to furnish electric transmission service :
in Greene and Fayette Counties, Pennsylvania :
and for related approvals : Docket No. A-2026-3060921

**INTEVENOR CHARITY GRIMM KRUPA'S
PREHEARING CONFERENCE MEMORANDUM**

Intervenor Charity Grimm Krupa, individually and in her official capacity
as the duly elected Pennsylvania State Representative for the 51st Legislative
District, respectfully submits this Prehearing Conference Memorandum.

I. HISTORY OF PROCEEDINGS

NextEra Energy Transmission MidAtlantic, Inc. ("NEET MA") filed the
above-captioned Applications seeking authority to construct and operate the
MidAtlantic Resiliency Link ("MARL") Project.

On May 1, 2026, Intervenor Charity Grimm Krupa filed a Petition to Intervene in these proceedings.

II. ISSUES REPRESENTATIVE KRUPA INTENDS TO PRESENT

Intervenor Krupa presently anticipates presenting evidence and/or legal argument concerning, among other matters:

a. Whether NEET MA has met its burden of demonstrating that the proposed MARL Project is necessary and serves the public convenience, public interest, and public necessity.

b. Whether the Applicant has adequately evaluated reasonable routing alternatives, including alternatives that would lessen impacts upon landowners, municipalities, agricultural operations, environmentally sensitive areas, and existing communities.

c. Whether the Applicant has demonstrated that the proposed routing represents the least intrusive and most reasonable alternative available.

d. The effects of the proposed project upon private property rights, including the necessity, scope, and exercise of eminent domain authority.

e. The cumulative impacts of the proposed project upon Pennsylvania residents, municipalities, emergency services, agriculture, tourism, economic development, tax base, and future land use planning.

f. The environmental impacts associated with construction and operation of the proposed transmission facilities, including impacts to streams, wetlands, forests, wildlife habitat, agricultural lands, scenic resources, and other natural resources.

g. Whether the Applicant has adequately demonstrated the reliability benefits asserted in support of the Project and whether those benefits outweigh the burdens imposed upon affected Pennsylvanians.

h. Whether the Applicant has fully disclosed project costs, alternatives, anticipated benefits, allocation of financial responsibility, and other information necessary for meaningful Commission review.

i. Whether all necessary federal, state, and local approvals, permits, and regulatory requirements have been adequately addressed and the legal significance of any outstanding proceedings affecting this matter.

j. The legal and factual implications of related litigation, including proceedings involving substantially similar transmission projects, to the extent relevant to these Applications.

k. Whether the Applicant has complied with all applicable statutory, regulatory, and procedural requirements governing the issuance of a Certificate of Public Convenience and related approvals.

l. Any issues raised during discovery, through testimony submitted by other parties, or otherwise developed during the course of these proceedings.

m. Any additional issue affecting the public interest that may arise during the course of litigation.

III. PROPOSED WITNESSES

Intervenor Krupa presently anticipates calling:

1. Charity Grimm Krupa.
2. Any individual or representative of an entity that has filed a Petition to Intervene, Protest, Objection, or other responsive pleading in these proceedings.
3. Any witness identified by any party through discovery, prefiled testimony, witness lists, or other required disclosures.
4. Representatives, employees, consultants, experts, contractors, or agents of NextEra Energy Transmission MidAtlantic, Inc.
5. Representatives of state, federal, county, or municipal governmental entities possessing relevant knowledge.
6. Rebuttal witnesses as may become necessary.

Intervenor Krupa expressly reserves the right to call any witness identified by any other party, whether or not separately listed herein, and further reserves the right to supplement or amend this witness list as discovery continues.

IV. PROPOSED EXHIBITS

Intervenor Krupa presently anticipates introducing, among other materials:

1. Discovery responses;
2. Documents produced by any party;
3. Public records; and
4. Any exhibit identified or offered by any other party.

Intervenor Krupa expressly reserves the right to supplement, amend, or modify this exhibit list throughout these proceedings.

V. PROPOSED LITIGATION SCHEDULE

Intervenor Krupa supports a litigation schedule that affords all parties adequate opportunity to complete discovery, prepare testimony, and fully develop the factual and legal record. Intervenor Krupa reserves the right to request modifications to any litigation schedule should circumstances warrant.

VI. CONSOLIDATION OF PROCEEDINGS

Intervenor Krupa agrees with the arguments raised in the Prehearing Memorandum filed on behalf of the Office of Consumer Advocate (“OCA”) regarding the “unwinding” of the consolidation of the Certified Public Utility Application and the Siting Application. Accordingly, Intervenor Krupa adopts those arguments and incorporates the same herein by reference and argues that the Siting Application should be held in abeyance unless and until NEET MA is granted.

VII. PUBLIC INPUT HEARINGS

Intervenor Krupa respectfully requests that the Commission schedule public input hearings in Fayette County to provide affected residents, property owners, local officials, businesses, and other interested stakeholders with a meaningful opportunity to be heard regarding the Applications. The proposed MARL Project has generated extraordinary public interest and concern throughout Fayette County, particularly among those whose

homes, farms, businesses, and communities may be directly impacted by the proposed transmission line and the potential exercise of eminent domain. Residents have expressed concerns regarding property rights, agricultural impacts, environmental resources, public health and safety, electric reliability, community character, and whether the Project is necessary and serves the public interest.

Given the substantial public participation in this proceeding and the significant local impacts alleged by the Applications, public input hearings in Fayette County are essential to ensure that the Commission develops a complete and robust record while affording affected citizens a meaningful opportunity to participate in the administrative process. Because many affected residents may be unable to travel long distances or participate during normal business hours, Intervener respectfully requests that the Commission schedule hearings at times and locations reasonably accessible to the public in order to maximize participation.

In addition, because the Certificate of Public Convenience Application and the Siting Application present distinct legal and factual issues, Intervener Krupa respectfully requests that the Commission consider conducting separate public input hearings for each Application. Separate hearings would provide members of the public with a meaningful opportunity to address the unique issues raised by each proceeding and would assist the Commission in developing a clear and comprehensive record for its consideration.

VIII. RESERVATION OF RIGHTS

Intervenor Krupa expressly reserves all rights available under the Public Utility Code, the Commission's regulations, applicable Administrative Law Judge orders, and any other applicable authority.

Respectfully submitted,

A handwritten signature in black ink that reads "Charity Grimm Krupa". The signature is written in a cursive, flowing style.

Charity Grimm Krupa
