your AEP Energy contract (Terms and Conditions) for the term of your contract.
What other fees might I be charged?	For those customers who are invoiced by AEP Energy, late payments, including late interest payments, are subject to interest charges at the rate of one and one half percent (1.5%) per annum. If you do not make timely payments, the utility or AEP Energy may impose late fees and your service may be disconnected.
Where can I find the current and historic Green Product Content Labels.	The current product content label is attached to this document below. The current and historic product content labels are also available online at: AEPenergy.com/residential/renewable-energy

Indra Energy
Pennsylvania Electric Supplier Contract Summary
Residential & Small Commercial - Intro to Variable

Electric Generation Supplier Information	Indra Energy (“Indra”) Address: 11740 Katy Freeway, Suite 1700, Houston, TX 77079 Phone: (888) 504-6372 Website: www.IndraEnergy.com License # A-2009-2108338 Indra is responsible for your electric generation charges.
Electric Price Structure	You will pay a price for electric supply service that will vary from month-to-month as determined by Indra in its sole discretion on the wholesale market prices acquired for energy, any supply and agency functions that Indra performs for you, line loss, certain transmission, capacity, ancillary, administrative and regulatory compliance costs incurred by Indra, alternative and renewable energy requirements, and other prevailing business considerations and market conditions, plus Indra costs, expenses and margins. This list of factors is not exhaustive and no single factor will determine the rate. You will receive notification of any rate change when you receive your bill reflecting the new rate after completion of a billing cycle. You can access historical variable pricing information, updated monthly, by visiting Indra’s website at https://secure.indraenergy.com/pennsylvania/pennsylvania-variable-rates/ or by calling (888) 504-6372. There is no limit on how much the price of your electric supply service may change from one billing cycle to the next. Historical pricing is not indicative of present or future pricing.
Electric Generation/Supply Price	$0.11900 per kWh for the first month of service (the “Introductory Period”). After the Introductory Period, your supply Price will convert to a variable rate. The rate after the Introductory Period will be $0.11900 per kWh for one billing cycle, after which your rate may vary each month based on the factors described above.
Statement Regarding Savings	Savings are not guaranteed.
Deposit Requirements	None.
Incentives	N/A
Contract Start Date	This Agreement will start on the next available meter read date after your electric generation supplier is changed to Indra by your Local Utility, or after you switch from any other Indra plan to a variable rate plan.
Contract Duration/Length	Continuous/Month-to-month.
Early Termination Fee (Per remaining month)	$0.00
End of Contract	Your contract will continue each month under the same terms and conditions (except for the Variable Rate, which may increase or decrease) without the need to renew, unless you or Indra terminates the contract by providing appropriate notice to the other.
Right of Rescission	You may cancel this Agreement at any time before midnight of the third business day following the receipt of this Agreement by: (a) calling (888) 504-6372; (b) sending a

	letter to 11740 Katy Freeway, Suite 1700, Houston, TX 77079; or (c) emailing CustomerCare@IndraEnergy.com. with your full name and account number details.

PENNSYLVANIA ELECTRIC
TERMS OF SERVICE AND DISCLOSURE STATEMENT
RESIDENTIAL & SMALL COMMERCIAL

INTRODUCTION

This is an agreement, together with your Contract Summary, Welcome Letter, and any and all Renewal Notices (if applicable) (collectively, the "Agreement"), between Indra Energy ("Indra" or "Indra Energy") and you for electric generation supply service at each of the account addresses listed in your Welcome Letter and/or Contract Summary (or listed in any addendum). You agree to authorize a switch of your electric generation supply service to Indra and to purchase all the electricity required to service each of the accounts listed in your Welcome Letter (or listed in any addendum) ("Purchase Quantities") at a price as described in this Agreement.

DISCLOSURE

Indra Energy is licensed by the Pennsylvania Public Utility Commission ("PUC") to offer and provide electric supply service in Pennsylvania. The PUC regulates distribution prices and services. Indra Energy is also licensed by the PUC to offer and provide electric generation supply service in Pennsylvania. Indra's electric PUC license number is A- 2009-2108338. Indra sets the generation prices and charges that you pay. The Federal Regulatory Commission regulates transmission prices and services.

Product Information Chart

(Electric) Product Name	Variable
Energy Type	100% Renewable Energy
Term Length	Month to Month
Price	Month to Month
Promotion Price	$0.11900 kWh
Promotion Term	2 Month(s)
Early Termination Fee (Per remaining month)	$0.00
Incentive	N/A

RIGHT OF RECISSION.

You may cancel this Agreement at any time before midnight of the third business day following the receipt of this Agreement by: (a) calling (888) 504-6372; (b) sending a letter to 11740 Katy Freeway, Suite 1700, Houston, TX 77079; or (c) emailing CustomerCare@IndraEnergy.com. Customer shall provide customer name, service address, phone number, account number and a statement that customer is rescinding under the Right of Rescission.

DEFINITIONS.

"Generation Charge" means the charge for producing electricity. Generation service is competitively priced and is not regulated by the Public Utility Commission. If you purchase electricity from an electric supplier, your generation charge will depend on the contract between you and your supplier.

"Transmission Charge" The cost for transporting electricity from the generation source to your electric distribution company. For most electric customers who select a new supplier, transmission costs will be included in the charges from your new supplier. The Federal Energy Regulatory Commission regulates retail transmission prices and services. This charge will vary with your source of supply.

PRICING.

Indra Electric Supply Bundled with Cinch Home Services (if applicable):

If you enroll to this Bundled plan, you will be charged a flat charge as set forth in the Product Information Chart above per billing cycle (based on a billing cycle of 28 to 31 days) **for usage up to the first kWh within that billing cycle** during the Initial Term. **Should your electric usage exceed kWh in a billing cycle, you will be billed at a rate** as set forth in the Product Information Chart above **per kWh for all usage in excess of kWh during that billing cycle.** For any billing cycle that falls outside the 28 to 31 day range, the flat charge will be prorated over a period of 31 days and you will be charged as set forth in the Product Information Chart above per day for that particular billing cycle. In the event that your utility issues a cancel/rebill for your account and you are overcharged by Indra due to an irregular billing period caused by the cancel/rebill, you will be reimbursed by Indra for the excess charges at the end of your term. This plan is subject to availability. Please refer to your Contract Summary and the Cinch Home Services section of these terms for more information. **The monthly costs may change subject to your energy usage.** Your price includes electric supply charges and estimated State Taxes including the Gross Receipts Tax, but excludes applicable state and local Sales Tax and utility charges.

CINCH HOME SERVICES (WHEN APPLICABLE).

If you enroll on a qualified electric plan with Indra that includes Cinch home services, you will be receiving a Cinch Home Services Welcome Kit within the 15 days after your account has been enrolled. It will have detailed information, including your benefits, limitations, exclusions and how to access your Cinch account and other terms of service. All supply plans that include Cinch home services are subject to availability and may change or be discontinued at any time. Indra shall not be held liable for any interruption, delay, or discontinuation of services resulting from any third-party providing services through Cinch. If your electric supply service with Indra is terminated, the Cinch service will also be cancelled. If you cancel your coverage with Cinch home services, your energy supply service with Indra will continue. If Indra discontinues the Cinch home services plan, Indra will notify you 30 days in advance and provide you with an opportunity to continue service without the Cinch coverage, enroll in another supply plan, or terminate your contract. For any questions or inquiries related to your home services plan, please contact Cinch by telephone at (844) 627-6013. The price for your energy supply plan will remain the same whether or not you utilize your benefits with Cinch.

INTRODUCTORY OR INITIAL PRICE (WHEN APPLICABLE).

If you enroll in an introductory/initial price as set forth in your Product Information Chart above, Contract Summary and/or Welcome Letter for the time period indicated in your Contract Summary and/or Welcome Letter, and thereafter, your price for electric supply service will automatically become for the length of this Agreement either a Variable or Fixed price as described herein and as stated in your Product Information Chart above, Contract Summary and/or Welcome Letter.

VARIABLE ELECTRIC PRICE (WHEN APPLICABLE).

If you enroll in a variable electric product (as indicated on your Contract Summary), you will pay a price for electric supply service that will vary from month to month as determined by Indra in its sole discretion based on the wholesale market prices acquired for energy, any supply and agency functions that Indra performs for you, line loss, certain transmission, capacity, ancillary, administrative and regulatory compliance costs incurred by Indra, alternative and renewable energy requirements, and other prevailing business considerations and market conditions, plus Indra's costs, expenses and margins. This list of factors is not exhaustive, and no single factor will determine the rate. This price includes Transmission Charges (if applicable) and estimated Total State Taxes, including the Gross Receipts Tax, but excludes applicable state and local Sales Tax. You will receive notification of any rate change when you receive your bill reflecting the new rate after completion of a billing cycle. Your price may be higher or lower than your utility's rate in any given month, and there is no guarantee of savings. **The price will change each billing period, and there is no limit on how much the price of your electric supply service will change from one billing cycle to the next.** You can access future or historical pricing information, updated monthly, by visiting Indra's website at: https://secure.indraenergy.com/pennsylvania/pennsylvania-variable-rates or by calling (888) 504-6372

FIXED ELECTRIC PRICE (WHEN APPLICABLE).

If you receive fixed electric supply service from Indra, you will pay a fixed price as set forth in your Product Information Chart above, Contract Summary and/or Welcome Letter for the time period indicated in your Product Information Chart above, Contract Summary and/or Welcome Letter. For your electric supply price, it includes Transmission Charges (if applicable) and estimated Total State Taxes, including the Gross Receipts Tax, but excludes applicable state and local Sales Tax.

HISTORICAL PRICING INFORMATION.

You may obtain Indra's previous 24 months' average monthly billed electric supply prices for your rate class and electric utility service territory by calling Indra at (888) 504-6372 or by visiting www.IndraEnergy.com/contact, where you can email Indra's Customer Care Department. Please be aware that historical pricing is not indicative of present or future pricing.

TAXES

You are responsible for paying and reimbursing Indra for all applicable taxes, and other government fees, assessments, and charges, however designated, relating to the supply service provided under this Agreement. If you are tax exempt, you must furnish Indra an exemption certificate before service commences.

BILLING & PAYMENT.

This Agreement does not include utility transportation, delivery, or other charges that your electric utility may impose. You will receive a single bill from your utility each month which will include the charges for Indra's electric supply service and for the services provided by your utility. You will make payment for all of these services directly to your utility.

DURATION OF AGREEMENT.

The Initial Term of this Agreement will start on the next available meter read date after your electric generation supplier is changed to Indra Energy by your Local Utility. The duration of your Agreement with Indra will continue as set forth in as Product Information Chart above ("Initial Term").

RENEWAL PROVISION/CHANGE IN TERMS: ELECTRIC SUPPLY SERVICE:

If you have a fixed term contract that will be ending, or whenever Indra wants to change the contract, you will receive two (2) separate notices before the contract ends or the changes happen ("Options Notice"). You will receive the first notice 45-60 days before, and the second notice 30 days before the expiration date or the date the change becomes effective. These notices will explain your options going forward. You will not be subject to a penalty or fee if you terminate the contract at any time between the date the options notice is issued and the expiration of the contract. If you do not respond to the second notice or select another provider or service plan, your contract will automatically renew at the terms set forth in such notice.

CUSTOMER CANCELLATION

You may cancel this Agreement by: (a) calling Indra at (888) 504-6372; (b) sending a letter 11740 Katy Freeway, Suite 1700, Houston, TX 77079; or (c) e-mailing CustomerCare@IndraEnergy.com. You shall remain

obligated to pay Indra for all electric supply service provided to you prior to the effective date of such cancelation. When you cancel, you agree that you are responsible to pay for Indra Energy's service through the date you are switched to another supplier or returned to the utility for service. You also shall be obligated to pay any reasonable attorneys' fees, and any related costs and expenses incurred by Indra in connection with its attempt to collect and recover same. Indra may cancel this Agreement upon 15 days written notice to you if you fail to meet your obligations under this Agreement, your utility terminates your service, or if Indra is no longer able to serve you. The effective date of any such termination will be determined by your utility. **All incentives attached to your plan will automatically terminate along with the cancellation of your energy supply.**

Company-Initiated Cancellation - If Indra cancels this agreement for any reason other than for customer non-payment, we will follow applicable rules in providing notice to you.

Customer-Initiated Cancellation - If you cancel this agreement before the end of the initial term, you will owe us for amounts unpaid up to the date of cancellation and we will charge the early cancellation fee mentioned above.

Customer Move - You may cancel this Agreement if you move from the Service Address(es) by providing Indra at least 30 days' advance written notice; but the cancellation shall apply only to the Service Address(es) you move from, and not any other Service Address(es) that may be listed for you in this Agreement.

CUSTOMER INFORMATION RELEASE.

You authorize Indra to initiate service to the accounts listed in your Welcome letter (or in any addendum), to begin your enrollment, and to obtain historical billing data and other information about you ("Customer Information") from your electric utility, so that Indra can start and continue its service to you. Indra reserves the right to refuse to provide service to you under this Agreement if it is unable to obtain the necessary Customer Information. Indra will maintain the confidentiality of the customer's personal information including name, address, phone number, usage and payment history as required by applicable Commission regulations and Federal and State laws. Customer Information may be shared with third parties pursuant to Indra's privacy policy. See https://www.indraenergy.com/privacy-policy. This authorization will remain in effect as long as this Agreement is in effect. You may rescind these authorization at any time by either calling or providing written notice to Indra at the Contact Information in this Agreement. Indra reserves the right to the extent permitted by law to reject your enrollment or terminate this Agreement in the event these authorizations are rescinded.

ENERGY INFORMATION AVAILABLE.

If you are an Indra Energy customer, information on generation energy sources, energy efficiency, environmental impacts, and historical billing data is available from your electric utility or Indra on request.

RENEWABLE ENERGY INFORMATION

For Products described as "renewable" or "green," a chosen percentage of Customer's electricity supply service will be paired with renewable energy certificates generated from renewable or alternative energy sources in the United States, which may include wind, solar, hydro or any other zero-emission sources which have been qualified as such. For example, if you enroll on a 100% renewable or green product, Indra Energy will ensure that 100% of your electricity usage will be paired with renewable energy credits (RECs), over and above any mandatory renewable portfolio or clean standard requirements. The amount of RECs that exceed any mandatory renewable portfolio or clean standard requirements may be generated from renewable or alternative energy sources located anywhere in the United States. Indra will purchase RECs in the same calendar year as your electricity usage and retire them in a regional generation attribute system. Indra may take up to three (3) months after the end of the calendar year to retire RECs required to fulfill the obligations of the product.

INCENTIVES (IF APPLICABLE).

Please refer to your Product Information Chart above or Welcome Packet and or Contract Summary for promotions or incentives you will be eligible for during the Term of your Agreement. A separate Terms & Conditions document will be enclosed for each applicable promotion and will be made part of this Agreement. Indra reserves the right to disqualify a customer from participation in any of Indra incentive programs.

DISPUTE PROCEDURES AND QUESTIONS CONCERNING YOUR SERVICE.

If you are receiving electric supply service from Indra, you should contact Indra if you have any questions or complaints concerning your service. if you have a question or complaint concerning your electric distribution service, billing, metering, or other services provided by your electric utility, you should contact your electric utility directly. you can call the public utility commission at 800-692-7380 if you are not satisfied after discussing such matters with Indra. complaints that pertain to chapter 56 (relating to standards and billing practices for residential utility service) shall be handled and resolved in accordance with the applicable standards in chapter 56. Indra shall give the public utility commission access to disclosure statements, billing, and other customer information resources for compliance reviews as deemed necessary by the commission. when complaints arise and are brought before the public utility commission for resolution, the obligation of India shall be extended to the provision of pricing information.

ARBITRATION AGREEMENT, WAIVER OF RIGHT TO SUE IN COURT, AND WAIVER OF CLASS ACTION TO THE FULLEST EXTENT PERMITTED BY APPLICABLE PENNSYLVANIA LAW, IF THERE IS AN ISSUE, CLAIM OR DISPUTE RELATING TO THIS ELECTRIC POWER SUPPLY AGREEMENT THAT NEEDS TO BE RESOLVED AND WE ARE UNABLE TO RESOLVE IT INFORMALLY, IT MUST BE RESOLVED THROUGH FINAL, BINDING ARBITRATION AND WE MUTUALLY FOREGO THE RIGHT TO RESOLVE IT IN A COURT OF LAW. THIS APPLIES REGARDLESS OF WHETHER THE ISSUE, CLAIM OR DISPUTE INVOLVES A TORT, FRAUD, BREACH OF CONTRACT, MISREPRESENTATION, PRODUCT LIABILITY, NEGLIGENCE, AND VIOLATION OF A STATUTE OR ANY OTHER LEGAL THEORY. INCLUDED ARE ALL ISSUES, CLAIMS AND DISPUTES ARISING OUT OF OR RELATING ANY ASPECT OF YOUR PARTICIPATION IN THIS ELECTRIC POWER SUPPLY AGREEMENT AND AUTHORIZATION TO SWITCH ELECTRIC GENERATION SERVICE TO INDRA WHETHER ARISING DURING OR AFTER YOUR PARTICIPATION IN THIS ELECTRIC POWER SUPPLY AGREEMENT AND AUTHORIZATION TO SWITCH ELECTRIC GENERATION SERVICE TO INDRA. ALL ARBITRATIONS SHALL BE CONDUCTED ON AN INDIVIDUAL (AND NOT A CLASS-WIDE) BASIS AND AN ARBITRATOR SHALL HAVE NO AUTHORITY TO AWARD CLASS-WIDE RELIEF. YOU ACKNOWLEDGE AND AGREE THAT THIS SPECIFICALLY PROHIBITS YOU FROM COMMENCING ARBITRATION PROCEEDINGS AS A REPRESENTATIVE OF OTHERS OR JOINING IN ANY ARBITRATION PROCEEDINGS BROUGHT BY ANY OTHER PERSON. NOTWITHSTANDING THE FOREGOING, THIS PARAGRAPH DOES NOT PREVENT YOU FROM FILING A COMPLAINT RELATING TO YOUR ELECTRICITY SUPPLY SERVICE WITH INDRA PURSUANT TO THE LAWS GOVERNING RETAIL ELECTRIC GENERATION SUPPLIERS IN YOUR STATE AND THE REGULATIONS OF ANY AGENCY IN YOUR STATE WITH JURISDICTION OVER RETAIL ELECTRIC GENERATION SUPPLIERS.

CONTACT INFORMATION.

Supplier Name: Indra Energy; Supplier Street Address: 11740 Katy Freeway, Suite 1700, Houston, TX 77079; Supplier Phone Number (888) 504-6372; Supplier Internet Address: http://www.IndraEnergy.com/. Information about shopping for an electric supplier is available at www.PAPowerSwitch.com, by calling the PUC at 800- 692-7380, and the Office of Consumer Advocate at 800- 684-6560 or www.oca.state.pa.us. The PUC's address is: 400 North Street, Harrisburg, PA, 17120.

APPLICABLE LAWS, ETC.

This Agreement is subject to all applicable local, state, and federal laws, and the orders, rules and regulations of governmental agencies having jurisdiction over the subject matter of this Agreement, including the PUC. Services provided by your electric utility are subject to all applicable state and federal laws, orders, rules, and regulations.

FORCE MAJEURE.

Neither Indra nor you will be liable for a breach of this Agreement if such breach is due to a force majeure

event. A “force majeure event” means a material, unavoidable occurrence beyond a party’s control, such as a fire, act of God or public enemy, labor strike, lockout or other industrial disturbance, act of terrorism, government action, electric utility action, storm, hurricane, flood, explosion, shortage or unavailability of transmission facilities, and other events that cannot be prevented or overcome by ordinary due diligence. A force majeure event does not include an inability to pay any amount owing pursuant to this Agreement.

REGULATORY CHANGES.

This Agreement is subject to present and future legislation, orders, rules, regulations, or decisions of a duly constituted governmental authority having jurisdiction over this Agreement or the services to be provided hereunder. If at some future date there is a change in any law, rule, regulation, tariff or regulatory structure (“Regulatory Change”) which impacts any term, condition, or provision of this Agreement including, but not limited to price, Indra shall have the right to cancel or modify this Agreement to reflect such Regulatory Change by providing written notice to you.

NET METERING:

If you currently own or plan to install during the term of this Agreement eligible renewable electrical generating facilities generating renewable energy to supply all or part of your electricity usage and such generating facility is or will be net metered by your utility, Indra reserves the right to terminate your supply agreement and return you to local utility service or a supplier of your choosing. By enrolling with Indra, you agree to forfeit any credits or banked usage you may have with the utility.

ELECTRONIC COMMUNICATION.

Unless otherwise required by law, if you provide Indra with consent to receiving electronic communications, you agree that Indra may transmit to you all notices and other communications, including those required in this Agreement, electronically to your electronic device(s) by either email, text/SMS messages or other electronic means. You shall be responsible for notifying Indra of any change to the contact information of the electronic device(s) such as email address, phone number and/or any withdrawal of your consent to such electronic communications. Notices transmitted to you via your electronic device(s) will be deemed to have been received if transmitted to you on the electronic device(s) using the contact information you provide to Indra. Electronic device(s) means a device that is used for audio, video, or text communication or any other type of computer or computer-like instrument including: a smart phone, a smart or electronic watch, a tablet, or a virtual reality device.

LIMITATION OF LIABILITY.

TO THE FULLEST EXTENT PERMITTED BY APPLICABLE PENNSYLVANIA LAW, INDRA ENERGY WILL NOT BE LIABLE TO YOU, AND YOU WILL NOT BE LIABLE TO INDRA ENERGY FOR ANY CONSEQUENTIAL, EXEMPLARY, PUNITIVE, INCIDENTAL, OR INDIRECT DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE SERVICE OR ANY ACTS OR OMISSIONS ASSOCIATED THEREWITH, INCLUDING ANY ACTS OR OMISSIONS BY THIRD PARTY SERVICE PROVIDERS INCLUDING CINCH HOME WARRANTY SERVICES, AGENTS OR SUBCONTRACTORS OF INDRA, OR RELATING TO ANY SERVICES FURNISHED, WHETHER SUCH CLAIM IS BASED ON BREACH OF WARRANTY, CONTRACT, TORT OR ANY OTHER LEGAL THEORY, AND REGARDLESS OF THE CAUSES OF SUCH LOSS OR DAMAGES OR WHETHER ANY OTHER REMEDY PROVIDED HEREIN FAILS.

NO WARRANTIES.

INDRA ENERGY DOES NOT MAKE ANY WARRANTIES, AFFIRMATIONS OF FACT OR PROMISES, EXPRESS OR IMPLIED, THAT EXTEND BEYOND THE FACE OF THIS AGREEMENT, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

AGREEMENT DETAILS.

Our full, legal name is Palmco Power PA, LLC dba Indra Energy for electric supply service but we have used “we”, “us”, “our” or “Indra Energy” to refer to ourselves for the purposes of this Agreement. We use “you” or “your” to refer to you, the customer.

MISCELLANEOUS.

This Agreement is the entire understanding between you and Indra with respect to the subject matter hereof and there are no promises, covenants or undertakings other than those expressly set forth in

this Agreement. Except as otherwise provided herein, this Agreement can only be amended by a writing signed by you and Indra.

THIS AGREEMENT WILL BE GOVERNED AND CONSTRUED IN ACCORDANCE WITH PENNSYLVANIA LAW, WITHOUT REGARD TO PRINCIPLES RELATING TO CONFLICTS OF LAW.

ASSIGNMENT.

You may not assign this Agreement without the prior written consent of Indra. Indra may sell, transfer, pledge, or assign the accounts, revenues, or proceeds hereof, in connection with any financial agreement and may assign this Agreement to another energy supplier (the "Assignment"), energy services company or other entity in accordance with the PUC rules and procedures, if any, governing such transactions. This Agreement will inure to and be binding upon the successors and assignees of the parties. Prior to any contract assignment, Indra Energy will provide you with written notice that includes the name and contact number of the new supplier, the estimated month and year that the assignment is expected to occur, and confirmation that the contract terms and conditions will remain unchanged.

EMERGENCIES.

IF YOU ARE RECEIVING ELECTRIC SERVICE FROM INDRA UNDER THIS AGREEMENT, IN THE EVENT OF AN EMERGENCY, ELECTRIC OUTAGE, OR SERVICE INTERRUPTION, YOU SHOULD IMMEDIATELY CONTACT YOUR ELECTRIC UTILITY.

PENNSYLVANIA - FIXED RATE ELECTRIC CONTRACT SUMMARY v.02012026

This document summarizes the key terms of your contract with Town Square Energy East, LLC ("TSEE")

%CUSTOMERNAME% %SERV_ADDRESS% %SERV_CITYSTZIP%

Electric Generation Supplier Information	**Town Square Energy, LLC, 2200 E. Williams Field Rd., Suite 200, Gilbert, AZ 85295** **1.877.430.0093** **www.townsquareenergy.com** You have chosen TSEE as your electric generation supplier. TSEE is not affiliated with your electric distribution company ("EDC"). TSEE is responsible for the electric generation charges on your bill. These charges will appear on your EDC bill separate and apart from your EDC's distribution charges for delivering your electricity.
Price Structure	Fixed Rate. With TSEE's Fixed Rate plan your rate will be effective starting with your first date of service with TSEE and will remain fixed for the first **18 Months** billing cycles. This rate may be higher or lower than the EDC's rate. **13.170¢** per kWh.
Statement Regarding Savings	TSEE's rate for electricity supply may be higher or lower than your EDC's rate, there is no guarantee of savings.
Deposit Requirements	TSEE does not require a deposit.
Contract Start Date	Your TSEE electric supply service will begin on the date set by your EDC.
Incentives	
Contract Duration/Length	The Initial Term of this Agreement is **18 Months** billing cycles.
Cancellation/Early Termination Fees	If you terminate the Agreement prior to the end of the Initial Term, or TSEE terminates the Agreement prior to the end of the Initial Term due to your breach, you shall pay TSEE, in addition to any other applicable charges, an early termination fee of $No cancellation fee

End of Contract	You will receive an initial notice 45 to 60 days prior to the expiration of the Initial Term. You will then receive an options notice 30 days prior to the expiration of the Initial Term advising you of your renewal options. If you do not respond to the notifications, your service with TSEE will continue and this Agreement may automatically rollover to another fixed term ("Renewal Term") or to month-to-month terms, as set forth in the notifications. You will not have to pay an early termination fee if you terminate the Agreement after TSEE issues the options notice.
Right of Rescission	You will have 3 business days, following your receipt of the written Disclosure Statement, to rescind your enrollment with TSEE. To rescind, contact TSEE at 2200 E. Williams Field Rd., Suite 200, Gilbert, AZ 85295, 1.877.430.0093, or **customercare@townsquareenergy.com.**

PA – TOWN SQUARE ENERGY – FIXED RATE ELECTRIC DISCLOSURE STATEMENT – v.02012026

This is an agreement ("Agreement") for electricity generation supply services, between Town Square Energy East, LLC ("Town Square") and %CUSTOMERNAME% ("Customer" or "you") %SERV_ADDRESS% %SERV_CITYSTZIP%

BACKGROUND

Town Square is licensed by the Pennsylvania Public Utility Commission (the "Commission") to offer and supply electric generation services in Pennsylvania. Town Square's PUC license number is A-2010-2199551.

Your generation prices and charges will be set by Town Square. The Public Utility Commission regulates distribution prices and services. The Federal Energy Regulatory Commission regulates transmission prices and services.

You will continue to receive your bill from your Electric Distribution Company (EDC). It will contain the EDC's charges and Town Square's charges. Your EDC will continue to provide all emergency repairs and services.

Right of Rescission - You may cancel this Agreement at any time before midnight of the third business day after receiving this Disclosure Statement. To do so, you may contact Town Square at 2200 E. Williams Field Rd., Suite 200, Gilbert, AZ, 85295, by phone at 1.877.430.0093, or by email at customercare@townsquareenergy.com.

DEFINITIONS

Generation Charge - Charge for production of electricity. Transmission Charge – The costs for transporting electricity from the generation source to your EDC.

TERMS OF SERVICE

1. Price. For each billing cycle, the price for the electricity supplied pursuant to this Agreement will be calculated by multiplying (i) the agreed-upon fixed rate for the electricity, by (ii) the amount of electricity consumed, as determined by the EDC's actual or estimated meter reads. The rate for electricity does not include the EDC's charges and fees.

Fixed Rate Product: If your Contract Summary indicates that you have chosen a Fixed Rate electric product, the rate(s) for the electricity supplied pursuant to this Agreement during the Initial Term (defined in your Contract Summary) will be the rate(s) set forth on the Contract Summary. Fixed rates include Transmission Charges and estimated total state taxes, including the Gross Receipts Tax, but exclude applicable state and local Sales Tax. This rate will be effective starting with your first date of service with Town Square and will remain fixed for the Initial Term.

2. Length of Agreement. *Fixed Rate Product*: For the Fixed Rate product, this Agreement shall commence as of the date Customer's enrollment with Town Square is deemed effective by the EDC, and it shall continue until the conclusion of the Initial Term (defined in your Contract Summary). The Agreement may renew at that juncture as described in the **Renewal Provisions/ Agreement Expiration/Change in Terms** section below.

3. Special Terms and Conditions. Rebate Programs: From time-to-time Town Square may offer a rebate program for new customers who enroll with Town Square and maintain active accounts with Town Square for a specified period of time. To be eligible to earn a rebate under any such rebate program, Customer will have 60 days to complete a validation process in accordance with the instructions that will be provided to Customer. Customer will also have to be an active customer of Town Square, in good standing, at the time the rebate is to be issued in order to qualify for the rebate. Rebate amounts appearing in Town Square's advertising materials or presented orally to potential customers are merely examples of rebate amounts that customers might be eligible to receive. The actual amount of any rebate will be computed by reference to Customer's actual usage over the term of this Agreement, which may vary substantially from any estimate provided. Any rebate earned by Customer will be sent to Customer at the address provided by Customer during the validation process. Rebates can be issued in a variety of forms including, but not limited to, checks, stored-value cards, or electronic gift cards. Stored-value cards and electronic gift cards will be issued by an issuing bank, pursuant to a direct relationship between Customer and the issuing bank, and will be subject to the terms and conditions of a Cardholder Agreement. Stored-value cards and electronic gift cards will expire 6 months after issuance.

Renewable Energy Option: "Renewable" energy refers to energy that is generated from renewable resources, such as solar, wind, water or biomass. If you have chosen to participate in Town Square's Renewable Energy Option, Town Square will ensure that 100% of your electricity usage is matched with renewable energy certificates or renewable energy attributes. Town Square shall have up to 24 months from the end of each calendar year to address any deficiency in the renewable energy certificates purchased. If you wish to remove the Renewable Energy Option from your account, please contact Town Square Customer Service at 1.877.430.0093.

4. Late Payment and Early Termination Fees - All regular payments are to be made to your EDC. Any unpaid amounts may be subject to late payment charges in accordance with your EDC's tariff.

Fixed Rate Product: For the Fixed Rate product, if you terminate the Agreement prior to the end of the Initial Term, or Town Square terminates the Agreement prior to the end of the Initial Term due to your breach, you shall pay Town Square, in addition to any other applicable charges, the early termination fee, if any, set forth in your Contract Summary. The parties acknowledge and agree that the actual damages that Town Square will suffer as a result of Customer's early termination or breach are difficult to assess, the early termination fee described herein is a reasonable estimate of such damages, and such early termination fee constitutes liquidated damages rather than a penalty. (You will not have to pay an early termination fee if you terminate this Agreement after the issuance of the second of the two contract expiration notices described in the **Renewal Provisions/Agreement Expiration/Change in Terms** section below.)

5. Cancellation Provisions – Customer may terminate this Agreement by contacting Town Square or the EDC. However, see previous Section (4. Late Payment and Early Termination Fees) for details on if/when Customer will be subject an Early Termination Fee. If you fail to meet your obligations under this Agreement, or if there is a material adverse change in your business or financial condition (as determined by Town Square in its discretion), then, in addition to any other remedies that it may have, Town Square may terminate the Agreement. If Town Square terminates the Agreement for any reason other than for your non-payment, Town Square will follow applicable rules in providing notice to you. Non-Payment – If your electricity service is terminated by your EDC, then this Agreement will be cancelled on the date that your electricity service is terminated. You will owe us for amounts unpaid for our charges for electricity generation service up to the date of termination. Customer Move – If Customer moves from the address listed above, this Agreement is cancelled.

6. Renewal Provisions/Agreement Expiration/Change in Terms – If you have a fixed duration contract that will be ending, or whenever Town Square wants to change the contract, you will receive two separate notices before the contract ends or the changes

happen. You will receive the first notice 45-60 days before, and the second notice 30 days before the expiration date or the date the change becomes effective. These notices will explain your options. If you do not respond to the notices, your service with Town Square will continue and this Agreement may automatically rollover to another fixed term ("Renewal Term") or to month-to-month terms, as set forth in the notices.

7. Dispute Procedures - Contact Town Square with any questions concerning the terms of service at 1.877.430.0093. If you are not satisfied after discussing your terms of service with Town Square you may call or write to the **Public Utility Commission (PUC)**, **PO Box 3265, Harrisburg, PA 17105-3265, 1.800.692.7380.**

8. Mandatory Arbitration and Class Action Waiver - Any dispute, controversy or claim arising out of, or related to, Town Square's services under this Agreement that is not resolved directly between the parties or by the PUC (collectively, the "Claims"), shall be resolved by arbitration before the American Arbitration Association ("AAA") conducted under the AAA Commercial Rules and, if Customer is a residential customer, the Consumer-Related Disputes Supplementary Procedures.

BY ENTERING INTO THIS AGREEMENT, YOU ARE GIVING UP YOUR RIGHTS TO SEEK REMEDIES IN COURT, AND THE RIGHT TO A JURY TRIAL. THE ABILITY TO CONDUCT DISCOVERY IN ARBITRATION IS LIMITED AND THE ARBITRATOR'S DECISION IS SUBJECT TO VERY LIMITED REVIEW BY COURTS. ARBITRATORS CAN AWARD THE SAME DAMAGES AND RELIEF THAT A COURT CAN AWARD. THE AAA SHALL HAVE THE POWER TO RULE ON ANY CHALLENGE TO ITS OWN JURISDICTION OR TO THE VALIDITY OR ENFORCEABILITY OF ANY PORTION OF THIS ARBITRATION PROVISION.

THE PARTIES AGREE THAT ALL CLAIMS INCLUDING STATUTORY, STATE OR FEDERAL CLAIMS, MAY BE MADE SOLELY ON AN INDIVIDUAL BASIS, AND THAT THIS AGREEMENT DOES NOT PERMIT CLASS ACTIONS, EITHER IN ARBITRATION OR THROUGH AN ADMINISTRATIVE OR COURT PROCEEDING. FURTHER, CUSTOMER WILL NOT HAVE THE RIGHT TO PARTICIPATE IN A REPRESENTATIVE CAPACITY OR AS A MEMBER OF ANY CLASS OF CLAIMANTS PERTAINING TO ANY CLAIM SUBJECT TO ARBITRATION. AAA MAY NOT CONSOLIDATE MORE THAN ONE PERSON'S CLAIMS, AND MAY NOT OTHERWISE PRESIDE OVER ANY FORM OF A REPRESENTATIVE OR CLASS PROCEEDING. IN THE EVENT THE PROHIBITION ON CLASS ARBITRATION IS DEEMED INVALID OR UNENFORCEABLE, THEN THE REMAINING PORTIONS OF THIS ARBITRATION PROVISION WILL REMAIN IN FORCE. JUDGMENT ON THE ARBITRATOR'S AWARD CAN BE ENTERED IN ANY COURT HAVING JURISDICTION. THIS AGREEMENT EVIDENCES A TRANSACTION IN INTERSTATE COMMERCE, AND THUS THE FEDERAL ARBITRATION ACT GOVERNS THE INTERPRETATION AND ENFORCEMENT OF THIS PROVISION. THIS ARBITRATION PROVISION SHALL SURVIVE TERMINATION OF THIS AGREEMENT.

9. Entire Agreement. This Agreement, including the Contract Summary and any attached enrollment form, constitutes the entire agreement between you and Town Square. You acknowledge that you are not relying on any advice, statements, recommendations or representations of Town Square or its Sales personnel other than the written statements in this Agreement and that you have made your own decision to enter into this Agreement.

10. Assignment. Town Square may assign or transfer its rights or obligations under this Agreement after first informing you in writing of such transfer or assignment. You may not assign or transfer your rights or obligations under this Agreement.

11. Choice of Law. This Agreement shall be construed in accordance with and be governed by the laws of the Commonwealth of Pennsylvania without regard to the conflicts of law provisions thereof.

12. No Warranties. **Customer acknowledges and agrees that no warranty, duty or remedy, whether expressed, implied or statutory, is given or intended to arise out of this Agreement except as otherwise expressly stated herein, and Town Square specifically disclaims all other warranties, expressed or implied including any warranty of merchantability or fitness for a particular purpose or use.**

13. SEVERABILITY. Should any part of this Agreement be declared invalid for any reason, such decision shall not in any manner affect the validity of the remaining portions of this Agreement, which shall remain in full force and effect as if the part determined to be invalid had not been contained herein at the time of the execution of this Agreement.

14. FORCE MAJEURE. Town Square will make commercially reasonable efforts to provide electricity hereunder but does not guarantee a continuous supply of electricity to Customer. Certain causes and events out of the control of Town Square ("Force Majeure Events") may result in interruptions in service. Town Square will not be liable for any interruptions caused by a Force Majeure Event, and Town Square is not, and shall not be, liable for damages caused by Force Majeure Events. Force Majeure Events shall include fire, flood, storm, terrorism, war, civil disturbance, acts of any governmental authority, accidents, strikes, labor disputes or problems, required maintenance work, inability to access the local distribution utility system, non-performance by the EDC (including, but not limited to, a facility outage on its electric facilities), or any other cause beyond Town Square's control.

15. LIMITATION OF LIABILITY. In no event shall Town Square or Customer be liable to the other or to any third party for any indirect, incidental, consequential, punitive, reliance or special damages, including without limitation, damages for lost profits, advantage, savings or revenues of any kind or increased cost of operations, whether or not Town Square or Customer has been advised of the possibility of such damages. Town Square's liability and Customer's exclusive remedies against Town Square, for any damages caused by any service outage, defect or failure shall be the termination provisions set forth above in the Termination section above. Town Square's liability for other claims arising in connection with any service or this Agreement, if not otherwise limited by another provision of this Agreement, shall be limited to proven direct damages not to exceed per claim (or in the aggregate during any 12-month period), the total net payments made by Customer for the applicable service during the 12 month's preceding the month in which the damage occurred.

16. INDEMNIFICATION. Customer is responsible for, and will indemnify Town Square against, any and all liabilities resulting from Customer's failure to fully comply with this Agreement, and damage or injury caused by the electricity after its delivery to Customer's residence or place of business, as applicable.

17. CHANGE IN LAW. If at some future date there is a change in any law, rule, or regulation whereby Town Square is prevented, prohibited or frustrated from carrying out the terms of the Agreement, then, at the sole discretion of Town Square, this Agreement may be cancelled. If, at some future date, there is a change in a federal or state approved tariff affecting Town Square's costs to purchase electricity required to provide your service, then, at the sole discretion of Town Square, this Agreement may be modified to reflect those costs.

18. CONSENT FOR RELEASE OF INFORMATION. Town Square may obtain Customer's historic and current billing and usage information from the EDC, and this information may be used by Town Square to determine whether it will commence and/or continue to provide energy supply service to Customer. Customer hereby consents to the EDC's release of this information to Town Square. This consent will remain in effect for the duration of this Agreement, including the Initial Term and any Renewal Terms thereof. Town Square will maintain the confidentiality of Customer's personal information including Customer's name, address, telephone number, electric usage and historic payment information, as required by applicable Commission regulations and federal and State laws.

19. **NET METERING**. If Customer currently has installed or plans to install during the term of this Agreement, solar, wind, or other renewable electrical generating facilities to supply all or part of Customer's electricity usage, and such generating facility is, or will be, net-metered by the EDC, Customer must notify Town Square of same. Town Square will then determine whether Customer is eligible to enroll with Town Square and/or to continue to be served by Town Square. Town Square reserves the right to terminate this Agreement in its sole discretion if Customer installs generating facilities to supply all or part of Customer's electricity usage. If Town Square elects to serve a net-metered customer, Town Square will credit the customer up to the total amount of the electricity that customer receives from Town Square during an applicable period as required by applicable regulations, but will not compensate net-metering customers for any excess generation.

PA – TOWN SQUARE ENERGY – FIXED RATE ELECTRIC DISCLOSURE STATEMENT – v.02012026

This is an agreement ("Agreement") for electricity generation supply services, between Town Square Energy East, LLC ("Town Square") and %CUSTOMERNAME% ("Customer" or "you") %SERV_ADDRESS% %SERV_CITYSTZIP%

BACKGROUND

Town Square is licensed by the Pennsylvania Public Utility Commission (the "Commission") to offer and supply electric generation services in Pennsylvania. Town Square's PUC license number is A-2010-2199551.

Your generation prices and charges will be set by Town Square. The Public Utility Commission regulates distribution prices and services. The Federal Energy Regulatory Commission regulates transmission prices and services.

You will continue to receive your bill from your Electric Distribution Company (EDC). It will contain the EDC's charges and Town Square's charges. Your EDC will continue to provide all emergency repairs and services.

Right of Rescission - You may cancel this Agreement at any time before midnight of the third business day after receiving this Disclosure Statement. To do so, you may contact Town Square at 2200 E. Williams Field Rd., Suite 200, Gilbert, AZ, 85295, by phone at 1.877.430.0093, or by email at customercare@townsquareenergy.com.

DEFINITIONS

Generation Charge - Charge for production of electricity. Transmission Charge – The costs for transporting electricity from the generation source to your EDC.

TERMS OF SERVICE

1. Price. For each billing cycle, the price for the electricity supplied pursuant to this Agreement will be calculated by multiplying (i) the agreed-upon fixed rate for the electricity, by (ii) the amount of electricity consumed, as determined by the EDC's actual or estimated meter reads. The rate for electricity does not include the EDC's charges and fees.

Fixed Rate Product: If your Contract Summary indicates that you have chosen a Fixed Rate electric product, the rate(s) for the electricity supplied pursuant to this Agreement during the Initial Term (defined in your Contract Summary) will be the rate(s) set forth on the Contract Summary. Fixed rates include Transmission Charges and estimated total state taxes, including the Gross Receipts Tax, but exclude applicable state and local Sales Tax. This rate will be effective starting with your first date of service with Town Square and will remain fixed for the Initial Term.

2. Length of Agreement. *Fixed Rate Product*: For the Fixed Rate product, this Agreement shall commence as of the date Customer's enrollment with Town Square is deemed effective by the EDC, and it shall continue until the conclusion of the Initial Term (defined in your Contract Summary). The Agreement may renew at that juncture as described in the **Renewal Provisions/ Agreement Expiration/Change in Terms** section below.

3. Special Terms and Conditions. Rebate Programs: From time-to-time Town Square may offer a rebate program for new customers who enroll with Town Square and maintain active accounts with Town Square for a specified period of time. To be eligible to earn a rebate under any such rebate program, Customer will have 60 days to complete a validation process in accordance with the instructions that will be provided to Customer. Customer will also have to be an active customer of Town Square, in good standing, at the time the rebate is to be issued in order to qualify for the rebate. Rebate amounts appearing in Town Square's advertising materials or presented orally to potential customers are merely examples of rebate amounts that customers might be eligible to receive. The actual amount of any rebate will be computed by reference to Customer's actual usage over the term of this Agreement, which may vary substantially from any estimate provided. Any rebate earned by Customer will be sent to Customer at the address provided by Customer during the validation process. Rebates can be issued in a variety of forms including, but not limited to, checks, stored-value cards, or electronic gift cards. Stored-value cards and electronic gift cards will be issued by an issuing bank, pursuant to a direct relationship between Customer and the issuing bank, and will be subject to the terms and conditions of a Cardholder Agreement. Stored-value cards and electronic gift cards will expire 6 months after issuance.

Renewable Energy Option: "Renewable" energy refers to energy that is generated from renewable resources, such as solar, wind, water or biomass. If you have chosen to participate in Town Square's Renewable Energy Option, Town Square will ensure that 100% of your electricity usage is matched with renewable energy certificates or renewable energy attributes. Town Square shall have up to 24 months from the end of each calendar year to address any deficiency in the renewable energy certificates purchased. If you wish to remove the Renewable Energy Option from your account, please contact Town Square Customer Service at 1.877.430.0093.

4. Late Payment and Early Termination Fees - All regular payments are to be made to your EDC. Any unpaid amounts may be subject to late payment charges in accordance with your EDC's tariff.

Fixed Rate Product: For the Fixed Rate product, if you terminate the Agreement prior to the end of the Initial Term, or Town Square terminates the Agreement prior to the end of the Initial Term due to your breach, you shall pay Town Square, in addition to any other applicable charges, the early termination fee, if any, set forth in your Contract Summary. The parties acknowledge and agree that the actual damages that Town Square will suffer as a result of Customer's early termination or breach are difficult to assess, the early termination fee described herein is a reasonable estimate of such damages, and such early termination fee constitutes liquidated damages rather than a penalty. (You will not have to pay an early termination fee if you terminate this Agreement after the issuance of the second of the two contract expiration notices described in the **Renewal Provisions/Agreement Expiration/Change in Terms** section below.)

5. Cancellation Provisions – Customer may terminate this Agreement by contacting Town Square or the EDC. However, see previous Section (4. Late Payment and Early Termination Fees) for details on if/when Customer will be subject an Early Termination Fee. If you fail to meet your obligations under this Agreement, or if there is a material adverse change in your business or financial condition (as determined by Town Square in its discretion), then, in addition to any other remedies that it may have, Town Square may terminate the Agreement. If Town Square terminates the Agreement for any reason other than for your non-payment, Town Square will follow applicable rules in providing notice to you. Non-Payment – If your electricity service is terminated by your EDC, then this Agreement will be cancelled on the date that your electricity service is terminated. You will owe us for amounts unpaid for our charges for electricity generation service up to the date of termination. Customer Move – If Customer moves from the address listed above, this Agreement is cancelled.

6. Renewal Provisions/Agreement Expiration/Change in Terms – If you have a fixed duration contract that will be ending, or whenever Town Square wants to change the contract, you will receive two separate notices before the contract ends or the changes

happen. You will receive the first notice 45-60 days before, and the second notice 30 days before the expiration date or the date the change becomes effective. These notices will explain your options. If you do not respond to the notices, your service with Town Square will continue and this Agreement may automatically rollover to another fixed term ("Renewal Term") or to month-to-month terms, as set forth in the notices.

7. Dispute Procedures - Contact Town Square with any questions concerning the terms of service at 1.877.430.0093. If you are not satisfied after discussing your terms of service with Town Square you may call or write to the **Public Utility Commission (PUC)**, **PO Box 3265, Harrisburg, PA 17105-3265, 1.800.692.7380.**

8. Mandatory Arbitration and Class Action Waiver - Any dispute, controversy or claim arising out of, or related to, Town Square's services under this Agreement that is not resolved directly between the parties or by the PUC (collectively, the "Claims"), shall be resolved by arbitration before the American Arbitration Association ("AAA") conducted under the AAA Commercial Rules and, if Customer is a residential customer, the Consumer-Related Disputes Supplementary Procedures.

BY ENTERING INTO THIS AGREEMENT, YOU ARE GIVING UP YOUR RIGHTS TO SEEK REMEDIES IN COURT, AND THE RIGHT TO A JURY TRIAL. THE ABILITY TO CONDUCT DISCOVERY IN ARBITRATION IS LIMITED AND THE ARBITRATOR'S DECISION IS SUBJECT TO VERY LIMITED REVIEW BY COURTS. ARBITRATORS CAN AWARD THE SAME DAMAGES AND RELIEF THAT A COURT CAN AWARD. THE AAA SHALL HAVE THE POWER TO RULE ON ANY CHALLENGE TO ITS OWN JURISDICTION OR TO THE VALIDITY OR ENFORCEABILITY OF ANY PORTION OF THIS ARBITRATION PROVISION.

THE PARTIES AGREE THAT ALL CLAIMS INCLUDING STATUTORY, STATE OR FEDERAL CLAIMS, MAY BE MADE SOLELY ON AN INDIVIDUAL BASIS, AND THAT THIS AGREEMENT DOES NOT PERMIT CLASS ACTIONS, EITHER IN ARBITRATION OR THROUGH AN ADMINISTRATIVE OR COURT PROCEEDING. FURTHER, CUSTOMER WILL NOT HAVE THE RIGHT TO PARTICIPATE IN A REPRESENTATIVE CAPACITY OR AS A MEMBER OF ANY CLASS OF CLAIMANTS PERTAINING TO ANY CLAIM SUBJECT TO ARBITRATION. AAA MAY NOT CONSOLIDATE MORE THAN ONE PERSON'S CLAIMS, AND MAY NOT OTHERWISE PRESIDE OVER ANY FORM OF A REPRESENTATIVE OR CLASS PROCEEDING. IN THE EVENT THE PROHIBITION ON CLASS ARBITRATION IS DEEMED INVALID OR UNENFORCEABLE, THEN THE REMAINING PORTIONS OF THIS ARBITRATION PROVISION WILL REMAIN IN FORCE. JUDGMENT ON THE ARBITRATOR'S AWARD CAN BE ENTERED IN ANY COURT HAVING JURISDICTION. THIS AGREEMENT EVIDENCES A TRANSACTION IN INTERSTATE COMMERCE, AND THUS THE FEDERAL ARBITRATION ACT GOVERNS THE INTERPRETATION AND ENFORCEMENT OF THIS PROVISION. THIS ARBITRATION PROVISION SHALL SURVIVE TERMINATION OF THIS AGREEMENT.

9. Entire Agreement. This Agreement, including the Contract Summary and any attached enrollment form, constitutes the entire agreement between you and Town Square. You acknowledge that you are not relying on any advice, statements, recommendations or representations of Town Square or its Sales personnel other than the written statements in this Agreement and that you have made your own decision to enter into this Agreement.

10. Assignment. Town Square may assign or transfer its rights or obligations under this Agreement after first informing you in writing of such transfer or assignment. You may not assign or transfer your rights or obligations under this Agreement.

11. Choice of Law. This Agreement shall be construed in accordance with and be governed by the laws of the Commonwealth of Pennsylvania without regard to the conflicts of law provisions thereof.

12. No Warranties. **Customer acknowledges and agrees that no warranty, duty or remedy, whether expressed, implied or statutory, is given or intended to arise out of this Agreement except as otherwise expressly stated herein, and Town Square specifically disclaims all other warranties, expressed or implied including any warranty of merchantability or fitness for a particular purpose or use.**

13. SEVERABILITY. Should any part of this Agreement be declared invalid for any reason, such decision shall not in any manner affect the validity of the remaining portions of this Agreement, which shall remain in full force and effect as if the part determined to be invalid had not been contained herein at the time of the execution of this Agreement.

14. FORCE MAJEURE. Town Square will make commercially reasonable efforts to provide electricity hereunder but does not guarantee a continuous supply of electricity to Customer. Certain causes and events out of the control of Town Square ("Force Majeure Events") may result in interruptions in service. Town Square will not be liable for any interruptions caused by a Force Majeure Event, and Town Square is not, and shall not be, liable for damages caused by Force Majeure Events. Force Majeure Events shall include fire, flood, storm, terrorism, war, civil disturbance, acts of any governmental authority, accidents, strikes, labor disputes or problems, required maintenance work, inability to access the local distribution utility system, non-performance by the EDC (including, but not limited to, a facility outage on its electric facilities), or any other cause beyond Town Square's control.

15. LIMITATION OF LIABILITY. In no event shall Town Square or Customer be liable to the other or to any third party for any indirect, incidental, consequential, punitive, reliance or special damages, including without limitation, damages for lost profits, advantage, savings or revenues of any kind or increased cost of operations, whether or not Town Square or Customer has been advised of the possibility of such damages. Town Square's liability and Customer's exclusive remedies against Town Square, for any damages caused by any service outage, defect or failure shall be the termination provisions set forth above in the Termination section above. Town Square's liability for other claims arising in connection with any service or this Agreement, if not otherwise limited by another provision of this Agreement, shall be limited to proven direct damages not to exceed per claim (or in the aggregate during any 12-month period), the total net payments made by Customer for the applicable service during the 12 month's preceding the month in which the damage occurred.

16. INDEMNIFICATION. Customer is responsible for, and will indemnify Town Square against, any and all liabilities resulting from Customer's failure to fully comply with this Agreement, and damage or injury caused by the electricity after its delivery to Customer's residence or place of business, as applicable.

17. CHANGE IN LAW. If at some future date there is a change in any law, rule, or regulation whereby Town Square is prevented, prohibited or frustrated from carrying out the terms of the Agreement, then, at the sole discretion of Town Square, this Agreement may be cancelled. If, at some future date, there is a change in a federal or state approved tariff affecting Town Square's costs to purchase electricity required to provide your service, then, at the sole discretion of Town Square, this Agreement may be modified to reflect those costs.

18. CONSENT FOR RELEASE OF INFORMATION. Town Square may obtain Customer's historic and current billing and usage information from the EDC, and this information may be used by Town Square to determine whether it will commence and/or continue to provide energy supply service to Customer. Customer hereby consents to the EDC's release of this information to Town Square. This consent will remain in effect for the duration of this Agreement, including the Initial Term and any Renewal Terms thereof. Town Square will maintain the confidentiality of Customer's personal information including Customer's name, address, telephone number, electric usage and historic payment information, as required by applicable Commission regulations and federal and State laws.

19. **NET METERING**. If Customer currently has installed or plans to install during the term of this Agreement, solar, wind, or other renewable electrical generating facilities to supply all or part of Customer's electricity usage, and such generating facility is, or will be, net-metered by the EDC, Customer must notify Town Square of same. Town Square will then determine whether Customer is eligible to enroll with Town Square and/or to continue to be served by Town Square. Town Square reserves the right to terminate this Agreement in its sole discretion if Customer installs generating facilities to supply all or part of Customer's electricity usage. If Town Square elects to serve a net-metered customer, Town Square will credit the customer up to the total amount of the electricity that customer receives from Town Square during an applicable period as required by applicable regulations, but will not compensate net-metering customers for any excess generation.

VERIFICATION

I, Barbara R. Alexander, hereby state that the facts above set forth in my Rebuttal Testimony, OCA Statement No. 2R, are true and correct to the best of my knowledge, information, and belief and that I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa.C.S. Section 4904 (relating to unsworn falsification to authorities).

For Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031

Docket No. P-2026-3060298

SURREBUTTAL TESTIMONY OF

Barbara R. Alexander

Barbara Alexander Consulting LLC

ON BEHALF OF THE

OFFICE OF CONSUMER ADVOCATE

June 11, 2026

Q. PLEASE STATE YOUR NAME, ADDRESS AND OCCUPATION.

A. My name is Barbara R. Alexander. I am the sole member manager of Barbara Alexander Consulting LLC. My office is located at 44 Beech St., Hallowell, ME 04347.

Q. FOR WHOM ARE YOU PROVIDING TESTIMONY IN THIS PROCEEDING?

A. I am testifying on behalf of the Pennsylvania Office of Consumer Advocate (OCA).

Q. HAVE YOU PREVIOUSLY FILED TESTIMONY IN THIS PROCEEDING?

A. Yes. I filed Direct Testimony on behalf of the OCA on April 29, 2026 (with a corrected version filed on June 1, 2026) and Public and Highly Confidential Rebuttal Testimony on behalf of the OCA on May 28, 2026 (with corrected versions filed on June 1, 2026).

Q. WHAT IS THE PURPOSE OF THIS TESTIMONY?

A. I am filing surrebuttal testimony in response to the rebuttal testimony filed by Mr. Frank Lacey on behalf of Retail Energy Suppliers Association (RESA) (RESA Statement No. 1-R) and rebuttal testimony filed by David Young on behalf of FirstEnergy Pennsylvania Electric Co. (FirstEnergy or the Company) (FE Statement No. 1-R).

Q. BASED ON YOUR EVALUATION OF THE TESTIMONY AND ASSOCIATED DISCOVERY DIRECTED TO RESA AND FIRSTENERGY, DO YOU HAVE ANY CHANGES TO YOUR ORIGINAL RECOMMENDATIONS?

A. No. Based on my analysis and findings discussed in detail in this testimony, I continue to recommend the following:

- FirstEnergy's proposal to not renew the Customer Referral Program should be adopted.
- FirstEnergy's request for a waiver of 52 Pa. Code Section 54.10(3) to implement its proposal, that Electric Generation Suppliers (EGSs) entering into contracts with residential customers after June 1, 2027 return customers to default service at the end

of their fixed duration contract absent an affirmative consent by the customer to elect to remain with the EGS or switch to a new supplier, should be granted.

- FirstEnergy's proposal that for contracts entered after June 1, 2027, EGSs be required to provide an attestation of affirmative customer consent on a quarterly basis for all residential customers on variable-priced month-to-month products can be implemented as proposed or with alternatives that are likely to reduce administrative costs. Either FirstEnergy could prohibit the use of month-to-month variable rate contracts for residential customers, or the Company could require only fixed rate contracts for residential customers as a condition of an EGS's use of the Purchase of Receivables (POR) to collect their prices.
- FirstEnergy's proposal to reform its POR program, including its proposal to limit eligibility for its POR as of June 1, 2027 to those EGSs on utility consolidated billing who use "rate ready" billing and charge a rate that is at or below the Price to Compare (PTC) at the time of the customer enrollment or rate change transaction, should be adopted.
- FirstEnergy's proposed changes to its current Time of Use (TOU) rate for residential customers should not be adopted due to the lack of justification or proper consumer protection features.

Q. PLEASE LIST THE EXHIBITS ATTACHED TO YOUR TESTIMONY.

A. I include the following Exhibits:

- Exhibit BA-16: RESA Response to OCA-13-8.
- Exhibit BA-17: RESA Response to OCA-13-10.
- Exhibit BA-18: RESA Response to OCA-13-12.

- Exhibit BA-19: Constellation Energy Renewable Energy Contract Template

I. RESA'S REBUTTAL TESTIMONY CONTINUES TO LACK SUFFICIENT EVIDENCE TO JUSTIFY MR. LACEY'S OPPOSITION TO MY RECOMMENDATIONS

Q. DID MR. LACEY PROVIDE ANY EVIDENCE TO SUPPORT THE BASIS FOR HIS OPPOSITION TO FIRSTENERGY'S PROPOSALS AND YOUR SUPPORT FOR THOSE PROPOSALS COMPARED TO HIS DIRECT TESTIMONY?

A. No. Mr. Lacey's 33-page rebuttal testimony does not include any evidence of actual EGS offers to FirstEnergy's residential customers, the prices charged by those EGSs, or their terms of service. The only evidence of actual EGS offers, prices, and terms of service submitted to date in this proceeding is my analysis of EGS offers to FirstEnergy's Met-Ed residential customers derived from the Commission's PaPowerSwitch shopping web portal as set forth in my rebuttal testimony. The most relevant evidence in this proceeding has been the information provided by or cited by CAUSE-PA and me that compares the actual prices charged by EGSs to FirstEnergy's residential customers with the applicable PTC. Mr. Lacey's attempt to argue that this evidence is not conclusive or determinative to the impact of EGS prices on the residential electric service bills that must be paid to avoid adverse collection actions and termination of service should be rejected.

Q. PLEASE EXPLAIN WHY MR. LACEY'S LACK OF ANY ACTUAL EGS OFFERS, PRICES, OR TERMS OF SERVICE IS CRITICAL TO ANY EVALUATION OF HIS TESTIMONY TO DATE.

A. Mr. Lacey purports to identify EGS offers and products that he claims will not be offered to FirstEnergy's residential customers if FirstEnergy's proposals are adopted. He expounds

at length on identifying what he claims are "competitive" offers that cannot be billed through FirstEnergy's POR Program if that billing and collection vehicle requires prices that are equal or lower than the PTC for default service or whether a contract cannot be renewed and billed on FirstEnergy's bills without an affirmative customer consent to the new terms. However, he has yet to provide any evidence that the products and services he claims cannot be offered and billed through FirstEnergy's POR program are actually offered to residential customers in FirstEnergy's service territory or how those prices differ from or provide value compared to the PTC.[1] Mr. Lacey's entire argument is theoretical in nature. His allegations of harm and claims of lost benefits to customers that will result if FirstEnergy's reforms are adopted should be rejected as unsupported. Rather, his testimony supports the obvious conclusion that he opposes FirstEnergy's reforms because they will result in lost profits to EGSs.

Q. CAN YOU PROVIDE EXAMPLES OF STATEMENTS BY MR. LACEY THAT ARE NOT DOCUMENTED WITH EVIDENCE OR FACTUAL INFORMATION?

A. Yes. Mr. Lacey opines the following and cannot document the basis for any of these opinions:

- Mr. Lacey states in his Rebuttal, "Discovery responses confirmed that neither Ms. Alexander nor Mr. Cicero adjusted their analyses to account for differences among fixed-price products, variable-price products, renewable-energy products, rewards programs, bundled products, contract length, cancellation terms, hedging value, or other non-price product attributes."[2] When asked to identify which of these products

[1] *See* RESA Response to OCA-13-2 ("Mr. Lacey did not review any specific EGS offers other than through the PaPowerSwitch Portal."); OCA Ex. BA-8 (listing all EGS offers to Met-Ed's residential customers in zip code 17401); **HIGHLY CONFIDENTIAL** Town Square Response to OCA-10-1 and 2.
[2] RESA St. 1R at 8, lines 7-11.

are billed to FirstEnergy's customers through the POR, he cannot do so, stating, "Mr. Lacey has not reviewed the hundreds of thousands of contracts that are currently active in the FE service territories. However, it seems reasonable that fixed price products, variable priced products, renewable energy products, long-term contracts, and hedged contracts are all being billed through the POR agreement."[3] Mr. Lacey's response does not address many of the listed options he claimed are being made to Pennsylvania customers.

- Again Mr. Lacey was asked to provide any evidence that the product variations he identifies in his Rebuttal are billed through FirstEnergy's POR. His response is another evasion: "All electricity products that are billed through FE's POR program result in a cents per kWh charge on the customer's bill, with the exception that FE also offers a budget billing option, which appears, based on FE's tariff language, to come across as a fixed dollar amount on the bill."[4] I attach the request to support my conclusion that Mr. Lacey has not provided any evidence about the many options he claims should be distinguished from FirstEnergy's default service as Exhibit BA-16.
- While Mr. Lacey criticizes the evidence I have submitted to date on the grounds that the data does not compare "product equivalency, hedging value, risk allocation, or whether default service rates themselves would have differed absent customer migration to competitive supply service," he has not done such an analysis himself and acknowledges the time consuming process and that access to privately held data would be needed to do such an analysis.[5] I attach Mr. Lacey's response to OCA-13-10 as

[3] RESA Response to OCA-13-7.
[4] RESA Response to OCA-13-8.
[5] RESA St. 1R at 8, lines 18-20; RESA Response to OCA-13-10.

Exhibit BA-17. I do not agree that such an analysis is necessary to support reasonable consumer protections to prevent high EGS prices from threatening the affordability of essential electric service. No such studies have ever been required to adopt reasonable consumer protection requirements in Pennsylvania or elsewhere. On the contrary, FirstEnergy witness Young documented the adverse impacts on residential customers associated with paying higher collection costs incurred with the EGS charges allowed under the current POR program.[6] Mr. Lacey not only fails to acknowledge this documented harm but fails to provide any evidence that higher EGS charges provide any benefits to their customers or residential customers generally.

- When asked if Mr. Lacey assumes that EGSs will not market or bill customers outside of the POR option if the FirstEnergy reforms are adopted, he claims that suppliers have not invested in their own billing systems due to their reliance on POR. I attach Mr. Lacey's response to OCA-13-12 as Exhibit BA-18. Mr. Lacey's response confirms that suppliers have relied upon the subsidy provided by the POR programs in Pennsylvania, a subsidy that has resulted in high EGS charges. I note that suppliers who serve customers in the Texas market have in fact invested in their own billing systems and do not rely on the local distribution utility to bill their products and services,[7] which allows those suppliers to link basic generation supply service with many of the options that Mr. Lacey claims are in fact not comparable to default service, such as efficiency, demand response, and alternative rate designs including demand charges, time of use

[6] FE St. 1-R at 9.

[7] See e.g., Oncor's (a regulated distribution utility) explanation about the Oncor portion of the bill issued by the electricity provider: *Understanding the Oncor Part of Your Electric Bill*, Oncur (Jan. 19, 2024), https://www.oncor.com/content/oncorwww/wire/en/home/powering-texas/understanding-the-oncor-part-of-your-electric-bill.html.

rates, fixed charges, and prepaid electricity, none of which are typically offered to Pennsylvania customers through the POR billing option. I note that Mr. Lacey's reference to the supplier proposals for Supplier Consolidated Billing in this data response was thoroughly evaluated by the Commission and not pursued for a host of reasons, including due to potential costs to ratepayers and complicated consumer protection implications.[8]

- Mr. Lacey claims that FirstEnergy's reforms will reduce the level of customer migration to suppliers and that this will cause an increase in default service prices. When asked for the basis for this assertion, Mr. Lacey states that obtaining default service for the larger load (due to his assumption that the POR reforms will result in a lack of customers served by an EGS) will inevitably lead to higher default service prices.[9] In short, Mr. Lacey has not quantified migration risk, but claims such a risk is inevitable and will result in high default service prices if customers are protected from high EGS prices. Mr. Lacey's provides no calculations or analysis to support this claim. Mr. Lacey's assumption will be addressed by OCA witness Ogur in his Surrebuttal Testimony.
- Mr. Lacey has not reviewed any actual EGS contract language to support his claims of what suppliers offer but has merely made assumptions about those contract terms based on his knowledge of the Commission's regulations.[10]
- Finally, Mr. Lacey complains about relying on the data in FirstEnergy witness Young's Table 6 because the data does not reflect the "PTC values shared by FE on its website

[8] *See Re: En Banc Hearing on Implementation of Supplier Consolidated Billing*, Docket No. M-2018-2645254, Secretarial Letter (June 21, 2021).
[9] RESA Response to OCA-13-14.
[10] RESA Response to OCA-13-19.

or in discovery and the comparisons fail to account for fundamental differences between default service products and competitive supply products."[11] Yet, when asked to provide a version of this table that corrects these errors, his response encapsulates the defects in all his criticisms:

> Mr. Lacey does not have access to all EGS pricing data, nor access to FE's default service customer data, which would be required to calculate a weighted average FE default service rate. Even with the data, Mr. Lacey would not prepare such a table because it would be analytically misleading and would provide the viewers of the table with information that could lead to bad policy decisions.[12]

Q. DOES MR. LACEY ON BEHALF OF RESA EXPLAIN WHY HIS MEMBERS OR ANY EGS CANNOT BILL THEIR OWN PRODUCTS AND SERVICES TO FIRSTENERGY'S RESIDENTIAL CUSTOMERS?

A. No. He appears to assume that if an EGS cannot bill and collect their charges through FirstEnergy's POR program that no such offers can be made. Without any evidence to the contrary, I can only conclude that the EGSs he represents cannot make a profit by marketing and enrolling customers in these programs without the subsidy provided by the POR.

Q. IS IT FAIR OR REASONABLE FOR FIRSTENERGY'S RESIDENTIAL CUSTOMERS TO SUBSIDIZE SUPPLIER OFFERS THAT EXCEED THE PTC WHEN THERE IS NO EVIDENCE THAT SUCH OFFERS PROVIDE DOCUMENTED BENEFITS?

Q. No. The purpose of the POR is to bill a supplier's generation supply service. It is not intended to be a vehicle for suppliers to market products and services that harm consumers with high prices, volatile month to month or variable prices, or renewable energy that does

[11] RESA St. 1R at 15, lines 13-15.
[12] RESA Response to OCA-13-18.

not even provide any impact on the electricity consumed by the customer, all of which I documented as typical of supplier offers to FirstEnergy's residential customers in my rebuttal testimony and exhibits.

Q. HOW DO YOU RESPOND TO MR. LACEY'S ARGUMENT THAT CUSTOMERS SHOULD HAVE ACCESS TO A FIXED PRICE SUPPLY SERVICE THAT COMPETES WITH THE CURRENT OR FUTURE PTC BECAUSE IT SHIFTS RISK FROM THE CUSTOMER TO THE EGS?

A. First, Mr. Lacey does not provide any actual contractual offers, prices, or terms of service that documents that any EGS offer to any FirstEnergy residential customer assumes a risk that is reflected in the EGS offer compared to the current and future PTC and what the actual value of that offer is. He offers no comparison of how any specific fixed price offer compares to the PTC during the term of the fixed price offer. Second, there is no doubt that an EGS has more information about current and future PTC prices derived from the wholesale market compared to any reasonable residential customer. Therefore, any offer made by an EGS is done with careful consideration of the risk to the EGS. As I identified in my Exhibit BA-8 attached to my rebuttal testimony, for offerings on the PaPowerSwitch website, the longer the fixed price term, the higher the price, which allows EGSs to benefit from higher prices unless the PTC exceeds that fixed price at some point during that term, a factor the EGS has more capacity than the residential customer to evaluate. Third, every fixed price contract I reviewed for my rebuttal testimony contains a provision that allows the EGS to set renewal terms that include (at the EGS's discretion) month to month or variable prices at the end of the fixed term with a negative option renewal notice. As a result, the customer bears the risk of future higher and more volatile prices embedded in

the terms of these fixed price contracts. None of the contract terms I reviewed promised the customer that the fixed rate contract would continue to reflect a price lower than the PTC. Therefore, these contractual terms operate as a "bait and switch" scheme. While Mr. Lacey's preferred marketing and contractual approach is not currently illegal under the Commission's rules, that does not mean that Mr. Lacey should escape the obligation to document his allegation that the scheme provides benefits to residential customers.

Q. DOES MR. LACEY PROVIDE ANY EVIDENCE TO REBUT THE FINDINGS OF FIRSTENERGY AND CAUSE-PA THAT CUSTOMERS WITH HIGHER EGS CHARGES EXPERIENCE MORE ADVERSE COLLECTION ACTIONS COMPARED TO CUSTOMERS ON DEFAULT SERVICE?

A. No. He does not have any evidence to rebut the evidence of CAUSE-PA witness Cicero in his direct testimony at Table 7 that shows that residential EGS customers are 10 times more likely to have their electric service terminated compared to default service customers. Furthermore, FirstEnergy witness Young's rebuttal testimony Exhibit DMY-11 documents the significantly higher collection costs for customers that are billed higher EGS charges compared to default service pursuant to the POR program. These are costs included in FirstEnergy rates that will be avoided by preventing high EGS charges.

Q. HOW DO YOU RESPOND TO MR. LACEY'S CLAIM THAT YOUR TESTIMONY SHOULD BE REJECTED BECAUSE YOU HAVE NOT PROVIDED EVIDENCE OF "CUSTOMER PREFERENCES AND NON-PRICE PRODUCT ATTRIBUTES?"[13]

A. Mr. Lacey alleges that the EGS contract prices and any comparison to the PTC is "based on the incorrect assumption that competitive supply products and default service are

[13] RESA St. 1R at 4, lines 16-22.

directly comparable products."[14] He then opines that this comparison fails to account for "differences in product structure, hedging obligations, regulatory obligations, customer mobility risk and other supplier costs."[15] It is correct that I did no such analysis because the information that would allow such an analysis is within the control of the EGSs. Mr. Lacey offers no such analysis himself. Furthermore, Mr. Lacey's argument eviscerates the years of customer education required by the Commission to ask customers to compare their PTC to EGS offers and is the basis for the price comparisons and categories of EGS offers on the Commission's PaPowerSwitch web portal. If there is evidence that the offers made by EGSs provide value to the customer's generation supply service that is different from that same service provided by default service, Mr. Lacey fails to provide it.

Q. DOES MR. LACEY RESPOND TO YOUR EVIDENCE SHOWING THAT THE RENEWABLE ENERGY OFFERS BY EGSs DO NOT IN FACT PROMISE ANY RENEWABLE ENERGY WILL BE DELIVERED TO FIRSTENERGY OR PENNSYLVANIA CUSTOMERS?

A. No. As I documented in my Rebuttal, the terms of service for the EGSs contracts I reviewed in my Rebuttal (Exhibit BA-8) contain a provision that the EGS will purchase Renewable Energy Certificates (REC) for a renewable energy project located within the United States. I have recently reviewed the publicly available terms of service for Constellation Energy offered to FirstEnergy customers that promises 100% renewable energy.[16] However, the disclosure statement issued to Pennsylvania residential electricity customers is similar to others I have reviewed and only states that the renewable energy includes solar or wind

[14] *Id.* at lines 16-18.
[15] *Id.* at lines 20-21.
[16] Constellation Energy Response to OCA-VI-3 (Revised), Attachment A.

resources "within the United States" with a further statement that I consider misleading: "The renewable energy is provided to you for your residential use only, and will not make you eligible for any tax credits or other third party subsidies." In fact, these terms do not promise that any renewable energy will actually be delivered to the customers in Pennsylvania. I attach this document as Exhibit BA-19.

Q. HOW DO YOU RESPOND TO MR. LACEY'S CLAIM THAT YOU HAVE NOT DONE AN ANALYSIS OF "HISTORIC DEFAULT SERVICE PRICING AND FORWARD LOOKING EGS CONTRACT EQUIVALENCY?"[17]

A. Once again, Mr. Lacey's confirmation that I did no such analysis is correct. However, that analysis is within the ability of Mr. Lacey to present on behalf of his EGS clients, but he does not do so. I am not aware of any public data that provides "forward looking EGS contract equivalency" and it is Mr. Lacey's obligation to provide such data if he feels that it would contribute to the decisions in this proceeding.

Q. WHY DOES MR. LACEY CONTINUE TO ARGUE THAT MY TESTIMONY DOES NOT REFLECT THE IMPACTS OF OTHER STATE REFORM INITIATIVES?

A. Mr. Lacey appears to think that it is my responsibility to evaluate or consider the impact of reforms undertaken in other states[18] in my analysis of FirstEnergy's proposals in this proceeding. I do not agree. This proceeding reflects evidence and data about the impact of EGS prices on FirstEnergy's residential customers in the form of higher bills, higher collection costs, and higher rates of termination. The reforms proposed by FirstEnergy that I have evaluated and discussed in my direct and rebuttal testimony do not require an analysis of reforms in other jurisdictions. Where applicable, I identified that other

[17] RESA St. 1-R at 7, RESA Ex. FL-13.
[18] *Id.* at 14, RESA Ex. FL-18.

jurisdictions have adopted similar reforms to document the precedent and reasonableness of FirstEnergy's proposals. However, it is not my responsibility to predict the impact of FirstEnergy's proposals on the profitability of unregulated entities whose prices are not transparent or regulated by the Commission.

Q. OVERALL, DOES MR LACEY'S TESTIMONY ON BEHALF OF RESA OFFER ANY EVIDENCE TO SUPPORT HIS REASONS FOR REJECTING FIRSTENERGY'S PROPOSED REFORMS THAT YOU HAVE ENDORSED?

A. No. His surrebuttal testimony is basically a rehash and repeat of his rebuttal testimony and suffers from the same defects that I identified in my rebuttal testimony and again here in this surrebuttal testimony.

II. FIRSTENERGY WITNESS YOUNG DOES NOT OFFER ANY CREDIBLE RESPONSE TO MY RECOMMENDATION TO REJECT THE COMPANY'S PROPOSED CHANGE IN THE TIME OF USE RATE STRUCTURE

Q. PLEASE SUMMARIZE WHY MR. YOUNG REJECTS YOUR OPPOSITION TO THE PROPOSED CHANGE IN THE RESIDENTIAL TOU RATE STRUCTURE.

A. Mr. Young argues that the proposed change in the TOU rate structure "encourages higher adoption of energy-shifting behaviors, like delaying running appliances or charging electric vehicles."[19]

Q. HAS MR. YOUNG PROVIDED ANY EVIDENCE THAT CURRENT OR FUTURE TOU CUSTOMERS WILL IN FACT MAKE THESE CHANGES IN USAGE BEHAVIOR?

[19] FE St. 1-R at 4, lines 9-10.

A. No. Mr. Young provides no analysis, data, or evidence that this rate change will in fact result in shifting of customer usage or behavior changes in the use of appliances. As I confirmed in my direct testimony, the Company has not evaluated the impact of this rate change on its current TOU customers or conducted any pilot or cited to any pilot or other relevant experience to justify this assumption. The Company has made its assumption based on economic theory alone.

Q. HOW DOES MR. YOUNG EXCUSE THE REVENUE LOSS FROM ITS CURRENT OR FUTURE TOU RATE DESIGN?

A. Mr. Young admits that "the amount of revenue received from customers participating in the Company's TOU default service rates is likely to be lower than the amount that would be collected under its otherwise applicable standard non-time varying generation rates."[20] He then excuses this result on the grounds that enrollment in the current TOU rate is so low that the revenue shortfall "will not materially impact other default service customers."[21] In other words, he supports a change in the current TOU rate structure on the assumption that even more load shifting will occur due to the change in the on-peak period and rates, which will increase the revenue shortfall. We, however, should ignore this impact on the grounds that the program is too small to have any significant impact. Mr. Young's reasoning does not provide a positive basis for making any change in the current TOU rate design. There is no cost-benefit analysis that would support this rate change at this time.

Q. MR. YOUNG CONTINUES TO PROPOSE THAT THE CURRENT TOU

[20] *Id.* at 5, lines 14-16.
[21] *Id.* at 5, lines 18-19.

CUSTOMERS WILL BE DEFAULTED INTO THE NEW TOU RATE DESIGN.[22] DO YOU AGREE?

A. No. The Company has proposed a change in the rate design that is likely to impact the current TOU customer bills without any analysis of the impact of the new TOU rate on existing customers. Nor has the Company proposed any additional marketing or customer specific communications. These policies are simply not reasonable. Mr. Young relies entirely on the customer's ability to leave the TOU rate without penalty, a form of negative option renewal that should not be approved. I could support Mr. Young's approach only if the customer was notified of the new rate structure with a bill impact analysis based on the customer's recent usage profile in sufficient time prior to the new rate design's implementation date to ensure the customer is making a knowledgeable decision to remain with the new rate.

Q. IS YOUR POSITION INTENDED TO OPPOSE ANY REFORMS TO FIRSTENERGY'S TOU RATE?

A. No. My position is that changes in rate design generally, and TOU rates in particular, should be accompanied by a reasonable analysis of the impact of the rate change on current customers, as well as evidence based projections on whether the rate change will increase enrollment, tracking of the revenue loss, and tracking of any peak load reductions and their valuation or impact on default service prices. FirstEnergy's proposal does not meet these criteria.

Q. DOES THIS CONCLUDE YOUR TESTIMONY AT THIS TIME?

A. Yes.

[22] *Id.* at 6, lines 1-8.

Exhibit BA-16

RESA Response to OCA-13-8

Petition of FirstEnergy Pennsylvania Electric Company for Approval of Its Default Service Program for the Period June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298
Interrogatories of the Office of Consumer Advocate
Set XIII to RESA

8. Identify which of the following EGS products and services with one or more of the attributes that Mr. Lacey identifies on page 8, lines 8-11 result in a cents per kWh charge on the customer's bill issued by and subject to collection by FirstEnergy:
    a. Fixed price products;
    b. Variable price products;
    c. Renewable energy products
    d. Rewards programs;
    e. Bundled products
    f. Customer length;
    g. Cancellation terms;
    h. Hedging value;
    i. Non-price pricing attributes

Response to OCA-XIII-8: All electricity products that are billed through FE's POR program result in a cents per kWh charge on the customer's bill, with the exception that FE also offers a budget billing option, which appears, based on FE's tariff language, to come across as a fixed dollar amount on the bill.

Response provided by: Frank Lacey, Consultant for Retail Energy Supply Association

Exhibit BA-17

RESA Response to OCA-13-10

Petition of FirstEnergy Pennsylvania Electric Company for Approval of Its Default Service Program for the Period June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298
Interrogatories of the Office of Consumer Advocate
Set XIII to RESA

10. Mr. Lacy states that Ms. Alexander did not analyze "product equivalency, hedging value, risk allocation, or whether default service rates themselves would have differed absent customer migration to competitive supply service." (Page 8, lines 18-20). Please identify all facts, data, assumptions, methodologies, and evidence that Mr. Lacey believes would be necessary to perform such an analysis.

Response to OCA-XIII-10: A proper analysis would be very time-consuming and quite difficult to perform because of the data intensity of the analysis. However, it is required to justify the proposed changes that today are being supported by an inadequate and simplistic "A – B" calculation. For product equivalency, Ms. Alexander would need to analyze each of the EGS products that were under contract during the timeframe of the analysis and determine what product attributes were included in the products under contract. Then Ms. Alexander would need to prepare a summary, by month of the analysis, of differences in product attributes compared to the product attributes of the then current default service product. Ms. Alexander would then need to calculate, based on some reliable metric, the value of the product differences for each general product, for each month of the analysis. For hedging value, Ms. Alexander would need to conduct a similar analysis. For example, she would need to estimate a cost difference between a six month or shorter hedge versus a six month or longer hedge. She would need to do that calculation for every contract that was a fixed price product for every month of the analysis and adjust those values every month to adjust for the decreasing value of the default service fixed price hedge. For risk allocation, Ms. Alexander would need to determine the value of each component of risk passed along to consumers. It is FE's contention that eliminating NITS will lower prices to consumers because of the hedge risk moving from wholesale suppliers to consumers. At a minimum, her analysis would need to be adjusted to accommodate the value of that risk transfer, which is not allowed for EGS fixed price contracts. This analysis would need to be performed for every element that is passed through default service customers if those elements are hedged in an EGS contract. For migration risk, Ms. Alexander would need to calculate whether or not FE's proposals will result in a change in migration risk to wholesale suppliers. Most certainly, they would, as many of the proposals presented by FE will have customers being slammed back to the utility for practices that FE deems unsatisfactory, like failing to respond to communication from the EGS. Ms. Alexander would need to ascertain from the wholesale market, either through empirical data from other markets or from direct conversations with wholesale suppliers about how these proposals would affect their bidding strategies. She would need to incorporate those values into her analysis. Ms. Alexander would also need to adjust the default service rate to account for the subsidies embedded in distribution rates that support the default service business. The purpose of identifying these analytical requirements was not to suggest that such a study is necessary in every proceeding. Rather, it was to demonstrate that OCA's conclusions are being used to justify significant market restrictions even though OCA did not perform the analyses necessary to support those conclusions.

Petition of FirstEnergy Pennsylvania Electric Company for Approval of Its Default Service Program for the Period June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298
Interrogatories of the Office of Consumer Advocate
Set XIII to RESA

Response provided by: Frank Lacey, Consultant for Retail Energy Supply Association
Dated: June 5, 2026

Exhibit BA-18

RESA Response to OCA-13-12

Petition of FirstEnergy Pennsylvania Electric Company for Approval of Its Default Service Program for the Period June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298
Interrogatories of the Office of Consumer Advocate
Set XIII to RESA

12. Does Mr. Lacey assume that, if certain charges or product attributes cannot be billed through the POR program, EGSs will not offer those products or attributes directly to customers and bill customers outside the POR program? Please explain the basis for his answer.

Response to OCA-XIII-12: Historically, RESA and many in the EGS community were asking the Commission to implement supplier-consolidated billing ("SCB"). SCB is very similar to POR, but it works in reverse. The suppliers would issue a customer bill and it would include the utility's distribution charges on it. Under such a program, the rights and obligations associated with utility billing today would transfer to the EGSs. The Commission declined to implement SCB several years ago. When that order was issued, the Commission justified not moving to a SCB environment because POR was in place. They thought that EGSs might not want to forego the ease and convenience of utility billing with POR. Based on this edict from the Commission, Mr. Lacey assumes that few, if any, EGSs have built out sufficient billing systems to accommodate residential customers.

Exhibit BA-19

Constellation Energy Renewable Energy Contract Template

Contract and Disclosure Statement Summary
Pennsylvania Residential Contract

Electric Generation Supplier Information:	Constellation NewEnergy, Inc. is your electric generation supplier. You can call us at our toll-free number 1-855-465-1244 between 8:00 AM and 8:00 PM eastern prevailing time (not including weekends or holidays) or email us at home@constellation.com. We are responsible for costs associated with the generation and transmission of your electricity supply.
Price Structure:	Your contract price is fixed for the initial duration of the plan. Your contract price includes gross receipt taxes.
Generation/Supply Price:	$## for the ## month Plan.
Statement Regarding Savings:	During the duration of your contract, the price may be higher or lower than the EDC's price-to-compare, which changes over time based upon your EDC's procurement structure. Therefore savings are not guaranteed.
Deposit Requirement	None
Incentives:	There are no offers currently available.
Contract Start Date:	We will begin supplying electricity to your account as soon as the EDC processes your enrollment for the duration stated below. This may take up to two billing cycles.
Contract Duration/Length:	## month(s)
Cancellation/Early Termination Fees:	As further described below, state law provides you with a 3-day rescission right from receipt of your written disclosure statement. In addition, we provide a 90-day Satisfaction Guarantee period to terminate this contract without an early termination fee, though you will be responsible for any charges associated with the electricity you use. If you terminate this contract outside of both of these time periods you will be charged an early termination fee of $##. If we terminate this contract because: you provide inaccurate or misleading information, you do not pay your invoices, or you otherwise breach your obligations as stated under the Termination and Termination Fees section of the contract, then you will be charged a termination fee of $##.
Constellation Renewable Product:	For the Initial Term of this Agreement, the electricity supply service includes renewable energy certificates sourced from wind and/or solar power generators within the United States in an amount equal to 100% of the Accounts' usage, over and above any mandatory renewable portfolio or clean energy standard requirements in the state in which the Accounts are located, during the duration of this Agreement. The renewable energy is provided to you for your residential use only, and will not make you eligible for any tax credits or other third party subsidies.
End of Contract:	You will receive two separate written notifications in advance of the expiration date of your contract. You will receive the first notice 60-45 days in advance of the expiration date, and you will receive the second at least 30 days in advance. These notifications will explain your options going forward. If you terminate your agreement after you receive the second notice and before the expiration of your contract you will not be required to pay an early termination fee. If you fail to respond to these notices, we may extend your contract for ## Months at the price in your renewal notices however you may terminate the renewal term at any time effective as of the next applicable EDC meter read date without incurring an early termination fee.
Right of Rescission:	You may cancel this Contract at any time before midnight of the third business day after receiving this disclosure by either notifying us in writing at the address provided below or by phone by calling us at 1-855-465-1244 that you would like to rescind this Contract.

CONSTELLATION CONSUMER CONTRACT AND DISCLOSURE STATEMENT OF TERMS OF SERVICE PENNSYLVANIA RESIDENTIAL ELECTRIC GENERATION SERVICE LICENSE NUMBER A-110036

Purchase of Power and Energy Service

Constellation NewEnergy, Inc.("Constellation") agrees to sell, and you agree to buy, your full requirements for residential electric generation service at the price and on the terms and conditions specified in this Consumer Contract and Disclosure Statement (the "Contract"). Price and other terms of this Contract are subject to change as provided below. Constellation reserves the right to revoke its electricity offer for any reason at any time prior to your acceptance of this Contract. Throughout this Contract, the words "you" and "your" refer to the customer who has signed this Contract. The words "we", "us" and "our" refer to Constellation. Constellation is an independent seller of electric generation service licensed by the Pennsylvania Utility Commission ("PUC") and is not representing or acting on behalf of the electric distribution company responsible for the service territory where you reside, i.e. Pennsylvania Power & Light Company, Philadelphia Electric Company, West Penn Power, Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company, or Duquesne Light (each referred to as the "Electric Distribution Company" or "EDC" or "Utility"), any governmental bodies, or consumer groups. You will receive written notification from the EDC confirming a pending switch of your electric generation supply.

Contract Duration

The initial duration of the Contract is indicated in the "Contract Duration/Length" section of the above Contract and Disclosure Statement Summary ("Summary") based on your election, beginning on the starting date that is the next meter read date after the EDC processes your enrollment. Your switch to Constellation as your electric generation supplier may take up to 2 billing cycles to take effect.

Guarantee Period

In addition to the 3-day rescission period described below in the "Rescission" section, Constellation offers a 90-day guarantee where you may cancel this Contract without incurring an early termination fee (the "Guarantee Period"). To activate this guarantee, you must notify us in writing or by calling our customer care center at 1-855-465-1244 in addition to contacting your EDC or alternative energy supplier; otherwise the early termination fee will apply. Upon your termination of this Contract during the Guarantee Period, you will be returned to your EDC on your next available meter read date unless you choose another supplier, and you will remain responsible for payment for electricity and related costs and charges incurred under this Contract through such meter read date. Any incentives Constellation may offer to you in connection with you entering into this Agreement require your Account to be active and in good standing at the time the incentive is fulfilled.

Fixed Pricing

Your price for electric generation service for the above Contract Duration/Length is indicated in the "Generation/Supply Price" section of the above Summary, and will remain at the same price for the duration of the above Contract Duration/Length. This price includes Transmission Charges and Estimated Total State Taxes, including the Gross Receipts Tax, but excludes applicable state and local Sales Taxes. This fixed price does not include Distribution Charges (as defined below) or any other EDC charges (which will be invoiced by the EDC).

Key Pricing Definitions

"Distribution charges" are part of the basic service charges on every customer's bill for delivering electricity from the EDC to your home. The PUC regulates distribution prices and services. This charge will vary according to how much electricity you use.

"Generation charges" are charges that represent the cost of producing the electricity and are specific to this Contract. Generation prices and charges are set by the electric generation supplier you have chosen, which is Constellation. This charge will vary according to how much electricity you use.

"Transmission charges" are charges that represent the cost of transporting electricity from the source of supply to the EDC. This charge will vary with your source of supply. The Federal Energy Regulatory Commission regulates transmission prices and services.

Other Pricing Terms

The fixed price charged for electric generation service under this Contract is reflective of competitive market conditions, was not set or approved by the PUC and does not include any applicable taxes (other than gross receipt taxes) or local distribution company fees or charges, which will be charged by the EDC. Based on the information provided by you during your sign-up, this address is your personal residence, vacation home or residential rental property or you are the parent or guardian for the person residing here, and you are paying the EDC bill. Accordingly, under current applicable laws, we are not required to assess sales taxes on our charges under this Contract. There is no charge for entering into this Contract or for terminating this Contract at the end of the then-applicable Contract duration as provided in the "Contract Duration" and "Renewal" sections. Under certain other circumstances, you may be responsible for payment of an early termination fee as provided in the "Termination" section below.

Rescission

You may cancel this Contract at any time before midnight of the third business day after receiving this disclosure by either notifying us in writing at the address provided below or by phone by calling us at 1-855-465-1244 that you would like to rescind this Contract.

Price Comparison

Because the EDC's tariff rates and other factors relevant to the EDC's current price to compare likely will change from time to time, Constellation cannot guarantee savings over the EDC's rates for the entire duration of this Contract or any renewals and any savings are limited to a comparison against the EDC's price to compare applicable at the time you enter into this Contract.

Net Metering

If you currently own or plan to install during the term of this Contract solar, wind, or other eligible renewable electrical generating facilities in order to supply all or part of your electricity usage and such generating facility is or will be net metered by the EDC you must notify us in order for us to determine your eligibility and to properly enroll or continue to serve you.

End of Contract

THIS CONTRACT WILL AUTOMATICALLY RENEW AS DESCRIBED IN THIS SECTION. IN ORDER TO CANCEL BEFORE AN AUTOMATIC RENEWAL OF THIS CONTRACT, PLEASE NOTIFY US IN WRITING OR BY PHONE AS DESCRIBED IN THIS SECTION. Unless terminated earlier as provided in the "Termination" section, if you have a fixed duration contract that will be ending, or whenever we want to change the this Contract, you will receive two separate notices before the Contract ends or the changes happen. You will receive the first notice 45-60 days before, and the second notice 30 days before the expiration date or the date the change becomes effective. These notices will explain your options. If you terminate your agreement after you receive the second notice and before the expiration of your contract you will not be required to pay an early termination fee. The second contract renewal notice will set forth the proposed price for the renewal term, the proposed length of the renewal term, the bill cycle in which service under the new term will begin and any other proposed changes to the terms and conditions of this Contract. YOU MAY, HOWEVER, TERMINATE THE CONTRACT DURING ANY RENEWAL PERIOD AT ANY TIME WITHOUT INCURRING AN EARLY TERMINATION FEE, AT WHICH TIME WE WOULD RETURN YOUR ACCOUNT AT THE NEXT APPLICABLE METER READ DATE TO BEING SUPPLIED BY THE EDC UNLESS YOU HAVE SELECTED ANOTHER ELECTRIC GENERATION SUPPLIER.

Initiation of Service

THE PURPOSE OF THIS DOCUMENT IS TO AUTHORIZE CONSTELLATION TO CHANGE YOUR ELECTRIC GENERATION SERVICE SUPPLIER AND, BY ENTERING INTO THIS CONTRACT, YOU AUTHORIZE CONSTELLATION TO UNDERTAKE WHATEVER STEPS NECESSARY TO ACCOMPLISH YOUR SWITCH. Constellation will begin providing electric generation service to you on the next applicable meter read date after the EDC processes your enrollment and your service will continue throughout the duration of this Contract. The EDC will notify you of the date on which your electric generation service from Constellation will begin. Constellation's electric generation service will be delivered to your residence using the EDC's electricity distribution wires. You represent and warrant that the electricity supply being purchased under this Contract is to be used solely for residential purposes. Constellation's obligations under this Contract are conditioned on you providing complete and accurate information and on you remaining a EDC distribution customer throughout the duration under the applicable residential electric rate class.

Billing and Payment

The cost of your electric generation service will be included on your bill from the EDC, and is due and payable when your EDC bill is due at the billing address provided in your EDC bill. You acknowledge that the EDC may provide us with your billing and payment information. You will be invoiced for Constellation's charges under this Contract at the applicable price set forth in the "**Fixed Pricing**" section above (or, during any renewal period, under any revised price, terms and conditions as may be established as described in the "**Renewal**" section above) multiplied by your electricity usage as measured by the EDC in kWh during the applicable billing period. You agree to accept the measurements as determined by the EDC for purposes of accounting for the amount of power and energy services provided by us under this Contract. If the EDC is unable to read your meter, the EDC will estimate your usage and your charges will be calculated accordingly and adjusted on a future bill. Supplying you under this Contract is conditioned on the EDC accepting our enrollment of your account and your continued eligibility for consolidated billing by the EDC. If you are not eligible for consolidated billing, you need to remedy that restriction with the EDC before we can serve you. Should the EDC cease providing consolidated billing for your account and/or commence billing us for any charges relating to you, we will bill you and you will pay us for all such charges. You will be billed additional charges, including taxes and charges to distribute the electricity to your home, from the EDC consistent with its filed tariffs. You are responsible for paying any new or increased taxes, fees or other charges imposed on us or you in connection with our supply of electricity to you during the duration of this Contract. Constellation reserves the right to change billing methods. If we change our billing methods, we will send you two (2) advance written notices either in your bills or in separate mailing before the effective date of any such change. You may withhold payment of any disputed charges while the charges remain in dispute.

Budget Billing

If you are interested in budget billing for your generation charges contact Constellation for additional information and availability. Contact your Utility for questions related to budget billing of the Utility's charges. You authorize Constellation to bill you directly if necessary to collect any amount hereunder.

Late or Insufficient Payment

If Constellation directly invoices you, you are required to pay our invoices by the due date set forth in the invoice, which will be 20 days from the date the invoice was mailed. WE RESERVE THE RIGHT TO CHARGE YOU INTEREST FOR ANY PAST DUE INVOICE AMOUNT AT 1.5% PER MONTH OR THE HIGHEST AMOUNT PERMISSIBLE UNDER APPLICABLE LAW, WHICHEVER IS LESS. IN ADDITION, YOU AGREE TO PAY US OUR COSTS INCURRED IN COLLECTING AMOUNTS OWED US, INCLUDING REASONABLE ATTORNEY'S FEES AND RETURNED CHECK CHARGES. IF YOU MAKE A PAYMENT FOR AN AMOUNT LESS THAN THE TOTAL AMOUNT DUE, WE MAY ACCEPT SUCH PAYMENT WITHOUT PREJUDICE TO ANY OTHER RIGHTS OR REMEDIES THAT WE MAY HAVE AGAINST YOU AND WE MAY APPLY IT TO YOUR ACCOUNT(S) AS A PARTIAL PAYMENT. IN ADDITION, IF YOU FAIL TO REMIT PAYMENT IN A TIMELY FASHION, YOU AUTHORIZE US TO REPORT THE DELINQUENCY TO ONE OR MORE CREDIT- REPORTING AGENCIES.

Credit

If Constellation bills you directly for energy supply, Constellation reserves the right to determine if your credit standing is satisfactory for originating or continuing electric generation service under this Contract. Consistent with applicable law, Constellation uses uniform income, deposit and credit requirements in determining whether to offer service to our customers. You hereby authorize Constellation to perform a credit check on you.

Termination and Termination Fees

Constellation may terminate this Contract for any non-payment or any other breach of this Contract upon 30 days' prior written notice to you of such termination. If you fail to cure within the 30-day notice period, we may terminate the Contract even if you subsequently cure the non-payment or breach after such period has expired. Constellation may also cancel this Contract after providing the required regulatory notice to you due to a change in law or other act beyond our reasonable control or if we are no longer able to serve you. We reserve the right to reject your enrollment or terminate this Contract if:

- you fail to meet or maintain satisfactory credit standing detained by us;
- you move within or outside of the EDC's service territory or you fail to remain a EDC distribution customer throughout the duration under the applicable residential electric rate class;
- you fail to be eligible for EDC consolidated billing throughout the duration;
- you rescind your authorization for release of information provided in the "**Information Release Authorization**" section below; or you provide any false, inaccurate or misleading information to Constellation or the EDC; or
- if after receiving the required notice set forth in the Change in Pricing and Other Terms section you fail to affirmatively accept the new contract terms we propose to you which address unanticipated increased costs resulting from a change in, or modification of an existing law. In this instance you will not be responsible for an early termination payment.

You may terminate this Contract during the Guarantee Period in accordance the "**Guarantee Period**" section above without incurring an early termination fee.

YOU MAY ALSO TERMINATE THIS CONTRACT PRIOR TO THE END OF THE APPLICABLE DURATION FOR YOUR CONVENIENCE, IN WHICH CASE UNLESS OTHERWISE REQUIRED BY LAW YOU WILL BE CHARGED A TERMINATION FEE OF $## IF WE TERMINATE THIS CONTRACT AS A RESULT OF ANY NON-PAYMENT OR OTHER BREACH OF THIS CONTRACT OR IF YOU PROVIDE ANY FALSE, INACCURATE OR MISLEADING INFORMATION. You will not be charged a termination fee if you terminate after we send you the second notice described under "End of Contract" above but before expiration of your fixed duration Contract.

Upon any termination of this Contract, you will return to receiving default service from the EDC unless you have selected another electric generation supplier. The effective date of any termination will be the next applicable meter read date after expiration of the required notice period. Upon any termination, you will remain responsible for all obligations, including payment for electricity and related costs and charges incurred under this Contract prior to the effective date of termination including any applicable termination fee. The delivery of electricity to you cannot be terminated or interrupted by the EDC as a result of any dispute between Constellation and you but may be terminated by the EDC for nonpayment of EDC charges in accordance with applicable law. The EDC will continue to respond to any service calls and emergencies and switching to Constellation will not impact your electric service reliability. If the EDC purchases the right to receive your payments under this Contract, your payment obligations may become EDC charges for purposes of termination of service.

Assignment, Address Change

Upon 30 days written notice to you, Constellation may assign, subcontract or delegate all or any part of our rights and/or obligations under this Contract, including your payment obligations under this Contract, without your consent. You may not assign any of your rights or obligations under this Contract without our prior written consent. If you move, you may terminate our Contract. You will be responsible for paying for all electricity supplied to your old address until the date this Contract is terminated in accordance with its terms. If you move within the EDC's service territory, you must contact the EDC at the number provided in the "**Contact Information**" section below in order to obtain new account and meter numbers for your new residence. Please contact us if you would like us to serve you again at your new location.

Change in Pricing and Other Terms

In addition to Constellation's right to revise the price, terms and conditions of this Contract as provided in the "**End of Contract**" section above, this Contract may be revised at any time by Constellation upon the occurrence of any event beyond its reasonable control that materially increases the obligations of Constellation or the cost of performing such obligations under this Contract. If you have a fixed duration agreement with us, then whenever we propose to change the terms of this Contract, you will receive two written notifications from us in corresponding separate mailings that precede either the expiration date or the effective date of the proposed changes. We will explain your options to you in these two advance notifications. The first of these notices will occur between 60-45 days prior to the expiration date of the Contract or the effective date of the proposed Contract change; the second of these notices will occur at least 30 days prior to the Contract's expiration or the effective date of the proposed Contract change. As the options notice will describe, if you do not consent to these changes, your electric generation service will terminate effective as of the next meter read date after expiration of the required notice period and you will be returned to your EDC unless you choose a new supplier. You will remain responsible for any unpaid balance as of the termination date but we will not assess a termination payment.

Information Release Authorization

Throughout the duration, you authorize Constellation to obtain information from the EDC that includes, but is not limited to, account name, account number, billing address, service address, telephone number, standard offer service type, historical and future electricity usage, rate classification, meter readings, characteristics of electricity service and, when charges hereunder are included on your EDC bill, billing and payment information from the EDC. We will maintain the confidentiality of your personal information, including name, address, telephone number, electric usage and historic payment information, as required by applicable Pennsylvania Public Utility Commission regulations and Federal and State laws. You authorize Constellation to release such information to third parties that need to know such information in connection with your power and energy service and to Constellation's affiliates and subcontractors. These authorizations will remain in effect as long as this Contract is in effect. You may rescind these authorizations at any time by either calling or providing written notice to us at the number and/or address provided below under the Contact Information section of the Contract. We reserve the right to the extent permitted by law to reject your enrollment or terminate this Contract in the event these authorizations are rescinded.

Dispute Resolution; Class Action and Jury Trial Waiver

CONSTELLATION HOPES TO MAKE YOU A SATISFIED CUSTOMER, BUT IF THERE'S AN ISSUE THAT NEEDS TO BE RESOLVED, THIS SECTION OUTLINES WHAT'S EXPECTED OF BOTH CONSTELLATION AND YOU. BOTH YOU AND CONSTELLATION AGREE TO RESOLVE ALL DISPUTES RELATING TO OR ARISING OUT OF THE INTERACTIONS BETWEEN CONSTELLATION (INCLUDING OUR AFFILIATES, AGENTS, EMPLOYEES, DIRECTORS, OFFICERS AND ASSIGNS) ONLY BY ARBITRATION OR BY AN INDIVIDUAL ACTION IN SMALL CLAIMS COURT. THERE'S NO JUDGE OR JURY IN ARBITRATION, AND THE PROCEDURES MAY BE DIFFERENT, BUT AN ARBITRATOR CAN AWARD THE SAME DAMAGES AND RELIEF TO YOU AND MUST HONOR THE SAME TERMS IN THIS AGREEMENT AS A COURT WOULD. IF THE LAW ALLOWS FOR AN AWARD OF ATTORNEYS' FEES, AN ARBITRATOR CAN AWARD THEM TOO. BOTH YOU AND CONSTELLATION ALSO AGREE THAT:

A) The federal arbitration act applies to this Agreement and governs any arbitration between you and Constellation. Prior to initiating any arbitration, you and Constellation both agree to try to resolve any dispute informally. To initiate informal dispute resolution, contact our customer care department in one of the ways identified in the Disclosure Statement at 1-800-785-4373. Constellation will assign someone to attempt to resolve the dispute.

B) If the dispute is unable to be resolved informally within ninety (90) days after the Party raising it informed the other in writing of the nature and basis of the dispute and made a written demand ("Demand"), either Party may seek formal arbitration. Any arbitration will be governed by the Commercial Arbitration Rules and the Supplementary Procedures for Consumer Related Disputes (collectively, "AAA Rules") of the American Arbitration Association ("AAA"), as modified by this Agreement, and will be administered by the AAA. The AAA Rules are available online at adr.org, or by calling the AAA at 1-800-778-7879. The arbitrator is bound by the terms of this Agreement and all issues are for the arbitrator to decide, except that issues relating to the scope and enforceability of the arbitration provision are for the court to decide. This dispute resolution provision does not preclude you from bringing any issues you may have to the attention of any governmental authorities.

C) YOU AND CONSTELLATION BOTH AGREE THAT THIS AGREEMENT DOES NOT ALLOW CLASS ACTIONS IN COURT OR CLASS ARBITRATIONS, EVEN IF THE AAA PROCEDURES OR RULES WOULD ALLOW SUCH PROCEDURES. RELIEF MAY BE AWARDED ONLY IN FAVOR OF THE INDIVIDUAL PARTY SEEKING RELIEF AND ONLY TO THE EXTENT NECESSARY TO PROVIDE RELIEF WARRANTED BY THE PARTY'S INDIVIDUAL CLAIM. IF FOR SOME REASON, THE CLASS ACTION WAIVER IS UNENFORCEABLE THEN THE AGREEMENT TO ARBITRATE WILL NOT APPLY.

D) Any arbitration hearings will take place in the county of your billing address. If you are unable to pay the AAA filing, administration, and arbitrator fees for any arbitration properly initiated seeking damages up to $10,000, Constellation will pay such amounts. Otherwise, the payment of these amounts will be governed by the AAA Rules. In addition, for claims less than $10,000, any arbitration hearing may be held telephonically.

E) If the arbitrator issues you an award that is greater than the value of our last written settlement offer made prior to an arbitration hearing, then Constellation will pay you three times the amount of the award; and your attorney twice the amount of attorneys' fees, and reimburse any expenses reasonably incurred for pursuing your claim in arbitration. If the award in your favor is lower than our offer Constellation will only pay you the amount of the award. Any arbitration award will be final and binding and judgment confirming the award shall apply only to the specific case to enforce the award in that case.

F) IF FOR ANY REASON A CLAIM PROCEEDS IN COURT, YOU AND CONSTELLATION BOTH AGREE THAT BOTH PARTIES ARE WAIVING A RIGHT TO A JURY TRIAL. This dispute resolution provision shall survive termination of the Agreement.

G) Nothing in this Agreement shall impair your right to make an informal or a formal complaint to your applicable state Commission.

Limitation of Liability

You agree that neither Constellation nor any of its affiliates or subcontractors will be liable for any damages or claims for matters within the control of the EDC or the ISO-controlled electricity grid, which include maintenance of electric lines and systems, service interruptions, loss or termination of service, deterioration of electric services, meter readings or injury to persons or damage to property caused by the delivery or supply of electricity. Neither Constellation nor any of its affiliates or subcontractors will be responsible for any failure to commence or terminate power and energy service on the date specified herein due to any failure or delay in enrolling you with the EDC. Constellation's liability will be limited to direct actual damages only, which will not exceed the amount of your single largest monthly invoice during the preceding 12 months. In no event will Constellation or any of its affiliates or subcontractors be liable for any punitive, incidental, consequential, exemplary, indirect, third-party claims or other damages whether based on contract, warranty, tort, negligence, strict liability or otherwise, or for lost profits arising from any breach or nonperformance of this Contract.

Force Majeure

We do not transmit or deliver electricity and causes and events out of our reasonable control ("Force Majeure Events") may result in interruptions in service. We will not be liable for any such interruptions or any other failure to perform under this Contract caused by a Force Majeure Event. We are not and will not be liable for damages caused by Force Majeure Events, including but not limited to acts of God; acts of any governmental authority; accidents; strikes; labor disputes; required maintenance work; inability to access the EDC's system; non-performance by the EDC, including, but not limited to, a facility outage on its distribution lines; changes in laws, rules or regulations of any governmental authority; or any cause beyond our reasonable control.

Miscellaneous

Except with respect to Constellation's affiliates and subcontractors under the "**Limitation of Liability**" and "**Dispute Resolution; Class Action and Jury Trial Waiver**" sections, there are no third party beneficiaries of this Contract. Any payments due under this Contract, and all provisions relating to the payment and collection thereof, and the provisions contained in the "**Limitation of Liability**" and "**Dispute Resolution; Class Action and Jury Trial Waiver**" sections above, will survive expiration or termination for any reason. This Contract constitutes the entire agreement between you and Constellation. No statement, promise or inducement made by either party not contained in this Contract will be valid or binding. Any reference to days or periods will mean calendar days.

PREPARED DIRECT TESTIMONY OF PATRICK CICERO

I. Background and Introduction

Q: Please state your name, occupation, and business address?

A: My name is Patrick Cicero. In my role as Of Counsel at the Pennsylvania Utility Law Project (PULP) I have a broad range of responsibilities to PULP and its clients. Among other things, I provide analysis and testimony on utility matters for clients who are represented by members of the statewide legal aid network, including clients of PULP and other legal aid offices. PULP's business address is 118 Locust Street, Harrisburg, PA 17101. I also maintain an office at my home.

Q: For whom are you testifying in this proceeding?

A: I am testifying on behalf of the Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania (CAUSE-PA).

Q: What is the purpose of your testimony in this proceeding?

A: CAUSE-PA intervened to ensure that the FirstEnergy Pennsylvania Electric Company's ("FE PA" or "the Company") planned default service portfolio is consistent with Chapter 28 of the Public Utility Code and to ensure that the manner in which residential and low income consumers interact with the retail market through various programs and policies proposed by FE PA are fair and reasonable.

Q: Have you provided testimony before the Pennsylvania Public Utility Commission in any prior cases?

A: Yes. A full list of proceedings in which I previously testified is included with my resume which is attached hereto as Appendix A. In addition to those proceedings in which I have provided testimony, I have significant prior experience before the Public Utility

Commission (PUC or Commission), including in my role as the statutory representative of consumers while serving as Pennsylvania's Consumer Advocate leading the Pennsylvania Office of Consumer Advocate.

Q: What are your qualifications to provide testimony in this case?

A: I have more than 23 years of experience as an attorney, 20 years of which have been in the practice of legal aid or consumer advocacy. After 2 years clerking for a federal district court judge, I spent approximately 5 years as a staff attorney at MidPenn Legal Services in Harrisburg where I represented clients facing eviction, foreclosure, bankruptcy, and utility termination. After returning briefly to clerk at the federal district court, in early 2011, I began working at the Pennsylvania Utility Law Project – first as a staff attorney and ultimately as its Executive Director. In 2020, I was hired to lead the statewide legal aid network when I became the Executive Director of the Pennsylvania Legal Aid Network where I coordinated the work of the legal aid system in Pennsylvania that provides civil legal aid to Pennsylvania households. On December 13, 2021, I was appointed as the Commonwealth's Consumer Advocate leading the Office of Consumer Advocate (OCA) and was confirmed by the Pennsylvania Senate in June 2022. I served as Consumer Advocate until January 31, 2025. In February 2025, I returned to work with PULP as Of Counsel.

Throughout my tenure in each of these roles, I have had the opportunity to see firsthand the extraordinary efforts that low income customers take to remain stably housed and connected to essential utility service. Day in and day out, low income families – almost all of whom struggle to survive at income levels that are at or below 150% of the

federal poverty level (FPL)[1] – are forced to make difficult decisions about which bills to pay and which they must forgo. I have relevant experience helping low income consumers understand their utility bills and rates, why their charges are what they are, and what assistance, if any, is available to them to help pay their bills.

Furthermore, for more than 15 years at PULP and the OCA, I was instrumentally involved in the litigation of hundreds of cases before the PUC including rate cases, default service cases, universal service and energy conservation proceedings, Act 129 cases, and numerous other proceedings that require working knowledge and expertise in the issues about which I will be testifying in this proceeding. Simply put, throughout my career both in legal aid and as the Consumer Advocate, I developed specialized expertise in the needs of low income customers, the regulation of public utilities, the nuanced design and policy considerations of utility rates, including default service rates.

Q: Have you prepared Exhibits and Appendices to accompany your testimony?

A: Yes. I have prepared several exhibits and appendices that are attached to my testimony. Exhibits 1 through 3, which were prepared by me or under my supervision, provide extensive shopping data for residential and confirmed low income customers. Appendix A is my resume, the last several pages of which contain a list of proceedings in which I have previously provided testimony. Appendix B are the interrogatory responses that I have relied on throughout my testimony.

[1] To put this in context, the 2026 federal poverty guidelines for a family of 4 require that a household not have more than $33,000 in annual income to be considered poor (100% FPL) which translates to $49,500 at 150% FPL. The complete guidelines are available here: Office of the Assistant Secretary for Planning and Evaluation (ASPE), Poverty Guidelines, available at: https://aspe.hhs.gov/topics/poverty-economic-mobility/poverty-guidelines (Last visited March 26, 2026).

Q: Please summarize your testimony and recommendations.

A: Throughout my testimony below, I provide a data-driven assessment of residential shopping and the outcomes for consumers. This evidence, combined with the evidence presented by FE PA, leads to the indisputable conclusion that the retail market experience for FE PA's residential customers has resulted in customers paying hundreds of millions of dollars more than they would have paid had they remained on default service. This not only costs these customers more, it also increases costs for other ratepayers through increases in the uncollectible expense and has resulted in higher rates of utility termination. Based on this evidence, and as outlined in my testimony, I support the following retail market reforms proposed by FE PA:

- FE PA's proposal to end its Customer Referral Program effective May 31, 2027.[2]
- FE PA's proposal that any Electric Generation Supplier (EGS) entering a new fixed-term contract with residential customers after June 1, 2027, return those customers to default service at the conclusion of the fixed term absent an affirmative choice to remain with the EGS.[3]
- FE PA's proposal that after June 1, 2027, any EGS serving customers on a variable rate contract be required to file an attestation on a quarterly basis that a customer has elected to affirmatively remain with the supplier.[4]
- FE PA's proposal to change to its Purchase of Receivables (POR) program to limit POR to those suppliers who charge a "rate-ready" rate that is at or below the price to compare at the time of the customer's enrollment or rate change.[5]

In addition to these reforms proposed by FE PA, I support FE PA's proposal to continue to exempt CAP customers from participation in its proposed TOU program. Finally, I recommend that FE PA adjust its maximum Customer Assistance Program

[2] Petition of FE PA Pennsylvania Electric Company for Approval of its Default Service Program for the Period June 1, 2027 to May 31, 2031, Docket No. P-2026-3060298, Petition at 49. (herein after "DSP VII Petition).

[5] Id. at 55.

(CAP) credits for heating customers to effectively offset recent and projected cost increase in the energy, capacity, and transmission costs that comprise FE PA's price to compare.

II. Summary of Default Service Proposals

Q: Please summarize FE PA's DSP proposal for residential default service procurement.

A: FE PA filed this DSP proceeding in accordance with its responsibilities as a Default Service Provider pursuant to Pennsylvania's Electricity Generation Customer Choice and Competition Act, 66 Pa. C.S. § 2891 *et seq.* (the "Competition Act"), as amended by Act 129 of 2008 ("Act 129"); the Commission's default service regulations found at 52 Pa. Code §§ 54.181-54.189; and the Commission's Policy Statement on Default Service at 52 Pa Code §§ 69.1801-1817. Specifically, FE PA is obligated to provide electric generation service to all customers within its service territory who do not select a retail EGS or who chose to return to default service at the conclusion of a contract for generation service, or when the EGS providing electric generation is unable or unwilling to continue to serve the customer.[6]

Through its Petition, FE PA seeks to establish the terms and conditions under which it will procure default service supply, provide default service to non-shopping customers, and satisfy the requirements of the Alternative Energy Portfolio Standards Act.[7] FE PA is proposing a four-year term for its DSP VII programs which would begin

[6] 66 Pa. C.S. § 2807(e).

[7] FE PA proposes to satisfy all its AEPS Act requirements from the winning bidders of the full requirements of default service produces in FE PA, and these winning bidders will be responsible for meeting all Tier I and Tier II requirements, including solar photovoltaic requirements. See DSP VII Petition ¶ 24.

June 1, 2027, until May 31, 2031. For its residential class, FE PA proposes to procure energy through 100% fixed-price full requirements contracts.[8] These contracts will consist of one 60-month contract that will be designed to represent approximately 10% of FE PA's default service load, which the Company asserts "will enhance portfolio diversity and provide [a] partial long-term energy hedge for residential default service customers."[9] As in prior default service procurement, FE PA proposes to use simultaneous, multiple-round, descending price clock auctions,[10] and will maintain a 50% load cap that will restrict the amount of supply that any one bidder can win in an auction.[11] The remaining 90% of load will consist of staggered 12- and 24-month terms.[12]

FE PA is now a consolidated utility with four rate districts, but it proposes to procure default service supply separately for each rate district[13] due to the pricing differences in their respective PJM delivery zones.[14] FE PA also proposes to maintain its current six-month reconciliation and default service price adjustment schedule with adjustments occurring on June 1 and December 1 of each year.[15]

[8] DSP VIII Petition ¶ 13. Generally, FE PA proposes to procure all energy, capacity, and transmission service as well as all PJM administrative expense through the fixed price full requirements contracts. FE PA Statement No. 2 at 4. However, FE PA will separately procure certain non-market based charges (NMB charges), and Network Integration Transmission Service charges (NITS charges), and required Department of Energy 202(c) reliability must run charges. Id. at 5. These charges will be assessed via the price to compare.

[14] DSP VII Petition ¶ 33.
[15] FE PA Statement No. 4 at 3.

Q: Do you have a position regarding FE PA's overall approach to its default service procurement?

A: No. With limited exception, I am not taking a position in direct testimony concerning whether FE PA's proposed default service procurement proposal is appropriate and consistent with its obligations to procure generation supply for its default service customers at least cost overtime. CAUSE-PA specifically reserves the right to file a brief on the overall portfolio and whether it is consistent with Company's obligations under the Public Utility Code. Similarly, I am reserving the right to take a position about any changes to FE PA's approach that may be suggested by other parties to this proceeding.

Q: Are there elements of the general approach that you support?

A: Yes. There are two. First, I support FE PA's proposal to continue to procure default service supply separately by rate district. Since there are differences in overall wholesale costs by PJM zone, the geography of FE PA's service territory continues to make it fairer and more advantageous to customers to maintain separate PTCs, especially for customers in the West Penn rate district.[16] Second, I support FE PA's proposal to continue to calculate the price to compare two-times per year (June 1 and December 1). The bi-annual price to compare change has allowed for longer periods without pricing change.

[16] As is evidenced by the Company's recent filing updating its projected default service rates effective June 1, 2026, while there are minor differences in pricing between Met-Ed ($0.13951/kWh), Penelec ($0.13142/kWh), and PennPower ($0.13477/kWh), there is a larger difference with West Penn ($0.12075/kWh). See FirstEnergy Pennsylvania Electric Company, Supplement No. 36 to Tariff Electric Pa. P.U.C. No. 1, Thirty-Fifth Revised Page 2, Superseding Thirty-Fourth Revised Page 2, FirstEnergy Pennsylvania Electric Company Tariff Electric Pa. P.U.C. No. 1 – Rate Changes in Compliance with FirstEnergy Pennsylvania Electric Company's Default Service Plan, Docket Nos. P-2021-3030012, P-2021-3030013, P-2021-3030014 and P-2021-3030021, filing dated April 17, 2026.

Q: Is FE PA proposing any alternative default service rate structures for residential consumers?

A: Yes, FE PA is proposing to continue its optional Time of Use (TOU) rate for residential default service customers but has proposed to shorten the on peak period, which would have the effect of increasing the differential between periods.[17]

Q: Do you have any concerns about FE PA's proposed TOU, including its proposed revision?

A: I comment briefly on the TOU in Section V of my testimony and reserve the right to comment on or support other proposals that other parties make concerning an appropriate TOU that is consistent with FE PA's obligations under the Public Utility Code.

Q: Does FE PA propose any additional programs related to the provision of default service and residential customer shopping?

A: Yes. FE PA proposes discontinuing its current Customer Referral Program (CRP).[18] In addition, FE PA also proposes changing the process at the end-of-contract term for customers who are served by retail electric generation suppliers (EGSs) of fixed term contracts, as well as changes related to variable rate contracts. Specifically, FE PA proposes that EGSs who enroll customers on fixed term contracts after June 1, 2027, will be required to return these customers to default service at the end of the contract unless the customer affirmatively choses to remain with the EGS in response to notices sent by the EGS as required by the Commission's regulations.[19] To facilitate this change, FE PA seeks a waiver of the Commission's existing regulations at 52 Pa Code § 54.10(3).[20] For

[17] DSP VII Petition ¶¶41-46.
[18] Id. ¶¶ 48-49.
[19] Id. at ¶ 51.
[20] Id., ¶ 52.

customers on variable rate contracts after June 1, 2027, FE PA seeks to require EGSs to provide an attestation of affirmative consent to remain in the variable rate contract on a quarterly basis.[21] Finally, FE PA proposes to modify its Purchase of Receivables (POR) Program to require all EGSs who wish to use the POR to offer rate ready billing and charge a rate that is at or below the FE PA PTC at the time of the customer's enrollment or rate change transaction.[22]

Q: Do you support these changes that have been proposed by FE PA?

A: Yes. Each of FE PA's proposed changes are designed to correct a glaring and systemic problem with the retail electric market that is served by EGSs. As I will explain in detail below, data revealed through discovery shows a disturbing and prolonged pattern of excessive pricing in the competitive residential retail electric market. Specifically, from August 2017 through December 2025 – 100 months – FE PA's residential shopping customers were charged over **$888 million** more than the applicable default service price.[23] During this period, there was **never** a month in which residential customers served by an EGS were charged, on net, less than they would have been charged had they all been on default service. These excessive energy charges are having a direct impact on the rate of payment troubled accounts and involuntary termination rates, which in turn increases residential write-offs and ultimately impacts the price that all consumers pay for home energy services.

[21] Id., ¶ 51.
[22] Id., ¶ 55.
[23] CAUSE-PA Exhibit 1.

III. Low Income Customers are Significantly Energy Burdened

Q: Please describe the purpose of this section of your testimony.

A: In this section of my testimony, I outline the scope of economic vulnerability of FE PA's low income customers. This provides important context for why FE PA's proposed retail market reforms should be adopted. This information also lends support for the additional protections that I have proposed, including the need for FE PA to increase its maximum CAP credits to account for rising wholesale energy costs.

Q: Who qualifies as a low income customer?

A: The term "low income customer" within the Commission's regulations includes any residential customer whose household income is at or below 150% of the Federal Poverty Level (FPL).[24] With some exceptions, most utility assistance programs – including FE PA's Customer Assistance Program (CAP) – require households to have income that is not greater than 150% FPL to qualify for bill discounts and/or arrearage forgiveness.[25]

A family of four with household income of exactly 150% FPL has a gross annual income of $49,500 ($4,125/month).[26] This is significantly more income than most households who are receiving utility assistance. The PUC reports that the average annual income of participants in an electric utility's universal service and energy conservation program is just $22,362,[27] and the average annual income of CAP customers is a fraction

[24] See 52 Pa. Code § 54.72 (Defining low income customers for the purposes of Universal Service programs and reporting). See also, FE PA Response to CAUSE-PA 1-5, Attached hereto at Appendix B.
[25] FirstEnergy PA Joint Proposed Universal Service and Energy Conservation Plan for 2024-2028, et al., Docket Nos. M-2022-3036532, M-2022-3036533, M-2022-3036534, M-2022-3036535, Fifth Amended Joint Universal Service Plan at 11 (April 30, 2025) ("FE PA 2024-2028 USECP").
[26] See US Dept. of Health & Human Services, HHS Poverty Guidelines for 2026, available at: https://aspe.hhs.gov/topics/poverty-economic-mobility/poverty-guidelines. (Last visited April 19, 2026).

of that – a mere $16,031 annually.[28] This is substantially less than a household needs to meet their basic expenses in any of the counties that FE PA serves.[29]

Q: Does FE PA have a significant low income population in its service territory?

A: Yes. Based on census data reported to the PUC, as a percentage of FE PA's customer base, FE PA has an estimated 426,858 low income customers in its service territory – roughly half (226,028) of which are "confirmed low income."[30] FE PA also has a significant number of customers actively enrolled in CAP, though CAP reaches a small subset of the estimated eligible households across its service territory. Throughout 2025, FE PA had an average CAP enrollment of 80,545.[31] These customers have already demonstrated payment difficulty and an inability to afford their electric service without assistance. Table 1 provides a comparison of the metrics for FE PA's low income customer population in 2025, the most recent year for which this data was publicly reported by the Commission, as compared to its CAP participation rates.

[29] See Self-Sufficiency Standard, available at: http://www.selfsufficiencystandard.org/Pennsylvania. (Last visited March 31, 2026). The Self-Sufficiency Standard defines the income working families need to meet a minimum yet adequate standard of living, considering family composition, ages of children, and geographic differences in costs. The Standard is an affordability and living wage economic security measure that provides an alternative to the official poverty measure.
[30] See 2024 Universal Service Report at 6-7. These numbers are as of the end of 2024. In response to discovery, FE PA reported that as of December 2025 it had a total of 236,868 Confirmed Low Income Customers. See FE PA Response to CAUSE-PA 1-1, Attachment A (2d. Revised), Column D, sum of last row for each tab. Attached hereto at Appendix B.
[31] FE PA Response to CAUSE-PA 2-4, Attachment A, Attached hereto at Appendix B. Average of 2025 totals.

Table 1 – 2025 FE PA Low Income Population and CAP Participation

FE PA Rate District	Average Residential Customer Count[32]	Average Confirmed Low-Income[33]	Estimated Low-Income[34]	Average CAP[35]	Estimated Low Income (% of Total R)	Confirmed Low-Income (% of Total R)
MetEd	524,034	67,574	103,874	21,586	19.8%	12.9%

Q: Is home energy affordability a serious issue for FE PA's low-income customers?

A: Yes, very serious. Energy insecurity – or the inability to afford basic energy services – threatens stable and continued housing, employment, and education; has substantial and long-term impacts on mental and physical health; creates serious risks to the household and the larger community; and negatively impacts the greater economy.[36] Even in relatively good economic periods, low-income families struggle to make ends meet each month, and are often unable to afford basic energy services. These households are often forced to choose between critical necessities each month, including housing, food, water, heat, and medicine. As shown in Chart 1, below, recent analysis of the National Consumer Law Center based on the United Stated Energy Information

Science Medicine (Oct. 2016), https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5114037/; see also Diana Hernandez, Yumiko Aratani, and Yang Jiang, Energy Insecurity Among Families with Children (Jan. 2014), http://www.nccp.org/publications/pub_1086.html.

Agency's 2024 Residential Energy Consumption Survey shows an alarming increase in energy insecurity since 2020.

Chart 1: Comparison of Reported Energy Insecurity 2020 to 2024[37]

Similar data is present in Pennsylvania. Energy insecurity resulting from high energy burdens impacts roughly 1 in 4 Pennsylvania households.[38] According to the most recent data available from the United States Census Bureau's Household Pulse Survey,

[37] National Consumer Law Center, Issue Brief: Energy Insecurity on the Rise: Preliminary Findings from the 2024 Residential Energy Consumption Survey (March 26, 2026), https://www.nclc.org/resources/energy-insecurity-on-the-rise-preliminary-findings-from-the-2024-residential-energy-consumption-survey/ (Last visited: April 20, 2026).

[38] US Census Bureau, Household Pulse Survey: Pennsylvania, Unable to Pay Energy Bill (Aug. 20 – Sept. 16, 2024), available at: https://www.census.gov/data-tools/demo/hhp/#/?measures=ENERGYBILL&s_state=00042. (last visited Dec. 4, 2025). Energy insecurity is the inability to adequately meet home energy needs. There are three dimensions to energy insecurity: economic (disproportionately high energy costs (burden) as percentage of income); physical (housing deficiencies / inefficiencies); and coping (strategies to cope with economic and physical hardships associated with energy insecurity). See Columbia Univ. Ctr. on Global Energy Policy, Energy Insecurity in the United States, available at: https://www.energypolicy.columbia.edu/publications/energy-insecurity-in-the-united-states/. (last visited Dec. 4, 2024).

roughly 24.4% of Pennsylvania households were unable to afford their home energy bills in 2024, compared to 23% nationwide.[39]

Q: Please describe the significance of this data to this proceeding?

A: This information is material and significant because any increase in rates due to rising wholesale energy costs or from retail energy contracts that are higher than FE PA's residential PTC necessarily causes increased unaffordability for low income households whose income is already inadequate to cover basic living expenses. This also results in a corresponding increase in uncollectible expenses and involuntary payment-related terminations. These impacts can and do have a deep and lasting impact on the health and wellbeing of those in the household and the welfare of the communities in which these households reside.

Simply put, FE PA's low income customers are economically vulnerable and unable to pay for essential services like electricity without substantial and meaningful assistance. It is precisely for this reason that CAPs were created and statutorily recognized at the outset of the shopping era to assist low-income customers to maintain and afford utility service. For them to remain effective, the amount of assistance provided through the program must adjust to account for externalities such the significant increases in wholesale energy costs that have occurred since the beginning of 2024.

[39] US Census Bureau, Household Pulse Survey: Pennsylvania, Unable to Pay Energy Bill (Aug. 20 – Sept. 16, 2024), https://www.census.gov/data-tools/demo/hhp/#/?measures=ENERGYBILL&s_state=00042. (last visited April 2026.)

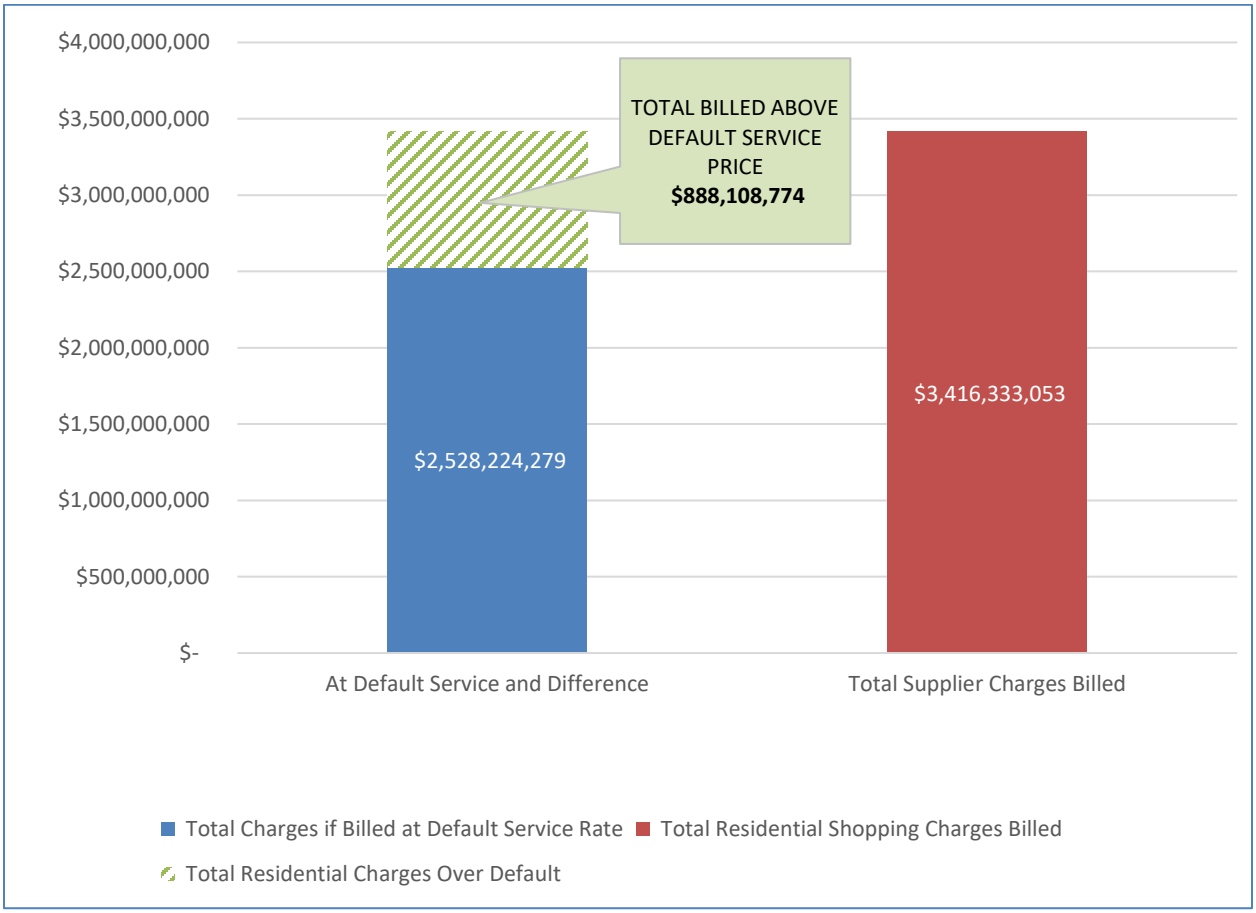
IV. Overview of Shopping Data

Q: You note above that residential shopping customers across the four FE PA rate districts have been charged hundreds of millions of dollars more than the default service price since 2017. Please explain.

A: The data presented in this case builds on the evidence from prior DSPs and shows that since August 2017 through December 2025, a period of 100 months, FE PA's residential shopping customers, as a whole, were charged over $888 million more than the applicable default service rate.[40] Table 2, below, provides a breakdown of the charges by year and by Company. Importantly, the figures shown below accounts for *all residential shopping charges* – including charges for shopping customers who may have saved and those who did not save. These are net numbers above the price to compare that show month over month for 100 consecutive months, customers would have been better off financially if they had simply remained on default service.

[40] CAUSE-PA Exhibit 1.

TABLE 2: Residential Shopping – Total Charges Over Default Service Price[41]



Total Residential Shopping Charges in Excess of Default Service Price					
	Met-Ed	**Penelec**	**Penn Power**	**West Penn Power**	**Total Over Default Service Price Across All Divisions**
2017 (Aug-Dec)	$11,895,065	$9,457,447	$3,239,881	$8,831,165	$33,423,558
2018	$27,853,794	$21,179,501	$6,913,754	$29,085,241	$85,032,291
2019	$33,176,270	$24,579,074	$7,957,474	$33,915,291	$99,628,108
2020	$34,260,190	$23,262,163	$7,975,362	$38,267,078	$103,764,793
2021	$30,050,145	$25,980,103	$8,587,995	$44,685,829	$109,304,071
2022	$48,151,397	$34,017,777	$10,630,969	$56,753,285	$149,553,428
2023	$37,730,967	$35,298,499	$9,265,792	$44,643,311	$126,938,569
2024	$25,781,115	$24,569,863	$7,184,441	$34,212,178	$91,747,597
2025	$30,055,590	$15,164,174	$7,574,992	$35,921,602	$88,716,358
Total	**$278,954,533**	**$213,508,603**	**$69,330,659**	**$326,314,979**	**$888,108,774**

This information is also shown in Chart 2, below, in which I show the amount that shopping customers were billed in EGS charges over this 100 month period ($3.4 billion) as compared to what they would have been billed had they all been on default service during that time ($2.5 billion) and the difference between the two ($888 million). As is shown in Exhibit 1, attached hereto, there was not a single month from August 2017 through and including December 2025 in which shopping customers in aggregate paid less than they

[41] Id. Data in CAUSE-PA Exhibit 1 Exhibit for 2022-2025 was derived from data in FE PA Response to CAUSE-PA 1-1, Attachment A (2d. revised); FE PA Response to CAUSE-PA 1-2, Attachment A (2d. revised); FE PA Response to CAUSE-PA 1-3, Attachment A (2d. revised); and FE PA Response to CAUSE-PA 1-4, Attachment A, Attached hereto at Appendix B. Data for 2017 - 2021 is from CAUSE-PA Exhibit 1, which was entered into the record in FE PA's 2023-2027 Default Service Plan proceeding. See Joint Petition of Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company, and West Penn Power Company for Approval of their Default Service Programs for the period commencing June 1, 2023, through May 31, 2027, Docket Nos. P-2021-3030012, P-2021-3030013, P-2021-3030014, P-2021-3030021, CAUSE-PA Statement No. 1, Direct Testimony of Harry Geller.

would have paid had they been served by default service. Put simply, within FE PA's territory, residential retail shopping has cost consumers hundreds of millions of dollars.

CHART 2: Residential Shopping –Total Shopping Charges Billed vs. Charges if Billed at Default Rate for the Period from August 2017 to December 2025[42]

I have attached as Exhibit 1 to this testimony the extensive details of the actual billed charges that were assessed to FE PA's residential customers served by EGSs for each month from August 2017 through December 2025. I then compare this with what these customers would have paid if they been served at the default service rate. This exhibit shows that as a group and on net, residential shopping customers in each of the

[42] CAUSE-PA Exhibit 1(a)-(d).

FE PA rate districts were charged significantly higher rates than the default service rate ***every month*** since August 2017. In other words, across all four of the FE PA districts, *residential shopping customers – as a group – have not saved at any point since at least August 2017.*

Q: Is there similar analysis for how confirmed low income customers have fared in the competitive market?

A: Yes. I have compiled data disclosed in discovery for confirmed low income customers for the period of 2022-2025, and that information tells a similar story. As shown in Table 3, below over this 48-month period, FE PA's confirmed low income shopping customers, on net, were charged over $43.1 million more than the applicable default service rate.[43] As discussed in Section III above, these customers are deeply poor and significantly payment troubled and they are not enrolled in CAP, yet they were consistently charged significantly more by retail suppliers. This serves no legitimate purpose and exacerbates hardship for these households – resulting in substantial harm to Pennsylvania families and communities.

[43] CAUSE-PA Exhibit 2.

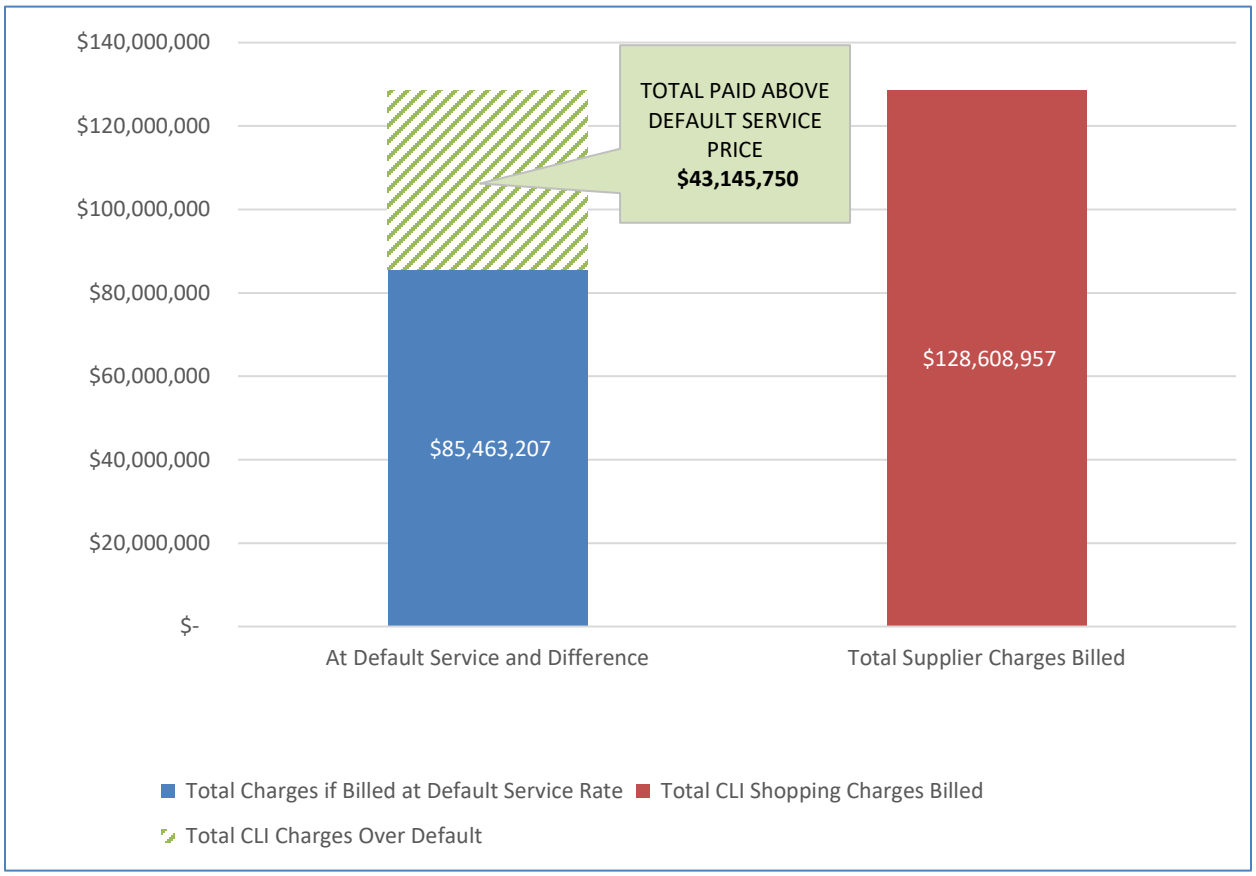


Table 3: Confirmed Low Income Shopping – Total Charges Over Default Service Price[44]

Total Low Income Shopping Charges in Excess of Default Service Price					
	Met-Ed	**Penelec**	**Penn Power**	**West Penn Power**	**Total Over Default Service Price Across All Divisions**
2022	$4,139,703	$3,444,749	$732,114	$4,276,956	$12,593,522
2023	$3,657,306	$3,001,508	$644,623	$3,756,606	$11,060,043
2024	$2,986,035	$2,455,722	$530,884	$3,168,016	$9,140,657
2025	$3,425,235	$2,944,105	$594,842	$3,387,345	$10,351,528
Total	**$14,208,279**	**$11,846,084**	**$2,502,463**	**$14,588,924**	**$43,145,750**

This information is also shown in Chart 3, below, in which I show what shopping customers were billed in EGS charges over this 48 month period ($128.6 million) as compared to what they would have been billed had they all been on default service during that time ($85.5 million) and the difference between the two ($43.1 million).

[44] *Data in this Exhibit was derived from data in FE PA Response to CAUSE-PA 1-1, Attachment A (2d. revised); FE PA Response to CAUSE-PA 1-2, Attachment A (2d. revised); FE PA Response to CAUSE-PA 1-3, Attachment A (2d. revised); and FE PA Response to CAUSE-PA 1-4, Attachment A, Attached hereto at Appendix B.

Chart 3: CLI Shopping –Total Shopping Charges Billed vs. Charges if Billed at Default Rate For the Period of January 2022 to December 2025[45]

Q: Have you compared the premium above default service that residential shopping customers overall paid as compared to confirmed low income shopping customers?

A: Yes. Because I have data going back only to 2022 for confirmed low income customers, I compared the total cost above default service paid by all residential shopping customers for 2022 - 2025 and the total paid by confirmed low income shopping customers and derived a percentage premium that both groups paid above the applicable default service price. The point of comparison was to demonstrate what premium above

[45] CAUSE-PA Exhibit 2(a)-(d).

default service these customer groups paid. As this chart illustrates, and as reflected in Table 4, below, residential shopping customers paid a significantly higher price premium above default service price in *all rate districts, in all years* than they would have paid had they been on default service, but CLI customers paid and even higher price premium for the same period relative to default service.

Table 4: Price premium above default service CLI vs. all residential customers[46]

2022-2025		
Rate District	**CLI Premium Cost Above Default Service (%)**	**Residential Premium Cost Above Default Service (%)**
MetEd	47%	32%
Penelec	54%	41%
Penn Power	37%	31%
West Penn Power	56%	42%

This data shows that all residential customers on net have paid 31-42% more to be served by EGSs than they otherwise would have paid on default service during this period but Confirmed Low Income customers paid 37-56% more. The fact that the poorest customers paid significantly more than default service – and significantly more of an overall premium than residential shopping customers as a whole – is illustrative of how fundamentally broken these markets are in serving residential customers. There is significant need for reform.

[46] The data underlying my analysis is attached hereto as Exhibit 3.

Q: Are there other data points that demonstrate the failure of the retail electric markets to reduce prices to consumers?

A: Yes, when the data above is looked at on a per customer basis, it is apparent that customers are not just paying "a little more", but significantly more on an average basis to be served by retail EGSs than if they had remained on default service. Table 5, below shows the average per customer difference per year between their actual charges and what they would have paid on default service from August 2017 to December 2025 [47]

Table 5: Residential Shopping - Average Per Residential Shopping Customer in Charges Above Default Service Price, August 2017 to January 2026[48]

Average Per-Customer Residential Shopping Charges in Excess of Default Price				
	MetEd	**Penelec**	**Penn Power**	**West Penn Power**
2017 (Aug - Dec)	$71	$65	$84	$53
2018	$180	$158	$193	$185
2019	$234	$201	$235	$231
2020	$254	$199	$241	$271
2021	$244	$245	$288	$352
2022	$449	$354	$399	$491
2023	$380	$414	$368	$420
2024	$231	$278	$258	$292
2025	$270	$168	$271	$307
TOTAL	**$2,312**	**$2,082**	**$2,337**	**$2,601**

Q: Is there any additional evidence that low income shopping customers fared worse in the competitive market than residential shopping customers as a whole?

A: Yes. I compared the total average charges over default service per customer for all residential shopping customers during the period from 2022-2025 and compared it to

[47] CAUSE-PA Exhibit 1(a)-(d).
[48] CAUSE-PA Exhibit 1.

the total average charges over default service per customer for confirmed low income shopping customers for the same period. The results are alarming and are presented in Table 6 below.

Table 6: Residential v. Confirmed Low Income, Per Customer Shopping Charges Over Default Service Price (2022-2025)

COMPARE AVG. OVER DEFAULT ACROSS ALL DIVISIONS (2022-2025) RESIDENTIAL V. CONFIRMED LOW INCOME				
	MetEd	Penelec	Penn Power	West Penn Power
Residential	$1,330	$1,215	$1,296	$1,509
Confirmed Low Income	$1,828	$1,537	$1,443	$1,889
Difference	**$498**	**$323**	**$147**	**$379**

As Table 6 shows, while residential shopping customers as a whole were charged significantly higher rates compared to the applicable default service rate, confirmed low income shopping customers were charged even higher average rates on a per customer basis.

These inflated charges levied on confirmed low income customers in the retail energy markets are profoundly damaging and exacerbate the significant struggle these households already face to make ends meet – often foregoing basic life necessities to afford energy services to their home. An unnecessary increase in basic utility costs, such as those faced by shopping customers, exacerbates unaffordability, increases uncollectible expenses, and results in significant impacts to the health and safety of low income consumers.

Q: Is there any data to suggest that shopping customers are at a greater risk of termination compared to default service customers?

A: Yes. I compared default service and shopping termination data for residential customers as a whole and it shows alarming information. Table 7, below, shows

termination rates for shopping customers are 4-5 times higher than the termination rate for all residential customers combined, and as much as 10 times higher than rates for default service customers.

Q: Based on your review of all this data, what do you conclude?

A: The retail market for residential customers produces significant and material adverse outcomes, the harms of which are particularly problematic for low income customers. These markets have produced rates and bills for FE PA's customers that are hundreds of millions of dollars higher than the rates and bills that these same customers would have received if they remained on default service. The impact of these higher rates and bills is felt by all customers through higher arrearages, higher rates of utility termination, and ever-increasing costs. This impact also affects other customers whether they are shopping or not by virtue of increased uncollectible expenses. The evidence paints a clear picture of the need for significant structural reform in the retail markets at a systemic level, as well as the adoption of the changes proposed by FE PA in this proceeding.

V. FE PA's Proposed Retail Market Reforms and Protections

Q: Please summarize the retail market reforms and protections that FE PA has proposed in this proceeding.

A: As discussed in the beginning of my testimony, FE PA has made several proposals to address necessary retail market reforms and waning participation in the Customer Referral Program. Specifically, FE PA proposes:

- To discontinue this program effective at the end of the current default service place on May 31, 2027.[50]

- To require EGSs enrolling customers on fixed term contracts after June 1, 2027, to return these customers to default service at the end of the contract unless the customer affirmatively choses to remain with the EGS in response to notices sent by the EGS as required by the Commission's regulations.[51] To facilitate this change, FE PA seeks a waiver of the Commission's; existing regulations at 52 Pa Code § 54.10(3).[52]

- To require EGSs offering variable rate contracts after June 1, 2027, to provide an attestation of affirmative consent to remain in the variable rate contract on a quarterly basis.[53]

- To modify its Purchase of Receivables (POR) Program to require all EGSs who wish to use the POR to offer rate ready billing and charge a rate that is at or below the FE PA PTC at the time of the customer's enrollment or rate change transaction.[54]

I support all these changes for the reasons I outline more fully below – and consistent with the overwhelming data outlined above.

[52] Id., ¶ 52.
[53] Id., ¶ 51.
[54] Id., ¶ 55.

A. Customer Referral Program

Q: Please summarize FE PA's proposed Customer Referral Program (CRP).

A: The CRP offers residential consumers a 12-month fixed price contract at 7% off the applicable default service price at the time they enter the program.[55] A CRP participant may leave the program without incurring any financial penalty at any time during the 12-month contract period.[56] At the end of the 12-month period, if a consumer does not actively select a new supplier, or affirmatively request to return to default service, the supplier may charge a new rate - subject to the written disclosure requirements in the Commission's regulations.

Q: What is the purpose of the CRP and how long has it been in place?

A: FE PA's CRP came out of the Commission's 2011 Retail Market Investigation.[57] At the time, the concept of a utility-administered referral program was seen as a "viable means to educate consumers about the retail electric market [that] may allow customers to achieve savings on their bills."[58] In short, the program was broadly intended to provide consumers with an easy, low-risk on-ramp to the competitive market that would teach consumers how to effectively engage in the market to achieve the promise of savings envisioned by the Choice Act.[59]

[59] Id. at 44; 66 Pa. C.S. § 2802.

Q: Why is FE PA proposing to discontinue the CRP?

A: Under the settlement of its last DSP, FE PA's existing CRP will terminate on May 31, 2027, and FE PA agreed to address whether a new CRP should be implemented in this proceeding after consultation with stakeholders. FE PA convened a collaborative on October 30, 2025, that was attended by representatives from the Office of Consumer Advocate, CAUSE-PA, Penn State University, Industrial customers, and the Retail Energy Supply Association.[60] I attended that meeting on behalf of CAUSE-PA and recommended, based on the data provided that FE PA not propose a new CRP in this proceeding. According to FE PA, no other party to that collaborative provided feedback to FE PA about the merits of the CRP and specifically, "none of the parties that attended the CRP collaborative requested that FE PA include a successor CRP in [this DSP]."[61] Through testimony, FE PA witness De La Rosa indicates that supplier participation in the CRP is waning considerably and interest in the program from eligible customers is very low.[62] In fact, based on the data provided in discovery, as of March 2026, only 1 supplier is currently signed up to accept CRP enrollees.[63]

Q: Do you support the CRP being discontinued?

A: Yes. We have had competitive electric markets for decades and Commission has spent considerable time, energy, and money on education, marketing, and providing information to consumers. There is a robust statewide website – papoweswitch.com – that is run by the PUC and provides a clear and concise means for customers to compare offers and to shop for retail electric service if they wish to do so. There is simply no reason

[60] FE PA Response to OCA 1-24, Attached hereto at Appendix B.
[61] FE PA Statement No. 4 at 11:12-12:2.
[62] Id. at 11.
[63] FE PA Response to OCA 1-25, Attachment A, Attached hereto at Appendix B.

the CRP should continue given both the lack of supplier interest and the overall adverse outcomes for residential consumers in the retail markets. Furthermore, in my view, it is not the role of FE PA, as the incumbent default service provider, to serve as the direct conduit for consumers to access the retail market. Particularly when this market has resulted in materially adverse harm to consumers.

Q: Have other EDCs discontinued their CRPs recently?

A: Yes. In their recent default service plans both PPL and Duquesne Light agreed in settlements that were approved by the PUC to discontinue their customer referral programs and as of June 1, 2025, neither company operates a CRP.[64]

Q: What do you conclude?

A: I support FE PA's decision to allow the CRP to end at the end of its current default service plan.

B. Proposed Changes to Retail Supplier Tariff

Q: Please summarize FE PA's proposed changes to its retail supplier tariff.

A: FE PA proposes two significant changes to its supplier tariff that are meant to ensure that customers continue to have access to the retail market, while also ensuring that customers are not incurring costs that are significantly more than the default service rate without their affirmative consent. First, FE PA proposes to change the process at the end-of-contract for fixed term contracts. Specifically, FE PA proposes that EGSs who enroll customers on fixed term contracts after June 1, 2027, will be required to return

[64] See Petition of PPL Electric Utilities Corporation for Approval of a Default Service Program and Procurement Plan for the Period from June 1, 2025 through May 31, 2029, Docket No. P-2024-3047290, Final Order dated November 7, 2024; See Petition of Duquesne Light Company for Approval of its Default Service Plan for the Period from June 1, 2025 through May 31, 2029, Docket No. P-2024-3048592, Final Order dated January 14, 2025.

these customers to default service at the end of the contract unless the customer affirmatively choses to remain with the EGS in response to notices sent by the EGS as required by the Commission's regulations.[65] To facilitate this change, FE PA seeks a waiver of the Commission's existing regulations at 52 Pa Code § 54.10(3).[66] Second, FE PA proposes that, for customers on variable rate contracts after June 1, 2027, the EGS will have to submit an attestation quarterly to FE PA attesting that the customer has affirmatively elected to remain on the variable rate contract.[67]

Q: Why is the Company making this proposal?

A: The Company is making these proposals because it is concerned about the number of customers who are paying rates that are higher than the price to compare.[68] Specifically, according to its analysis of the 84 EGSs who served residential customers in 2025, 68 of them served customers at rates above the PTC, costing consumers nearly $82 million more in net generation charges.[69] In addition, FE PA asserts that in 2025, they experienced an approximately 50% increase in formal and informal customer complaints related to competition issues in 2025 as compared to 2024.[70]

Q: Why do you support FE PA's proposed changes?

A: I support the two proposals made by FE PA because they would ensure that customers continue to have direct retail access to the competitive market – which is a requirement of the current law – but ensures that they continue to be served by a competitive supplier only with their ongoing, affirmative consent. These changes also

[65] FE PA Statement No. 1 at 20-21.
[66] DSP VII Petition ¶ 52.
[67] DSP VII Petition ¶ 51; FE PA Statement No. 1 at 20.
[68] FE PA Statement No. 1 at 21.
[69] FE PA Statement No. 1 at 22:5, Table 6.
[70] Id. at 22:9-12.

protect other ratepayers from the consequence of these households' paying rates that are higher than the price to compare. The data is damning about the retail markets because it shows persistent, perniciously higher rates being charged to residential shopping customers, resulting in significantly adverse impacts – including rates of service termination that are as much as 10x higher than households served by default service.[71]

The proposals from FE PA will ensure that households served by the retail markets can make affirmative and intentional choices about what rates they want to pay, and that absent doing so, they are returned to the safe harbor of default service that is designed to be procured at least cost over time and that has no profit embedded in it for FE PA. Thus, I fully support FE PA's proposals as they relate to both end-of-term fixed term contract renewals requiring affirmative consent and the requirement that EGSs serving customers on variable rate contracts solicit the affirmative consent from customers quarterly to continue on the contract and attest the same to FE PA. Furthermore, I support FE PA's requested waiver of Section 54.10(3) of the Commission's supplier regulations. Such a waiver is in the public interest given the overwhelming and uncontroverted data in this proceeding showing $888 million in aggregate costs to consumers above the price to compare since 2017.

C. Proposed Changes to Purchase of Receivables Program

Q: Please explain FE PA's current Purchase of Receivables (POR) process.

A: Under its current POR, suppliers who participate in utility consolidated billing (UCB), agree to have FE PA purchase their receivables at face value without recourse to

[71] See supra, Table 5.

the EGS[72] regardless of whether FE PA is able to collect from customers or not.[73] This is a significant benefit to suppliers because it eliminates any risk that suppliers have of customers not paying their bills. The current POR program also eliminates any incentives for suppliers to charge prices that are affordable because non-payment by the customer does not matter to their bottom line. It allows EGSs the ability to eliminate any collection costs that normal businesses may incur. Of course, FE PA is also made whole over time for its uncollectible expense, as it includes an adjusted allowance for uncollectible expense in rates, which for generation charges – including those of suppliers – is recovered through the Company's Default Service Support (DSS) Rider on a non-bypasssable basis.[74] Thus, it is ultimately customers who are left holding the bag and paying these costs.

Q: Does FE PA have any current protections in place to mitigate the impact of high supplier charges flowing through the POR?

A: Yes. In its DSP VI, the Commission approved a clawback provision as a permanent element of its POR. This approved clawback provision assessed an administrative charge on suppliers that have both an average write off percentage more than 200% of the average write off percentage of the entire EGS population and have an average price over 150% of the Company's average PTC for a 12 month period.[75] Over the last 4 years, FE PA has assessed $2.9 million in clawback charges against suppliers.[76]

[72] The term without recourse means that once the receivables are purchased by FE PA, they are owned by FE PA and FE PA and its customers bear all of the risk of non-payment. The EGS bears no risk of non-payment.
[73] FE PA Statement No. 1 at 24.
[74] FE PA Statement No. 1 at 24:17-25:2.
[75] FE PA Statement No. 1 at 25.
[76] Id. at 26, Table 7.

Q: What changes does FE PA propose to its POR?

A: FE PA proposes applying new eligibility requirements for POR on a customer account level. Specifically, FE PA will only permit EGSs that use "rate-ready" billing to participate in POR and then only if the rates that they charge are at or below the PTC at the time of enrollment or at the time of pricing change.[77] EGSs that chose not to use rate ready billing or that wish to charge rates higher than the PTC at the time of enrollment or rate change, can still use UCB, but the EGS would only be paid if and when the customer pays FE PA. Any arrearages for generation charges would remain with the EGS.[78]

Q: Do you support the POR reforms proposed by FE PA?

A: Yes. These are significantly positive changes. Under current rules, because suppliers are paid upfront with no discount, they have very little incentive to moderate the prices that they charge customers. From the supplier's perspective it does not matter what they charge because FE PA will buy the receivables and must manage the collection process. As outlined Section IV of my testimony and shown in Table 5, above, suppliers have termination rates that are as much as 10x higher than customers on default service. Ensuring the suppliers are responsible for their own collections – outside of the utility termination process[79] – will have a mitigating effect on the prices suppliers can charge and expect to be repaid.

FE PA's process is a measured approach that allows suppliers to continue to participate in utility consolidated billing but places the collection risk for suppliers who are charging rates more than the PTC at the time of enrollment. This is a reasonable approach

[77] Id. at 21; 27.
[78] Id. at 28.
[79] See FE PA Response to CAUSE-PA 2-2(c) and (d), Attached hereto at Appendix B.

that protects consumers both from the risk of termination for excessive pricing and from uncollectible expenses that are higher than they otherwise would be.[80] FE PA's proposed changes should be adopted.

VI. Time of Use (TOU) Rates

Q: Please summarize FE PA's TOU Rate Proposal.

A: The Companies are proposing to continue to implement TOU rates that will differentiate pricing across three periods– on-peak (M-F, 3 p.m. to 7 p.m.), super off-peak (M-Su., 11 p.m. to 6 a.m.), and off-peak (all other times).[81] The on-peak period proposed by the Company is being reduced from the current on-peak period of 2pm-9m M-F.[82] These periods will remain the same year-round. As is currently the case, customers actively enrolled in FE PA's Customer Assistance Programs (CAPs) will not be eligible for TOU rates.[83]

Q: Do you agree with FE PA's decision to continue to exclude CAP customers from its proposed TOU rate?

A: Yes. TOU rates are designed to incentivize consumers to shift discretionary usage to off-peak hours – which inherently requires that participants have discretionary usage they can shift to off-peak hours. Time-varying pricing consumed on peak is costly for households with fixed or inflexible usage patterns that cannot shift their usage and FE PA's decision to reduce the number of hours that are on-peak will have the effect of increasing the price differential during that period.[84] Economically vulnerable households

[80] Id.
[81] DSP Petition at 44-45.
[82] FE PA Statement No. 1 at 11-12.
[83] Id. at 10.
[84] FE PA Statement No. 1 at 12, Table 3.

often have very little discretionary energy usage, such as washing machines, dish washers, and other large appliances, and are more likely to live in smaller homes with less efficient heating and cooling spaces, fewer electrical outlets, and fewer lights – all factors which make it difficult to shift load during peak periods.[85] Consumers who are home during the day or are reliant on electric-powered medical devices are often even less able to shift load to off-peak hours, as usage curtailment during peak hours can have an immediate and substantial impact on the health and safety of individuals in the home.[86]

Because time-varying pricing can disproportionately increase the cost of energy for Pennsylvania's most vulnerable consumers, they present a particularly inappropriate rate structure for customers enrolled in CAP. CAP provides low income, economically vulnerable households with an affordable bill based on the participant's household income. As discussed at length above, when the cost of energy for a CAP customers in FE PA's service territory exceeds the standard default service price, two things occur: (1) the CAP customer faces the risk of reaching their maximum CAP credits more quickly in a year which would then put them on undiscounted rates which they cannot afford; and (2) residential consumers who finance CAP through rates will pay more for the program, as the amount of credits applied to the CAP bill will increase to reach the target level of affordability. These outcomes contradict the explicit statutory purpose of CAP to provide an affordable rate to economically vulnerable households to ensure they can maintain service to their home, as well as the Commission's statutory obligation to ensure that

[85] See John T. Colgan et al., Guidance for Utilities Commissions on Time of Use Rates: A Shared Perspective from Consumer and Clean Energy Advocates, at 26-27, Equity and Distributional Bill Impacts (July 15, 2017), https://uspirg.org/sites/pirg/files/reports/TOU-Paper-7.17.17.pdf; see also Lee V. White & Nicole Sintov, Health and Financial Impacts of Demand-Side Response Measures Differ Across Sociodemographic Groups, Nature & Energy Vol. 5 (Jan. 2020).
[86] See id.

CAPs are cost-effective and appropriately funded.[87] For these reasons, I support FE PA's decision to exclude CAP customers from participation in TOU rates.

VII. Increase in Maximum CAP Credits

Q: Please describe this section of your testimony?

A: In this section of my testimony, I outline the reasons why FE PA should be required to increase its maximum CAP credits as a result of the significant and material increase in recent wholesale market prices, which have been primarily driven by the rapid increase of large data center loads interconnecting within the PJM Interconnection.

Q: Please briefly describe FE PA's CAP and the concept of maximum CAP credits.

A: As a regulated public utility subject to the requirements of the Public Utility Code, the Company is required to offer an integrated package of universal service programs designed to help low income, payment-troubled ratepayers maintain and afford essential utility services.[88] The universal service provisions of the Public Utility Code tie the affordability of electric service to a customer's ability to pay for that service. The Commission is responsible to ensure that the programs and services necessary to achieve affordability of electric service are appropriately funded and available in each electric distribution territory.[89] This includes CAPs.

Generally, CAPs provide a discounted bill based on a percentage of income for low-income ratepayers whose household income is at or below 150% FPL. The difference in cost between the customer's CAP rate and their full tariff residential rate is known as

[87] 66 Pa. C.S. § 2802(9), (10), 2803, 2804(9).
[88] See 66 Pa. C.S. §§ 2802(10), (17); 2804(9); 52 Pa. Code 54.71 et seq.
[89] 66 Pa. C.S. § 2804(9).

the CAP revenue shortfall or CAP credit. In aggregate, the CAP shortfall is currently collected from other residential customers through the universal service rider.

FE PA limits the amount of assistance provided each year to any one CAP customer by applying a maximum CAP credit limit.[90] These limits are expressed and calculated as a fixed dollar amount and are not automatically adjusted to account for changes in generation rates.[91] FE PA imposes tiered maximum CAP credit amounts based on a customer's heating source and income.[92] FE PA's maximum annual CAP credits are shown in the following Table:

Table 6 – FE PA Maximum Annual CAP Credits[93]

FPL	Electric Non-Heating	Electric Heating
0% to 50%	$2,345	$3,282
51% to 100%	$1,719	$2,449
101% to 150%	$1,355	$1,771

These annual credit limits are established at the time of enrollment for use through the December billing and then every 12-month period (January – December) thereafter.[94]

Q: What happens if a customer reaches their maximum CAP credit limit before the end of 12 months?

A: If a customer reaches their maximum CAP credit limit before the end of their December billing cycle in any year, the customer will remain in CAP but will no longer receive a discount until their January bill.[95] At the January billing, the subsidy amount will

[90] FE PA USECP 2024-2028 at 13-14.
[91] Note, FE PA does adjust these limits after distribution rate increases via an amendment to its 2024 USECP reflecting any increase to the PCAP subsidy credit limits by the same percentage of any distribution rate increase at the USECP dockets by or before the date of implementation of those increased subsidy limits. FE PA USECP 2024-2028 at 13.
[92] Id.
[93] Id.
[94] FE 2028-2028 USECP at 13.
[95] Id.

be reset to the full annual allotment for use in the new calendar year. If the customer did not exhaust the subsidy limit in the prior year, it will not be carried over to the next year.[96]

Q: Who pays for FE PA's CAP?

A: FE PA's CAP is funded through a Universal Service Charge (USC) rider, which is charged only to residential ratepayers.[97]

Q: Do you have concerns about FE PA's maximum CAP credit limits?

A: Yes. I am concerned that customers who reach their maximum CAP credits are paying categorically unaffordable bills until the end of their twelve-month period when their CAP credit limit is reset. Furthermore, I am concerned that recent increases in FE PA's default service price due to wholesale generation, capacity, and transmission cost increase, without a corresponding increase to FE PA's maximum CAP credits, will increase the number of CAP customers exceeding their maximum CAP credit limits in a given program year, leading to increased termination of CAP customers. FE PAs maximum annual CAP credit limits are already inadequate to meet the need for assistance at existing rates, undermining the effectiveness of CAP at reducing energy insecurity and improving bill coverage and payment frequency.

Q: How many CAP customers currently exceed their maximum CAP credit limits?

A: A significant number. The following table shows the number of CAP participants who exceeded their CAP credit limit thresholds in calendar year 2025, compared to the average number of CAP participants:

[96] Id.
[97] 2024 Universal Service Report at 89.

Table 7: FE CAP Customers Exceeding Maximum CAP Credit Limits in 2025

Rate District	Number of CAP Participants Exceeding Max. CAP Limit[98]	Average Number of CAP Participants[99]	Percent of CAP Participants Exceeding Max. CAP Limit
MetEd	4,065	21,586	19%
Penelec	4,869	28,053	17%
PennPower	1,139	6,413	18%
WestPenn	3,967	24,592	16%
Total	**14,040**	**80,644**	**17.4%**

Q: Does that data that you have from 2026 show an even more concerning trend?

A: Yes. Based on the information provided for January through March 2026, 2,412 customers have exhausted their maximum CAP credits after only three months of this year.[100] As I outline below, the customer group most impacted by the current limits are heating customers. Given the extraordinarily cold winter that we had in early 2026 and into this spring it is not surprising that more customers are exhausting their CAP credits significantly earlier this year than last.

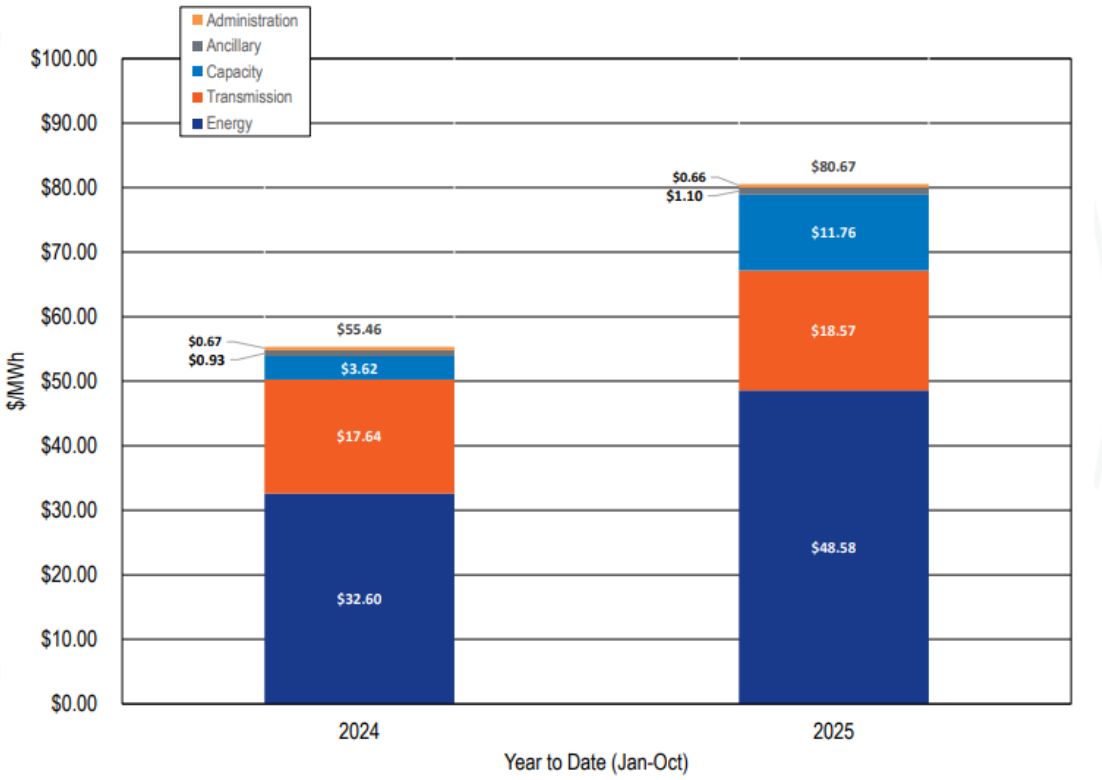
[98] FE PA Response to CAUSE-PA 2-6, Attachment A, Attached hereto at Appendix B.
[99] FE PA Response to CAUSE-PA 2-4, Attachment A, Attached hereto at Appendix B. Average of CAP Participants for 2025.
[100] FE PA Response to CAUSE-PA 2-6, Attachment A, Attached hereto at Appendix B. Sum of January-March 2026 for all rate districts.

Q: In addition to the number of CAP customers reaching their total maximum CAP credits, do a significant number of customers reach thresholds of 50% and 80% of those credits?

A: Yes. In 2025, across all rates districts, 47,809 CAP customers reached 50% of their maximums and 24,783 reached 80%.[101] These numbers are also trending higher through March 2026 based on the available data.[102]

Q: When were FE PA's CAP credit maximums last established?

A: FE PA proposed these limits in January 2025 through an amendment to its USECP[103] After a series of subsequent revisions, the Commission approved this filing via Secretarial Letter dated May 22, 2025.[104]



Q: What has happened since early January 2025 that should cause the Commission to require FE PA to increase these limits?

A: Wholesale electricity prices increased significantly in 2025 because of exponential load growth within the PJM[105] service territory driven almost entirely by data center development. In its analysis of the past two capacity auctions held at PJM – for the 2025/2026 delivery year and for the 2026/2027 delivery year – the PJM Independent Market Monitor found that the total of these two auctions resulted in more than $30.8 billion in capacity payments to existing generators of which more than $16.6 million or

Available at: https://www.puc.pa.gov/pcdocs/1861634.pdf
[104] FirstEnergy PA Joint Proposed Universal Service and Energy Conservation Plan for 2024-2028, Docket Nos. M-2022-3036532, M-2022-3036533, M-2022-3036534, M-2022-3036535, Secretarial Letter dated May 22, 2025. Available at: https://www.puc.pa.gov/pcdocs/1880206.pdf.
[105] PJM is a regional transmission organization (RTO) that coordinates the movement of wholesale electricity in all or parts of 13 states and the District of Columbia.

54% were the direct result of actual and projected data center load.[106] These high capacity payments were not felt in isolation as we are also facing steep increase in the costs of transmission and energy costs, shown by Chart 5 below prepared by PJM's Independent Market Monitor.

Chart 5: Total Wholesale Cost of Power ($/MWh)[107]

These high wholesale prices drove a statewide spike in default service prices in June 2025 and again in December 2025, including within FE PA's service territory, and are

[106] See "Analysis of the 2025/2026 RPM Base Residual Auction - Part G Revised," (June 3, 2025), available at: https://www.monitoringanalytics.com/reports/Reports/2025/IMM_Analysis_of_the_20252026 (last visited Dec. 5, 2025) and "Analysis of the 2026/2027 RPM Base Residual Auction - Part A," ("Part A") (October 1, 2025), available at: https://www.monitoringanalytics.com/reports/Reports/2025/IMM_Analysis_of_the_20262027_RPM_Base_Residual_Auction_Part_A_20251001.pdf. (last visited Dec. 5, 2025)

[107] See Monitoring Analytics, Market Monitor Report, to PJM Members Committee dated November 20, 2025 at 3. Available at: https://www.pjm.com/-/media/DotCom/committees-groups/committees/mc/2025/20251120/20251120-item-03---market-monitoring-report---presentation.pdf.

projected to continue into the foreseeable future. In fact, for the average FE PA customer on default service, their average annual bill is projected to increase significantly when the projected June 2026 PTC rates go into effect. This is because rates went up by between 18% - 27% since December 2024:

Table 8: Impact of Price to Compare Increase

	PTC 12/1/2024	Projected PTC 6/1/2026	Difference ($)	Difference (%)
Met Ed	$0.11011	$0.1359	$0.02940	27%
Penelec	$0.10474	$0.1314	$0.02668	25%
Penn Power	$0.11168	$ 0.1314	$0.01974	18%
West Penn	$0.09481	$0.12075	$0.02594	27%

The impact of these steep increases in default service rates is felt in two discrete ways: (1) directly by CAP customers because it erodes the effectiveness of their annual maximum CAP credits as discussed above, and (2) in the cost that is paid for under the USR based on the difference between what a CAP customer pays under their applicable percentage of income payment and the full tariff bill.

Q: Have you calculated what these increases will mean for the average CAP customer?

A: Yes. Based on my analysis, the group of customers I am most concerned about are electric heating customers. While costs have risen for all customers, the impact for heating customers is most severe. In short, the maximum CAP credit threshold for electric heating customers is simply insufficient to meet the exponential increase in generation rates. For example, using 2000 kWh per month as a proxy for electric heating,[108] Table 9

[108] This is based on the Commission's Rate Comparison Reports which can be found here: https://www.puc.pa.gov/filing-resources/reports/rate-comparison-reports/

(below) demonstrates that the maximum CAP credits are not enough for a CAP customer at average income, except in the West Penn Rate District.[109] This insufficiency is compounded by the substantial increase in the PTC for all rate districts, as discussed above.

Table 9: CAP Shortfall amounts for Average CAP Household who heats with electricity

Annual Bill at 2000 kWh (Heating)						
	Annual Bill @ Dec 2024	CAP Customer Responsibility	Annual CAP Shortfall	**Maximum CAP Credits 51-100% (Heating)**	**CAP Credit Deficiency ($)**	**CAP Credit Deficiency (%)**
MetEd	$4,278	$1,603	$2,675	$2,449	($226.02)	-9%
Penelec	$4,792	$1,603	$3,189	$2,449	($739.50)	-30%
PennPower	$4,388	$1,603	$2,784	$2,449	($335.46)	-14%
West Penn	$3,726	$1,603	$2,123	$2,449	$326.46	13%
	Annual Bill @ June 2026	CAP Customer PIP Responsibility	Annual CAP Shortfall	**Maximum CAP Credits 51-100% (Heating)**	**CAP Credit Deficiency ($)**	**CAP Credit Deficiency (%)**
MetEd	$4,984	$1,603	$3,381	$2,449	($932)	-38%
Penelec	$5,432	$1,603	$3,829	$2,449	($1,380)	-56%
PennPower	$4,861	$1,603	$3,258	$2,449	($809)	-33%
West Penn	$4,348	$1,603	$2,745	$2,449	($296)	-12%

[109] Per the Commission's 2024 Universal Service Report, the average income for an electric utility's CAP household was $16,031 per year and the average household size was 2 persons. This places the household approximately 76% of the FPL, which would place this household within the 51-100% FPL CAP tier. 2024 Universal Service Report at 48, 51.

Q: Based on the information you have reviewed and analyzed, do you have recommendations to address the insufficiency of FE PA's maximum CAP credit limits?

A: Yes. I recommend that FE PA increase its maximum CAP credit limits for heating customers by 60% for each tier. The increase must be enough to address the demonstrated insufficiency of the current limits relative to FE PA's current and proposed generation rates at the PTC. In addition, FE PA should be required to regularly update its CAP credit limits commensurate with any future increase in default service and base rates. That is, FE PA should be required to ensure its CAP credit threshold is adequate to provide an affordable rate on a total bill basis, for all the components of its bills. Based on the above recommendation, I propose the following as new maximum CAP credits that should be put into place effective January 1, 2027.

Table 10: Recommended maximum CAP credit as of January 1, 2027

FPL	Electric Non-Heating	Electric Heating
0% to 50%	$2,345	$5,251
51% to 100%	$1,719	$3,918
101% to 150%	$1,355	$2,834

VIII. Conclusion

Q: Does this conclude your direct testimony?

A: Yes. Though I reserve the right to respond to issues raised by other parties in the context of Rebuttal and Surrebuttal and/or to amend my testimony if additional information becomes available through discovery.

PROFESSIONAL EXPERIENCE

PENNSYLVANIA UTILITY LAW PROJECT HARRISBURG, PENNSYLVANIA
Of Counsel, February 2025 - Present
Executive Director, July 2015 - January 2020
Co-Director, January 2013 - June 2015
Staff Attorney, January 2011 - December 2012

The Pennsylvania Utility Law Project (PULP) is a specialized legal aid office and member of the Pennsylvania Legal Aid Network. PULP's mission is to promote policies that enable consumers with low and moderate income to receive and maintain affordable utility and energy services and to live in energy-efficient homes.

As Of Counsel, in cases where I am not serving as an attorney, I provide analysis and testimony for PULP's clients in administrative proceedings before relevant state and federal agencies.

When I am not serving as a policy or technical expert, I lead the legal and policy work of the office and provide high-level legal expertise and strategic guidance to the organization. I seek to ensure that PULP's legal and policy advocacy and strategies are designed to effectively and zealously represent the interests of PULP's clients before administrative, judicial, and legislative bodies.

PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE HARRISBURG, PENNSYLVANIA
Consumer Advocate, December 2021 – January 2025
(*Confirmed by the Pennsylvania Senate June 7, 2022*)

The Office of Consumer Advocate (OCA) is a state agency that represents the interests of Pennsylvania utility consumers before the Pennsylvania Public Utility Commission (PUC), federal regulatory agencies, and state and federal courts. The OCA was created by the Pennsylvania General Assembly in 1976 and is an independent office within the Office of Attorney General. As Consumer Advocate, I served as the head of the office and directed all policy and legal advocacy.

PENNSYLVANIA LEGAL AID NETWORK, INC. HARRISBURG, PENNSYLVANIA
Executive Director, January 2020 – December 2021

The Pennsylvania Legal Aid Network, Inc. (PLAN, Inc.) is a client-centered organization that provides leadership, funding, training, and support to a coordinated network of independent legal aid organizations that deliver civil legal aid to low-income Pennsylvanians and victims of domestic violence. As Executive Director, I provided strategic leadership and direction to PLAN Inc.'s activities and oversaw its advocacy, fundraising, and management.

PROFESSIONAL EXPERIENCE – CONT.

HONORABLE SYLVIA H. RAMBO, DISTRICT JUDGE HARRISBURG, PENNSYLVANIA
THE UNITED STATES DISTRICT COURT FOR THE MIDDLE DISTRICT OF PENNSYLVANIA
Senior Judicial Law Clerk, May 2009 - December 2010
Judicial Law Clerk, August 2002 - August 2004

Analyzed federal and state law on civil and criminal motions in all phases of litigation. Drafted judicial opinions in response to civil and criminal motions, including motions to suppress, motions to dismiss, summary judgment, post-trial motions, and habeas corpus petitions. Drafted comments that were given by Judge Rambo at public speaking events and supervised her law clerks and judicial interns.

MIDPENN LEGAL SERVICES HARRISBURG, PENNSYLVANIA
Managing Attorney, January 2009 - April 2009
Staff Attorney, September 2004 - December 2008

MidPenn Legal Services (MidPenn) is a non-profit organization providing legal services to low-income individuals and families, the disabled, the elderly, children, and survivors of domestic violence. I led MidPenn's Consumer Unit where I focused on litigating consumer and housing cases related to anti-predatory mortgage lending and consumer bankruptcy and defended clients against unscrupulous debt collection practices.

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	**:**	**Docket No. P-2026-3060298**

CAUSE-PA Set 1, No. 002

In a live Excel spreadsheet, for each division (MetEd, Penelec, Penn Power, and West Penn Power), please provide the total usage (kWh) from January 2022 to date for the following subgroups, disaggregated by month and by year:

a. All residential customers.
b. Residential shopping customers.
c. Residential default service customers.
d. All confirmed low income customers.
e. Confirmed low income shopping customers.
f. Confirmed low income default service customers.
g. All confirmed low income customers not enrolled in CAP.
h. Confirmed low income shopping customers not enrolled in CAP.
i. Confirmed low income default service customers not enrolled in CAP.
j. All CAP participants.
k. Shopping CAP participants.
l. Default service CAP participants.

RESPONSE:

See FE PA Second Revised Response to CAUSE-PA Set 1, No. 002, Attachment A.

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	**:**	**Docket No. P-2026-3060298**

CAUSE-PA Set 1, No. 003

In a live Excel spreadsheet, for each division (MetEd, Penelec, Penn Power, and West Penn Power), please provide the total amount billed for generation supply charges from January 2022 to date for the following subgroups, disaggregated by month and by year:

a. All residential customers.
b. Residential shopping customers.
c. Residential default service customers.
d. All confirmed low income customers.
e. Confirmed low income shopping customers.
f. Confirmed low income default service customers.
g. All confirmed low income customers not enrolled in CAP.
h. Confirmed low income shopping customers not enrolled in CAP.
i. Confirmed low income default service customers not enrolled in CAP.
j. All CAP participants, before CAP credit applied.
k. Shopping CAP participants, before CAP credit applied.
l. Default service CAP participants, before CAP credit applied.
m. All CAP participants, after CAP credit applied.
n. Shopping CAP participants, after CAP credit applied.
o. Default service CAP participants, after CAP credit applied.

RESPONSE:

See FE PA Second Revised Response to CAUSE-PA Interrogatory Set 1, No. 3, Attachment A.

Petition of FirstEnergy Pennsylvania	**:**	
Electric Company for Approval of a	**:**	**Docket No. P-2026-3060298**
Default Service Plan for the Period	**:**	
June 1, 2027 to May 31, 2031	**:**	

CAUSE-PA Set 1, No. 005

Please explain how FirstEnergy defines the term "confirmed low income customers" and identify the criteria to be considered a confirmed low income customer.

RESPONSE:

FirstEnergy Pennsylvania Electric Company ("FE PA") defines "confirmed low-income customers" as customers whose household income is at or below 150% of the Federal poverty guidelines. FE PA determines "confirmed low-income" status based on customer self-reported income, Pennsylvania Department of Human Services data regarding customer income levels collected through the Low-Income Home Energy Assistance ("LIHEAP") grant process, or income documents verified through FE PA's Pennsylvania Customer Assistance Program ("PCAP") enrollment process.

FE PA captures income information when a customer enrolls in PCAP or LIHEAP or when a customer enters into a payment arrangement. The receipt of LIHEAP funds or PCAP enrollment is considered "confirmed" income. Income captured for a payment arrangement is provided verbally and is not considered "confirmed" income. The confirmed low-income designation is maintained on an account while the customer is enrolled in PCAP or for a minimum of two years.

Petition of FirstEnergy Pennsylvania	**:**	
Electric Company for Approval of a	**:**	**Docket No. P-2026-3060298**
Default Service Plan for the Period	**:**	
June 1, 2027 to May 31, 2031	**:**	

CAUSE-PA Set 1, No. 009

From January 2022 to date, disaggregated by year and division (MetEd, Penelec, Penn Power, and West Penn Power), please provide the number of customers in each of the following subgroups whose service was terminated for nonpayment:

a. All residential customers.
b. Residential shopping customers.
c. Residential default service customers.
d. All confirmed low income customers.
e. Confirmed low income shopping customers.
f. Confirmed low income default service customers.
g. All confirmed low income customers not enrolled in CAP.
h. Confirmed low income shopping customers not enrolled in CAP.
i. Confirmed low income default service customers not enrolled in CAP.
j. All CAP participants.
k. Shopping CAP participants.
l. Default service CAP participants

RESPONSE:

See FE PA Revised Response to CAUSE-PA Interrogatory Set 1, No. 009, Attachment A.

CAUSE-PA Set 2, No. 2

Refer to FE Statement No. 1 at 27. Please respond to the following questions:

(a) Under the Company's new proposal requiring electric generation suppliers who wish to participate in the Purchase of Receivables (POR) program to charge at or below the price to compare, please confirm that electric generation suppliers can still participate in Utility Consolidated Billing (UCB) but not POR and charge more than the price to compare.

(b) If the answer to part (a) is yes, can the supplier elect to use either rate ready or bill ready billing and charge more than the price to compare?

(c) If the answer to part (a) is yes, please confirm that the participating EGS who charge more than the price to compare will be responsible for its own collection of unpaid bills.

(d) If the answer to part (a) is yes, please explain whether any unpaid supplier charges will result in termination of service by FirstEnergy.

(e) For charges billed by an EGS on an FE bill but that is not a part of POR, will FE bill for any late payment charges or interest that is assessed by a supplier pursuant to the contract between an EGS and the customer?

(e) For customers served by a supplier who uses UCB but not POR, please provide all documentation about FE PA's allocation of partial payments and describe how a partial payment will be applied to a customer's bill under the following scenarios:

(i) Month 1: Customer has a $0 balance at the beginning of the billing period and has charges of $100 total consisting of $40 is distribution charges and $60 in supply charges. Customer pays $50. How will that $50 be applied? Will any portion of the remaining unpaid charges be distribution charges?

(ii) Month 2. Customer has $50 balance from prior month and has charges of $100 total consisting of $40 in distribution charges and $60 in supply charges for a total bill of $150. How much of that $150 will consist of distribution charges and how much will be supply charges?

RESPONSE:

a) Yes, electric generation suppliers ("EGSs") can participate in Utility Consolidated Billing ("UCB") using both Rate Ready and Bill Ready products; however, FE PA would only purchase the receivables of those customers enrolled in Rate Ready at a price equal to or below the price to compare ("PTC") at the time of enrollment or EGS price change.
b) Yes, suppliers can participate in UCB using a rate ready rate greater than the PTC or using bill ready billing without purchase of receivables ("POR").
c) Confirmed.
d) Unpaid EGS charges that are not purchased by FE PA will not cause a residential customer to be disconnected. Unpaid EGS charges may lead to termination when the receivable is purchased by FE PA.
e) FE PA would not assess late payment charges or interest on EGS charges; however, EGSs using Bill Ready billing do have the opportunity to include late payment fees, interest, or both depending on the EGS's contract with the customer. FE PA does not review EGS charges assessed through Bill Ready.
f) i) Refer to the table of residential payment posting rules below. No portion of unpaid charges in II-2(f)(i) will be distribution charges. All $40 in distribution charges will be settled during step 11 in the Met-Ed, Penelec, and Penn Power rate districts and during step 12 in the West Penn rate district, leaving $10 to be settled during step 12 in the Met-Ed, Penelec, and Penn Power rate districts and during step 13 in West Penn rate district. A $50 balance would remain.

   ii) In each of the four FE PA Rate Districts, the $150 balance due depicted in II-2(f)(ii) will consist of $40 in distribution charges and $110 EGS charges. EGS charges will consist of $50 of arrears and $60 of current charges.

The Residential Payment Posting rules for each FE PA Rate District are:

CAUSE-PA Set 2, No. 7

From July 1, 2023, to date, disaggregated by month and year, as of the last day of the month/ year, please indicate how many CAP customers reached the following percentage levels of the maximum CAP credit limits in that month:

a. 90%;
b. 80%.

Please provide this data in a live Excel spreadsheet.

RESPONSE:

See FE PA Response to CAUSE-PA Interrogatory Set 2, No. 7, Attachment A.

a. The Company has not tracked the number of customers reaching the 90% percentage level of the annual credit limit.

b. The Company tracks the percentage levels aligned with the required notifications that subsidy is being exhausted at 50% and 80% of the available credit limits, rather than 80% and 90%. This process began following the new PCAP program implementation in December 2024. Data does not exist prior to January 2025. See table below for customers reaching the 50% and 80% percentage levels of the annual credit limits.

PREPARED REBUTTAL TESTIMONY OF PATRICK M. CICERO

I. INTRODUCTION

Q: Please state your name, occupation, and business address?

A: My name is Patrick M. Cicero. In my role as Of Counsel at the Pennsylvania Utility Law Project (PULP), I have a broad range of responsibilities to PULP and its clients. This includes providing analysis and testimony on utility matters for clients who are represented by members of the statewide legal aid network, including clients of PULP and other legal aid offices. PULP's business address is 118 Locust Street, Harrisburg, PA 17101. I also maintain an office at my home.

Q: Did you submit direct testimony in this proceeding?

A: Yes. My direct testimony was premarked as CAUSE-PA Statement 1 and was accompanied by CAUSE-PA Exhibits 1 through 3 and Appendices A and B.

Q: Has your direct testimony, or the analysis and recommendations contained therein, changed based on the direct testimony of other parties in this case?

A: No.

Q: Please state the purpose of your rebuttal testimony.

A: The purpose of my rebuttal testimony is to respond to certain arguments raised in the direct testimony of Frank Lacey on behalf of the Retail Energy Supply Association[1] (RESA) and Randal Miller on behalf of Town Square Energy East, LLC (TSE).[2] I address their sweeping criticisms of Pennsylvania's statutory default service structure as well as

[1] RESA St.1
[2] TSE St. 1.

FE PA's proposed changes to retail market procedures and enhancement programs, including its proposed modifications to the Purchase of Receivables (POR) program, changes to end-of-term customer treatment, quarterly affirmations for variable-rate contracts, and discontinuance of the Customer Referral Program (CRP).

My rebuttal testimony is not intended to address every issue raised by other parties' witnesses in rebuttal testimony. Absence of a response to any specific recommendation or position of any witness does not indicate my agreement. Unless required for context in providing a further response to the rebuttal testimony of Mr. Lacey and Mr. Miller, I will not reiterate the extensive arguments and evidence that I provided in my direct testimony. To the extent an argument raised by any party in rebuttal testimony is already sufficiently addressed in my direct testimony, I do not intend to respond, and stand on the evaluation, analysis, and recommendations contained in my direct testimony.

Q: Are you sponsoring any exhibits accompanying your rebuttal testimony?

A: Yes. I am sponsoring CAUSE-PA Exhibit 1-R and CAUSE-PA Exhibit 2-R, which is marked HIGHLY CONFIDENTIAL and will only be distributed in accordance with the Protective Order issued in this case. These exhibits are attached to my rebuttal testimony, and I will discuss further below.

Q: Please summarize your rebuttal testimony.

A: I will first respond to the broad assertions of Mr. Lacey and Mr. Miller that FE PA's proposed changes to its residential retail market engagement and enhancement programs will reduce retail choice and are inconsistent with Pennsylvania's competitive market framework.[3] In advancing their positions, these supplier witnesses attack the

[3] TSE St. 1 at 8-12; RESA St. 1 at 8-13.

statutory foundation of default service in Pennsylvania, arguing that default service is not an appropriate comparison price to assess offers for electricity – despite the fact that default service has been known as the Price to Compare (PTC) for nearly two decades,[4] and is the basis for comparison that has long been used by the Public Utility Commission and consumers to weigh shopping offers against default service and each other. I note here that Mr. Lacey and Mr. Miller, non-lawyers, make various legal claims regarding default service and Commission precedent that counsel for CAUSE-PA will address through briefing.

After addressing their broad assertions regarding the competitive market, my rebuttal testimony responds to the arguments of Mr. Lacey and Mr. Miller that FE PA should retain the failed market policies and programs that have caused significant financial harm to customers and enriched suppliers, including the POR and CRP. As shown in my direct testimony and reiterated here, each of these policies has proven to be financially disastrous for FE PA's residential and low income customers. Collectively, Mr. Lacey and Mr. Miller urge the Commission to "disregard" substantial evidence and offer nothing more than insubstantial and unsubstantiated arguments in return. The substantial evidence of harm demonstrate that the existing retail market policies and programs that FE PA seeks to address in this case have created conditions that have allowed suppliers to charge excessive charges to residential and low income customers.[5] These supplier witnesses argue without evidence that excessive charges in the competitive market are by choice – and are not linked to greater payment trouble, increased termination, and

[4] TSE St. 1 at 14-15; RESA St. 1 at 31, 55-56.
[5] RESA St. 1 at 55; TSE St. 1 at 13-16.

higher uncollectible expenses.[6] At the same time, Mr. Lacey and Mr. Miller argue against FE PA's proposal to require affirmative consent from consumers to remain with a supplier at the end of a contract term or, in the case of variable rates, on a quarterly basis. As I will explain, Mr. Lacey and Mr. Miller's objections to obtaining affirmative consent belies their own arguments that consumers are choosing to pay more for their electricity service.

The unfortunate reality is that a substantial number of residential and low income ratepayers have been charged considerably more to be served by an Electric Generation Supplier (EGS) than they otherwise would have been charged on default service. Despite Mr. Lacy and Mr. Miller's contentions to the contrary, this problem is not caused by the continued existence of default service in its present form, as required by statute, but by the prices charged by suppliers themselves. FE PA's proposals offer measured consumer protections that are responsive to identified and prolonged harm to residential consumers and will protect and strengthen authentic customer choice by requiring suppliers to obtain affirmative consent *before* charging consumers a new price. This honors a customer's decision while at the same time shielding other ratepayers from excessive uncollectible expenses.[7] All of FE PA's proposals should be approved to prevent further harm caused by excessive competitive market prices.

[6] RESA St. 1 at 53-56; TSE St. 1 at 14-16.
[7] CAUSE-PA Exhibit 1-R.

II. RESIDENTIAL SHOPPING DATA CLEARLY DEMONSTRATES HARM

Q: Mr. Lacey and Mr. Miller criticize FE PA's analysis of shopping prices and its affordability concerns, arguing that the PTC is not an appropriate benchmark for evaluating shopping outcomes.[8] How do you respond?

A: Mr. Lacey and Mr. Miller's arguments are not surprising, as this is a common refrain from suppliers. To read Mr. Lacey and Mr. Miller's testimony, there is no objective benchmark to compare prices, and the point of retail competition is simply choice itself as opposed to promoting a structure that was intended to lower retails costs for consumers. Counsel for CAUSE-PA will fully brief the legal arguments in this case, but it bears mentioning at the outset that our General Assembly restructured our electricity system to provide the benefit of lower prices for utility consumers.[9] Lower prices, rather than abstract notions of choice, was the goal. The arguments advanced by Mr. Lacey and Mr. Miller are merely policy preferences on their part and ultimately unpersuasive when considered against the substantial factual record developed in this case.

The supplier witnesses attempt to discredit the significance of comparative pricing data – arguing that any comparison of supplier pricing to the applicable default service price represents a mere "point in time" comparison that is irrelevant and inconsequential in evaluating market rules.[10] That characterization is dead wrong. The analysis of residential retail shopping presented by FE PA witness David Young, and as further analyzed in my direct testimony, is **not** a snapshot of enrollment terms or a theoretical comparison between isolated products. The comparative shopping data produced to date

[8] RESA St. 1 at 11-12, 31; TSE St. 1 at 14-15.

in this proceeding provides a longitudinal review of actual customer billing outcomes each month for a 100-month period. It is 100 points in time in a row that all tell the same $888 million story: customers in aggregate pay significantly more to be served at rates charged by EGSs as opposed to what they would have been charged at the applicable default service rate.

In my direct testimony, I analyzed ***actual*** charges and ***actual*** usage for residential customers served by an EGS from August 2017 through December 2025. For each month, I compared the amounts the suppliers billed to residential shopping customers against the billed charges those same customers would have paid had they been charged the default service rate during that same month. In total, my analysis reflects the actual shopping experience of tens of thousands of customers over 100 successive monthly "points in time" – cataloguing the comparative charges in every month and every bill.

The fact is, there was not a single month, over a 100 month period across all four FE PA divisions and all of the various contracts with various suppliers, where residential and low income shopping customers as a whole achieved net savings in the competitive market.[11] In total, the 100 months of actual billing and usage data showed that residential shopping customers were charged on net and in the aggregate over $888 million more than the default service price, of this amount low income shopping customers were charged over $43 million more than the default service price.[12] Low income shopping customers had the worst outcomes, paying rates between 37-56% higher than the default service rate, compared to 31-42% for residential shopping customers.[13]

[11] CAUSE-PA St. 1, Exhibit 1(a)-(d).
[12] CAUSE-PA St. 1, Exhibit 1(a)-(d) and CAUSE-PA Exhibit 2 (a)-(d).
[13] CAUSE-PA St. 1 at 15-21; CAUSE-PA Exhibits 1, 2, & 3.

Q: Why do you believe that default service provides an appropriate benchmark for assessing outcomes in the competitive market?

A: The default service price, aptly known as the Price to Compare (PTC), provides consumers with an appropriately relevant benchmark that constitutes an all-in price for generation and transmission services, procured in a manner that is designed to produce rates that are "[t]he least cost to customers over time,"[14] allowing consumers to compare this "default" option with options available in the competitive market. The PTC does not detract from the ability of consumers to make decisions about the competitive market, it adds to it – allowing consumers to compare prices based on an objective benchmark that seeks to not always be the lowest price at any one point in time, but that is designed to be the least cost over time.

I do not dispute that offers in the competitive retail market may include other attributes – such as renewable energy or time varying rates – that consumers may find attractive, even at a higher price. The issue before the Commission in this case is not whether a particular customer may have preferred a non-price product attribute at the moment of enrollment – and, importantly, there are no proposals at issue in this case that would deprive a consumer of the opportunity to pay more if they so choose. The issue in this case is whether persistently higher prices in the competitive market are having a negative impact on consumers, and, if so, what can be done about that fact while ensuring consumers retain direct access to retail market.

[14] 66 Pa. C.S. § 2807 (e)(3.4)(ii).

Q: Mr. Lacey argues that FE PA's default service proposal to procure Network Integration Transmission Service (NITS) and DOE Section 202c charges should be disallowed for several reasons.[15] What is his first argument?

A: Mr. Lacey argues that by removing these charges as the responsibility of wholesale default service suppliers, and collecting them directly through the PTC as a reconcilable rider, FE PA will be guaranteeing default service customers pay the full costs of NITS charges under FE PA's proposal, rather than have these costs borne by wholesale suppliers.[16] He argues that the better approach would be for these charges to remain the responsibility of wholesale supplier because "this creates an equal playing field with EGSs that must do the same risk calculations when formulating their competitive supply products."[17]

Q: What is your response?

A: Mr. Lacey's argument misses the mark because EGS offers do not compete with wholesale suppliers offers, they compete with other suppliers – all of whom bear the NITS uncertainty risks that are associated with this issue – and with FE PA's administratively determined default service price that also accounts for the NITS uncertainly risk. Under FE PA's proposal, the NITS costs will be included in the PTC, which is what customers compare all EGS offers to, they do not compare them to the wholesale auction price of any given default service auction. Thus, his argument about parity between wholesale, fixed price contracts and retail contracts is inapposite. Regarding whether it would be better to have wholesale suppliers face the uncertainty of NITS charges and increase

[15] RESA St. 1 at 37-40, 44-47, 51-52.
[16] Id. at 37-39.
[17] Id. at 42:2-3.

their risk premium in their bid or have them be recovered by FE PA directly on a bypassable basis, FE PA's proposal is neither unreasonable nor unprecedented given that all other electric distribution companies in Pennsylvania take this same approach.

Q: What is Mr. Lacey's second argument on this issue?

A: Mr. Lacey takes issue with FE PA witness Powers characterization that FE PA's contracts are "fixed price full-requirements"[18] because "[o]mitting NITS from wholesale default service contracts necessarily means that they are not full-requirements contracts."[19] Aside from this pedantic and semantic assertion, Mr. Lacey asserts that the removal of NITS is "anti-competitive"[20] because it "creates a system that requires a higher price for the EGS to hedge the risk that default service suppliers are not providing."[21] Mr. Lacey asserts that this "fuels certain advocates' arguments . . . that suppliers are charging more than default service providers."[22] According to Mr. Lacey, there are only two fixes to his stated problem: (1) require FE PA to procure NITS for all customers (shopping and non-shopping) or (2) require wholesale suppliers to provide them in their wholesale bids.[23]

Q: What is your response to Mr. Lacey.

A: Mr. Lacey's contention that FE PA's proposal is anti-competitive is incorrect. As noted above, retail suppliers are not competing with wholesale suppliers, they are competing with each other and with the default service price to compare, which is a blend of wholesale contracts and other administrative costs – including in FE PA's proposal the NITS charges. Under FE PA's proposal, default service customers will pay NITS charges

[18] FE PA St. 3 at 4.
[19] RESA St. 1 at 43:10-11
[20] Id.
[21] Id. at 44:12-13
[22] Id. at 44:15-16.
[23] Id. at 44-45.

from FE PA that will be blended into the default service price along with the wholesale contract prices. There is nothing anti-competitive about this – both default service customers and those shopping will be paying these charges. In the case of default service customers, they will be embedded in the PTC at cost as procured by FE PA. In the case of shopping customers, they will be a part of the blended price that a supplier charges under its retail contract with the customer. What Mr. Lacey fails to appreciate is that the default service price *is the retail price* for customers on default service, which is akin to the *retail contract price* charges by suppliers.

Regarding Mr. Lacey's proposal to have FE PA procure NITS charges for shopping and non-shopping customers, I do not support that approach if supplier charges were collected in the PTC because it would have the effect of increasing the PTC for the supplier's charges in a manner that would artificially inflate the PTC. The only way it would be equitable for FE PA to do this is if FE PA assessed these charges on a non-bypassable basis outside of the PTC for both shopping and non-shopping customers such that they were neither embedded in the PTC nor the EGS contract.

Q: What is Mr. Lacey's third argument?

A: Mr. Lacey argues that FE PA's proposal should not be approved because it violates the spirit of the "fixed means fixed" order from the Commission in 2013.[24]

Q: What is your response?

A: I disagree with Mr. Lacey. He is trying to draw a comparison where none exists. Here, FE PA will either procure NITS as a part of its fixed price full requirements (FPFR) contracts with a price premium and pass through those costs to customers or procure

[24] RESA St. 1 at 45 (citing *Guidelines for Use of Fixed Price Labels for Products With a Pass-Through Clause*, Docket No. M-2013-2362961 (Final Order entered November 14, 2013).

NITS directly and pass through those costs to customers. Either way, FE PA is passing through the costs. It is not clear which way will be less expensive or more expensive for customers but given RESA's consternation about this issue it appears that Mr. Lacey believes that the prices will be lower for customers under FE PA's approach than if they embedded them in FPFR contracts. Furthermore, FE PA is not proposing to adjust the prices any more frequently than it already adjusts prices – 2x per year – and the procurement of NITS is merely one variable in a multivariable equation that calculates the PTC every six (6) months. Finally, it is fair to say that given all other electric distribution companies collect costs the same way as FE PA is proposing in this case, and that all of them recently had this methodology approved by the Commission, that this does not violate any Commission policy or order.

Q: What are Mr. Lacey's arguments about DOE Section 202(c) charges?

A: He makes all the same arguments that he made about NITS.[25]

Q: What is your response?

A: My response is the same response as I just provided about NITS.

Q: Mr. Lacey and Mr. Miller each argue that high prices in the competitive market are not evidence of harm and argue that there is an absence of data to show any correlation between high supplier prices and payment trouble. How do you respond?

A: Contrary to the testimony of Mr. Lacey and Mr. Miller,[26] there is a clear and demonstrated link between high supplier prices and payment trouble, calling into question their repeated insistence that consumers are affirmatively electing to pay higher prices for

[25] RESA St. 1 at 46-47.
[26] TSE St. 1 at 13-16; RESA St. 1 at 33-35.

electricity. As I detailed in direct testimony, residential shopping customers experience substantially higher rates of involuntary, payment-related termination than customers served on default service.[27]

In addition to significantly higher involuntary termination rates, uncollectible expenses are substantially higher for shopping customers compared to default service customers.[28] I will discuss this data in further detail below, in responding to the suppliers' arguments against FE PA's proposed reforms to the Purchase of Receivables (POR) program. In short, higher uncollectible expenses for shopping accounts are driving up rates for all residential consumers – including those who have chosen not to shop.

The relationship between excessive supplier pricing, heightened termination and uncollectible rates, and broader affordability concerns is clear, and provides substantial evidence of the real-world customer impacts that justify measured consumer protection reforms.

Q: Mr. Lacey asserts that default service is not the lowest price available in the market, and provides a hypothetical arguing that if all default service customers were moved to a hypothetical offer providing a 7/10th of a cent discount off the default service price, there was a potential for $88 million in savings.[29] How do you respond?

A: Mr. Lacey's hypothetical has no basis in reality, and amounts to pure conjecture. What customers could have potentially saved – if conditions were perfect – is irrelevant in the face of real data and evidence of what has in fact occurred. I do not dispute that

[27] CAUSE-PA St. 1 at 24-25.
[28] CAUSE-PA Exhibit 1-R.
[29] RESA St. 1 at 56.

there are retail supply contracts that offer prices that are lower than the PTC and neither I nor any other party to this proceeding has taken the position that the PTC is always the lowest price. However, the PTC provides a fixed price for 6 months at a time that is procured without markup pursuant to a procurement plan that is designed to be least cost over time. Mr. Miller's testimony makes it clear that there are very few offers in FE PA's service territory that offer prices below the PTC on a per kWh basis: As of April 8, 2026, "only a few [offers] were lower than Met-Ed's current price to compare as of that date" – and in Penelec's service territory, "only 1 was lower than the Price to Compare."[30] In fact, a closer examination of the offers chronicled in Mr. Miller's testimony reveals that, once monthly fees (ranging from $9.95 to $14.95 / month, or $1/day) are applied, none of the offers would produce a bill that is below the PTC.[31]

Q: Have you examined any shopping data for specific suppliers?

A: Yes. I analyzed aggregate monthly shopping data for 2022 through 2025 for the suppliers that have intervened in this case, including Town Square Energy East, Shipley Choice, IGS, and WGL. This analysis is attached to my rebuttal testimony as CAUSE-PA Exhibit 2-R. Because of the sensitive nature of individual supplier pricing, this exhibit is marked HIGHLY CONFIDENTIAL and will only be made available in a manner consistent with the Protective Order in this proceeding. My discussion about this data will be redacted in public version of this testimony.

Q: What did you conclude from this analysis?

A: *****BEGIN HIGHLY CONFIDENTIAL TESTIMONY***** [redacted]

[redacted]

[30] TSE St. 1 at 11.
[31] See TSE Exhibit RM-3.

[redacted] ***END HIGHLY CONFIDENTIAL TESTIMONY*** This data confirms the need for structural rather than surgical reforms.

Q: Mr. Miller suggests that reforms to FE PA's market programs and policies should be deferred to a statewide proceeding.[32] Do you agree?

A: Absolutely not. The evidence of harm in FE PA's service territory is real, current, and ongoing, and the need for comprehensive reforms is undeniable. The supplier parties would of course prefer to snarl meaningful reforms in a lengthy statewide policy inquiry. But Pennsylvania consumers cannot afford to wait.

[32] TSE St. 1 at 23-24.

Q: Mr. Lacey argues that the Commission should open a statewide proceeding "to investigate the adoption of alternative default suppliers as a way to remove the advantages enjoyed by EDCs as the default service providers and the perverse incentives to erect barriers to electricity market competition." What is your response?

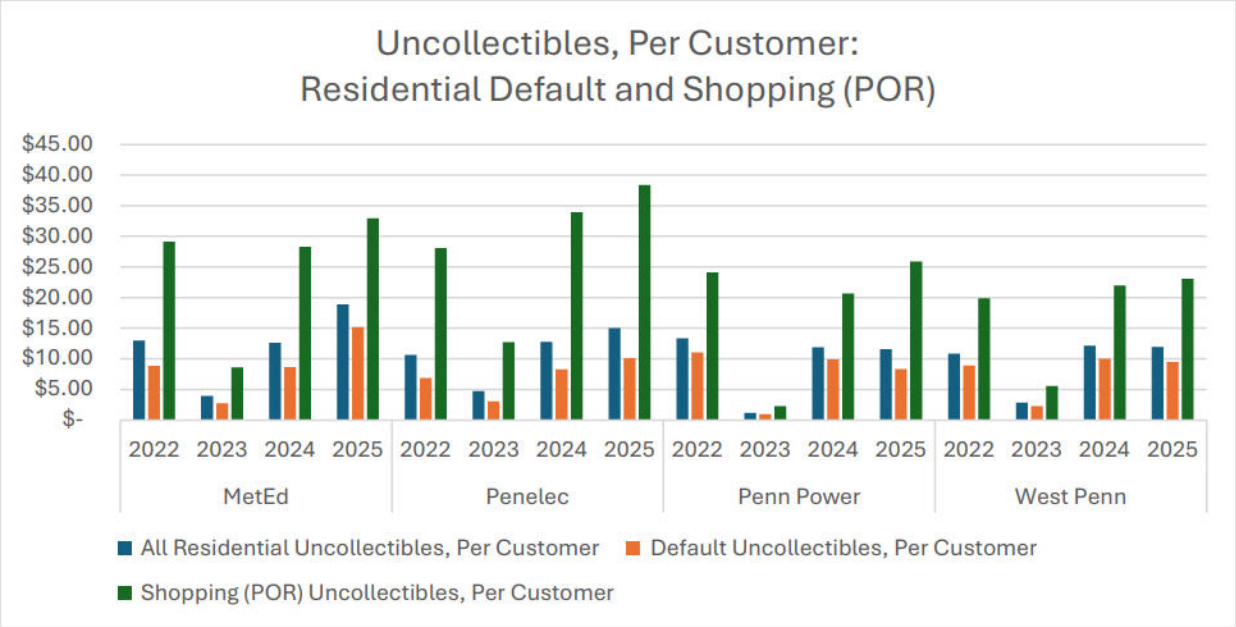
A: Mr. Lacey's recommendation is based on his unsupported accusation that FE PA's proposed reforms to its market enhancement policies and retail residential switching procedures are part of a larger plot to re-regulate the wholesale market and to own generation. While there is certainly a lot of attention to the wholesale markets given the acute resource adequacy and affordability challenges we face, and I am aware that some Pennsylvania utilities have proposed to build generation as a way to address the crisis, Mr. Lacey's testimony on this issue should be taken for what it is: Pure conjecture, with zero factual basis. FE PA's proposed reforms are intended to protect consumers from real, substantial, and persistent harm, documented through extensive data showing retail residential shopping customers are facing substantial harm in the form of higher prices, higher termination rates, and higher uncollectible expenses. At the same time, the proposed reforms allow retail competition to continue and ensure customers retain direct access to the competitive retail market. FE PA's proposals are a win for all customers because they preserve access to the retail market for those who wish to contract affirmatively and directly with an EGS while providing protection for customers who shop and those who do not do so.

Moreover, there is already a well-defined legal process for a supplier to become a default service provider if they are interested and able to do so.[33] While the Commission's rules allow it to propose, *sua sponte*, to relieve *an* EDC of its default service obligation, it strains credulity to suggest that the Commission could extend this regulatory provision to summarily relieve all EDCs of the default service obligation through the course of a statewide policy proceeding.[34] It would be a waste of Commission resources to initiate a statewide proceeding to explore an issue that already has a defined pathway, especially in the absence of any express interest of a supplier with adequate operational and financial fitness to serve in the statutory default service role.

III. PROPOSED REFORMS TO THE PURCHASE OF RECEIVABLES PROGRAM (POR) ARE NECESSARY TO STOP HARM TO OTHER RATEPAYERS

Q: Please summarize why you believe FE PA's proposed POR reforms are appropriate in light of the record in this case?

A: FE PA's proposed POR reforms are a reasonable and targeted response to the harms reflected in this record. Under the current POR structure, suppliers that participate in utility consolidated billing receive the benefit of having FE PA purchase their receivables without recourse, even where the supplier's excessive pricing contributes to nonpayment, termination, and write-offs. In practical terms, that means a portion of the financial consequences of excessive supplier pricing can be shifted away from the supplier and onto other customers.



[33] See 66 Pa. C.S. § 2803 (defining "default service provider" to include "an alternative supplier approved by the Commission" that meets certain requirements); see also 52 Pa. Code § 54.183.
[34] See 52 Pa. Code § 54.183(b)(3).

FE PA's proposal does not eliminate utility consolidated billing, nor does it bar customers from selecting products priced above the PTC. Rather, it limits POR treatment to those customer accounts where the supplier is using rate-ready billing and charging a rate at or below the PTC at enrollment or at the time of a rate change. That is a measured reform that better aligns incentives. If a supplier wishes to charge a price above the PTC and a customer wishes to contract for that price then the supplier and customer remain free to do so, but the supplier should not be entitled to socialize the incremental collection risk associated with that pricing through POR treatment. Given the evidence in this case showing that shopping customers have materially higher termination rates than customers on default service, and given the strong indication that excessive supplier pricing contributes to broader affordability problems and uncollectible expense, FE PA's POR proposal is both appropriate and necessary to protect FE PA's residential customers from unnecessary costs and should be approved in this proceeding.

Additional data regarding residential uncollectible expenses further confirms this point. As shown in CAUSE-PA Exhibit 1-R, shopping customers served through POR generate substantially higher uncollectible expense on a per-customer basis than customers served on default service, across all four FE PA divisions. In 2025, on a per customer basis, POR-related uncollectibles were between 25-49% higher than default service uncollectibles.[35] The chart below shows the annual per-customer uncollectible rate for residential (overall), residential default service, and residential shopping (POR) customers, from 2022 through 2025.

[35] CAUSE-PA Exhibit 1-R; see also FE PA Response to CAUSE-PA I-10, Revised Attachment A (average annual customer counts), attached hereto at Appendix A-R and FE PA Response to RESA I-12, Attachment A (uncollectible expenses), attached hereto at Appendix A-R.

Chart 1-R: Residential Uncollectible Expense Per Customer

In 2025, shopping-related uncollectibles on a per-customer basis were more than two times higher than default-service uncollectibles in Met-Ed, more than three times higher in Penelec, more than three times higher in Penn Power, and more than two times higher in West Penn. This same basic pattern is reflected in the prior years, as shown in the chart above and in CAUSE-PA Exhibit 1-R, and is consistent with the elevated termination rates discussed at length in my direct testimony.

Thus, the harms of excessive supplier pricing do not stop with the shopping customer's monthly bill. They also translate into materially greater uncollectible expenses associated with shopping accounts, which in turn increases the risk that other customers will bear costs that are driven by excessive supplier prices. This is precisely why FE PA's POR reform is appropriate. The proposal preserves customer choice while providing needed protection for other ratepayers. It does not prohibit higher-priced products; it

simply ensures that the consequences of those products do not unfairly fall on other consumers through increased uncollectible expense.

Q: Why do Mr. Miller and Mr. Lacey object to FE PA's proposed POR reforms?

A: Mr. Miller argues that FE PA's POR, as currently structured, alleviates suppliers of credit and collections risk – allowing suppliers to "compete on price and product innovation, not on their ability to finance bad debt and manage collections."[36] He contends that if suppliers must take on the risks of collections it will "reduce customer choice and eliminate options that protect customers from future PTC increases and/or provide other benefits that some customers may value" because it would require suppliers to "price-in credit and payment risk when making offers."[37] Mr. Miller also touts the "customer benefits" of the POR, arguing that the POR is an equity tool that prevents suppliers from having to evaluate customer creditworthiness when extending offers.[38] He argues that FE PA's proposal would represent a "dramatic departure" from Pennsylvania's existing market structure, and would allow FE PA to decide "on an account-by-account basis" whether an offer will qualify for POR.

Mr. Lacey generally advances these same arguments, emphasizing that POR offers "billing simplicity, broader access to competitive supply options, and more effective collections processes."[39] He explains that the POR enables customers "to receive a single, consolidated bill" – which he argues is "the most familiar and preferred billing format for residential customers and avoids confusion and inconvenience associated with

[36] TSE St. 1 at 9; RESA St. 1 t 27.
[37] TSE St. 1 at 9
[38] TSE St. 1 at 7.
[39] RESA St. 1 at 27.

multiple bills."[40] Mr. Lacey argues strenuously that changes to the POR to require rate ready billing will not allow for introduction of distributed energy resource aggregation or other complex rates – which he claims will stifle innovation.[41]

Both witnesses note that utilities have the authority to terminate a customer's service for non-payment, which they claim "improves the likelihood that all charges on the bill will be paid."[42]

Mr. Lacey also advances several flawed legal arguments against FE PA's POR proposal, and submits that reforms to FE PA's POR amount to "a form of price regulation."[43] He explains: "Because FE has no authority to regulate an EGS's price or services to customers, and the Commission also has no authority to regulate EGS pricing, I fail to see how FE can use price as a condition to limit the availability of a long-standing Commission approved program that was meant to establish billing parity for EGS charges."[44] He further claims that FE PA's proposal amounts to unlawful discrimination against suppliers "on the basis of its price to customers"– and asserts that FE PA's proposals are contrary to "Commission regulation."[45] In support of this last claim, Mr. Lacey cites only to a Commission policy statement, which is decidedly not the same as binding regulation.

[40] RESA St. 1 at 27.
[41] RESA St. 1 at 31-33.
[42] RESA St. 1 at 27-28; TSE St. 1 at 7.
[43] RESA St. 1 at 29-30.
[44] RESA St. 1 at 29-30.
[45] RESA St. 1 at 29-30.

Q: How do you respond to Mr. Miller and Mr. Lacey's arguments in favor of the existing POR, and in opposition to FE PA's proposed reforms?

A: These arguments should be given no credence. There is no legal requirement for FE PA to operate a POR. In fact, and to the contrary, the Public Utility Code expressly prohibits the Commission from *requiring* POR.[46] As noted at the outset of my rebuttal testimony, counsel for CAUSE-PA will fully address the legal contentions of Mr. Miller and Mr. Lacey through briefing. Nevertheless, as a matter of policy, I contend that participation in the POR is a privilege, not a right, and reasonable restrictions on the POR to prevent harm to other ratepayers is not tantamount to unlawful price regulation or discrimination – it is part and parcel to FE PA's obligation to prudently manage collections and the Commission's obligation to ensure the imposition of just and reasonable rates. Mr. Lacey and Mr. Miller – both non-lawyers – conflate law and policy, confusing market structure set by law with market programs established by policy. The POR was advanced as a market enhancement mechanism through the Commission's Retail Market Investigation in 2011 – a policy docket, not a rulemaking. At the time, there was no data to assess how the mechanism would the impact uncollectible expenses – the mechanism was advanced as a policy preference, with the hope of supporting healthy retail market growth. But we now have the data, and – frankly – it isn't favorable to suppliers. The data suggests that POR allows suppliers to act with impunity, charging excessive rates without regard to whether the customer is ultimately able to pay. After all, collection is someone else's problem. The reality is, ratepayers are left paying the price of supplier impunity in the form of higher termination rates and higher uncollectible expenses. This is eerily similar to my

[46] 66 Pa C.S. § 2807(c)(3).

early years in legal aid when I represented homeowners with subprime mortgages that were securitized as mortgage-backed securities as soon as they were made, providing the originator with quick cash and no responsibility. FE PA's proposal is an antidote to the current process and would lay accountability for pricing at the feet of suppliers who wish to charge prices higher than the PTC.

Critically, FE PA is not proposing to eliminate the POR – suppliers offering a price that is at or below the default service price at the time of enrollment will be permitted to participate in POR. Claims that FE PA's changes to the POR will doom the competitive market are overstated, and present a false and unsubstantiated dichotomy. Notably, Town Square Energy East, LLC operates in the state of Maine, despite the fact there is no POR in that state.[47] ***BEGIN HIGHLY CONFIDENTIAL*** [redacted]

[47] TSE Response to CAUSE-PA I-16, attached hereto at Appendix A-R.
[48] TSE Response to CAUSE-PA I-18, Attachment A Revised (HIGHLY CONFIDENTIAL)

[redacted]

[redacted]

[redacted]. ***END HIGHLY CONFIDENTIAL***

While Mr. Miller and Mr. Lacey claim that changes to the POR will be the death knell for innovation, this is the Chicken Little response of all suppliers in every proceeding I have been in over the past 15 years. Anytime consumer protections are proposed, suppliers claim that the sky will fall on innovation. There is nothing preventing suppliers from being innovative, charging different prices or different pricing models. They could even do so through utility consolidated billing, at any price. If these innovations are desirable for consumers, suppliers should not be concerned that they would only get paid when the customer pays. The changes to POR contemplated by FE PA will reward prudency. If suppliers wish to charge excessive rates, they are free to do so – but they cannot continue to rely on FE PA to perform their collections functions. This reasonable rule is well calibrated to address identified harm and will help to prevent suppliers from exploiting the POR to charge rates that residential customers cannot afford to pay.

Finally, in arguing that FE PA must retain POR for bill ready billing – while in the same breath pointing to a utility's power to terminate for non-payment – Mr. Miller and Mr. Lacey appear to be unaware that utilities are prohibited from terminating service for nonpayment of non-basic service charges, in whole or in part.[50] Bill ready billing does not allow FE PA to differentiate between basic and non-basic charges, so a utility may not terminate service unless it can verify that the charges included in the bill include only nonbasic charges. FE PA's proposal to require the use of rate-ready billing as a condition

[49] CAUSE-PA Exhibit 2-R (HIGHLY CONFIDENTIAL).
[50] 52 Pa. Code § 56.83.

to participation in the POR will similarly ensure that shopping customers are never at risk of termination for non-payment based on arrears on non-basic components of a supplier bill.

IV. REQUIRING AFFIRMATIVE CONSENT TO CHANGE CONTRACT TERMS IS NOT SLAMMING

Q: Mr. Miller and Mr. Lacey argue that FE PA's proposal to require affirmative consent at the end of a contract term or on a quarterly basis for variable rate contracts invalidates choice and is tantamount to slamming.[51] How do you respond?

A: The arguments advanced by Mr. Lacey and Mr. Miller rest on a fundamental distortion of both the proposal and the concept of "slamming".

First, "slamming" occurs when a customer is switched to a supplier without authorization. Here, no such unauthorized switch occurs. Under FE PA's proposal, a customer who takes no action would literally "default" to default service – they would not revert to a competing retail supplier. The proposal requires affirmative authorization before any retail supplier may continue service under new or ongoing pricing terms, which is precisely the opposite of slamming. Indeed, the proposal offers a reasonable safeguard designed to ensure that contract renewal is voluntary, willing, and fully informed. While it seems likely that FE PA must be granted a waiver from the requirements of 52 Pa. Code § 54.10, and indeed it has asked for one, FE PA's proposal would be honoring a customer's wishes by providing them with direct access to the retail market under a fixed

[51] TSE St. 1 at 19, RESA St. 1 at 20

rate fixed term contract for that fixed term or a variable rate contract. The current paradigm presumes that silence is consent to remain with the supplier, but that concept is in part responsible for the $888 million in increased costs paid by customers above the default service price. Counsel for CAUSE-PA will fully brief how requiring affirmative consent at the end of the contract is fundamentally consistent with and permitted by the Public Utility Code. Based on the record evidence, I can say without equivocation that it is in the public interest.

Mr. Lacey's assertion that requiring affirmative consent invalidates choice is similarly misplaced. A customer who chooses to remain with a supplier remains entirely free to do so. A customer who wishes to purchase a renewable product, a longer fixed term, or any other product attribute remains free to make that choice. FE PA's proposal simply prevents suppliers from relying on inertia to move a customer onto a new rate or continue a customer on a variable-priced product without affirmative customer consent. In light of the evidence in this case showing excessive charges in the residential shopping market, and correspondingly higher rates of termination and uncollectible expenses, requiring affirmative and informed consent before exposing customers to potentially higher prices is both appropriate and necessary.

Mr. Lacey and Mr. Miller cite to other types of services and subscriptions, such as cable tv, magazines, and streaming services, as proof that customers expect their contract for electricity to auto-renew at a new price, without their affirmative consent.[52] This comparison fails for several key reasons. First, energy is an essential service that directly impacts health, safety, and habitability. It is not comparable to discretionary

[52] RESA St. 1 at 17; TSE St. 1 at 21.

subscription services. Second, the price risk is materially greater and less predictable, exposing consumers to potentially extreme consequences if they forget to act. As Mr. Lacey acknowledges elsewhere in his testimony, electricity pricing reflects volatile wholesale market conditions. A customer's failure to act can expose them to substantial and rapid cost increases far exceeding the risk inherent in missing a newspaper, streaming, or magazine subscription renewal. Finally, there are systemwide cost impacts associated with high supplier charges that warrant requiring affirmative consent to renew a contract or to continue with a variable rate. As discussed above, with regard to POR, suppliers rely on utility billing, collections, and cost recover mechanisms that shift uncollectible costs to other ratepayers. Passive rollovers into potentially higher-cost service unnecessarily increases this risk.

Mr. Miller and Mr. Lacey emphasize that existing regulations already require renewal notices and disclosures. This is correct, but incomplete. Notice is not consent. The current framework permits a customer to be transitioned to a new rate structure – including one materially different from the original contract – based solely on inaction. FE PA's proposal addresses this gap by requiring suppliers to obtain actual confirmation that the customer intends to continue under the renewal terms. Given the record of persistent excessive prices in the competitive market for residential and low income customers, higher risk of termination for shopping customers, and disproportionately high level of uncollectible expenses associated with shopping accounts, it is entirely reasonable for the Commission to strengthen existing requirements beyond passive notification of a rate change.

Q: Mr. Lacey argues that customers could be harmed if they are returned to default service when the default service price is higher than the renewal price or if the customer sought a renewable product that they will no longer receive.[53] How do you respond?

A: This argument overlooks the fact that FE PA's proposal does not prohibit re-enrollment, and a customer can immediately and freely re-select the same supplier or product if they wish to do so. In fact, suppliers could use the opportunity to extend a specific offer to returning customers.

I note here that the affirmative consent contemplated by FE PA's proposal does not need to be extensive, burdensome, or costly – it just must document that the customer would like to continue with the supplier at the terms offered. To accomplish this simple task, suppliers could use a multitude of their "innovative" means to enhance customer experience.

Ultimately, I believe strongly that requiring affirmative consent to renew a contract – or on a quarterly basis for variable rate contracts – would measurably improve consumer outcomes, education, trust, and confidence in the market.

Q: Mr. Lacey cites two prior Commission decisions to argue against FE PA's proposal to return customers to default service absent affirmative consent.[54] Please discuss.

A: In arguing against FE PA's proposal to return customers to default service if they do not affirmatively consent to renewal, Mr. Lacey relies on the Commission's 2024 decision in the PECO Default Service Plan proceeding. While not a lawyer, Mr. Lacey

[53] RESA St. 1 at 18-19.
[54] RESA St. 1 at 24-25.

provides his legal opinion, asserting: "Based on my read of the PECO order, the Commission concluded that the proposal [to return customers to default service at the end of PECO's standard offer program] was contrary to its regulations and precedent similar to my discussion on this issue previously."[55] He also attempts to apply a recent decision regarding a request of local Pennsylvania boroughs to operate a Community Choice Aggregation program on an opt-out basis, wherein the Boroughs would switch default service customers to a supplier of their choosing without affirmative consent.[56] In other words, the exact opposite of the proposal here to require affirmative consent.

Mr. Lacey's attempted legal analysis is flawed and will be addressed by counsel for CAUSE-PA through briefing. Setting aside matters of law, I note that the record before the Commission in this case includes extensive evidence of excessive supplier charges and corresponding higher termination rates and uncollectible expenses associated with shopping accounts. The Commission can and should evaluate FE PA's proposal based on the record in this case.

V. ELIMINATION OF THE CUSTOMER REFERRAL PROGRAM IS SUPPORTED BY SUBSTANTIAL EVIDENCE

Q: Why is FE PA's proposal to discontinue the Customer Referral Program appropriate?

A: FE PA's proposal to discontinue the CRP is appropriate for several reasons. First, the record reflects limited supplier participation and low customer uptake. Second, and more fundamentally, there is little policy justification for continuing a utility-administered

[55] Id. at 24:10-12.
[56] Id. at 24-25.

pathway into the retail market where the broader record in this case demonstrates that residential shopping has produced significantly adverse outcomes for customers in FE PA's service territory. The fact that the CRP can be described as offering a short-term discount does not overcome the larger reality that the residential shopping market overall and in aggregate has not delivered net benefits to FE PA's residential customers.

Mr. Lacey and Mr. Miller suggest that the CRP should be maintained or expanded, but that position gives insufficient weight to the evidence of market harm in this record. Nothing in their testimony refutes the evidence in this case. There is waning supplier participation and customer interest in this program, and it has simply run its course. In my opinion, based on the record developed to date, it is reasonable to conclude that FE PA should not continue to serve as a direct conduit to residential retail contracts that has produced persistent and material adverse outcomes for customers.

VI. CONCLUSION

Q: What do you conclude regarding the testimony of Mr. Lacey and Mr. Miller?

A: Their testimony does not undermine the central evidence in this case showing that FE PA's residential shopping market has failed to deliver net benefits to residential customers and has imposed especially severe burdens on low-income households. Their testimony focuses on preserving existing supplier practices, but it does not adequately answer the record evidence showing persistent overcharges, disproportionate payment trouble, and the need for structural reform. In addition to the extensive data outlined in my direct testimony, showing excessive shopping prices and disproportionate rates of involuntary termination, the evidence above demonstrates that excessive supplier pricing is linked to higher uncollectible expenses for shopping accounts, increasing the likelihood

that other customers will bear the costs. The harm in FE PA's service territory is occurring now, and the record in this case evidences a clear and present need for substantial reforms to address acute affordability challenges exacerbated by suppliers operating in FE PA's service territory. Relief should not be delayed pending some broader statewide proceeding. For these reasons, I continue to support FE PA's proposals to discontinue the CRP, require affirmative customer action at the end of new fixed-term contracts, require quarterly affirmations for variable-rate products, and modify POR eligibility to better protect customers and other ratepayers.

Q: Does this conclude your rebuttal testimony?

A: Yes. However, I reserve the right to supplement or revise this testimony in response to additional evidence or arguments that may be presented in this proceeding.

RESA Set 1, No. 12

For each of the years 2020-2025, please provide the total uncollectible account expense associated with FirstEnergy residential POR-related accounts and the total uncollectible account expense associated with FirstEnergy residential default service, compared to FirstEnergy's total Pennsylvania residential revenues for the years in question.

RESPONSE:

Please see FE PA Response to RESA Set 1, No. 12, Attachment A.

FE PA allocates total uncollectible accounts expense to distribution vs. generation in a base rate case test year based on normalized revenues prior to the rate increase plus POR revenues billed on behalf of EGSs. FE PA allocates generation uncollectible accounts expense to default service vs. POR in a base rate case test year based on based on the default service revenues plus the POR revenues billed on behalf of EGSs. FE PA calculates the allocation of uncollectible accounts expense to customer class in a base rate case test year based on the two-year average of net write-offs.

BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

Petition of FE PA Pennsylvania Electric Company for Approval of Its Default Service Program for the period commencing June 1, 2027 to May 31, 2031	: : : :	Docket No. P-2026-3060298

SURREBUTTAL TESTIMONY OF PATRICK M. CICERO

ON BEHALF OF

THE COALITION FOR AFFORDABLE UTILITY SERVICES AND ENERGY

EFFICIENCY IN PENNSYLVANIA ("CAUSE-PA")

June 11, 2026

PREPARED SURREBUTTAL TESTIMONY OF PATRICK M. CICERO

I. INTRODUCTION

Q: Please state your name, occupation, and business address?

A: My name is Patrick M. Cicero. In my role as Of Counsel at the Pennsylvania Utility Law Project (PULP), I have a broad range of responsibilities to PULP and its clients. This includes providing analysis and testimony on utility matters for clients who are represented by members of the statewide legal aid network, including clients of PULP and other legal aid offices. PULP's business address is 118 Locust Street, Harrisburg, PA 17101. I also maintain an office at my home.

Q: Did you sponsor direct and rebuttal testimony in this proceeding?

A: Yes. I have sponsored both direct and rebuttal testimony in this case. My direct testimony was pre-marked as CAUSE-PA Statement 1 and was accompanied by CAUSE-PA Exhibits 1 through 3 and Appendices A and B. My rebuttal testimony was pre-marked as CAUSE-PA Statement 1-R (Highly Confidential) and was accompanied by CAUSE-PA Exhibits 1-R and 2-R (Highly Confidential) and Appendix A-R.

Q: Has your direct or rebuttal testimony, or the analysis and recommendations contained therein, changed based on the direct testimony of other parties in this case?

A: No.

Q: Please state the purpose of your surrebuttal testimony.

A: The purpose of my surrebuttal testimony is to respond to certain arguments raised in the rebuttal testimony of Frank Lacey on behalf of the Retail Energy Supply Association[1] (RESA) and Mr. David Young on behalf of FirstEnergy.[2]

My surrebuttal testimony is not intended to address every issue raised by other parties' witnesses in rebuttal testimony. Absence of a response to any specific recommendation or position of any witness does not indicate my agreement. Furthermore, unless required for context in providing a further response to the rebuttal testimony of Mr. Lacey and Mr. Young, I will not reiterate the extensive arguments and evidence that I provided in my direct and rebuttal testimony. To the extent an argument raised by any party is already sufficiently addressed in my direct and rebuttal testimony, I do not intend to respond, and stand on the evaluation, analysis, and recommendations contained in my previously circulated testimony.

Q: Are you sponsoring any exhibits accompanying your surrebuttal testimony?

A: No.

Q: Please summarize your surrebuttal testimony.

A: I first respond to the unsubstantiated assertions of Mr. Lacey that FE PA's proposed changes to its residential retail market engagement and enhancement programs will reduce retail choice and are inconsistent with Pennsylvania's competitive market framework. In doing so, I will respond to Mr. Lacey's mischaracterizations of FE PA's

[1] RESA St.1-R
[2] FE PA St. 1-R.

proposals and will correct the inaccurate factual basis and misguided policy assertions upon which Mr. Lacey's conclusions are premised.

I will also briefly respond to Mr. Young's assertion that the Commission should not address FE PA's maximum credit threshold for its Customer Assistance Program (CAP) in the context of this default service proceeding, despite clear and undisputed evidence that the rapid increase in default service rates is having a devastating impact on CAP.

I. RESPONSE TO RESA WITNESS FRANK LACEY

Q: At the outset of his rebuttal testimony, Mr. Lacey argues that FE PA's retail market proposals are inappropriate for consideration in this proceeding. Please explain the basis for Mr. Lacey's assertions and your response thereto.

A: Mr. Lacey argues that FE PA's retail market proposals would "alter significant aspects of Pennsylvania's competitive retail market."[3] Therefore, based on advice of counsel, he argues that the proposals "require broader procedural treatment and careful evaluation."[4]

This line of argument strains credulity. FE PA's Customer Referral Program (CRP) was first proposed in the context of FE PA's first Default Service Plan proceeding, and changes to both the CRP and FE PA's Purchase of Receivables (POR) Program have been appropriately proposed and evaluated in each successive plan proceeding.[5]

[3] RESA St. 1R at 3-4.
[4] RESA St. 1R at 3:14-23.
[5] See Joint Petition of Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company, and West Penn Power Company for Approval of Their Default Service Programs, Docket Nos. P-2011-2273650, -2273668, -2273669, and -2273670; Joint Petition of Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company, and West Penn Power Company for Approval of Their Default Service Programs, Docket Nos.P-2017-2637855, -57, -58, -66; see also Respond Power, LLC v. Pa. PUC, 260 CD 2020 (unreported order filed Feb. 9, 2021).

Changes to these programs – up to and including their proposed discontinuation – is therefore appropriately considered in the context of a Default Service Plan proceeding.

Counsel for RESA, along with approximately 130 individual suppliers, were served with FE PA's initial filing on February 3, 2026,[6] and has had over five months to engage in discovery and develop a factual record from which the ALJs and the Commission will make a careful and reasoned decision subject to the laws and policies of the Commonwealth. Counsel for CAUSE-PA will fully brief the relative due process considerations in this proceeding. However, in my estimation, the "procedural treatment" and "careful evaluation" of retail market proposals in this proceeding is far more searching than the level of review afforded to stakeholders in a statewide policy proceeding. Thus, Mr. Lacey's contention that this is the wrong forum is fundamentally flawed.

Contrary to Mr. Lacey's assertions, FE PA's retail market proposals will not "alter significant aspects" or "materially impair" Pennsylvania's competitive retail market. To the contrary, FE PA's proposals are squarely in line with established Commission policies and are responsive to the evidence of harm documented in this proceeding. I believe that FE PA's proposals are likely to have the opposite effect on the market by restoring consumer confidence that has been eroded over time by excessive prices.

Mr. Lacey's assertion that FE PA's retail market proposals contradict the Commission's "approved Pennsylvania framework" for the retail market is likewise inaccurate and misrepresents the Commission's prior policy pronouncements.[7] The Commission's policy, which is not binding law, provides only that the public interest would

[6] Petition of FirstEnergy Pennsylvania Electric Company for Approval of its Default Service Program for the Period June 1, 2027 to May 31, 2031, Docket P-2026-3060298 (Certificate of Service). Available at: https://www.puc.pa.gov/pcdocs/1913245.pdf.
[7] RESA St. 1R at 4: 6-10.

be served "by the consideration" of a POR and CRP. It does not require these programs nor say that they are necessary.[8] Counsel for CAUSE-PA will fully brief the legal aspects of this issue. It is worth noting, however, that the Public Utility Code prohibits *requiring* electric distribution companies from purchasing receivables[9] and, as a matter of policy, I submit that FE PA is right to make decisions about its POR and CRP based on data and experience, not historical inertia regarding POR structure.

Q: Mr. Lacey concludes that FE PA's retail market proposals "would effectively transform the default service rate into a regulatory ceiling against which EGS pricing (for all customers) would be judged and restricted."[10] Do you agree with this assessment?

A: No. FE PA's proposals do not restrict supplier pricing in any way, and Mr. Lacey's suggestion to the contrary is without merit. Suppliers are free to continue offering electricity at any price, packaged with any "value added services" they wish to offer. FE PA's proposals would do nothing to restrict the ability of suppliers to make such offers or for consumers to choose such offers. Rather, FE PA's proposed changes are narrowly tailored to ensure that (1) customers are making an affirmative choice; and (2) other ratepayers are not penalized for a shopping customers' decision to affirmatively elect a higher priced product in exchange for some other benefit. Suppliers would remain free to offer electricity at a price premium; they would simply need to either perform their own billing and collections or wait to be paid by FE PA until the customer selecting that premium product pays the bill.

[8] 52 Pa. Code §§ 69.1814, 1815.
[9] 66 Pa. C.S. § 2807(c)(3).
[10] RESA St. 1-R at 5:13-14.

Q: Mr. Lacey asserts that "[d]efault service is heavily subsidized by distribution rates and EGS products are not."[11] In support of this contention, he argues that "FE uses millions of dollars of assets in the provision of default service" – including "buildings, furniture, computers, IT systems, and other, and the labor costs of personnel providing those services, that should be allocated to default service in order to make default service more equitably priced."[12] How do you respond?

A: RESA and retail suppliers have been arguing this same point for years, but the Commission has repeatedly concluded that default service rates are not subsidized.[13] Counsel for CAUSE-PA will address the legal contours of this well-trodden issue more fully through briefing. As a matter of public policy, I am opposed to Mr. Lacey's suggestion that there are costs that should be added to default service merely to make supplier offers more appealing.

[11] RESA St. 1R at 8.
[12] RESA St. 1R at 14.
[13] See NRG Energy, Inc. v. Pa. PUC, 58 CD 2019 (Pa. Commw. Ct., June 2, 2020), *allocatur denied* 359 MAL 2020.

Q: Mr. Lacey contends that FE PA's proposals will "increase customer migration back to default service."[14] On that basis, he asserts that your analysis of shopping data is flawed because it was not adjusted for incremental load if all customers were on default service.[15] He asserts that FE PA's descending clock auction "would clear at a higher price if the default service load was higher," concluding that "[t]his is a simple application of the laws of supply and demand."[16] Do you agree?

A: No. My analysis was based on actual prices charged to actual customers who were actively shopping in the competitive market, as compared to the actual default service price, over a 100-month period. Notably, Mr. Lacey does not assert that the actual pricing data is wrong.[17] Instead he claims that my analysis is "oversimplified" and "should be rejected by the Commission."[18] The facts show that over a 100 month period, customers who were served by retail suppliers paid $888 million more than they would have paid had they been charged the default service rates for the same period. That is fact. Mr. Lacey engages in mere speculation in the face of actual evidence and has presented no evidence that there would be material or meaningful increase in default service prices. Furthermore, there is no proposal in this case that all customers should be served on default service. The analysis was simply about the cost impact associated with customers paying more than the default service price resulting in $888 million in harm impacts that

[14] RESA St. 1R at 10.
[15] Id.
[16] Id.
[17] RESA St. 1R at 4-12. Note that Mr. Lacey did take issue with the underlying data used in FE PA's analysis. The fallacies of Mr. Lacey's arguments about FE PA's analysis are thoroughly rebutted in my rebuttal testimony. Nevertheless, I note the issue here to underscore the fact that Mr. Lacey did not make similar claims regarding the data used in my analysis. I did not use averages. My analysis used actual monthly shopping data compared to the actual PTC each month over a 100-month period that showed $888 million worth of harm. See CAUSE-PA St. 1 at 8-9.
[18] RESA St. 1R at 10.

included increased uncollectible expenses and termination rates for customers who were paying higher prices and served by retail suppliers.[19] There is no factual basis to conclude that under the proposed revisions that all customers would be returned to default service.

Even more fundamentally, there is simply no basis to conclude that FE PA's proposal would eliminate the competitive market or drive substantial numbers of customers back to default service. Under FE PA's proposals, suppliers remain free to offer the same products they offer today. Assuming consumers find value in those offers, as RESA contends, suppliers should have no reason to doubt that customers will continue to shop without POR and CRP.

Q: Mr. Lacey further criticizes your analysis of actual shopping data, arguing that you "fail[ed] to account for the value customers may place on EGS contracts that offer fixed price certainty for periods longer than 6 months" – or other "non-price attributes".[20] Please respond.

A: In my analysis of shopping data, I did not assign values or judgement to specific offer types. Indeed, whether individual offers provide "value" to customers is irrelevant. My analysis examined actual pricing data over a 100-month period. Based on that data, I concluded that (1) consumers should know, understand, and affirmatively consent to the price they are charged for electricity, and (2) consumers should not pay higher prices as a result of shopping decisions that are not their own. The fact is, residential shopping customers – especially low income shopping customers – are paying substantially higher rates, are facing substantially higher rates of termination, and are driving substantially higher uncollectible expenses that are borne by all residential ratepayers.

[19] CAUSE-PA St. a1 at 23.
[20] RESA St. 1R at 11:5-11.

Q: Mr. Lacey attempts to discredit your analysis of FE PA's proposed reforms, arguing you did not perform analysis regarding customer confusion, misunderstanding, administrative burden, implementation costs, participation rates, product availability, or other "customer choice impacts associated with proposed affirmative consent requirements."[21] Please respond.

A: Based on my experience assisting customers to get out of bad retail energy contracts over the course of my career, I can unequivocally state that customer confusion is rampant in the current market. The proposed reforms will help fix that, ensuring consumers are informed about the price they pay for electricity and empowered to make an affirmative choice. Mr. Lacey points again to a recent change in the law in Maryland to support his assertion that customers will be confused about the affirmative consent requirement.[22] But apart from vague parallels, he does not explain how Maryland's experience is comparable. Contrary to Mr. Lacey's assertion, FE PA's proposed reforms are likely to reduce overall administrative burden, as FE PA's proposed reforms would reduce a host of collections-related costs, from fewer notices to fewer truck rolls.

Q: Mr. Lacey argues that FE PA's POR "provide[s] credit-constrained customers with broader access to competitive supply products that might otherwise be available absent POR program."[23] Do you agree that this is a benefit to the POR?

A: No. RESA suggests playing a most dangerous game with economically vulnerable households – securitizing basic electric service to support the purchase of ancillary "value added services" that a customer cannot objectively afford, based on their credit risk.

[21] RESA St. 1R at 13-14.
[22] Id. at 14.
[23] RESA St. 1R at 18.

He goes on to claim that "the Commonwealth has already determined that POR programs serve important public interest objectives" – and that "risk-socialization features associated with a POR are not fundamentally different from other utility cost-recovery structures through which utilities recover bad-debt expenses from broader customer classes."[24] This assertion ignores clear and overwhelming data showing that shopping customers are being charged substantially higher rates, are facing substantially higher risk of termination, and are generating substantially higher levels of uncollectible expenses.[25] There is a fundamental difference between POR and general collections, in that utilities are not embedding the cost of non-commodity goods and services in the price of basic electricity and, based on the evidence in this case, are charging almost a billion dollars less than retail prices in aggregate.

Mr. Lacey is correct that "socialized collections structures, coupled with the ability to terminate service for non-payment, have been adopted in most, if not all utility service territories across the country and are not unique to competitive retail electricity markets" – but that is not the issue here. The issue is whether persistently higher prices in the competitive market are driving unnecessarily high termination and arrearage rates, adding more costs onto ratepayers and harming public safety. The Commission has an express obligation, enshrined in the Choice Act, to ensure programs and policies are in place to assist low income households to connect and maintain services to their home.[26] Simply put, the Commission cannot continue to allow FE PA to operate the POR in a

[24] RESA St. 1R at 19.

[26] 66 Pa. C.S. § 2802(9)-(10); 2803; 2804(9).

manner that directly erodes the ability of low income households to maintain service in FE PA's service territory.

Q: Mr. Lacey criticizes your support of FE PA's proposal to end its Customer Referral Program (CRP), arguing that you did not identify analysis "demonstrating that elimination of the CRP would improve customer outcomes relative to reforms or modifications short of elimination."[27] How do you respond?

A: Mr. Lacey appears to believe that the CRP is a statutory requirement as opposed to a voluntary program, as his argument is rooted in a legal standard applied by the Commonwealth Court when evaluating whether the Commission may place reasonable restrictions on competition to fulfill competing statutory priorities embedded in the Choice Act.[28] Counsel for CAUSE-PA will fully brief the legal aspects of this issue, and application of this legal standard. But it is important to keep in mind that the CRP is an optional program, encouraged as a matter of policy in the 2011 Retail Market Investigation and subject to review in each EDC's Default Service Plan.[29] Its elimination does not require competition to bend. In fact, elimination of the CRP will not in any way constrain the competitive market. It will merely end a voluntary market enhancement program that has fully run its course.

II. RESPONSE TO FE PA WITNESS DAVID YOUNG

Q: In his rebuttal testimony, Mr. Young notes that FE PA shares your concern that an increasing number of CAP customers are exceeding the maximum CAP credit level before the end of the program year; however, he argues that changes to CAP "are more appropriately addressed in the context of a USECP proceeding."[30] How do you respond?

A: The substantial increase in CAP customers exceeding their maximum CAP credits is a direct result of the substantial increase in FE PA's default service rates.[31] This is squarely at issue in this case and was not readily apparent the last time FE PA increased its maximum cap credits in January 2025, which was the result of its last distribution rate increase. The resulting harm is occurring now due to energy price increases. This case is the proper evidentiary forum in which to address these issues. The consequences of rising costs for low income families are far-ranging and irreversible.[32] There is simply no reason to delay. FE PA is not scheduled to file its next Universal Service and Energy Conservation Plan (USECP) until 2029. Simply put, low income consumers in FE PA's service territory cannot afford to wait for resolution of this issue. The record developed in this case includes facts and evidence which clearly demonstrates the insufficiency of maximum CAP credit levels based on the costs that FE PA is charging its customers for default service. Counsel for CAUSE-PA will further address the legal aspects of this issue through briefing, but I stand by my analysis and recommendation on these issues and

[31] CAUSE-PA St. 1 at 40-44.
[32] CAUSE-PA St. 1 at 12-14 (discussing the far-ranging impacts of energy insecurity)

believe the matter must be resolved in this case to prevent prolonged harm to FE PA's economically vulnerable CAP participants.

Q: Does this conclude your surrebuttal testimony?

A: Yes.

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Frank Lacey and I am the founder of Electric Advisors Consulting, LLC ("Electric Advisors Consulting"). My business address is 3 Traylor Drive, West Chester, PA 19382.

Q. PLEASE DESCRIBE ELECTRIC ADVISORS CONSULTING AND YOUR ROLE?

A. Through Electric Advisors Consulting, I am an energy market consultant who helps companies and customers advance energy markets with innovative products, technologies, and services. I have provided value to clients by leveraging regulatory change, developing and implementing corporate strategies, and developing and executing M&A strategies.

Q. PLEASE SUMMARIZE YOUR EDUCATIONAL BACKGROUND AND PROFESSIONAL EXPERIENCE.

A. As a consultant, I provide policy- and market-related consulting services to advanced energy management companies and end-use customers. I have worked in the electric power industry for approximately 33 years, beginning immediately after earning my graduate degree. I have worked on major industry restructuring issues including generation asset divestiture, with a specialization in environmental asset valuation; stranded cost valuations; transmission restructuring including the development of Independent System Operators ("ISOs"), Regional Transmission Organization ("RTOs"), and other independent transmission entities; the development of retail energy markets; and the development of demand response markets. Early in my career, I was employed as a consultant to industry participants, first by Putnam, Hayes & Bartlett, Inc., and then by Arthur Andersen Business Consulting. Within the industry, I have worked for

Strategic Energy, a retail electricity supplier, Direct Energy, a retail energy supplier that acquired Strategic Energy in 2008, and Comverge, Inc. and CPower, two companies that shared a common owner and provided demand response services to residential and to commercial & industrial customers, respectively. I created Electric Advisors Consulting in the fall of 2015. I hold a Bachelor of Science degree in Transportation and Logistics from the University of Maryland and a Master of Science in Industrial Administration with concentrations in finance and environmental management from the Tepper School of Business at Carnegie Mellon University. My resume is provided as Exhibit FL-1.

Q. HAVE YOU EVER PROVIDED TESTIMONY BEFORE THIS COMMISSION?

A. Yes. I have testified before the Pennsylvania PUC Public Utility Commission ("PUC" or "Commission") several times. I have also testified numerous times before other state regulatory agencies, legislatures, and twice as a technical conference witness at the Federal Energy Regulatory Commission ("FERC"). I have provided expert testimony to the utility commissions in Virginia, New York, Rhode Island, Ohio, Maryland, Massachusetts, Illinois, Utah, and California. I have presented oral testimony in less formal proceedings before this Commission and Commissions in Maryland, Delaware, and Texas. I have presented legislative testimony in New York, Maryland, Pennsylvania, Delaware, Michigan, California, and Texas. I have filed expert reports on energy matters in the United States District Court for the Eastern District of North Carolina, Northern Division, in the Superior Court of New Jersey in Bergen County, and in the Supreme Court of the State of New York in New York County. I have also spoken at numerous trade shows, conferences, and other industry and corporate events as an expert on electricity market issues. A summary of my prior testimony is contained in Exhibit FL-2.

Q. ON WHOSE BEHALF ARE YOU TESTIFYING?

A. I am submitting this testimony on behalf of the Retail Energy Supply Association ("RESA").[1]

Q. PLEASE DESCRIBE RESA.

A. RESA is an association of diverse competitive energy suppliers devoted to promoting vibrant and sustainable competitive retail energy markets for residential and business customers. Members of RESA include electric generation suppliers ("EGSs" or "competitive suppliers") licensed by the Commission, pursuant to the Electricity Generation Customer Choice and Competition Act ("Competition Act"),[2] to sell electric generation services to retail customers throughout Pennsylvania and in FirstEnergy's ("FE") service territory.[3] EGSs accomplish these sales pursuant to electric supply contracts entered into with retail customers and, for residential and small business customers, are required to follow the Commission's detailed regulations regarding language to be included in the contracts, as well as the timing and content of notices to be provided to customers upon pending expiration of the contract or notice of material changes.[4]

---

[1] The comments expressed in this filing represent the position of the Retail Energy Supply Association (RESA) as an organization but may not represent the views of any particular member of the Association. Founded in 1990, RESA is a broad and diverse group of retail energy suppliers dedicated to promoting efficient, sustainable and customer-oriented competitive retail energy markets. RESA members operate throughout the United States delivering value-added electricity and natural gas service at retail to residential, commercial and industrial energy customers. More information on RESA can be found at www.resausa.org.

[2] 66 Pa. C.S. §§ 2801 *et seq*.

[3] References to "FirstEnergy" or "FE" are meant to comprehensively include each of its predecessor companies serving customers in Pennsylvania (Metropolitan Edison, Pennsylvania Electric Company, Pennsylvania Power Company, and West Penn Power Company), unless explicitly stated otherwise.

[4] 52 Pa Code §§ 54.5 and 54.10.

Q. PLEASE PROVIDE AN OVERVIEW OF YOUR TESTIMONY.

A. One of the fundamental principles underlying the Pennsylvania legislature's decision to restructure the electricity market was to transfer the risk of management decisions related to investments in generation assets from ratepayers to shareholders. In 2008, that vision was challenged as Pennsylvanians would soon be confronted with near certain price increases as Pennsylvania utility rate caps were nearing expiration. At that time, the legislature and many stakeholders across Pennsylvania had serious discussions about the future of the restructured electricity market. The legislature rose to the occasion and passed Act 129.[5] Act 129 modified the default service providers' ability to manage default service and put certain requirements on default service suppliers. Act 129 also created very robust energy efficiency and demand response opportunities which use market tools to allow consumers to manage their electricity expenses. FE's proposals in this proceeding are seeking to unwind many of the risk allocations that have been a core component of restructuring. FE is also proposing default service contracts that are not aligned with the Act 129 requirements for such contracts. In this testimony, I will explain that many of changes that FE is proposing in its DSP Petition[6] have anti-competitive effects and have a regressive effect on customers and on the competitive electricity market. I will show that many of FE's proposals are the same as those embedded in Maryland's SB-1,[7] which has resulted in an electricity market that is providing zero offers to residential customers and has transitioned the market from one in

---

[5] *See* 66 Pa. C.S. § 2807(e)(3.1)–(3.9).

[6] *Petition of FirstEnergy Pa. Elec. Co. for Approval of its Default Service Program for the Period June 1, 2027 to May 31, 2031*, Docket No. P-2026-3060298.

[7] 2024 Md. Laws ch. 537.

which about 13% of residential customers were on competitive supply contracts to one in which less than one-half of one percent of customers are on competitive supply contracts. FE's proposals reflect a regression in competitive market concepts, moving closer to the regulated command and control market and away from the vision of competition envisioned by the Pennsylvania legislature when the Competition Act was passed and when it was amended under Act 129. FE's proposals will undo 25 years of progress under the Competition Act, which includes many years of thoughtful input and analyses from stakeholders, and has resulted in a robust set of regulations that balance consumer protections with the competitive market. I will address individually several of FE's proposals that are extremely damaging to the competitive markets and to the rule of law in Pennsylvania.

Q. IS IT IN FE'S BEST INTEREST TO UNDO THE PROGRESS MADE UNDER THE COMPETITION ACT?

A. An EDC's default service product competes in the market with EGS products and services. If the electric distribution companies ("EDCs") across Pennsylvania undermine the operations of the competitive market, they will be better positioned to advocate at the legislature to re-regulate the market for generation and generation-related services. This would allow them to build and include in rate base, generation assets, which would add billions of dollars in revenues and profits to their portfolios on the backs of captive ratepayers. In my opinion, this creates a situation that could incentivize EDCs to propose measures that will erode the availability of competitive market products. For this reason, it might be appropriate for the Commission, at the conclusion of this proceeding, to open a proceeding to investigate the adoption of alternative default suppliers as a way to

remove the advantages enjoyed by EDCs as the default service providers and the perverse incentives to erect barriers to electricity market competition.[8]

Q. PLEASE SUMMARIZE RESA'S RECOMMENDATIONS.

A. FE's proposals, individually and collectively, will be extremely detrimental to the competitive electricity market and, if adopted, will result in residential customer choice being eliminated and will reduce options for small commercial customers. FE should be ordered to support the development of a robust competitive market. FE should not be permitted to implement policies and procedures that will effectively eliminate the competitive market. Rather, the Commission should refocus FE on coming up with policies supporting market forces and the expertise of sophisticated market participants who have been managing risk on behalf of customers for a quarter of a century in Pennsylvania. The Commission should direct FE to move away from passing wholesale supply risk to retail customers who are ill-equipped to manage the risks being passed along to them. FE should also discontinue practices that subsidize default service at the expense of other customers because it results in an electricity product that becomes more and more difficult to compete against. To be clear, in this context, the ability to compete has nothing to do with price. In this context, default service is moving away from a full requirements service and to a consumer-risk product. Under the FE proposals, risk is flowing directly to end-use customers instead of remaining with default service suppliers.

[8] The definition of "Default service provider" in the Competition Act specifically contemplates that the default service role may be provided by an EDC "or an alternative supplier approved by the Commission." *See* 66 Pa. C.S. § 2803.

This is in contrast with the spirit and the letter of the Competition Act[9] and the Act 129 amendments to the Competition Act.[10] FE is supporting its proposals through nothing more than an illusion of lower prices in the short run while sacrificing customers' well-being in the longer run. FE's proposals give rise to significant uncertainty and risk for default service customers and significantly diminish their ability to have a wide variety of competitive supply options offered by EGSs. If implemented, FE's proposals will eliminate many, if not all, options for residential customers to protect themselves in whatever manner the customer deems appropriate for his or her situation. To prevent this, I am recommending that the Commission should:

1. Reject FE's proposal to return residential customers to default service at the expiration of their initial term of contract, retaining the workably competitive status quo;
2. Reject FE's proposal to require a quarterly affirmation from customers on variable priced contracts, retaining the workably competitive status quo;
3. Reject FE's proposal to change its Purchase of Receivables ("POR") program, retaining the workably competitive status quo;
4. Reject FE's proposal to allow Network Integrated Transmission Service ("NITS") charges to be avoided by default service suppliers and have customers bear the risk of NITS price fluctuations, retaining the workably competitive status quo;
5. Modify FE's proposal to eliminate its $4.00 adder on Hourly Priced Service ("HPS") customers;
6. Make an affirmative proclamation that comparing default service costs to suppliers' costs is a meaningless calculation that leads to misleading market guidance;
7. Reject FE's proposal to eliminate the residential and small commercial standard offer customer referral program, retaining the benefit for customers;

[9] 66 Pa. C.S. §§ 2801 *et seq*.

[10] Act of Oct. 15, 2008. P.L. 1592, No. 129.

8. Affirm FE's proposal to place the costs and responsibilities for Alternative Energy Portfolio Standards ("AEPS") Act compliance on the default service suppliers; and

9. Ensure that the 5-year wholesale contract for residential default service is procured as full requirements service with no pass-through costs to customers.

Q. ARE YOU SPONSORING ANY EXHIBITS?

A. Yes. I am sponsoring the exhibits set forth in the Table of Exhibits following the Table of Contents to this testimony.

II. FE'S PROPOSALS ARE REGRESSIVE, RISKY, AND COSTLY TO CONSUMERS

Q. HAVE YOU READ THE PETITION AND SUPPORTING TESTIMONY FILED BY FE IN THIS PROCEEDING?

A. I have.

Q. WHAT IS YOUR INITIAL REACTION TO FE'S PETITION?

A. I find FE's petition and proposals in this proceeding to be inconsistent with an evolving energy market, inconsistent with several initiatives underway at the Commission currently, in direct conflict with long-standing regulations and particularly punitive to shopping and non-shopping customers. As noted above, the proposals appear to be designed to eliminate competitive options for customers and are particularly damaging to residential customers. FE has seen first-hand, through its Potomac Edison affiliate in Maryland, the impacts of its proposed changes on the competitive market in FE's Maryland service territory, where the residential shopping rate is 0.2%. It is almost as if the Maryland legislature wrote the playbook for FE's petition in this matter.

Today's conversations about retail restructuring often focus on costs, particularly in comparison to default service prices. What is omitted from these discussions is any

reference to risk. A U.S. Government Accountability Office Report to the U.S. Congress affirmed the value of the transfer of risk under market restructuring stating:

> [W]holesale and retail competition could also provide a mechanism by which the financial risks associated with building new electricity generating plants can be transferred from consumers to private companies and their shareholders. In the old regulatory environment, utilities built the bulk of new generating plants after first identifying an expected need for the new plants and after gaining approval from state regulators. Once approved and built, the cost of building and operating the new generators was passed on to consumers, because the utilities were allowed to capture these costs in the prices set by the regulators. Therefore, consumers bore the financial risk associated with investments made by utilities.[11]

I understand that FE is not proposing to build new generation with their proposals, but it is seeking to move risk to consumers, while at the same time, seeking to eliminate the options that customers have to protect themselves from those risks — including selecting from a variety of competitive supply options.

Q. DO YOU HAVE ANY "REAL WORLD" EXAMPLES SHOWING THAT THE TYPES OF CHANGES PROPOSED BY FE WILL HARM CUSTOMERS AND THE COMPETITIVE ELECTRICITY MARKET?

A. Yes. The neighboring state of Maryland, where FE operates its Potomac Edison utility affiliate, passed SB-1 in 2024. The Maryland legislation included, among others, the following provisions, which are very similar to the proposals in FE's Petition, and which materially harmed the competitive electricity market:

1) Residential electricity supply contracts other than for renewable energy had to be priced below the trailing 12-month average of the host utility's standard offer rate;[12]

---

[11] US Government Accountability Office, Report to Congressional Requesters, *Lessons Learned from Electricity Restructuring, Transition to Competitive Markets Underway, but Full Benefits Will Take Time and Effort to Achieve*, GAO-03-271, December 2002, available at https://www.gao.gov/products/gao-03-271.

[12] Maryland's standard offer service is the equivalent of Pennsylvania's default service.

2) Residential supply contracts could not exceed 12 months;
3) Inability to auto-renew renewable energy contracts;
4) Prohibited variable rate contracts that varied with anything other than seasonality and changed not more than twice in a single year; and
5) Removed POR capabilities from the market.

The Maryland Public Service Commission tracks electricity shopping by customer class and reports monthly on the number of customers that shop. In January 2024, before SB-1 was enacted, 12.8% of residential customers in the state were taking competitive supply service. In January 2026, the most recent month for which data is available, the statewide residential shopping percentage stood at 0.3% and at 0.2% in FE's Maryland service territory.[13] These changes had negative impacts on customers who ended up being forced to remain with the utility for supply service. Utility prices have risen significantly since January 2024 and customers have been left with no options to shop for a competitively priced electricity product.

Q. DID CONSUMERS COMPLAIN ABOUT THESE CHANGES?

A. There has been enough outcry from consumers about their lost choices that during its 2026 legislative session that ended on April 13, the Maryland General Assembly passed HB-1532, known as the Utility RELIEF Act, in an effort to reenergize electric choice in the state.[14] The bill, awaiting Governor's action, repealed some of the provisions of SB-1.

[13] *See* Maryland Public Service Commission, Electric Choice Monthly Enrollment Reports, available at: https://psc.maryland.gov/regulated-utilities/electricity/electric-choice-enrollment-reports/.

[14] H.B. 1532, 2026 Leg., Reg. Sess. (Md. 2026).

Q. WHAT WAS THE IMPACT OF THE CHANGES FROM SB-1 ON THE ELECTRICITY MARKET IN FE'S MARYLAND UTILITY TERRITORY?

A. A mere 0.2% of residential customers are shopping in FE's service territory. FE has first-hand knowledge of the impacts of these types of changes, and they should be reviewed by the Commission with that knowledge. As I show below, these changes are made under the guise of affordability. The proposals will cause customers' costs to increase. They have much to do with forcing customers back to the utility's default service and decimating the availability of competitive supply options. The proposals aim for the worst possible outcome for customers — high costs and no options.

Q. COULD YOU EXPLAIN WHAT YOU MEAN BY SAYING "UNDER THE GUISE OF AFFORDABILITY"?

A. Yes. FE defends many of its proposals by saying that they will lower costs to consumers. They will not lower costs; rather, they will remove competitive supply options from the market while shifting additional risk to customers. Attempting to lower a short-term price in isolation – particularly when achieved by transferring risk – is not synonymous with improving affordability. For example, economic literature and read-work market experience demonstrate that pricing structures that reflect actual wholesale market outcomes – such as prices tied to the PJM hourly locational marginal pricing ("LMP") – more accurately align customer costs with underlying cost of electricity supply. Over time, this methodology is expected to produce lower overall costs than fixed-price products based on forward-looking estimates.[15] Fixed-price products are necessarily based on forecasts of future market conditions, which may deviate materially from

[15] *See, e.g.,* Severin Borenstein, *The Long-Run Efficiency of Real-Time Electricity Pricing*, Energy Institute at Haas, and related literature finding that prices reflecting marginal wholesale costs improve efficiency and reduce total system costs.

realized costs over time. Pricing that directly reflects wholesale market outcomes—such as pass-through of locational marginal prices – will likely result in customers experiencing the most volatile set of prices over time. This simple example shows a risk/reward tradeoff. A customer might get the lowest prices over time, but the customer might also experience high prices over some periods of time and unpredictable prices all the time. FE's proposals are not moving toward the volatility of hourly prices to customers, but they move in the same direction by shifting meaningful wholesale market risks to customers over a multi-year horizon. At the same time, FE proposes to eliminate or impair the very competitive market options that allow customers to manage those risks in a manner that best suits their individual preferences. In effect, FE is offering customers a product that may appear to lower cost in the short term, but really embeds greater long-term uncertainty and removes the tools customers would otherwise have to protect themselves. That is not improved affordability -- it is simply a transfer of risk from sophisticated electricity market participants to customers who are not equipped to manage it, while simultaneously eroding their opportunity to select from a robust competitive market.

Q. CAN YOU EXPLAIN WHY YOU BELIEVE THAT THESE PROPOSALS ARE ANTI-COMPETITIVE?

A. Yes. They are anti-competitive in several ways that I will detail throughout this testimony.

Q. DO ANY OF FE'S PROPOSALS IMPAIR THE ABILITY OF EGSS TO OFFER AFFORDABLE ELECTRICITY AND RELATED SERVICES TO ITS CUSTOMERS?

A. Yes. Several of FE's proposals will directly impact a supplier's cost to serve. As seen in Maryland, these proposals erect major barriers to retail competition. Fewer competitive

offerings have a negative impact on the long-term affordability of electricity for customers. I will discuss each of these flawed proposals in more detail below.

Q. COULD YOU SUMMARIZE YOUR REVIEW OF THE PETITION IN THIS PROCEEDING WITH RESPECT TO ENERGY AFFORDABILITY?

A. The proposals do not meaningfully address affordability in any way. The proposals are generally a reversal toward a vertically integrated utility model where customers bear all the risk and utility shareholders reap the rewards. FE's proposals add risks and costs to retail consumers that are not borne by consumers today. That risk transfer does not equate to lower prices or affordability generally. Most importantly, FE has offered no sound legal, policy, business or economic arguments to support the changes it seeks. FE's proposals also increase the cost to EGSs to develop competitive offers, which leads to an increase in the EGS's costs to serve. Increases in cost to serve negatively impacts an EGS's ability to offer meaningful competitive supply products leaving customers with no viable option but default service. Most notably, FE is also completely silent about system and process changes to implement its proposals. Presumably, like other utility costs, these will be recovered from all captive ratepayers. The proposals offer a lose-lose-lose scenario for customers which includes higher prices, greater risk exposure, and fewer competitive supply options. I discuss each of the FE proposals in detail below.

III. <u>THE LITANY OF COST AND COMPETITIVENESS ISSUES</u>

Q. YOU MADE NINE RECOMMENDATIONS IN YOUR INTRODUCTION; CAN YOU PROVIDE MORE SUPPORT FOR YOUR RECOMMENDATIONS?

A. Yes. I would like to discuss each recommendation individually, and then I will offer a summary showing how many of the proposals are interrelated, offering a compounding cost and anti-competitive effect on consumers and on the competitive electricity market.

A. Return of Customers to Default Service at the End of Their Contract Term

Q. COULD YOU DESCRIBE YOUR UNDERSTANDING OF FE'S PROPOSAL TO FORCE CUSTOMERS BACK TO DEFAULT SERVICE AT THE CONCLUSION OF THEIR CONTRACT TERM?

A. Yes. FE is proposing a provision to require that an EGS's residential customers be returned to default service at the conclusion of their EGS contract term, absent an affirmative choice to remain with the EGS in response to the notices required by Commission regulations related to expiring contracts.[16] In addition, FE is proposing that, beginning on June 1, 2027, "EGSs will be required to provide an attestation of affirmative customer consent on a quarterly basis for all residential customers on variable-priced month-to-month products."[17]

Q. COULD YOU EXPLAIN WHY THIS WOULD BE HARMFUL TO CUSTOMERS AND TO THE COMPETITIVE ELECTRICITY MARKET?

A. Certainly. The reasons are numerous. At its core, FE's proposal seeks a reversal of longstanding Commission policy and regulations by requiring duplicative "affirmative consent" to renew an EGS contract and remain with the customers chosen supplier. Important to remember is that the customer already provided affirmative consent upon enrollment with the EGS and the terms of the contract for enrolling with that EGS. The rulemaking process enacting the current contract renewal rules was an almost three-year process that included comments from more than a dozen stakeholders, including trade associations that represent dozens of additional companies and millions of customers. The U.S. Federal Trade Commission also weighed in on the rulemaking. Clearly, the

[16] FE PA St. No. 1 (Young) at 20.

[17] *Id.* at 21.

final regulations issued by the Commission in that docket were well informed. Specifically, under its proposal, FE seeks a waiver of 52 Pa Code § 54.10(3), which provides as follows in the situation where a customer does not respond to contract expiration notices:

> (i) A fixed duration contract shall be converted to one of the following:
>
> > (A) A month-to-month contract, either at the same terms and conditions or at revised terms and conditions, as long as the contract does not contain cancellation fees.
> > (B) Another fixed duration contract, as long as the new contract includes a customer-initiated cancellation provision that allows the customer to cancel at any time, for any reason, and does not contain cancellation fees.[18]

The regulation also requires that:

> (ii) The converted contracts shall remain in place until the customer chooses one of the following options:
>
> > (A) Select another product offering from the existing EGS.
> > (B) Enroll with another EGS.
> > (C) Return to the default service provider.[19]

These regulations are very clear and direct. These regulations mandate specific obligations on the EGS to ensure customers are well-informed about their options upon expiration of their existing contract and within the terms already agreed to in the original contract. Most importantly, the Commission adopted these regulations after a thorough review and rejection of the same arguments offered by FE in this case. There is nothing new in FE's filing to justify a reversal of the Commission's long-standing view of

[18] 52 Pa. Code § 54.10(3)(i)(emphasis added).

[19] *Id.* § 54.10(3)(ii).

affirmative consent and the processes EGSs are required to follow upon expiration of an existing customer contract.

Q. ARE THERE OTHER POLICY REASONS FOR THE COMMISSION TO REJECT THIS PROPOSAL?

A. Yes, there are many. First, the FE proposal to return customers to default service is nothing more than slamming. 52 Pa Code § 57 Subchapter M comprise the Standards for Changing a Customer's EGS. The regulations require a customer or the customer's designated representative to contact either an EGS or the EDC to effectuate a change of supplier. In fact, according to the regulations, the only time these switching rules do not apply are "when the customer's service is discontinued by the EGS and subsequently provided by the default service provider because no other EGS is willing to provide service to the customer."[20] It takes two conditions for the EDC to switch a customer on its own accord. First, the current EGS must be unwilling to provide service. Second, no other EGS will provide service to the customer. FE's proposal would not require a showing that either of those conditions has been satisfied, let alone both of them. In addition to the waiver FE is seeking, the Commission would also need to waive 52 Pa Code § 57 Subchapter M and then would also need to create some authority that does not exist to allow FE to implement its proposal to return customers to default service. FE's total disregard for these clearly enunciated Commission policies and decisions is indicative of the recklessness of FE's proposal. It is evident the proposal was not well thought through or supported with any meaningful testimony. Also, as I will discuss shortly, recent Commission decisions have continued to reject proposals to automatically

[20] *Id.* § 57.178.

return customers to default service or to automatically move customers to competitive supply.[21]

Q. CAN YOU EXPLAIN SOME ADDITIONAL PROBLEMS WITH THE PROPOSAL?

A. FE's policy amounts to invalidating a customer's choice. FE has no insight into the customer's decision making process or the terms of the contract between the customer and an EGS. There are many industries where residential consumers have term-based contracts that auto-renew absent a consumer's direct action. These industries include cellular phones, auto insurance, homeowners' insurance, cable or streaming services, newspaper and magazine subscriptions, and basic internet services, to name just a few. Those industries would struggle to exist if an affirmative renewal was required at the end of every subscription period. It is unfathomable that a customer's choice would be negated in any of those industries, either through an automatic cancellation of service or an involuntary switch to another provider. Customers would be irate and the suppliers' costs would skyrocket in an effort to retain their customers. Said another way, customers expect their services agreements to continue automatically unless they take action to the contrary. The Commission's long-standing policy and current rules require EGSs to

---

[21] *See Petition of the Boroughs of Camp Hill, Carlisle, Hatboro, Lansdowne, Media, Narberth, State College and Swarthmore for a Declaratory Order Regarding the Implementation of Community Choice Aggregation*, Docket No. P-2024-304963 (Opinion and Order entered Aug. 14, 2025), at 68 (appeal pending) ("The Boroughs expressly request an acknowledgment that the Commission will authorize them "to transfer residents and resident small businesses to CCA supply without advance consent.[] Restated Petition, App'x A at 3. As such, **granting the Boroughs' requested authorization would directly violate Section 2807(d)(1) of the Code and require the Commission to exceed its authority by permitting the type of slamming that the Choice Act prohibits**."); *Petition of PECO Energy Co. for Approval of Its Default Service Program for the Period From June 1, 2025 Through May 31, 2029*, Docket No. P-2024-3046008 (Opinion and Order entered Nov. 7, 2024) at 74–81 ("We also agree with RESA that **customers paying more for EGS service than the PTC does not necessarily prove that a harm is occurring, because customers could be making shopping decisions based on factors other than price, such as the specific product offered or the length of the contract**.")

provide customers specific and detailed information about their renewal options and what will occur if they do not take affirmative action. It would be extremely anti-competitive and against well-established precedent for the Commission to allow FE to slam customers back to default service simply because a customer took no action in response to a notice provided by FE.

Moreover, such a policy could potentially harm a customer financially. FE has not — and cannot — promise that its default service price will be lower than a supplier's renewal term. In fact, FE has stated that under its proposal, it would return customers to default service even if the default service price was higher than the contract price.[22] As such, FE's proposal truly has nothing to do with affordability. Additionally, FE will not know if there is a renewal incentive provided in the customer's original contract. For example, a contract might offer a cash back award for every three months of customer loyalty. There could be other intrinsic value in the supplier's contract that would be negated by FE's actions to slam customers back to default service. A customer on a contract for renewable energy would be forced back to default service that meets only the minimum amount of renewable energy as required by AEPS. As the Commission itself has noted in its most recent Retail Electricity Choice Report, which provides data from 2024, "Green Power" customer accounts increased by more than 7%, with approximately 43% of all residential shopping customers choosing renewable energy products.[23]

---

[22] *See* Exhibit FL-3, FE PA Response to RESA Interrogatory, Set 1, No. 14.

[23] *See* Pa. Pub. Util. Comm'n, *Retail Electricity Report, Activity Report 2024*, (December 2025), at 32. Of the total 1,261,894 residential shopping customers, 540,248 selected "Green Power" which the report defines as "a retail customer account incorporating electric power supply that has greater-than-required renewable content." The Report is available at: https://www.puc.pa.gov/media/3747/retail-elec-choice-report-2024-final.pdf.

FE's actions might potentially interfere with a customer's contract to provide services to the wholesale market under FERC Order Nos. 745 or 2222. PJM operates on a plan year that begins in June and many of its contracts, like capacity (including demand response), are annual commitments that align with their plan year. Moving a customer back to default service might create a situation where a retail supplier might be forced into a non-compliance situation with PJM and not be able to compensate the customer for services provided under those programs. This could financially harm the customer, jeopardize the operational reputation of the supplier, and potentially expose the EGS to financial penalties from PJM or sanctions from the Commission (or FERC). FE has failed to mention any of these complications that are directly related to its proposal.

Energy opportunities for residential customers are growing significantly with market opportunities created by FERC Order No. 2222. In fact, the Commission has an open docket currently looking at rules to facilitate Order No. 2222 implementation.[24] Some of the opportunities under these programs might be enabled by a supplier investing in resources deployed at a home, such as controllable thermostats, storage resources, EV charging stations or others. The supplier will be less inclined to make these investments if it knows the customer will be forced back to utility service if the customer fails to take an action based on a renewal notice. If affordability was truly a concern, then an alternative proposal FE could consider would be to require renewal notices to default service customers. Any customer who did not affirmatively state that they wanted to stay on default service would be randomly assigned to suppliers that had a lower priced

[24] *Distributed Energy Res. Participation in Wholesale Markets*, Docket No. L-2023-3044115.

product listed on the PA PowerSwitch website that aligned with the six-month default service term.

Q. HOW DOES THE PROPOSAL TO SLAM CUSTOMERS BACK TO DEFAULT SERVICE IMPACT ENERGY AFFORDABILITY?

A. The proposal has a direct and negative impact on energy affordability. The proposal would create more costs for customers in a number of ways. Notably, FE did not even mention its own costs to implement its proposals (which would be borne by captive ratepayers), even though there can be no doubt the proposals will lead to increased costs for FE. Implementation will certainly require systems changes. FE will need to implement new processes to monitor each contract. FE will need to create systems to account for and confirm (or reject) affirmative renewals. Presumably, FE will need new processes and systems to communicate with customers about the forced return back to utility default service. FE will undoubtedly see an increase in call volumes to their call centers seeking answers about those communications, as well as an increase in consumer complaints. FE has not provided data about the anticipated financial impact of its proposals on its overall costs which will almost certainly be passed on to captive ratepayers. For all these reasons, FE's proposal to have residential customers provide affirmative consent to renew the contract or be slammed back to default service is nothing more than an attempt to move one step closer to a re-regulated market. It must be rejected by the Commission.

Q. CAN YOU EXPLAIN HOW EGSS CAN ADDRESS AFFORDABILITY FOR RESIDENTIAL CUSTOMERS?

A. Yes. As I noted above, home energy resources are being developed that allow a customer to actively manage its energy usage. Supplier technological capabilities are also evolving to assist in the management of the energy devices. A coalition of distributed energy

resource ("DER") providers has filed comments in the Commission's rulemaking on FERC Order No. 2222 implementation.[25] In those comments, the Coalition shared a retail power invoice from a Tesla customer. Tesla is an active electricity market participant in Texas and participated in a DER pilot in Texas that was designed to test the potential benefits of an active DER wholesale participation market.

That invoice is shown below. It is a much more informative bill than customers get in Pennsylvania, but it is worth exploring to show the potential benefits from an evolving energy market. The invoice includes some fixed $/kWh units billed. It also shows variable $/kWh units billed for energy sold back to the market. The variable priced "revenue" units are tied back to a table that is referenced but not shown on the invoice. It also includes a large negative lump sum of $40.00 for "Virtual Power Plant Credits." It includes the charges from the wires utility and taxes. All of these charges, when netted, sum to a negative $13.14 monthly invoice, with an accrued balance due to the customer of over $700.

[25] *Distributed Energy Res. Participation in Wholesale Markets*, Docket No. L-2023-3044115 (CADRE Comments filed May 29, 2024), at 69–70.

This example from Texas is representative of the types of value that EGSs can provide to a customer. This is how EGSs can address affordability. FE's proposal to slam customers back to the utility would eliminate any progress toward this market opportunity in the FE service territories. Suppliers would be unwilling to make any material investments in customers if there was a high risk of the customers being

slammed back to default service. How would FE handle the complaints from a customer receiving a negative bill from a supplier that was forcibly switched to default service? Would FE pick up the responsibilities of the contract that it slammed? And, if so, would those added costs be passed on to all ratepayers? Or alternatively, would the services that were being provided prior to the slam just disappear?

Q. CAN THE FE SYSTEMS HANDLE THE TYPE OF INNOVATIVE RETAIL ELECTRIC TRANSACTIONS YOU ARE REFERRING TO?

A. FE cannot generate an invoice with this type of detail on it. The most important aspect of FE's systems that is relevant to achieving success with this type of product is FE's energy metering and settlement systems. I am informed by members of RESA that FE settles its individual customers' load based on actual customer usage data and not based on rate class or segment profiles. It also calculates a customer's capacity and NITS tags at the individual customer level. With that data, EGSs can implement those cost-saving products and services. Once PJM fully implements its FERC Order No. 2222 implementation, I would expect to see a rapid evolution of innovative products in Pennsylvania.

Q. IS THE COMMISSION GENERALLY SUPPORTIVE OF INNOVATIVE PRODUCTS AND SERVICES?

A. Commission Chairman DeFrank was recently quoted saying, "With rapidly growing demand for energy — especially from commercial and industrial users — it's vital that we use every tool in the toolbox to improve efficiency, better integrate our gas and electric systems, and control long-term energy costs for consumers and businesses

alike."[26] Residential retail customers have the potential to become a significant energy resource for the market. FE will negate this potential with its proposal to force customers back to default service.

Q. HAS THE COMMISSION EVER LOOKED AT THIS ISSUE IN THE PAST?

A. Yes. Most recently in November 2024, the Commission was not persuaded by PECO and the advocates' proposal that shopping customers in PECO's Standard Offer Customer Referral Program ("SOP") should be returned to PECO's default service automatically at the end of the 12-month SOP contract.[27] The decision was consistent with the exact same determination made by the Commission in 2020 in the context of PPL's Default Service Plan V proceeding.[28] Based on my read of the PECO order, the Commission concluded that the proposal was contrary to its regulations and precedent similar to my discussion on this issue previously. Also importantly, the Commission agreed with RESA "that **customers paying more for EGS service than the PTC does not necessarily prove that a harm is occurring, because customers could be making shopping decisions based on factors other than price, such as the specific product offered or the length of the contract**."[29]

[27] *Petition of PECO Energy Co. for Approval of Its Default Service Program for the Period From June 1, 2025*, Through May 31, 2029, Docket No. P-2024-3046008 (Opinion and Order entered Nov. 7, 2024), at 74–81.

[28] *Petition of PPL Elec. Utils. Corp. for Approval of Its Default Service Plan for the Period June 1, 2021 through May 31, 2025*, Docket No. P-2020-3019356 (Opinion and Order entered Dec. 17, 2020), at 2, 44–45, 92, 98.

[29] *Petition of PECO Energy Co. for Approval of Its Default Service Program for the Period from June 1, 2025*, Through May 31, 2029, Docket No. P-2024-3046008 (Opinion and Order entered Nov. 7, 2024), at 74–81.

The Commission also recently addressed this issue in the context of a request that all customers be moved to EGS supply offered through a community aggregation program unless they affirmatively opted out of such transfer. According to that 2025 order:

> The Boroughs expressly request an acknowledgment that the Commission will authorize them "to transfer residents and resident small businesses to CCA supply without advance consent." Restated Petition, App'x A at 3. As such, **granting the Boroughs' requested authorization would directly violate Section 2807(d)(1) of the Code and require the Commission to exceed its authority by permitting the type of slamming that the Choice Act prohibits**.[30]

While I am not offering a legal opinion, my read of these two recent orders makes clear that the Commission does not support changing a customer's supplier (whether EGS or default service providers) on an automatic basis as FE is proposing in this proceeding.

Q. COULD YOU DESCRIBE FE'S PROPOSAL TO REQUIRE A QUARTERLY AFFIRMATION FROM CUSTOMERS ON MARKET BASED RATE CONTRACTS?

A. FE is proposing that effective June 1, 2027, EGSs will be required to provide an attestation of affirmative customer consent on a quarterly basis for all residential customers on variable-priced month-to-month products.[31] In testimony, FE describes the proposal further by saying:

> Residential customers who select month-to-month variable products will be required to affirmatively consent, on a quarterly basis, to remain with their existing EGS. If the EGS does not affirm customer consent each quarter for those accounts on month-to-month variable rate products through an electronic data interchange ("EDI") transaction, the customer will be returned to default service.[32]

[31] FE PA St. No. 1 (Young) at 21–24.

[32] *Id.* at 23.

Q. CAN YOU EXPLAIN WHY THE COMMISSION SHOULD REJECT THIS PROPOSAL?

A. Yes. Without repeating what I said above about why Commission precedent and existing regulations directly contradict FE's proposals and the negative consequences of sending a customer back to default service at the conclusion of a fixed term contract, those same arguments should be considered as reasons to reject this proposal. For all of those reasons, FE's proposal to require a quarterly affirmation from customers that they wish to remain on an EGS's month-to-month variable contract must be rejected.

Q. IS FE PLANNING TO DEPLOY LEGAL RESOURCES TO REVIEW EGS CONTRACTS AND QUARTERLY AFFIRMATIONS TO ENSURE THAT THEY ARE INTERPRETED CORRECTLY AND IN ACCORDANCE WITH ANY POTENTIAL DECISION RENDERED BY THE COMMISSION ON THESE ISSUES?

A. FE has not identified any implementation plans, nor has it identified any costs associated with its implementation plans. Additionally, while I am not a lawyer, I am advised by counsel that the Commission lacks jurisdiction to interpret EGS contracts, so I fail to see how such authority can exist for FE. Moreover, I understand from counsel that the Competition Act prohibits the Commission from regulating the price for generation so, again, I fail to see how FE has any legal, statutory, or regulatory authority to define, govern, or interpret any contractual terms or relationships between a customer and an EGS to evaluate the price of supply.[33] FE has no basis to even suggest that it could or should be allowed to interpret a retail electricity contract.

[33] *See, e.g.*, *Naborn and Pronko v. Direct Ener. Servs., LLC,* Docket No. F-2023-3037611 (Opinion and Order entered Mar. 4, 2024); *Yaglidereliler Corp. v. Blue Pilot Ener., LLC*, Docket No. C-2014-2413732 (Opinion and Order entered Jan. 16, 2015) (citing *Allport Water Auth. v. Winburne Water Co*., 393 A.2d 673 (Pa. Super. Ct. 1978)).

B. Changes to the Purchase of Receivables Program

Q. PLEASE EXPLAIN A PURCHASE OF RECEIVABLES ("POR") PROGRAM.

A. A Purchase of Receivables, or "POR," program is a billing and payment mechanism under which the electric distribution company purchases the receivables associated with a customer's supply charges from the supplier when the customer is billed through utility consolidated billing. The utility then includes those charges on the customer's bill and is responsible for billing, collection, and credit management of the full amount owed.

Q. WHAT ARE THE BENEFITS OF A POR PROGRAM?

A. The benefits of a POR program are primarily realized by customers through improved billing simplicity, broader access to competitive supply options, and more effective collection processes. First, POR enables customers to receive a single, consolidated bill from the utility that includes both distribution and supply charges. This is the most familiar and preferred billing format for residential customers and avoids the confusion and inconvenience associated with multiple bills.

Second, POR supports a more robust competitive retail market by removing a key barrier to supplier participation. By standardizing the billing and collection process through the utility, POR allows a wider range of suppliers to offer service to customers. Increased supplier participation leads to greater product diversity, innovation, and customer choice.

Third, POR leverages the utility's existing, ratepayer-funded billing and collection infrastructure, which includes the most effective tool for addressing nonpayment — the ability to terminate service. Because only the utility has the authority to disconnect service for nonpayment, integrating supply charges into the utility's collection process significantly improves the likelihood that all charges on the bill will be paid. This reduces the risk of unpaid balances and helps lower overall system costs for customers.

Absent a POR program, customers receiving a single utility bill could pay only the utility portion of the bill and continue to receive service, while supplier charges remain unpaid. This creates inefficiencies, increases costs, and ultimately discourages supplier participation. POR addresses this problem by aligning billing, payment, and collection into a single, effective system that benefits customers.

Q. HAS THE COMMISSION BEEN SUPPORTIVE OF POR PROGRAMS?

A. Yes. The Commission has expressly recognized that the availability of a POR program is in the public interest. Specifically, the Commission's regulations state that "[t]he public interest would be served by the consideration of an EGS receivables purchase program in each service territory." 52 Pa. Code § 69.1814. That policy statement reflects the Commission's broader objective of supporting a properly functioning competitive retail market that provides meaningful options to residential and small business customers. POR programs are an important component of that framework because they facilitate utility consolidated billing, promote consistent billing and collection practices, and reduce barriers to entry for competitive suppliers. In addition, through its approval of default service plans and billing frameworks across Pennsylvania's electric distribution companies, the Commission has repeatedly allowed and maintained POR programs as part of the market structure supporting customer choice. The continued use and preservation of POR across service territories reflects the Commission's recognition that these programs support customer access to competitive supply options while maintaining the convenience of a single bill and the effectiveness of utility-based collections. Taken together, the Commission's regulations and long-standing practice demonstrate that POR programs are not properly viewed as just a supplier accommodation, but also as a

customer-focused mechanism that supports competition, billing simplicity, and efficient market operation.

Q. HOW LONG HAS FE'S CURRENT POR PROGRAM BEEN IN PLACE?

A. FE's POR program has been in place for more than a decade, having been approved by the Commission as part of its Default Service Plan III and maintained in each subsequent default service plan.[34]

Q. CAN YOU EXPLAIN WHAT CHANGES FE IS PROPOSING FOR ITS PURCHASE OF RECEIVABLES ("POR") PROGRAM?

A. Yes. FE is proposing that "for all contracts entered into after June 1, 2027, EGSs on [utility consolidated billing] must use 'rate-ready' billing and charge a rate that is at or below the PTC at the time of the customer's enrollment transaction or rate change transaction to be eligible for POR for that customer account."[35]

Q. CAN YOU EXPLAIN WHY THESE PROPOSALS SHOULD BE REJECTED?

A. FE's proposal to limit service to certain EGS products is a form of price regulation, a practice in which it has no authority to engage.[36] Under its proposal, FE is proposing to revamp a long standing financial program to make it available to EGSs only if the EGS meets FE's pricing criterion — a criterion that fluctuates from month to month, and from zone to zone. Because FE has no authority to regulate an EGS's price or services to

[35] FE PA St. No. 1 (Young) at 21.

[36] *See* 66 Pa. C.S. § 2806(a) ("The generation of electricity shall no longer be regulated as a public utility service."); *see also Coalition for Affordable Util. Servs. and Energy Efficiency in Pa. v. Pa. Pub. Util. Comm'n*, 120 A.3d 1087, 1101 (Pa. Commw. Ct. 2015) ("[T]he PUC lacks the authority to regulate EGS rates under Chapter 13 . . . mean[ing] that the PUC may not review EGSs rates to determine whether the rates are 'just and reasonable.'").

customers, and the Commission also has no authority to regulate EGS pricing, I fail to see how FE can use price as a condition to limit the availability of a long-standing Commission-approved program that was meant to establish billing parity for EGS charges. Additionally, I am informed by counsel that Pennsylvania law requires FE to treat all businesses and customers similarly.[37] FE is not allowed to discriminate against an EGS on the basis of its price to customers.

Q. ARE THE PROPOSALS TO LIMIT POR SERVICES IN THE PUBLIC INTEREST?

A. No. Each of these proposals is contrary to the public interest, as defined by Commission regulation. 52 Pa. Code § 69.1813 states: "[t]he public interest would be served by the consideration of the availability of rate and bill ready billing in each service territory." Similarly, 52 Pa. Code § 69.1814 states: "[t]he public interest would be served by the consideration of an EGS receivables purchase program in each service territory." FE has already implemented rate ready and bill ready billing and a functional POR program. The proposed changes result in fewer options for customers by eroding the ability of EGSs to offer them competitive supply options. This is contrary to the public interest and a fundamental goal of competition. As discussed above, the implementation of these proposals will necessitate costs for FE to retract these options from the market, and these costs will likely be passed on to captive ratepayers. The implementation costs have been completely ignored by FE but would certainly be an amount greater than zero. With its proposals, FE is essentially seeking to spend ratepayer funds to decrease options in the

[37] *See, e.g.*, *Interstate Gas Supply, Inc. v. Pub. Util. Comm'n*, 343 A.3d 1152, 1159 (Pa. 2025) ("Section 1502 prohibits a public utility from acting in a discriminatory manner in the performance of its duties under the Code.").

competitive electricity market. The proposals to change the POR program make little sense for consumers and could be costly to implement, all while eroding the availability of competitive options. As such, they are contrary to the public interest and must be rejected. The proposal to limit service to an EGS and the EGS's customers based on a pricing metric is far beyond the authority of FE and, as counsel advises me, contrary to the law. FE's proposals to modify its POR program are a lose-lose-lose proposition for customers and the competitive market, and must be rejected.

Q. DOES FE'S PRICE TO COMPARE OFFER ANY VALID COMPARISON TO AN EGS'S CONTRACT PRICE OFFERED TO A CUSTOMER?

A. It does not. The price to compare is a backward-looking "metric" that includes many true-ups and price adjustments. FE's price to compare does not obligate FE to provide any service at that price at any point in the future. An EGS contract price, by contrast, is a forward-looking actionable price at which a supplier is obligated to provide goods and services to a customer.

Q. ARE THERE OTHER REASONS TO REJECT THESE CHANGES TO THE POR PROGRAM?

A. Yes. In the discussion about affordability, I mentioned the complexity of evolving products and services and included a bill from a customer in Texas showing a negative monthly bill and a significant accrued balance owed to the customer. FE's billing system and POR program cannot generate a bill of that complexity for delivery to a customer. However, a "bill-ready" format could be used so that a customer could continue to get a single bill for electricity service. A rate-ready requirement that allows for a "singular rate" cannot support that type of innovation. FERC Order No. 2222 will be fully operational in PJM well before the conclusion of FE's proposed DSP VII cycle. An energy product emanating from that program in Pennsylvania could include a flat

monthly fee that would allow for unlimited off-peak EV charging, a fixed rate for all on-peak energy consumption, a monthly rebate for EV charging control, a separate monthly rebate for thermostat or pool pump control, a premium rate if customers override the controlled devices, and a shared savings component for resources offered that reduce the capacity or NITS tags. A single "rate ready" rate is wholly inappropriate to support such a product. A bill-ready platform could be used to send the customer a single bill (albeit significantly less informative than ideal) for monthly services. This product might be as simple as a flat monthly charge for electric service, or something more complex as discussed above. The Commission should reject FE's proposal to eliminate bill-ready billing options for EGSs.

Generally, the market is moving forward and FE's proposals are moving backward. Today, FE should be thinking about ways to improve its billing system so that it can bill complex products and services that help to educate customers, while enabling customers (especially small customers) to receive a single electricity bill.

Q. DID FE PROVIDE ANY ANALYTIC SUPPORT FOR ITS PROPOSALS TO LIMIT THE POR PROGRAM?

A. The information provided was certainly not convincing, as it showed trends *improving* over the last three years. For example, FE shows that total clawback charges related to EGS charges have dropped by over 50% since 2023. Also, the number of EGS who were assessed with clawback charges has dropped from 22 in 2022 to only 16 in 2025. FE also asserts that only four (4) suppliers (out of 116) incurred clawback charges three years in a row. These are two facts that negate FE's arguments regarding clawback charges. First, if the clawback charges were paid, then the tariffs and provisions are working and there is no need for a change. Second, the fact that only 3.4 percent of the EGSs in the market

are being called out by FE with respect to the clawback process is good news. It is not a reason to change the market. While not stating the affirmative reality, FE is telling the Commission that almost 97% of the market is *not* incurring multiple years of clawback charges. Even in the year showing the highest percentage of companies being assessed with clawbacks, only 18 percent of suppliers were assessed with the charges. This happened in 2022, which was an especially troubling year for many customers. The economy was still recovering from the COVID-19 pandemic and electricity market prices were conspicuously high for the majority of the calendar year. It would not be a sound policy choice to change a program that is working for 97 percent of the market. If action needs to be taken, it should be directed at the issue, not at the program. To be clear, FE's assertion that "charges were assessed" does not indicate a problem. If the assessments are being paid, it indicates that the program is in fact working to protect customers exactly as it was designed to do.

Q. HAS FE TRACKED ANY DIFFERENCES ON ISSUES LIKE PAYMENT ARRANGEMENTS, DISCONNECTIONS AND DISCONNECT NOTICES, AND BAD DEBT EXPENSES BETWEEN DEFAULT SERVICE AND COMPETITIVE SUPPLY CUSTOMERS?

A. According to FE, it has "not tracked or analyzed any of [that] information separately for customers served by an EGS versus those on default service."[38]

Q. HAVE YOU SEEN ANY EVIDENCE IN THIS PROCEEDING THAT SUGGESTS THAT EGSS AND THEIR CUSTOMERS ARE IMPOSING AN INORDINATE

[38] *See* Exhibit FL-4, FE PA Response to OCA Interrogatory Set 1, No. 16.

BURDEN ON FE OR RATEPAYERS AS A RESULT OF BAD DEBT EXPENSE OR OTHER ISSUES RELATED TO COLLECTIONS?

A. I have not. FE has reported that it had at year end 2025, about $9.5 million in arrearages from customers who each owed more than $10,000. Only approximately $457,000 (less than 5% of the total) was from EGSs' customers.[39] A similar analysis showed that when looking at who FE defines as low-income customers, less than 4% of the large balances are from EGS customers.[40] The residential shopping rate across the FE footprint is approximately 18–19%.[41] This indicates that the high debt problem lies more with default service customers than with EGS customers.

Q. DOES THE DATA FE PROVIDED TELL A COMPLETE STORY ABOUT THE POR PROGRAM?

A. FE's presentation of this data is classically one-sided and as a result, it does not show any actionable information. It has no context. For example, how does the uncollectible debt data compare to FE's overall uncollectible balance? What is the true uncollectible amount if the clawbacks are recovered as designed. Have any suppliers not paid the clawbacks? FE did not mention any. With such limited context and such minimal harm (if any at all) from the current program, there is no justification for a change. And as shown above, if the data is analyzed even as presented, the raw numbers themselves show good results and improving trends. FE's proposals for changing its POR program should be rejected by the Commission.

[40] *See* Exhibit FL-6, FE PA Response to CAUSE-PA Interrogatory Set 1, No. 28.

[41] Pa. Office of Consumer Advocate, *Pennsylvania Electric Shopping Statistics As of July 1, 2025*, available at: https://www.oca.pa.gov/wp-content/uploads/Electric-Shopping-Statistics-July-2025.pdf.

Q. DID FE INDICATE HOW MANY EGSS UTILIZE THE RATE READY AND BILL READY SERVICES?

A. I did not see any reference to the number of EGSs that use the different systems, but in discovery, FE reported that literally hundreds of EGSs use each system across their different companies. In total, about 60% more EGSs use bill ready systems than rate ready systems.[42] I do not support FE eliminating either of the systems, but to eliminate the one with the most EGS use seems intentionally punitive and anti-competitive. The Commission should reject FE's proposed POR changes.

Q. MR. YOUNG ALLEGES THAT EGSS HAVE THE RIGHT TO INCREASE A RESIDENTIAL CUSTOMER'S RATE TO A LEVEL MUCH HIGHER THAN THE DEFAULT SERVICE RATE. HOW DO YOU RESPOND TO THAT?

A. This is a very pedestrian argument that ignores an important aspect of market restructuring — EGS customers are not captive to the EGS. This is fully reinforced by the Commission's long-standing policies and regulations I discussed earlier that require EGSs to provide specific and detailed notices to their customers prior to the expiration of their supply contract so that the customers are fully informed about their rights. Moreover, Mr. Young unreasonably fails to mention that there are no price caps on default service and that default service rates change with little predictability from a customer's perspective. I find Mr. Young's concerns to be unavailing. He appears to simply dislike competition in electricity markets and the Commission's regulations that govern competition.

---

[42] *See* Exhibit FL-7, FE Response to OCA Interrogatory Set 1, No. 22.

Q. HAS FE ADDRESSED ANY DETAILS ABOUT HOW IT WOULD IMPLEMENT ANY OF ITS POR CHANGES?

A. It has not. There are no details about personnel requirements. There are no details about systems changes. There are no details about the differences between current customers and future customers. There is no detail at all beyond the desired end result — i.e., limit the availability of POR based on EGS pricing. FE's request is, therefore, flawed from both sides. First, FE did not present any data to support financial harm to customers under the current system. Second, FE has not provided any analysis of their anticipated costs and other obstacles likely to occur to implement the program. FE has simply proposed a change that will reduce competitive supply options for customers and increase customer costs both in terms of implementation costs and paying a higher default service rate. FE's POR proposals are extremely bad policy and must be rejected by the Commission.

Q. ARE THERE OTHER WAYS FOR THE COMMISSION TO SUPPORT THE CONVENIENCE OF A SINGLE BILL FOR MASS MARKET CUSTOMERS?

A. Yes, the Commission has a few alternatives to consider. It could preserve the existing POR program, which is available to all EGSs regardless of whether the EGS uses the rate-ready or bill-ready platform. While this does limit the development of innovative products and services and the communication of the value of those products (as I discussed earlier), it is far better than tearing down this program completely, which is the likely result if FE's proposal is adopted. Alternatively, the Commission could direct FE to develop a more robust billing system that undertakes a serious effort to accommodate flexible and innovative products and services from suppliers, though it is unlikely that FE could ever build a system to meet the varying needs of a diverse set of suppliers and product offerings. If the Commission wanted to move uncollectible risk to suppliers,

(which is what FE is claiming it is trying to do here), then the Commission could consider issues such as outsourced billing agents, alternative default service providers, and/or supplier consolidated billing. These latter options could be incentivized to provide customers with better information about supply and market options / conditions. The point is, while there may be better options for customers than the current POR structure, adopting FE's proposal to restrict POR availability based on an EGS's contract price will likely erode the availability of competitive offers to customers (and "competitive" to the customer may or may not be based solely on price). A far superior path forward, in the interest of customers, would be to maintain the current POR structure and focus on some of the alternatives I identified as well as others that might be developed through a collaborative process.

C. Allowing Default Service Suppliers to Bypass NITS and DOE Cost Obligations

Q. COULD YOU PROVIDE YOUR UNDERSTANDING OF FE'S PROPOSAL WITH RESPECT TO NITS COSTS IN DEFAULT SERVICE?

A. Yes. My understanding is that for residential and small commercial customer default service procurement auctions, FE is proposing to create an auction product that is exclusive of NITS costs. FE will pass through any actual changes to NITS costs to default customers when the NITS costs change in the market.[43] FE will "retain NITS responsibility and will recover [the costs] through a bypassable rider on default service customer bills."[44]

[43] FE PA St. No. 2 (Rose) at 16.

[44] FE PA St. No. 3 (Powers) at 4.

Q. WHAT IS FE'S RATIONALE FOR THIS CHANGE?

A. FE presents two arguments to support this proposal. First, it suggests that this change will facilitate increased wholesale supplier participation in the auctions. FE also argues that "everyone else does it this way," stating that its proposal is "consistent with other Pennsylvania EDC's treatment of these charges."[45]

Q. HOW DOES FE SUPPORT ITS CLAIM THAT IT WILL ATTRACT MORE SUPPLIERS IN THE DEFAULT SERVICE AUCTIONS?

A. FE's Petition states that the removal of NITS is to "facilitate increased supplier participation in auctions."[46] However, FE's testimony focuses on something quite different and argues that "because of the increase in transmission spend, removing NITS from the auction will reduce the supplier risk premium and therefore reduce the overall cost to customers."[47]

Q. COULD YOU RESPOND TO THAT ARGUMENT?

A. Yes. First, FE does not in any way support its contention that there will be an increase in transmission spend. As the transmission-owning utility most relevant to this proceeding, FE should be required to disclose its expected "increase in transmission spend" over the duration of the default service period if it is going to justify such a big change to default service because of that alleged spend. FE should also be required to disclose any information that it is aware of from other transmission owners that might impact NITS

---

[45] FE PA St. No. 2 (Rose) at 16.

[46] *Petition of FirstEnergy Pa. Elec. Co. for Approval of its Default Service Program for the Period June 1, 2027 to May 31, 2031*, Docket No. P-2026-3060298 (Petition of FirstEnergy filed Feb. 5, 2026), at 20.

[47] FE PA St. No. 2 (Rose) at 16.

costs. FE's arguments are a grossly misleading characterization of the impact of this change with no actual data presented to support FE's speculations.

Despite this, FE is moving NITS price risk directly to default service consumers (shopping customers will continue to bear the cost of an EGS's risk assessment of NITS costs). This proposal does not reduce these costs for default customers; rather, it ensures default service customers will be required to bear the full costs. In fact, FE's introduction to that claim — "because of the increase in transmission spend" — demonstrates that FE knows transmission costs are going to increase (even though FE elected not to provide any actual data to establish by how much). Instead, FE just asks the Commission to ensure that default service customers will pay for the actual and full costs of these increases. This is the opposite of what happens currently, where default service suppliers must use their risk management expertise to factor projected future costs in the default service bid. This is what EGSs must do for their customers. Ultimately, the suppliers bear the risk of actual future costs, not default customers as FE proposes to do in the future. For these reasons, FE's NITS proposal is a step backward and exposes default service customers to greater price risk than they face today.

Q. UNDER THIS PROPOSAL, IS THE RISK PREMIUM REMOVED AS FE SUGGESTS?

A. The risk of changing transmission costs for default customers does not go away by adopting FE's proposed change to NITS recovery. Rather, default customers will pay no matter what and, if other proposals in this proceeding are adopted, it is likely those customers will not have competitive options from which to choose an alternative supplier. Importantly, under the FE proposal, the risk and risk premium still exists, but the proposal guarantees that the price change (increase) will be borne in full by the

default service customer. Because the suppliers are not being asked to manage the risk, the magnitude of the risk premium is unknown and customers are worse off for it. Managing that risk is better placed with a default service supplier than with each individual customer.

Q. COULD YOU PROVIDE AN EXAMPLE OF HOW THIS UNCERTAINTY WILL PLAY OUT OVER TIME?

A. Yes. Using hypothetical numbers, under the default service product that exists today (NITS included), the auctions might yield a price of 10 cents per kWh that will be applicable for the term of the active contracts. If FE's proposal for NITS is adopted, and that cost is unbundled, the default rate might move down to 8 cents with a 1.9 cent NITS adder, or 9.9 cents total. When the transmission rates are adjusted, as FE notes, they are likely to increase. That might make the adder 2.1 cents or maybe 3.1 cents, increasing the default service rate to 10.1 cents or maybe 11.1 cents, respectively. The customer will not know until after it happens and is reflected in a future default rate, and the customer will be required to pay the full cost of the NITS increase. Under the current contracting process, the wholesale supplier might charge 10.2 cents for the two-year period, bearing the entirety of the risk of a NITS increase. If the future NITS obligation is 2.0 cents, the supplier will have "won" the hedge bet. If the NITS obligation is 3.0 cents, the supplier will have "lost" the hedge bet. So, the question then for the Commission is: what is best for the consumer — allowing expert risk managers (default service suppliers and EGSs) to price products based on their expertise and bear their own risk of miscalculations, or ensuring default customers will always bear the full cost that will likely be increasing by an amount that is unknowable to most customers? It is clear that the former results in a better outcome for the consumer.

Q. FE CLAIMS THAT ALL OF THE OTHER EDCS MANAGE NITS AS THEY ARE PROPOSING IN THIS PETITION. IS THAT RELEVANT?

A. It is not relevant, as the Commission has steadfastly approved FE's current approach since 2014.[48] FE currently includes NITS in its default service procurement contracts. In this proceeding, the only reasons presented by FE for the change were to attract additional suppliers to the auctions and to remove default supplier risk premiums. In 2020, when the Commission last reviewed this issue, the Commission's five-year forecasted electricity usage growth rate was 0.19%.[49] Based on a similar 2025 Commission report, "the total average annual aggregate five-year energy usage growth projection for the residential, commercial, and industrial classes is projected to increase by 6.17% per year."[50] Additionally, depending on the transmission zone, "Pennsylvania's summer peak load growth is projected to range between 0.1% and 5.9% annually over the next ten years, while the winter peak load growth is projected to range between 0.1% and 5.8% annually over the next ten years."[51] Since 2020, the forecasted electricity growth rate has increased by more than 32 times. This has direct implications for transmission costs and the growth of transmission costs. While FE has provided no data to ascertain the anticipated level of increase, I do not dispute that increases are likely. This change in market dynamics is exactly why the Commission should, in this proceeding, reject the placement of NITS risk on default service customers and require

---

[48] *Joint Petition of Metropolitan Edison Co., Pa. Elec. Co., Pa. Power Co. and W. Penn Power Co. for Approval of their Default Service Programs*, Docket Nos. P-2013-2391368 et al. (Opinion and Order entered July 24, 2014), at 53.

[49] Pa. Pub. Util. Comm'n, *Electric Power Outlook for Pennsylvania 2019-2024* (Aug. 2020), Exec. Summary, at iii.

[50] Pa. Pub. Util. Comm'n, *Electric Power Outlook for Pennsylvania 2024-2029* (Aug. 2025), at 28–29.

[51] *Id.* at 3 (citing PJM Load Forecast Report January 2025).

FE to maintain the status quo of requiring the wholesale default service suppliers to factor in this risk as part of their bids to supply default service. As discussed previously, this creates an equal playing field with EGSs that must do the same risk calculations when formulating their competitive supply products. In each case, either the wholesale default service supplier or the EGS bears the risk of miscalculations, not the retail customer.

Q. HAS FE EXPRESSED ANY SENTIMENT THAT DEFAULT SERVICE SUPPLIERS ARE UNABLE OR UNSUITED TO MANAGE NITS RISK?

A. It has not. In fact, Nicholas Powers from the Brattle Group, on behalf of FE, testified that

> Winning [default service] suppliers must act as sophisticated portfolio managers, acquiring energy, capacity, and ancillary services from PJM markets and managing the risks of load variability, fuel-price changes, and customer migration. Because suppliers compete on price to provide these services, the auction design ensures that the most efficient risk managers—and therefore the lowest-cost suppliers—are selected.[52]

From FE's testimony, the "most efficient risk managers" will win the auctions. That is how default service should work. The "most efficient risk managers" should also be capable of shielding customers from NITS risks. And if those suppliers are unable to manage that risk, they will likely not participate in the auction process. But as Mr. Powers noted, "[p]articipation in prior full-requirements default service procurements has remained consistently robust."[53] Those prior auctions included the placement of NITS responsibility on the suppliers.

Q. HAVE YOU READ MR. POWERS' TESTIMONY?

A. I have.

---

[52] FE PA St. No. 3 (Powers) at 21 (emphasis added).

[53] *Id.* at 10.

Q. DO YOU HAVE ANY CONCERNS WITH HIS TESTIMONY?

A. I do not agree with all of his conclusions, but I have one significant concern with his testimony. He continually refers to the auctions as acquiring full-requirements electricity service. For example, he states that "[t]he residential default service portfolio will consist of 12-, 24-, and 60-month fixed-price full-requirements tranches"[54] and that "[c]ommercial load will continue to be served through a mix of 12- and 24-month full-requirements procurements."[55] These are simply untrue statements. For example, it is not possible that prior default service auctions and the proposed default service auction are both for full requirements service. They are seeking different products. Notably, the proposed auction does not include NITS. Omitting NITS from the wholesale default service contracts necessarily means that they are not full-requirements contracts. Mr. Powers' conclusions, therefore, about compliance or conformance with Act 129 should be viewed with skepticism as he leans on the concept of full requirements contracts in making those conclusions. I discuss this in more detail below.

Mr. Powers' testimony also contradicts FE's primary rationale for removing NITS from default service procurement. Mr. Powers argues that:

> Participation in prior full-requirements default service procurements has remained consistently robust. In recent auctions conducted for DSP VI, the number of registered bidders ranged from eight to nineteen, depending on the procurement class and delivery period. These results demonstrate continued supplier interest and confidence in the competitive design of the auction process. The level of participation indicates that qualified wholesale suppliers

[54] *Id*. at 4.

[55] *Id.*

> view the Company's procurement framework as transparent, well-structured, and capable of producing fair market outcomes.[56]

Thus, based on this testimony alone, there is no need to protect the wholesale default suppliers by transferring NITS risk to consumers "to facilitate increased participation in auctions."[57]

Q. UNDER THIS PROPOSAL, ARE THE DEFAULT SERVICE SUPPLIERS PROVIDING "FULL REQUIREMENTS SERVICE"?

A. They are not. Under FE's proposal, the default service suppliers will not be procuring full-requirements service in the respective auctions.

Q. DO YOU VIEW THIS PROPOSAL AS BEING ANTI-COMPETITIVE?

A. I do. It creates a difference between a default service and an EGS product that provides another economic advantage to FE's default service. It creates a system that requires a higher price for the EGS to hedge the risk that default service suppliers are not providing. As discussed above, the product differences complicate competitive transactions and, when successful, the transaction fuels certain advocates' arguments (as invalid as they are) that suppliers are charging more than default service providers. Whether viewed through the lens of economics or policy positioning, this is an anti-competitive proposal. The default service suppliers should be required to continue to include fixed NITS prices in their offers to provide default service.

---

[56] *Id.* at 10–11.

[57] *Petition of FirstEnergy Pa. Elec. Co. for Approval of its Default Service Program for the Period June 1, 2027 to May 31, 2031*, Docket No. P-2026-3060298 (Petition of FirstEnergy filed Feb. 5, 2026), at 10.

Q. HOW COULD THE COMMISSION OVERCOME THE COMPETITIVENESS PROBLEM THAT YOU DESCRIBE?

A. I see only two viable options for the Commission to resolve the competitiveness issue with respect to NITS costs. The Commission could require FE to procure NITS for all customers, shopping and non-shopping, in a manner that is similar to how FE recovers its non-market based charges, or the Commission could reject FE's proposal to pass through the risk on NITS changes to customers and maintain the status quo whereby wholesale default service bidders are required to factor into their bids the cost of NITS. I am informed by Counsel that the Commission has previously rejected a proposal to have FE recover NITS costs for all customers. With that as precedent, the only fair resolution of this issue (and the best resolution for customers) is to have the default service suppliers continue to include NITS costs in their offers to provide default service. This latter option is more aligned with the fundamental premise of market restructuring which aligns risk with those who are equipped to manage the risk and not pass the risk through to customers.

Q. ARE YOU FAMILIAR WITH ANY OTHER COMMISSION POLICIES OR ORDERS THAT MIGHT PROVIDE GUIDANCE ON THE ISSUE OF WHETHER PASS-THROUGH COSTS SHOULD BE ALLOWED IN A DEFAULT SERVICE CONTRACT?

A. Yes. In 2013, the Commission issued an order on guidelines for use of fixed price labels for products with a pass-through clause.[58] In its order, the Commission created a definition of a "Fixed Price" EGS Contract, which is "[a]n all-inclusive per kWh price that will remain the same for at least three billing cycles or the term of the contract,

[58] *Guidelines for Use of Fixed Price Labels for Products With a Pass-Through Clause*, Docket No. M-2013-2362961 (Final Order entered November 14, 2013).

whichever is longer."[59] While this definition only applies to EGS contracts, the Commission linked it in principle to wholesale default supply contracts through a discussion of the need to be able to compare products to the default service product. In its order, the Commission cited Section 2807(d)(2) of the Public Utility Code, which states in part that:

> [T]he commission shall establish regulations to require each EDC, EGS, marketer, aggregator and broker to provide adequate and accurate customer information to enable customers to make informed choices regarding the purchase of all electricity services offered by that provider. Information shall be provided to consumers in an understandable format that enables consumers to compare prices and services on a uniform basis.[60]

The Commission also noted the Office of Consumer Advocate ("OCA") opinion that, per the Commission's Chapter 54 Regulations, "customers must be able to compare prices on an apples-to-apples basis."[61] Under FE's proposal, coupled with the Commission's definition of a fixed price contract, it would be impossible for consumers to compare prices between default service and a supplier's fixed price contract on a uniform basis. This is not because EGS's are changing the definition of fixed price; it is because FE is proposing to change the definition of default service by passing through NITS charges. In its order, the Commission expressed a primary concern "that these offers can be misleading, especially when the EGS prominently advertises a fixed price but places the pass-through clause far down in the fine print in the disclosure statement."[62] In this

---

[59] *Id.* at 35.

[60] *Id.* at 4.

[61] *Id.* at 9.

[62] *Id.* at 5.

instance, FE is proposing the misleading offer, by placing the pass-through clauses in the fine print of their tariffs.

Found on the second page of the default service rider, the equation used by FE to explain the NITS obligations is almost indecipherable:

$$PTC_{Default} = (PTC_{Current} + E) \times [1 / (1 - T)]$$

$$PTC_{Current} = (PTC_{Current\ Cost\ Component} \times PTC\ Loss_{Current}) + PTC_{Adm} + PTC_{NITS}$$

$$E = \{[(DS_{Exp1} + DS_{Exp2}) - PTC_{Rev} + DS_{Int}] / DS_{Sales}\}$$ [63]

This equation is followed by about three pages of tariff text defining each of the terms in the equation. For all of the above reasons, the Commission should reject FE's proposal to move the NITS obligation out of the default service supply contracts.

Q. COULD YOU PROVIDE YOUR UNDERSTANDING OF FE'S PROPOSAL WITH RESPECT TO DOE SECTION 202 CHARGES?

A. FE is proposing to "[a]dd items 1935 and 2935, Department of Energy; Billing which are associated with the emergency orders issued by the U.S. Department of Energy ("DOE") pursuant to section 202c of the Federal Power Act and will be the responsibility of the 'Buyer' for recovery from customers."[64]

Q. DO YOU CONSIDER THIS TREATMENT OF DOE COSTS TO BE COMPETITIVELY NEUTRAL?

A. I do not. This is another cost that default service suppliers should be responsible for hedging. I understand that this cost is probably not going to rise to the level of volatility for default service customers as NITS charges will, but it is still a cost for which default service suppliers should be responsible. I adopt all of my arguments related to NITS

---

[63] FE Proposed Price to Compare Default Service Rider, at revised page 204.

[64] FE PA St. No. 2 (Rose) at 17.

costs here and urge the Commission to require that the DOE Section 202(c) charges be included in the default service supplier bids. It is not necessary or helpful to consumers to have FE be the buyer of these services and then pass the price changes through to those consumers.

D. Elimination of $4.00 Adder for HPS Customers

Q. COULD YOU DESCRIBE FE'S PROPOSAL TO ELIMINATE THE $4.00 ADDER FOR HPS CUSTOMERS?

A. Yes. FE was very light on detail. In response to a question that asked "[i]s anything changing in the hourly-priced product?", FE testified that "there will no longer be a $4.00 per MWh adder for winning suppliers in the hourly-priced auctions. Suppliers will need to consider all costs of providing full-requirements supply in their bid price."[65] FE witness Powers added only a bit more detail, testifying that:

> Industrial default service load will be priced based on the PJM real-time market. Suppliers will compete for this load through an auction process where they will bid an additional adder to cover any costs (or profit margin requirements) of the capacity, ancillary services, AEPS Act, and other costs that are part of the full-requirements obligation.[66]

Q. WHY ARE YOU SUGGESTING THAT FE MODIFY THE PROPOSAL TO ELIMINATE THE $4.00 ADDER AND HAVE IT REPLACED WITH A COMPETITIVE BID PROCESS.

A. There are a few reasons. In principle, I support the concept of a competitive bid process for "capacity, ancillary services, AEPS Act compliance," and other costs that are part of the full-requirements obligation. However, that is not what is being solicited under the FE proposal. NITS is missing from the full-requirements discussion. The modification I

---

[65] *Id.* at 16.

[66] FE PA St. No. 3 (Powers) at 21.

recommend is that NITS charges should also be included in this competitive procurement consistent with the status quo.

Q. HOW DOES FE RECOVER ITS OWN INTERNAL COSTS TO SERVE THESE HPS CUSTOMERS, FOR COSTS LIKE BILLING AND CALL CENTERS?

A. Those costs are recovered in distribution rates. FE's Hourly Pricing Default Service Rider includes an HP Administrative Charge ("Administrative Charge"). That charge is currently set to $0.00006 per kWh (6/1000th of a cent/kWh). The Commission should require FE to include all of its costs to serve HPS customers in this Administrative Charge. This includes unbundling its costs for billing, customer care, computers, billing systems, desks, chairs, offices, office expenses, personnel to perform and/or manage these functions, personnel to run the supply auctions, personnel to schedule and deliver the power, and a litany of other costs incurred to serve these customers. Any costs collected in the Administrative Charge should be refunded to HPS distribution ratepayers so that there is no net overcollection of costs from customers.

Q. SHOULD THIS UNBUNDLING OCCUR FOR THE RESIDENTIAL AND SMALL COMMERCIAL RATE CLASSES AS WELL?

A. It should, but this is probably not the correct docket to perform that complete analysis. FE stated in its Petition that its rates were unbundled or functionally disaggregated into rates for generation, transmission, and distribution.[67] FE's HPS rider currently includes an adjustable line item for administrative costs. This is an appropriate docket to adjust default service rates for the HPS customers to reflect the cost to serve them.

---

[67] *Petition of FirstEnergy Pa. Elec. Co. for Approval of its Default Service Program for the Period June 1, 2027 to May 31, 2031*, Docket No. P-2026-3060298 (Petition of FirstEnergy filed Feb. 5, 2026), at 4.

Q. WHAT WOULD THIS EXERCISE ENTAIL?

A. Generation and transmission costs would not be included in this analysis. Only distribution costs would be reviewed. And within the entirety of distribution costs, only a small portion of those would be considered. Costs for the physical distribution infrastructure and costs incurred to maintain and service that infrastructure would be excluded. That leaves the costs to serve. Costs to serve are incurred to serve distribution and default service customers, so those remaining costs would need to be allocated (or functionally disaggregated) between distribution and default service. An unbundling of these costs for a small segment of customers in this docket could be used as a model across the Commonwealth to determine the overall value of such an exercise.

Q. COULD THIS ANALYSIS BE DONE BEFORE THE HEARING SCHEDULED IN THIS PROCEEDING?

A. It likely could not. But because the adjustable rider already exists for these customers, the Commission could order the analysis to be done over the next six months and by the time the default rates were implemented, the appropriate adjustments could be included in the tariffs approved in this proceeding.

E. <u>Comparisons of Supplier Rates to Price to Compare</u>

Q. HAVE YOU REVIEWED THE FE ANALYSIS OF SUPPLIER RATES TO ITS PRICE TO COMPARE?

A. I have.

Q. DO YOU HAVE ANY CONCERNS WITH THE ANALYSIS?

A. I have several. FE's analysis of rates is presented as an "apples-to-apples" comparison. However, the products being compared are not "apples-to-apples." The products are not even "apples-to-oranges" comparisons. FE has presented an analysis comparing what you could have paid for apples last month versus what you agree to pay for oranges, or

even a basket of fruit, for some period of time into the future, and FE has positioned the two as equivalent. The Price to Compare is a historic metric. A supplier's contracted price reflects an actionable, enforceable agreement to provide goods and services for a time period into the future.

Q. IS THE UTILITY'S PRICE TO COMPARE A COMPETITIVE PRICE?

A. No, it is not. FE has provided an interrogatory response that it believes the same to be true.[68] It is not a competitive price. While we may have different reasons for our beliefs, it should be noted that we share the same conclusion. The price to compare is nothing more than a "point in time" pricing metric for a wholesale electricity market passthrough of costs to a consumer.

Q. CAN YOU EXPLAIN WHY YOU BELIEVE DEFAULT SERVICE AND SUPPLIER SERVICE REPRESENT, IN YOUR WORDS, "APPLES AND ORANGES" PRODUCTS THAT ARE NOT THE SAME?

A. During the course of this debate, across many different jurisdictions, over many years, the arguments have been similar. Suppliers' contracts embed attributes that default service does not include. A good example of the fallacy of the comparison is to look only to PPL's rate case filed last year. A similar comparison was presented in that proceeding. It is a given that the default service products in the two markets are different in at least one way: PPL's default service does not include hedged NITS service, and FE's does. Yet no adjustment was made in either study to account for the product differences. The default service product price reflects a pass-through of wholesale energy costs and various

[68] *See* Exhibit FL-8, FE PA Response to EGS Interrogatory Set 1, No. 13.

adjustments that reflect a cost or series of costs that manifested in default service rate design at some period in the past.

To my knowledge, no proceeding hammers home the truth of product differences more than this instant proceeding. It shows that even default service products can differ. First, it highlights the difference between the current FE default service product and the PPL default service product that are the basis for the two comparisons. Also, in this docket, FE has proposed a fundamental change to its default service product with its proposal to pass through NITS costs to default customers. If the Commission allows that change, FE's default service product will be fundamentally different than it is today. So no matter what your opinion is on the comparisons, it has to be true that either the PPL comparison or the FE comparison is fatally flawed. In reality, they are both flawed.

If the Commission approves the NITS proposal, FE's default service will be in the future, without any reasonable dispute, a fundamentally different product than it is today. In contrast, a supplier's fixed price product to a consumer will not change. It will continue to include a hedge against fluctuating (and, according to FE, likely rising) NITS costs. From the perspective of an interested customer, the supplier's fixed cost product would be "better" and "more valuable." According to FE's testimony, the fixed price product is more valuable. Afterall, FE claims to be eliminating the NITS hedge to lower the cost of default service. So, FE's claims that it is seeking to lower the default service rate but removing NITS from the wholesale default supply product just guarantees the default service customers will pay full costs later making it harder to compare to an EGS' prices, which includes a non-recoverable risk assessment of the cost of NITS. Yes, despite this

hard evidence that the product is changing, the same irrelevant comparisons will most certainly be made in the future.

Q. YOU SUGGESTED EARLIER THAT THE COMMISSION COULD REQUIRE FE TO FURTHER UNBUNDLE SOME OF ITS DISTRIBUTION COSTS AND ALLOCATE THOSE COSTS BETWEEN DEFAULT SERVICE AND DISTRIBUTION. WHY IS THAT ALLOCATION IMPORTANT?

A. It is extremely important from a competitiveness standpoint and a cost comparison standpoint. Until the utility's costs to serve its customers are transparent and included in default service rates, the comparisons are further unjustified. While I recognize that this is not the right proceeding to seek true and full unbundling of the utility's costs to serve customers, it is a valid reminder of the fallacies intrinsic to the comparison of rates shown by Mr. Young.

Q. HAVE YOU REVIEWED THE HARD DATA PRESENTED BY FE THAT SHOWS THE DIFFERENCES BETWEEN WHAT SUPPLIER CUSTOMERS PAID VERSUS WHAT THEY COULD HAVE PAID IF THEY WERE ON DEFAULT SERVICE?

A. I have.

Q. WHAT IS YOUR RESPONSE TO THE DIFFERENCES PAID?

A. I cannot overemphasize the fallacies of the comparisons. For all of the reasons stated above, the analysis is irrelevant. Additionally, different products have different prices and customers leave default service for a multitude of reasons and at various times throughout the year. Some of those customers pay more and some pay less for the products they choose and whether they are paying more or less depends on the Price to Compare ("PTC") in effect at the time of comparison. However, there are also significant and more basic problems with Mr. Young's analysis. For example, Mr. Young's data is inconsistent. In his Table 6, which displays his comparison, he uses a baseline of 10.9 cents to calculate the value of costs where residential customers paid less

than the price to compare, and he used 10.8 cents/kWh to calculate the value of costs where customers paid more than the price to compare. It is possible that the 1/10 of a cent difference is not material, but it is an indication that the numbers are certainly not exact. Mr. Young also states that "FE PA compared amounts that its residential customers paid to EGSs over what would have been charged to those customers had they remained on default service for each month in 2025."[69] But according to data from FE, 10.8 cents per kWh is not reflective of FE's actual residential default service rates for 2025. For the first five months of 2025, only FE's West Penn and Penelec residential customers saw a price to compare below 10.8 cents. For the six months beginning in June 2025, default service rates were above 11 cents in Met-Ed, Penelec, and Penn Power (and almost 12 cents in Met-Ed and Penn Power). For the month of December 2025, each of the four service territories had a price to compare above 10.9 cents per kWh, with Met-Ed's rate being almost 13 cents per kWh.[70] The 10.8 (or 10.9) cent per kWh default service baseline used in Mr. Young's analysis does not appear to be an accurate or truthful representation of the default service rates charged by FE across their service territories.

FE's website regarding default service prices,[71] includes a historical summary of the various EDCs prices to compare and that data matches the data that was provided by FE in its response to the RESA interrogatory.

---

[69] FE PA St. No. 1 (Young) at 21.

[70] *See* Exhibit FL-9, FE PA Response to RESA Interrogatory Set 1, No. 6, Attachment A.

[71] *See* FE PA Historical Rates at: https://www.firstenergycorp.com/customer_choice/pennsylvania/pennsylvania_tariffs.html (data accessed on April 17, 2026).

Q. WHAT IS YOUR REACTION WHEN YOU SEE THE DIFFERENCES BETWEEN TABLE 6 IN MR. YOUNG'S TESTIMONY AND THE DATA FROM FE'S INTERROGATORY RESPONSE AND ON FE'S WEBSITE?

A. I have tried to reconcile the data sources, but I have been unable to do so. It seems that Mr. Young's analysis is using erroneous pricing information. Given the disparity in FE's own data, Mr. Young's analysis should be disregarded. If I happen to be incorrect on this issue and Mr. Young can show a reconciliation of the data sets, I then have to question the value of a published price to compare altogether.

Q. COULD YOU DESCRIBE WHAT YOU MEAN BY THE TERM "DISREGARDED"?

A. Yes. By "disregarded," I mean the Commission should ignore the analysis. It should also reject any proposal made by FE in this proceeding that is supported by that analysis. Specifically, Mr. Young uses the faulty analysis as his core reason for FE's proposed changes to its POR programs. After Mr. Young explains the POR changes, he is asked: "Why is FE PA proposing these changes, generally?"; his response is that he has "concerns regarding the amounts [FE's] shopping customers are paying in excess of PTC rates."[72] He then goes on to explain his analysis. Based on this as support for FE's proposal and for all of the policy reasons stated above with respect to the POR program, the Commission should reject these proposals.

Q. DO YOU HAVE ANY RECOMMENDATIONS TO THE COMMISSION ABOUT THESE PRICE COMPARISONS GENERALLY?

A. I do. I recommend that the Commission, in its order in this proceeding, issue a statement that expressly rejects the simplistic and misleading comparisons of supplier contract prices to the point in time PTC metric. I also recommend that the Commission issue an

[72] FE PA St. No. 1 (Young) at 21.

explicit order that prohibits FE from performing such misleading calculations and making them public. Supplier pricing information is proprietary and fiercely competitive, and the components within the suppliers' prices differ. Additionally, the comparisons are factually incorrect and lead to misleading and inaccurate information being disseminated to customers and policy makers.

Q. DOES FE, AS THE DEFAULT SERVICE PROVIDER, OFFER THE LOWEST PRICE ELECTRICITY IN ITS SERVICE TERRITORIES?

A. Before I respond, it is important to note that customers seek more than just the lowest price in electricity service. But the answer to the question is clearly *no*. Even with Mr. Young's extremely biased and inaccurate data, he showed that a group of shopping customers paid $3.1 million less than they would have paid on default service. Obviously, if Mr. Young's calculations used accurate data, that cost differential would be materially larger. Given the subsidies embedded in distribution rates and many other incumbent advantages enjoyed by FE in the competitive electricity market, the fact that customers can pay $3.1 million less than they would pay for default service is a great testament to the benefits of the competitive market. Suppliers offer multiple benefits to customers, whereas default service offers none. Suppliers bear all of the costs that support their businesses. Default service bears none. Despite the clear economic disadvantage, supplier offers can still provide customers with savings, if that is what they seek. That should be held as a remarkable achievement of electricity market restructuring.

Q. WHAT PERCENTAGE OF FE'S RESIDENTIAL CUSTOMER LOAD IS BEING SERVED BY EGSS?

A. The data in FE's testimony shows that 3.362 million MWh of residential load is being served by suppliers.[73] FE also presented data that shows total residential load across the four service territories of about 16 million MWH annually. That equates to about 20% of residential customers on competitive supply contracts, leaving about 80% (12.6 million MWh) taking default service. If those default service customers were moved from default service to a competitive supplier offering a 7/10th of a cent discount to default service, which is the same amount that Mr. Young calculated as the price delta for customers who paid less than the default service rate, those customers could have paid approximately $88 million less than what they paid to FE. If FE's actual default service rate was used in this calculation, the savings could have been significantly more than $88 million.

F. <u>Elimination of the Customer Referral Program</u>

Q. COULD YOU DESCRIBE THE CUSTOMER REFERRAL PROGRAM?

A. Yes. The customer referral program that FE seeks to eliminate is a program where residential and small commercial customers calling in to FE's call center are educated about customer choice and can be switched to a competitive supplier for electricity service, and the supplier guarantees a 7% discount from the default service price for a period of 12 months.

[73] FE PA St. No. 1 (Young) at 22 (Table 6).

Q. WHY DOES FE WANT TO ELIMINATE THAT CUSTOMER REFERRAL PROGRAM?

A. FE claims that supplier participation in the program has been declining and interest from the customers is "very low." FE states that only 10,367 residential customers are enrolled in the program. FE also states that supplier participation has decreased by 50% in three of the FE territories and by 100% in the Penelec territory.[74]

Q. WHAT IS YOUR REACTION TO FE'S REQUEST TO DROP THE CUSTOMER REFERRAL PROGRAM?

A. If affordability of energy for consumers was one of my concerns, the logical recommendation for this issue would be to put significant efforts into expanding the customer referral program, not shutting it down. FE should host a collaborative with stakeholders to understand why customer and supplier interest is waning and to understand from the stakeholders how the program could be improved. For example, I would want to know what the FE call center employees are telling customers about the program. Is the 7% discount, with no strings attached, being clearly communicated? Or are the employees layering their messages with multiple warnings about risks associated with choosing an electricity supplier? It is counter-intuitive that customers would not react to the opportunity to save 7%. FE's default service rates are scheduled to increase to between 12 and 14 cents per kWh across its service territories on June 1, 2026. If FE's weighted average residential default service rate was 13 cents per kWh, that referral program could save the residential customers currently remaining on default service more than $100 million over a 12-month period. Obviously, that potential is greater when

[74] *See* FE PA St. No. 4 (De La Rosa) at 11.

small commercial customers are included. For the sake of affordability, the Commission should reject FE's proposal to eliminate the customer referral program.

Q. HOW WOULD YOU DESCRIBE THE COLLABORATIVE THAT FE HOSTED TO DISCUSS THE REFERRAL PROGRAM?

A. In response to an interrogatory from the OCA, FE provided an email notice about the collaborative.[75] Within that email, FE invited approximately 28 people to the collaborative. The list of invitees included some FE people, some Exelon Employees, PUC and OCA staff, and a crew of lawyers — many of whom I know practice law in Harrisburg. Based on the email addresses, it appears that only one (or maybe two) suppliers were notified by FE of the collaborative. The email attached a spreadsheet detailing many attributes about the program, such as participation numbers, renewal numbers, and other basic information. According to the email, the scope of the collaborative was to "walk through these [spreadsheets] with you during the call." Instead of a collaborative, it appeared to be more of an explanation of the spreadsheet data. What is missing from the sense of a collaborative about the program is:

- Suppliers. There are over 100 suppliers operating across the FE utilities. They were largely not invited.
- Any discussion about potential improvements to the program.
- Any discussion of anything other than the data. It appears that seven people, exclusive of FE personnel, attended the collaborative and that FE "did not record any minutes, notes, or internal memoranda summarizing the results or discussions of the collaborative."[76]

[75] *See* Exhibit FL-10, RE PA Response to OCA Interrogatory Set 1, No. 23 Attachment A.

[76] *See* Exhibit FL-11, FE PA Response to OCA Interrogatory Set 1, No. 24.

My conclusion about the collaborative is that it was an initiative to justify closing the program. It was certainly not a discussion of identifying flaws and improving enrollment in the program.

Q. HOW DO YOU RESPOND TO FE'S DISCUSSION ABOUT THE COLLABORATIVE IT HOSTED ABOUT THE CUSTOMER REFERRAL PROGRAM?

A. During the one-hour session, one participant recommended the shutdown of the customer referral program and "none of the parties that attended the CRP collaborative requested that FE PA include a successor CRP in DSP VII."[77] Based on this testimony, I conclude that there was no discussion about improving the referral program. A customer referral program with parameters such as a guaranteed 7% discount has material affordability benefits. Customers should overwhelmingly favor a 7% discount on their electricity supply bill, especially if the customer has the flexibility to "terminate a CRP contract at any time without penalty, either to re-enroll in the CRP with a new rate, select another EGS, or return to default service."[78] Similarly, suppliers should appreciate the minimal costs to acquire a customer. This is the ultimate, easy, affordability step that FE should be promoting to all of its customers. It already exists, can be continued with no incremental cost to the utility, and it provides real affordability benefits.

Q. IN THE ABSENCE OF A PROGRAM WHERE CUSTOMERS CAN GET A 7% DISCOUNT ON THE SUPPLY PORTION OF THEIR ELECTRICITY BILL, DID

---

[77] FE PA St. No. 4 (De La Rosa) at 12.

[78] *Petition of FirstEnergy Pa. Elec. Co. for Approval of its Default Service Program for the Period June 1, 2027 to May 31, 2031*, Docket No. P-2026-3060298 (Petition of FirstEnergy filed Feb. 5, 2026), at 17.

FE OFFER ANY CONCESSIONS, DISCOUNTS OR PRICE REDUCTIONS ON THE DISTRIBUTION PORTION OF THE BILL?

A. It did not. FE did not even suggest that any of their internal costs would be reduced by eliminating the program. This represents more of the same -- increasing costs and fewer options to consumers.

Q. WHAT IS YOUR RECOMMENDATION FOR THE CUSTOMER REFERRAL PROGRAM?

A. I recommend that the Commission reject FE's proposal to eliminate the program. It seems nonsensical to eliminate the opportunity for customers to save 7% on the supply portion of the bill, especially in light of the fact that FE is not offering any type of discount on the distribution side of the bill, nor is it offering to eliminate costs from their operations because of the elimination of the Program. I also recommend that the Commission instruct FE to convene a meaningful collaborative where the primary goals for the session are to understand the weaknesses of the program and to make improvements to the program. The collaborative should set meaningful and achievable goals such as 50% of new customers opting in to the referral program. Call scripts should be reviewed and direct communication between the FE call center and suppliers' call centers should be streamlined. This program can address one aspect of affordability head-on.

G. AEPS Obligation Moving to DSP

Q. CAN YOU EXPLAIN FE'S PROPOSAL FOR THE INCLUSION OF AEPS COSTS IN DEFAULT SERVICE?

A. Yes. FE proposes to meet its "AEPS Act requirements as part of the solicitation of default service supply. Specifically, winning suppliers of full-requirements default service products in FE PA's Rate Districts will be responsible for meeting all Tier I and

Tier II requirements, including solar photovoltaic requirements."[79] Winning suppliers will also be responsible for changes to the AEPS requirements "due to federal or state law or any other reason."[80]

Q. DO YOU SUPPORT THIS CHANGE?

A. Yes. This change helps level the competitive playing field between default service and suppliers. The AEPS Act places obligations equally on suppliers and default service providers. EGSs, therefore, must meet the exact same obligations on behalf of their own customers. As the Commission considers this request, it should also consider FE's NITS request in the same light. FE's proposal for AEPS is competitively correct while FE's proposal to pass through NITS costs over time will harm customers and the competitive market.

H. Incorporation of a 60-Month Residential Contract

Q. COULD YOU EXPLAIN FE'S PROPOSAL FOR INCLUDING A 60-MONTH SUPPLY CONTRACT IN THE DEFAULT SERVICE PORTFOLIO?

A. In this DSP VII proceeding, FE is proposing to include a "60-month fixed-price full requirements product that will represent approximately 10% of [FE's] default service load at any time."[81]

Q. WHAT IS YOUR RECOMMENDATION WITH RESPECT TO THE INCLUSION OF A 60-MONTH CONTRACT IN THE DEFAULT SERVICE PORTFOLIO?

A. I do not have a recommendation on whether or not the Commission should approve inclusion of a 60-month contract; however, I have very strong opinions about some of the

---

[79] *Petition of FirstEnergy Pa. Elec. Co. for Approval of its Default Service Program for the Period June 1, 2027 to May 31, 2031*, Docket No. P-2026-3060298 (Petition of FirstEnergy filed Feb. 5, 2026), at 11.

[80] FE PA St. No. 2 (Rose) at 12.

[81] *Petition of FirstEnergy Pa. Elec. Co. for Approval of its Default Service Program for the Period June 1, 2027 to May 31, 2031*, Docket No. P-2026-3060298 (Petition of FirstEnergy filed Feb. 5, 2026), at 7–8.

elements of the proposal that I would like to share so that if the Commission allows the contract into the portfolio, it does so in a manner that is best overall for customers and the competitive market and in compliance with Act 129, which allows for long-term default service contracts.

Q. COULD YOU PLEASE ELABORATE ON THOSE OPINIONS?

A. Yes. First, I will point to the words in FE's own documents. It is proposing a "60-month fixed-price full requirements product."[82] In order to maintain competitive neutrality, the contracts procured must be full-requirements contracts. As I discussed previously, passing through actual NITS charges to default customers over five years does not constitute a full requirements contract. Allowing NITS pass-through where the default service supplier bears no risk (customers bear it all) is extremely damaging to the competitiveness of the market and also burdensome on the customers. From a customer perspective, would a residential customer enter a five-year competitive supply contract if he or she knew that one of the major components of that contract was completely variable and unhedgeable? That is the circumstance that an EGS would be confronted with if it tried to mirror the reality of FE's proposals or to compete on an apples-to-apples basis. This is a practice that the Commission prohibited in the proceeding concerning guidelines for use of fixed price labels for products with a pass-through clause. Not only is the NITS passthrough contract bad for customers, it is also bad policy from a competitive market standpoint and is contradictory to the policy that electricity products should be comparable "on a uniform basis." If an EGS sells a fully hedged product, all else being

[82] FE PA St. No. 2 (Rose) at 12–14.

equal, the fully hedged supplier contract would likely be more expensive than the unhedged default service product. And, as noted above, unless the Commission comes out with a strong statement disavowing the nonsensical price comparisons of the price to compare with EGS contract prices, the competitive market will be further harmed by the chorus of advocates decrying high EGS prices (as invalid and reckless as those claims are). For many reasons, any five-year contract should be a full-requirements contract, as FE claims it supports which means it must be inclusive of NITS charges as FE has always done.

Q. DO YOU HOLD THE SAME OPINIONS ABOUT THE CAPACITY COMPONENT OF THE FULL-REQUIREMENTS CONTRACT?

A. I do. I understand that changes were required in the past because the PJM capacity market was in flux and the three-year forward market construct was not kept to schedule. While the PJM market is reviewing options with respect to the capacity market, the three-year construct is still in place. By December 2026, we will have a high degree of certainty on capacity prices through May 31, 2030.

Q. HOW DO YOU SUGGEST THAT DEFAULT SERVICE SUPPLIERS MANAGE THE UNKNOWN CAPACITY PRICE RISK FOR THE TAIL END OF A FIVE-YEAR CONTRACT?

A. FE has stated that "[w]inning suppliers must act as sophisticated portfolio managers, acquiring energy, capacity, and ancillary services from PJM markets and managing the risks of load variability, fuel-price changes, and customer migration."[83] Capacity is sold through the PJM auctions. Several potential wholesale default service bidders own capacity resources. Capacity is also traded bilaterally through private transactions.

[83] FE PA St. No. 3 (Powers) at 21 (emphasis added).

Sophisticated portfolio managers should be fully qualified to manage capacity risk under a five-year contract.

FE is proposing to use the Capacity Price Proxy ("CPP") if "PJM does not conduct the BRA in time for default service suppliers to incorporate the auction results into their bids."[84] This price adjustment would arguably be acceptable during a period of time when PJM cannot or does not keep to its proposed auction schedule. However, in the instant matter, it is inappropriate to use the CPP because FE is proposing a contract that extends beyond the PJM planning horizon. Passing through these risks to customers provides no value to consumers and is detrimental to the competitive market and thus harms consumers. The Commission should reject any contract that does not meet the full requirements threshold.

Q. DO THE DEFAULT SERVICE CONTRACTS PROPOSED BY FE MEET THE STANDARDS REQUIRED 66 PA. C.S. § 2807(E)?

A. Not in my opinion testifying as an expert witness. As proposed, with NITS and capacity costs as pass-through costs to customers, the proposals do not meet the least cost standard. The statute says "the prudent mix of contracts entered into pursuant to paragraphs (3.2) and (3.3) shall be designed to ensure:" (i) adequate and reliable service; (ii) the least cost to customers over time; (iii) compliance with the requirements of paragraph (3.1).[85]

Contracts that do not include NITS and capacity cannot be deemed to be adequate and reliable. I understand that the contracts will be coupled with NITS and capacity at some

---

[84] *Petition of FirstEnergy Pa. Elec. Co. for Approval of its Default Service Program for the Period June 1, 2027 to May 31, 2031*, Docket No. P-2026-3060298 (Petition of FirstEnergy filed Feb. 5, 2026), at 13.

[85] 66 Pa. C.S. § 2807(e)(3.4).

point to ensure adequate delivery of electricity to the market, but the language of the statute clearly refers to "the contracts entered into . . ."; it does not say "the contracts entered into coupled with services provided by the default service providers." The proposed contracts, without NITS and capacity fully hedged, also fall short on the "least cost to customers over time" requirement. Without NITS and capacity costs properly hedged for the duration of the default service contracts, the Commission is not even equipped with the information needed to determine if the contracts meet the standard, because the "cost over time" will not be known until that time has passed. The basic requirement in the statute that mandates that contracts "shall be designed" to meet reliability and least cost standards itself is ignored by FE with its proposals for default service procurement.

As discussed above, the fundamental principle of electricity market restructuring was to move risk from customers to shareholders. Customers were supposed to get out of the pass-through of risk business with restructuring. Proposals for long-term contracts that exclude risk-based components should be rejected by the Commission.

IV. SUMMARY

Q. CAN YOU PLEASE SUMMARIZE YOUR TESTIMONY?

A. As shown, FE's proposals, individually and collectively, will be extremely detrimental to the competitive electricity market and if adopted, will result in residential customer choice being eliminated and will reduce options for small commercial customers. FE should be ordered to support the development of a robust competitive market. FE should not seek to eliminate it. FE should rely more on market forces and the expertise of sophisticated market participants who have been managing risk on behalf of customers for a quarter of a century in Pennsylvania. FE should move away from passing risk to

customers who are ill-equipped to manage the risks being passed along to them. FE should also discontinue practices that subsidize default service at the expense of other customers, providing an electricity product that becomes more and more difficult to compete against. To be clear, in this context, the ability to compete has nothing to do with price. In this context, default service is moving away from a full requirements service and to a consumer-risk product. Under the FE proposals, risk is flowing directly to customers instead of remaining with default service suppliers, which is in contrast with the spirit and the letter of the Competition Act and the Act 129 amendments thereto. FE is arguing with an illusion of lower prices in the short run, only to sacrifice customers' well-being in the longer run. FE's proposals give rise to significant uncertainty and risk for default service customers. They will also eliminate many, in not all, options for residential customers to protect themselves. To prevent this, I am recommending that the Commission should:

1. Reject FE's proposal to return residential customers to default service at the expiration of their initial term of contract, retaining the workably competitive status quo;
2. Reject FE's proposal to require a quarterly affirmation from customers on variable priced contracts, retaining the workably competitive status quo;
3. Reject FE's proposal to change its Purchase of Receivables ("POR") program, retaining the workably competitive status quo;
4. Reject FE's proposal to allow Network Integrated Transmission Service ("NITS") charges to be avoided by default service suppliers and have customers bear the risk of NITS price fluctuations, retaining the workably competitive status quo;
5. Modify FE's proposal to eliminate its $4.00 adder on Hourly Priced Service ("HPS") customers;
6. Make an affirmative proclamation that comparing default service costs to suppliers' costs is a meaningless calculation that leads to misleading market guidance;
7. Reject FE's proposal to eliminate the residential and small commercial standard offer customer referral program, retaining the benefit for customers;

8. Affirm FE's proposal to place the costs and responsibilities for Alternative Energy Portfolio Standards ("AEPS") Act compliance on the default service suppliers; and

9. Ensure that the 5-year wholesale contract for residential default service is procured as full requirements service with no pass-through costs to customers.

V. CONCLUSION

Q. DOES THAT COMPLETE YOUR DIRECT TESTIMONY?

A. Yes; however, I do reserve the right to supplement this testimony as may be appropriate based on the receipt of FE's responses to pending discovery requests.

VERIFICATION

I, Frank P. Lacey, hereby state that: (1) I am the founding principal of Electric Advisors Consulting, LLC; (2) the facts set forth in my testimony are true and correct (or are true and correct to the best of my knowledge, information and belief); and, (3) I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

Summary

Disciplined energy industry executive consultant and board advisor known for developing innovative regulatory and business strategies empowering clients to benefit from emerging and complex energy market and environmental policies.

Experience

Current Board Service

- Atmospheric G2 – Weather analytics to support energy trading decisions (Regulatory chair);
- HData – Regulatory AI (advisory board);
- Emerald AI – Data Center electricity load management (advisory board).

Prior Board Service: ERCOT (finance); Advanced Energy Management Alliance (Founding member and chairman); Smart Electric Power Alliance (finance); Association for Demand Response and Smart Grid (finance); Electric Power Supply Association (finance); Retail Energy Supply Association; Kennett Square Golf and Country Club (Long-Range Planning).

Electric Advisors Consulting, LLC 2015- Present
Founder and President

Increased shareholder value of clients by more than $600 million through regulatory channels. Identify competitive market policy priorities and advise senior leadership on strategic implications of potential changes in the electricity industry, including data center interconnection, renewable integration, nuclear developments, storage and Electric Vehicle charging integration, DER integration and other evolving trends. Apply strong analytical skills to relevant consultancy engagements including M&A strategies; ratemaking and rate design, ESG implementation; FERC and state regulatory and legislative policy engagement; stakeholder engagement; strategic planning; complex litigation assistance; expert testimony; and complex tariff analysis.

Comverge, Inc./CPower Corporation 2011- 2015
Senior Vice President, Regulatory and Market Strategy

Developed and implemented corporate legislative and regulatory strategy, including new market entry plans for a $150 million company performing demand response services. Identified revenue growth opportunities through regulatory channels adding over $10 million in annual earnings. Developed FERC-accepted credit and risk management policies. Developed M&A opportunities including acquisition of DR business, integration with Enerwise and ultimate spin-off of CPower.

Direct Energy 2006 - 2011
Director, Products and Complex Transactions (2008-2011)

For a multi-billion dollar retail electric and gas company, managed Complex Transaction team consisting of four direct reports and eight operations and functional leaders. Generated over $50 million in incremental gross margin sold. Delivered quality customer service and internal communications to enable incremental business commitments. Implemented Customer Experience team to receive customer feedback and adjust internal operations, increasing Net Promoter Scores by 22 points in one year.

Director, Government and Regulatory Affairs (2006-2008)

Managed legislative and regulatory strategy and regulatory risk in Mid-Atlantic region of US, participating in multiple rate cases and regulatory initiatives, securing approximately $100 million in value from regulatory developments. Positioned firm as leading industry voice on policy matters.

Starlight Energy 2004 - 2005
President

Led the development of business plan and pro formas for venture seeking $20 million in equity financing and other financial relationships. Secured $100 million credit relationship and working capital financing to enable launch of retail Electricity Company. Secured FERC approval for market-based rate authority.

Strategic Energy 2001- 2004
Director, Regulatory Affairs,

For a $2 Billion retail electric and gas services firm, served on the company's Leadership team, managing a regulatory group of 15 people. Created and/or protected more than $400 million in market opportunities through regulatory channels. Created the leading industry voice on policy issues; Led the development of regulatory strategy, advocacy campaigns, the oversight of regulatory risk and the attainment of desired regulatory results, advocating across 15 states and at FERC.

Arthur Andersen Business Consulting 1998 - 2001
Senior Manager

Developed and grew Andersen's transmission restructuring business in the eastern half of US market. Achieved consulting sales in excess of $2 million annually. Projects included complete restructuring and development of new transmission entities such as American Transmission Company and Independent Transmission Company.

Putnam, Hayes and Bartlett, Inc 1995 - 1998
Associate Consultant

Associate consultant in firm's energy and environmental consulting practice with expertise in environmental asset (SO_2, CO_2 and NO_X credits) valuation.

Education

Carnegie Mellon University, Tepper School of Business
MSIA (MBA) with concentrations in finance, entrepreneurship, and environmental management
Self-designed major with supplemental coursework taken in Public Policy and Engineering Schools.

- Entrepreneur of the Year Award, Don Jones Center for Entrepreneurship. Business plan developed for environmental emissions (SO_2, NO_x) trading company.
- Thomas M. Kerr Ethics in Business Award.

University of Maryland
B.S. in Transportation and Logistics

Programs for Life
Certified Leadership Development Trainer

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	**:**	**Docket No. P-2026-3060298**

RESA Set 1, No. 14

Referencing First Energy Statement No. 1, page 20, lines 18-22, under FirstEnergy's proposal, would customers whose EGS's renewal offer price is below the PTC be returned to default service if the customer does not provide a new affirmative consent to remain with the EGS?

RESPONSE:

Yes, residential customer contracts that expire after June 1, 2027, will return to default service at the conclusion of their fixed duration contact, absent an affirmative choice to remain with the electric generation supplier, regardless of whether the renewal price is above or below the applicable price-to-compare.

Has FE PA tracked, for residential customers, the number of:

a. Payment arrangements;
b. Disconnection notices;
c. Disconnections; and
d. Bad debt or uncollectible expenses

separately for customers served by an Electric Generation Supplier ("EGS") versus customers receiving default service? If so, please provide all such data and any related analyses.

RESPONSE:

FE PA has not tracked or analyzed any of the requested information separately for customers served by an EGS versus those on default service.

EGS Set 1, No. 13

Is it FE PA's position that the PTC is a competitive price?

RESPONSE:

No. The generation portion of the PTC is derived through a competitive bidding process and customers have been making shopping decisions based on the PTC since 2011, without any finding by the Pennsylvania Public Utility Commission that such framework sends a message to customers that the PTC is a "competitive price."

Subject: FirstEnergy CRP Metrics Collaborative
Date: Tuesday, October 14, 2025 5:49:00 PM
Attachments: CRP Data DSP VI v4.xlsx

Hi all,

I hope everyone is doing well! In accordance with the Joint Petition for Settlement of our DSP VI, Paragraph 79 (Docket No. P-2021-3030012), I am reaching out to schedule a collaborative meeting to discuss the Customer Referral Program ("CRP") data compiled and address any questions or feedback from the parties on this topic in advance of our next planned Default Service Program filing.

In anticipation of the meeting, I am attaching spreadsheets of the data compiled for your review. We will plan to walk through these with you during the call. As a reminder, the following data collection points were agreed upon by the parties and reflected in the attached:

- Number of CRP participants by month and year
- CRP participants who terminate their contract prior to the 12-month term
- CRP participants who renew with a supplier at the end of the 12-month term, and their new contract price
- The total number of customers by month:
  - (a) whose Customer Referral Program (CRP) term expired in the prior month.
  - (b) the total number of customers identified in response to subpart (a) that returned to default service
  - (c) the total usage (kWh) of the customers identified in response to subpart (b)
  - (d) the total generation charges of the customers identified in response to subpart (b)
  - (e) the total number of customers identified in response to subpart (a) that selected a new supplier
  - (f) the total usage (kWh) of the customers identified in subpart (e)
  - (g) the total generation charges of the customers identified in response to subpart (e)
- The number of participating EGSs in the CRP by month and by year
- CRP participants who renew their contract before the end of the 12-month term
- CRP participants who renew their contract with a different supplier prior to the end of the 12-month term

I am looking at targeting a date within the next few weeks given the anticipated time of filing. Below are some dates and times that would work on our end:

- **Friday, October 24:** 10a-11a; 11a-12p; 12p-1p; 2p-3p
- **Monday, October 27:** 2p-3p
- **Tuesday, October 28:** 10a-11a
- **Wednesday, October 29:** 12p-1p; 3p-4p
- **Thursday, October 30:** 9a-10a

If you could please respond to this email and let me know which time would work best with your schedules, that would be great.

I recognize that some of the contacts for the parties may have changed since the settlement, so please let me know if I should include anyone else on this meeting.

Thank you,

Angelina

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME.

A. My name is Frank Lacey.

Q. ARE YOU THE SAME FRANK LACEY WHO SUBMITTED DIRECT TESTIMONY ON BEHALF OF THE RETAIL ENERGY SUPPLY ASSOCIATION ("RESA") IN THIS PROCEEDING?

A. I am.

Q. DO YOU HAVE REBUTTAL TESTIMONY THAT YOU WISH TO PROVIDE?

A. I do.

Q. ON WHOSE BEHALF ARE YOU PROVIDING REBUTTAL TESTIMONY?

A. I am submitting this rebuttal testimony on behalf of the Retail Energy Supply Association ("RESA").[1]

Q. WHOSE TESTIMONY DO YOU WISH TO REBUT?

A. I am going to rebut the direct testimonies of Barbara Alexander and Serhan Ogur who testified on behalf of the Office of Consumer Advocate ("OCA"), and Patrick Cicero who testified on behalf of The Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania ("CAUSE-PA").

Q. HOW IS YOUR REBUTTAL TESTIMONY ARRANGED?

A. I am going to address, jointly, the issues raised by Ms. Alexander and Mr. Cicero, because both witnesses support FirstEnergy's ("FE") proposed changes to the retail market structure and rely on similar analyses and policy arguments in support of those

---

[1] The comments expressed in this filing represent the position of the Retail Energy Supply Association (RESA) as an organization but may not represent the views of any particular member of the Association. Founded in 1990, RESA is a broad and diverse group of retail energy suppliers dedicated to promoting efficient, sustainable and customer-oriented competitive retail energy markets. RESA members operate throughout the United States delivering value-added electricity and natural gas service at retail to residential, commercial and industrial energy customers. More information on RESA can be found at www.resausa.org.

proposals. I address OCA Witness Dr. Ogur's testimony separately because it primarily concerns wholesale market structure, risk allocation, and default service procurement issues.

Q. CAN YOU PLEASE SUMMARIZE YOUR REBUTTAL TESTIMONY?

A. This proceeding was intended to be about FE's procurement and delivery of default service. However, FE has proposed changes to the retail market structure that both Ms. Alexander and Mr. Cicero expressly support in their direct testimonies. These include restrictions on the ability of electric generation suppliers ("EGSs") to participate in the Purchase of Receivables ("POR"), unprecedented affirmative consent requirements for residential customers, and the elimination or curtailment of programs intended to facilitate customer participation in the market including the Standard Offer Customer Referral Program ("CRP").[2] These proposals would materially harm the competitive market in the FE service territories by restricting customer choice and increasing barriers affecting competitive suppliers. To justify their support for FE's proposals, Ms. Alexander and Mr. Cicero rely heavily on comparisons between EGS pricing and FE's default service rate (referred by the misnomer Price-to-Compare or "PTC").[3] As discussed in my direct testimony and further explained below, these comparisons are fundamentally flawed because they do not compare equivalent products, risks, or services.[4] Rather, as I will discuss in this responsive testimony, both witnesses'

---

[2] *See* OCA St. No. 2 at 11-12, 30-31, 41-42; CAUSE-PA St. No. 1 at 27-33.

[3] OCA St. No. 2 at 41-49; CAUSE-PA St. No. 1 at 25-33.

[4] RESA St. No. 1 at 50-56.

testimonies reflect broader disagreements with Pennsylvania's existing retail choice framework.[5]

My rebuttal testimony is organized by topic. I first address the pricing comparisons relied upon by Ms. Alexander and Mr. Cicero and then separately address their support for affirmative-consent requirements, POR restrictions, and elimination of the CRP. I then address Dr. Ogur's testimony regarding proposals that would shift additional procurement and market risks onto customers.

II. REBUTTAL

A. This Proceeding Is Not the Appropriate Vehicle for Broad Retail Market Restructuring

Q. PLEASE EXPLAIN WHY MANY OF THE PROPOSALS OFFERED BY FE AND SUPPORTED BY MR. CICERO AND MS. ALEXANDER ARE INAPPROPRIATE FOR THIS PROCEEDING.

A. This is not an appropriate proceeding to revisit long-standing Pennsylvania regulatory policy regarding electricity competition in the Commonwealth or in FE's service territory. This proceeding is intended to address FE's procurement and delivery of default service. However, several of the proposals supported by FE, Ms. Alexander, and Mr. Cicero would fundamentally alter significant aspects of Pennsylvania's competitive retail market, including supplier participation rules, affirmative-consent requirements, Purchase of Receivables ("POR") eligibility, and customer referral programs.[6] I am advised by counsel that the Commission has historically recognized that broad retail market design and customer shopping issues require broader procedural treatment and careful evaluation, rather than being resolved within the context of a single default service

[5] OCA St. No. 2 at 41-49; CAUSE-PA St. No. 1 at 25-33.

[6] OCA St. No 2 at 11-12, 30-32, 41-49; CAUSE-PA St. No. 1 at 27-33.

proceeding.[7] In my opinion, many of the proposals supported by FE, Ms. Alexander, and Mr. Cicero fall into that category.[8]

Q. PLEASE EXPLAIN YOUR CONCERNS WITH APPROVING FE'S PROPOSED CHANGES TO THE RETAIL MARKET STRUCTURE IN THIS PROCEEDING AS SUPPORTED BY OCA AND CAUSE-PA.

A. FE, as the default service provider, has an obligation to implement the retail market in a manner that is consistent with the approved Pennsylvania framework. In proposing changes that would materially impair the competitive market, FE seeks broad modifications to the retail market operational structure that has been developed over decades through numerous Commission proceedings.

B. Pricing Comparisons Are a Flawed Basis Upon Which to Materially Impair the Current Competitive Market Design

Q. WHAT DO YOU VIEW AS THE FUNDAMENTAL FLAW UPON WHICH BOTH MS. ALEXANDER AND MR. CICERO RELY TO JUSTIFY THEIR SUPPORT FOR FE'S WIDE-REACHING RETAIL MARKET PROPOSALS?

A. Ms. Alexander and Mr. Cicero rely on pricing comparisons between EGS contract prices and the Price-to-Compare based on the incorrect assumption that competitive supply products and default service are directly comparable products.[9] As shown in my direct testimony, those comparisons are not apples-to-apples because they fail to account for differences in product structure, hedging obligations, regulatory obligations, customer mobility risk, and other supplier costs.[10] Indeed, in response to discovery questions, both Ms. Alexander and Mr. Cicero acknowledged that they did not perform analyses

---

P-2012-2283641 and P-2016-2534980, Recommended Decision, at 6-8 (discussing Commission consolidation of broader CAP shopping and retail market structure issues to ensure those issues were "thoroughly and properly" evaluated).

[8] RESA St. No. 1 at 5-6, 66-68.

[9] OCA St. No. 2 at 22-23; CAUSE-PA St. No. 1 at 15-17.

[10] RESA St. No. 1 at 50-55.

concerning customer preferences for fixed-price certainty, renewable attributes, value-added services, hedging value, or other non-price product attributes associated with supply products.[11]

Q. HOW DO YOU ADDRESS THE ARGUMENT THAT THE COMMISSION, BY TERMING THE EDC'S DEFAULT SERVICE RATE AS THE "PRICE-TO-COMPARE" HAS ALREADY SETTLED THIS QUESTION?

A. I do acknowledge how the use of the default service rate has been supported by the Commission and marketed to customers as the Price-to-Compare. However, nowhere in the testimony of Ms. Alexander or Mr. Cicero is there reference to any statutory requirement or economic principle providing that the Price-to-Compare should be any type of price cap, maximum permissible price, or regulatory benchmark for competitive offers to customers. Yet FE's proposals – which are expressly supported by Ms. Alexander and Mr. Cicero – would effectively transform the default service rate into a regulatory ceiling against which EGS pricing (for all customers) would be judged and restricted. The Price-to-Compare is a backward-looking metric that reflects electricity pricing developed from historical procurement periods, including pricing from as far back as two years in the past, and under FE's proposals, potentially as far back as five years in the past. The purpose of the on-bill Price-to-Compare disclosure is simply to provide customers with information regarding the then-current default service rate, without directing customers as to whether that rate is "good or bad," so that customers may independently evaluate competitive supplier offers. Importantly, EGS contracts are forward-looking contractual obligations between customers and EGSs and therefore

[11] *See* RESA Exh. FL-12 (OCA and CAUSE-PA Discovery Responses to RESA Set 1, Nos. 8 and 9).

provide customers with protections against unpredictable future default service pricing. By contrast, many of the proposals supported by FE, Mr. Cicero, and Ms. Alexander would shift additional procurement, migration, and market risks onto default service customers rather than competitive suppliers. In many respects, those proposals move Pennsylvania's retail market structure back toward a rate-regulated utility model in which customers, rather than market participants, bear a greater share of generation-related risks.[12]

Q. WHAT IS YOUR RESPONSE TO THE PRICING COMPARISONS RELIED UPON BY MR. CICERO AND MS. ALEXANDER?

A. Mr. Cicero and Ms. Alexander rely primarily on pricing comparisons that should not serve as the basis for proposals that would eliminate retail market features that provide significant customer value.[13] Comparisons of EGS pricing to default service rates should not be at issue in this docket. I am informed by counsel that retail generation pricing is not regulated by the Commission. Nothing in the Competition Act or the Act 129 amendments establishes the PTC or the default service rate as a price cap, benchmark or regulatory metric for competitive supplier pricing. To the contrary, the Competition Act expressly recognizes that "competitive market forces are more effective than economic regulation in controlling the cost of generating electricity."[14]

[12] RESA St. No. 1 at 5-6, 37-47, 62-66.

[13] OCA St. No. 2 at 22-23, 41-49; CAUSE-PA St. No. 1 at 15-25, 27-33.

[14] 66 Pa. C.S. § 2802(12).

Q. SINCE MS. ALEXANDER AND MR. CICERO RELY SO HEAVILY ON PRICE COMPARISONS, CAN YOU SUMMARIZE THE CONCERNS ABOUT THESE COMPARISONS YOU DISCUSSED IN YOUR DIRECT TESTIMONY?

A. Yes. As I discussed in my direct testimony, the pricing comparisons relied upon by Mr. Cicero and Ms. Alexander are flawed because they compare fundamentally different products and ignore important market dynamics associated with competitive supply service.[15] In fact, Ms. Alexander expressly acknowledged in discovery that she had not conducted any analysis regarding whether historic default service pricing and forward-looking fixed-price EGS contracts are economically equivalent products for purposes of comparison.[16] Nevertheless, those comparisons are being used to support proposals that would materially restrict the competitive retail market. I discuss several of the specific flaws in these pricing comparisons below.[17] In evaluating these proposals, it is important to recognize that Pennsylvania's restructuring framework was intended to move generation-related market risks away from captive customers and onto competitive market participants. Several of the proposals supported by FE, Mr. Cicero and Ms. Alexander would move the market structure back toward a rate-regulated framework in which customers bear a greater share of generation procurement and market risks.[18]

Q. WHAT ARE THE PRIMARY FLAWS IN THE PRICING COMPARISONS RELIED UPON BY MR. CICERO AND MS. ALEXANDER?

A. The pricing comparisons that they rely on contain several significant analytical flaws and should not serve as the basis for proposals that would materially restructure the

[17] OCA St. No. 2 at 30-31, 41-49; CAUSE-PA St. No. 1 at 27-33.

[18] RESA St. No. 1 at 5-6, 37-47, 62-66; OCA St. No. 1 at 19-21, 31-24; OCA St. No. 2 at 30-31, 41-49; CAUSE-PA St. No. 1 at 27-33.

competitive market. I presented many of these flaws in my direct testimony refuting FE's testimony,[19] but again, to rebut Mr. Cicero and Ms. Alexander, I will repeat the flaws.

Q. WHAT IS THE FIRST MAJOR FLAW IN THE COMPARISONS RELIED UPON BY MR. CICERO AND MS. ALEXANDER?

A. First, the products that are being compared are completely different. In fact, the analyses begin with the flawed assumption that all EGS products are the same and lumping them together as the "EGS price."[20] Discovery responses confirmed that neither Ms. Alexander nor Mr. Cicero adjusted their analyses to account for differences among fixed-price products, variable-price products, renewable-energy products, rewards programs, bundled products, contract length, cancellation terms, hedging value, or other non-price product attributes.[21] At a more granular level, default service products represent a snapshot of what the electricity market looked like historically, while EGS products reflect a contract to provide services based on future expectations of market conditions. Hedging strategies for the products are different. Components of the products are different and regulations governing the products are different. Default service is heavily subsidized by distribution rates and EGS products are not. In other words, there is nothing comparable about default service and EGS products. Notably, Ms. Alexander acknowledged in discovery that she did not conduct any analysis concerning product equivalency, hedging value, risk allocation, or whether default service rates themselves would have differed absent customer migration to competitive supply service. Similarly, Mr. Cicero acknowledged

[19] RESA St. No. 1 at 50-56.

[20] OCA St. No. 2 at 22-23; CAUSE-PA St. No. 1 at 15-17.

[21] S*ee* RESA Exh. FL-14 (OCA Discovery Response to RESA Set 1 No. 10 and CAUSE-PA Discovery Response to RESA Set 1 No. 2).

that no adjustments were made to his aggregate pricing comparisons and that no analysis was performed regarding whether default service pricing would have differed under different shopping levels.[22] Ms. Alexander testified that EGS "prices are completely without justification in light of the procurement of default service for the same product sold by the EGSs."[23] That conclusion ignores the fundamental differences in energy products and should provide sufficient reason for the Commission to disregard all of her opinions about the competitive retail electricity market.

As noted above, neither the original Competition Act nor the Act 129 amendments to the Competition Act envision default service as setting the maximum price for consumers to pay for generation. The Default Service Provider is simply "[a]n electric distribution company within its certified service territory or an alternative supplier approved by the commission that provides generation service to retail electric customers who: (1) contract for electric power, including energy and capacity, and the chosen electric generation supplier does not supply the service; or (2) do not choose an alternative electric generation supplier."[24] The Competition Act does not call for customers to be slammed back to default service because they are engaged in a market transaction that FE, OCA, or CAUSE-PA finds unappealing. In fact, the Competition Act finds market-based pricing "more effective" than economic regulation. Economic regulation is inconsistent with the market-oriented structure reflected in the Competition Act. The Commission should not

---

[23] OCA St. No. 2 at 10.

[24] 66 Pa. C.S. 2807(e)(3.1).

be swayed by their use of pricing data, and especially analytically flawed comparison data to change the role of default service in a manner that would materially harm the competitive electricity market.

Q. ARE THERE ADDITIONAL FLAWS IN THE ANALYSES RELIED UPON BY MR. CICERO AND MS. ALEXANDER?

A. Yes. The analyses are also flawed because the hypothetical "what customers would have paid" analyses lack any adjustments for the incremental load that wholesale suppliers would have had to provide had all customers been on default service.[25] In discovery, Mr. Cicero specifically acknowledged that no analysis was performed regarding whether FE's default service rates would have differed absent customer migration to EGS service and that no adjustments were made to the underlying comparison analysis.[26] The descending clock auction clears when just enough power is secured to meet the load. FE explains that the auction process is "characterized as a 'descending clock' auction because prices 'tick down' as rounds progress, starting at an initial price and being reduced until the number of tranches that all bidders are willing to supply is just enough to match the load to be supplied."[27] The auction would clear at a higher price if the default service load was higher. This is a simple application of the laws of supply and demand which were not considered in the analysis. As a result, the recommendations based on this over-simplified "analysis" should be rejected by the Commission.

---

[25] OCA St. No. 2 at 22-23; CAUSE-PA St. No. 1 at 15-17.

[26] *See* RESA Exh. FL-15 (CAUSE-PA Discovery Response to RESA Set 1, No. 1).

[27] FE Petition at 9.

Q. DO THE ANALYSES RELIED UPON BY MR. CICERO AND MS. ALEXANDER ADEQUATELY ACCOUNT FOR THE CUSTOMER IMPACTS OF THEIR PROPOSALS?

A. No. Another significant flaw in the analyses relied upon by Mr. Cicero and Ms. Alexander is the failure to evaluate the likely customer impacts associated with the policies they support. Consistent with this omission, Mr. Cicero acknowledged in discovery that no analyses were performed concerning the effects of the proposed affirmative-consent requirements on residential shopping participation, supplier participation, or product availability.[28] In this discussion, I am focused specifically on the economics of the proposals. As noted above, no adjustments were made to estimate what prices "would have been" if all customers were on default service at the time. Coupled with that flaw, no party to the proceeding has evaluated how wholesale suppliers will assess the risk of increased customer migration back to default service. Default service providers embed hedge premiums when making offers to provide energy. Under the policies supported by Mr. Cicero and Ms. Alexander, the default service suppliers will need to ramp up protection from customers returning to default service. One of the major risks to default service providers is customers returning in rising price markets. They will need to add premiums to protect against that risk. The proposals supported by Mr. Cicero and Ms. Alexander will result in both higher default service prices based on supply and demand principles, coupled with enhanced risk premiums to accommodate greater migration risk that would be a direct result of their policy recommendations.

[28] RESA Exh. FL-16 (CAUSE-PA Discovery Response to RESA Set 1, No. 26).

Q. DO YOU HAVE ANY ADDITIONAL CONCERNS WITH MR. CICERO'S ANALYSIS?

A. Yes. Mr. Cicero supports twice a year pricing adjustments for default service because that allows for "longer periods without pricing adjustments."[29] This seems to indicate that Mr. Cicero sees value in longer periods without pricing adjustments. However, he fails to account for the value customers may place on EGS contracts that offer fixed price certainty for periods longer than 6 months. Indeed, Mr. Cicero acknowledged in discovery that he performed no analysis concerning customer preferences for fixed-price certainty or other non-price attributes associated with competitive supply products.[30] This further undermines the reliability of the conclusions and recommendations based on these pricing comparisons.

C. Affirmative Consent / Return to Default Service

Q. WHAT IS YOUR RESPONSE TO THE POSITIONS OF MR. CICERO AND MS. ALEXANDER SUPPORTING FE'S PROPOSAL TO RETURN A CUSTOMER TO DEFAULT SERVICE ABSENT AN AFFIRMATIVE CONSENT FROM THE CUSTOMER TO RENEW SERVICE WITH THE EGS?

A. Mr. Cicero supports FE's proposal on the grounds that customers should remain on EGS service "only with [the customer's] ongoing, affirmative consent."[31] He also adds that there is "no profit embedded in [default service] for FE PA."[32] I disagree with both conclusions. Customers already provide affirmative consent to contract renewals when signing the original EGS contract. As Mr. Cicero acknowledges, Pennsylvania regulations governing fixed term contracts and non-fixed term contracts already require

---

[29] CAUSE-PA St. No. 1 at 7.

[30] *See* RESA Exh. FL-12 (CAUSE-PA Discovery Response to RESA Set 1, No. 8).

[31] CAUSE-PA St. No. 1 at 29-31.

[32] *Id.*

extensive customer disclosures and advance notices regarding contract expiration and renewal terms.[33] The PA Code requires that:

> (g) Disclosure statements must include the following customer notifications for fixed duration or non-fixed duration contracts:
>
> > (1) For fixed-duration contracts, disclosure statements must include the following notification: "If you have a fixed duration contract that will be ending, or whenever ‹EGS name› wants to change the contract, you will receive two separate notices before the contract ends or the changes happen. You will receive the first notice 45 to 60 days before, and the second notice 30 days before the expiration date or the date the change becomes effective. These notices will explain your options."
> >
> > (2) For contracts that are not fixed-duration contracts, disclosure statements must include the following notification: "If ‹EGS name› wants to change the contract, you will receive two separate notices before the changes happen. You will receive the first notice 45 to 60 days before the change, and the second notice 30 days before the change. These notices will explain your options."[34]

Additionally, 52 Pa. Code § 54.10 provides very detailed requirements about the information that is to be included in the contract notices. The EGS contracting requirements are such that EGS customers are well-informed. Given these existing disclosure and notice requirements, neither Mr. Cicero nor Ms. Alexander identify any persuasive legal, policy, or economic basis requiring additional affirmative-consent procedures before customers may continue existing contractual relationships with EGSs.[35] Indeed, in discovery, Mr. Cicero acknowledged that no analyses were performed concerning customer confusion, customer understanding, administrative burden, implementation costs, residential shopping participation, supplier participation, product

---

[33] CAUSE-PA St. No. 1 at 29-31.

[34] 52 Pa. Code §§ 54.5(g)(1) and (g)(2).

[35] OCA St. No. 2 at 30-31; CAUSE-PA St. No. 1 at 29-31.

availability, or customer choice impacts associated with the proposed affirmative-consent requirements.[36] Neither Mr. Cicero nor Ms. Alexander identified evidence demonstrating that recurring affirmative-consent requirements of the type proposed here improve customer outcomes or support healthy competitive markets. To the contrary, as discussed in my direct testimony, jurisdictions that have adopted significant retail market restrictions, such as Maryland through Senate Bill 1, have experienced substantial adverse impacts on competitive retail market participation.[37] Notably, neither OCA nor CAUSE-PA identified any analysis evaluating the impacts of such restrictions on residential shopping participation, supplier participation, product availability, or customer choice.[38]

Q. DO YOU AGREE WITH MR. CICERO'S ASSERTION THAT FE DOES NOT PROFIT FROM THE PROVISION OF DEFAULT SERVICE?

A. No. It is true that FE does not earn a return on the energy supply piece of default service. However, FE is guaranteed full cost recovery for providing default service, including the ability to adjust rates needed to recover costs resulting from their actions. FE is permitted to recover its prudently incurred default service costs and also earns returns on assets and infrastructure used to provide default service functions. Accordingly, FE bears substantially less financial risk associated with default service than competitive suppliers operating in the retail market. Additionally, FE uses millions of dollars of assets in the provision of default service that earn a return. Accordingly, it is inaccurate to suggest that

---

[36] *See* RESA Exh. FL-16 (CAUSE-PA Discovery Response to RESA Set 1, No. 26) and RESA Exh. FL-17 (CAUSE-PA Discovery Response to RESA Set 1, No. 25).

[37] RESA St. No. 1 at 9-11.

[38] *See* RESA Exh. FL-16 (CAUSE-PA Discovery Response to RESA Set 1, No. 26) and RESA Exh. FL-18 (OCA Discovery Response to RESA Set 1, No. 45).

FE derives no economic benefit from the provision of default service. It is the cost of these assets such as buildings, furniture, computers, IT systems, and others, and the labor costs of personnel providing those services, that should be allocated to default service in order to make default service a more equitably priced service. Instead, these costs are recovered through distribution rates paid by all customers, including shopping customers. As discussed in my direct testimony, FE retains economic incentives associated with maintaining customers on default service.[39]

Q. HOW DO YOU RESPOND TO MR. CICERO'S CHARACTERIZATION OF THE PRICING ANALYSES IN THIS PROCEEDING AS "UNCONTROVERTED?"

A. Mr. Cicero refers to the pricing analyses presented in this proceeding as "uncontroverted."[40] However, as discussed above and in my direct testimony, those analyses are both inaccurate and analytically flawed. The PTC values presented by Mr. Young in his Table 6 do not reflect the PTC values shared by FE on its website or in discovery and the comparisons fail to account for fundamental differences between default service products and competitive supply products.[41]

Q. WHAT IS YOUR RESPONSE TO MS. ALEXANDER'S SUPPORT FOR FE'S AFFIRMATIVE CONSENT PROPOSAL?

A. Ms. Alexander offers similar arguments. She testifies that the "basic reason why these reforms should be adopted is to address the affordability of electric service."[42] However, FE's proposal would apply regardless of whether the renewal price is above or below the applicable PTC, *i.e.*, customers "will return to default service at the conclusion of their

---

[39] RESA St. No. 1 at 5-6.

[40] CAUSE-PA St. No. 1 at 15-17.

[41] RESA St. No. 1 at 50-56.

[42] OCA St. No. 2 at 30-31.

fixed duration contact, absent an affirmative choice to remain with the electric generation supplier, regardless of whether the renewal price is above or below the applicable price-to-compare."[43] Similarly, Mr. Cicero confirmed in discovery that customers would be returned to default service absent affirmative consent regardless of whether the default service rate was higher than the customer's renewal contract price.[44] These admissions undermine the claim that the proposal is narrowly focused on affordability concerns.

Q. DO YOU AGREE WITH MS. ALEXANDER'S CLAIM THAT THE PROPOSAL WILL ADDRESS CONCERNS ABOUT POST CONTRACT EXPIRATION PRICING?

A. No. Ms. Alexander states that she supports the recommendation because it is "designed to respond to the common EGS offer of a promotional or low fixed rate followed by a variable rate that is not known to the customer at the time of enrollment."[45] Ms. Alexander acknowledges the Pennsylvania regulations regarding electricity contract renewals which state that absent an affirmative reaction to the contract notices, a fixed term contract "**shall be converted**" to either a month-to-month contract or another fixed term contract, neither of which can include termination fees. The regulations further state that the new contracts "**shall remain in place** until **the customer chooses**" another EGS product, a different EGS, or a return to default service.[46] The Commission, in adopting these regulations, appears to have recognized that affirmative consent is not always

---

[43] Exhibit FL-3, FE Response to RESA Interrogatory Set 1, No. 14.

[44] RESA Exh. FL-19 (CAUSE-PA Discovery Response to RESA Set 1, No. 24).

[45] OCA St. No. 2 at 11.

[46] 52 Pa. Code § 54.10(3).

possible.[47] Ms. Alexander does not like what she calls the "negative option policy" adopted in Pennsylvania, arguing it contributes to higher rates and customer confusion.[48] I disagree with her characterization of the Commonwealth's contract renewal regulations as a "negative option policy." These contractual provisions are already reflected in EGS agreements and existing Pennsylvania regulations governing contract renewals. EGS customers have signed a contract that includes these provisions. Ms. Alexander's complaint, therefore, is with the Commonwealth and the policies of the Commonwealth. Ms. Alexander's apparent disagreement with Pennsylvania's existing retail choice framework and renewal regulations are broader policy issues that are not appropriately considered in an individual utility's default service plan proceeding.

Q. WHAT IS YOUR RESPONSE TO THE POSITIONS OF MR. CICERO AND MS. ALEXANDER SUPPORTING FE'S PROPOSAL TO REQUIRE QUARTERLY AFFIRMATIONS FOR CUSTOMERS ON VARIABLE RATE CONTRACTS?

A. Mr. Cicero and Ms. Alexander rely on the same arguments cited above with respect to the affirmative consent at the conclusion of the contract to support FE's proposal to require quarterly affirmations from customers on variable priced products. As noted above, their arguments are flawed from a technical perspective (the data is bad) and from a policy perspective. The Commonwealth has already decided these issues and flawed pricing analyses should not be used to override Pennsylvania's existing competitive retail market framework and regulations. Moreover, Mr. Cicero did not identify analyses evaluating

[47] Note that in response to discovery, CAUSE-PA did not identify any jurisdiction with a restructured retail electricity market requiring affirmative consent in order for customers to continue electric generation service following contract expiration. RESA Exh. FL-20 (CAUSE-PA Discovery Response to RESA Set 1, No. 23).

[48] OCA St. No. 2 at 11.

the effect of these recurring affirmation requirements on supplier participation, product availability, or competitive market participation.[49]

Ms. Alexander offers additional options for FE to consider that would address her concerns. However, these suggestions (banning certain products and eliminating POR for variable rate products) are not consistent with the Competition Act or existing regulations. Again, Ms. Alexander's concerns appear to be directed more broadly at Pennsylvania's existing retail choice framework rather than solely at "affordability" issues associated with particular products.

D. POR Restrictions

Q. WHAT IS YOUR RESPONSE TO THE POSITIONS OF MR. CICERO AND MS. ALEXANDER SUPPORTING FE'S PROPOSALS TO CHANGE ITS POR PROGRAM?

A. Mr. Cicero appears to support FE's proposed POR changes because, in his view, they "allow[] suppliers to continue to participate in utility consolidated billing" while shifting collection risk back to suppliers.[50] However, shifting collection risk back to suppliers substantially undermines the purpose and value of a POR program in the context of the retail electricity market. POR programs have many benefits, notably, they allow credit constrained customers to be served by EGSs in the same manner in which they are served by a utility. In several respects, a POR program can provide credit-constrained customers with broader access to competitive supply products than might otherwise be available absent the POR program.[51] FE has the right to require a deposit from customers to

---

[49] *See* RESA Exh. FL-16 (CAUSE-PA Discovery Response to RESA Set 1, No. 26) and RESA Exh. FL-17 (CAUSE-PA Discovery Response to RESA Set 1, No. 25).

[50] CAUSE-PA St. No. 1 at 31- 33.

[51] RESA St. No. 1 at 27-38.

receive electric service from the utility.[52] In contrast, under a POR program, EGSs have no ability to require a deposit from a customer. FE's Supplier tariff states:

> EGSs will not deny service to residential customers whose accounts are included in the POR program for credit-related reasons and will not ask residential customers for deposits separate from any deposit required by the Company pursuant to Chapter 14 and Commission regulations.[53]

Mr. Cicero appears to view these protections as creating an improper subsidy for EGSs.[54] However, the Commonwealth has already determined that POR programs serve important public interest objectives.[55] The risk-socialization features associated with a POR program are not fundamentally different from other utility cost-recovery structures through which utilities recover bad-debt expenses from broader customer classes. What tilts POR in the direction of serving a public interest is that it allows credit-constrained customers access to the competitive energy market and all of the attributes that the market provides. Socialized collections structures, coupled with the ability to terminate service for non-payment, have been adopted in most, if not all, utility territories across the country and are not unique to competitive retail electricity markets. In the context of competitive markets, POR functions as an important market-enabling mechanism that facilitates broader customer access to competitive supply options which benefits all customers. Indeed, Ms. Alexander acknowledged in discovery that suppliers would need to develop "their own billing and collection systems to market products and prices that

did not conform to the proposed POR."[56] Notwithstanding the potential impacts of restricting POR participation, neither Mr. Cicero nor Ms. Alexander identified analyses evaluating the effects of the proposed POR restrictions on supplier participation, supplier attrition, product diversity, customer access to competitive products, or innovative retail offerings.[57]

Q. WHAT IS YOUR RESPONSE TO MS. ALEXANDER'S SUPPORT FOR LIMITING POR TO CHARGES AT OR BELOW DEFAULT SERVICE PRICING?

A. Ms. Alexander argues that "the most significant and valuable reform" would be to limit POR usage to charges at or below default service pricing.[58] As noted above, neither FE nor the Commission regulate the price of electricity in the Commonwealth. Her proposal is flawed because EGS products and default service are completely different products, as discussed above and in my direct testimony.[59] More importantly, the policy of the Commonwealth is that "competitive market forces are more effective than economic regulation in controlling the cost of generating electricity."[60] FE's proposal, supported by Ms. Alexander, would effectively impose a form of price regulation (actual price caps) on competitive supplier offerings through the POR framework. Moreover, Ms. Alexander acknowledged in discovery that she had not conducted analyses concerning the effect of the proposal on EGS participation, product diversity, renewable-energy offerings,

[60] 66 Pa. C.S. § 2802(12).

innovative retail products, or competitive product availability.[61] Those proposals are inconsistent with the market-oriented principles reflected in the Competition Act and must be rejected by the Commission.

Q. HOW DO YOU RESPOND TO CLAIMS BY MR. CICERO AND MS. ALEXANDER THAT FE'S PROPOSALS WOULD NOT ELIMINATE CUSTOMER CHOICE OR THE RETAIL MARKET?

A. Both Mr. Cicero and Ms. Alexander emphasize that FE's proposals would not formally eliminate customer choice or abolish the retail market.[62] Mr. Cicero testified that the proposals "ensure that customers continue to have direct retail access to the competitive market – which is a requirement of the current law…."[63] Ms. Alexander notes that the proposals "do not change the existence of the retail energy market."[64] Those assertions need to be evaluated in light of my direct testimony on the impacts discussed in my direct testimony regarding Maryland Senate Bill 1 enacted in 2024.[65] Importantly, despite asserting that these proposals would preserve customer choice and competitive market access, neither OCA nor CAUSE-PA identified analyses evaluating the effect of these proposals on residential shopping participation, supplier participation, product availability, or customer choice.[66] Maryland's SB 1 did not close or eliminate that retail electricity market. However, it had severe negative ramifications on the competitive retail market where now less than half of one percent of residential customers across the state

are on competitive supply products. In FE's Maryland service territory, only 0.2% (two-tenths of one percent) of customers are on competitive supply contracts. FE is proposing, and Mr. Cicero and Ms. Alexander are supporting many of the same reforms included in that legislation. Because the proposals offered by FE and supported by Mr. Cicero and Ms. Alexander are so similar to the provisions of Maryland's SB 1, they will have a similar devastating impact on competitive retail market participation for residential customers in FE's service territory.[67]

E. Elimination of CRP

Q. WHAT IS YOUR REACTION TO THE SUPPORT PROVIDED BY MR. CICERO AND MS. ALEXANDER FOR FE'S PROPOSAL TO ELIMINATE THE CUSTOMER REFERRAL PROGRAM?

A. The Standard Offer Customer Referral Program ("CRP") provides direct and measurable economic benefits to customers participating in the program. According to FE, the "CRP provides eligible customers with an opportunity to select among a group of EGSs that have voluntarily chosen to offer customers a twelve-month contract priced at least 7% below the Company's applicable PTC at the time of the offer. Customers may terminate a CRP contract at any time without penalty, either to re-enroll in the CRP with a new rate, select another EGS, or return to default service."[68] This program provides customers with a highly flexible option to obtain guaranteed savings while retaining the ability to leave the program without penalty. They can opt in to a program, be provided with guaranteed economic savings, and opt out at any time for any reason without any penalty. In my opinion, it is difficult to reconcile support for elimination of this program with claims that

[67] *See* RESA St. No. 1 at 4-5.

[68] RESA St. No. 1 at 57-60.

the proposals are intended primarily to improve customer affordability. Indeed, neither Ms. Alexander nor Mr. Cicero identified analyses evaluating alternatives to elimination of the CRP, including disclosure reforms, pricing modifications, revised enrollment rules, customer education measures, or other potential program reforms.[69]

Q. WHAT IS YOUR RESPONSE TO MR. CICERO'S SUPPORT FOR ELIMINATION OF THE CRP?

A. Mr. Cicero's support for eliminating the CRP appears to rely primarily on FE's testimony and data presented during FE's so-called collaborative – a one-hour discussion – to which stakeholders from FE's last DSP settlement were invited to hear FE's presentation about the program.[70] He espouses the considerable amount of time, energy and money spent on educating customers. He mentions the papowerswitch.com website. And he concludes that "it is not the role of FE PA, as the incumbent default service provider, to serve as the direct conduit to access the retail market." At the same time, however, he is supporting proposals that would require FE to function as the direct conduit returning customers to default service absent affirmative consent. These positions are difficult to reconcile. Moreover, Mr. Cicero did not identify analyses evaluating customer satisfaction, customer retention, customer enrollment, or customer outcomes associated with the CRP.[71]

---

[69] RESA Exh. FL-22 (OCA Discovery Responses to RESA Set 1, Nos. 1-6 and CAUSE-PA Discovery Responses to RESA Set 1, Nos. 18-19).

[70] CAUSE-PA St. No. 1 at 27-29.

[71] RESA Exh. FL-23 (CAUSE-PA Discovery Response to RESA Set 1, No. 17).

Q. WHAT IS YOUR RESPONSE TO MS. ALEXANDER'S CRITICISMS OF THE CRP?

A. Ms. Alexander's analysis appears to rely on several assumptions regarding the operation of the CRP that are inconsistent with FE's testimony about the program.[72] Ms. Alexander understands the program to offer a discount of 10% (versus the 7% in FE's testimony) for 12 months based on the current PTC price. She also assumes that the PTC changes quarterly (whereas FE currently adjusts the PTC semi-annually).[73] Based on these assumptions, Ms. Alexander argues that the CRP fails to protect customers against future PTC price adjustments during the contract term. She states that "the risk that the customer may lose their entire discount or even pay more than the PTC is a defect in the design of the program that cannot be fixed with a one-sentence disclosure that the PTC can change…."[74] Under a twice a year PTC adjustment, customers would face this circumstance only once during the 12-month CRP term (as opposed to three times under her understanding of the program). And as noted above, if the PTC decreases, the customer has a free option to leave the contract. Customers always have the ability to leave CRP without penalty if market conditions change. Additionally, in the context of this proceeding, FE is suggesting that prices, at least with respect to NITS, will be increasing. Also, there is a high degree of confidence that capacity prices are unlikely to decline materially over the term of this DSP. That leaves energy as the only meaningful cost component that could drive default service prices downward. Ms. Alexander does not address these broader market-cost dynamics in the context of her support for

[72] OCA St. No. 2 at 4-5.

[73] OCA St. No. 2 at 4-6.

[74] OCA St. No. 2 at 6-7.

eliminating the CRP. In discovery, Ms. Alexander acknowledged that she did not perform analyses concerning customer understanding of CRP pricing risk, customer complaint data, customer satisfaction, or the number of customers who achieved net savings through the CRP.[75]

Q. DO YOU AGREE WITH MS. ALEXANDER'S ASSERTION THAT THE CRP EXPOSES CUSTOMERS TO UNREASONABLE PTC RISKS?

A. No. Ms. Alexander testifies that it is "not reasonable to offer a program that requires the customer to assume the risk of future changes in the PTC and pay for the incremental costs to offer the program when the EGSs have the upper hand to determine when they can benefit from the program and when they are likely to suffer losses."[76] Ms. Alexander's characterization of customer risks associated with the CRP is incomplete. In this CRP scenario, the customer is protected from PTC price increases and has a free option to move back to default service if the PTC decreases. In that respect, the CRP significantly limits customer exposure to adverse PTC price movements, and in fact, gives the customer the upper hand with respect to risk management. Notably, Ms. Alexander also acknowledged that customers benefit from the CRP when PTC prices rise during the contract term.[77]

Q. DOES THE PARTICIPATION DATA RELIED UPON BY MS. ALEXANDER SUPPORT ELIMINATION OF THE CRP?

A. Ms. Alexander presented participation data from FE that shows that over 10,000 FE customers have participated in the CRP. On average, over the two years of data

---

[75] RESA Exh. FL-24 (OCA Responses to RESA Set 1, Nos. 11, 15, 17 and 18).

[76] OCA St. No. 2 at 7.

[77] RESA Exh. FL-25 (OCA Response to RESA Set 1, No. 16).

presented, 7,977 customers participated in the program on a monthly basis. The peak program month had 10,439 participants. Of these, only 86 customers terminated their contracts before the end of the first year (which is less than one per month per FE service territory). Ms. Alexander also shows that only about 1,000 customers entered renewal contracts that were (on average) higher than the then-current default service rate.[78] The participation data presented by Ms. Alexander shows that the vast majority of CRP participants benefited from the program and fewer than 10% of the participants entered a renewal arrangement that Ms. Alexander believes is problematic.[79] This data does not support eliminating a program that has provided meaningful benefits to thousands of participating customers. Importantly, neither OCA nor CAUSE-PA identified analyses demonstrating that elimination of the CRP would improve customer outcomes relative to reforms or modifications short of elimination.[80]

F. NITS / Capacity / Risk Transfer

Q. WHAT ARE YOUR CONCERNS WITH RESPECT TO THE TESTIMONY OF DR. OGUR?

A. Dr. Ogur concurs with Ms. Alexander's reasoning, conclusions, and recommendations with respect to FE's proposed shopping rules and retail supplier tariff changes.[81] As shown above, Ms. Alexander's reasoning, conclusions and recommendations are

---

[78] OCA Exhibit BA-3, FE Response to CAUSE-PA Interrogatory Set 1, No. 017. The data presented on page 1 of 8 shows the number of CRP participants by month and year. It does not show the number of new participants every month. Because of this data shortfall, it is possible that the total number of participants is significantly higher than 10,000.

[79] Assuming 10,439 customers participated and 1,000 entered renewal contracts there were on average higher than the then-current default service rate, 1,000/10,439 = approx. 9.57%.

[80] *See* RESA Exh. FL-22 (OCA Responses to RESA Set 1, Nos. 1-6; CAUSE-PA Responses to RESA Set 1, No. 18).

[81] OCA St. No. 1 at 41-42.

inconsistent with the market-oriented principles reflected in Pennsylvania's Competition Act and the existing retail market framework. In my opinion, these recommendations are inconsistent with Pennsylvania's market-oriented retail electricity framework. As I discussed in my direct testimony, EDCs, including FE, retain structural and economic incentives that may not always align with the continued expansion of competitive retail markets.[82] Several of the proposals supported by FE, Mr. Cicero, Ms. Alexander, and Dr. Ogur would shift procurement and market risks away from wholesale default service suppliers and onto customers while simultaneously reducing competitive market participation. In my opinion, those proposals move Pennsylvania's market structure closer to a rate-regulated framework in which customers bear a greater share of generation-related risks. Indeed, Dr. Ogur expressly acknowledged in discovery that FE's proposals would shift NITS cost risks from wholesale default service suppliers to customers and would leave customers exposed to capacity cost risks for periods in which PJM auction prices are not yet known.[83]

Q. WHAT IS YOUR RESPONSE TO DR. OGUR'S RECOMMENDATION THAT FE USE A 36-MONTH DEFAULT SERVICE CONTRACT RATHER THAN A 60-MONTH CONTRACT?

A. Dr. Ogur recommends replacing FE's proposed 60-month default service contract with a shorter, 36-month default service contract.[84] This recommendation suffers from the same shortfalls as the 60-month contract that I raised in my direct testimony.[85] The pass-through of NITS and capacity true-ups would shift substantial market risks onto

[82] RESA St. No. 1 at 5-6.

[83] RESA Exh. FL-26 (OCA Response to RESA Set 1, No. 44).

[84] OCA St. No. 1 at 15-17.

[85] RESA St. No. 1 at 62-66.

customers who are not well positioned to evaluate or manage those risks.[86] Dr. Ogur acknowledged this risk transfer in discovery, explaining that FE's proposals shift NITS cost risks from wholesale default service suppliers to customers and leave customers responsible for unknown future capacity costs through the CPP mechanism.[87] In my opinion, contracts excluding fixed NITS and capacity obligations do not satisfy the Act 129 framework governing full-requirements default service procurement. Similarly, these contracts would not provide the Commission with information required to determine if the default service portfolio was the "least cost over time" as the NITS and capacity cost components would be unknown.

Q. WHAT IS YOUR RESPONSE TO DR. OGUR'S SUPPORT FOR GREATER RELIANCE ON LONGER-TERM DEFAULT SERVICE CONTRACTS?

A. Dr. Ogur's suggestion to place a heavier reliance on 24-month contracts than 12-month contracts raises two issues. First, he claims that 24-month contracts "typically provided better rate stability."[88] The Commission should consider whether increased rate stability is necessarily beneficial when electricity market prices are already elevated. The Commission has previously recognized that when default service pricing creates adverse market or customer outcomes, the solution need not be to entrench the incumbent EDC's default service structure. For example, in the Pike County proceeding, the Commission did not order an alternative default service provider, but instead approved an opt-out retail aggregation program as a solution to high fixed default service rates and limited competitive retail offers. This illustrates that the Commission has tools available to

[86] RESA St. No. 1 at 37-47 and 62-66.

[87] *See* RESA Exh. FL-26 (OCA Discovery Response to RESA Set 1, No. 44).

[88] OCA St. No. 2 at 14-18.

address default service concerns without converting the incumbent EDC's default service price into a regulatory benchmark or restricting the competitive retail market.[89] Also, a reliance on longer-term contracts moves the default service rate further away from a market-reflective rate which can and will likely lead to more pronounced ebbs and flows in and out of default service, which imposes risks on default service suppliers that could result in increased default service rates.

Q. DO YOU AGREE WITH DR. OGUR'S CHARACTERIZATION OF FE'S PROPOSED CONTRACTS AS "FIXED PRICE, FULL REQUIREMENTS CONTRACTS?"

A. No. In my opinion, FE's proposed contracts for wholesale energy supply are neither fixed-price nor full-requirements contracts.[90] In discovery, Dr. Ogur acknowledged that FE's proposed contracts would exclude NITS charges and other PJM billing line items from the obligations of wholesale default service suppliers participating in FE's procurement auctions, while nevertheless characterizing the products as "full requirements" contracts.[91] FE is specifically asking the Commission for approval to not include the NITS obligation in its energy procurements. FE seeks to pass through NITS cost changes to customers. And for the longer-term contracts, FE is seeking approval to include a capacity true-up provision in the contracts, also seeking to pass through cost changes to customers. Fully valued capacity and NITS are required components of a

---

[89] *See, e.g.*, Petition of Direct Energy Services, LLC for Emergency Order Approving a Retail Aggregation Bidding Program for Customers of Pike County Light & Power Company, Docket No. P-00062205, Final Opinion and Order entered April 20, 2006. As a result of the Commission-approved default service procurement plan, the resulting default service rates were set during a time when the price of energy "was at its apex." The result was "high, fixed default service. . . rates, coupled with the dearth of competitive retail offers." *Id.* at 4. To address the situation, the Commission approved a retail aggregation bidding program for customers of Pike County Light & Power Company.

[90] RESA St. No. 1 at 42-46 and 62-65.

[91] RESA Exh. FL-27 (OCA Discovery Response to RESA Set 1, No. 43).

fixed price full requirements energy contract.[92] They would also both be required to provide a fixed price contract. Dr. Ogur's position effectively redefines "full requirements" service by permitting FE's wholesale default service supply contracts to exclude material transmission-related cost obligations that historically have been borne by wholesale default service suppliers.[93]

Q. WHAT IS YOUR RESPONSE TO DR. OGUR'S POSITION REGARDING NITS RISK AND HEDGING?

A. Dr. Ogur contends that "NITS charges are a large component of all-in energy supply costs, and they are unhedgeable by wholesale suppliers."[94] I do not agree with that conclusion. FE has not presented any evidence to suggest that NITS charges are not capable of being hedged. NITS charges have been included in FE's prior default service auctions. It is only now that FE is seeking to remove that component from the wholesale requirements. FE testified that "because of the increase in transmission spend, removing NITS from the auction will reduce the supplier risk premium and therefore reduce the overall cost to customers."[95] No mention was made of any inability of wholesale default service suppliers to hedge NITS exposure. EGSs are not allowed to pass through NITS costs to customers, which demonstrates that competitive suppliers have mechanisms available to manage those risks. Removing the risk premiums does not remove the risk.[96] It moves the risk – to the customers who generally have limited ability to evaluate or

---

[94] OCA St. No. 2 at 24.

[95] FE St. No. 2 (Rose) at 16.

[96] RESA St. No. 1 at 38-40.

manage those risks. Notably, Dr. Ogur acknowledged in discovery that FE's proposal transfers NITS cost risk from wholesale default service suppliers to customers in exchange for eliminating supplier risk premiums associated with NITS uncertainty.[97]

Q. DO YOU AGREE WITH DR. OGUR THAT FE'S PROPOSAL TO MANAGE NITS COSTS WOULD CREATE IMPLEMENTATION CHALLENGES?

A. Dr. Ogur addresses many implementation concerns if FE was to "pick up PJM NITS charges on behalf of default service customers." These include billing line item transfer agreements, regulatory oversight, true ups of bypassable NITS charges for each period and potential overcharges for NITS. I agree that significant implementation and administrative details were not offered by FE. I would add that if FE is permitted to manage NITS for default service customers, FE should be required to calculate NITS charges on each individual customer and customers that take steps to manage their NITS obligation should be entitled to the benefits of doing so.

Q. WHAT IS YOUR RESPONSE TO DR. OGUR'S SUPPORT FOR FE'S CAPACITY PROXY PRICE ("CPP") MECHANISM?

A. Dr. Ogur supports FE's proposal to use a Capacity Proxy Price ("CPP") mechanism to relieve wholesale default service suppliers' hedging obligations. CPP allows wholesale default service suppliers to offer default service supply contracts that extend beyond the period of known PJM capacity prices and allows for a true-up so that wholesale default service suppliers are made whole for capacity component of their wholesale offers. This approach may have been more understandable during periods when the PJM market was not delivering a long-term capacity price signal because of regulatory issues that delayed

[97] *See* RESA Exh. FL-26 (OCA Discovery Response to RESA Set 1, No. 44).

the PJM capacity auctions. However, this approach is wholly inappropriate for contracts desired by FE that extend beyond the period of known capacity prices. Wholesale default service suppliers should be required to bear this risk, just as retail suppliers are required to bear this risk in retail contracts. CPP primarily shifts risk from wholesale default service suppliers to retail customers.[98] Dr. Ogur similarly acknowledged in discovery that FE's CPP proposal leaves residential and commercial customers responsible for capacity cost risks during periods for which PJM auction prices are not yet known.[99] In practice, CPP shifts risk from wholesale default service suppliers to customers while reducing those wholesale suppliers' long-term hedging obligations. The wholesale default service suppliers are much better positioned to manage capacity risks than are customers. Dr. Ogur acknowledges that capacity can be hedged through bilateral contracting but concludes that bilateral contracting "is unlikely to yield a benefit to default service customers due to the capacity shortfall which the PJM market currently is in as well as the uncertainty surround PJM capacity market … and auction rules…."[100] Dr. Ogur's suggested approach for consumers is to have them bear the risks and the uncertainty of the capacity market and capacity shortfalls instead of placing the burden of those risks on the most skilled electricity market professionals. It is a "kick the can down the road" approach for sure and one that will not benefit any customer in the short run or the long run. To indicate further the folly of this approach, if wholesale default service suppliers were responsible for capacity hedges in long-term contracts, they might be incentivized

[99] *See* RESA Exh. FL-26 (OCA Discovery Response to RESA Set 1, No. 44).

[100] OCA St. No. 1 at 22.

to invest in or contract for long-term capacity resources, which begins to solve the larger capacity problem alluded to by Dr. Ogur.[101] Instead, the long-term risk is being borne by consumers who have no ability to solve the capacity problem.

Q. DO YOU AGREE WITH DR. OGUR'S SUGGESTION THAT FE SHOULD DEVELOP DEMAND RESPONSE PROGRAMS?

A. I do, but in accordance with Act 129 guidelines, those programs should be outsourced to independent, non-utility companies.

III. SUMMARY AND CONCLUSIONS

Q. CAN YOU SUMMARIZE YOUR TESTIMONY?

A. Yes. FE has proposed, and OCA and CAUSE-PA have endorsed, many changes to the competitive retail electricity market in the FE service territories, including changes affecting affirmative-consent requirements, POR, CRP, default service procurement, NITS treatment, and capacity risk allocation. In my opinion, many of these proposals are inconsistent with the market-oriented principles of the Competition Act and existing Pennsylvania retail market framework.

A central premise underlying many of these proposals supported by Mr. Cicero and Ms. Alexander is the comparison of supplier pricing to FE's Price to Compare. As discussed in my direct testimony and further explained in this rebuttal testimony, many of those pricing comparisons are analytically flawed because they compare fundamentally different products and fail to account for important market dynamics and customer protections associated with competitive supply service.

[101] RESA St. No. 1 at 64-65.

In addition, several of the proposals supported by FE, Mr. Cicero, Ms. Alexander and Dr. Ogur would shift substantial procurement and market risks away from wholesale suppliers who are equipped to manage the electricity market risks onto customers while simultaneously restricting competitive market participation. In sum, the proposals harm customers, harm the competitive retail markets, harm the wholesale market and move Pennsylvania's retail electricity market structure toward a rate-regulated framework in which customers bear a greater share of generation-related risks.

Q. DOES THAT COMPLETE YOUR REBUTTAL TESTIMONY?

A. Yes; however, I do reserve the right to supplement this testimony as may be appropriate.

VERIFICATION

I, Frank P. Lacey, hereby state that: (1) I am the founding principal of Electric Advisors Consulting, LLC; (2) the facts set forth in my rebuttal testimony is true and correct (or are true and correct to the best of my knowledge, information and belief); and, (3) I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

RESA-OCA-I-10. Reference page 10, lines 7-11 of the Direct Testimony of Barbara R. Alexander, where Ms. Alexander states: "Residential customers of FirstEnergy's Pennsylvania EDC have paid $394,826,692.63 more than the PTC to EGSs for the period January 2022 through January 2026... These higher prices are completely without justification in light of the procurement of default service for the same product sold by the EGSs." Please identify and produce all documents, analyses, calculations, workpapers, spreadsheets, assumptions, communications relied upon, and other materials supporting:

(a) the assertion that EGS products constitute "the same product" as default service;

(b) the comparison between EGS prices and default service prices;

(c) any adjustment or lack of adjustment for gross receipts taxes, reconciliation charges, hedging value, risk allocation, or other product differences;

And

(d) any analysis concerning what FE default service rates would have been absent customer migration to EGS service.

Response: Ms. Alexander has not conducted any such analysis. See Response to RESA-OCA-I-7.

Sponsoring Witness: Barbara Alexander

Date: May 26, 2026

Petition of FE PA Electric Company for Approval of Its Default Service Program for the Period Commencing June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298

RESA to CAUSE-PA, Set I

RESA-I-2. Reference page 15, lines 5-13 of the Direct Testimony of Patrick Cicero concerning the alleged $888 million in excess shopping charges. Please identify and describe in detail whether the analysis distinguished among or accounted for:

(a) fixed-price products;

(b) variable-price products;

(c) renewable-energy products;

(d) rewards or loyalty products;

(e) bundled or value-added products;

(f) specialty products;

(g) contract length;

(h) cancellation terms;

(i) hedging value;

(j) customer service attributes; or

(k) other non-price product attributes.

Response: (a) – (k) See CAUSE-PA Exhibit 1. As indicated in the work papers and live Excel spreadsheet associated with CAUSE-PA Exhibit 1, the analysis performed compared the actual rates for generation service charged to residential shopping customers compared to the actual default service rate.

Respondent: Patrick M. Cicero

Date: May 26, 2026

RESA EXHIBIT FL-15

CAUSE-PA Response to RESA Set I No. 1

Petition of FE PA Electric Company for Approval of Its Default Service Program for the Period Commencing June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298

RESA to CAUSE-PA, Set I

RESA-I-1. Reference page 15, lines 5-13 of the Direct Testimony of Patrick Cicero, where Mr. Cicero states that "since August 2017 through December 2025 … FE PA's residential shopping customers, as a whole, were charged over $888 million more than the applicable default service rate." Please identify and describe in detail:

(a) all assumptions used in calculating the alleged $888 million figure;

(b) all methodologies used to compare shopping charges to default service charges;

(c) all data sources relied upon;

(d) all adjustments made or not made in performing the analysis; and

(e) all analyses concerning whether FE PA default service rates would have differed absent customer migration to EGS service.

Response:

(a) No assumptions were made in calculating the monthly total residential shopping charges assessed by suppliers that charged customers $888 million more than they would have been charged had they been charged the applicable default service price over the same period.
(b) The methodologies used to compare shopping charges to default service charges were provided in the live Excel spreadsheets for CAUSE-PA Exhibit 1.
(c) All data sources relied upon were fully cited in CAUSE-PA Statement 1 and associated exhibits. No additional data sources were utilized.
(d) No adjustments were made to the applicable data in performing the analysis.
(e) The analysis performed compared the actual rates for generation service charged to residential shopping customers compared to the actual default service rate. No analysis was made about whether default service rates would have been different under a different level of customer shopping.

Respondent: Patrick M. Cicero

Date: May 26, 2026

RESA EXHIBIT FL-16

RESA-I-25. Reference page 31, lines 10-17 of the Direct Testimony of Patrick Cicero concerning affirmative consent requirements. Please identify and describe in detail all analyses performed regarding:

(a) customer confusion;

(b) customer understanding;

(c) administrative burden;

(d) implementation costs; or

(e) the proposed affirmative consent requirements.

Response: (a)-(f). None.

RESA EXHIBIT FL-18

OCA Response to
RESA Set I No. 45

Petition of FirstEnergy for Approval of Its Default Service Program
for the Period June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298

RESA Interrogatories
To
The Office of Consumer Advocate

Set I

RESA-OCA-I-45. Please identify whether either OCA witness reviewed or analyzed the impact of retail market restrictions adopted in other jurisdictions, including Maryland, on:

(a) competitive market supplier participation,

(b) residential shopping participation,

(c) competitive supplier product availability, or

(d) customer choice.

If so, please identify and produce such analyses or identify where such materials are publicly available.

Response: Dr. Ogur has not reviewed or analyzed the impact of any specific retail market restriction on residential retail electric supply markets adopted in any specific jurisdiction on competitive market supplier participation, residential shopping participation, competitive supplier product availability, or customer choice.

Sponsoring Witness: Dr. Serhan Ogur

Date: May 26, 2026

RESA EXHIBIT FL-19

CAUSE-PA Response to RESA Set I No. 24

Petition of FE PA Electric Company for Approval of Its Default Service Program for the Period Commencing June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298

RESA to CAUSE-PA, Set I

RESA-I-24. Does Mr. Cicero support FE's position that it will return customers to default service even if the default service price is higher than the customer's contract price?

Response: Mr. Cicero supports FirstEnergy's position that, at the end of a fixed term contract with a retail supplier, a customer has the right to continue with that supplier at the terms offered and that the customer would do so by indicating their affirmative consent to remain with the supplier. The customer also has the right to switch to a different supplier or return to default service. If the customer does not affirmatively choose to enter a new contract with the retail supplier or switch to another supplier, the customer would "default" to default service. This would be true regardless of the renewal price offered by the supplier.

Respondent: Patrick M. Cicero

Date: May 26, 2026

RESA EXHIBIT FL-20

CAUSE-PA Response to RESA Set I No. 23

Petition of FE PA Electric Company for Approval of Its Default Service Program for the Period Commencing June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298

RESA to CAUSE-PA, Set I

RESA-I-23. Is Mr. Cicero aware of any jurisdiction with restructured electricity markets that requires an affirmative consent to continue electricity service?

Response: Mr. Cicero has not taken a position that customers must give their affirmative consent "to continue electricity service." And has not conducted an analysis of whether any jurisdictions require affirmative consent to continue electricity service.

Respondent: Patrick M. Cicero

Date: May 26, 2026

RESA EXHIBIT FL-20

Docket No. P-2026-3060298

RESA Interrogatories
To
The Office of Consumer Advocate

Set I

RESA-OCA-I-28. Reference page 12, lines 17-19 of the Direct Testimony of Barbara R. Alexander, where Ms. Alexander states: "the most significant and valuable reform would be to limit the use of the POR to collect charges that are equal to or less than what the customer would pay with default service." Please identify all analyses concerning the effect of the proposed POR restrictions on EGS participation.

Response: Ms. Alexander has not conducted any such analysis. In her opinion, the level of EGS participation in the proposed POR would depend on how or whether EGSs revised their pricing methodology to conform to the proposed POR restrictions or whether EGSs developed their own billing and collection systems to market products and prices that did not conform to the proposed POR.

Sponsoring Witness: Barbara Alexander

Date: May 26, 2026

for the Period June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298

RESA Interrogatories
To
The Office of Consumer Advocate

Set I

RESA-OCA-I-29. Reference page 12, lines 17-19 of the Direct Testimony of Barbara R. Alexander, where Ms. Alexander states: "the most significant and valuable reform would be to limit the use of the POR to collect charges that are equal to or less than what the customer would pay with default service." Has Ms. Alexander performed or relied upon any analyses or evaluation of concerning whether such restrictions would reduce product diversity? If yes, please provide any such non-privileged analysis.

Response: The term "product diversity" is not defined. She notes that the POR is limited to the billing and collection of generation supply service. EGSs have the option to develop their own billing and collection systems for products other than or associated with attributes to generation supply service that do not conform to the proposed POR restrictions.

Sponsoring Witness: Barbara Alexander

Date: May 26, 2026

Petition of FirstEnergy for Approval of Its Default Service Program
for the Period June 1, 2027 to May 31, 2031

Docket No. P-2026-3060298

RESA Interrogatories
To
The Office of Consumer Advocate

Set I

RESA-OCA-I-1. Reference page 6, lines 14-26 of the Direct Testimony of Barbara R. Alexander, where Ms. Alexander states: "there is not a sufficient value to consumers to continue the CRP," and further states that "Terminating the CRP as of May 31, 2027 is a reasonable compromise and is in the public interest." Further reference page 7, lines 10-12, where Ms. Alexander states: "It is not reasonable to offer a program that requires the customer to assume the risk of future changes in the PTC..." Please identify and describe in detail all alternatives to elimination of the Customer Referral Program ("CRP") reviewed, relied upon, considered or evaluated by Ms. Alexander.

Response: Ms. Alexander did not review, rely upon, consider, or evaluate any alternatives to the elimination of the CRP. In this proceeding, her testimony was based on FirstEnergy's filing and testimony that recommended that the already terminated CRP not be renewed as well as Ms. Alexander's evaluation of FirstEnergy's CRP in prior Default Service Plan (DSP) proceedings. Ms. Alexander notes that the FirstEnergy DSP VI reflected the Settlement provision that the CRP, as it is currently operated, will terminate as of May 31, 2027. See Joint Petition for Partial Settlement, Docket No. P-2021-3030012, ¶ 69.

RESA Interrogatories
To
The Office of Consumer Advocate

Set I

RESA-OCA-I-2. Please identify and describe in detail all analysis performed by or relied upon Ms. Alexander believes eliminating a program that guarantees price savings for customers is in the public interest.

Response: The CRP does not guarantee price savings for customers since any change in the Price to Compare (PTC) during the term of the 12-month fixed price CRP contract may result in paying higher than the PTC. Furthermore, since the program allows the Electric Generation Supplier (EGS) to renew a CRP contract without affirmative customer consent, customers are at risk of paying higher prices than the applicable PTC after the CRP contract.

Set I

RESA-OCA-I-3. Reference page 6, lines 14-26 and page 7, lines 10-12 of the Direct Testimony of Barbara R. Alexander concerning the CRP and customer exposure to changes in the PTC. Please identify and describe in detail all proposed modifications to the CRP reviewed, relied upon, considered or evaluated by Ms. Alexander that could preserve customer benefits while mitigating risks associated with Price-to-Compare ("PTC") changes, including but not limited to:

(a) modifications to the timing of the PTC comparison;

(b) recalculation of CRP discounts when the PTC changes;

(c) fixed discount floors or caps; or

(d) other pricing or structural modifications.

Response: Ms. Alexander did not review or consider any modifications to the previous CRP implemented by FirstEnergy since that program has been subject to repeated evaluation and analysis in FirstEnergy's prior Default Service Proceedings. Ms. Alexander does not have any obligation to reform or consider alternatives to the CRP since it was designed to benefit EGSs and those entities have never suggested or proposed any changes to its current program design. See Response to RESA-OCA-I-1.

To
The Office of Consumer Advocate

Set I

RESA-OCA-I-44. Reference pages 23-25 and 35-36 of the Direct Testimony of Serhan Ogur concerning NITS charges, CPP mechanisms, and reconciliation adjustments. Please identify all analyses performed concerning whether FE PA's proposals shift wholesale market risks from suppliers to residential customers.

Response:

In Dr. Ogur's analysis:

- FE PA's proposals shift cost risks associated with NITS charges from suppliers to customers, in return for eliminating risk premiums in wholesale FPFR suppliers' bids tied to NITS cost uncertainty.
- Under FE PA's proposals regarding CPP mechanisms, capacity cost risks remain with residential and commercial customers for the months for which a PJM Base Residual Auction price has not been published, in return for eliminating risk premiums in wholesale FPFR suppliers' bids tied to capacity cost uncertainty. FE PA's proposals in its Default Service Plan (DSP) VII Petition cannot be said to shift capacity cost risks from suppliers to customers because DSP VII Petition is not different than DSP VI in this respect.
- Reconciliation adjustments do not shift wholesale market risks between suppliers and customers. Reconciliation adjustments allow FE PA to collect (or refund) under-collections (or over-collections) from its provision of default service in prior periods. Nevertheless, FE PA's proposals in its Default Service Plan (DSP) VII Petition related to the reconciliation mechanism cannot be said to shift wholesale market risks from suppliers to customers because DSP VII Petition is not different than DSP VI in this respect.

Set I

RESA-OCA-I-43. Reference pages 23-25 of the Direct Testimony of Serhan Ogur concerning FE PA's proposal to remove NITS charges from FPFR products. Please identify whether OCA performed any analysis concerning whether FPFR products that exclude NITS charges remain "fixed-price full requirements" products.

Response: Dr. Ogur considers FPFR products that exclude NITS charges as proposed by FE PA to be both "fixed price" and "full requirements" contracts. In Dr. Ogur's opinion, these contracts are referred to as "full requirements" because the wholesale supplier takes on the responsibility to provide a fixed percentage of energy consumption of the relevant customer class's default service load in each hour regardless of the variation in hour-by-hour usage and daily migration of customers into and out of default service (i.e., volumetric risk). These full-requirements contracts typically also include most other (than energy) PJM billing line items and other costs (e.g., distribution losses, The Alternative Energy Portfolio Standards Act compliance), but they do not need to include all such costs to be considered full requirements.

Dr. Ogur notes that FE PA's FPFR products in FE PA's currently effective Default Service Plan VI exclude certain PJM billing line items from these contracts. Such excluded PJM billing line items are Transmission Enhancement, Transmission Enhancement Settlement (EL05-121-009), Meter Error Correction, Expansion Cost Recovery, and Generation Deactivation. Source: FE PA Exhibit RJR-2, pages 96-106. In Dr. Ogur's analysis, adding one more item to the PJM billing line items that are excluded from the FPFR products does not change them from being full requirements to not being full requirements.

I. INTRODUCTION

Q. PLEASE STATE YOUR NAME.

A. My name is Frank Lacey.

Q. ON WHOSE BEHALF ARE YOU PROVIDING SURREBUTTAL TESTIMONY?

A. I am submitting this surrebuttal testimony on behalf of the Retail Energy Supply Association ("RESA").[1]

Q. HAVE YOU PREVIOUSLY PROVIDED TESTIMONY ON BEHALF OF RESA IN THIS PROCEEDING?

A. Yes. My Direct Testimony was served on April 29, 2026 pre-marked as RESA St. No. 1 and included RESA Exhibits FL-1 through FL-11. My written Rebuttal Testimony was served on May 28, 2026 and included RESA Exhibits FL-12 through 27.

Q. ARE YOU SPONSORING ANY EXHIBITS IN YOUR SURREBUTTAL TESTIMONY?

A. Yes, I am sponsoring the exhibits listed in the Table of Exhibits.

Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

A. The purpose of my surrebuttal testimony is to respond to rebuttal testimony offered by FirstEnergy ("FE"), the Office of Consumer Advocate ("OCA"), and the Coalition for Affordable Utility Services and Energy Efficiency in Pennsylvania ("CAUSE-PA") in support of FE's proposed retail market restrictions and related default service changes.

---

[1] The comments expressed in this filing represent the position of the Retail Energy Supply Association (RESA) as an organization but may not represent the views of any particular member of the Association. Founded in 1990, RESA is a broad and diverse group of retail energy suppliers dedicated to promoting efficient, sustainable and customer-oriented competitive retail energy markets. RESA members operate throughout the United States delivering value-added electricity and natural gas service at retail to residential, commercial and industrial energy customers. More information on RESA can be found at www.resausa.org.

Q. PLEASE PROVIDE A HIGH LEVEL SUMMARY OF THE CONCERNS YOU CONTINUE TO HAVE WITH FE'S PROPOSALS AFTER CONSIDERING THE REBUTTAL TESTIMONY.

A. At a high level, the rebuttal testimony continues to rely on incomplete analyses to conclude that the current competitive retail market is producing customer harm. On the basis of this inadequate analysis, the supporting witnesses endorse significant changes to the market, including restrictions on supplier contracting, limitations on POR eligibility, elimination of the Customer Referral Program ("CRP"), and changes to default service risk allocation without demonstrating that the proposals will address the concerns they identify or that the likely consequences of the proposals have been adequately evaluated. Nor have they analyzed less restrictive alternatives that may address their concerns while also preserving customer choice and competitive market participation. None of the supporting witnesses analyzed how the combined effect of FE's proposals would impact residential customers participation, supplier participation, product availability, or competition in the retail electricity market

My testimony responds to those issues by addressing the specific rebuttal testimony concerning historical PTC comparisons, affirmative consent, POR, the Standard Offer CRP, and risk-allocation issues related to wholesale default service supply contracts.

Q. IS IT YOUR INTENT TO ADDRESS ALL OF THE REBUTTAL TESTIMONY?

A. No. I have attempted to respond generally to the statements and recommendations made by these witnesses. In the event that an issue is not addressed, this should not be viewed as my acceptance of their testimony. Rather, it reflects my belief that a further response in this surrebuttal testimony is not warranted, either because it was adequately addressed in my direct or rebuttal testimony, or because it is a legal matter that is better addressed by counsel in briefs or other pleadings.

Q. DID YOU REVIEW ANY TESTIMONY FROM FE, OCA OR CAUSE-PA THAT YOU BELIEVE IS PARTICULARLY HELPFUL TO THE COMMISSION IN ISSUING A RULING IN THIS PROCEEDING?

A. I did. I found Ms. Alexander's statements about FE being a monopoly extremely troubling and I believe that the Commission should view her testimony from her lens of seeing FE as a monopoly, which they are not supposed to be, with respect to electricity supply service. Specifically, in the context of discussing services that renew for customers automatically, such as a cell phone bill, newspapers, and the like, her response about the other service providers was "none of them are monopoly providers like First Energy (sic) or the other EDCs are."[2] This was not an isolated statement, perhaps written in error. She doubled down on the assertion claiming, "FirstEnergy is a monopoly and customers are without any options for essential electric service when faced with an unaffordable bill that included high EGS charges."[3] In fact, FE is not a supposed to be a monopoly provider of electricity services. However, FE has an overwhelming 80+% market share in the residential market, which is served by dozens of EGSs. Ms. Alexander is endorsing programs that will strengthen the monopoly stronghold on residential customers that FE already enjoys. Pennsylvania has an open and competitive market for retail electric services with dozens of licensed suppliers operating in the FE service territories. FE and the Commission should be working to deliver a more competitive market for residential customers, not a more concentrated market.

Mr. Cicero's statements that are most telling are his oscillating statements between which entities compete with which entities. In defense of slamming a customer back to default

---

[2] OCA St. No. 2-R (Alexander) at 16.

[3] OCA St. No. 2-R (Alexander) at 16.

service, Mr. Cicero claims "a customer who takes no action would literally 'default' to default service – they would not revert to a competing retail supplier."[4] Earlier in his testimony, however, Mr. Cicero claims that "EGS offers do not compete with wholesale supply offers, they compete with other suppliers … and with FE PA's administratively determined default service price…"[5] He says virtually the same thing on the next page of his testimony again arguing that EGSs compete with FE's default service. Mr. Cicero's conflicting statements yield confusion in his insinuation that they are competitors whose prices should always be comparable, but that they do not compete with respect to slamming back to FE. EGSs either compete with default service or they do not. I urge the Commission to evaluate this conflicting testimony and recognize that Mr. Cicero positions the two as competitors when it suits his needs and not as competitors when it suits other needs.

Finally, Mr. Cicero stated that my "conjecture" about utilities investing in generation assets is pure conjecture "with zero factual basis." I would like to point out that the Energy Association of Pennsylvania (of which FE is a member) has offered support for House Bill 1272 and Senate Bill 897, both of which would permit the option for utility investment in generation.[6]

II. SURREBUTTAL

A. Affirmative Consent / Return To Default Service

Q. DID THE REBUTTAL TESTIMONY ALTER YOUR VIEW REGARDING FE'S PROPOSAL TO REQUIRE AFFIRMATIVE CUSTOMER CONSENT IN ORDER TO REMAIN WITH A COMPETITIVE SUPPLIER?

A. I reviewed the rebuttal testimony of Mr. Young, Ms. Alexander, and Mr. Cicero concerning FE's proposal to require affirmative customer consent for contract renewals and related proposals that would result in customers being returned to default service absent such consent.[7] While the rebuttal testimony provides additional discussion in support of the proposals, it does not resolve the concerns I identified in my direct and rebuttal testimony regarding customer choice, market participation, and the anti-competitive effects of the proposals.[8]

Q. WHAT CONCERNS REMAIN?

A. My primary concern remains that FE, OCA, and CAUSE-PA seek to fundamentally change longstanding Commission policy and existing customer protections without adequately analyzing the consequences of those changes.[9] These concerns were discussed in my Direct Testimony, pages 14-26, and my Rebuttal Testimony, pages 12-18. The Commission's existing regulations already adequately establish detailed requirements governing contract renewals and customer notices, and the Commission has quite appropriately previously declined to require the type of automatic customer transfers proposed by FE. In my view the operational efficacy of the existing regulations should

---

[7] FE PA St. No. 1-R (Young) at 7-14; OCA St. No. 2-R (Alexander) at 15-17, 24-25; CAUSE-PA St. 1-R (Cicero) at 24-28

[8] RESA St. No. 1 (Lacey) at 14-16; RESA St. No. 1R (Lacey) at 12-18.

[9] *See* OCA St. No. 2-R (Alexander) at 6-7 (arguing current renewal framework should be replaced because customers are exposed to negative-option renewals); and, CAUSE-PA St. 1-R (Cicero) at 24-27 (arguing affirmative consent is necessary and in the public interest).

not be disregarded solely because one party disagrees with the policy choices reflected in the regulations. The rebuttal testimony does not identify evidence demonstrating that the existing framework has failed or that the proposed replacement framework will improve customer outcomes. As stipulated under existing regulations, customers provide affirmative consent when they enter into their contracts and are granted extensive renewal notices. Neither the rebuttal testimony nor the supporting analyses demonstrate that these existing protections are inadequate. The contract language and the renewal notice language set customer expectations. The proposal to slam customers back to default service disregards these customers' expectation, placing the business reputations of the EGS (as not being able to protect the customer from FE), and FE as the "slammer" at risk.

Mr. Cicero notes that "FE PA's proposal simply prevents suppliers from relying on inertia to move a customer onto a new rate or continue a customer on a variable-priced product without customer consent." The irony of this statement should not be lost here. Mr. Cicero is uncomfortable with "inertia" to continue a customer's affirmative choice to move to an EGS, yet he is perfectly comfortable with "inertia" being the reason to negate a customer's choice and slam that customer back to default service. The proposals are directly contradictory to the options for contract renewals under Pennsylvania regulations. This reinforces that Mr. Cicero's primary argument is a disagreement with longstanding regulations. A utility's default service proceeding is not the appropriate venue to change regulations that are fundamental to the backbone of electric competition in each of the utility service territories across the Commonwealth.

Ms. Alexander relies on scare tactics in support of her positions calling EGS contracts "preprinted and non-negotiable," "multi-page," "fine print," and presented as "take it or leave it" propositions. She neglects to compare this to FE's tariff which is truly a non-negotiable document that spans 248 pages currently. As I noted in my direct testimony, the calculation of the price to compare, which starts on the 204th page of the document, is a mathematical equation that runs three lines of text and is followed by three pages of definitions to help a customer understand how the calculations would be applied. Even if a customer was able to decipher the equation, it would be very difficult to find the required numbers to put into the equation as they are not in the tariff.

Q. DID THE REBUTTAL WITNESSES ANALYZE THE EFFECT OF THESE PROPOSALS ON CUSTOMER PARTICIPATION IN THE COMPETITIVE MARKET?

A. No. As discussed in my direct and rebuttal testimony, I expressed concerns regarding the effect of FE's affirmative consent proposal on customer choice and participation in the competitive market.[10] The rebuttal testimony did not resolve those concerns.[11]

In addition, CAUSE-PA acknowledged that it performed no analysis concerning customer understanding, administrative burden, implementation costs, or other practical effects associated with the proposed affirmative consent requirements.[12] Likewise, I am not aware of any analysis presented by FE or OCA evaluating those issues.

As a result, while the rebuttal witnesses continue to support the proposal, the record contains little evidence concerning how the proposal may affect customer participation in

[10] RESA St. No. 1R (Lacey) at 13-14 and RESA Exh. FL-16.

[11] CAUSE-PA St. 1-R (Cicero) at 24-27; FE PA St. No. 1-R (Young) at 12-14.

[12] *See* RESA Exhibit FL-17.

the competitive market, supplier participation, or the availability of competitive products and services. Because the comparisons are so elementary, they fail to show any harm to customers.

Q. DID THE REBUTTAL TESTIMONY DEMONSTRATE THAT THESE PROPOSALS ARE NARROWLY TAILORED TO ADDRESS AFFORDABILITY CONCERNS?

A. No. As discussed in my Rebuttal Testimony, both FE and CAUSE-PA acknowledged that customers would be returned to default service absent affirmative consent regardless of whether the supplier's renewal price was above or below the applicable default service price.[13] Accordingly, the proposal is not limited to circumstances in which a customer is paying more than default service. As such, the proposal operates without regard to affordability concerns. The rebuttal testimony does not provide valid reasoning why customers should be involuntarily returned to default service, especially when the customer's existing supplier relationship may be less expensive than default service or may provide other product attributes valued by the customer. This further underscores that affordability concerns are not what is driving these proposals.

Q. DID ANY OF THE REBUTTAL WITNESSES RESOLVE YOUR CONCERNS REGARDING THE RELEVANCE OF THE MARYLAND EXPERIENCE DISCUSSED IN YOUR DIRECT TESTIMONY?

A. No. Mr. Young argues that Maryland adopted a broader package of retail market reforms than those proposed by FE in this proceeding.[14] Mr. Cicero continues to support affirmative consent requirements and related customer protections.[15] However, neither

[13] RESA St. No. 1R (Lacey) at 15-16.

[14] FE PA St. No. 1-R (Young) at 12-13.

[15] CAUSE-PA St. 1-R (Cicero) at 24-27.

witness analyzed the actual effects of Maryland's reforms on residential shopping participation, supplier participation, product availability, or customer choice. As discussed in my Direct Testimony on pages 9-11 and 24-25, Maryland is a concrete example of a jurisdiction that adopted retail market restrictions similar to several proposals being advanced in this proceeding. Accordingly, my concern remains that the rebuttal testimony does not meaningfully evaluate the real-world experience of a state that has already adopted policies intended to address many of the same concerns being raised here.

Q. DID ANY OF THE REBUTTAL WITNESSES OFFER ANY TESTIMONY ABOUT THE IMPACT ON CUSTOMER MIGRATION, MIGRATION RISK, OR SUPPLY/DEMAND CHANGES ON THE LIKELY PRICE OF DEFAULT SERVICE IF THE PROPOSALS WERE ADOPTED?

A. No. Basic economic principles would indicate that increases in default service load and increased migration risk to default service load and default service suppliers will have the impact of increasing default service prices.

B. <u>Purchase Of Receivables (POR) Program</u>

Q. DID THE REBUTTAL TESTIMONY ALTER YOUR VIEW REGARDING FE'S PROPOSED CHANGES TO THE POR PROGRAM?

A. No. I reviewed Mr. Young's rebuttal testimony defending FE's proposal to condition POR eligibility on supplier pricing and to shift collection risk to suppliers charging prices above the PTC.[16] I also reviewed Ms. Alexander's rebuttal testimony supporting restrictions on POR participation and continued reliance on the PTC as a benchmark for POR eligibility.[17] Finally, I reviewed Mr. Cicero's rebuttal testimony supporting FE's

[16] FE PA St. No. 1-R (Young) at 7-14.

[17] OCA St. No. 2-R (Alexander) at 19-20.

proposed POR modifications and arguing that suppliers charging prices above the PTC should bear collection risk rather than other customers.[18] While the rebuttal testimony attempts to provide additional support for those proposals, it does not resolve the concerns I identified in my direct testimony on pages 27-39 and rebuttal testimony on pages 18-22 regarding customer choice, competition, and the long-standing public-interest rationale supporting POR programs.

Q. WHAT CONCERNS REMAIN?

A. My primary concern remains that FE seeks to fundamentally alter a long-standing Commission-approved program by conditioning participation on supplier pricing. As discussed in my Direct Testimony on pages 27-33 and my Rebuttal Testimony on pages 18-22, the Commission has historically viewed POR programs as serving the public interest because they support customer access to competitive supply options, billing simplicity, and efficient market operations. Mr. Young and Mr. Cicero focus heavily on historical pricing comparisons, uncollectible expenses, and termination statistics.[19] However, even accepting those concerns for purposes of discussion, the rebuttal testimony does not establish that conditioning POR eligibility on supplier pricing is the appropriate solution or explain why that particular restriction is necessary to preserve the public-interest benefits historically associated with POR programs. Furthermore, there are limitations to Mr. Cicero's analysis of bad debt expenses. Mr. Cicero's comparison relies on FE's response to RESA Interrogatory 1-12,[20] which reflects uncollectible

[18] CAUSE-PA St. 1-R (Cicero) at 16-23.

[19] FE PA St. No. 1-R (Young) at 9-10; CAUSE-PA St. 1-R (Cicero) at 16-23.

[20] FE's Response to RESA Set 1, No. 12 is included with CAUSE-PA Exhibit 1-R at Appendix A-R.

expense amounts derived through FE's allocation methodology rather than a direct comparison of customer-specific default service and shopping customer write-offs. The interrogatory response states that "FE PA allocates generation uncollectible accounts expense to default service vs. POR in a base rate case test year based on based on (sic) the default service revenues plus the POR revenues billed on behalf of EGSs."[21]

Q. DID THE REBUTTAL TESTIMONY DEMONSTRATE THAT CONDITIONING POR ELIGIBILITY ON SUPPLIER PRICING IS NECESSARY TO ADDRESS THE CONCERNS IDENTIFIED BY FE?

A. No. As discussed in my Rebuttal Testimony on pages 18-22, my concern is not whether FE has identified customer affordability concerns, but whether the specific POR restrictions being proposed have been shown to be the appropriate remedy. Mr. Young asserts that restricting POR access for suppliers charging prices above the PTC will reduce customer exposure to EGS-related uncollectible expense.[22] Mr. Cicero similarly argues that suppliers charging above the PTC should bear collection risk rather than other customers.[23] However, neither witness analyzes whether less restrictive alternatives could address those concerns or demonstrates why conditioning POR eligibility on supplier pricing is the appropriate remedy.

Q. DID YOU REVIEW ANY ADDITIONAL FE DATA CONCERNING CUSTOMER PAYMENT OUTCOMES?

A. Yes. I reviewed FE's responses to CAUSE-PA Interrogatory Set 1 Nos. 6 and 7, which I have attached as Exhibits FL-28 and FL-29. These responses contain additional

---

[21] *Id.*

[22] FE PA St. No. 1-R (Young) at 13.

[23] CAUSE-PA St. 1-R (Cicero) at 17 and 21-22.

information concerning customer payment outcomes, including data regarding customer write-offs and customers identified by FE as "payment troubled."

Q. WHAT SIGNIFICANCE DO YOU ATTRIBUTE TO THOSE RESPONSES?

A. I do not attempt to reconcile the various customer-payment metrics maintained by FE, nor do I offer an opinion regarding which metric is most appropriate for evaluating customer payment performance. However, the responses demonstrate that FE maintains multiple datasets concerning customer payment outcomes. The existence of multiple customer-payment datasets makes it difficult to conclude that any single metric, standing alone, provides a sufficient basis for the significant POR restrictions proposed by FE.

Q. DID THE REBUTTAL WITNESSES ANALYZE HOW THE PROPOSAL MAY AFFECT CUSTOMER ACCESS TO COMPETITIVE SUPPLY OPTIONS?

A. No. As discussed in my Direct Testimony on pages 30-35 and my Rebuttal Testimony on pages 19-21, POR programs help facilitate customer access to competitive supply products by reducing barriers to participation and supporting utility consolidated billing. POR programs also “level the playing field” in competitive markets by treating all electricity supply receivables the same. I am not aware of any analysis presented by FE, OCA, or CAUSE-PA evaluating how the proposed restrictions may affect supplier participation, product availability, customer access to competitive supply options, or general competition in the retail market. Instead, the rebuttal testimony assumes that the benefits asserted by FE outweigh any potential impact on competition without quantifying those impacts. As a result, the record contains little evidence concerning the consequences on customers of restricting POR eligibility.

Q. DOES THE FACT THAT SUPPLIERS COULD CONTINUE TO USE UTILITY CONSOLIDATED BILLING WITHOUT POR ELIMINATE YOUR CONCERNS?

A. No. Mr. Young and Ms. Alexander both note that suppliers could continue to use utility consolidated billing or pursue other collection options even if they are no longer eligible for POR.[24] As discussed in my Direct Testimony on pages 33-37, my concern has never been whether suppliers can theoretically continue to operate without POR. Rather, my concern is whether restricting POR access affects competition, supplier participation, customer participation and customer choice. The rebuttal testimony does not analyze those issues.

Q. DO YOU CONTINUE TO BELIEVE THAT FE'S PROPOSAL IS INCONSISTENT WITH THE COMMISSION'S HISTORIC TREATMENT OF POR PROGRAMS?

A. Yes. As discussed in my Direct Testimony on pages 27-33 and my Rebuttal Testimony on pages 18-22, Commission regulations expressly recognize that consideration of POR programs serves the public interest, and prior Commission decisions have relied upon POR as an important component of Pennsylvania's competitive retail market structure. My concern remains that FE seeks to restrict access to a long-standing Commission-approved program based on an inaccurate and inadequate analysis of supplier pricing, even though the rebuttal testimony does not establish that such restrictions are necessary to protect customers, lower costs or evaluate their effect on competition and customer choice. I also note that prior Commission decisions evaluating retail market design considered POR as an important component of the competitive market framework. During the Commission's Retail Market Investigation, stakeholders proposed competing

[24] FE PA St. No. 1-R (Young) at 13; OCA St. No. 2-R (Alexander) at 20.

approaches to billing and collections in a competitive retail market. RESA and some EGSs advocated for Supplier Consolidated Billing ("SCB") during that process. Others advocated for what is today known as POR. Under SCB, EGSs would have assumed responsibility for all billing (EDC charges too), collections and bad debt. The Commission ultimately declined to move to an SCB framework but expressly recognized the importance of POR in facilitating supplier participation in the competitive market. Specifically, the Commission stated, "It is unclear how many suppliers would be willing to forgo the ease and convenience of utility consolidated billing under POR, where they have no bad debt risk, to opt for an SCB model where they assume the full burden of billing, collections and bad debt."[25] The Commission was therefore fully aware that POR reduced supplier risk and made participation in the retail market more attractive to competitive suppliers by leveling the playing field with respect to electricity supply receivables.

What FE proposes here is not a minor administrative change to the POR framework adopted by the Commission. Rather, it would materially restrict access to a foundational component of the Commission's competitive market design. Yet, neither Mr. Young nor the supporting witnesses evaluate how those restrictions fit within the broader framework the Commission developed to encourage supplier participation and customer choice. Nor do they assess whether other market design changes, such as expanded supplier billing responsibilities or other mechanisms to address increased supplier risk, would be necessary if POR no longer serves the function the Commission intended. Absent that

[25] *See Investigation of Pennsylvania's Retail Elec. Mkt.: End State of Default Serv.*, Docket No. I-2011-2237952 (Final Order entered Feb. 15, 2013), at 66-77.

analysis, FE has not demonstrated that its proposal can be implemented without adversely affecting customer access to competitive electricity products, supplier participation, competitive offers, and ultimately the vitality of Pennsylvania's retail electricity market.

Q. WHAT CONCLUSION SHOULD THE COMMISSION DRAW?

A. The rebuttal testimony presents concerns regarding residential customer pricing and collection outcomes. However, it fails to establish why conditioning POR eligibility on supplier pricing is necessary to address those concerns, fails to evaluate the competitive consequences of the proposed restrictions, and fails to demonstrate why the Commission should depart from the historic public-interest rationale underlying POR programs and related competitive market policies. For the reasons discussed in my Direct Testimony on pages 27-39, and my Rebuttal Testimony on pages 18-22, I reiterate my belief that POR restrictions tied to supplier pricing are inconsistent with the precedent of POR programs established to support customer choice and competitive market participation. Accordingly, I continue to urge the Commission to reject FE's proposed POR modifications.

C. Pricing Comparisons Are An Insufficient Basis For Retail Market Restrictions

Q. DID THE REBUTTAL TESTIMONY RESOLVE YOUR CONCERNS REGARDING THE USE OF HISTORICAL PTC COMPARISONS AS A BASIS FOR RETAIL MARKET RESTRICTIONS?

A. No.

Q. PLEASE IDENTIFY THE REBUTTAL TESTIMONY YOU REVIEWED REGARDING THIS ISSUE AND SUMMARIZE.

A. I have reviewed the rebuttal testimony of Mr. Young, Ms. Alexander, and Mr. Cicero addressing residential shopping customer pricing relative to the Price to Compare ("PTC"). Mr. Young relies on overly simplistic historical comparisons between EGS

prices (suggesting that all EGSs and EGS products are equivalent) and the PTC, including the analysis presented in Table 6 of his direct testimony and supporting information provided in rebuttal.[26] Ms. Alexander likewise relies upon the same overly simplistic historical comparisons between EGS prices and the PTC and asserts that such comparisons demonstrate that residential shopping customers have paid more than customers receiving default service.[27] Mr. Cicero similarly relies on historical comparisons between EGS prices and the PTC, including his analysis of aggregate customer costs above the PTC over an extended historical period.[28]

Q. WHY DO THESE DISCUSSIONS NOT PERSUADE YOU TO ALTER YOUR VIEW OF THE ISSUE?

A. While the rebuttal testimony provides additional discussion regarding historical pricing comparisons, it does not address, dispute, or resolve the concerns I identified in my direct and rebuttal testimony regarding the use of retrospective PTC comparisons as the primary basis for the significant retail market restrictions proposed by FE.[29] Specifically, the rebuttal testimony continues to rely primarily on these simplistic historical comparisons between EGS prices (again, evaluated as if all EGS products and service are the same) and default service prices, while failing to address whether those comparisons capture the full range of factors that may influence customer purchasing decisions or provide a sufficient basis for the broad market restrictions being proposed in this proceeding. More specifically, these comparisons are: (1) fundamentally retrospective; (2) not economically

---

[26] FE PA St. No. 1-R (Young) at 7-12.

[27] OCA St. No. 2-R (Alexander) at 14-16.

[28] CAUSE-PA St. 1-R (Cicero) at 10-13.

[29] *See* RESA St. No. 1 (Lacey) at 28-34; RESA St. No. 1R (Lacey) at 2-6.

equivalent; and, (3) premised on the unsupported assumption that any price paid above the PTC constitutes an "over-payment" and necessarily reflects a lack of customer value.

Q. PLEASE EXPLAIN YOUR DISAGREEMENT WITH THE RETROSPECTIVE NATURE OF THE COMPARISONS RELIED UPON BY FE, OCA AND CAUSE-PA.

A. These comparisons evaluate historical EGS prices to historical default service prices after both prices are already known. By contrast, the purchasing decision facing a customer occurs prospectively. At the time a customer selects a competitive supplier offer, the customer is choosing among several forward-looking alternatives, each subject to uncertainty at the end of defined periods of time for each option. In other words, the customer makes an affirmative choice – whether to stay with their current supplier or move to another supplier (or default service) – between two unknowns. A fixed-price EGS contract that extends beyond the period for which default service prices are known provides a longer period of price certainty than default service. If one product has a known price for twelve months (or longer) and another has a known price for six months or fewer, the former is more predictable over the longer period. This distinction was central to my direct testimony, where I explained that a fixed-price EGS contract represents a forward-looking commitment by the supplier to provide service at a stated price over a specified period, while the PTC is a historical and periodically changing benchmark.[30] Ms. Alexander disagrees with that characterization, but her rebuttal testimony does not alter the fact that the customer enrollment decision is made prospectively rather than retrospectively.

[30] *See* RESA St. No. 1 (Lacey) at 29-33.

Q. PLEASE EXPLAIN YOUR SECOND ISSUE WITH THESE COMPARISONS REGARDING THEIR LACK OF ECONOMIC EQUIVALENCE.

A. The comparisons assume that the products being compared are economically equivalent. However, neither Mr. Young, Ms. Alexander, nor Mr. Cicero performed an analysis establishing that historical default service and forward-looking competitive supply products are equivalent products for purposes of evaluating customer value. Similarly, they did not rebut any of the factual differences between products that I presented. Ms. Alexander acknowledged in discovery that she has not performed such an analysis.[31] Likewise, neither Mr. Cicero nor Mr. Young identified any analysis evaluating whether the products being compared are equivalent from the customer's perspective.[32]

Q. DID MR. YOUNG'S REBUTTAL TESTIMONY ADDRESS YOUR CONCERNS REGARDING TABLE 6 AND THE SUPPORTING ANALYSIS PROVIDED IN HIS REBUTTAL TESTIMONY?

A. No. Mr. Young provided additional information in rebuttal concerning the calculations underlying Table 6.[33] Fundamentally, the rebuttal analysis continues to compare a wide variety of competitive supply products against a historical default service benchmark without first establishing that the products being compared are economically equivalent.[34] Crucially, Mr. Young's new numbers still do not account for all of the costs that are embedded in distribution rates that continue to subsidize default service. As such, while I appreciate Mr. Young's efforts to provide additional information regarding Table 6, the

---

[31] RESA Exhibit FL-13 (OCA Response to RESA-OCA-I-20).

[32] *See* RESA Exhibit FL-15 in which Mr. Cicero admits his analysis simply compared actual shopping charges to actual default service charges and did not analyze how default service rates would differ under different market conditions.

[33] FE PA St. No. 1-R (Young) at 10-12.

rebuttal testimony does not resolve my concerns regarding the reliability of the underlying comparisons or their use as a basis for the significant market restrictions proposed in this proceeding.

Q. WHAT IS YOUR CONCERN ABOUT THE CUSTOMER VALUE ASSUMPTIONS EMBEDDED IN THE POSITIONS OF FE, OCA AND CAUSE-PA?

A. The rebuttal testimony continues to assume that any amount paid above the PTC necessarily reflects a lack of customer value. However, I am not aware of any analysis in the record performed by FE, OCA, or CAUSE-PA concerning customer preferences, customer decision-making, customer risk tolerance, or customer valuation of non-price product attributes.[35] For example, no witness evaluated whether customers may place value on fixed-price certainty, protection from future price volatility, renewable energy attributes, rewards programs, or other product characteristics offered by competitive suppliers. Nor did any witness perform a customer survey, behavioral analysis, or market study evaluating the reasons customers select competitive supply products. Customer value can only be fully evaluated through an analysis of customer preferences and customer decision-making. Indeed, FE itself acknowledged in discovery that fluctuations in the PTC can harm customers through price volatility, budgeting difficulties, and financial stress.[36] If price volatility can impose burdens on customers, then it follows that some customers may place value on products that provide greater price certainty. However, neither FE, OCA, nor CAUSE-PA attempted to evaluate this. Different customers may place different values on product attributes such as renewable energy,

[35] *See* Lacey Rebuttal at 12-15; RESA Exhibits FL-12 and FL-13.

[36] RESA Exhibit FL-30: FE Response to EGS Set 1, No. 5.

price certainty, rewards programs, customer service features, or other characteristics. However, no witness attempted to evaluate those preferences or determine the value customers place on those attributes. Instead, the rebuttal testimony assumes that EGS products lack customer value unless they are priced lower than the default service rate.

Q. ARE YOU SUGGESTING THAT FE, OCA, OR CAUSE-PA WERE REQUIRED TO PERFORM A PARTICULAR STUDY OR ADOPT A SPECIFIC METHODOLOGY BEFORE RELYING ON HISTORICAL PTC COMPARISONS?

A. My concern is not that OCA or CAUSE-PA failed to perform a particular study or adopt a particular methodology. Rather, my concern is that they seek to justify significant market restrictions based upon analytically inaccurate historical price comparisons while performing no analysis concerning customer preferences, customer decision-making, product equivalency, or customer valuation of non-price product attributes. As I explained in discovery, numerous analytical questions could potentially be examined when attempting to determine whether two products are economically equivalent from a customer's perspective.[37] A simple evaluation of differences in product attributes, hedging arrangements, risk allocation, customer mobility risk, and other factors would be a better indication of customer value and provide stronger insight into customer purchasing decisions. However, neither OCA nor CAUSE-PA undertook such an evaluation. Likewise, neither OCA nor CAUSE-PA performed any analysis of customer shopping behavior, customer understanding of EGS products, customer preferences, or the value customers place on non-price product attributes.[38] I am also not aware of any

[37] RESA Exhibit FL-31: RESA Response to OCA Set 13, No. 10.

[38] *See* RESA Exhibits FL-12 and FL-13.

such analyses presented by FE. My point is not that a particular methodology is required, but rather significant market restrictions are being justified on the basis of a relatively elementary historical price comparison even though no analysis was performed to consider the products being compared or the future impacts on all customers. And that comparison is being done against a benchmark called the "Price to Compare." It is not being performed against a benchmark called "price cap," price max," or "price to beat."

Q. BASED ON THESE CONTINUING SERIOUS FLAWS IN THE COMPARISONS RELIED UPON BY FE, OCA AND CAUSE-PA, WHAT DO YOU CONCLUDE?

A. I maintain that the historical comparisons presented by Mr. Young, Ms. Alexander, and Mr. Cicero may have identified price differences, but they did not discuss product differences. As such, they performed a "compare" but failed to do the "contrast." They did not establish from the perspective of the customer whether customers received value that they considered important when making their purchasing decisions.[39] Accordingly, I continue to assert that historical PTC comparisons are incomplete and should not be relied upon as the primary basis for imposing broad restrictions on the competitive retail market.

Q. WHAT CONCLUSION SHOULD THE COMMISSION DRAW?

A. The record demonstrates that customers voluntarily select a variety of competitive supply products with differing prices, terms, and attributes. While the value customers place on those attributes has not been quantified in this proceeding, neither FE, OCA, nor CAUSE-PA has demonstrated that such value is zero. Accordingly, historical price

[39] *See* RESA St. No. 1 (Lacey) at 50-56; RESA St. No. 1R (Lacey) at 2-6.

comparisons alone do not provide a sufficient basis for the broad market restrictions proposed in this proceeding.

D. Elimination Of Customer Referral Program ("CRP")

Q. DID THE REBUTTAL TESTIMONY ALTER YOUR VIEW OPPOSING FE'S PROPOSAL TO DISCONTINUE THE CRP?

A. No

Q. WHAT REBUTTAL TESTIMONY DID YOU REVIEW?

A. I reviewed the rebuttal testimony of Ms. De La Rosa regarding FE's proposal to discontinue the CRP. Specifically, I reviewed her discussion of declining supplier participation, customer enrollment levels, and the collaborative process conducted pursuant to the DSP VI Settlement.[40] While Ms. De La Rosa provides additional support for FE's proposal to eliminate the CRP, her testimony does not resolve the concerns I identified in my direct testimony on pages 58-61 and my rebuttal testimony on pages 22-24 concerning the benefits provided by the program and the absence of evidence demonstrating that customers will benefit from its elimination.

Q. WHAT CONCERNS REMAIN?

A. My primary concern remains that FE seeks to eliminate a voluntary customer program without meaningfully demonstrating that doing so will improve customer outcomes. Ms. De La Rosa focuses only on declining supplier participation and enrollment levels.[41] This is consistent with the observations set forth in my Direct Testimony on pages 58-61 and my Rebuttal Testimony on pages 22-24. However, participation levels alone do not establish whether the customers who participated in the program benefited from it. Nor

[40] FE PA St. No. 4-R (De La Rosa) at 8-10.

[41] FE PA St. No. 4-R (De La Rosa) at 8-10.

does the rebuttal testimony identify any measurable customer benefit that would result from eliminating the program. Indeed, while FE identifies declining participation as a reason to discontinue the program, neither FE nor the supporting witnesses identify any customer harm caused by the program itself.

Q. DID THE REBUTTAL TESTIMONY EVALUATE THE BENEFITS ACTUALLY RECEIVED BY CRP PARTICIPANTS?

A. No, not to my knowledge. Ms. De La Rosa discusses supplier participation levels, enrollment levels, and the history of the collaborative process.[42] However, I am not aware of any analysis in her rebuttal testimony evaluating the actual savings achieved by participating customers or comparing those customer benefits against the reasons offered for eliminating the program.

Q. DID YOU REVIEW ANY ADDITIONAL FE INFORMATION REGARDING CRP PARTICIPANT OUTCOMES?

A. Yes. I reviewed FE's response to OCA Interrogatory Set 1 No. 27, which I have attached as Exhibit FL-32 and which shows that CRP participants achieved cumulative savings relative to the applicable PTC in each FE service territory during the period analyzed by FE. In aggregate, participating customers saved more than $750,000 compared to what they would have paid under default service during the period covered by the response. The financial benefit for these participating customers was in addition to other product attributes that may have been valued by participating customers, including longer-term price guaranty, no true-ups, no risk of component (like NITS or Capacity) price changes, and an unencumbered option to leave the contract at any time at no cost to the customer.

[42] FE PA St. No. 4-R (De La Rosa) at 8-10.

Q. WHAT SIGNIFICANCE DO YOU ATTRIBUTE TO THAT INFORMATION?

A. The response demonstrates that customers who participated in the program realized measurable economic benefits. Accordingly, while the rebuttal testimony focuses on declining supplier participation and enrollment levels, it does not explain why a program that produced measurable savings for participating customers should be eliminated rather than improved. Moreover, participation in the CRP is voluntary. Customers who choose not to participate are unaffected, and participating customers are guaranteed to pay less for electricity for a period of time and remain free to leave the program at any time at no cost. Accordingly, the record does not demonstrate that maintaining the program imposes any meaningful customer harm.

Q. WHAT CONCLUSION SHOULD THE COMMISSION DRAW?

A. The rebuttal testimony identifies reasons why participation may have declined. However, neither FE nor the supporting witnesses quantify any customer benefit from eliminating the CRP. By contrast, FE's own discovery response demonstrates that participating customers realized measurable and quantifiable savings. In my view, the Commission should be reluctant to eliminate a voluntary program that provided documented customer savings absent evidence demonstrating that canceling the program will benefit customers. For the reasons discussed in my Direct Testimony on pages 58-61 and my Rebuttal Testimony on pages 22-24, I continue to believe that the record supports improving the program rather than eliminating it.

E. <u>Risk Allocation and Full Requirements Service</u>

Q. DID THE REBUTTAL TESTIMONY ALTER YOUR VIEWS REGARDING FE'S PROPOSED TREATMENT OF NITS CHARGES AND RELATED RISK-ALLOCATION ISSUES?

A. No.

Q. WHAT REBUTTAL TESTIMONY DID YOU REVIEW?

A. I reviewed the rebuttal testimony of FE witnesses Ryan Rose, Nicolas Powers, and Margarita Patria, as well as the rebuttal testimony of OCA Witness Dr. Ogur. The rebuttal testimony does not resolve the concerns I identified in my Direct Testimony on pages 37-48, and my Rebuttal Testimony on pages 25-31 concerning risk allocation, full requirements service, and the transfer of market risks from wholesale suppliers to customers.

Q. WHAT CONCERNS REMAIN?

A. My primary concern remains that FE characterizes the transfer of risk from wholesale default service suppliers to customers as a customer benefit.[43] Mr. Rose repeatedly asserts that removing NITS from wholesale default service supplier responsibility benefits customers because it eliminates supplier risk premiums that would otherwise be incorporated into supplier bids. However, eliminating a supplier risk premium does not eliminate the underlying risk. It merely changes who bears that risk. Under FE's proposal, customers would directly bear future NITS cost changes rather than having those risks reflected in fixed-price bids submitted by wholesale default service suppliers.

Q. HOW IS THIS DIFFERENT FROM THE OPERATION OF COMPETITIVE MARKETS?

A. In competitive markets, suppliers are compensated for assuming risks that customers either cannot efficiently manage themselves or would prefer to have managed by others. Market participants, including both wholesale default service suppliers and EGSs, make

[43] RESA St. No. 1 (Lacey) at 37-48; RESA St. No. 1R (Lacey) at 25-32.

procurement, hedging, and risk-management decisions and incorporate those risks into the prices they offer. Customers then decide whether they wish to accept those offers.

Q. HOW DO FE'S PROPOSALS ALTER THIS STATUS QUO?

A. FE's proposal moves in the opposite direction by transferring market risk from wholesale default service suppliers to customers. Under FE's proposal, customers no longer receive the benefit of the wholesale supplier's risk assessment. Instead, customers bear the risks that they are ill-equipped to manage. At the same time, FE characterizes that transfer as a customer benefit without demonstrating that customers prefer that outcome or that customers are better positioned than wholesale suppliers to manage those risks.

Q. SO WHAT IS YOUR CONCERN?

A. My concern is not whether risk exists. It does. My concern is who bears that risk and whether the record demonstrates that customers are better served when that risk is shifted from sophisticated market participants to retail customers.

Q. DO YOU AGREE THAT REMOVING SUPPLIER RESPONSIBILITY FOR NITS NECESSARILY BENEFITS CUSTOMERS?

A. No. Mr. Rose acknowledges that the underlying risk still exists.[44] The difference is who bears the risk. Under FE's proposal, customers bear the risk directly rather than having it incorporated into a fixed-price product offered by a wholesale default service supplier. FE's position assumes that wholesale suppliers will overestimate future NITS costs and include excessive risk premiums in their bids. However, the rebuttal testimony does not evaluate the possibility that wholesale suppliers may accurately manage those risks or that customers may value the price certainty associated with having those risks borne by

[44] FE PA St. No. 2-R (Rose) at 12.

wholesale suppliers rather than directly by customers. For that reason, I do not believe the record demonstrates that transferring NITS risk to customers necessarily benefits customers.

Q. WHAT IS YOUR RESPONSE TO MR. POWERS' DISCUSSION OF FULL REQUIREMENTS SERVICE?

A. I agree with a significant portion of Mr. Powers' testimony. Mr. Powers correctly states that full requirements service refers to a supplier's obligation to serve customer load on an as-needed basis and manage the associated market risks.[45] However, that definition highlights my concern rather than resolving it. My concern is that FE's proposal changes the allocation of risks associated with the default service product. Mr. Powers continues his discussion of this issue by saying that the full requirements obligation does not depend on whether specific cost components, such as transmission charges, are included in the supplier's price or recovered through a separate mechanism.[46] This is where Mr. Powers' discussion diverges from what is required under the procurement standards of Act 129. I do not disagree that FE is providing full requirements service to default service customers. It is the methodology by which they are proposing to piecemeal the service together that is non-compliant and simultaneously creates risk that FE proposes to pass through to customers. Wholesale contracts for power that are exclusive of NITS will not provide FE with service that is adequate and reliable (hence their need to add NITS independently) as required by Act 129. Whether the risks passed through are described as NITS risk, transmission risk, or some other market risk, FE's proposal removes

[45] FE PA St. No. 3-R (Powers) at 3-4.

[46] FE PA St. No. 3-R (Powers) at 3-4.

responsibility for those risks from wholesale default service suppliers and places greater responsibility and price volatility on customers. That issue remains regardless of the terminology used to describe the procurement product.

Q. DID THE REBUTTAL TESTIMONY DEMONSTRATE THAT CUSTOMERS BENEFIT WHEN THOSE RISKS ARE TRANSFERRED FROM SUPPLIERS TO CUSTOMERS?

A. No. Mr. Rose and Dr. Ogur both discuss supplier risk premiums and supplier costs.[47] However, neither witness evaluates whether customers prefer a product with greater price certainty and supplier risk assumption, or a product in which those risks are passed directly through to customers. That issue remains unaddressed

Q. WHAT CONCLUSION SHOULD THE COMMISSION DRAW?

A. The rebuttal testimony demonstrates that FE expects removing NITS from supplier responsibility to reduce supplier risk premiums. However, it does not demonstrate that transferring those risks to customers is beneficial to customers or consistent with the risk-allocation principles that historically characterized fixed-price default service products. For the reasons discussed in my Direct Testimony on pages 37-48, and my Rebuttal Testimony on pages 25-31, I continue to believe that FE's proposal moves market risks away from wholesale suppliers and back to customers without demonstrating that customers are better served by that change in risk allocation. Accordingly, I continue to oppose FE's proposed treatment of NITS charges and related risk-allocation mechanisms.

[47] FE PA St. No. 2-R (Rose) at 9-12; OCA St. No. 1-R (Ogur) at 9-13.

III. SUMMARY AND CONCLUSIONS

Q. CAN YOU SUMMARIZE YOUR TESTIMONY?

A. Yes. My surrebuttal testimony addresses a common theme running through the rebuttal testimony of FE, OCA, and CAUSE-PA. The supporting witnesses identify concerns with the competitive market, but they do not provide the analysis necessary to justify the significant market restrictions and default service changes being proposed. More specifically:

- Historical PTC comparisons do not establish that customers received no value from competitive supply products.
- The affirmative consent proposal would automatically return customers to default service without adequate analysis of market participation effects.
- The POR proposal would condition access to a long-standing Commission-approved program on supplier pricing (which neither FE nor the Commission regulate) without demonstrating that this remedy is necessary or appropriately tailored.
- FE proposes to eliminate the CRP even though FE's own discovery response shows that participating customers achieved measurable savings.
- Finally, FE's proposed treatment of NITS and related risk-allocation issues would shift risks from wholesale default service suppliers to customers while characterizing that transfer as a customer benefit.

Taken together, these proposals would reduce competitive alternatives for residential customers, make it harder for EGSs to offer competitive products, eliminate a voluntary program that provided documented customer savings, and shift additional market risks from wholesale default service suppliers to customers. Yet, neither FE nor the other parties supporting these proposals performed the analyses necessary to demonstrate that these outcomes will improve customer welfare or produce net benefits for Pennsylvania consumers.

For these reasons, I continue to recommend that the Commission reject FE's proposed retail market restrictions, reject the proposed POR limitations, preserve and improve the

CRP, and decline to approve default service changes that shift additional market risk from wholesale suppliers to customers without a sufficient showing that customers benefit from that change.

Q. DOES THAT COMPLETE YOUR SURREBUTTAL TESTIMONY?

A. Yes; however, I do reserve the right to supplement this testimony as may be appropriate.

VERIFICATION

I, Frank P. Lacey, hereby state that: (1) I am the founding principal of Electric Advisors Consulting, LLC; (2) the facts set forth in my surrebuttal testimony is true and correct (or are true and correct to the best of my knowledge, information and belief); and, (3) I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

FE Response to CAUSE-PA Set 1, No. 6, Attachment A and B

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	**:**	**Docket No. P-2026-3060298**

CAUSE-PA Set 1, No. 006

From January 2022 to date, disaggregated by year and division (MetEd, Penelec, Penn Power, and West Penn Power) for each of the following residential customer subgroups, please provide the dollar amount of residential write-offs and the number of associated accounts:

a. All residential customers.
b. Residential shopping customers.
c. Residential default service customers.
d. All confirmed low income customers.
e. Confirmed low income shopping customers.
f. Confirmed low income default service customers.
g. All confirmed low income customers not enrolled in CAP.
h. Confirmed low income shopping customers not enrolled in CAP.
i. Confirmed low income default service customers not enrolled in CAP.
j. All CAP participants.
k. Shopping CAP participants.
l. Default service CAP participants.

RESPONSE:

See FE PA Response to CAUSE-PA Interrogatory Set 1, No. 6, Attachment A for the number of accounts.

See FE PA Response to CAUSE-PA Interrogatory Set 1, No. 6, Attachment B for the dollar amounts of residential write-offs.

Electric Company for Approval of a	**:**	**Docket No. P-2026-3060298**
Default Service Plan for the Period	**:**	
June 1, 2027 to May 31, 2031	**:**	

EGS Set 1, No. 5

Reference FE PA St. 4, 3:18-4:4. Explain how fluctuations in the PTC harm customers?

RESPONSE:

Fluctuations in the PTC could harm customers through price volatility and creating customer confusion. Generation charges represent a significant portion of a customer's bill and changes at the start of summer and winter coupled with higher usage tend to make it difficult to budget and may lead to financial stress to customers, especially those on fixed incomes.

RESA EXHIBIT FL-31

RESA Response to OCA
Set 13, No. 10

Petition of FirstEnergy Pennsylvania Electric Company for Approval of Its Default Service Program for the Period June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298
Interrogatories of the Office of Consumer Advocate
Set XIII to RESA

10. Mr. Lacy states that Ms. Alexander did not analyze "product equivalency, hedging value, risk allocation, or whether default service rates themselves would have differed absent customer migration to competitive supply service." (Page 8, lines 18-20). Please identify all facts, data, assumptions, methodologies, and evidence that Mr. Lacey believes would be necessary to perform such an analysis.

Response to OCA-XIII-10: A proper analysis would be very time-consuming and quite difficult to perform because of the data intensity of the analysis. However, it is required to justify the proposed changes that today are being supported by an inadequate and simplistic "A – B" calculation. For product equivalency, Ms. Alexander would need to analyze each of the EGS products that were under contract during the timeframe of the analysis and determine what product attributes were included in the products under contract. Then Ms. Alexander would need to prepare a summary, by month of the analysis, of differences in product attributes compared to the product attributes of the then current default service product. Ms. Alexander would then need to calculate, based on some reliable metric, the value of the product differences for each general product, for each month of the analysis. For hedging value, Ms. Alexander would need to conduct a similar analysis. For example, she would need to estimate a cost difference between a six month or shorter hedge versus a six month or longer hedge. She would need to do that calculation for every contract that was a fixed price product for every month of the analysis and adjust those values every month to adjust for the decreasing value of the default service fixed price hedge. For risk allocation, Ms. Alexander would need to determine the value of each component of risk passed along to consumers. It is FE's contention that eliminating NITS will lower prices to consumers because of the hedge risk moving from wholesale suppliers to consumers. At a minimum, her analysis would need to be adjusted to accommodate the value of that risk transfer, which is not allowed for EGS fixed price contracts. This analysis would need to be performed for every element that is passed through default service customers if those elements are hedged in an EGS contract. For migration risk, Ms. Alexander would need to calculate whether or not FE's proposals will result in a change in migration risk to wholesale suppliers. Most certainly, they would, as many of the proposals presented by FE will have customers being slammed back to the utility for practices that FE deems unsatisfactory, like failing to respond to communication from the EGS. Ms. Alexander would need to ascertain from the wholesale market, either through empirical data from other markets or from direct conversations with wholesale suppliers about how these proposals would affect their bidding strategies. She would need to incorporate those values into her analysis. Ms. Alexander would also need to adjust the default service rate to account for the subsidies embedded in distribution rates that support the default service business. The purpose of identifying these analytical requirements was not to suggest that such a study is necessary in every proceeding. Rather, it was to demonstrate that OCA's conclusions are being used to justify significant market restrictions even though OCA did not perform the analyses necessary to support those conclusions.

Petition of FirstEnergy Pennsylvania Electric Company for Approval of Its Default Service Program for the Period June 1, 2027 to May 31, 2031
Docket No. P-2026-3060298
Interrogatories of the Office of Consumer Advocate

Town Square Energy East, LLC Statement No. 1

Direct Testimony

Witness: Randal Miller

I. INTRODUCTION

Q. Please state your full name and business address.

A. My name is Randal Miller, and my business address is 2200 East Williams Field Rd., Suite 200, Gilbert, AZ 85295.

Q. By whom are you employed and in what capacity?

A. I am employed as the Vice President of Business Development for Town Square Energy East, LLC ("Town Square").

Q. What are your qualifications, work experience and educational background?

A. I graduated from the University of Alberta with a Bachelors degree in Commerce, with distinction. From 1999-2002, I worked as a policy analyst and manager of electricity customer issues for the Department of Energy of the Province of Alberta, where my responsibilities included issues related to electricity deregulation. I then worked as an energy trader and analyst in Calgary, Alberta, Canada from 2005 to 2012, first for Transalta and then for Twin Cities Power. I have been employed by Town Square in various roles since that time.

Q. Please describe your current responsibilities.

A. In my current role I am responsible for business development for Town Square. I manage the company's online and digital sales and marketing, and I develop online marketing and product strategies for the company across the markets where it operates.

Q. Have you previously testified before the Pennsylvania Public Utility Commission ("Commission") or other regulatory bodies?

A. No.

Q. What is the purpose of your testimony?

A. The testimony will explain my concerns with the aspects of FirstEnergy Pennsylvania's ("FirstEnergy") Default Service Plan that would limit its Purchase of Receivables ("POR") program, modify customer contract renewal procedures, and require additional notices that are not required by the Public Utility Code or the Commission's regulations.

Q. **Are you sponsoring any exhibits?**

A. Yes. I am sponsoring the following exhibits:

Exhibit RM-1:	FirstEnergy response to RESA Set I, No. 9
Exhibit RM-2:	FirstEnergy response to RESA Set I, No. 6
Exhibit RM-3:	PaPowerSwitch results for April 8, 2026
Exhibit RM-4:	FirstEnergy Residential PTC filing (April 17, 2026)
Exhibit RM -5:	FirstEnergy response to RESA Set I, No. 7
Exhibit RM-6 :	FirstEnergy response to RESA Set I, No. 11
Exhibit RM-7:	FirstEnergy response to RESA Set I, No. 10
Exhibit RM-8:	FirstEnergy response to CAUSE-PA Set I, No. 27
Exhibit RM-9:	FirstEnergy Response to CAUSE-PA Set I, No. 13
Exhibit RM-10:	FirstEnergy Response to OCA Set I No. 16

Exhibit RM-11: FirstEnergy response to RESA Set I, No. 14

Exhibit RM-12: FirstEnergy Response to RESA Set I, No. 1

Q. **Please summarize your testimony regarding FirstEnergy's proposals.**

A. First, I will explain why FirstEnergy's proposal to modify its POR program is not justified, is a bad policy that will undermine the competitive electricity supply market for residential customers in FirstEnergy territory, and contradicts the Pennsylvania Public Utility Commission's established policies for enhancing retail electricity choice. I will next explain why FirstEnergy's proposals to impose its own unique restrictions on residential customer contract renewals are not appropriate. My testimony will also explain why FirstEnergy's sole rationale for its proposals -affordability concerns – does not withstand scrutiny and does not provide a valid justification for its proposals.

II. OVERVIEW OF CURRENT PENNSYLVANIA MARKET

Q. **Please summarize Town Square's operations in Pennsylvania.**

A. Town Square Energy East, LLC is a retail electricity supplier that, together with its affiliate, Town Square Energy, LLC services customers in nine states and twenty-nine utility service territories. We currently offer electricity supply service in Connecticut, Massachusetts, New Hampshire, Pennsylvania, Ohio, New Jersey, Maine, and Rhode Island. Town Square has been licensed as an electric generation supplier in Pennsylvania since 2011, with authority to serve all customer classes. Town Square's license was issued on March 17, 2011 in Docket No. A-2010-2199551. The license was issued under Town Square's prior name ("Discount Energy Group, LLC"). By Secretarial Letter issued on July 21, 2015, the Commission

approved the change of the company's name to Town Square Energy East, LLC and issued a new license reflecting the changed name. Town Square began serving customers in Pennsylvania in 2011 and has been continuously serving customers ever since then. We primarily serve residential customers, and we actively serve customers in the FirstEnergy Pennsylvania service territories.

Q. How does Town Square bill for its supply services in Pennsylvania?

A. In all Pennsylvania service territories, we utilize utility consolidated billing, and participate in the utilities' POR programs. In all of the service territories where it is available, we use bill ready billing, rather than rate ready billing. Under bill ready billing, the supplier has much more flexibility to reflect its charges on the utility's bill, and it opens the door for different product offerings. Under rate ready billing, suppliers are more restricted, because they are only given the capability to report a rate to the utility, and the utility will then calculate the supplier's charges and place them on the bill. Bill-ready billing is usually preferred from a supplier's perspective.

Q. Can you briefly describe Pennsylvania's retail electric choice framework?

A. Pennsylvania has maintained a successful retail electric choice market since the Commission's implementation of comprehensive reforms beginning in 2011. Pennsylvania's framework has resulted in a competitive marketplace where there are a large number of suppliers offering fixed, variable, flat rate, renewable, and other value-added products to meet a variety of customer preferences, while maintaining strong

customer protections and strictly regulating retail supplier sales and marketing activities**.** Some components of the model that make it effective include:

- In every large electric service territory in Pennsylvania suppliers are able to utilize Utility Consolidated Billing with POR for the residential market.
- Pennsylvania implemented a mandatory 3-day switching process for electricity supply, which was a first-of-its-kind improvement that has proven to be successful.
- Pennsylvania required utilities to create portals to allow enrollments at public events, which is another first-of-its-kind initiative as far as I am aware.
- Pennsylvania has enacted very clear, detailed, thorough and balanced sales and marketing regulations for the residential electricity supply market, which are in Section 111 of the Commission's regulations. These provisions were enacted through a formal rulemaking process in which a number of stakeholders participated and submitted proposals for the Commission's consideration.
- Pennsylvania enacted a variety of consumer protections to enhance the retail market experience for customers, including a standard contract summary form, a requirement to provide two notices for contract renewals, and limitations on product offerings following autorenewals, including eliminations of early termination fees and requirements to notify customers prior to price changes.

Q. Do the Pennsylvania Public Utility Commission or individual utilities regulate the prices that retail suppliers charge their customers?

A. No, to my knowledge neither the Commission nor individual utilities are permitted to regulate retail suppliers' prices. Consumer preferences and the competitive marketplace are the forces that establish suppliers' prices and product offerings.

Q. Are POR programs important to retail supplier's operations?

A. Yes, very much so. POR has been a key element of retail electric choice markets throughout the country, and it is crucial to maximizing retail competition. Suppliers in Pennsylvania, like in most states with retail energy choice, utilize utility consolidated billing for their electric supplier charges, so customers do not receive a separate bill from their suppliers. POR was developed as a mechanism to ensure that suppliers received payment for the supply that they provided to customers and that was billed by utilities. POR has become the standard framework in most markets in the country that utilize utility consolidated billing.

Q. Do utilities in other jurisdictions with retail electricity choice offer POR for residential customers?

A. Yes. In addition to Pennsylvania, utilities in the following jurisdictions have POR Programs: New York, Connecticut, Massachusetts, New Jersey, Ohio, Delaware, District of Columbia, Illinois, Rhode Island, and New Hampshire. The use of POR is a key element of nearly every jurisdiction which allows residential electricity supply choice.

Q. Does POR provide customer benefits?

A. Yes, it does for the following reasons. Requiring suppliers to evaluate individual customer credit risk would provide a significant barrier to a vibrant retail choice market. Under both the utility consolidated billing model and the dual billing model, suppliers have no ability to terminate service or any other mechanism to enforce the collection of their electricity supply charges, other than to pursue collection of unpaid bills after the fact. Because of this, if there was no POR, prudent suppliers would need to evaluate customer creditworthiness when extending offers to them. For customers with a higher credit risk, there is a higher risk of nonpayment of bills, and as a result, customers with a higher credit risk might not be offered the best rates for energy supply. This is a concept that applies to many industries, and is not unique to retail energy. For instance, cell phone companies, auto loan lenders, insurance providers, and other industries sometimes charge higher rates to customers with higher payment risk. POR was implemented in part to remove the credit and payment risk from the equation. With POR, suppliers do not need to screen customers for payment risk, and are therefore able to offer the best rate products to all of their customers equally. This is a very important point to understand. POR provides access to better rates to more customers, regardless of their income or credit status.

III. FIRSTENERGY'S PROPOSED POR RESTRICTIONS ARE UNPRECEDENTED IN PENNSYLVANIA AND THREATEN TO REDUCE RETAIL COMPETITION IN ITS TERRITORY

Q. What is your understanding of FirstEnergy's proposal regarding its POR Program?

A. According to the testimony of First Energy Witness David Young, FirstEnergy is proposing to require "rate-ready" billing if suppliers want to use FirstEnergy's utility consolidated billing, and is proposing to eliminate the eligibility for suppliers to participate in FirstEnergy's POR program except for a limited category of products that FirstEnergy has chosen. Specifically, FirstEnergy would only allow POR for supplier products that are at or below the FirstEnergy price to compare ("PTC") at the time of the customer's enrollment, or at the time of a pricing change. [1]

Q. Is this type of price-based POR eligibility restriction consistent with the current market structure in Pennsylvania?

A. No. Existing Pennsylvania POR programs have historically been available to any eligible EGS using utility consolidated billing, and are not conditioned in any way on a supplier's price relative to the PTC at the moment of enrollment or a rate change. FirstEnergy's proposal would be a dramatic departure from that framework by empowering the utility to determine, on an account-by-account basis, which competitive retail products will be able to utilize POR and which will not.

[1] First Energy Statement No. 1, at p. 21.

Q. Why would limiting POR eligibility to at-or-below-PTC pricing harm retail competition?

A. POR is a critical element of the retail electricity market structure in Pennsylvania and other utility-consolidated billing jurisdictions because it removes supplier credit and collections risk from the competitive marketplace. With POR, suppliers compete on price and product innovation, not on their ability to finance bad debt and manage collections. If suppliers must bear full credit risk for competitive products that can be above the PTC at the time of enrollment depending on market conditions, many suppliers will rationally reduce offerings or exit the market. This will reduce customer choice and eliminate options that protect customers from future PTC increases and/or provide other benefits that some customers may value.

Q. If this proposal is approved, what would its impact be on suppliers operating in FirstEnergy territory?

A. FirstEnergy's POR proposal would make it more difficult to offer residential supply products in FirstEnergy territory, for a number of reasons. First, as I explained previously, if POR was not available for certain types of products, suppliers would need to price-in credit and payment risk when making offers for such products to residential customers. I think it is safe to say that if FirstEnergy's POR proposal was enacted, it will significantly reduce the number and variety of customer offers. To illustrate how critical POR is to serving residential customer, one needs to look no further than FirstEnergy's own data responses which indicate that there are currently no EGSs that are offering products to

residential customers without POR, even though all EGSs have option to do so.[4] More precisely, according to FirstEnergy's data responses, there are currently 70 EGSs serving residential customers in the Met-Ed rate district, 71 serving residential customers in the Penelec rate district, 54 serving residential customers in the Penn Power rate district, and 67 serving residential customers in the West Penn Power rate district, *and not a single one has chosen to serve residential customers without POR.* If FirstEnergy's proposal is approved, a supplier would need to modify its product offers to quality for the narrow restrictions that FirstEnergy has unilaterally selected in order to serve residential customers. A supplier could only offer a product using rate- ready billing, and would need to ensure that its product offer is below the PTC, which changes every six months with little predictability. This proposal would eliminate a variety of offers from POR qualification including:

- An offer for a flat monthly bill for electric supply regardless of usage. That type of offer is only available using bill ready billing. Therefore, it would not be available under FirstEnergy's proposal.
- An offer that includes value-added elements, such as renewable energy, rewards dollars, or energy efficiency devices or services would not be eligible for POR if the price for such offers is even only slightly higher than the PTC.
- An offer for a long-term fixed rate that is higher than the current PTC. Depending on market conditions, suppliers can offer value and certainty

[4] See FirstEnergy response to RESA Set 1, No. 9 (Exhibit RM-1)

to customers by offering fixed price contracts that lock in a price for the customer, which can be beneficial in times of rising prices.

FirstEnergy's PTC has consistently risen over the years, as shown by FirstEnergy's response to RESA Interrogatory I-6 (attached hereto as Exhibit RM-2), and has more than doubled since March of 2021 in three of the four FirstEnergy rate districts. So, while a supplier's rate might be higher than the PTC at the time of enrollment, if the PTC rises, the supplier's fixed rate could be lower than the PTC later in the contract term. However, under FirstEnergy's proposal, such an offer would not be eligible for POR because it is higher than the current PTC and therefore suppliers likely would not offer it.

The result of FirstEnergy's proposal would be to significantly limit the variety of offers that are available to residential customers in its territory, and could completely exclude certain offers that would save customers money. For instance, as of April 8, 2026, there were 66 different supplier fixed- rate offers of 12 months or longer in MedEd territory according to PaPowerSwitch, but only a few were lower than Met-Ed's current price to compare as of that date. In Penelec territory there were 73 fixed rate offers of 12 months or longer, but only 1 was lower than the Price to Compare.[5] However, a significant number of those offers are for prices that are less than FirstEnergy's PTC that will come into effect on June 1, 2026. Under FirstEnergy's proposal, none of those offers that were above the current PTC would be eligible for POR and therefore likely would not be offered by suppliers. This would cause many customers to lose the option to choose products that provided price certainty for 12 or more months just because they were at a slightly higher

[5] See Exhibit No. RM-3(PaPowerSwitch results for April 8, 2026).

price than the PTC at one point in time, but may well be below the PTC if the PTC rises. Notably, FirstEnergy's residential PTCs have risen steadily for the past 5 years, and are going to rise again in June, 2026 according to FirstEnergy's recent PTC filing.[6] If offers are arbitrarily excluded from POR just because there are slightly higher than current PTC at a certain point in time, it will reduce the number of supplier offers that could save customers money if and when the PTC rises. This is bad policy and will hurt customers. Customers should have more options, not less, in times of rising prices. This does not even take into account other aspects of the suppliers' offers that customers may want, such as renewable energy content, energy efficiency benefits, rebates, and rewards dollars.

It also must be understood that these restrictions would require suppliers to operate differently in FirstEnergy territory than in another other utility territory in Pennsylvania, because FirstEnergy territory would be the only one where these restrictions apply. Like many suppliers, my company operates throughout Pennsylvania, and FirstEnergy is the only utility that has ever proposed a limitation on POR like this as far as I am aware. If FirstEnergy's POR proposal ever goes into effect, suppliers would have to significantly modify product offerings and billing systems just to make a very limited class of offers in FirstEnergy territory. For instance, it is possible that some customers would flip back and forth between POR and non-POR billing as prices and the PTC change, which will cause customer confusion and administrative difficulties. These factors could cause suppliers to incur extra costs to do business in FirstEnergy territory, which could be reflected in price offerings to customers in the territory.

[6] See Exhibit No. RM- 4 (First Energy PTC filing April 17, 2026)

Q. Does it make a difference that FirstEnergy is not proposing to eliminate POR, but rather just limit the types of products that are eligible for POR?

A. No, it does not make a difference. Allowing a utility to pick and choose what types of competitive retail supply products will be viable in its territory is completely antithetical to retail energy choice. The utility is a monopoly, and under the retail choice framework it should not be able impose its own limits on the types of product offerings that will be permitted in its territory. If a product is permitted by the Electricity Choice and Competition Act and the Commission's regulations, then a utility should not be permitted to unilaterally decide that some products will be supported by POR, but that other products that are equally lawful will not be supported by POR. This undermines the very essence of retail electricity choice and gives an improper amount of power to the monopoly utility.

Q. How does FirstEnergy justify its POR proposal?

A. FirstEnergy's sole justification for its POR proposal is a generalized "affordability" concern, based on the observation that some residential shopping customers pay rates for electricity supply that are above the PTC at some points in time. FirstEnergy suggests – with very little evidence or analysis - that above-PTC pricing is contributing to increased POR-related uncollectible expense and therefore, FirstEnergy proposes to reduce exposure to "EGS-driven write-offs" by prohibiting POR for above-PTC offers.

Q. FirstEnergy says that its POR proposal is necessary because of affordability concerns, and concerns that customers are paying prices that are higher than the Price to Compare. How do you respond?

A. First of all, the underlying assumption that the PTC is the benchmark against which all offers should be judged, and that any price higher than the PTC is inherently bad completely ignores the role of default service in the competitive energy market framework. Default service is meant to be a backstop offering, that includes no value additions, no price certainty, and no consideration of customer preferences. By contrast, retail supplier offers are meant to provide choice to customers, each of whom has different priorities and circumstances. The market has developed in Pennsylvania so that there is a variety of offers to meet customers' preferences. As a result of the retail market rules that the Commission has developed, including rules around POR, sales and marketing, disclosure statement requirements, contract summary requirements, renewal notice requirements, and many more, a vibrant market has evolved in Pennsylvania. This market gives customers a wide variety of product offerings that differ from backstop default service that changes every six months. The product offerings have included, but are not limited to long term fixed rate contracts, 100% renewable energy products, cash back and rewards offers, energy efficiency device offers, and flat bill products. FirstEnergy did not take any of these other aspects of retail supply offerings into account when doing its analysis. FirstEnergy's witness admitted that in doing his analysis, he did not evaluate any other aspect of retail suppliers' offers, other than a snapshot point-in-time price comparisons.[7] FirstEnergy treats point-in-time PTC price comparison as the only relevant affordability

[7] See Exhibit RM -5 (FirstEnergy response to RESA Set I, No. 7)

benchmark, which misstates the purpose of default service in a competitive market. In competitive markets such as Pennsylvania, default service is meant to be a backstop product, not a measure of whether a competitive offer provides value when customers seek product attributes such as price certainty, renewable content, or bundled benefits.

Secondly, FirstEnergy's "affordability" justification is unsupported by any evidence and in some cases undermined by its own data. FirstEnergy attempts to justify its POR changes by pointing to supposedly high levels of uncollectible accounts served by suppliers. FirstEnergy says that ending POR for EGSs that charge prices higher than the PTC would substantially reduce its customers' exposure to "unreasonable EGS-driven uncollectible expenses" (FirstEnergy Statement No. 1, at page 28). But when FirstEnergy was asked to provide details about its uncollectible expenses, it admitted that residential and commercial customers also pay for uncollectible expenses from default service as well as from POR uncollectibles.[8] In fact, FirstEnergy's data responses show that accounts served by default service are actually contributing ***more*** to uncollectible expenses than accounts served by suppliers.[9] FirstEnergy's data responses also show that of all accounts with balances over $10,000 in its service territory, ***less than 5%*** of those arrearages are attributable to supplier charges.[10] With the sole justification for FirstEnergy's POR change disproven by its own data, there is literally no legitimate justification for FirstEnergy's unprecedented proposal to be approved.

[8] See FirstEnergy response to RESA Set I, No. 11 (Exhibit RM-6)
[9] See FirstEnergy response to RESA Set I, No. 10 (Exhibit RM-7)
[10] See FirstEnergy response to CAUSE-PA Set I, No. 27 (Exhibit RM-8)

Q. Has FirstEnergy demonstrated that its proposed POR restriction will improve affordability or reduce delinquencies?

A. No, FirstEnergy has not provided any evidence or testimony that establishes a causal link between supplier pricing relative to the PTC and customer unaffordability or delinquencies, or how its proposal would somehow improve affordability or reduce delinquencies. FirstEnergy admitted in its discovery responses that it has not done any analysis of arrearage levels, write offs, collection rates, or termination rates for shopping versus non shopping customers.[11] FirstEnergy also admitted that it has not tracked the number of payment arrangements, disconnection notices, disconnections, or bad debt for default customers vs. shopping customers.[12] Furthermore, FirstEnergy's testimony does not quantify how much of the Company's POR-related uncollectibles are actually attributable to EGS pricing as opposed to broader economic conditions affecting all customers. Simply put, FirstEnergy has not provided any data whatsoever which demonstrates that the current POR framework is contributing to unaffordability, much less demonstrates that its proposal will in some way help affordability. But, as I have stated above, it is likely that if FirstEnergy's POR proposal is approved, many types of retail supplier offers may well disappear from FirstEnergy's territory, to the detriment of customers.

[11] FirstEnergy Response to CAUSE-PA Set I, No. 13 (Exhibit RM-9)
[12] FirstEnergy Response to OCA Set I No. 16 (Exhibit RM-10)

IV. FIRSTENERGY'S PROPOSED "AFFIRMATIVE CONSENT" RENEWAL REQUIREMENT IS UNNECESSARY AND CONTRARY TO PENNSYLVANIA'S EXISTING REGULATORY FRAMEWORK.

Q. Please summarize FirstEnergy's proposed contract renewal changes.

A. For new residential contracts entered into after June 1, 2027, FirstEnergy proposes to return customers to default service at the conclusion of their fixed-duration EGS contracts unless the customer makes an "affirmative choice" to remain with the EGS in response to the notices required by 52 Pa. Code § 54.10. For month-to-month variable rate products, FirstEnergy proposes to require quarterly attestations of affirmative customer consent; if an EGS cannot attest to affirmative consent via EDI each quarter, the customer would be returned to default service.

Q. Do Pennsylvania's existing Commission regulations already provide protections for customers at contract expiration or renewal?

A. Yes. Section 54.10 of the Commission's regulations requires an initial notice 45–60 days before contract expiration and an options notice at least 30 days before expiration. The options notice must describe the customer's choices, including selecting another EGS or returning to default service, and the regulations protect customers by requiring clear disclosures and eliminating cancellation fees if the customer terminates after receiving the options notice. For contracts that convert from a fixed rate to a variable rate upon renewal, the rules also require suppliers to provide advance notice of price changes to customers at least 30 days before the price change takes effect. These rules were adopted through a Commission rulemaking and have been in place statewide for years.

Q. Has FirstEnergy identified a deficiency in the existing Section 54.10 renewal framework that warrants a territory-specific waiver?

A. No. FirstEnergy's testimony does not demonstrate that the existing two-notice framework is failing to inform customers or protect them from unfair renewals. Nor does FirstEnergy provide evidence that forcing customers back to default service absent affirmative consent would improve affordability. Instead, the proposal would increase customer churn, impose new operational burdens on suppliers and utilities, and risk harming customers who intentionally selected competitive products (including renewable offerings or longer-term fixed rates) but decline to respond to a notice for their own reasons.

Q. Do you have concerns with FirstEnergy's proposal to require customers to provide affirmative consent to remain with their supplier at the end of a fixed duration contract?

A. Yes. I have several concerns with the proposal. My first concern is that the rule differs considerably from the very clear and effective customer contract renewal rules that were established by the Commission through a formal rulemaking process in which numerous stakeholders actively participated. Under the existing Commission regulations automatic customer contract renewals are clearly permitted and are a common practice throughout the state. The Commission established specific notice requirements for automatic contract renewals over a decade ago. These requirements include multiple notices delivered through multiple channels before contracts can be renewed, a prohibition on early termination fees for renewed contracts, and a requirement for prior notification before any

price changes for renewed contracts. These regulations provide strong customer protections, and FirstEnergy has provided no evidence whatsoever to suggest that the existing contract renewal rules are not working. FirstEnergy is proposing to void these rules in its territory, and require a new affirmative consent from customers at the end of their fixed term in order to stay with the retail supplier. It is troubling to me that a utility would attempt to undo formal Commission regulations that have been in place statewide for over a decade and jam through its own unilaterally crafted rules in the context of a fast-tracked default service case. The existing renewal framework in Section 54.10 is a carefully balanced approach that provides customers with multiple advance notices and clear options while preserving market stability. Allowing a single Electric Distribution Company to obtain a waiver that would effectively create a different renewal regime within one utility territory would undermine statewide uniformity, create customer confusion, impose unnecessary operational complexity on suppliers, and invite additional utility-by-utility deviations that would fragment Pennsylvania's retail market rules. Allowing different utilities to set their own contract renewal rules is antithetical to a viable competitive retail energy market. Simply put, FirstEnergy's proposal to alter the Commission's established contract renewal rules has no business being in a default service proceeding.

Substantively, FirstEnergy's proposal amounts to utility slamming. Under FirstEnergy's proposal, if a supplier is unable to confirm a customer's new affirmative consent, FirstEnergy would interpret that as a request to return to default service and effectively "slam" the customer back to the utility default service and make FirstEnergy their new supplier. Rather than interpreting the customer's non-action in response to two

renewal notices as a desire to remain with its current supplier, FirstEnergy interprets non-action as a desire to be moved to utility default service. FirstEnergy provides no justification for this unprecedented proposal, other than some vague "affordability" concerns. FirstEnergy provides no data to support the conclusion that automatic renewals lead to unaffordable supplier charges, or that the existing two-notice requirement for autorenewals provide insufficient notice to customers.

FirstEnergy appears to assume that all autorenewals result in higher prices, but has submitted no evidence to support that assumption. FirstEnergy's proposal fails to consider that the reason a customer may take no action after receiving a renewal offer is that the customer is satisfied with that renewal offer. If FirstEnergy's proposal is implemented and a supplier was not able to get a hold of the customer to obtain new affirmative consent, the customer would be forced away from the supplier and could actually pay a higher rate with FirstEnergy. In discovery, FirstEnergy admitted that it would move a customer to default service *even if the supplier's renewal offer was lower than the PTC.*[13] This admission completely undermines FirstEnergy's supposed concerns about affordability. Another problematic example is a customer that desires to use 100% renewable energy to power his or her home. If that customer's fixed term contract is expiring, and his or her supplier offers to renew their contract under the same terms, and the customer does not respond, FirstEnergy would force the customer onto default service, which is not 100% renewable, without their consent. Both of these scenarios illustrate ways in which FirstEnergy's proposal could harm customers.

[13] FirstEnergy response to RESA Set I, No. 14 (Exhibit RM-11)

Q. Is FirstEnergy's proposal consistent with modern day customer expectations for their services and subscriptions?

A. No. In many common subscription arrangements such as cell phone service, cable television services, satellite radio service, streaming services, data storage plans, and many others, services continue unless the customer opts out, and customer protection is provided through disclosures and advance renewal notices. Pennsylvania's existing Section 54.10 structure aligns with this model by requiring multiple notices and ensuring customers can switch or return to default service without penalty. FirstEnergy's proposal flips this model on its head by interpreting a customer's non-response as a directive to terminate competitive supply service and return the customer to default service, which is not how customers typically experience renewals in other industries.

Forcing suppliers and customers to incur the time, expense, and inconvenience to re-confirm the customer enrollment is unnecessary and unlike renewals in any other industry. Customers are entirely capable of understanding automatic renewals, and they are widespread in the context of streaming services, subscription services, phone contracts, home security plans, satellite radio, and many other aspects of modern life. The Commission's consumer protection rules and notice requirements for automatic renewals are likely more robust than customers have for these other types of autorenewals. The simple fact is that the current autorenewal process for residential electricity supply contracts is codified in a formal regulation, the process is reasonable and effective, and FirstEnergy has provided absolutely no justification for enabling a parallel contract renewal system to exist solely in its territory.

Q. Does FirstEnergy's proposal expressly seek to override existing Commission regulations governing contract renewals?

A. Yes. FirstEnergy witness David Young confirms that, under existing Commission regulations at 52 Pa. Code § 54.10(3), customers who do not respond to the required expiration notices may be automatically renewed with their EGS, without cancellation fees. FirstEnergy requests a waiver of Section 54.10(3) to implement its proposal to return customers to default service at the end of a fixed-duration contract unless the customer takes affirmative action to remain with the EGS, which is an acknowledgement on FirstEnergy's part that its proposal is contrary to the Commission's regulations.

Q. Why is it problematic to request a waiver of statewide consumer protection regulations in this default service plan case?

A. The Commission adopted and has periodically refined its consumer protection rules through formal rulemaking proceedings, based on statutory directives, an extensive record, and stakeholder input. The existing renewal framework in Section 54.10 is a carefully balanced approach that provides customers with multiple, advance notices and clear options while preserving market stability. Allowing a single EDC to obtain a waiver that would effectively create a different renewal regime within one utility territory would undermine statewide uniformity, create customer confusion, impose unnecessary operational complexity on suppliers, and invite additional utility-by-utility deviations that would fragment Pennsylvania's retail market rules with little to no justification.

FirstEnergy admitted that it did not consult with any stakeholders while developing its proposals, and instead just shared a barebones summary of its proposals

mere days before it filed its Default Service Plan case. See FirstEnergy Response to RESA Set I, No. 1 (Exhibit RM-12). This "go it alone" approach is not the way that Pennsylvania's retail market rules have developed. FirstEnergy also admitted that it did almost no analysis in support of its "affordability" justification, and did not consider many of the ramifications of its proposals. There is no historical precedent for allowing a utility to write its own customer contract renewal rules and product restrictions, especially when the utility has provided little to no analysis or evidence to justify its proposals.

V. CONCLUSION

Q. What should the Commission do with respect to FirstEnergy's proposed POR and contract renewal changes?

A. The Commission should reject FirstEnergy's proposed POR eligibility restrictions and its proposed separate contract renewal regime. The best way to keep consumer prices low is to have a vibrant retail energy market that includes POR for all customers, and which incorporates strong customer protections such as notices prior to contract renewals and during rollover periods. Pennsylvania's current system does all of this, and First Energy has not put forth anything close to an adequate justification for opting out of Pennsylvania's existing structure. If the Commission believes that additional statewide consumer protection or market design reforms are warranted, those issues should be addressed through a Commission-led, statewide proceeding in which all stakeholders may actively participate and submit their own proposals, and in which the Commission can consider

uniform rules that preserve the viability of Pennsylvania's retail electricity choice market while continuing to protect customers.

Q. Does this conclude your testimony?

A. Yes, it does. However, I reserve the right to update and/or amend my testimony as this case proceeds.

Exhibit RM-1

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	:	**Docket No. P-2026-3060298**

RESA Set 1, No. 9

Reference FirstEnergy St. No. 1, p. 21, lines 14-15. In the most recent billing period for which data is available, how many EGSs utilized UCB without POR, and how many utilized UCB with POR. In your response, identify the particular customer class served by the EGS.

RESPONSE:

30 electric generation suppliers ("EGSs") utilized Utility Consolidated Billing ("UCB") without purchase of receivables ("POR") and 82 EGSs utilized UCB with POR during the February 2026 billing period. See FE PA RESA Interrogatory Set 1, No. 9, Attachment A, for a breakdown of the count by customer class.

Re: FirstEnergy Pennsylvania Electric Company Tariff Electric Pa. P.U.C. No. 1 – Rate Changes in Compliance with FirstEnergy Pennsylvania Electric Company's Default Service Plan, Docket Nos. P-2021-3030012, P-2021-3030013, P-2021-3030014 and P-2021-3030021

Dear Secretary Homsher:

Transmitted herewith for filing with the Pennsylvania Public Utility Commission ("Commission") is an original copy of Supplement No. 36 to FirstEnergy Pennsylvania Electric Company's ("FE PA" or the "Company") Tariff Electric Pa. P.U.C. No. 1, which bears an issue date of April 17, 2026. The tariff changes contained in Supplement No. 36 are proposed to be effective with service rendered on or after June 1, 2026.

The purpose of Tariff Supplement No. 36 is to reflect default service rate changes for the Residential Customer Class, Commercial Customer Class and Industrial Customer Class served under the Price to Compare Default Service Rate Rider or the Hourly Pricing Default Service Rider. These rate changes are consistent with the Commission's Order entered August 4, 2022, at Docket Nos. P-2021-3030012 for the Met-Ed Rate District; P-2021-3030013 for the Penelec Rate District; P-2021-3030014 for the Penn Power Rate District and P-2021-3030021 for the West Penn Rate District.

As support for the rate changes, the following schedules accompany this tariff filing:

- Schedule 1 provides supporting details for the changes to the Residential Class's default service rates stated in the tariff's Price to Compare Default Service Rate Rider.
- Schedule 2 provides supporting details for the changes to the Commercial Class's default service rates stated in the tariff's Price to Compare Default Service Rate Rider.
- Schedule 3 provides supporting details for the changes to the Industrial Class's default service rates stated in the tariff's Hourly Pricing Default Service Rider.

If you have any questions regarding the enclosed documents, please contact me.

Sincerely,

Joanne M. Savage

Joanne M. Savage

Electric Service Tariff

Effective in

The Territory as Defined on
Page Nos. 6 - 20 of this Tariff

Issued: April 17, 2026

Effective: June 1, 2026

By: Wade Smith, President
Reading, Pennsylvania

NOTICE

Supplement No. 36 makes changes to Price to Compare Default Service Rate Rider and Hourly Pricing Default Service Rider.
See Thirty-Fifth Revised Page No.2

LIST OF MODIFICATIONS

CHANGES:

Price to Compare Default Service Rate Rider – Price to Compare Default Service Rate Rider rates have been changed and increased and decreased. (See Seventh Revised Page 203).

Hourly Pricing Default Service Rider – Hourly Pricing Default Service Rider rates have increased and decreased. (See Third Revised Page 209)

Hourly Pricing Default Service Rider – Hourly Pricing Default Service Rider rates have been changed and increased and decreased. (See Fifth Revised Page 210)

PRICE TO COMPARE DEFAULT SERVICE RATE RIDER

A Price to Compare Default Service Rate ("$PTC_{Default}$") shall be applied to each kWh of Default Service that the Company delivers to Customers under this rider as determined to the nearest one-thousandth of a cent per kWh. The $PTC_{Default}$ rate shall be billed to Customers receiving Default Service from the Company under this rider. The rates shall be calculated according to the provisions of this rider.

For service rendered June 1, 2026 through November 30, 2026 the $PTC_{Default}$ rates billed by Customer Class are as follows: (C)

Met-Ed		
Customer Class	Residential	Commercial
Rate Schedule	RS, GS-V	GS-S, GS-M (PTC), MS, Borderline Service, Street Lighting Service, LED Street Lighting Service, and Outdoor Lighting Service
Charge	$ 0.13951 (I) per kWh	$0.12864 (D) per kWh

Penelec		
Customer Class	Residential	Commercial
Rate Schedule	RS, GS-V	GS-S, GS-M (PTC), H, Borderline Service, Street Lighting Service, LED Street Lighting Service and Outdoor Lighting Service
Charge	$0.13142 (I) per kWh	$0.12920 (I) per kWh

Penn Power		
Customer Class	Residential	Commercial
Rate Schedule	RS, GS-V	GS-S, GS-M (PTC), PNP, PLS, SV, Outdoor Lighting Service and LED
Charge	$0.13477 (I) per kWh	$0.13729 per kWh

West Penn		
Customer Class	Residential	Commercial
Rate Schedule	RS, GS-V	GS-S, GS-M (PTC), 51-58, 71, Outdoor Lighting Service and LED
Charge	$0.12075 (I) per kWh	$0.11779 (I) per kWh

(C) Change
(D) Decrease
(I) Increase

Exhibit RM-5

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	:	**Docket No. P-2026-3060298**

RESA Set 1, No. 7

In preparing his proposed Supplier Tariff and Retail Shopping Changes as outlined on pages 20-28 of FirstEnergy St. No. 1, did Mr. Young examine or evaluate any other aspect of retail suppliers' offers other than a point-in-time price per kWh? If so, please explain what other aspects he evaluated.

RESPONSE:

No. Mr. Young only examined point-in-time electric generation supplier price per kWh.

Exhibit RM-6

Petition of FirstEnergy Pennsylvania	:	
Electric Company for Approval of a	:	**Docket No. P-2026-3060298**
Default Service Plan for the Period	:	
June 1, 2027 to May 31, 2031	:	

RESA Set 1, No. 11

Reference FirstEnergy St. No. 1, p. 25, lines 4-5. Do residential and commercial customer classes also pay for uncollectible expenses related to default service?

RESPONSE:

Yes. Residential and commercial customer classes also pay for uncollectible expenses related to default service as stated in FE PA Statement No. 1, p. 25, lines 1-2.

Exhibit RM-7

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	:	**Docket No. P-2026-3060298**

RESA Set 1, No. 10

Reference FirstEnergy St. No. 1, p. 24, lines 17-19. For the calendar year 2025, please provide:

a) the total aggregate amount of the uncollectible accounts expense that was attributable to distribution rates,

b) the total aggregate amount of the uncollectible accounts expense that was attributable to the provision of default service, and

c) total aggregate amount of the uncollectible accounts expense that was attributable to EGS receivables purchased by FirstEnergy through the POR program.

RESPONSE:

FE PA allocates total uncollectible accounts expense to distribution versus generation in a base rate case test year based on normalized revenues prior to the rate increase plus purchase of receivables ("POR") revenues billed on behalf of EGSs. FE PA allocates generation uncollectible accounts expense to default service versus POR in a base rate case test year based on the default service revenues plus the POR revenues billed on behalf of EGSs. Based on those allocations, FE PA's total uncollectible accounts expense of $46.6 million in 2025 consists of:

a) the total aggregate amount of the uncollectible accounts expense that was allocated to distribution rates of $18.4 million;
b) the total aggregate amount of the uncollectible accounts expense that was allocated to the provision of default service of $17.3 million; and
c) the total aggregate amount of the uncollectible accounts expense that was allocated to EGS receivables purchased by FE PA through the POR program of $10.9 million.

Exhibit RM-8

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031 : **Docket No. P-2026-3060298**

CAUSE-PA Set 1, No. 027

As of December 31, 2025, please identify the number of residential accounts with arrears over $10,000, disaggregated by division (MetEd, Penelec, Penn Power, and West Penn Power). Of these accounts, please identify the following:

a. The total dollar amount owed across the accounts.
b. The number of accounts with supplier charges.
c. The total dollar amount attributable to supplier charges.

RESPONSE:

a,b,c. See table below.

Rate District	Accounts	Total Dollar Amount Owed	Number of Accounts with Supplier Charges	Total Dollar Amount Attributable to Suppler Charges
ME	132	$1,896,415	35	$104,744
PN	244	$3,837,181	72	$162,434
PP	53	$823,108	16	$63,062
WPP	182	$2,921,480	46	$126,536
Grand Total	**611**	**$9,478,183**	**169**	**$456,776**

Exhibit RM-9

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	:	**Docket No. P-2026-3060298**

CAUSE-PA Set 1, No. 013

Has FirstEnergy undertaken any internal or third-party analysis of the arrearage levels, collections costs, write-off rates, or termination rates for residential or small commercial shopping customers compared to default service customers? If so, provide a copy of the analysis.

RESPONSE:

FirstEnergy Pennsylvania Electric Company has not undertaken any internal or third-party analysis of the arrearage levels, collections costs, write-off rates, or termination rates for residential or small commercial shopping customers compared to default service customers.

Exhibit RM-10

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	:	**Docket No. P-2026-3060298**

OCA Set 1, No. 016

Has FE PA tracked, for residential customers, the number of:

a. Payment arrangements;
b. Disconnection notices;
c. Disconnections; and
d. Bad debt or uncollectible expenses

separately for customers served by an Electric Generation Supplier ("EGS") versus customers receiving default service? If so, please provide all such data and any related analyses.

RESPONSE:

FE PA has not tracked or analyzed any of the requested information separately for customers served by an EGS versus those on default service.

Exhibit RM-11

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	:	**Docket No. P-2026-3060298**

RESA Set 1, No. 14

Referencing First Energy Statement No. 1, page 20, lines 18-22, under FirstEnergy's proposal, would customers whose EGS's renewal offer price is below the PTC be returned to default service if the customer does not provide a new affirmative consent to remain with the EGS?

RESPONSE:

Yes, residential customer contracts that expire after June 1, 2027, will return to default service at the conclusion of their fixed duration contact, absent an affirmative choice to remain with the electric generation supplier, regardless of whether the renewal price is above or below the applicable price-to-compare.

Exhibit RM-12

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	:	**Docket No. P-2026-3060298**

RESA Set 1, No. 1

Please reference the "Supplier Tariff and Retail Shopping Changes" as outlined on pages 20-28 of FirstEnergy St. No. 1. Please indicate whether First Energy discussed its proposed Supplier Tariff and Retail Shopping Changes with representatives of any of the following stakeholders, or solicited or received input from any of the stakeholders prior to developing the "Retail Shopping Changes" that appear in the DSP VII:

a) EGSs
b) Commissioners or Commission staff
c) Office of Consumer Advocate
d) Office of Small Business Advocate
e) Members of the General Assembly
f) Public Utility Law Project or CAUSE-PA
g) Other industry stakeholders

For each such stakeholder with whom FirstEnergy had such discussions or solicited or received input, please identify the individuals with whom First Energy communicated, when the communications occurred, and the general topics addressed in the communications, and provide copies of all written communications.

RESPONSE:

FE PA is responding to this interrogatory in accordance with the parameters discussed with counsel for RESA. In advance of the filing of its seventh default service proceeding ("DSP VII"), FE PA held a series of prefiling meetings with stakeholders to discuss the contents of its proposed DSP VII which included a discussion of the proposed supplier tariff and retail shopping changes. All stakeholders were given an opportunity for feedback as set forth below. See FE PA Response to RESA Interrogatory Set 1, No. 1, Attachment A for the slide deck that was presented during the prefiling meetings with each of the parties below.

a. FE PA held a virtual prefiling meeting with the Deanne O'Dell on behalf of Retail Energy Supplier Association and some of its members on January 27, 2026;
b. FE PA held a virtual prefiling meeting with Pennsylvania Public Utility Commission ("Commission") staff members on January 28, 2026. Due to scheduling issues, FE PA held a second hybrid prefiling meeting with Commission staff on January 29, 2026;

c. FE PA held a virtual prefiling meeting with Harrison Breitman, Christy Appleby, and Katherine Kennedy on behalf of the Office of Consumer Advocate on January 28, 2026;
d. FE PA held a virtual prefiling meeting with Steven Gray on behalf of the Office of Small Business Advocate on January 28, 2026;
e. FE PA did not hold a prefiling meeting with any members of the General Assembly;
f. FE PA held a virtual prefiling meeting with Elizabeth Marx and Patrick Cicero on behalf of the Public Utility Law Project or CAUSE-PA on January 22, 2026;
g. FE PA held a virtual prefiling meeting with Whitney Snyder and James Crist on behalf of the Pennsylvania State University on January 30, 2026. FE PA held a virtual prefiling meeting with Charis Mincavage and Susan Bruce on behalf of the Met-Ed Industrial Users Group, Penelec Industrial Customer Alliance, and West Penn Power Industrial Intervenors on January 28, 2026.

FirstEnergy Pennsylvania Electric Company's ("FE PA")
Seventh Default Service Plan ("DSP VII")
For the delivery period beginning June 1, 2027

January 2026

DSP VII Overview

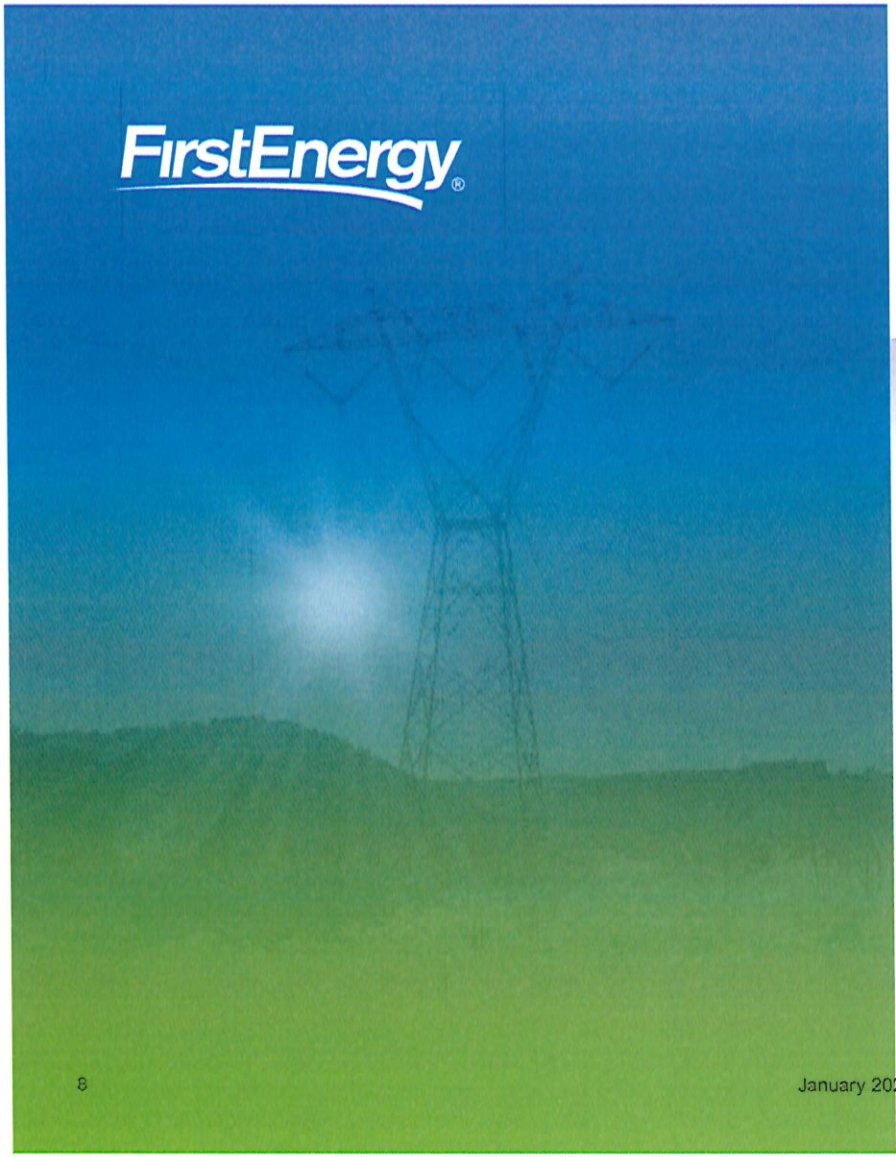
Item	DSP VII Filing
DSP Term	4 Years: June 1, 2027 – May 31, 2031
Procurement Method	Descending Clock Auction
Procurement Contract	Full-Requirements Load Following
Procurement Contract Duration*	Residential: Mix 12- (55%), 24- (35%), 60- (10%) Month Contracts Commercial: Mix 12- (60%) and 24- (40%) Month Contracts Industrial: Spot (removing $4 adder)
Procurement Months*	2027: January, April and November 2028 - 2031: January & November First Auction: January 2027

DSP VII Procurement Details

Item	DSP VII Filing
Default Service ("DS") Supplier Responsibilities*	Full-Requirements Load Following and Alternative Energy Portfolio Standards Act ("AEPS") compliance requirements
AEPS*	DS supplier responsible for 100% AEPS compliance requirements
DS Supplier Contract Payment	Residential: 100% Fixed Commercial: 100% Fixed Industrial: 100% Spot

DSP VII Procurement Details

Item	DSP VII Filing
Capacity Proxy Price ("CPP")*	The CPP for the delivery year that the proxy will be applied for will be based on the most recent base residual auction clearing price.
Credit	Maximum Unsecured Credit Limit: $50 million Pre-Bid Security: $500,000/Tranche Load Cap: 50% for Residential and Commercial 75% for Industrial Independent Credit Requirement per Tranche ("ICRT"): Schedule in Appendix A of the SMA



DSP VII Rate Design

Item	DSP VII Filing
Consolidating Rate Districts*	Price-to-Compare ("PTC") will remain separate; consolidation of consumer education portion of the default service support rider
Customer Classes	Residential, commercial, and industrial *(Hourly pricing threshold 100 kW)*
Rate Structure	Residential & commercial: flat rate Industrial: hourly rate
Frequency of Rate Changes	Residential & commercial: semi-annual Industrial: hourly
Network Integrated Transmission Charges ("NITS")*	Removed from the auction product but will remain a bypassable charge. The rate used will be in the PTRR filing which is calculated by the applicable transmission company and filed with FERC.

DSP VII Programs

Item	DSP VII Filing
Time of Use Option*	On-peak hours have been reduced from seven hours (2PM – 9PM) to four hours (3PM – 7PM).
Customer Referral Program*	Will terminate as of May 31, 2027
Reversion to Default Service*	Residential customer with fixed price supplier contracts will automatically revert to default service at the expiration of the contract.
Purchase of Receivables ("POR")*	POR participation will be limited to only those electric generation suppliers that charge PTC or below; elimination of clawback charge.
Maximum Registered Peak Load* ("MRPL")	Clarifying the 100kW threshold that separates the commercial and industrial groupings will be determined by the MRPL.

Proposed Procedural Schedule

Thank You

I. WITNESS INTRODUCTION AND QUALIFICATIONS

Q. Would you please state your name, affiliation, and business address?

A. My name is James A. Heidell. My current position is Partner at PA Consulting Group, Inc. ("PA Consulting"). My business address is 2420 17th Street, Suite 220, Denver, CO 80202.

Q. Please summarize your qualifications and experience.

A. My academic background includes a Bachelor of Science in civil engineering from Tufts University, a Master of Science in engineering economics from Stanford University, and a Master of Business Administration in finance from the University of Washington. I am a Certified Financial Analyst ("CFA") Charterholder.

I have worked in the energy industry for 45-years starting as an engineer focusing on energy at the U.S. Department of Energy's Pacific Northwest Laboratory. I have worked at multiple consulting firms focusing on electricity and natural gas and have advised a range of utility clients, private investors, and regulators. I also have been employed by Puget Sound Energy, a combined electric and natural gas utility, serving in various capacities including its Director of Federal and State Regulation and Director of Finance. My qualifications are provided in CGC Exhibit JAH-1.

Q. Please describe your responsibilities as Partner at PA Consulting.

A. As Partner, my responsibilities include working with clients to analyze a range of investments in the power generation sector, valuation of portfolios of generation assets, providing due diligence on a range of transactions in the power and gas sector, conducting reviews of utility generation investments on behalf of the Advocacy Staff of the North Dakota Public Service Commission, and evaluating a range of energy

technologies. In addition to providing consulting services to clients, I have a range of responsibilities related to developing PA Consulting's consulting staff and being part of the PA Consulting's U.S. Energy Practice management team.

Q. Does your transaction and regulatory experience include issues related to Photovoltaic ("PV") distributed generation?

A. Yes, I have advised a number of clients related to the development and financing of solar projects and distributed generation across the U.S.

Q. Have you testified before the Pennsylvania Public Utility Commission ("Commission") previously?

A. No, I have not.

Q. On whose behalf are you filing this testimony?

A. I am submitting testimony on behalf of Sunrise Airport Road LLC, Sunrise Forrester Road LLC, Sunrise Franklin Road LLC, Sunrise Harlansburg Road LLC, Sunrise Hendersonville Road LLC, Sunrise McCurdy Road LLC, Sunrise Perry Highway LLC, Sunrise Sandy Lake Greenville Road LLC, Sunrise Sandy Lake Polk Road LLC, and Sunrise Springfield Church Road LLC (collectively, the "Customer-Generator Coalition" or "CGC").

Q. Are the testimony and analysis you are proffering prepared by you or under your direction?

A. Yes.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present my assessment of FirstEnergy Pennsylvania Electric Company's ("FE PA" or "FirstEnergy") proposal to implement the Maximum Registered Peak Load ("MRPL") baseline of 100 kW and shift existing net-metering customer-generators and new customer-generators from a compensation regime based upon the Price to Compare Rider ("PTC Rider") to the compensation rate based upon the Hourly Pricing Default Service Rate Rider ("HP Rider") currently applicable to commercial customers.

Q. Have you prepared any exhibits associated with your direct testimony?

A. Yes. CGC Exhibit No. JAH-1 is my Curriculum Vitae. Exhibit No. JAH-2 is an evaluation of the large customer generation projects in FE PA's queue. Exhibit Nos. JAH-3 through JAH-12 are Discovery Responses provided by FirstEnergy that I relied upon.

II. SUMMARY OF DIRECT TESTIMONY

Q. Would you please provide a summary of your findings?

A. Yes. My conclusions are summarized below.

i. FirstEnergy has failed to demonstrate any significant cost shifting as a result of net-metering customer-generators receiving true-up payment under the PTC Rider.

ii. FirstEnergy wholly ignores the direct benefits provided by net-metering distributed generation, which include avoided energy, capacity, and transmission purchases – costs that would otherwise be passed along to default service customers.

iii. FirstEnergy also wholly ignores the positive downstream effects of solar net-metering distributed generation, which include economic benefits, environmental benefits, health benefits, and energy system benefits that accrue to all customers.

iv. FirstEnergy's MRPL proposal will have a chilling impact on renewable energy investment in Pennsylvania and that is contrary to Pennsylvania's environmental goals and policies to encourage more electric generation to address anticipated regional shortages.

Q. Would you please summarize how FirstEnergy has failed to demonstrate significant cost shifting?

A. FirstEnergy presents a wide range of hypothetical impacts as a result of PV distributed generation. Those hypothetical impacts fail to account for the value of energy and capacity that offsets end use customer costs. They are also unsupported by any evidence supporting the forecasted costs and the amount of customer-generation that *may* come online in future years. FirstEnergy has also failed to demonstrate that wholesale supply bidders build in any risk premium as a direct result of net-metered customer-generation. This seems to be FirstEnergy's basis for the MRPL proposal, yet, it cannot identify – nor has it attempted to identify – what these alleged net-metering risk premiums actually are. Therefore, there is no substantiated credible evidence that other same-class customers receiving default service bear additional costs as a result of net-metered generation.

Q. Would you please summarize the benefits that customer generators provide?

A. Yes. FirstEnergy witness Mr. Young calculates hypothetical costs associated with customer-generators based upon unsupported assumptions regarding the PTC Rider

rate. However, he fails to offset those costs with the value of the energy, capacity, and transmission that is avoided but for the export of electricity from the customer-generator systems. Additional benefits include the reduction in PJM Interconnection, LLC ("PJM") energy prices because of the distributed generation, reduced health costs resulting from less air pollution associated with displacing standard natural gas and to a lesser extent coal, electricity generation, and economic benefits associated with job creation, increased tax revenue, income generation for landowners, and production of more local goods. Moreover, with the influx of large load additions (*i.e.*, data centers) seeking service in Pennsylvania as well as desires to electrify transportation, I do not think utilities within the state have a reasonable argument for disincentivising new or continued distributed electricity generation.

Q. Would you please summarize your concerns about the long-term impacts of moving ≥ 100 kW customer-generators to the HP Rider?

A. Yes. FirstEnergy's change will reduce the compensation that net-metered customer-generators will be entitled to for their exported green energy. This change is anticipated to make it uneconomic to develop and operate PV distributed generation projects and will encourage developers and investors to pursue other states where the investment risk is lower. As a result, less PV distributed generation will be developed, in turn reducing economic development in the state that directly contribute to the state's decarbonization targets. This uncertainty, coupled with significant rate reduction and hourly rate volatility does not engender investment confidence. Additionally, while I am not a lawyer, I am advised by counsel that FirstEnergy's MRPL proposal may also violate the Alternative Energy Portfolio Standards ("AEPS") Act's provisions and intent, as well as the Commission's default service regulations.

III. ANALYSIS OF FIRSTENERGY'S PROJECTION OF CUSTOMER-GENERATOR IMPACTS

Q. Would you please summarize your understanding of how the cost impacts were developed by FirstEnergy?

A. Yes. Mr. Young provides a range of true-up expense projections in 2029 that range from $82 million to $750M.[1] I reviewed Exhibit DMY-7, where he develops this range, and the cost estimate is based upon the multiplication of a MWh of production from assumed in-service projects by an assumed PTC Rider rate. My conclusion is that Mr. Young has failed to not only evaluate the net cost impact on customers of the same rate class, but also that there is no basis for Mr. Young's large range of potential impacts besides unsupported hypothetical assumptions.

Q. Would you please explain what you are referring to as "net cost impacts"?

A. Yes. Mr. Young calculates the expense impact based upon an assumed PTC rate. In the case of 2025, he uses the actual PTC rate. For example, for Met-Ed in 2025, Mr. Young uses a PTC rate of $0.1085 / kWh and multiplies that by 23,470 MWh to come up with an expense of $2,547,226.[2] However, the direct impact to other customers receiving the PTC rate is much smaller since that behind-the-meter generation results in FirstEnergy either not needing to purchase over 23,470 MWh from the default service provider, or creating a financial credit based upon the value of the energy delivered to PJM. In addition, customer generation avoids capacity purchases and transmission services. In addition, as I explain later in my testimony, there are additional indirect savings to other customers. As a result of the direct and indirect

[1] FirstEnergy St. No. 1, p. 18, lines 18-21.
[2] FirstEnergy Exhibit No. DMY-7, p. 1.

offsets, Mr. Young's net cost impacts are significantly overstated, and it does not appear that FirstEnergy has considered – let alone examined – the impact of those offsets.

Q. Does FirstEnergy receive financial credit for the energy exported by customer generators?

A. Yes. Mr. Young notes that, where FirstEnergy is the Load Serving Entity ("LSE"), it is given credit from PJM. Given that FirstEnergy receives credit for the energy that is passed along to customers, Mr. Young is clearly overstating the cost to customers in his testimony.[3]

Q. How does Mr. Young estimate the amount of net-metering customer-generation on-line in 2029?

A. Mr. Young assumes 50% of the applications totaling 1.65 GW comes online in 2029 in his high scenario, 25% in his mid-scenario (827 MW), and 10% in his low scenario (305 MW).[4]

Q. Does FirstEnergy provide any support for the estimates of the percent of systems that will be on-line?

A. No. While Mr. Young indicates that there is 3,932 MW of capacity in the queue, the data provided by Mr. Young indicates that majority of customers have not progressed beyond filing the initial application. For example, only 18% (627 MW) of the projects have progressed to or beyond agreeing to pay for a Study Agreement that funds the Company's feasibility study, while less than 15%, or 573 MW, have signed

[3] Response by FirstEnergy to JSA Interrogatory Set 2, No 4 (CGC Exhibit No. JAH-3).
[4] *See* FirstEnergy Exhibit DMY-7.

Construction Services Agreements ("CSA").[5] However, there is no guarantee that even customers that have signed interconnection agreements or construction service agreements will reach commercial operation.

Q. Why would the projects with signed ISA or CSAs not reach commercial operation status?

A. Once the customer signs a CSA, the customer still needs to review the cost estimate and determine if it is economical to proceed with the project and then pay for the actual construction costs. In addition, the customer may still need to obtain materials as well as financing for the project. Simply put, costs, timelines, and regulatory uncertainty can make pursuing the project uneconomic.

Q. What support does Mr. Young provide for the PTC rate used to derive his estimate of costs?

A. Mr. Young does not provide a justification. In fact, FirstEnergy admits that the utility cannot forecast the PTC rate.[6] Specifically, the Company states the following.

> "FE-PA is unable to forecast default service revenues or receipts as it cannot reliably predict or anticipate what the future price-to-compare will be due to unknown economic and other risk factors."

My review of Exhibit DMY-7 indicates that Mr. Young assumes a compound annual growth rate ("CAGR") of the PTC of almost 25% from 2025 to 2029. Alternatively, Mr. Young's low scenario assumes a CAGR of 5.7% over the same period.

[5] Analysis of FirstEnergy response to CGC Set 3, No. 1 Attachment A (CGC Exhibit No. JAH-4); *See also* CGC Exhibit No. JAH-2.
[6] *See* FirstEnergy response to CGC Set 2, No. 5 (CGC Exhibit No. JAH-5).

Q. Do you consider Mr. Young's annual growth estimates in the PTC rate to be reasonable?

A. No. For example, I looked at forward annual on-peak price estimates for PJM East, and the growth rate in energy was not large between 2026 and 2029, with the 2029 on-peak price less than $0.006/ kWh higher in 2029.[7]

Q. Based upon your review of Mr. Young's calculations what do you conclude regarding his estimate of the cost impacts?

A. My conclusion is that Mr. Young's predictions are both misleading and unreliable.

Mr. Young's estimates are misleading because he does not account for the fact that if default service customers do not pay customer-generators for their generation output, those customers would otherwise have had to pay an alternative supplier for the energy, capacity, and transmission costs. Alternatively, a financial credit for the energy produced and sold to PJM provides the same benefit from a cost impact basis. In addition, customers would have to pay for increased transmission line losses since delivering electricity from customer-generators to other distribution customers does not create transmission line losses.

Mr. Young's estimates of costs are unreliable because he has not provided any analysis of the number of active applications that are likely to reach commercial operations. There is no basis for the Commission to assume that 10%, 50%, or any other percentage of the projects in the queue will reach their Commercial Operation Date ("COD"). Moreover, Mr. Young assumes large increases in the PTC rate in spite of FirstEnergy's acknowledged inability to forecast the PTC rate.[8]

[7] OTC forwards as of April 27, 2026.
[8] *See* FirstEnergy response to CGC Set 2, No. 5 (CGC Exhibit No. JAH-5).

IV. EVALUATION OF OTHER FIRSTENERGY ARGUMENTS FOR FORCING CUSTOMER-GENERATORS OFF OF THE PTC RIDER RATE

Q. Have you evaluated additional justifications by FirstEnergy to move customer generators off the PTC Rider?

A. Yes, I evaluated the following additional justifications proffered by FirstEnergy:

i. Uncertainty in customer-generation creates an additional risk premium that default supply bidders build into their bids that is paid by default service customers.[9]

ii. There is potential subsidization of large customer-generators by small commercial retail customers.[10]

Q. What is your understanding of Mr. Young's argument regarding the risk premium paid by default service customers?

A. Mr. Young states adding large customer generator supply increases the price premium in fixed price full requirement products.[11]

Q. Did Mr. Young quantify the alleged price premium?

A. No, not that I am aware of.

[9] FirstEnergy St. No. 1, p. 17, lines 15-18.
[10] FirstEnergy St. No. 1, p. 18, lines 1-2.
[11] FirstEnergy St. No. 1, p. 17, lines 17-18.

Q. Has the Company provided any indication of the magnitude of the alleged risk premium?

A. No. The Company has not conducted any studies of the impact on default service customers as a consequence of the proposed reclassification of customer-generators.[12] The Company has also conducted no studies of the impact that large customer generators have had historically on procurement costs.[13]

Q. Has the Company estimated the total risk premium in historical procurements?

A. Yes. FirstEnergy witness Dr. Powers estimates the total risk premium range from $6.46 - $10.24/MWh (depending on the FirstEnergy rate district) in the 2018-2025 auctions.[14] Dr. Powers also notes that his calculated risk premium may be larger than the true risk premium as a result of his calculation methodology.[15] However, that risk premium inevitably includes a large number of significant factors, including the variability in the load shape caused by weather, the risk of committing to a fixed price bid for energy cost in a market with uncertain fuel and electricity prices (*i.e.*, implicit or explicit hedging costs), as well as uncertainty regarding the number of customers taking default service In fact, Dr. Powers does not even mention customer-generators in his list of supplier-assumed risks.[16] Moreover, FirstEnergy has not been advised by *any* default service supply bidders that they will – or have – build in a customer-generation related risk premium.[17]

[12] Response of FirstEnergy to CGC Set 1, No. 011. (CGC Exhibit No. JAH-6).
[13] Response of FirstEnergy to JSA Set 2, No. 3 (c) (CGC Exhibit No. JAH-7).
[14] FirstEnergy St. No. 3, p. 15, line 3.
[15] FirstEnergy St. No. 3, p. 14, lines 5-11.
[16] FirstEnergy St. No. 3, p. 8, lines 21-22.
[17] *See* FirstEnergy Response to CGC Set I, No. 19 (CGC Exhibit No. JAH-8).

Q. Are there potentially other components to the risk premium calculated by Dr. Powers?

A. FirstEnergy alleges that suppliers also incorporate a risk premium associated with transmission costs. However, as with all other aspects of the alleged risk premium, the Company does not appear to have any evidence of a transmission risk premium or any breakdown of Dr. Powers' hypothesized premium into components.[18]

Q. Has the Company presented any evidence of "potential subsidization"?

A. No, the Company has not presented any credible evidence. The Company's response to an interrogatory to provide all documents, workpapers, and analysis to quantify the "potential subsidization" was an indirect reference to Exhibit DMY-7.[19]

Q. Why is Exhibit DMY-7 not credible evidence of a potential subsidization?

A. As previously noted, DMY-7 is a forecast of assumed PTC rates multiplied by assumed exports from customer -generation. Among other issues, the calculation excludes the value of energy, capacity, and avoided transmission that otherwise would have to be purchased on behalf of the default service customers. Moreover, it doesn't include any evidence of how many projects will reach completion, and bakes in assumptions about the future PTC that FirstEnergy has admitted it cannot predict.[20] Said another way, it is an unrepresentative quantification of the value of customer generation.

[18] *See* FirstEnergy response to OCA Set 2, No. 25 (e) (CGC Exhibit No. JAH-9).
[19] *See* FirstEnergy response to JSA Set 2, No, 8 (CGC Exhibit No. JAH-10). Mr. Young referred to FirstEnergy's response to OSBA Set 1, No 4, Attachment A which is an Excel version of Exhibit DMY-7.

V. THE HP RIDER AND HOURLY-PRICED SERVICE RATE DO NOT RECOGNIZE THE FULL BENEFITS PROVIDED BY CUSTOMER-GENERATORS

Q. What benefits are provided by large customer-generators?

A. Large customer generators provide a range of benefits including:

i. Electric energy,

ii. Electric capacity,

iii. Reduced system losses,

iv. Reduced transmission costs,

v. Market electric price reductions,

vi. Health benefits,

vii. Decarbonized energy,

viii. Investments in the distribution system, and

ix. State economic benefits.

Q. Would reclassifying customer-generators under the HP Rider compensate customer generators for all those benefits?

A. No, the HP Rider only addresses the first four benefits.

Q. Please summarize the market electric price reduction benefits provided by large customer generators.

A. Renewable energy resources such as wind and solar essentially have zero dispatch costs and PJM will dispatch those resources before more expensive fossil fuel generated electricity. As more zero dispatch cost resources are added to the system, it is estimated to reduce the cost of the last unit in PJM dispatched to meet load. The PJM market price is set based upon the clearing price of the last unit dispatched. This benefit is recognized

in Pennsylvania and measured as part of the evaluation of DSM programs in the Demand-Reduction-Induced Price Effects ("DRIPE") calculation to estimate the reduction of market electricity and capacity prices.[21] The DRIPE value is also recognized in New Jersey[22] and Maine[23] calculations to estimate the reduction of market electricity prices associated with adding more renewables.

Q. Please summarize the health benefits provided by large customer-generators.

A. Increased renewable energy production on the system displaces fossil fuel electricity generation because it is zero marginal cost. Consequently, burning fewer fossil fuels reduces the amount of criteria air pollutants (NOx, SOX, PM, and VOCs). These pollutants are associated with harmful health impacts. The avoided impacts on human health are recognized and quantified in California's Avoided Cost Calculator.[24] These avoided costs are used in California's ratemaking process to ensure system costs account for the benefits from distributed energy resources. The health benefits of reduced criteria air pollutants are also recognized in Maine's Net Energy Billing Program.[25]

Q. Please summarize the decarbonized energy benefits provided by large customer-generators.

A. Renewable generation is assumed to reduce the need for burning fossil fuels, which therefore reduces greenhouse gas emissions including CO2. Maine's Net Energy

[21] Pennsylvania Public Utility Commission, 2026 Total Resource Cost (TRC) Test, Final Order, M-2024-3048998.
[22] New Jersey Cost Test Proposal, 2020.
[23] Maine Legislature, SP 815, 2023.
[24] 2024 Distributed Energy Resources Avoided Cost Calculator Documentation. E3 for the California Public Utilities Commission, October 2, 2024.
[25] Analysis of 2025 Net Benefits of Net Energy Billing Program, Sustainable Energy Advantage for Maine Public Utilities Commission, 2026.

Billing program recognizes societal benefits from greenhouse gas reduction, as well as avoided environmental compliance costs.[26] Minnesota recognizes the avoided costs of CO2, PM10, NOx, Pb, and CO as the avoided environmental cost in the Value of Solar Methodology.[27] This methodology is used to set value-based compensation rates for exports from distributed solar generation. Further, a more diverse system portfolio reduces reliance on any single fuel or technology, leading to a more resilient system overall. Indeed, the Governor's "Lighting Plan" includes a Climate Emissions Reduction Act, and a tax credit for "reliable energy sources." Net-metering customer-generation both reduces the climate emissions that would be emitted if that energy came from standard fossil fuel generation and provides reliable energy.

Pennsylvania also has an interest in continuing its green energy development. Thus, I believe encouragement of net-metered development to be squarely in line with public policy in Pennsylvania.

Q. Please summarize the distribution system investment benefits provided by large customer-generators.

A. Adding large customer-generators to the system can potentially delay the need for distribution upgrades which would otherwise be borne by other customers. Installing generation on the distribution system can also reduce the need to build new transmission capacity. It is common in evaluating energy efficiency and demand side management programs to associate a benefit from reducing the need to build new transmission. The New Jersey Cost Test,[28] Minnesota Value of Solar Methodology,[29] Maine Net Energy

[26] *Ibid*, p. 20.
[27] Minnesota Value of Solar: Methodology. Minnesota Department of Commerce, Division of Energy Resources. April 1, 2014.
[28] New Jersey Cost Test Proposal, 2020.
[29] Minnesota Value of Solar: Methodology. Minnesota Department of Commerce, Division of Energy Resources. April 1, 2014.

Billing,[30] and California Avoided Cost Calculator,[31] each described previously, recognize this benefit. Distributed generation has a comparable benefit with regards to the transmission system that is similarly recognized and quantified.

Q. Please summarize the state economic benefits provided by large customer generators.

A. Supporting in-state investment in large customer generator-projects provides local economic development through employment and tax base. Employment includes direct jobs such as construction, installation, and maintenance, as well as indirect and induced jobs from increased economic activity.[32] Projects can also contribute to state and local tax revenues.

Q. Have the additional benefits that you have identified been recognized in Pennsylvania?

A. Yes, a recent report on the benefits of community solar in Pennsylvania was recently prepared by Washington & Jefferson College.[33] For example, the report notes the following.

i. 750 MW of community solar development will generate approximately $2.1B in economic impact and 14,000 local jobs.[34]

[30] Analysis of 2025 Net Benefits of Net Energy Billing Program, Sustainable Energy Advantage for Maine Public Utilities Commission, 2026.
[31] 2024 Distributed Energy Resources Avoided Cost Calculator Documentation. E3 for the California Public Utilities Commission, October 2, 2024.
[32] Potential Economic Impact of Community Solar in Pennsylvania, Penn State College of Agricultural Sciences.
[33] A Distributed-Generation Solution for Pennsylvania's Energy Future, Washington & Jefferson College, August 2025.
[34] *Ibid*, p. 9.

ii. Community solar projects offer environmental benefits through reduction in fossil fuel generation.[35]

iii. Community solar projects offer health benefits including reducing risks from asthma, lung issues, and cancer from hazardous chemicals.[36]

Similarly, a report from Pennsylvania State University examines the potential economic impacts during the construction phase as well as operational phase.[37] The report notes the following for the 235 planned community solar facilities at the time of the report.

i. The construction phase will support nearly 12,000 jobs including direct, indirect, and induced jobs. Within Pennsylvania, approximately $1.8 billion in economic activity will be generated during the construction phase.[38]

ii. During the operations phase, an ongoing 520 jobs would be supported and $83 million in economic activity would be generated.[39]

While these reports refer to community solar, the benefits also apply to distributed solar generation in Pennsylvania more generally.

VI. FIRSTENERGY'S MRPL PROPOSAL WILL REDUCE INVEMENTS IN NEEDED NEW CLEAN ENERGY

Q. Did FirstEnergy analyze the impact on customer generation investment based upon its proposed reclassification of customer generation?

A. No, FirstEnergy did not assess the impact on existing or potential new net metering installations at or over 100kW that would be impacted by this change.[40]

[35] *Ibid* p. 14.
[36] *Ibid* p. 14
[37] Potential Economic Impact of Community Solar in Pennsylvania, Penn State College of Agricultural Sciences.
[38] *Ibid* p. 8.
[39] *Ibid* p. 9.
[40] FirstEnergy response to CGC Set No 1, No. 013 (CGC Exhibit JAH-11).

Q. What are the repercussions of FirstEnergy's MRPL proposal for large customer-generators?

A. The MRPL proposal will discourage future investment in new generation as well as reduce future clean energy investment. It will also create financial distress for existing net-metering projects that were evaluated, financed, and constructed under the existing scheme.

Q. Why will it discourage future investment?

A. A combination of factors including changes in tax credits, cost of materials, and labor costs make new investments in distributed solar generation in Pennsylvania challenging. Furthermore, developers have limited resources with respect to time and capital and will focus their attention on other states where there is an opportunity to achieve their target investment returns without the uncertain regulatory environment created by FirstEnergy and other electric distribution utilities.

This trend is demonstrated as a consequence of the changes made to Maine's Net Energy Billing program. The Maine Legislature enacted LD 1777, which reduces compensation for existing participants of the Net Energy Billing program and created a cut-off of December 31, 2025, for new entrants. Developers in Maine filed suit against the Maine Public Utilities Commission in November 2025 on the grounds that LD 1777 makes future development uneconomic and retroactive changes impair long-term subscribers and contracts that were developed under the prior NEB program.[41]

[41] *GRAY YARMOUTH ROAD SOLAR LLC et al v. MAINE PUBLIC UTILITIES COMMISSION*, No. 1:25-cv-00952 (filed Nov. 24, 2025).

Q. Are there any indicators that there will be reduced investment in projects?

A. Yes, the Company has provided data that indicates there is a decrease in the MW application requests in 2025. In addition, 35% of the total MW submitted for review in the last four years have been cancelled.[42] I also note that FirstEnergy has not provided data for 2026 and developers may be waiting for a Commission decision prior to cancelling their application(s).

Q. Do you foresee implications for Pennsylvania energy policy?

A. Yes, individual utilities changing existing rules for net-metering compensation discourages investment by making investments in Pennsylvania risky. In addition, not sufficiently compensating new renewable energy investment will discourage investment at a time when the state has both indicated the need for new generation as well as desiring clean energy to meet decarbonization targets.

Q. Has the state identified the need for additional electric generation?

A. Yes, a recent analysis by the Pennsylvania Public Utility Commission identifies significant recent historical load growth in Pennsylvania as well as projected load growth.[43] The study noted a year-over-year increase in Pennsylvania's electric usage of 2.81% over the period of 2020 – 2024 with a five-year projected annual growth rate of 6.17%.[44] While solar is an intermittent resource, the report notes that "solar PV remains the overwhelmingly predominate generation type being added" and that it is being coupled with Battery Energy Storage Systems ("BESS").[45] Disincentivizing

[42] Review of FirstEnergy response to JSA ROG Set 1, No. 12, Attachment A (CGC Exhibit No. JAH-12).
[43] Electric Power Outlook for Pennsylvania 2024 – 2029, Pennsylvania Public Utilities Commission, Technical Utility Services, August 2025.
[44] *Ibid.* pp 2-3.
[45] *Ibid.* p. 13.

continued net-metering buildout effectively removes a tool in the Commission's (and the State's) toolbelt to address a recognized potential generation and supply shortfall. PPL Electric Utilities Corporation ("PPL"),[46] Duquesne Light Company,[47] the PJM Independent Market Monitor and PJM itself,[48] the Office of Consumer Advocate,[49] the PJM Power Providers Group,[50] this Commission,[51] and FirstEnergy itself,[52] among many others, have all recognized this potential generation, supply, and resource adequacy shortfall. Indeed, FirstEnergy has explained that it is "deeply concerned about the looming resource adequacy challenges in the [PJM] footprint…,"[53] that "[e]lectricity demand continues to increase at an unprecedented pace due to electrification and the influx of intensive energy consuming data centers," that "[e]nergy supply is not only unable to keep pace with unprecedented demand increases; it is decreasing in the proportion of demand it is projected to meet,"[54] and that "FE PA supports development of all resources in Pennsylvania that address the projected gap between increasing load and capacity resources."[55]

[54] *Ibid.*, pp. 2-4.
[55] *Ibid.*, p. 6.

Q. Is it important for Pennsylvania to continue to develop solar PV net-metered generation?

A. Yes. Beyond the looming resource adequacy crisis that net-metering customer-generators can help address and discussed above, a recent report by the Pennsylvania Department of Environmental Protection noted that electricity production accounted for approximately one third of net Green House Gas ("GHG") emissions in 2022.[56] While the State has made progress in GHG reductions, the State also acknowledges that additional policies are needed to meet the 2030 target reduction versus continuing under business as usual.[57] The report notes that building out a net zero grid will include developing solar energy.[58]

Simply put, now is not the time to disincentivize the net-metering customer-generator industry. These installations generate clean electricity at a time when it is critically needed. FirstEnergy's MRPL proposal, if approved, will discourage continued investment in this industry and may make existing net-metered solar PV installations economically challenged.

Q. Is the delay in implementation for existing customers as proposed by FE-PA adequate?

A. No, the proposed two-year delay for reclassification of existing customers is not adequate.[59] Project construction planning, valuations, and financing were based upon the existing tariff structure. A two-year delay prior to the step down in revenue does not allow sufficient time to recover the initial investment and anticipated costs at the

[56] Pennsylvania Greenhouse Gas Inventory Report 2025, Pennsylvania Department of Environmental Protection, August 2025, p. 5.
[57] Pennsylvania's Climate Action Plan Update 2024, Pennsylvania Department of Environmental Protection, April 2025, p. 7.
[58] *Ibid*., p. 129.
[59] FirstEnergy St. No. 1, p. 19, lines 19-22.

time that the long-term investment decisions were made and the project was financed. In my experience, the anticipated useful life of the projects is the timeline that developers use when determining whether any particular project was or is viable. A two-year grandfathering regime does not come close to those projections.

VII. CONCLUSIONS AND RECOMMENDATIONS

Q. Would you please summarize your conclusions?

A. Yes. My key conclusions are as follows:

i. FE PA has failed to demonstrate any significant net cost shifting as a result of compensating customer generators at the PTC rate. The Company developed a range of estimates based upon unsupported assumptions regarding the growth of customer generation and increases in the PTC rate. Even more egregious, FE PA has failed to account for the cost savings to default service customers associated with the value of energy, capacity provided by customer generators versus the alternative of paying a third-party supplier or market prices for the equivalent energy and capacity.

ii. FE PA has failed to demonstrate that customer generation has increased the risk premium in the PTC rate. In fact, FE PA has acknowledged that it did not perform an analysis.

iii. FE PA has not only failed to account for the direct financial benefits provided by customer generators including avoided energy, capacity, and transmission purchases, customer generators, but also has failed to consider the economic benefits, environmental benefits, health benefits and energy system benefits that accrue to all customers.

iv. FE PA's proposed changes are anticipated to have a chilling impact on renewable energy investment in Pennsylvania. That is contrary to the environmental goals and policies to encourage more electric generation to address anticipated regional shortages. FE PA has admitted that it performed no analysis of the impact on customer-generators.

v. This proposal will discourage future clean energy investments that both support the local economy and help meet GHG reduction targets.

vi. Changing compensation for existing projects not only harms the existing projects but also sends the message to investors that Pennsylvania is a risky environment to invest in distributed PV generation at a time when continued encouragement for new electricity generation is critically needed.

Q. Does this conclude your Direct Testimony?

A. Yes, however, I reserve the right to supplement and/or amend it throughout the course of this proceeding.

CGC Exhibit No. JAH-1

Jim Heidell

Partner, Economics & Investment Strategy

Jim Heidell specializes in electric and gas utility regulation, distributed energy, evaluation of renewable energy technologies and financial analysis of complex investments. Mr. Heidell assists clients with due diligence associated with acquisition of natural gas and electric utilities and wholesale energy market transactions. He has extensive financial and energy market modeling experience coupled with a deep understanding of regulated and competitive markets that he applies to the valuation of energy assets. Mr. Heidell has prepared and submitted testimony in both regulatory proceedings and civil contract damages cases. His regulatory experience and testimony includes rate design, cost of service, resource planning, and merger conditions. Mr. Heidell also specializes in strategic analysis and evaluation of opportunities associated with renewable / alternative energy technologies. Prior to working at PA Consulting he held positions as the Director of Finance and Director of Federal and State Regulation at Puget Sound Energy. Mr. Heidell is a CFA and has an MBA in finance from the University of Washington, a MS in Engineering Economics from Stanford University, and a BSE in civil engineering from Tufts University.

Primary expertise

- **Electric and natural gas utility regulation and finance**
- **Analysis of wholesale electric markets**
- **Renewable Energy Technologies**
- **Asset valuation / M&A Advisor**
- **Damages estimation for civil litigation**
- **Strategic planning**
- **Financial modelling of complex investments**
- **Financial planning**

Clients

- Public Service Company of Colorado
- New Mexico Gas Company
- Solarcity
- Canada Pension Plan Investment Board
- Riverstone Holdings
- Puget Sound Energy
- SolarCity
- Comision Federal de Electricidad
- North Dakota Public Service Commission

Qualifications

- 40-years' experience with electric & gas utilities and electricity markets
- MBA University of Washington
- MSE Engineering Economics, Stanford University
- BSE, Civil Engineering, Tufts University
- CFA

Experience summary

- **Utility Regulatory Support** – Prepare expert testimony in regulatory hearings related to resource acquisition, QF issues, rate impacts, marginal and embedded cost of service, and rate design. Developing marginal and embedded cost studies for regulated utilities.
- **Financial Analysis** – Long-term modelling of utility finance. Analysis of major capital investments using a variety of tools to incorporate uncertainty and risk.

© PA Knowledge Limited

- **Analysis of Energy Markets** – Develop energy and capacity forecasts for U.S. power markets to support: strategic investments by utilities and major energy companies, development of utility risk management strategies, and corporate strategies for generation asset acquisition and disposition.
- **Evaluation of Distributed Energy and Behind the Meter Generation** – Forecast of margins of community solar projects, portfolios of customer sited PV projects, and analysis of regulatory policies and rules associated with community solar projects and behind the meter PV projects.
- **Renewable Energy Technologies** – Develop business plans, market positioning strategies, and financial analysis of renewable technologies including PV cell manufacturing, flywheels, and fuel cells along with renewable generation technologies including solar thermal, geothermal, wind, battery storage, and IGCC projects.
- **Asset Valuation / M&A Advisor** – Provide valuation advice for acquisition of electric generation portfolios, single power plants, transmission projects, electric utilities, and gas distribution companies. Work also included review of wholesale and retail regulatory pricing mechanisms and analysis of associated risk.
- **Damages Estimation for Civil Litigation Testimony** – Prepare expert witness testimony to support power contract litigation, property tax cases, power plant development agreements, and quantification of economic damages.

Experience

CIVIL LITIGATION TESTIMONY & SUPPORT

Rebuttal of claims of economic damage associated with the cancellation of a water desalination project in Monterey California.

Prepared an analysis of claims of economic damage associated with the performance of an anaerobic digester designed to provide gas for an electric generation project. Analysis included evaluation of performance, revenues and costs, and cost of capital used to discount projected future earnings. Prepared expert report and testified in jury trial in federal district court.

Developed an analysis of material and labor cost increases on EPC costs for a natural gas fired power plant located in New Mexico. The analysis was used to refute a claim that cost overruns were not reasonable in a cost plus EPC contract. The analysis demonstrated how much of the total project cost increases was associated with labor and material costs beyond the control of the general contractor.

Prepared an analysis of loss of margins at two coal plants during periods when there were alleged violations of EPA opacity emission limits. The analysis demonstrated that client did not receive any economic benefit associated with the periods of alleged violations.

Prepared an analysis of the commercial distributed solar sector in the 2010 – 2011 time frame and demonstration of the unreasonableness of the plaintiff's claims for economic damages associated with the defendant's decision not to pursue participation in an equity fund.

Prepared an analysis of the U.S. wholesale electric power markets in the 2008 – 2010 time frame to demonstrate why the plaintiff's decision to terminate construction of a coal fired power plant was due to cost increases in the EPC contract and not due to the changing natural gas prices and emission laws.

Prepared an estimate of lost margins associated with the extended outage of a Canadian nuclear reactor. The analysis included an estimate of what Ontario wholesale power prices would have been but-for the outage and estimates of the total damages including repair and inspection costs.

Prepared an Expert Report regarding rate making and financial policies of the Southern Minnesota Municipal Power Agency in conjunction with a contract dispute regarding a power contract and investments in new generation resources to serve full requirements customers.

Assisted expert witness by the preparation of a report on how a third party would value the Trans-Alaska Pipeline as part of a property tax dispute with the municipality of Anchorage.

© PA Knowledge Limited

Prepared an analysis of damages associated with claims for losses associated with the interruption of business of a Texas gas-fired power plant as a result of the rupture of a natural gas pipeline use to supply the power plant.

Prepared of an analysis of the economic benefits that accrued to the defendant associated with the purported delay of implementation of measures to correct water pollution discharge violations associated with a power plant.

ANALYSIS OF RENEWABLE ENERGY INVESTMENTS

Preparation of multiple Independent Market Expert Reports to support financing of community solar projects in Illinois, Maine, Massachusetts, New York, New Jersey, and Maryland.

Prepared an Independent Market Expert Report to support the debt financing of BrightSource Energy's Ivanpah solar thermal projects with purchased power agreements with California investor owned utilities.

Prepared an Independent Market Expert Report to support the debt financing of Solona, a large solar thermal project with molten salt storage, with a purchased power agreement with an Arizona Public Service.

Prepared an Independent Market Expert Report to support the expansion of a CdTe PV manufacturing facility in Colorado including the analysis of the business plan and projection of long-term prices for the PV modules.

Prepared an Independent Market Expert Report to support the expansion of a c-Si PV manufacturing facility including the analysis of the business plan and projection of long-term prices for the PV modules.

Prepared an Independent Market Expert Report to support the expansion of a polysilicon manufacturing facility including the analysis of the business plan and projection of long-term prices for polysilicon and the associated raw materials.

Prepared an evaluation of the global market for concentrating solar power plants as of 2012 as part of a client analysis of a potential purchase of a solar mirror manufacturing company.

Prepared an evaluation of the U.S. solar PV market to support evaluation of a Japanese firm's potential expansion in the U.S. markets.

Assisted client with a bid into a utility's renewable energy procurement program. The analysis included an assessment of competitors and analysis of pricing to support the bid of a renewable energy resource into 2011 Entergy RFP for renewable resources.

Prepared long range forecasts of multiple wind portfolios with an emphasis on the valuation of post PPA revenues and the value or renewable energy credits.

Prepared an analysis of the market for future expansion of the wind business of a major U.S. wind developer based upon an assessment of the competitiveness of wind generation with gas fired generation.

Prepared a fair market value analysis of associated with the purchase of a minority position in a wind project located in Ontario, Canada.

Prepared an Independent Market Expert Report to support the debt financing of a geothermal power project located in the Pacific Northwest.

Prepared an Independent Market Expert Report to support the debt financing of the Beacon flywheel energy storage project in New York.

Prepared an Independent Market Expert Report to support the debt financing of the AES battery energy storage project in New York. Development of an Independent Market Expert Report to support the financing of the Kemper IGCC plant including an analysis of the regulatory structures being relied upon to support cost recovery as well as wholesale electric prices to support wholesale power sales.

UTILITY REGULATORY SUPPORT

Analysis and testimony on behalf of Constellation Energy Group related to typical merger and acquisition conditions required by regulators in utility and non-utility transactions. Testimony related to the EDF / Constellation joint venture.

Testimony related the use and design of ratchet rates on behalf of Northern Indiana Public Service Company. Testimony related to the application of ratchets to the client's unique position and appropriate recovery of costs.

© PA Knowledge Limited

Analysis of the economics of an electric utility's interruptible rates including the value of interruptions versus the payments received by customers. Developed recommendations for pricing interruptible rate programs that were consistent with the utility's avoided costs and ISO markets.

Developed electric cost-of-service studies, rate design, and testimony to support Puget Sound Energy in multiple general rate cases in Washington. The engagements included addressing issues such as special rates for strategic customers with competitive options, line extension policies, and rates to address revenue attrition.

Developed natural gas cost-of-service studies, rate design, and testimony to support Puget Sound Energy in a general rate case in Washington.

Prepared marginal cost of service studies and testimony to support Montana-Dakota utilities in multiple Montana rate cases.

Assist Montana-Dakota Utilities in development of its integrated resource plan through analysis of options using the Strategist planning model.

Supported Montana-Dakota Utilities in answering a complaint in front of the South Dakota Public Utilities Commission regarding a wind generator requesting a contract under the provisions of PURPA.

Provided expert testimony related to Montana Dakota's proposed participation in the Big Stone II power plant. Prepared and delivered testimony provided in multiple hearings in North Dakota and Minnesota.

Prepared testimony on behalf of Hydro One Networks regarding rate shock and how to address necessary rate changes associated with the restructuring of the electric utility business in Ontario.

Developed an analysis or weather risk associated with the retail power sales of IPALCO. Effort was conducted as part of a comprehensive risk assessment conducted by AES. Models of the weather / load relationship were developed and then integrated with the rate structures and cost adjustment mechanisms to assess the utility's overall exposure to weather risk.

Advised Old Dominion Electric Cooperative on options for acquiring new generation in a depressed power market and incorporation of the analysis in their long-term resource planning.

M&A and BANKRUPTCY ADVISOR

Prepared an analysis of New Mexico Gas Company to support a prospective buyer. We assisted multiple clients with due diligence related to the acquisition of gas LDCs. Assisted the client with a review of the deal model including: assumptions about rate cases, assumptions regarding ROE, sales growth by rate class, and revenue by rate class. The engagement also included an assessment of the regulatory climate and potential conditions and costs associated with obtaining regulatory approval of the transaction.

Prepared a valuation of the Mountaineer Gas Company including the analysis of regulatory issues to support the debt financing associated with the purchase of the energy company.

Assisted an infrastructure fund in valuing power contracts and reviewed the regulatory model used in conjunction with establishing the price to bid for the acquisition of Northwestern Utility.

Prepared an analysis of Duquense Light to support an infrastructure fund's bid for the utility. The analysis included projections of growth opportunities through distribution & transmission investment, analysis of the POLR load obligation, and a review of key regulatory issues.

Developed a valuation model of Mirant including analysis of debt carrying capacity to assist a strategic player in the U.S. Power Industry determine whether to make an unsolicited offer to purchase Mirant.

Assisted an international oil company in development of modelling processes and assumptions to support a corporate effort to acquire a fleet of U.S. merchant generating assets.

Support a strategic player in valuing the Lake Road Generation Plant as part of their bid to acquire the asset in a competitive auction. Effort involved projection of future gross margins of the plant, analysis of the ISO-NE Forward Capacity Market, and analysis of transmission constraints.

Directed the valuation of the entire NRG portfolio on behalf of the bank creditors in the NRG bankruptcy hearings. The valuation work included advising on a range of types of generation assets in the U.S. as well as in Europe, South America, and the Asia-Pacific region. Mr Advised on the fairness of offers for assets being disposed of by NRG.

© PA Knowledge Limited

Assisted creditors in the valuation of assets in the NEG bankruptcy including the options for completing unfinished gas-fired generation assets. Served as the interim finance manager for the Lake Road Generation facility.

Member of team that advised Calpine as part of the company's restructuring and plan of reorganization. Assignment included analysis of the Canadian portfolio, advising on the sale of generation assets, modelling of long-term turbine maintenance costs, and the valuation of complex power contract.

Assisted the lenders on valuation and strategy related to AES' turn-back of the Granite Ridge Power Plant to the lender group.

Advised the bank and lender group on valuation and strategy related to the bankruptcy of the Kendall Power Plant.

ASSET APPRAISALS

Prepared a valuation of a large eastern coal plant as a third party appraiser required in a transaction where the lessee wanted to exercise a buy-back provision in a sale lease-back agreement.

Prepared a valuation of a California cogeneration plant for the purposes of identifying the tax loss.

Completed an appraisal to support the transfer of the Trans Bay Cable from the development arm to a separate fund managed by the infrastructure fund. The appraisal addressed the California power markets, operations of the CA ISO high voltage transmission and a forecast of revenues given the FERC and CA-ISO regulatory schemes as part of the income approach. The appraisal also incorporated a comparable sales and replacement cost analysis.

Developed an appraisal of a nuclear power plant based upon discounted cash flow, replacement costs, and comparable sales as part of an effort to determine the fair market value under a lease agreement that contained a buy-back provision.

Completed multiple appraisals of the KeySpan generation assets on Long Island that were subject to a generation repurchase agreement with LIPA. The appraisals were part of the ongoing process for KeySpan to develop a strategy to address the LIPA repurchase option.

Development of an Independent Market Expert Report to support the financing of the Kemper IGCC plant including an analysis of the regulatory structures being relied upon to support cost recovery as well as wholesale electric prices to support wholesale power sales.

ELECTRIC GENERATION FINANCE SUPPORT

Market expert report for the Landfill Energy Systems, a national 66 MW portfolio of fourteen landfill gas power plants. The market expert report included a discussion of the key attributes of each of the power markets that the portfolio encompasses, long-term forecasts of wholesale electricity prices, and forecasts of gross margins.

Independent Market Expert Report to support the financing of the repowering and development of a fleet of combined cycle and simple cycle power plants in the ERCOT market. The independent market expert report was used to support the syndication of loans and obtaining debt ratings associated with investing over $1 billion in the Barney Davis, Nueces Bay, and Laredo Energy Center facilities.

Independent Market Expert Report to support the financing of Sequent Power's purchase of the Wolf Hollow 730 MW combined cycle power plant located in ERCOT. The report was used to support the syndication and rating of over $400M of primary and mezzanine debt. The report incorporated forecast of gross margins for both the contracted and non-contracted portions of the facility as well as providing a detailed description of the ERCOT market conditions and key assumptions to the financial analysis.

Independent Market Expert Report to support the financing of Invenergy's purchase of the partially completed Grays Harbor 620 MW combined cycle power plant located in the Pacific Northwest. The report was used to support the syndication and rating of over $100M of debt. The analysis included valuing both hedged and unhedged positions for the facility and conducting extensive due diligence regarding how NW power markets are likely to evolve and the role of independent power in a market dominated by vertically integrated public and investor-owned utilities.

Independent Market Report to support the refinancing of the Dynegy corporate revolver. The effort included analysis of multiple U.S. power markets, valuation of the fleet of generation assets and associated contracts, and review of regulatory conditions impacting the Company's ability to realize earnings in markets with competitive auctions to serve load.

© PA Knowledge Limited

Multiple forecasts of California power market prices including support of a bid for a cogeneration facility located in the San Francisco Bay area and sale of La Rosita.

Forecast of the New England power markets to support a bid for the First Light Generation Assets.

Forecast of the California and SPP power markets to support a bid for assets from the EIF portfolio.

Analysis of the ERCOT, PJM and MISO markets for multiple bids for merchant gas fired generation plants.

Development of multiple Confidential Information Memorandums to support the sale of power plants. CIMs included description of the wholesale power markets and summaries of the key attributes of the assets to be sold in auction.

Preparation of sale offering of the Audrain power plant in response to Ameren solicitation to acquire new resources. Effort included evaluation of likely competitors and the development of the bid strategy.

Advise on pricing for offering power contracts as well as the sale of gas-fired combined cycle power plant in the South-East. Pricing and sale price based upon projections of the value of the power plant as a merchant unit, assessment of potential competitors, and the analysis of transmission constraints.

ELECTRIC MARKETS RISK MODELING

Provided support to a bond insurance company to prepare an assessment of the distribution of income from a fleet of peaking power plants in the South-East. Analysis used to review the provision for loss reserves.

Supported a bond insurance agency in determining the probability that a fleet of Mid-West generation assets would generate insufficient cash to meet debt payments and reserve requirements.

Developed an Excel based model for a mid-west public utility to assist in developing annual targets for the amount of surplus generation capacity to be sold as merchant and in contracts of varying tenor. The model was integrated into the corporate financial model to assist in identifying the appropriate risk profile to support building the reserve fund and to delay future rate increases.

DSM ADVISORY SERVICES

Advised Con Edison on the status of electric decoupling and incentive mechanisms in the United States as part of the New York state initiative to reintroduce decoupling.

Advised a private equity fund on the status of demand side management in New England, likely projections of growth, and probability of successful implementation as part of an evaluation of long-term supply and demand conditions in the New England electric markets.

Worked with Montana-Dakota utilities regarding the incorporation of projections of demand side management potential into the utility's long-term resource plan.

ADDITIONAL EXPERIENCE – EXPERT TESTIMONY

Before the Public Utilities Commission of Nevada, Direct Testimony and Exhibits of James A. Heidell in the Application of Nevada Power Company d/b/a NV Energy for authority to adjust its annual revenue requirement for general rates charged to all classes of electric customers and for relief properly related thereto, Docket No. 25-02016. Testimony addressing the prudence of costs associated with the construction of the Silverhawk Capacity Project and the Reid Gardner BESS project.

Before the Public Service Commission of Wisconsin, Direct Testimony and Exhibits of James A. Heidell in the Application of Madison Gas and Electric Company for Authority to Adjust Electric and Natural Gas Rates, Docket 3270-UR-126. Testimony on the development of the electric and natural gas sales forecasts.

Before the North Dakota Public Service Commission, Direct Testimony & Rebuttal Testimony and Schedules of James A. Heidell, In the Matter of Otter Tail Power Company Advance Determination of Prudence – Astoria Station Onsite Fuel Inventory System, Case No. PU-23-066.

Before the North Dakota Public Service Commission, Direct Testimony & Rebuttal Testimony and Schedules of James A. Heidell, In the Matter of Otter Tail Power Company Advance Determination of Prudence – Astoria Station Onsite Fuel Inventory System, Case No. PU-23-066.

© PA Knowledge Limited

Before the Louisiana Public Commission, Direct Testimony and Schedules of James A. Heidell in Re: Application of 1803 Electric Cooperative, Inc. For Approval of Power Purchase Agreements and For Cost Recovery, Docket No. U-35927.

Before the North Dakota Public Service Commission, Direct Testimony and Schedules of James A. Heidell, In the Matter of Northern States Power Company Advance Prudence – Heartland Divide II Wind Project, Case No. PU-20-433.

California-American Water Company, a California Corporation; Monterey County Water Resources Agency, Plaintiffs, vs. Marina Cos Water District; RMC Water and Environment, a California Corporation; and DOES 1 through 10, inclusive, Defendants, Case No. CGC-15-546632. Report and Deposition on behalf of RMC Water and Environment addressing alleged economic damages as a result of a cancelled desalination project.

Before the Hawaii Public Service Commission, Direct Testimony of James A. Heidell, Docket No. 2017-0105 In The Matter Of The Application of Hawaii Gas Company Application for a General Rate Increase. Testimony on behalf of Hawaii Gas addressing rate spread and rate design.

Before the North Dakota Public Service Commission, Direct Testimony and Schedules of James A. Heidell, In the Matter Of Otter Tail Power Company Advance Determination of Prudence Astoria Natural Gas Project, Merricourt Wind Project and Certificate of Public Convenience and Necessity Merricourt Wind Project, Case Nos. PU-17-140, PU-17-141, & PU-17-143,

Before the North Dakota Public Service Commission, Direct Testimony and Schedules of James A. Heidell, In the Matter Of Northern States Power Company Advance Prudence – Dakato Range Wind Project, Case No. PU-17-372.

Before the North Dakota Public Service Commission, Direct Testimony and Schedules of James A. Heidell, In the Matter Of Northern States Power Company Advance Prudence – 1,550 MW Wind Portfolio, Case No. PU-17-120.

Before the North Dakota Public Service Commission, Direct Testimony and Schedules of James A. Heidell, In the Matter Of Northern States Power Company Advance Prudence – BIOMASS APPLICATION FOR DEFERRED ACCOUNTING, Case Nos. PU-17-270, PU-17-271, & PU-17-322.

Before the North Dakota Public Service Commission, Direct Testimony and Schedules of James A. Heidell, In the Matter Of Northern States Power Company A Minnesota Corporation D/B/A XCEL Energy Jurisdictional Cost Allocation Matters, Case Nos. PU-12-813 et. al.

Before the Arizona Corporation Commission, Direct and Settlement Testimony Of James A. Heidell, Docket No. E-01345A-16-0036 and Docket No. E-01345A-16-0123 In The Matter Of The Application of Arizona Public Service Company for a Hearing to Determine the Fair Value of the Utility Property of the Company for Ratemaking Purposes, To Fix a Just and Reasonable Rate of Return Thereon, To Approve Rate Schedules Designed to Develop Such Return.

Before the Public Utilities Commission of Nevada, Direct and Rebuttal Testimony Of James A. Heidell, Docket No. 16-06006, In The Matter of the Application of Sierra Pacific Power Company, d/b/a NV Energy, Filed pursuant to NRS 704.110(3), addressing its annual revenue requirement for general rates charged to all classes of Electric customers.

Amana Society, Inc. and Amana Farms, Inc. v. GHD, Inc. and Excel Engineering, Inc. Testimony on behalf of GHD, INC regarding the economic performance of a manure digester and evaluation of claims of damages by Amana. Expert Report 2012, Jury Trial September 2012.

Affidavit of James A. Heidell & Mark Repsher, Appropriate Approach to Calculating the Weighted Cost of Capital, Docket No. ER14-2940-0000, U.S. Federal Energy Regulatory Commission, October 15, 2014.

Affidavit of James A. Heidell & Mark Repsher, on behalf of Peabody Energy Corporation to stay the final Clean Power Plan rule, September 9, 2015.

© PA Knowledge Limited

Declaration and report of James A. Heidell & Mark Repsher, Utility and Allied Petitioners' motion to stay the final Clean Power Plan rule, October 16, 2015.

City of Rochester, Minnesota v. Southern Minnesota, State of Minnesota, County of Olmsted File No: 55-C3-05-002712. Testimony on behalf of the City of Rochester regarding the interpretation of a power contract. Testimony and deposition 2008.

Before the Public Service Commission of Maryland, Rebuttal Testimony of James A. Heidell, Case No. 9173, Phase II In The Matter Of The Current And Future Financial Condition Of Baltimore Gas And Electric Company.

Before the Indiana Utility Regulatory Commission, Rebuttal Testimony in Northern Indiana Public Service Company's request to raise rates in Cause No. 43526. Testimony on behalf of the utility related to ratchets and other mechanisms appropriate to recover costs allocated to large energy using customer classes.

Before Public Service Commission of the State of North Dakota, Direct and Rebuttal Testimony in Montana Dakota Utilities Co., and Otter Tail Corporation; Advance Determination of Prudence, Big Stone II Generating Station Case Nos. PU-06-481 and PU-06-482. On behalf of Montana-Dakota Utilities. 2007 & 2008. On behalf of Montana-Dakota Utilities.

Before the Public Service Commission of the State of Montana, Direct and Rebuttal Testimony in Montana-Dakota's General Rate Case – Marginal Cost of Service Study, Docket No. D2010.8.82. On behalf of Montana-Dakota Utilities.

Before the Public Service Commission of the State of Montana, Direct and Rebuttal Testimony in Montana-Dakota's General Rate Case – Marginal Cost of Service Study, Docket No. D2007.7.79. On behalf of Montana-Dakota Utilities.

Before the Minnesota Public Utilities Commission, Direct and Rebuttal testimony on behalf of Montana-Dakota Utilities regarding a Certificate of Need for the Big Stone II Power Plant, Docket No. CN-05-619. On behalf of Montana-Dakota Utilities.

Before the Ontario Electric Board, Expert Report regarding the 2006 Electric Rate Distribution Handbook and Rate Mitigation, on behalf of Hydro One Networks, Inc. January 2005.

Before the Washington Utilities and Transportation Commission, Direct Testimony in 2004 General Rate Case Regarding Electric Cost of Service & Rate Design and Gas Rate Design, April 2004. On behalf of Puget Sound Energy.

Before the Washington Utilities and Transportation Commission, Direct Testimony in 2001 General Rate Case Regarding Electric Cost of Service & Rate Design, November 2001. On behalf of Puget Sound Energy.

Before the Washington Utilities and Transportation Commission, Testimony Regarding the Need for a Special Competitive Rate for Intel. Docket No. UE-960299, 1996. On behalf of Puget Power.

Before the Washington Utilities and Transportation Commission, Rebuttal Testimony in the Merger of Puget Power and Washington Natural Gas Regarding Electric Rates, Docket Nos. UE-95-1270 & UE-960185, 1995. On behalf of Puget Power.

CGC Exhibit No. JAH-3

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	**:**	**Docket No. P-2026-3060298**

JSA Set 2, No. 4

The prefiled direct testimony of David M. Young (identified as FE PA Statement No. 1) states:

"Instead, excess energy from intermittent net-metered customer generators is recognized financially as an aggregate reduction of the load served by winning bidders in the Company's default service auctions. That load reduction is submitted to PJM and credited to the applicable Rate District at the LMP." (17:12-15.)

With respect to this testimony:

a. *Identify*, describe, and explain the mechanism by which excess energy from net- metered customer-generators is "recognized financially as an aggregate reduction of the load served by winning bidders in the Company's default service auctions." Please fully explain and provide all *Documents* that support, are utilized, and/or relied upon in your response.
b. *Identify*, describe, and explain how *FirstEnergy* recovers the difference between what it pays for excess generation at the PTC Rider rate and what is "recognized financially as an aggregate reduction of the load served by winning bidders in the Company's default service auctions." Please fully explain and provide all *Documents* that support, are utilized, and/or relied upon in your response.
c. *Identify*, describe, and explain the mechanism by which load reduction due to excess energy from net-metered customer-generators is "submitted to PJM and credited to the applicable Rate District at the LMP." Please fully explain and provide all *Documents* utilized and/or relied upon in your response.
d. *Identify*, describe, and explain whether *FirstEnergy* is required by any of its default service supply agreements to pay suppliers fixed or unavoidable charges when the aggregate demand for default service supply is reduced in

aggregate by net-metered customer generators utilized by default service customers. Provide all *Documents* that support, are utilized, and/or relied upon in your answer.

e. *Identify*, describe, and explain how *FirstEnergy* determines how many kW and kWh its default supply customers consume in a billing period. Explain in detail and provide all *Documents* that support, are utilized, and/or relied upon in your response.

f. *Identify*, describe, and explain any reconciliation process that *FirstEnergy* uses to address the differences of metered customer loads and other measured loads as compared to the load that default service providers are responsible for, and how line losses are handled. Explain in detail and provide all *Documents* that support, are utilized, and/or relied upon in your answer.

g. *Identify*, describe, and explain the contract settlement point for *FirstEnergy's* existing default supply contracts. Explain in detail and provide all *Documents* that support, are utilized, and/or relied upon in your response.

h. *Identify*, describe, and explain whether the settlement point varies by default supply procurement provider or by *PTC Rider / HP Rider* customer groups. Explain in detail and provide all *Documents* that support, are utilized, and/or relied upon in your response.

RESPONSE:

a) The net metering mechanism is part of a financial netting paradigm rather than a physical load netting paradigm. Customers are measured on an hourly basis as either a load where FE PA has delivered power to the customer or as injection where FE PA receives energy onto the distribution system from the customer. When a customer has produced energy from a net meter project for a given hour, the resulting load reduction is credited to the customer at full retail rate by their respective retail supplier. Further, that load reduction is submitted to PJM under the account of the load serving entity ("LSE") with the obligation to recognize the load reduction and credit is given to the LSE valued at the locational marginal price ("LMP").

b) Depending on the customer, the differences are recovered through the PTC or HP riders since both the load reduction credits from PJM and the payments to customers with excess generation run through either the PTC or HP Riders.

c) Load reduction credits for all non-shopping load is aggregated together into one hourly schedule for a monthly period and submitted to PJM. This schedule is created by pulling metered data for all customers from FE PA's settlements system.

d) FE PA is not required to pay unavoidable charges when net demand is reduced.

e) Default customer usage is read by the meters and collected by FE PA billing systems which allows for monthly billing to occur.

f) There is no reconciliation required as the default service suppliers are invoiced by the Company based on the metered loads for default service customers.

g) Supplier hourly load submitted to PJM is extracted from FE PA's settlement system for the calendar month. This supplier volume is compared to the supplier's PJM in schedules to ensure accuracy. The volume is derated for losses and multiplied by their fixed contract price to get to the monthly dollar amount. All three default service customer classes follow this process. However, the industrial class can also include a variable component in their payment. In this case, the hourly load is multiplied by the settled verified LMPs for the residual aggregate in the zone.

h) Industrial class default service suppliers are paid LMP plus a $4 adder for each hour, which we are proposing to eliminate in the current default service proceeding. Each of the Company's Rate Districts has different LMPs but each default service supplier within each Rate District would receive the same hourly price.

CGC Exhibit No. JAH-4

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	**:**	**Docket No. P-2026-3060298**

CGC Set 3, No. 1

1. Please reference FirstEnergy's response to CGC Set I, No. 4(ii):

   i. How many of the 1,312 identified applications and how many total megawatts ("MW") has FirstEnergy completed standard small generator interconnection agreements with? Please provide a live Excel spreadsheet of the requested information with personally-identifiable customer information redacted.

   ii. How many of the 1,312 applications and how many total MWs has FirstEnergy completed load study agreements with wherein the applicant has paid the associated fee(s)/charges? Please provide a live Excel spreadsheet of the requested information with personally-identifiable customer information redacted.

   iii. How many of the identified 1,312 applications and how many total MWs has FirstEnergy completed System Impact Studies for which the applicant has paid the initial 10% payment associated with a Construction Services Agreement? Please provide a live Excel spreadsheet of the requested information with personally-identifiable customer information redacted.

RESPONSE:

See FE PA Response to CGC Interrogatory Set 3, No. 1, Attachment A. Please note that the Company served a revised response to CGC Interrogatory Set 1, No. 4 on April 13, 2026, that corrects the number of applications from 1,312 referenced in this question to 1,285.

CGC Exhibit No. JAH-5

Petition of FirstEnergy Pennsylvania	**:**	
Electric Company for Approval of a	**:**	**Docket No. P-2026-3060298**
Default Service Plan for the Period	**:**	
June 1, 2027 to May 31, 2031	**:**	

CGC Set 2, No. 5

Please explain what the anticipated default service revenues and receipts each program year of DSP VII are projected to be and provide the basis and any underlying calculations for those conclusions.

RESPONSE:

FE PA is unable to forecast default service revenues or receipts as it cannot reliably predict or anticipate what the future price-to-compare will be due to unknown economic and other risk factors.

CGC Exhibit No. JAH-6

Petition of FirstEnergy Pennsylvania	**:**	
Electric Company for Approval of a	**:**	**Docket No. P-2026-3060298**
Default Service Plan for the Period	**:**	
June 1, 2027 to May 31, 2031	**:**	

CGC Set 1, No. 011

Please reference FirstEnergy St. No. 1, pp. 18-19. Has FirstEnergy conducted any studies or analyses of the effects of the MRPL tariff proposal on FirstEnergy's default procurement of electricity based on its Default Service Plan ("DSP")? If yes, please provide all studies or analyses related to the same.

RESPONSE:

No, FE PA has not completed any quantitative studies or analyses of the effects of the MRPL tariff proposal on its proposed procurement plan for DSP VII.

CGC Exhibit No. JAH-7

Petition of FirstEnergy Pennsylvania	**:**	
Electric Company for Approval of a	**:**	**Docket No. P-2026-3060298**
Default Service Plan for the Period	**:**	
June 1, 2027 to May 31, 2031	**:**	

JSA Set 2, No. 3

The prefiled direct testimony of David M. Young (identified as FE PA Statement No. 1) states:

"FE PA's proposed methodology includes both demand and supply impacts to ensure that large customer-generators are grouped with other large customers for default supply procurement purposes." (17:3-5.)

With respect to this testimony:

a. *Identify*, describe, and explain what "large customer-generators" Mr. Young is referring to in this statement.
b. *Identify*, describe, and explain what "other large customers" Mr. Young is referring to in this statement.
c. *Identify*, describe, and provide any analysis, review, study, evaluation, etc. that *FirstEnergy* has conducted in the last 5 years addressing the type and level/amount of impact that "large customer-generators" have on default supply procurement as compared to non-large customer-generators.

RESPONSE:

a) Mr. Young is referring to "large customer-generators" as any customer generator with a demand greater than 100 kilowatts ("kW") or a Maximum Registered Peak Load of greater than or equal to 100 kW.
b) Mr. Young is referring to "other large customers" as commercial and industrial customers with demand greater than 100 kW or a Maximum Registered Peak Load greater than or equal to 100kW.
c) No quantitative studies of the historical impact that large customer-generators have had on default supply procurement have been conducted.

CGC Exhibit No. JAH-8

Petition of FirstEnergy Pennsylvania	**:**	
Electric Company for Approval of a	**:**	**Docket No. P-2026-3060298**
Default Service Plan for the Period	**:**	
June 1, 2027 to May 31, 2031	**:**	

CGC Set 1, No. 019

Please reference FirstEnergy St. No. 1, p. 17, lines 15-18.

i. Fully explain and provide any documentation or data relied on for the assertion "adding large customer-generator supply to the commercial procurement group would decrease load provided by default service suppliers and would increase risk premiums included in fixed-price full requirements products."
ii. Have any default service providers informed FirstEnergy that they are building in "risk premiums" into their bids as a result of net-metering generation? If yes, please fully explain and provide documentation regarding the same.
iii. If the answer to 18(ii), supra, is yes, please fully explain the level of risk premium(s) identified in default service supply bids as a result of net-metering generation and provide all documentation and data relied on for these assertions.

RESPONSE:

i. The addition of customer-generator supply introduces uncertainty in the net load to be served that cannot be fully hedged using standard wholesale market instruments, particularly where such load may be concentrated in peak or high-price periods, creating asymmetric exposure for suppliers. Suppliers reflect this type of volumetric, shape and migration risk in fixed-price full requirements products through risk premiums, consistent with standard industry practice.
ii. No, not applicable.
iii. N/A.

CGC Exhibit No. JAH-9

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	**:**	**Docket No. P-2026-3060298**

OCA Set 2, No. 25

Reference FE PA Exhibit NEP-1.

a. Please provide the exhibit in live Excel spreadsheet format with all formulae intact alongside all raw data and calculations that were utilized in creating FE PA Exhibit NEP-1.
b. Please provide the workpapers that show the derivation of each entry on each row (auction) in each column ([A] through [T]).
c. FE PA Exhibit NEP-1 calculates a negative risk premium for some auction products (e.g., Met-Ed January 2022 12-month commercial auction with delivery starting on June 1, 2022). Please explain how suppliers can bid 16.42 percent below the estimated no-risk price.
d. FE PA Exhibit NEP-1 calculates risk premiums in excess of 60 percent for some auction products (e.g., West Penn Power April 2023 24-month commercial auction with delivery starting on June 1, 2023). Does FE PA and/or Dr. Powers find risk premiums in excess of 60 percent to be "reasonable" and to reflect "expected wholesale market conditions" (FE PA Statement No. 3, p. 11, lines 9-11)?
e. In general, what is the largest auction risk premium (in percentage terms and/or in $/MWh) that FE PA and/or Dr. Powers would find reasonable and reflective of expected wholesale market conditions, above which FE PA and/or Dr. Powers would find the risk premium to be excessive?

RESPONSE:

a. - b. See FE PA Response to OCA Interrogatory Set 2. No. 25, Attachment A.

c. With respect to auction products showing a negative estimated risk premium, including the Met-Ed January 2022 12-month commercial auction for the period beginning June 1, 2022, that result indicates only that the auction clearing price fell below the estimated no-risk benchmark used in the exhibit. It does not imply that suppliers knowingly bid below their actual expected cost. The benchmark is an estimate constructed from market-based inputs and simplifying assumptions described in FE PA Statement No. 3 and FE PA Exhibit NEP-1 notes, and differences between that benchmark and the

auction clearing price can arise in individual auctions because the benchmark is not a direct measure of any supplier's internal expected cost or bid formation.

d. With respect to auction products showing relatively high estimated risk premiums, including values above 60 percent in isolated cases, Dr. Powers' testimony did not conclude that each individual auction result, viewed in isolation, independently established a "reasonable" risk premium threshold. Rather, his conclusion was based on the results of the analysis as a whole, which showed that auction prices generally tracked expected wholesale market conditions, and that average estimated risk premiums were modest over the period studied.

e. Dr. Powers did not identify in his testimony any single percentage or $/MWh value above which an auction risk premium would necessarily be deemed "excessive." The reasonableness of any individual result depends on the surrounding market context, the limitations of the benchmark estimate, and the fact that the benchmark may not capture all supplier costs or all sources of uncertainty reflected in bids.

CGC Exhibit No. JAH-10

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	**:**	**Docket No. P-2026-3060298**

JSA Set 2, No. 8

The prefiled direct testimony of David M. Young (identified as FE PA Statement No. 1) states:

"Classifying default service customers based on demand and MRPL avoids the risks associated with reduced load for commercial customers on the PTC Rider and potential subsidization of large customer generators by smaller commercial retail customers." (17:21-18:2.)

With respect to this testimony:

a. *Identify*, describe, and explain the "risks associated with reduced load for commercial customers on the PTC Rider" in the context of this statement. Provide all documents utilized and/or relied upon in your response.
b. Provide all *Documents*, workpapers, and analyses *FirstEnergy* has performed, in their original format with formulas intact, that quantify any "potential subsidization" of large customer-generators. If *FirstEnergy* has not performed any analyses on this issue, *identify*, explain, and describe the source of the support and basis for this statement.
c. Has *FirstEnergy* conducted any analysis assessing the impact of classifying default service customers based on demand and MRPL will have on purported risks associated with reduced load for industrial customers on the *HP Rider*? If yes, please provide all *Documents* related to the same.

RESPONSE:

a) In the context of the referenced portion of Mr. Young's direct testimony, the risk for commercial customers on the PTC Rider is that excess generation from large commercial generators will continue to increase the compensation paid to those customer-generators at the PTC Rider rate and recovered from other commercial default service customers. This will cause the true-up expense to continue to escalate and make other customers within the Commercial class fund this true-up expense.
b) See FE Response to OSBA Set 1, No. 4, Attachment A.

c) FE PA has not conducted any quantitative analysis of the impact of the Company's MRPL proposal on industrial customers on the HP Rider.

CGC Exhibit No. JAH-11

Petition of FirstEnergy Pennsylvania	**:**	
Electric Company for Approval of a	**:**	**Docket No. P-2026-3060298**
Default Service Plan for the Period	**:**	
June 1, 2027 to May 31, 2031	**:**	

CGC Set 1, No. 013

Please reference FirstEnergy St. No. 1. Has FirstEnergy contacted any net-metering customer-generators – or prospective net-metering customer-generators – that would be affected by the MRPL tariff proposal to determine the proposal's effect on net-metering project viability?

i. If yes, please generally explain the responses received by potentially affected net-metering customer-generators or prospective net-metering customer-generators.
ii. If not, please explain why not.

RESPONSE:

No, it would be premature for FE PA to communicate any proposed changes at this stage. Should the MRPL tariff proposal be approved by the Pennsylvania Public Utility Commission, FE PA will timely communicate those changes with affected customers.

CGC Exhibit No. JAH-12

Petition of FirstEnergy Pennsylvania Electric Company for Approval of a Default Service Plan for the Period June 1, 2027 to May 31, 2031	**:**	**Docket No. P-2026-3060298**

JSA Set 1, No. 12

For each interconnection applicant *Identified* in the answer to *JSA ROG: I-11* state:

a. The nameplate capacity (MW-AC) of the proposed generating system.

b. Whether the application is inactive, active (i.e., in-study), or completed (i.e., fully interconnected and operational).

c. Whether the application has received *Commission* approval for net metering eligibility.

d. Whether the applicant has submitted a countersigned interconnection study agreement and standard small interconnection agreement to *FirstEnergy*.

e. Whether the applicant has submitted a countersigned construction services agreement to *FirstEnergy*.

f. Whether the applicant has paid 10% of the cost estimate as provided in the construction services agreement.

g. Whether the applicant has paid an additional 40% of the cost estimate as provided in the construction services agreement following completion of engineering and design work by *FirstEnergy*.

h. Whether the applicant has paid the final 50% of the cost estimate as provided in the construction services agreement following *FirstEnergy's* procurement of necessary materials to commence construction of utility upgrades.

i. Whether the applicant has submitted commissioning and/or witness

test results and a certificate of completion to *FirstEnergy*.

j. Whether the applicant has been issued approval to operate from *FirstEnergy*.

RESPONSE:

a. – j. See FE PA Response to JSA Interrogatory, Set 1, No. 12, Attachment A.
