Necessary to Operate Transmission Facilities :	
for Project 9A West and for any Other :	
Approvals Necessary :	

PETITION TO INTERVENE

Before the Pennsylvania Public Utility Commission (Commission), pursuant to 52 Pa. Code Sections 5.71 through 5.74, [*Print Name of Petitioner*] Anne H. Finucane
 hereby files this Petition to Intervene in the above-captioned Application. In support thereof, [*Print Name of Petitioner*] Anne H. Finucane states as follows:

1. **Name and contact information of the Petitioner.** [*Provide name and address of Petitioner.*]

Anne H. Finucane

2760 Springview Dr., Chambersburg PA 17202

2. **Name and contact information of Petitioner's attorney.** [*Provide names and addresses of Petitioner's attorneys. If none, clearly state "No attorney representation."*]

No attorney representation

3. **Set out clearly and concisely the facts from which the alleged intervention right or interest of the Petitioner can be determined. 52 Pa. Code § 5.73(a)(1).**

[*Explain why the utility's proposal affects you and/or your interests. For example, you may have an interest in this proceeding as a utility ratepayer, a landowner, a resident near the facilities,*

and/or a business owner.] _____ The home I have owned for 40 years adjoins the land through which the proposed Transource line would be constructed.

4. **State the grounds of the proposed intervention. 52 Pa. Code § 5.73(a)(2).**

The application Transource has filed with the PUC, is filled with details listing the many concerns that our government has incorporated into law in order to protect us, the citizens, and the environment, from harm.

It took a lot of paper for Transource to detail the natural and archeological resources, historic buildings, schools that this line comes near. And there's testimony from others, as well, including our State Secretary of the Dept of Agriculture, who described our farmland as "...some of the richest and most productive agricultural land in the world", as he talked about the preserved farms, and agricultural resources, that would be disrupted by the line.

In their own siting guidelines, Transource speaks of the need to maximize the distance from residences and schools (such as our Falling Spring Elementary School), and the need to minimize the visibility from scenic roadways (such as Springview Drive), and to minimize conflict with recreation lands (such as our school' district's cross country track) and natural areas (such as our nationally known Falling Spring trout stream).

So they *know* about all these things that we are saying are threatened – and what I didn't find anywhere in that huge document - what I don't see them saying - is that the line *is* far enough away from any of these things to allay our concerns. It's really clear as you follow their description, mile by mile, with all the twists and turns this project takes, that they are taking a project that they'd hoped would bulldoze its way down a sparsely populated, sleepy little valley, and they're trying to fit it in and around a richly populated environment, full of dozens and dozens of resources that our government wants to protect for us – and full of people who are willing to fight to protect it.

There are hundreds of parcels of land that it would go through, owned by hundreds of different entities – from a big box store and a bank, to the Owls Club of Waynesboro! – but mostly many, many individuals who love and need their homes undisturbed. Transource speaks of the need to minimize the number of times the line would cross existing power lines – and I counted 13 such crossings in the 29 miles (p.26 -28) – sometimes crossing one line, multiple times!

They speak of the need to minimize its effect on wetlands, and still it crosses 13 designated streams, including one High Quality CWF. They include maps showing the karst formations throughout the valley – and make no attempt to hide the fact that they are prevalent, and, as expected, create sinkholes.

So what does this mean? In my 40 years living on Springview Drive I have walked hundreds of times through the field across the road – owned by the Leshner family – and have seen that the fields where one or more towers will be placed, are riddled with sinkholes. They work to fill them every winter! Does this sound safe?

And in describing the route they use the phrase "turns sharply" 7 times. This is not a barren, empty landscape. This is a rich and culturally complex environment.

5. **State Petitioner's position on the issues in the proceeding. 52 Pa. Code § 5.73(a)(3).**

I do not believe the need has been proven for this project, not do I believe it is safe for our residents (and the many dairy herds whose grazing lands it will cross). It does not comply with the statues and regulations that our state government has created for us, to protect the natural resources of the Commonwealth. There is no denying that it will have an adverse affect on our region.

6. **Service on Petitioner**

For the purposes of receiving communications from the Commission and from the parties to this proceeding regarding the intervention, if the intervention is granted, [*Print Name of Petitioner*]

Anne H. Finucane agrees to (*check one*):

☐ [*] Open and use a Commission eFiling account and receive eService

☐ [] Receive all documents by email at: [email]

** Petitioner acknowledges documents cannot be filed via email.

☐ [] Receive all documents by First Class Mail at the above-listed address

7. **Verification and Signature**

Pursuant to 52 Pa. Code Section 1.36, I, [*Print Name of Petitioner*] Anne H. Finucane hereby state that the facts above set forth are true and correct to the best of my knowledge, information, and belief, and that I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. §4904 (relating to unsworn falsification to authorities).

Date

8. **Relief Requested**

[*Print Name of Petitioner*] Anne H. Finucane requests that the Commission grant this Petition to Intervene in the Application and respectfully requests that the Public Utility Commission to hold hearings concerning the filing of Transource's

application, to hear from others their concerns, especially those who could not submit a letter such as this. We need to show Transource the magnitude of our population's opposition to their power line, and ultimately, we need the PUC to deny their application.

9. **Signature and Date**

Respectfully submitted,

[Signature of Petitioner]

Anne H. Finucane
