

BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

Application of Transource Pennsylvania, LLC filed
Pursuant to 52 Pa. Code Chapter 57, Subchapter G,
for Approval of the Siting and Construction of the
230 kV Transmission Line Known as Project 9A West
in a Portion of Franklin County, Pennsylvania
Docket No. A-2026-3062686

PETITION TO INTERVENE OF Colby and Leah Nitterhouse, PRO SE

TO THE PENNSYLVANIA PUBLIC UTILITY COMMISSION:

Pursuant to 52 Pa. Code §§ 5.71-5.76, Colby and Leah Nitterhouse (hereinafter “Petitioner”) hereby files this formal Petition to Intervene, pro se, in the above-captioned proceeding, and in support thereof respectfully represents:

1. The Petitioner is an individual property owner owning real estate located at 2479 Newcomer Rd, Chambersburg, PA 17202. The affected property is officially designated as Tax Parcel ID / UPI: **10-0D15.-002.-000000**.
2. Service of all papers, dockets, and communications in this proceeding should be directed to the Petitioner at the address listed above, or via email at [Insert Landowner Email Address].
3. The Petitioner’s interest in this proceeding is direct, substantial, and immediate. The proposed high-voltage 230 kV transmission line corridor, as planned by Transource Pennsylvania, LLC under Docket No. A-2026-3062686, threatens to directly traverse, encumber, and physically bisect the Petitioner’s real property.
4. The Petitioner formally requests that this Siting proceeding be held in abeyance until the antecedent CPC Application (Docket No. A-2026-3062675) is finally decided. Under the Commission’s MARL Interlocutory Order (June 1, 2026), a siting application filed concurrently with a CPC application is premature. Moving forward now forces local landowners to prematurely engage in costly litigation on the routing merits, directly violating our due process rights.
5. If this docket is litigated on the merits, the permanent presence of the proposed structures within the right-of-way will inflict unique, irreparable harm on the Petitioner’s property, including subsurface soil compaction, interference with precision GPS field

equipment, destruction of agricultural land, induced stray voltage risks to livestock, and severe diminution of property value.

6. The Petitioner's unique property and operational interests are not adequately represented by any existing participant. Participation by the Petitioner is necessary to build a localized record regarding the environmental public trust (Article I, Section 27) and structural/karst viability of this specific corridor.

WHEREFORE, the Petitioner, Colby and Leah Nitterhouse, pro se, respectfully requests that the honorable Pennsylvania Public Utility Commission grant this Petition to Intervene, and afford the Petitioner full active party status in this docket.

Respectfully submitted,

Date: July 16, 2026
