Re: Peoples Natural Gas Company LLC Base Rate Case Filing
Original Tariff Gas – PA PUC No. 49
Original Tariff Gas – PA PUC No. S-5
Docket No. R-2026-3060855

Dear Secretary Homsher:

Enclosed for filing on behalf of Peoples Natural Gas Company LLC ("Peoples" or "the Company"), is Original Tariff Gas – Pa PUC No. 49 ("PA PUC No. 49) and Original Tariff Gas – Pa PUC No. S-5 ("PA PUC No. S-5"), along with all supporting exhibits, standard data responses and testimony required to be submitted in conjunction with a tariff change seeking a general rate increase. In PA PUC No. 49, Peoples is seeking a base rate increase pursuant to 66 Pa. C.S. § 1308 of the Public Utility code with an issue date of March 27, 2026 and an effective date of May 26, 2026.

The Company's filing reflects an overall revenue increase of approximately $163.2 million annually. In this filing, Peoples is updating the normal heating degree days used in the Weather Normalization Adjustment mechanism as described in its current and proposed retail tariffs on page 79.

Pursuant to the customer notification provisions set forth in 52 Pa. Code § 53.45(b)(4), Peoples' filing notice to customers, which includes the most recently effective gas cost rates as of February 12, 2026, provides that if the Company's entire request is approved: the total bill for a residential customer using 86 Mcf per year would increase from $122.20 to $138.23* per month or by 13.1%; the total bill for a commercial customer using 250 Mcf per year would increase from $271.47 to $314.05 per month or by 15.7%; and the total bill for an industrial customer using 1,750 Mcf per year would increase from $1,802.05 to $2,010.68 per month or by 11.6%.

* This amount excludes the Company's proposed defined credit adjustment applicable to residential customers not enrolled in the Customer Assistance Program that is expected to be provided to customers in the first quarters of both 2027 and 2028.

The filing consists of 11 Volumes which include 20 exhibits and is organized as follows:

Volume 1:
- Exhibit 1 Balance Sheet
- Exhibit 2 Income Statement
- Exhibit 3 Revenues
- Exhibit 4 O&M Expenses

Volume 2:
- Exhibit 5 Depreciation Study

Volume 3:
- Exhibit 6 Taxes Other Than Income
- Exhibit 7 Income Taxes
- Exhibit 8 Rate Base
- Exhibit 9 Depreciation
- Exhibit 10 Sales

Volume 4:
- Exhibit 11 Cost of Service
- Exhibit 12 Gas Planning
- Exhibit 13 Rate Design

Volume 5:
- Exhibit 14 Tariffs

Volume 6:
- Exhibit 15 System
- Exhibit 16 Capitalization

Volume 7:
- Exhibit 17 COS Standard Data Requests
- Exhibit 18 ROR Standard Data Requests
- Exhibit 19 RR Standard Data Requests

Volumes 8-9:
- Exhibit 20 Testimony

Volume 10:
- CONFIDENTIAL Materials

Volume 11:
- HIGHLY CONFIDENTIAL Materials

Pursuant to 52 Pa. Code § 1.37(a)(5), also enclosed is a CD containing electronic versions of the documents contained in Volumes 1 through 9. Volumes 10 and 11 are not included on the CD because it contains confidential documents.

By this Letter, Peoples Natural Gas LLC respectfully requests that, in accordance with the standard operating procedure of the Pennsylvania Public Utility Commission, Volumes 10 and 11 be afforded confidential treatment and not be placed in a public folder or on the Commission's website. Volumes 10 and 11 are being provided in a sealed envelope marked CONFIDENTIAL.

Parties' access to certain confidential information included with or in addition to the filing will be provided electronically upon execution of a protective agreement.

This filing is being made via the following methods: (1) one electronic copy of all the documents submitted in support of this filing are being submitted via the Secretary Bureau's electronic ShareFile site; and (2) one hard copy and one CD of all the documents submitted in support of this filing are being submitted via hand delivery.

As indicated on the attached Certificate of Service, Peoples is serving copies of this filing and all supporting data on the Commission's Bureau of Investigation and Enforcement, the Office of Customer Advocate, the Office of Small Business Advocate and all active parties at the Company's last base rate proceeding at Docket No. R-2023-3044549. Copies of this filing on CD are also being provided to the Commission's Office of Special Assistants, Office of Administrative Law Judge and Bureau of Technical Utility Services, as well as to each Commissioner's office. In addition, a copy of the proposed tariff will be available on the Company's website at https://www.peoples-gas.com/my-account/understand/gas-rates/#

Peoples will be represented in this proceeding by the following counsel and requests that they be included on the official service list:

BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

Peoples Natural Gas Company LLC

Docket No. R-2026-3060855

Volume I

Exhibits 1-4

STATEMENT OF REASONS

PEOPLES NATURAL GAS COMPANY LLC
2026 Base Rate Case
Docket No. R-2026-3060855

STATEMENT OF REASONS

I. INTRODUCTION

Peoples Natural Gas Company LLC ("Peoples" or "Company") is filing Original Tariff Gas – PA PUC No. 49 ("Retail Tariff No. 49") and Original Tariff Gas – PA PUC No. S-5 ("Supplier Tariff No. S-5") with proposed effective dates of May 26, 2026.[1] The rates set forth in Retail Tariff No. 49, if approved by the Pennsylvania Public Utility Commission ("PUC" or the "Commission"), would increase the Company's annual revenues by approximately $163.2 million, or by 13.8%. In addition, Retail Tariff No. 49 and Supplier Tariff No. S-5 propose additional changes to tariff rates, riders, and tariff terms and conditions as described in the filing.

The following monthly bill impact analysis applies to Peoples' customers. It assumes that the Company's proposals for full rate relief are accepted.

- The total bill for a residential customer using 86 Mcf per year would increase from $122.20 to $138.23* per month or by 13.1%.

- The total bill for a commercial customer using 250 Mcf per year would increase from $271.47 to $314.05 per month or by 15.7%.

- Rates for an industrial customer using 1,750 Mcf per year would increase from $1,802.05 to $2,010.68 per month or by 11.6%.

*This amount excludes the Company's proposed defined credit adjustment applicable to residential customers not enrolled in the Customer Assistance Program (CAP) that is expected to be provided to customers in the first quarter of both 2027 and 2028.

[1] It is anticipated that the effective date of rates proposed in Retail Tariff No. 49 and Supplier Tariff No. S-5 will be suspended until December 26, 2026.

Peoples makes this tariff filing principally to allow it to earn a fair return on investments used and useful to continue to provide safe and reliable service to the public and to support its infrastructure modernization programs designed to enhance safety and reliability. Each of these reasons is discussed in more detail below and in the Company's testimony. As compared to current plant and base rate levels reflected in existing rates, Peoples projects an increase of approximately $1.2 billion in gross plant through the Fully Projected Future Test Year ("FPFTY") ending December 31, 2027. Accordingly, this revenue increase is essential to attract the investments necessary to operate and maintain safe, reliable, and customer-focused natural gas distribution services.

II. REASONS FOR THE REQUESTED REVENUE INCREASE

1. Fair return on investments used to serve the public

The Company will not be able to earn a fair rate of return at present rate levels. As reflected in Peoples Exhibit No. 2, the Company's operations prior to a rate increase are projected to produce an overall return on rate base of 5.99%, which equates to a return on common equity of only 7.14% for the FPFTY. As explained by Company Witness Jennifer E. Nelson (Peoples Statement No. 15), those returns are not adequate based on an analysis of applicable financial market data and the risks confronted by the Company and are well below the rates of return generally afforded to public utilities. Unless Peoples receives the requested rate relief, the Company's returns will continue to erode and jeopardize its ability to attract the capital needed to make the reasonable and necessary investments in gas infrastructure and the workforce that is necessary to maintain and enhance the provision of safe and reliable natural gas service to its customers.

2. Support for the Company's accelerated infrastructure replacement program

The primary driver for the requested rate relief in this proceeding is the Company's investment in replacing its aging infrastructure. Upgrading and modernizing the distribution system facilitates the provision of safe, reliable, and reasonable service to customers. Accordingly, the Company is replacing its aging infrastructure at an accelerated pace, as described in its most recent Long Term Infrastructure Improvement Plan ("LTIIP").[2] The investment in net plant in-service for the FPFTY ended December 31, 2027 is projected to be $5.5 billion. When the Company last requested a rate increase for the FPFTY ended September 30, 2025, the Company's investment in net plant was approximately $4.1 billion million. The $1.4 billion increase in net plant has largely been the result of continued investments necessary to enhance and maintain the safety and reliability of the Company's distribution system, which include the replacement of aging gas plant infrastructure. In 2025, the Company's LTIIP Program eliminated over 190 miles of leak-prone bare steel and wrought iron pipeline and 22,000 services. This represents a significant acceleration of investment and replacement over historical levels.

III. MANAGEMENT EFFECTIVENESS

Peoples continues to provide safe and reliable service to its customers and has achieved success in many areas by: (1) focusing on affordability as a top priority; (2) improving its customer service; (3) enhancing safety through accelerated pipeline replacements and system modernization; (4) bringing jobs to its service territory; and (5) serving as a valuable corporate citizen. Peoples's management effectiveness is evidenced in the following areas:

Affordability and Operational Efficiencies

- Peoples has undertaken strategic corporate structure and tax strategies to drive efficiencies for its customers. Since 2010, the owners of Peoples have consolidated three of the four largest Southwestern Pennsylvania natural gas utilities, resulting in the consolidation of

[2] Docket No. P-2025-3057167.

collective bargaining agreements, field operations locations, and gas procurement activities, as well as many other operational benefits.

- The Company has updated the definition of its unit of property under the IRS's tangible property regulations (also known as "Tax Repairs Deduction"). This allowed the Company to retroactively deduct, as an operating expense on its income tax returns, the costs of certain asset improvements that previously were capitalized and depreciated for tax purposes. Further, this increased the prospective deduction that could be taken by Peoples related to its ongoing capital programs. As such, significant benefits were passed on to customers. For example, in the last rate case the tax benefit associated with the Tax Repairs Deduction flowed to customers was over $100 million annually. In this case, the amount is over $130 million. Regarding the retroactive catch-up deduction, the Company has refunded over $104 million to customers through December 31, 2025, and plans to refund an additional $21 million by 2031.
- Peoples has also been able to maintain efficient project costs for its pipeline replacement work through focused efforts on cost containment, which include connecting customers while eliminating redundant facilities and coordinating restoration efforts with other utilities and municipalities. The Company's modernization of its facilities also reduces costs that would have been associated with operating and maintenance activities like leak repair.
- Additionally, Peoples' strategic location within the Marcellus Shale region has allowed customers to benefit from consistently lower gas supply costs as compared to the benchmark Henry Hub price.

Universal Services and Customer Payment Assistance

- Peoples is dedicated to meeting the needs of the Company's low-income customers through its customer assistance programs. The Company offers a suite of universal service programs to support low-income households. The Company invests in training its personnel regarding the eligibility for all customer programs and offerings. This includes promoting LIHEAP, not just during direct contact with the Company's contact center, but generally through a media campaign as well. Peoples' contact center agents can also mail LIHEAP applications directly to customers who are interested in applying. The applications are prefilled with the mailing address for the appropriate county in order to allow for easy submission by the customer. Additionally, Peoples partners with local social service agencies and legislative offices to share information about customer programs.
- The Company offers a budget billing program that allows customers to spread higher winter heating bills across the entire year, allowing for a more stable and predictable payment. If customers have past due amounts or arrears, they can enroll in a payment arrangement that, similar to budget billing, spreads the arrears out over a period of months, based on the level of income in the household, to provide a more affordable monthly payment while the customer works to reduce their arrears.
- Through the Hardship Fund, customers with incomes up to twice the poverty level can obtain grants to further reduce their account balances as well.
- Peoples expanded its Customer Assistance Program ("CAP") eligibility more than ten years ago to those whose income is between 151% and 200% of the federal poverty level, providing a participation opportunity that is not available in other utility's CAP programs.
- The Company offers weatherization and emergency furnace and service line repair

programs to help low-income households conserve natural gas usage and address emergency heating needs that these households could not otherwise afford to address on their own.

- The Company also waives connection fees, reconnection fees, and security deposits for customers who self-identify as low-income.

Quality Customer Service

- Peoples maintains high levels of customer service. For example, the Commission's most recent Annual Utility Consumer Report and Evaluation showed that Peoples' consumer complaint rate was lower than the average for Pennsylvania NGDCs. The Company's average response time to BCS residential customer complaints was substantially less than the industry average. Additionally, Peoples had one of the lowest justified payment arrangement request (PAR) rates as compared to its peers.

Safety Programs and Performance

- Peoples maintains a strong safety culture, which is evidenced by its success in reducing outstanding leaks on its system. The Company has reduced the outstanding leaks on its system by more than 90% since 2018.
- Peoples continues to make significant progress in the modernization of its system and the replacement of leak prone pipe. The Company plans to continue to accelerate its pipeline replacement program so that all remaining bare steel and wrought-iron mains and transmission lines will be removed by 2038.
- Damage Prevention is a key focus of Peoples. Since 2020, the Company has worked diligently to reduce its number of excavation damages. Peoples has successfully reduced its damage rates by 26% despite receiving more locate ticket requests year-over-year and marking more tickets year-over-year.
- In 2024, the Commission conducted 241 audits of field operations and associated records, finding no violations, fines or citations.
- Additionally, Peoples is installing Intelis meters for eligible customers. The Intelis Meter represents a significant advancement in utility safety and operational oversight, with the integration of pressure sensing technology into solid state gas meters serving as a cornerstone of this initiative. These meters are designed to provide real-time monitoring of gas pressure at the point of service, enabling early detection of anomalies that could indicate leaks, pressure drops, or other hazardous conditions. This capability greatly enhances the utility's ability to respond to potential safety issues, reducing the risk of incidents and improving overall system integrity.

Community Engagement and Impact on Local Economies

- Peoples and its employees are fully engaged in the Southwestern Pennsylvania community. The Company supports the communities it serves through charitable contributions and volunteer opportunities. In addition to these philanthropic endeavors, the Company makes a significant impact on the local economy in Southwestern Pennsylvania by investing capital and creating jobs to carry out the Company's modernization plans and retaining key talent. For example, in 2025, the Company's LTIIP program required 80 different pipeline crews to complete its work.
- Further, Peoples continues to support and encourage local production of natural gas. The

Company's commitment to bring its customers gas supply from locally drilled gas wells has helped sustain jobs for local drilling companies and related activities.

The identified initiatives and efforts, as described by the Company's witnesses, demonstrate Peoples' commitment to providing safe, reliable, and high-quality distribution service to its customers. The Company believes that its management efforts, system investments, and continued provision of safe and reliable service at reasonable rates, as detailed in the testimony submitted in this case, all strongly support an upward adjustment of 25 basis points to the Company's rate of return on common equity. This upward adjustment is included in the 11.25% return on common equity requested by the Company and is discussed in the Direct Testimony of Jennifer Nelson (Peoples Statement No. 15).

IV. OVERVIEW OF FILING

Included with Peoples' filing is the supporting data required by the Commission's regulations. This information includes data for the Historic Test Year ("HTY") ended November 30, 2025, a Future Test Year ("FTY") ending November 30, 2026, and a FPFTY ending December 31, 2027. In accordance with permitted ratemaking procedures, the Company has elected to use the FPFTY as the basis for its proposed revenue change. Peoples has followed Commission ratemaking practice in preparing its claims for rate base, operating revenues and operating expenses.

Rate Base. Rate base was determined based on depreciated original cost values for projected plant in service at the end of the FTY and FPFTY, respectively. The Company's rate base claim also includes reasonable estimates for materials and supplies inventory and cash working capital, as well as standard deductions for accumulated depreciation, accumulated deferred income taxes, and customer deposits. The Company's rate base claim is shown in

summary form in Schedule 2 to Exhibit 8 (FPFTY) and is principally supported by the Direct Testimony of Nick Tufarolo (Peoples Statement No. 12).

Operating Revenues. Peoples' *pro forma* test year operating revenues were derived from its annual operating revenue forecast. As explained in the testimony of Dawn Folks (Peoples Statement No. 4) and other witnesses, operating revenues were annualized, normalized, and otherwise adjusted in accordance with standard ratemaking practice, as detailed in the schedules included within Exhibit 3 (FPFTY) and the exhibits attached to Ms. Folk's testimony.

Operating Expenses. Peoples' *pro forma* test year operating expenses were derived from evaluating the company's books and operating budget. As explained in the testimony of Andrew P. Wachter (Peoples Statement No. 2) certain operating expenses were annualized, normalized, and otherwise adjusted in accordance with standard ratemaking practice, as detailed in Schedule 1 of Exhibit 4 (FPFTY). The Company's claim for depreciation and amortization expense is supported by Exhibit 5C (Fully Projected) to the filing, and exhibits developed and supported by John J. Spanos of Gannett Fleming Valuation & Rate Consultants, LLC (Peoples Statement No. 16). Mr. Spanos's calculations are based on the straight-line, remaining life method previously approved for Peoples' operations by the Commission.

Income Taxes. Peoples' income tax expense was calculated using procedures previously accepted by the Commission. The Company's filing reflects the Net Operating Loss carryforward, the effects of Tax Repairs in this proceeding, and the impacts of the reduction to the Corporate Net Income tax rate on the Company's revenue requirement. The Company's tax claims are described

and supported in the Direct Testimony of Angela Jiang (Peoples Statement No. 7).

Revenue Allocation and Class Cost of Service. Peoples is proposing to allocate the revenue requirement to the customer classes based on the results of a cost of service study. The Company's proposed revenue allocation will move all rate classes toward the overall system average rate of return. Additional details regarding the Company's cost of service study and revenue allocation are provided in the Direct Testimony of John D. Taylor (Peoples Statement No. 17). Mr. Taylor also discusses the Company's proposal to continue its successful Weather Normalization Adjustment Mechanism (WNA) program and the Company's updated Heating Degree Day methodology in this case.

Rate Design. The Company's proposed rate design was developed in conjunction with Company Witness John D. Taylor's Allocated Cost of Service Study ("ACOSS"). The proposed revenue increases were allocated to the Company's service classes based on current rates of return for each class and the desire to move towards full parity. Full parity means the revenues collected from individual service classes are aligned with the cost of service associated with that service class. After allocating the revenue increase, the rate design process consists of setting the basic service charge, resetting riders, and allocating the remaining increase to the volumetric distribution charge. As part of this case, Peoples is proposing to increase the fixed monthly customer charges for the residential, certain commercial and large industrial classes. Details of the Company's rate design proposals are found in the Direct Testimony of John D. Taylor (Peoples Statement No. 17).

Other Tariff Changes. The Company's proposed changes to its tariff are discussed in the

testimony of Krista Snyder (Peoples Statement No. 13).

V. CONCLUSION

The proposed revenue increase is necessary for the Company to continue providing safe and reliable service, to maintain the integrity of its financial ratings, to attract additional capital on reasonable terms, and to have a reasonable opportunity to earn a fair rate of return on property that is used and useful in providing natural gas service to the public within its service territory. The proposals contained in this filing will provide significant benefits to all stakeholders. Moreover, the Company's proposed revenue allocation and rate design are just and reasonable and non-discriminatory, as are the proposed changes made to the Company's general terms and conditions of service. Therefore, the rates, rules, and terms and conditions of service set forth in Retail Tariff No. 49 and Supplier Tariff No. S-5 should be permitted to become effective as filed.

PLAIN LANGUAGE - STATEMENT OF REASONS

PEOPLES NATURAL GAS COMPANY LLC
2026 Base Rate Case
Docket No. R-2026-3060855

PLAIN LANGUAGE STATEMENT OF REASONS

Peoples Natural Gas Company LLC ("Peoples" or "Company") has asked the Pennsylvania Public Utility Commission ("PUC" or the "Commission") to increase its annual jurisdictional revenues by approximately $163.2 million, or by 13.8%. The percentage rate increase will vary by rate class. The main reasons for this proceeding are:

- Peoples continues to invest in replacing its aging infrastructure. Upgrading and modernizing the distribution system facilitates the provision of safe and reliable service to customers.
- Without substantial rate relief, the Company will not be able to earn a fair return on its investment used to serve the public and, if not addressed, this could adversely affect the integrity of its financial ratings and its ability to provide safe and reliable service to its customers.
- Peoples is proposing to increase the fixed monthly customer charges for the residential, certain commercial and large industrial classes.

The Company designed the proposed rates for each customer class to recover its total required revenue. In allocating the revenue increase to the residential and non-residential customer classes, Peoples was guided by detailed studies of each rate class's cost of service. The Company also considered and balanced other principles of rate design consistent with the Commission's approach to ratemaking.

Peoples is also proposing to continue its successful Weather Normalization Adjustment Program.

Along with its rate increase, Peoples has filed all supporting data required by the

Commission's regulations, as well as the written statements of 17 witnesses and numerous exhibits prepared by those witnesses. The data, testimony, and exhibits submitted by the Company comply with the Commission's filing requirements. The proposed distribution revenue increase is the minimum increase necessary for Peoples to continue providing safe and reliable service to the public within its service territory.

Peoples Natural Gas Company LLC

§ 53.52(c)

2. A detailed balance sheet of the utility as of the close of the period referred to in subsection (b)(2).

* *

Refer to Exhibit No. 1, Schedule No. 2 (53.53.III.A.1).

Peoples Natural Gas Company LLC

§ 53.53.III.A

1. Provide a comparative balance sheet for the test year and the preceding year which corresponds with the test year date.

* *

See attached pages 2 – 3 for the comparative balance sheet of Peoples Natural Gas Company at November 30, 2025 and November 30, 2024.

Peoples Natural Gas Company LLC

§ 53.52(c)

6. A brief description of a major change in the operating or financial condition of the utility occurring between the date of the balance sheet required by paragraph (2) and the date of transmittal of the tariff, revision or supplement. As used in this paragraph, a major change is one which materially alters the operating or financial condition of the utility from that reflected in paragraphs (1) - (5).

* *

Peoples Natural Gas Company had no major changes in operating or financial condition between the historical test year November 30, 2025 and the rate case filing on March 27, 2026.

Peoples Natural Gas Company LLC

§ 53.53.II.A

18. Set forth amount of total cash (all cash accounts) on hand from balance sheets for last 24-calendar months preceding test year-end.

* *

Month / Year	Cash and temporary investments
December-23	$ 2,491,540

See Attachment 1 below.

Peoples Natural Gas Company LLC
Attachment 1: 53.53 III.A.8
As of November 30, 2025

Line No.	Description		Balance
	Account 181 - Unamortized Debt Expense		
1	Issue Exp - Med Term Notes *Relates to debt issuance and recoverable financing costs to be amortized over the term of the outstanding debt*	$	11,768,334
2	Total Account 181	$	11,768,334
	Account 182 - Other Regulatory Assets		
3	Universal Service Program (USP) *This rider recovers costs related to the Company's universal services programs and shall be applicable to residential customers, except for any residential ratepayer served under the Company's Customer Assistance Program.*	$	(5,754,091)
4	Distribution System Improvement Charge (DSIC) *Peoples received approval to reconcile DSIC revenues in the following dockets. Each docket approves standard tariff language that complies with Act 11 and authorizes the reconciliation. PNG – P-2013-2344596; PED- P-2013-2342745*	$	1,250,831
5	Supplier Choice *This Rider has been established to recover costs associated with Supplier Choice. The initial filing includes costs related to implementation and administration of the Account Number Access Mechanism per the Commission's Final Order at Docket No. M-2015-2468991 entered June 30, 2016 and costs associated with the implementation and administration of the Supplier Bill in accordance the Commission's Final Order entered August 20, 2015 at Docket No. M-2015-2474802*	$	(7,836)
6	FAS 109/ASC 740 (Income Taxes) *Represents the future effects on income taxes for temporary differences between the basis of assets and liabilities for financial reporting and tax purposes. It is industry standard in Pennsylvania for regulated entities to recover such costs (mainly depreciation timing differences) through base rates.*	$	918,184,410
7	Rate Case Expense *Reflects the expenses incurred in support of the Peoples base rate filing submitted in 2018*	$	333,093
8	Regulatory Asset - ST - Reclass *Represents the offset balance of DSIC and USP Riders that have switched to a liability balance under the regulatory asset accounts*	$	5,761,927
9	Repair Tax *Reflects the (Over)/Under give back of the 481 benefit to customers through surcharge credit*	$	1,193,430
10	Vacation Balancing *Represents the balance of accrued vacation, quarterly adjustments made based on usage*	$	18,581
11	Debt Issuance Costs *Relates to debt issuance costs to be amortized over the term of the outstanding debt*	$	910,146
12	Total Account 182	$	921,890,491

Peoples Natural Gas Company LLC
Attachment 1: 53.53 III.A.8
As of November 30, 2025

Line No.	Description		Balance
	Account 186 - Miscellaneous Deferred Debits		
13	Other Deferred Charges	$	21,859
	Primarily pending lease construction incentives receivable		
14	Retirement Work In Progress	$	9,106,143
	Reflects the portion of an asset that incurs costs related to retiring/cost of removal of an asset. Once the project is complete and the work in progress becomes an asset, the retirement in progress becomes cost of removal and is depreciated over the life of the asset.		
15	OPEB Asset/Oblig - FAS 158 -Non Current	$	6,042,632
	Relates to OPEB/PBOP balance to be amortized over the term		
16	Total Account 186	$	15,170,634
	Account 190 - Accumulated Deferred Income Taxes		
17	Accumulated Deferred Income Tax	$	259,036,388
	This account is used to record deferred income tax, federal and state, related to income reported for accounting purposes but which has been deferred for tax purposes until subsequent years. Included in this balance are deferred income taxes associated with gas purchase costs, payroll related liabilities, net operating losses and other related regulatory assets.		
18	Total Account 190	$	259,036,388
	Account 191 - Unrecovered Purchased Gas Costs		
19	Deferred Gas - (Over)/Under - Collections of purchased gas costs	$	20,530,289
	Reflects (Over)/Under-collections of purchased gas costs. The rate application for over/under recoveries of purchased gas costs is in accordance with 1307(f) Rider B of the Company's Tariff		
20	Total Account 191	$	20,530,289

§ 53.53.III.A

11. Supply basis for Injury and Damages reserve and amortization thereof.

* *

Account 228.2 Accumulated Provision for Injuries and Damages balance as of November 30, 2025:

Reserve for Injuries and Damages $3,002,025

This amount represents the reserve for third party injuries and damages. This reserve is evaluated on a quarterly basis and includes identified accruals for known, probable future expenses, as determined by the Legal Department. At the time the accrual is determined, operating expense is charged and operation reserve (Account 228.2) is credited with the dollar value of the estimated exposure. As each claim or case is resolved, that was established as part of the reserve, the costs are charged directly to the operating reserve account.

Peoples Natural Gas Company LLC

§ 53.53.III.A

12. Provide details of any significant reserves, other than depreciation, bad debt, injury and damages, appearing on balance sheet.

* *

Peoples Natural Gas Company LLC

§ 53.53.III.E

2. Provide details of items and amounts comprising the accounting entries for Deferred Fuel Cost at the beginning and end of the test year.

* *

Refer to the response to Exhibit No. 1, Schedule No. 19 (53.53.III.E.1).

Peoples Natural Gas Company LLC
§ 53.53 III.E

32. Provide a schedule showing the calculation of any deferred fuel costs shown in Account 174. Also, explain the accounting, with supporting detail, for any associated income taxes.

* *

Peoples does not reflect deferred gas costs in Account 174. Refer to the response to Exhibit No. 1, Schedule No. 19 (53.53.III.E.1) for deferred fuel costs.

Peoples Natural Gas Company LLC

§ 53.52(d)

1. If a utility renders more than one type of public service, such as electric and gas, information required by § § 53.51—53.53 (relating to information furnished with the filing of rate changes), except subsection (c)(2), relates solely to the kind of service to which the tariff or tariff supplement is applicable. In subsection (c)(2), the book value of property used in furnishing each type of public service, as well as the depreciation reserve applicable to the property, shall be shown separately.

* *

Not Applicable.

Peoples Natural Gas Company LLC

§ 53.53.II.A

20. Provide latest available balance sheet and income statement for Company, Parent and System (consolidated).

* *

Refer to Exhibit No. 1, Schedule No. 2 (53.53 III.A.1) for the balance sheet and to Exhibit No. 2, Schedule No. 5 (53.53 III.A.18) for the income statement for Peoples Natural Gas Company LLC. Refer to Exhibit No. 16, Schedule No. 2 (53.53.II.A.2) for the PNG Companies financial statements.

Peoples Natural Gas Company LLC

§ 53.52(b)

2. The operating income statement of the utility for a 12-month period, the end of which may not be more than 120 days prior to the filing. Water and wastewater utilities with annual revenues under $100,000 and municipal corporations subject to Commission jurisdiction may provide operating income statements for a 12-month period, the end of which may not be more than 180 days prior to the filing.

* *

Refer to Exhibit No. 2, Schedule No. 4 (53.53.III.A.17) for the operating income statement for the 12-month period ending November 30, 2025.

Peoples Natural Gas Company LLC

§ 53.52(c)

5. A statement of operating income, setting forth the operating revenues and expenses by detailed accounts for the 12-month period ending on the date of the balance sheet required by paragraph (2).

* *

Refer to Exhibit No. 2, Schedule No. 4 (53.53.III.A.17); Exhibit No. 2, Schedule No. 5 (53.53.III.A.18); Exhibit No. 3, Schedule No. 15 (53.53.III.E.14); and Exhibit No. 4, Schedule No. 22 (53.53.III.E.34).

Peoples Natural Gas Company LLC

§ 53.53.II.A

22. Provide Operating Income claims under:

i. Present rates

ii. Pro forma present rates (annualized & normalized)

iii. Proposed rates (annualized & normalized)

b. Provide Rate of Return on Original Cost and Fair Value claims under:

i. Present rates

ii. Pro forma present rates

iii. Proposed rates

* *

a. Refer to Exhibit No. 2, Schedule No. 4 (53.53.III.A.17), Proforma Fully Projected Future Test Year and the Proposed Fully Projected Future Test Year and notes thereto.

b. Refer to Exhibit No. 8, Schedule No. 2 (53.53.I.A.2), Proforma Fully Projected Future Test Year and the Proposed Fully Projected Future Test Year, for Rate of Return on Original Cost and Fair Value Claim.

Peoples Natural Gas Company LLC
§ 53.53 III.A

17. Prepare a Statement of Income for the various time frames of the rate proceeding including:

Col. 1—Book recorded statement for the test year.

2—Adjustments to book record to annualize and normalize under present rates.

3—Income statement under present rates after adjustment in Col. 2

4—Adjustment to Col. 3 for revenue increase requested.

5—Income statement under requested rates.

a. Expenses may be summarized by the following expense classifications for purposes of this statement:

Operating Expenses (by category)
Depreciation
Amortization
Taxes, Other than Income Taxes
Total Operating Expense
Operating Income Before Taxes
Federal Taxes
State Taxes
Deferred Federal
Deferred State
Income Tax Credits
Other Credits
Other Credits and Charges, etc.
Total Income Taxes
Net Utility Operating Income
Other Income & Deductions
Other Income
Detailed listing of Other Income used in Tax Calculation
Other Income Deduction
Detailed Listing
Taxes Applicable to Other Income and Deductions
Listing
Income Before Interest Charges
Listing of all types of Interest Charges and all amortization of Premiums and/or Discounts and Expenses on Debt issues
Total Interest
Net Income After Interest Charges

(Footnote each adjustment to the above statements with explanation in sufficient clarifying detail.)

Peoples Natural Gas Company LLC

§ 53.53.III.A

18. Provide comparative operating statements for the test year and the immediately preceding 12 months showing increases and decreases between the two periods. These statements should supply detailed explanation of the causes of the major variances between the test year and preceding year by detailed account number.

Peoples Natural Gas Company LLC
Attachment 1: 53.53 III.A.18
Comparative Income Statement
Twelve Months Ended November 30:

Variance Explanations:	Variance Amounts
OPERATING REVENUES	
Residential Sales (480)	$ (208,143,786)
Residential Sales increased primarily due to a 26.8% increase in heating degree days as well as implementation of the changes from the 2023 rate case.	
Commercial and Industrial Sales (481)	$ (38,731,724)
Commercial and Industrial Sales increased primarily due to a 26.8% increase in heating degree days as well as implementation of the changes from the 2023 rate case.	
Sales for Resale (483)	$ (2,031,615)
The year ended November 30, 2025 had lower transportation pooling imbalance fees from lower cash outs compared to the year ended November 30, 2024, resulting in lower Sales for Resale revenue Peoples Natural Gas Company LLC.	
OTHER OPERATING REVENUES	
Revenues From Transportation of Others Through Distribution Facilities (489.3)	$ (43,856,275)
Revenues From Transportation of Others Through Distribution Facilities increased primarily due to a 26.8% increase in heating degree days as well as implementation of the changes from the 2023 rate case.	
Other (487, 488, 489.1, 489.4, 493, 495, 496)	$ (7,732,610)
Peoples Natural Gas Company LLC had increases in late payment charges (487), slight increased revenue from transportation of gas through gathering facilities for local production (489.1), increased Other Gas Revenues (495), primarily due to higher off system sales, and increases due to Provision for Rate Refunds (496).Other changes were not significant.	
OPERATIONS AND MAINTENANCE EXPENSE	
Natural Gas Production Operations Expense (750-760) - Not Significant	$ (64,839)
Other Gas Supply Operation Expense Operating Expense (800.1-813 and 858)	$ 127,940,818
Peoples Natural Gas Company LLC gas purchases increased primarily due to an increase in average price and an increase in volume purchased.	
Underground Storage Operation Expense (814-826) - Not Significant	$ 91,326
Gas Transmission Operations Expense (850-860 - excluding 858)	$ 397,053
Increase in Gas Transmission Operations Expense, excluding Transmission and Compression costs (858) included with gas supply costs, was primarily due to increases Mains Expenses in. All other changes to Gas Transmission Operations Expense were non-significant.	
Gas Distribution Operations Expense (870-881)	$ (592,609)
Peoples Natural Gas Company LLC's Gas Distribution Operations Expense decreased due to; Supervision and Engineering Expense (870), Mains and Service Expense (874), Meas/Reg Sta Expense (875), Other Expenses (880), and Rent Expesne (881) decreasing. Meter/ House Reg Expense (878) and Customer Installation Expense (879) increased lowering the overall decrease.	
Customer Accounts Expense (901-904)	$ 3,105,081
Combined Customer Accounts Expense variance year over year had an overall increase due to an increase in Customer Records & Collections (903) and Uncollectible Accounts (904).	

Peoples Natural Gas Company LLC
Attachment 1: 53.53 III.A.18
Comparative Income Statement
Twelve Months Ended November 30:

Variance Explanations:		Variance Amounts
Customer Service and Informational Expense (907-910)	$	16,763,927
Customer Service and Informational Expense increased due to a large increase in Customer Assistance Expense (908). Other expense variances were not significant		
Sales Expense (911 - 916) - Not Significant	$	109,566
Administrative and General Operations Expense (920-931)	$	(2,147,273)
Administrative and General (A&G) Operations Expense decreased in Administrative and General Admin Expense Transferred (922), decreased in General Advertising Expenses (930.1), and lower insurance claims (925). These were partially offset by increases in Outside Services Employed (923) due to challenges in filling open positions and higher salaries expense (920).		
Natural Gas Production and Gathering Maintenance Expense (762-769)	$	(396,018)
Natural Gas Production and Gathering Maintenance Expense decreased due to a decrease in Field Compressor Station expenses (765), which was offset by an increase in Field Lines Expenses (764). Other expense variances were not significant.		
Underground Storage Maintenance Expense (831-837)	$	(274,675)
Underground Storage Maintenance Expense decreased due to a decrease in Compressor Station Equipment Expense (834). Other expense variances were not significant.		
Gas Transmission Maintenance Expense (862-867) - Not Significant	$	(51,388)
Gas Distribution Maintenance Expense (886-894)	$	1,070,958
Gas Distribution Maintenance Expenses increased due to an increase in Mains Maintenance Expense (887) offset by a decrease in Services Maintenance Expense (892). Other expense variances were not significant.		
Administrative and General Maintenance Expense (932) - Not significant	$	(84,329)
Depreciation Expense (403)	$	21,700,868
Depreciation Expense combined and at both divisions increased due to incremental additons to capital plant, primarily in mainline replacement categories, as well as higher depreciation rates effective October 2024.		
Amortization and Depletion of Utility Plant (404-405)	$	-
Amortization Expense - Regulatory Debits (407.3) - Not significant	$	-
Taxes Other Than Income Taxes (408.1)	$	(2,992,587)
Taxes Other Than Income Taxes decreased due to a decrease in sales and use tax, offset by increases in the PUC Assessment Fee. Other expense variances were not significant.		
Income Taxes - Utility Operating Income (409.1)	$	(3,183,795)
Fluctuations resulting from changes in pre-tax book income, tax versus book timing differences and differences in the units of property deduction.		
Provision for Deferred Income Taxes - Utility Operating Income (410.1)	$	(292,929,504)
Fluctuations resulting from changes in pre-tax book income, tax versus book timing differences and differences in the units of property deduction.		

Peoples Natural Gas Company LLC
Attachment 1: 53.53 III.A.18
Comparative Income Statement
Twelve Months Ended November 30:

Variance Explanations:	Variance Amounts
Provision for Deferred Income Taxes-Credit, Utility Operating Income (411.1)	$ 341,844,350
Fluctuations resulting from changes in pre-tax book income, tax versus book timing differences and differences in the units of property deduction.	
OTHER INCOME & DEDUCTIONS	
Other Income (415 - 421.1)	$ (482,469)
Other Income increased due to an increase in Revenues from Merchandising, Jobbing, and Contract Work (415) partially offset by an increase in Costs and Expenses of Merchandising (416); a decrease in Nonutility Operations Revenue (417), partially offset by a decrease in Nonutility Operations Expenses (417.1); a decrease in Interest & Dividend Income (419); an increase in Allowance for Other Funds Used During Construction (419.1). Other variances were no significant.	
Other Income Deductions (421.2 - 426.5) - Not Significant	$ 137,588
Taxes Applicable to Other Income and Deductions (408.2, 409.2, 410.2 and 411.2)	$ (2,927,931)
Taxes Applicable to Other Income and Deductions decreased due to a decrease in the Provision for Deferred Income Taxes (410.2), partially offset by an increase in Income Taxes - Other Income and Deductions (409.2).	
INTEREST CHARGES	
Net Interest Charges (427-432)	$ 15,135,081
Net Interest Charges increased due to an increase in interest expense due to additional borrowings	

Peoples Natural Gas Company LLC

§ 53.53.III.A

42. If a company has separate operating divisions, an income statement must be shown for each division, plus an income statement for company as a whole.

* *

There are no separate operating divisions for Peoples Natural Gas Company LLC. Refer to Exhibit 2, Schedule No. 4 (53.53.III.A.17) for the operating income statement for the 12-month period ending November 30, 2025.

Peoples Natural Gas Company LLC

§ 53.53.III.A

43. If a company's business extends into different states or jurisdictions, then statements must be shown listing Pennsylvania jurisdictional data, other state data and federal data separately and jointly (Balance sheets and operating accounts).

* *

None.

Peoples Natural Gas Company LLC

§ 53.53.III.E

16. If revenue accruing entries are made on the books at end of each fiscal period, give entries made accordingly at the end of the test year and at the beginning of the year. State whether they are reversed for ratemaking purposes.

* *

The entries are provided below. These are reversed for ratemaking purposes.

Peoples Natural Gas Company LLC	
Retail Sales	
November 2024 Unbilled reversed in December 2024	$ (46,038,938)
November 2024 Estimates reversed in December 2024	$ (181,957)
Unbilled booked November 2025	$ 61,092,158
Estimates booked November 2025	$ 283,286
Transportation	
November 2024 Unbilled reversed in December 2024	$ (10,135,354)
November 2024 Estimates reversed in December 2024	$ (3,652,133)
Unbilled booked November 2025	$ 11,548,428
Estimates booked November 2025	$ 4,927,673

Peoples Natural Gas Company LLC

§ 53.53.III.E

21. If a gas company is affiliated with another utility segment, such as a water or electric segment, explain the effects, if any, upon allocation factors used in the gas rate filing of current or recent rate increases allowed to the other utility segment (or segments) of the company.

* *

Not Applicable.

Peoples Natural Gas Company LLC

§ 53.52(a)

2. The total number of customers served by the utility.

* *

The total number of customers served by the utility as of November 30, 2025 was 704,726.

Peoples Natural Gas Company LLC

§ 53.52(a)

3. A calculation of the number of customers, by tariff subdivision, whose bills will be affected by the change.

* *

See Exhibit No. 3, Schedule No. 15 (53.53.III.E.14), Attachment O.

Peoples Natural Gas Company LLC

§ 53.52(a)

4. The effect of the change on the utility's customers.

* *

See Exhibit No. 3, Schedule No. 15 (53.53.III.E.14), Attachment A, Page 3

Peoples Natural Gas Company LLC

§ 53.52(b)

3. A calculation of the number of customers, by tariff subdivision, whose bills will be increased.

* *

See Exhibit No. 3, Schedule No. 15 (53.53.III.E.14), Attachment O

Peoples Natural Gas Company LLC

§ 53.52(b)

4. A calculation of the total increases, in dollars, by tariff subdivision, projected to an annual basis.

* *

For the calculation of the total changes, in dollars, for the twelve months ended December 31, 2027 projected to an annual basis, see Exhibit No. 3, Schedule No. 15 (53.53.III.E.14), Attachment O.

Peoples Natural Gas Company LLC

§ 53.52(b)

5. A calculation of the number of customers, by tariff subdivision, whose bills will be decreased.

* *

See Exhibit No. 3, Schedule No. 15 (53.53.III.E.14), Attachment O.

Peoples Natural Gas Company LLC

§ 53.52(b)

6. A calculation of the total decreases, in dollars, by tariff subdivision, projected to an annual basis.

* *

For the calculation of the total changes, in dollars, for the twelve months ended December 31, 2027 projected to an annual basis, see Exhibit No. 3, Schedule No. 15 (53.53.III.E.14), Attachment O.

Peoples Natural Gas Company LLC

§ 53.53.III.E

4. Provide detailed calculations substantiating the adjustment to revenues for annualization of changes in number of customers and annualization of changes in volume sold for all customers for the test year.

    a. Break down changes in number of customers by rate schedules.

    b. If an annualization adjustment for changes in customers and changes in volume sold is not submitted, please explain.

* *

See Exhibit No. 3, Schedule No. 15 (53.53.III.E.14), Attachments F and G.

Peoples Natural Gas Company LLC

§ 53.53.III.E

6. Supply, by classification, Operating Revenues—Miscellaneous for test year.

* *

See Exhibit No. 3, Schedule No. 15 (53.53.III.E.14), Attachment C.

Peoples Natural Gas Company LLC
§ 53.53 III.E

8. Describe how the *net* billing and *gross* billing is determined. For example, if the *net* billing is based on the rate blocks plus FCA and STA, and the *gross* billing is determined by a percentage increase (1, 3 or 5 percent), then state whether the percentage increase is being applied to all three items of revenue—rate blocks plus FCA and STA.

* *

The Company does not have a provision for gross and net billing in its tariff.

Peoples Natural Gas Company LLC

§ 53.53.III.E

9. Describe the procedures involved in determining whether forfeited discounts or penalties are applied to customer billing.

* *

Per the Company's current tariff, below are the procedures involved in determining whether forfeited discounts or penalties are applied to customer billing. The Company's proposed tariff is located in Exhibit 14, Schedule 1 (53.53.IV.B.6).

- If a Residential or Commercial customer fails to pay the full amount of any bill, a delayed payment penalty charge of one and one-half percent (1.5%) per month will accrue on the portion of the bill that is unpaid on the due date, excluding any unpaid late-payment charges. Late payment charges will not be applied to Residential CAP customers during participation in the CAP Program.

- If an Industrial customer fails to pay the full amount of any bill a delayed payment penalty charge of two percent (2%) per month will accrue on the portion of the bill that is unpaid on the due date, excluding any unpaid late payment charges.

Peoples Natural Gas Company LLC

§ 53.53.III.E

10. Provide annualization of revenues as a result of rate changes occurring during the test year, at the level of operations as of end of the test year.

* *

See Exhibit No. 3, Schedule No. 15 (53.53.III.E.14), Attachment C.

Peoples Natural Gas Company LLC

§ 53.53.III.E

11. Provide a detailed billing analysis supporting present and proposed rates by customer classification and/or tariff rate schedule.

* *

See Exhibit No. 3, Schedule No. 15 (53.53.III.E.14), Attachments A through O.

Peoples Natural Gas Company LLC
§ 53.53 III.E

13. Provide a schedule of present and proposed tariff rates showing dollar change and percent of change by block. Also, provide an explanation of any change in block structure and the reasons therefor.

* *

Peoples Natural Gas Company LLC

§ 53.53.III.E

14. Provide the following statements and schedules. The schedules and statements for the test year portion should be reconciled with the summary operating statement.

a. An operating revenues summary for the test year and the year preceding the test year showing the following (Gas MCF):

i. For each major classification of customers
a. MCF sales
b. Dollar Revenues
c. Forfeited Discounts (Total if not available by classification)
d. Other and Miscellaneous revenues that are to be taken into the utility operating account along with their related costs and expenses.
ii. A detailed explanation of all annualizing and normalizing adjustments showing method utilized and amounts and rates used in calculation to arrive at adjustment.
iii. Segregate, from recorded revenues from the test year, the amount of revenues that are contained therein, by appropriate revenue categories, from:
a. Fuel Adjustment Surcharge
b. State Tax Surcharge
c. Any other surcharge being used to collect revenues.
d. Provide explanations if any of the surcharges are not applicable to respondent's operations.

[The schedule should also show number of customers and unit of sales (Mcf), and should provide number of customers by service classification at beginning and end of test year.]

b. Provide details of sales for resale, based on periods five years before and projections for five years after the test year, and for the test year. List customers, Mcf sold, revenues received, source of Mcf sold (storage gas, pipeline gas, manufactured gas, natural or synthetic), contracted or spot sales, whether sales are to affiliated companies, and any other pertinent information.

* *

(a) (i) (iii) Refer to Attachment C, Page 1 for a summary of operating revenues for the test year and the year preceding.

(a) (ii) Please refer to the testimony of Dawn Folks for explanation of all annualizing and normalizing adjustments. Also refer to Attachments A-O for adjustment details.

(b) Peoples does not make any sales for resale to other utilities. The amount recorded as sales for resale reflects imbalance sales to pools operating on Peoples' system under Rate NP-1 and Rate P-1. These amounts are reflected as gas cost revenues through Peoples' 1307(f) mechanism and do not include any non-gas recoveries.

Peoples Natural Gas Company LLC

§ 53.53.III.E

15. State manner in which revenues are being presented for ratemaking purposes:

a. Accrued Revenues

b. Billed Revenues

c. Cash Revenues

* *

Billed revenues are presented for rate-making purposes for both the historic test year actuals and future test year projections.

Peoples Natural Gas Company LLC

§ 53.53.III.E

20. Provide, for test year only, a schedule by tariff rates and by service classifications showing proposed increase and percent of increase.

* *

See Exhibit No. 3, Schedule No. 14 (53.53.III.E.13), Attachment A

Peoples Natural Gas Company LLC

§ 53.53.III.E

37. In determining pro forma expense, exclude cost of gas adjustments applicable to fuel adjustment clause and exclude fuel adjustment clause revenues, so that the operating statement is on the basis of base rates only.

* *

Refer to Exhibit No. 9, Schedule No. 6 (53.53.I.A.17).

Peoples Natural Gas Company LLC

§ 53.53.III.E

17. State whether any adjustments have been made to expenses in order to present such expenses on a basis comparable to the manner in which revenues are presented in this proceeding (i.e. - accrued, billed or cash).

* *

Expenses have been adjusted to a basis comparable to the adjusted normal level of revenues. Refer to Exhibit No. 4, Schedule No. 1, page 2 for a detail of all expense adjustments.

Peoples Natural Gas Company LLC

§ 53.53.III.A

20. Supply detailed calculations of amortization of rate case expense, including supporting data for outside services rendered. Provide the items comprising the rate case expense claim (include the actual billings or invoices in support of each kind of rate case expense), the items comprising the actual expenses of prior rate cases and the unamortized balances.

* *

Please refer to Exhibit 4, Schedule 1 (53.53.III.E.17), Page 27 for projected costs for current Rate Case. Current unamortized 2023 Rate Case expense is $1,120,261.23 from December 2025 through September 2026.

Peoples Natural Gas Company LLC

§ 53.53.III.A

21. Submit detailed computation of adjustments to operating expenses for salary, wage and fringe benefit increases (union and non-union merit, progression, promotion and general) granted during the test year and six months subsequent to the test year. Supply data showing for the test year:

a. Actual payroll expense (regular and overtime separately) by categories of operating expenses, i.e., maintenance, operating transmission, distribution, other.

b. Date, percentage increase, and annual amount of each general payroll increase during the test year.

c. Dates and annual amounts of merit increases or management salary adjustments.

d. Total annual payroll increases in the test year.

e. Proof that the actual payroll plus the increases equal the payroll expense claimed in the supporting data (by categories of expenses).

f. Detailed list of employee benefits and cost thereof for union and nonunion personnel. Any specific benefits for executives and officers should also be included, and cost thereof.

g. Support the annualized pension cost figures.

i. State whether these figures include any unfunded pension costs. Explain.

ii. Provide latest actuarial study used for determining pension accrual rates.

h. Submit a schedule showing any deferred income and consultant fee to corporate officers or employees.

* *

a.) Refer to page 3 for details.

b.) UWUA, Local 612. Under the terms of the agreement, a 3.25% wage increase was granted to hourly personnel in November 2025 resulting in an estimated annual increase of $3,007,735.

IBEW, Local 29. Under the terms of the agreement, a 2.5% wage increase was granted to hourly personnel in January 2025 resulting in an estimated annual increase of $18,732.

USW, Local 1324-26. Under the terms of the agreement, a 4.0% wage increase was granted to hourly personnel in March 2025 resulting in an estimated annual increase of $307,806.

c.) The average salary merit increase granted in March 2025 was 3.25% resulting in an estimated annual increase of $1,388,889.

d.) The total estimated annual payroll increases for the Historic Test Year were $4,723,163.

e.) Total Labor (includes APIP/Incentive Compensation and new employees)

Peoples Natural Gas Company LLC
§ 53.53 III.A

31. Provide a detailed analysis of Special Services—Account 795.

* *

Peoples does not record expenses related to special services in Account 795. The Company records such expenses in Account 923. Refer to Exhibit No. 4, Schedule No. 11 (53.53.III.A.28) for an analysis of Account 923.

Peoples Natural Gas Company LLC
§ 53.53 III.A

32. Provide a detailed analysis of Miscellaneous General Expense—Account No. 801.

* *

Peoples does not record expenses related to miscellaneous general expense in Account 801. The Company records such expenses in Account 930.2. Refer to Exhibit 4, Schedule No. 11 (53.53.III.A.28) for an analysis of Account 930.2.

Peoples Natural Gas Company LLC

§ 53.53.III.A

30. Provide a detailed schedule of all charitable and civic contributions by recipient and amount for the test year.

* *

The Company made total contributions of $240,055 during the Historic Test Year. The response to this question contains confidential information and is contained in as separate book of the filing marked confidential information. This information will be provided to parties upon execution of a Stipulated Protective Agreement or Protective Order, to be circulated by the Company, pursuant to the terms of that agreement.

Peoples Natural Gas Company LLC

§ 53.53.III.A

34. List and explain all non-recurring abnormal or extraordinary expenses incurred in the test year which will not be present in future years.

* *

Known material non-recurring abnormal or extraordinary expenses are removed. Refer to Exhibit No. 4, Schedule No. 1 (53.53.III.E.17) for the detail of all expense adjustments.

Peoples Natural Gas Company LLC

§ 53.53.III.A

35. List and explain all expenses included in the test year which do not occur yearly but are of a nature that they do occur over an extended period of years. (e.g. - Non-yearly maintenance programs, etc.)

[Responses shall be submitted and identified as exhibits.]

* *

Refer to Exhibit No. 4, Schedule No. 1 (53.53.III.E.17) for the detail of all expense adjustments.

Peoples Natural Gas Company LLC

§ 53.53.III.A

36. Using the adjusted year's expenses under present rates as a base, give detail necessary for clarification of all expense adjustments. Give clarifying detail for any such adjustments that occur due to changes in accounting procedure, such as charging a particular expense to a different account than was used previously. Explain any extraordinary declines in expense due to such change of account use.

* *

Refer to Exhibit No. 4, Schedule No. 1 (53.53.III.E.17) for the detail of all expense adjustments.

Peoples Natural Gas Company LLC

§ 53.53.III.A

37. Indicate the expenses that are recorded in the test year, which are due to the placement in operating service of major plant additions or the removal of major plant from operating service, and estimate the expense that will be incurred on a full-year's operation.

* *

No expenses were recorded during the twelve months ended November 30, 2025 related to placement in service of major plant additions or removal of major plant from operating service.

Peoples Natural Gas Company LLC

§ 53.53.III.A

38. Submit a statement of past and anticipated changes, since the previous rate case, in major accounting procedures.

* *

Effective for annual reporting periods after 12/15/2024, Accounting Standards Update ASU 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures. Adopted January 1, 2025.

Effective for annual reporting periods after 12/15/2026, Accounting Standards Update ASU 2024-03, Income Statement Reporting – Comprehensive Income – Expense Disaggregation Disclosures (Subtopic 220-40), Disaggregation of Income Statement Expenses.

Peoples Natural Gas Company LLC

§ 53.53.III.E

29. Provide intrastate operations percentages by expense categories for two years prior to the test year.

* *

Peoples Natural Gas Company LLC operates 100% entirely within Pennsylvania and has done so for the two years prior to the test year.

Peoples Natural Gas Company LLC
§ 53.53 III.E

33. Submit a schedule showing maintenance expenses, gross plant and the relation of maintenance expenses thereto as follows:

i. Gas Production Maintenance Expenses per MCF production, per $1,000 MCF production, and per $1,000 of Gross Production Plant;

ii. Transmission Maintenance Expenses per MMCF mile and per $1,000 of Gross Transmission Plant;

iii. Distribution Maintenance Expenses per customer and per $1,000 of Gross Distribution Plant;

iv. Storage Maintenance Expenses per MMCF of Storage Capacity and $1,000 of Gross Storage Plant. This schedule shall include three years prior to the test year, the test year and one year's projection beyond the test year.

* *

Peoples does not forecast the data indicated above beyond the Historic Test Year in the manner requested.

Peoples Natural Gas Company LLC

§ 53.53.III.E

34. Prepare a 3-column schedule of expenses, as described below for the following periods (supply sub-accounts, if significant, to clarify basic accounts):

    a. Column 1—Test Year

    b. Column 2 and 3—The two previous years

    Provide the annual recorded expense by accounts. (Identify all accounts used but not specifically listed below.)

Peoples Natural Gas Company, LLC
375 North Shore Drive, Suite 600
Pittsburgh, PA 15212-5322

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant as of November 30, 2025. Summaries of the original cost, annual accruals and the book depreciation reserve are presented in Tables 1 and 2, beginning on page I-3 of the attached report.

A description of the methods and procedures upon which the study was based is set forth in a companion report, "2026 Depreciation Study - Calculated Annual Depreciation Accruals Related to Gas Plant as of November 30, 2026".

Respectfully submitted,

GANNETT FLEMING VALUATION
AND RATE CONSULTANTS, LLC

PART I. RESULTS OF STUDY

PEOPLES NATURAL GAS COMPANY LLC
DEPRECIATION STUDY

PART I. RESULTS OF STUDY

DESCRIPTION OF SUMMARY TABULATIONS

The results of the depreciation study are summarized in Table 1, which sets forth the calculated annual depreciation related to Gas Plant in Service as of November 30, 2025. Table 2 presents the experienced gross salvage and cost of removal associated with regular retirements during the five-year period, 2021-2025 and the annual amortization of net salvage.

DETAILED TABULATIONS OF DEPRECIATION CALCULATIONS

The supporting data for the depreciation calculations are presented in account sequence in the section beginning on II-6. The original cost, calculated accrued depreciation, allocated book reserve, future accruals, remaining life and annual accrual are shown for each vintage of each account or subaccount. The amounts of regular retirements, gross salvage and cost of removal are set forth by account for the years 2021 through 2025, beginning on III-2 through III-4.

PEOPLES NATURAL GAS COMPANY LLC

March 9, 2026

Peoples Natural Gas Company, LLC
375 North Shore Drive, Suite 600
Pittsburgh, PA 15212-5322

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant in service. The results of our study as of November 30, 2026 are presented in the attached report. The results of our study as of November 30, 2025 are presented in our report titled "2025 Depreciation Study- Calculated Annual Depreciation Accruals Related to Gas Plant as of November 30, 2025". The same methods, procedures and estimates are used in both studies.

The attached report sets forth a description of the methods and procedures upon which the studies were based, the estimates of survivor curves and the calculated annual depreciation rates as of November 30, 2026.

Respectfully submitted,

GANNETT FLEMING VALUATION
AND RATE CONSULTANTS, LLC

PEOPLES NATURAL GAS COMPANY LLC
DEPRECIATION STUDY

PART I. INTRODUCTION

SCOPE

This report sets forth the results of the depreciation study conducted for Peoples Natural Gas Company LLC to determine the annual depreciation accrual rates and amounts for ratemaking purposes applicable to the original cost of gas plant as of November 30, 2026.

The depreciation accrual rates and amounts presented herein are based on estimated survivor curves and on methods and procedures set forth in previous orders approved by the Pennsylvania Public Utility Commission. The estimated survivor curves presented herein were based on the results of a service life study incorporating statistical analyses of data through 2022.

BASIS OF STUDY

Depreciation and Amortization

Depreciation, as defined in the Uniform System of Accounts, is the loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of gas plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand, and requirements of public authorities.

Depreciation, as used in accounting, is a method of distributing fixed capital costs over a period of time by allocating annual amounts to expense. Each annual amount of

such depreciation expense is part of that year's total cost of providing utility service. Normally, the period of time over which the fixed capital cost is allocated to the cost of service is equal to the period of time over which an item renders service, that is, the item's service life. The most prevalent method of allocation is to distribute an equal amount of cost to each year of service life. This method is known as the straight line method of depreciation.

The calculation of annual and accrued depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. These subjects are discussed in the sections which follow.

For most plant accounts, depreciation accruals and accrued depreciation were calculated using the straight line method, the remaining life basis, the average service life (ASL) procedure for plant installed prior to 1983 and the equal life group (ELG) procedure for property installed subsequent to 1982. The calculations were based on the attained ages and estimated service life characteristics for each depreciable group of gas property. For certain general plant accounts, the amortization amounts, annual and accrued, were based on the age of the vintage and the selected amortization period.

Survivor curves were used to reflect the expected dispersion of retirements, thus providing a consistent method of estimating service lives and depreciation for mass property. Iowa type curves were used to depict the estimated survivor curves. For life span groups, the estimate of life characteristics is consistent because the calculated lives of the units within a group are obtained by employing a single probable retirement date for the entire group.

Service Life Estimates

The method of estimating service life consisted of compiling the service life history of the plant accounts, subaccounts or depreciable groups, reducing this history to trends through the use of acceptable actuarial techniques, and forecasting the trend of survivors for each depreciable group on the basis of interpretations of past trends and consideration of Company plans for the future. The combination of the historical trend and the estimated future trend yielded a complete pattern of life characteristics from which the average service life was derived.

The Company's service life estimates used in the depreciation calculation incorporated historical data compiled through 2022 from the property records of the Company. Such data included plant additions, retirements, transfers and other activity. Generally, retirement data for the years 1939 through 2022 were used in the actuarial life table computations which were the primary statistical support of the service life estimates.

A general understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirement was obtained through field trips conducted during the course of the service life study. Discussions with operating and management personnel also provided information regarding plans for the future which was incorporated in the interpretation and extrapolation of the statistical analyses.

AMORTIZATION OF NET SALVAGE

Inasmuch as this report relates primarily to Pennsylvania rate regulation practices, under which experienced costs of negative net salvage are amortized after their occurrence, no adjustments for expected salvage were made to either the annual depreciation accrual or the calculated accrued depreciation for the individual accounts. The annual provision for recovering negative net salvage is based on the amortization of net salvage over a five-year period.

PART II. ESTIMATION OF SURVIVOR CURVES

PART II. ESTIMATION OF SURVIVOR CURVES

The calculation of annual depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. The estimation of survivor curves is discussed below, and the development of net salvage is discussed in later sections of this report.

SURVIVOR CURVES

The use of an average service life for a property group implies that the various units in the group have different lives. Thus, the average life may be obtained by determining the separate lives of each of the units or by constructing a survivor curve by plotting the number of units which survive at successive ages.

The survivor curve graphically depicts the amount of property existing at each age throughout the life of an original group. From the survivor curve, the average life of the group, the remaining life expectancy, the probable life, and the frequency curve can be calculated. In Figure 1, a typical smooth survivor curve and the derived curves are illustrated. The average life is obtained by calculating the area under the survivor curve, from age zero to the maximum age, and dividing this area by the ordinate at age zero. The remaining life expectancy at any age can be calculated by obtaining the area under the curve, from the observation age to the maximum age, and dividing this area by the percent surviving at the observation age. For example, in Figure 1, the remaining life at age 30 is equal to the crosshatched area under the survivor curve divided by 29.5 percent surviving at age 30. The probable life at any age is developed by adding the age and remaining life. If the probable life of the property is calculated for each year of age, the probable life curve shown in the chart can be developed. The frequency curve presents the number of units retired in each age interval. It is derived by obtaining the differences between the amount of property surviving at the beginning and at the end of each interval.

This study has incorporated the use of Iowa curves developed from a retirement rate analysis of historical retirement history. A discussion of the concepts of survivor curves and of the development of survivor curves using the retirement rate method is presented below.

Iowa Type Curves

The range of survivor characteristics usually experienced by utility and industrial properties is encompassed by a system of generalized survivor curves known as the Iowa type curves. There are four families in the Iowa system, labeled in accordance with the location of the modes of the retirements (or the portion of the frequency curve with the highest level of retirements) in relationship to the average life and the relative height of the modes. The left moded curves, presented in Figure 2, are those in which the greatest frequency of retirement occurs to the left of, or prior to, average service life. The symmetrical moded curves, presented in Figure 3, are those in which the greatest frequency of retirement occurs at average service life. The right moded curves, presented in Figure 4, are those in which the greatest frequency occurs to the right of, or after, average service life. The origin moded curves, presented in Figure 5, are those in which the greatest frequency of retirement occurs at the origin, or immediately after age zero. The letter designation of each family of curves (L, S, R or O) represents the location of the mode of the associated frequency curve with respect to the average service life. The numbers represent the relative heights of the modes of the frequency curves within each family. A higher number designates a higher mode curve.

The Iowa curves were developed at the Iowa State College Engineering Experiment Station through an extensive process of observation and classification of the ages at which industrial property had been retired. A report of the study which resulted in the classification of property survivor characteristics into 18 type curves, which constitute three of the four families, was published in 1935 in the form of the Experiment Station's Bulletin 125.

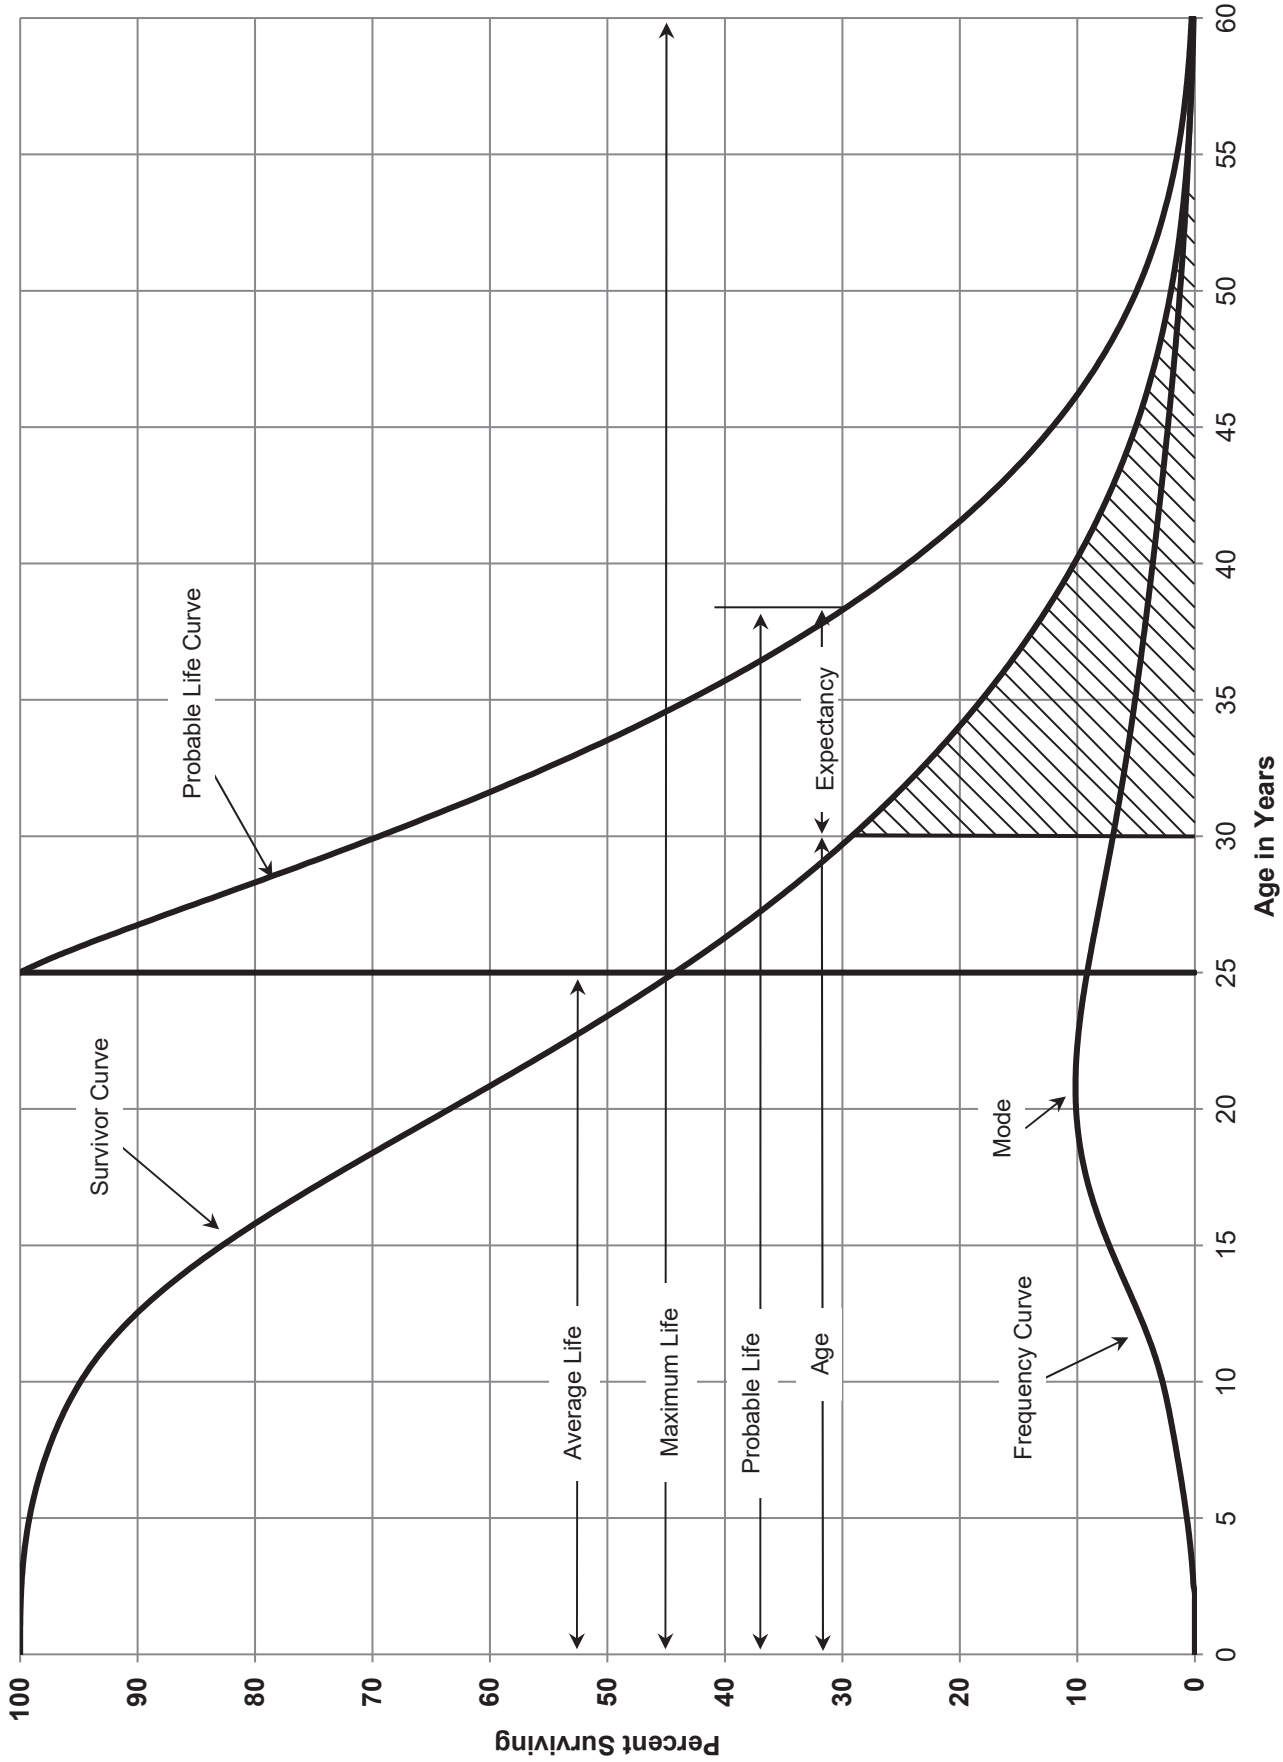

FIGURE 1. TYPICAL SURVIVOR CURVE AND DERIVED CURVES

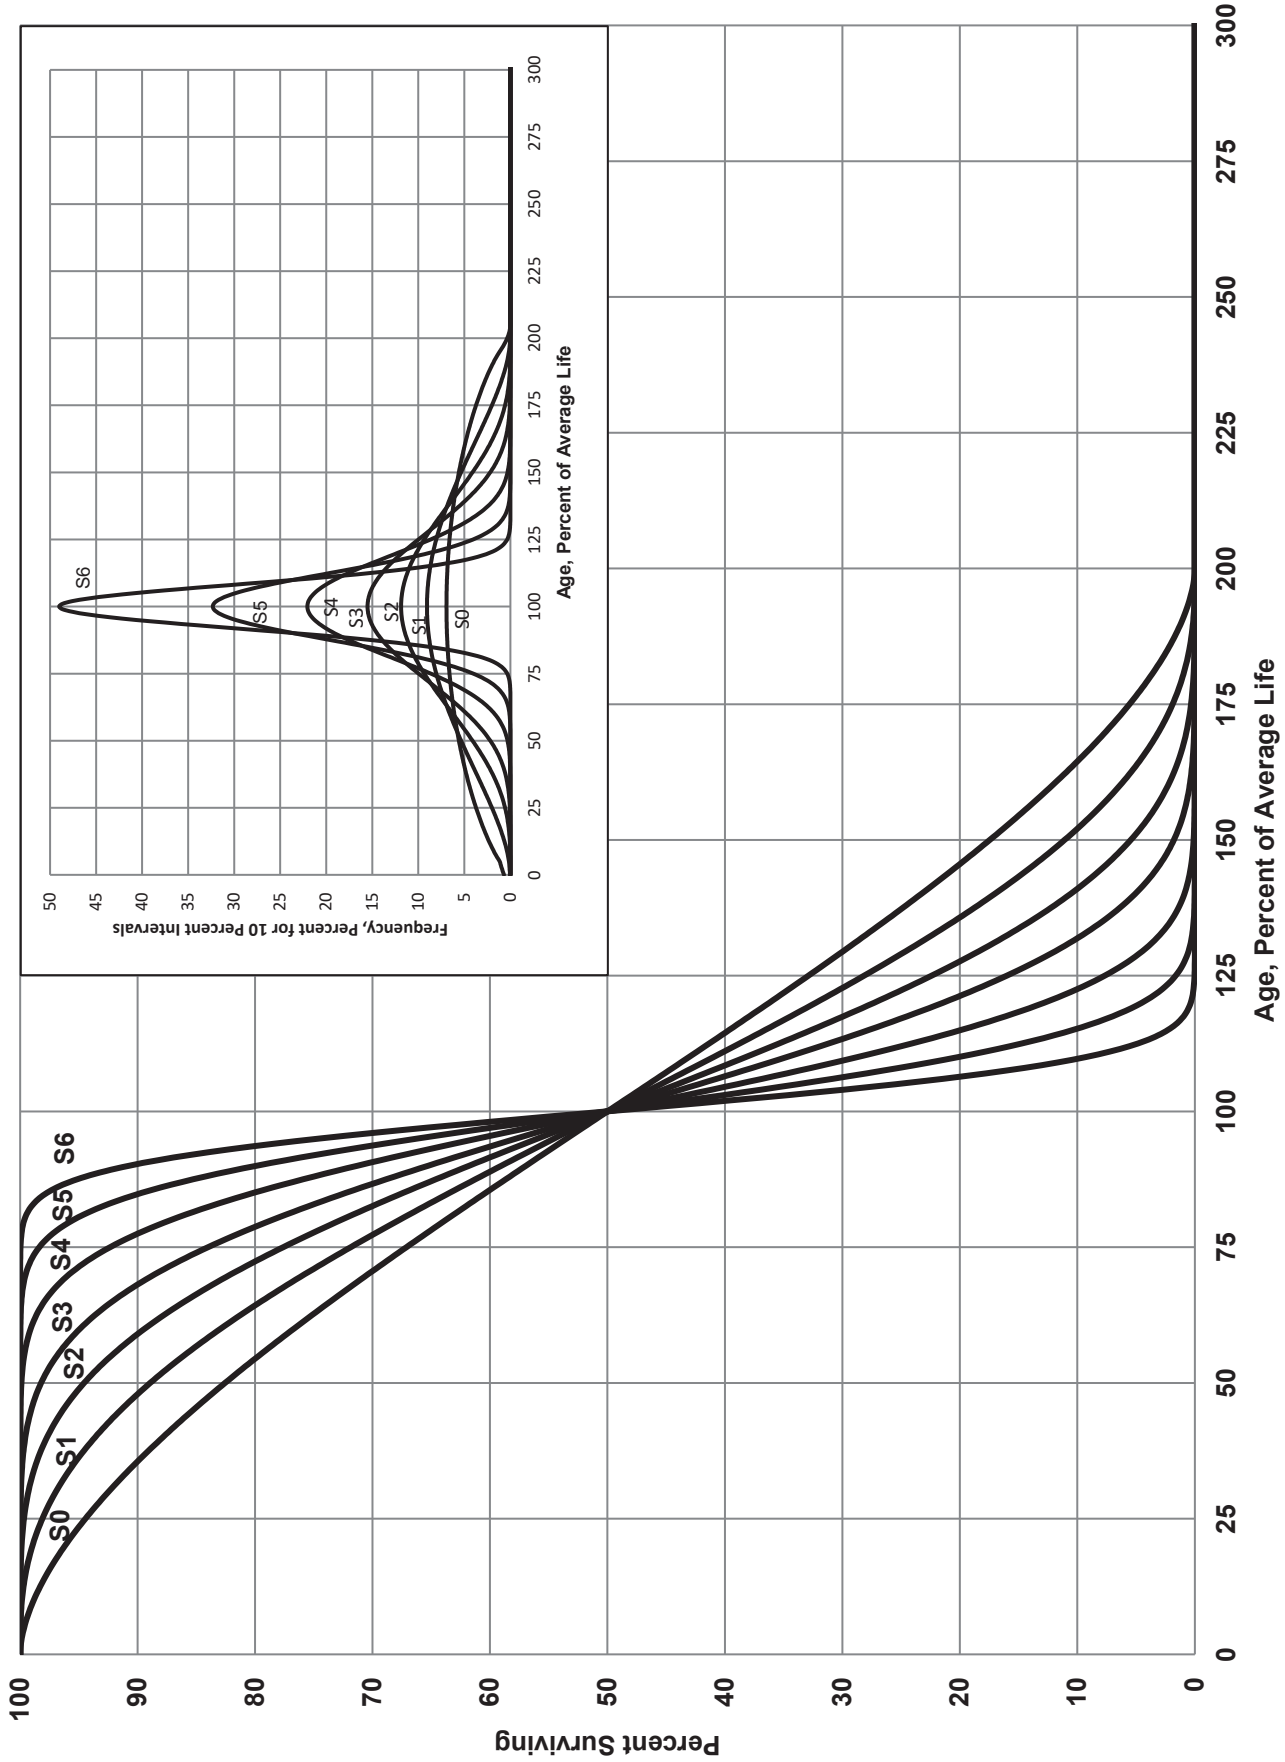

FIGURE 3. SYMMETRICAL OR "S" IOWA TYPE SURVIVOR CURVES

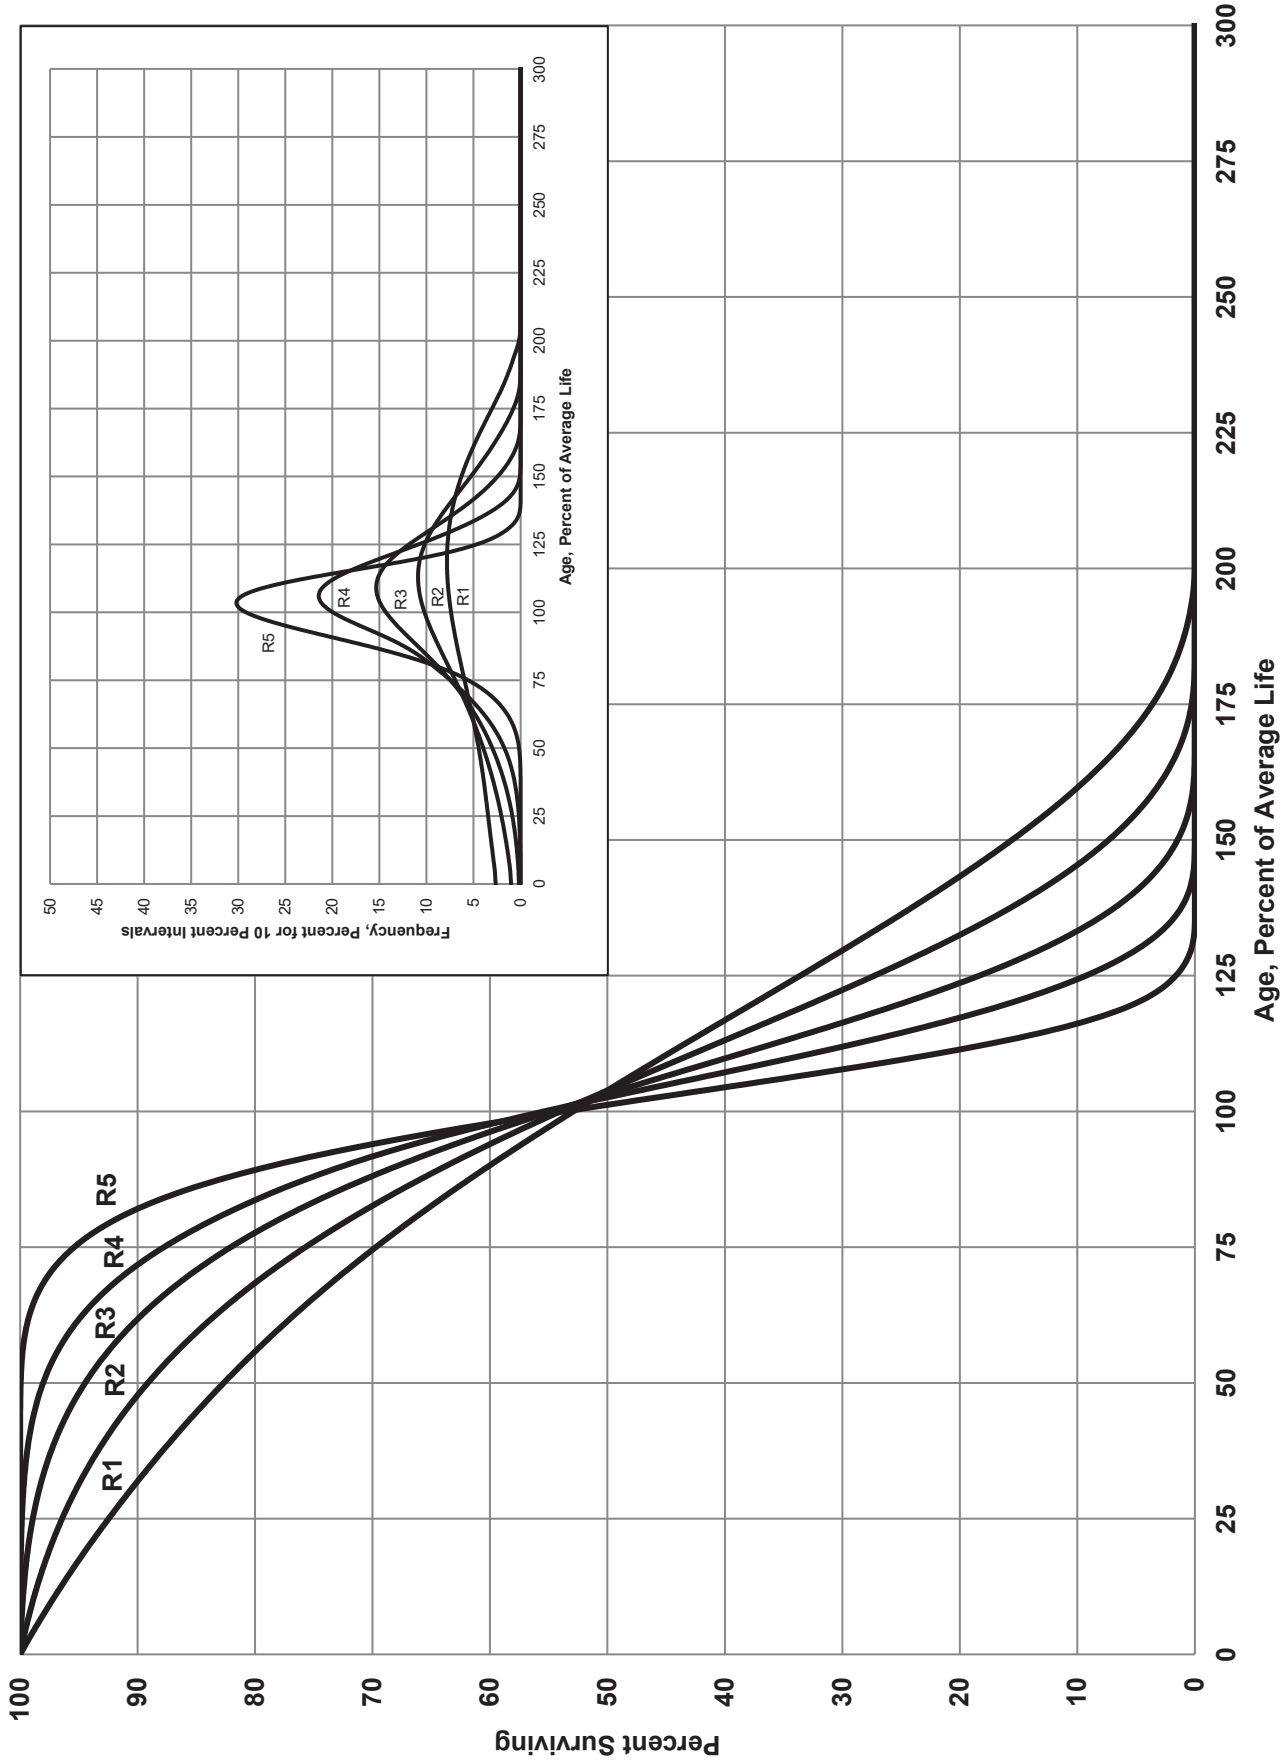

FIGURE 4. RIGHT MODAL OR "R" IOWA TYPE SURVIVOR CURVES

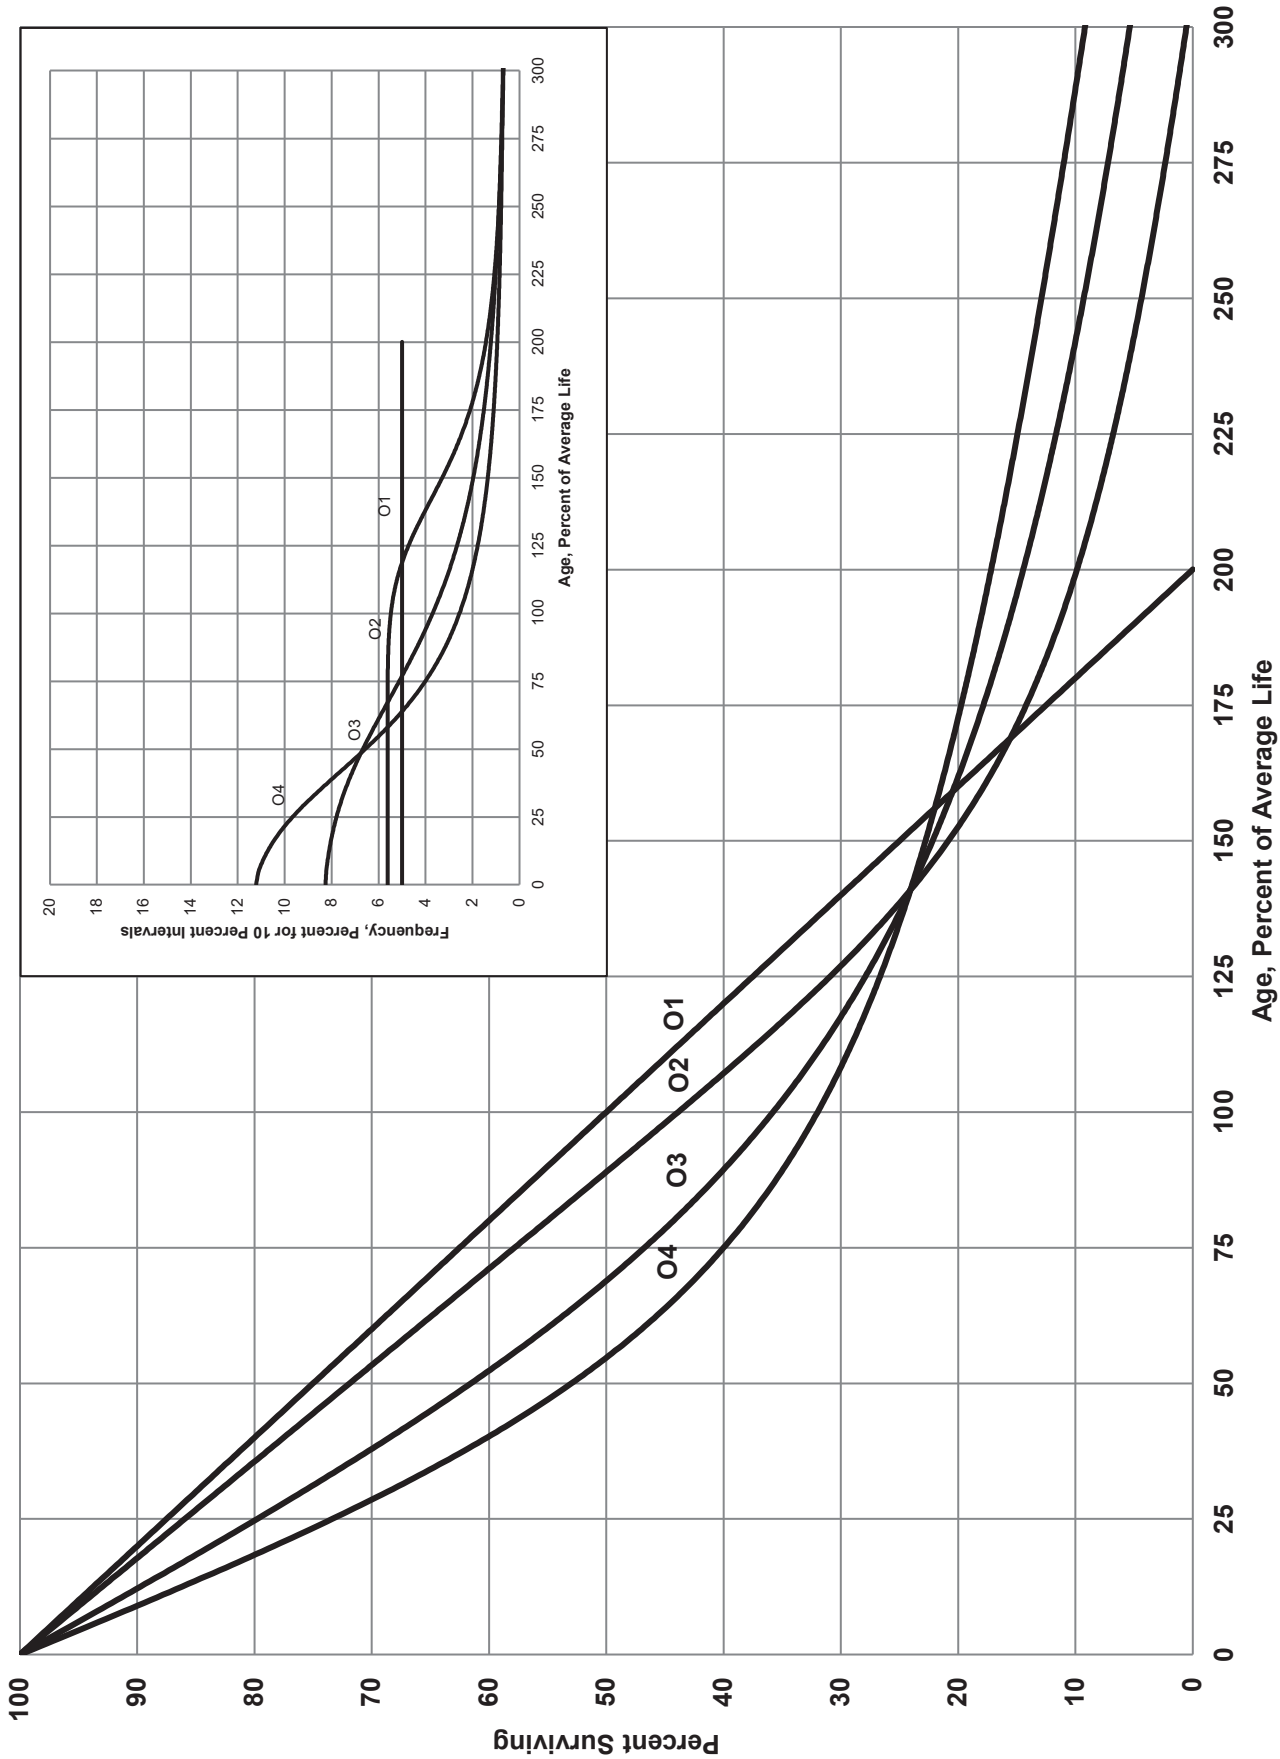

FIGURE 5. ORIGIN MODAL OR "O" IOWA TYPE SURVIVOR CURVES

These curve types have also been presented in subsequent Experiment Station bulletins and in the text, "Engineering Valuation and Depreciation."[1] In 1957, Frank V. B. Couch, Jr., an Iowa State College graduate student, submitted a thesis presenting his development of the fourth family consisting of the four O type survivor curves.

Retirement Rate Method of Analysis

The retirement rate method is an actuarial method of deriving survivor curves using the average rates at which property of each age group is retired. The method relates to property groups for which aged accounting experience is available and is the method used to develop the original stub survivor curves in this study. The method (also known as the annual rate method) is illustrated through the use of an example in the following text and is also explained in several publications including "Statistical Analyses of Industrial Property Retirements,"[2] "Engineering Valuation and Depreciation,"[3] and "Depreciation Systems."[4]

The average rate of retirement used in the calculation of the percent surviving for the survivor curve (life table) requires two sets of data: first, the property retired during a period of observation, identified by the property's age at retirement; and second, the property exposed to retirement at the beginning of the age intervals during the same period. The period of observation is referred to as the experience band. The band of years which represent the installation dates of the property exposed to retirement during the experience band is referred to as the placement band. An example of the calculations used in the development of a life table follows. The example includes schedules of annual aged property transactions, a schedule of plant exposed to retirement, a life table and illustrations of smoothing the stub survivor curve.

Schedules of Annual Transactions in Plant Records

The property group used to illustrate the retirement rate method is observed for the experience band 2015-2024 for which there were placements during the years 2010-2024. In order to illustrate the summation of the aged data by age interval, the data were compiled in the manner presented in Schedules 1 and 2 on pages II-11 and II-12. In Schedule 1, the year of installation (year placed) and the year of retirement are shown. The age interval during which a retirement occurred is determined from this information. In the example which follows, $10,000 of the dollars invested in 2010 were retired in 2015. The $10,000 retirement occurred during the age interval between 4½ and 5½ years on the basis that approximately one-half of the amount of property was installed prior to and subsequent to July 1 of each year. That is, on the average, property installed during a year is placed in service at the midpoint of the year for the purpose of the analysis. All retirements also are stated as occurring at the midpoint of a one-year age interval of time, except the first age interval which encompasses only one-half year.

The total retirements occurring in each age interval in a band are determined by summing the amounts for each transaction year-installation year combination for that age interval. For example, the total of $143,000 retired for age interval 4½-5½ is the sum of the retirements entered on Schedule 1 immediately above the stair step line drawn on the table beginning with the 2015 retirements of 2010 installations and ending with the 2024 retirements of the 2019 installations. Thus, the total amount of 143 for age interval 4½-5½ equals the sum of:

$$10 + 12 + 13 + 11 + 13 + 13 + 15 + 17 + 19 + 20.$$

SCHEDULE 1. RETIREMENTS FOR EACH YEAR 2015-2024
SUMMARIZED BY AGE INTERVAL

Experience Band 2015-2024 Placement Band 2010-2024

Year Placed	Retirements, Thousands of Dollars During Year 2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Total During Age Interval	Age Interval

[a] Transfer Affecting Exposures at Beginning of Year

[b] Transfer Affecting Exposures at End of Year

[c] Sale with Continued Use

Parentheses Denote Credit Amount.

In Schedule 2, other transactions which affect the group are recorded in a similar manner. The entries illustrated include transfers and sales. The entries which are credits to the plant account are shown in parentheses. The items recorded on this schedule are not totaled with the retirements, but are used in developing the exposures at the beginning of each age interval.

Schedule of Plant Exposed to Retirement

The development of the amount of plant exposed to retirement at the beginning of each age interval is illustrated in Schedule 3 on page II-14. The surviving plant at the beginning of each year from 2015 through 2024 is recorded by year in the portion of the table headed "Annual Survivors at the Beginning of the Year." The last amount entered in each column is the amount of new plant added to the group during the year. The amounts entered in Schedule 3 for each successive year following the beginning balance or addition are obtained by adding or subtracting the net entries shown on Schedules 1 and 2. For the purpose of determining the plant exposed to retirement, transfers-in are considered as being exposed to retirement in this group at the beginning of the year in which they occurred, and the sales and transfers-out are considered to be removed from the plant exposed to retirement at the beginning of the following year. Thus, the amounts of plant shown at the beginning of each year are the amounts of plant from each placement year considered to be exposed to retirement at the beginning of each successive transaction year. For example, the exposures for the installation year 2020 are calculated in the following manner:

Exposures at age 0	= amount of addition	= $750,000
Exposures at age ½	= $750,000 - $ 8,000	= $742,000
Exposures at age 1½	= $742,000 - $18,000	= $724,000
Exposures at age 2½	= $724,000 - $20,000 - $19,000	= $685,000
Exposures at age 3½	= $685,000 - $22,000	= $663,000

SCHEDULE 3. PLANT EXPOSED TO RETIREMENT
JANUARY 1 OF EACH YEAR 2015-2024
SUMMARIZED BY AGE INTERVAL

Experience Band 2015-2024 Placement Band 2010-2024

Year Placed	Exposures, Thousands of Dollars — Annual Survivors at the Beginning of the Year										Total at Beginning of Age Interval	Age Interval
	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024

2016		460[a]	455	444	432	419	405	390	374	356	1,952	7½-8½
2017			510[a]	504	492	479	464	448	431	412	2,463	6½-7½
2018				580[a]	574	561	546	530	501	482	3,057	5½-6½
2019					660[a]	653	639	623	628	609	3,789	4½-5½
2020						750[a]	742	724	685	663	4,332	3½-4½
2021							850[a]	841	821	799	4,955	2½-3½
2022								960[a]	949	926	5,719	1½-2½
2023									1,080[a]	1,069	6,579	½-1½
2024										1,220[a]	7,490	0-½
Total	1,975	2,382	2,824	3,318	3,872	4,494	5,247	6,017	6,852	7,799	44,780	

[a]Additions during the year

For the entire experience band 2015-2024, the total exposures at the beginning of an age interval are obtained by summing diagonally in a manner similar to the summing of the retirements during an age interval (Schedule 1). For example, the figure of 3,789, shown as the total exposures at the beginning of age interval 4½-5½, is obtained by summing:

255 + 268 + 284 + 311 + 334 + 374 + 405 + 448 + 501 + 609.

Original Life Table

The original life table, illustrated in Schedule 4 on page II-16, is developed from the totals shown on the schedules of retirements and exposures, Schedules 1 and 3, respectively. The exposures at the beginning of the age interval are obtained from the corresponding age interval of the exposure schedule, and the retirements during the age interval are obtained from the corresponding age interval of the retirement schedule. The retirement ratio is the result of dividing the retirements during the age interval by the exposures at the beginning of the age interval. The percent surviving at the beginning of each age interval is derived from survivor ratios, each of which equals one minus the retirement ratio. The percent surviving is developed by starting with 100% at age zero and successively multiplying the percent surviving at the beginning of each interval by the survivor ratio, i.e., one minus the retirement ratio for that age interval. The calculations necessary to determine the percent surviving at age 5½ are as follows:

Percent surviving at age 4½	=	88.15				
Exposures at age 4½	=	3,789,000				
Retirements from age 4½ to 5½	=	143,000				
Retirement Ratio	=	143,000	÷	3,789,000	=	0.0377
Survivor Ratio	=	1.000	-	0.0377	=	0.9623
Percent surviving at age 5½	=	(88.15)	x	(0.9623)	=	84.83

The totals of the exposures and retirements (columns 2 and 3) are shown for the purpose of checking with the respective totals in Schedules 1 and 3. The ratio of the total retirements to the total exposures, other than for each age interval, is meaningless.

SCHEDULE 4. ORIGINAL LIFE TABLE
CALCULATED BY THE RETIREMENT RATE METHOD

Experience Band 2015-2024 Placement Band 2010-2024

(Exposure and Retirement Amounts are in Thousands of Dollars)

Age at Beginning of Interval	Exposures at Beginning of Age Interval	Retirements During Age Interval	Retirement Ratio	Survivor Ratio	Percent Surviving at Beginning of Age Interval
(1)	(2)	(3)	(4)	(5)	(6)

10.5	823	83	0.1009	0.8991	61.84
11.5	531	64	0.1205	0.8795	55.60
12.5	323	44	0.1362	0.8638	48.90
13.5	167	26	0.1557	0.8443	42.24
					35.66
Total	44,780	1,606			

Column 2 from Schedule 3, Column 12, Plant Exposed to Retirement.
Column 3 from Schedule 1, Column 12, Retirements for Each Year.
Column 4 = Column 3 Divided by Column 2.
Column 5 = 1.0000 Minus Column 4.
Column 6 = Column 5 Multiplied by Column 6 as of the Preceding Age Interval.

The original survivor curve is plotted from the original life table (column 6, Schedule 4). When the curve terminates at a percent surviving greater than zero, it is called a stub survivor curve. Survivor curves developed from retirement rate studies generally are stub curves.

Smoothing the Original Survivor Curve

The smoothing of the original survivor curve eliminates any irregularities and serves as the basis for the preliminary extrapolation to zero percent surviving of the original stub curve. Even if the original survivor curve is complete from 100% to zero percent, it is desirable to eliminate any irregularities, as there is still an extrapolation for the vintages which have not yet lived to the age at which the curve reaches zero percent. In this study, the smoothing of the original curve with established type curves was used to eliminate irregularities in the original curve.

The Iowa type curves are used in this study to smooth those original stub curves which are expressed as percents surviving at ages in years. Each original survivor curve was compared to the Iowa curves using visual and mathematical matching in order to determine the better fitting smooth curves. In Figures 6, 7, and 8, the original curve developed in Schedule 4 is compared with the L, S, and R Iowa type curves which most nearly fit the original survivor curve. In Figure 6, the L1 curve with an average life between 12 and 13 years appears to be the best fit. In Figure 7, the S0 type curve with a 12-year average life appears to be the best fit and appears to be better than the L1 fitting. In Figure 8, the R1 type curve with a 12-year average life appears to be the best fit and appears to be better than either the L1 or the S0.

In Figure 9, the three fittings, 12-L1, 12-S0 and 12-R1 are drawn for comparison purposes. It is probable that the 12-R1 Iowa curve would be selected as the most representative of the plotted survivor characteristics of the group.

PART III. SERVICE LIFE CONSIDERATIONS

PART III. SERVICE LIFE CONSIDERATIONS

Field Trips

In order to be familiar with the operation of the Company and observe representative portions of the plant, field trips have been conducted periodically. A general understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirements are obtained during these field trips. This knowledge and information were incorporated in the interpretation and extrapolation of the statistical analyses.

During the extensive period of years our firm has been conducting depreciation studies for the Company, the field trips have resulted in the review of operations of the Company's property numerous times. The following is a list of the locations visited during the past trips.

Judgment

The survivor curve estimates were based on judgment which considered a number of factors. The primary factors were the statistical analyses of data; current Company policies and outlook as determined during the field trips and other conversations with management; and the survivor curve estimates from previous studies of this company and other gas companies.

For many of the mass plant accounts and subaccounts for which survivor curves were estimated, the statistical analyses resulted in good to excellent indications of the survivor patterns experienced. Generally, the information external to the statistics led to little or no significant departure from the indicated survivor curves for the following accounts:

Account No.	Account Name
325.04	Rights-of-Way
327.00	Field Compressor Station Structures
328.00	Field Measuring and Regulating Station Structures
330.00	Producing Gas Wells - Well Construction
331.00	Producing Gas Wells - Well Equipment
332.00	Field Lines
333.00	Field Compressor Station Equipment
334.00	Field Measuring and Regulating Station Equipment
337.00	Other Equipment
351.00	Structures and Improvements
352.02	Wells - Equipment
353.01	Lines
354.01	Compressor Station Equipment
366.02	Structures and Improvements - Measuring and Regulating
366.03	Structures and Improvements - Other
367.00	Mains
368.00	Compressor Station Equipment
369.00	Measuring and Regulating Station Equipment
371.00	Other Equipment
375.01	Structures and Improvements - Measuring and Regulating - Other - Minor
375.02	Structures and Improvements - Measuring and Regulating - Other - Major
376.00	Mains
378.00	Measuring and Regulating Station Equipment - General
380.00	Services

381.00	Meters
382.00	Meter Installations
385.00	Industrial Measuring and Regulating Station Equipment
387.00	Other Equipment
392.01	Transportation Equipment - Automobiles
392.02	Transportation Equipment - Trucks
392.03	Transportation Equipment - Trailers
396.00	Power Operated Equipment

The combined Account 376.00, Mains, is used to illustrate the manner in which the study was conducted for the groups in the preceding list. Account 376.00 represents 55 percent of the total depreciable plant. Aged plant accounting data have been compiled for the years 1938 through 2022. These data have been coded in the course of the Company's normal record keeping according to account or property group, type of transaction, year in which the transaction took place, and year in which the gas plant was placed in service. The retirements, and other plant transactions, and plant additions were analyzed by the retirement rate method.

The survivor curve estimate for the periods 1938 through 2022 and 1963 through 2022 was selected to analyze the rates of retirements of distribution mains. The current indication is that an Iowa 72-R1.5 survivor curve is being experienced, based on the statistical analysis for recent history, 1963-2022 and the overall period, 1939-2022. Discussions with operating and managing personnel as well as field observations related to reasons for retirement indicated that little change over the last few years or in the next few years are expected. Thus, a slight change to a longer average service life and survivor curve from the last study.

For large structures in Account 375, a life span was estimated for each major structure. Each life span was estimated on the basis of type of construction, use, age, condition, and management's plans within the foreseeable future. An interim survivor curve was estimated for the major structures, based primarily upon the statistical analysis of the interim retirements that have been experienced by the Company's large buildings.

The estimates for land, leaseholds, and rights-of-way represented by Accounts 350.11, 350.21, 352.11, 352.12, 365.02, 374.02, and 389.02 were based on a review of the ages and magnitude of experienced retirements and a consideration of the survivor curves of the physical plant with which the rights are associated. Generally, the rates of retirement have been small during the early portion of the life cycles and are of use only in defining the early ages of the estimated survivor curves.

The maximum lives of the estimated curves generally coincide with the maximum lives of the survivor curves determined for the associated physical plant.

The survivor curve for Account 351 was based on statistical analyses and a knowledge of the type of structures in the account. The structures generally are small to medium size metal buildings of the nature expected to experience average service lives approximating 40 to 60 years. The stub survivor curves for the 1943-2022 experience band for Account 351 is reasonably well fit by an R2 Iowa type curve with a 60-year average service life which provides for significant retirements during ages 35 through 65.

The survivor curve estimate for Account 355, Measuring and Regulating Station Equipment, is based on statistical analyses and the nature of the equipment in the account. The range of service lives used by others for this account is 40 to 55 years. The estimates for the Company's measuring and regulating equipment used in other functions range from 20 to 50 years with low mode survivor curves. The 60-R2.5 is a reasonable interpretation of the available experience, however, longer than the upper end of the range of lives expected for this equipment. The survivor curve estimates for the remaining accounts were based on judgment incorporating the statistical analyses, the nature of the equipment and the typical range of lives used in the industry.

PART IV. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION

PART IV. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION

Group Depreciation Procedures

A group procedure for depreciation is appropriate when considering more than a single item of property. Normally, the items within a group do not have identical service lives but have lives that are dispersed over a range of time. There are two primary group procedures, namely, average service life and equal life group.

In the average service life procedure, the rate of annual depreciation is based on the average life or average remaining life of the group, and this rate is applied to the surviving balances of the group's cost. A characteristic of this procedure is that the cost of plant retired prior to average life is not fully recouped at the time of retirement, whereas the cost of plant retired subsequent to average life is more than fully recouped. Over the entire life cycle, the portion of cost not recouped prior to average life is balanced by the cost recouped subsequent to average life.

In the equal life group procedure, the property group is subdivided according to service life. That is, each equal life group includes that portion of the property which experiences the life of that specific group. The relative size of each equal life group is determined from the property's life dispersion curve. This procedure eliminates the need to base depreciation on average lives, inasmuch as each group is equivalent to a unit having a single life. The full costs of short-lived units are accrued during their lives, leaving no deferral of accruals required to be added to the annual costs associated with long-lived units. The calculated depreciation for the property group is the summation of the calculated depreciation based on the service life of each equal life group.

Remaining Life Annual Accruals

For the purpose of calculating remaining life accrual rates as of November 30, 2026, the estimated book depreciation reserve for each plant account is allocated among vintages in proportion to the calculated accrued depreciation for the account. Explanations of remaining life accruals and calculated accrued depreciation for the vintages calculated by the average service life procedure and for the vintages calculated by the equal life group procedure follow. The detailed calculations are set forth in the Results of Study section of the report.

Average Service Life Procedure

In the average service life procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the average remaining life of the vintage. The average remaining life is a directly weighted average derived from the estimated future survivor curve in accordance with the average service life procedure.

The calculated accrued depreciation for each depreciable property group represents that portion of the depreciable cost of the group which would not be allocated to expense through future whole life depreciation accruals if current forecasts of life characteristics are used as the basis for such accruals. The accrued depreciation calculation consists of applying an appropriate ratio to the surviving original cost of each vintage of each account, based upon the attained age and service life. The straight line accrued depreciation ratios are calculated as follows for the average service life procedure:

$$Ratio = 1 - \frac{Average\ Remaining\ Life\ Expectancy}{Average\ Service\ Life}.$$

Equal Life Group Procedure

In the equal life group procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the composite remaining life for the surviving original cost of that vintage. The composite remaining life is derived by compositing the individual equal life group remaining lives in accordance with the following equation:

$$\text{Composite Remaining Life} - \frac{\left(\frac{\text{Book Cost}}{\text{Life}} \times \text{Remaining Life}\right)}{\frac{\text{Book Cost}}{\text{Life}}}$$

The book costs and lives of the several equal life groups which are summed in the foregoing equation are defined by the estimated future survivor curve.

Inasmuch as book cost divided by life equals the whole life annual accrual, the foregoing equation reduces to the following form:

$$\text{Composite Remaining LIfe} = \frac{\sum \text{Whole Life Future Accruals}}{\sum \text{Whole Life Annual Accruals}}$$

or

$$\text{Composite Remaining Life} = \frac{\sum \text{Book Cost} - \text{Calc. Reserve}}{\sum \text{Whole Life Annual Accrual}}.$$

The annual accrual rate for each account is equal to the sum of the remaining life annual accruals for all vintages divided by the account's total original cost. The account's "composite remaining life" is calculated by dividing the sum of the future book accruals for all vintages by the sum of the remaining life annual accruals for all vintages.

The calculated accrued depreciation in the equal life group procedure also represents that portion of depreciable cost which will not be allocated to expense through

future accruals. However, the calculation is based at the equal life group level rather than the vintage group level and does not require the use of averages. The equal life group accrued depreciation ratio is calculated as follows:

$$Ratio = \frac{Remaining\ Life}{Average\ Service\ Life}.$$

Inasmuch as service life minus remaining life equals age, when averages are not employed, the foregoing equation reduces to:

$$Ratio = \frac{Age}{Service\ Life}.$$

The table on the following page illustrates the procedure for calculating straight line equal life group accrued depreciation, using an Iowa 10-L2.5 Survivor curve and a November 30, 2026 calculation date.

In the table, each equal life group is defined by the age interval shown in columns 1 and 2, which identify the ages at which the first and last retirement of each group occur. The group's designated life, shown in column 3, is the midpoint of the interval. In the calculation, the equal life groups of each vintage are arranged such that the midpoint of each one-year age interval coincides with the calculation date, e.g., November 30 in this case. This enables the calculation of annual accruals which are centered on, or as of, the same date as the calculation of accrued depreciation.

The retirement during each age interval, shown in column 4, is the size of each equal life group. It is derived from the Iowa 10-L2.5 survivor curve and is the difference between the percents surviving (not shown) at the beginning and end of the age interval.

TOTAL									100.00000

Each equal life group's whole life annual accrual, shown in column 5, equals the group's size (column 4) divided by its life (column 3), except that for the first age interval, the annual accrual is set equal to the group's size.

Columns 6 through 10 show the derivation of the whole life annual factor and accrued factor for each vintage based on the data developed in the first five columns. The year installed is shown in column 6. For all vintages other than the first year (2026), the summation of annual accruals for each year installed, shown in column 7, is calculated by adding one-half of the group annual accrual (column 5) for that vintage's current age interval plus the group annual accruals for all succeeding age intervals. For example, the

figure 11.80973821239 for 2025 equals one-half of 0.24014114326 plus all of the succeeding figures in column 5. Only two-thirds of the annual accrual for the vintage's current age interval group is included in the summation because the equal life group for that interval expires at the midpoint of the current year.

The summation of annual accruals (column 7) for installations during 2026 is calculated on the basis of an in-service date at the midpoint of twelve months, i.e., six months prior to November 30. Inasmuch as the overall calculation is centered on November 30, 2026, the accrual for 2026 installations (during the twelve months) represents only one-half of one year, five-twelfth of the year prior to November 30 plus one-twelfths year following November 30. For this reason, the first figure in column 7, for vintage 2026, equals the group annual accrual for 2026 plus one-half of the group annual accruals for each of the subsequent years.

The average percent surviving, derived from the Iowa 10-L2.5 survivor curve, is shown in column 8 for each age interval. The annual factor, shown in column 9, is the result of dividing the summation of annual accruals (column 7) by the average percent surviving (column 8).

The accrued depreciation factor, shown in column 10, equals the annual factor multiplied by the age of the group as of November 30, 2026.

CALCULATION OF ANNUAL AND ACCRUED AMORTIZATION

Amortization, as defined in the Uniform System of Accounts, is the gradual extinguishment of an amount in an account by distributing such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during

which it is anticipated the benefit will be realized. Normally, the distribution of the amount is in equal amounts to each year of the amortization period.

The calculation of annual and accrued amortization requires the selection of an amortization period. The amortization periods used in this report were based on judgment which incorporated a consideration of the period during which the assets will render most of their service, the amortization periods and service lives used by other utilities, and the service life estimates previously used for the asset under depreciation accounting.

Amortization accounting is appropriate for certain General Plant accounts that represent numerous units of property, but a very small portion of depreciable gas plant in service. The accounts and their amortization periods are as follows:

Account		Amortization Period, Years
391.00,	Office Furniture and Equipment	
	Furniture	20
	Computers	5
	Equipment	15
394.00,	Tools, Shop and Garage Equipment	25
393.00,	Stores Equipment	25
394.01,	Dual Fuel Stations	15
397.00,	Communication Equipment	
	Telephone	15
	Microwave	18
	Structures	25
	Radio	15
398.00,	Miscellaneous Equipment	15

For the purpose of calculating annual amortization amounts as of November 30, 2026, the book depreciation reserve for each plant account or subaccount is assigned or allocated to vintages. The book reserve assigned to vintages with an age greater than

the amortization period is equal to the vintage's original cost. The remaining book reserve is allocated among vintages with an age less than the amortization period in proportion to the calculated accrued amortization. The calculated accrued amortization is equal to the original cost multiplied by the ratio of the vintage's age to its amortization period. The annual amortization amount is determined by dividing the future amortizations (original cost less allocated book reserve) by the remaining period of amortization for the vintage.

AMORTIZATION OF NET SALVAGE

Experienced salvage is incorporated in the results of the study, as it was reported on the Company's books and records for the period January 1, 2022 through November 30, 2025. The data for the last month of 2025 and full year of 2026 are based on estimated experience. Results of the calculations are shown in Table 4.

Net salvage experienced during the five-year period is presented in this manner to determine the amount of negative net salvage to be amortized for book purposes. In developing the amount to be amortized, the data for the accounts which experienced positive net salvage have been netted with those for accounts which experienced negative net salvage.

In order to be consistent with this manner of recognizing net salvage, no adjustments for net salvage were made to the annual accruals and accrued depreciation calculated for each individual account. There were no exclusions from the 2022 through 2026 net salvage accrual.

PART V. RESULTS OF STUDY

PART V. RESULTS OF STUDY

DESCRIPTION OF SUMMARY TABULATIONS

Tables 1 through 4 presented on pages V-4 through V-11 summarize the results of the depreciation study as of November 30, 2026. Table 1 sets forth, by depreciable group, the estimated survivor curve, original cost, book depreciation reserve as of November 30, 2026, future book accruals, calculated annual accrual amount and rate, and composite remaining life for plant in service. Table 2 presents the bringforward of the book reserve to November 30, 2026. Table 3 sets forth the calculation of the depreciation accruals for the twelve months ended November 30, 2026. Table 4 presents the annual amortization of experienced and estimated net salvage based on the period 2022 through 2026.

DESCRIPTION OF DETAILED TABULATIONS

Supporting statistical data for the estimates of average service lives and survivor curves, the annual depreciation calculations, and gross salvage and cost of removal for the years 2022-2026 are presented in three sections.

The section beginning on page VI-2 sets forth, for each depreciable group analyzed by the retirement rate method, a chart depicting the original and estimated survivor curves followed by a tabular presentation of the original life table(s) plotted on the chart. A cumulative summary, by year installed, for gas plant and the supporting data for the original cost depreciation calculations are presented in the section beginning on page VII-2. The tabulations of experienced and estimated net salvage by year by account for the five-year period, 2022-2026, are presented in the section beginning on page VIII-2.

In the first section, the survivor curves estimated for the depreciable groups are shown as dark smooth curves on the charts. Each smooth survivor curve is denoted by a numeral followed by the type curve designation. The numeral used is the average life derived from the entire curve from 100 percent to zero percent surviving. In cases where only a segment of the estimated curve is used in the depreciation calculation, the numeral used for identification purposes is not a designation of the average life of the group. The titles of the charts indicate the group, the symbol used to plot the points of the original life table, and the experience and placement bands of the life tables which were plotted. The experience band indicates the range of years for which the retirements were used to develop the stub survivor curve. The placements indicate, for the related experience band, the range of years of installations which appear in the experience.

The tables of the calculated annual depreciation related to original cost are presented in the second section and indicate the estimated average survivor curves used in the calculations. The tables set forth, for each installation year, the original cost, calculated accrued depreciation, allocated book reserve, future book accruals, remaining life expectancy and the calculated annual accrual.

Detailed tabulations setting forth the cost of removal and salvage amounts, by plant account for each year, are presented beginning on page VIII-2. The total salvage and removal costs, by year, were used to calculate the five-year net salvage amortization presented in Table 4 on page V-11.

Peoples Natural Gas Company, LLC
375 North Shore Drive, Suite 600
Pittsburgh, PA 15212-5322

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant as of December 31, 2027. The results of our study as of November 30, 2026 are presented in our report titled "2026 Depreciation Study - Calculated Annual Depreciation Accruals Related to Gas Plant as of November 30, 2026". The same methods, procedures and estimates are used in both studies.

The attached report sets forth a description of the methods and procedures upon which the studies were based, the estimates of survivor curves and the calculated annual depreciation rates as of December 31, 2027.

Respectfully submitted,

GANNETT FLEMING VALUATION
AND RATE CONSULTANTS, LLC

PART I. RESULTS OF STUDY

PEOPLES NATURAL GAS COMPANY LLC
DEPRECIATION STUDY

PART I. RESULTS OF STUDY

DESCRIPTION OF SUMMARY TABULATIONS

Tables 1 through 4 presented on pages I-3 through I-10 summarize the results of the depreciation study as of December 31, 2027. Table 1 sets forth, by depreciable group, the estimated survivor curve, original cost, book depreciation reserve as of December 31, 2027, future book accruals, calculated annual accrual amount and rate, and composite remaining life for plant in service. Table 2 presents the bringforward of the book reserve to December 31, 2027. Table 3 sets forth the calculations of the depreciation accruals for the thirteen months ended December 31, 2027. Table 4 presents the annual amortization of experienced and estimated net salvage based on the period 2023 through 2027.

DESCRIPTION OF DETAILED TABULATIONS

The supporting data for the depreciation calculations are presented in account sequence in the section beginning on page II-6. The original cost, calculated accrued depreciation, allocated book reserve, future accruals, remaining life and annual accrual are shown for each vintage of each account or subaccount. The amounts of regular retirements, gross salvage and cost of removal are set forth by account for the years 2023 through 2027, beginning on pages III-2 through III-4.

PEOPLES NATURAL GAS COMPANY LLC

BEFORE THE PENNSYLVANIA PUBLIC UTILITY COMMISSION

Peoples Natural Gas Company LLC

Docket No. R-2026-3060855

Volume III

Exhibits 6-10

Peoples Natural Gas Company LLC

§ 53.53.III.E

35. Submit a schedule showing the Gross Receipts Tax Base used in computing Pennsylvania Gross Receipts Tax Adjustment.

* *

Not applicable to Peoples Natural Gas Company LLC.

Peoples Natural Gas Company LLC

§ 53.53.III.A

50. Provide a schedule of federal and Pennsylvania taxes, other than income taxes, calculated on the basis of test year per books, pro forma at present rates, and pro forma at proposed rates, to include the following categories:

a. Social security

b. Unemployment

c. Capital stock

d. Public utility realty

e. P.U.C. assessment

f. Other property

g. Any other appropriate categories

* *

See Attachments 1-3, below.

Peoples Natural Gas Company LLC

§ 53.53.III.A

48. Provide a copy of the latest capital stock tax report and the latest capital stock tax settlement.

* *

Not applicable to Peoples Natural Gas Company LLC.

Peoples Natural Gas Company LLC

§ 53.53.III.A

49. Submit details of calculations for Taxes, Other than Income where a company is assessed taxes for doing business in another state, or on its property located in another state.

* *

Peoples Natural Gas Company LLC does business solely within Pennsylvania. However, Peoples Natural Gas Company LLC does have contract storage inventory in other states that it pays taxes on the value of inventory. Refer to Exhibit No. 6, Schedule No. 2 (53.53.III.A.50) for the amount of such tax.

Peoples Natural Gas Company LLC

§ 53.53.II.A

8. State amount of debt interest utilized for income tax calculations, and details of debt interest computations, under each of the following rate case bases:

a. Actual test year

b. Annualized test year-end

c. Proposed test year-end

* *

Refer to page 3 of Exhibit No. 2, Schedule No. 4 (53.53 III.A.17).

Peoples Natural Gas Company LLC

§ 53.53.II.A

9. State amount of debt interest utilized for income tax calculations which has been allocated from the debt interest of an affiliate, and details of the allocation, under each of the following rate case bases:

a. Actual test year

b. Annualized test year-end

c. Proposed test year-end

* *

The Company calculates interest consistent with the Commission-approved Intercompany Demand Note and Intercompany Promissory Notes that it holds with its affiliate and Parent, PNG Companies LLC. Interest used in income tax calculations is calculated using the interest synchronization method.

Peoples Natural Gas Company LLC

§ 53.53.II.A

26. Provide the following income tax data:

a. Consolidated income tax adjustments, if applicable.

b. Interest for tax purposes (basis).

* *

a. Attached is a calculation of a consolidated tax adjustment for the Company which is part of the consolidated return. However, pursuant to Pa. Act 40, Section 1301.1 of the Public Utility Code, no adjustment has been reflected in the determination of income tax expense. Refer to Peoples Statement No. 7, the direct testimony of Angela Jiang.

b. Refer to page 3 of Exhibit No. 2, Schedule No. 4 (53.53.III.A.17).

Peoples Natural Gas Company LLC

§ 53.53.III.A

51. Submit a schedule showing for the last five years the income tax refunds, plus interest (net of taxes), received from the federal government due to prior years' claims.

* *

The Company has not had any refunds received from the federal government due to prior years' claims.

Peoples Natural Gas Company LLC

§ 53.53.III.A

52. Provide detailed computations showing the deferred income taxes derived by using accelerated tax depreciation applicable to post-1969 utility property increases productive capacity, and ADR rates on property. (Separate between state and federal; also, rate used)

a. State whether tax depreciation is based on all rate base items claimed as of the end of the test year, and whether it is the annual tax depreciation at the end of the test year.

b. Reconcile any difference between the deferred tax balance, as shown as a reduction to measures of value (rate base), and the deferred tax balance as shown on the balance sheet.

* *

Exhibit No. 7, Schedule 8, Attachment 2 (53.53.III.A.55) includes the calculation of deferred income taxes derived from the use of accelerated depreciation.

a. Tax depreciation is based on all rate base items claimed as of the end of the test year. Tax depreciation is the annual tax depreciation at the end of the test year.

b. Attachment 2 includes a reconciliation of deferred income tax balances to the amount shown as a reduction to measures of value.

Peoples Natural Gas Company LLC

§ 53.53.III.A

53. Submit a schedule showing a breakdown of the deferred income taxes by state and federal per books, pro-forma existing rates, and under proposed rates.

* *

Refer to Exhibit No. 7, Schedule 8, Attachments 1 and 2 (53.53.III.A.55).

Peoples Natural Gas Company LLC

§ 53.53.III.A

54. Submit a schedule showing a breakdown of accumulated investment tax credits (3 percent, 4 percent, 7 percent, 10 percent and 11 percent), together with details of methods used to write-off the unamortized balances.

* *

The Company has no accumulated investment tax credits.

Peoples Natural Gas Company LLC

§ 53.53.III.A

55. Submit a schedule showing the adjustments for taxable net income per books (including below-the-line items) and pro-forma under existing rates, together with an explanation of any difference between the adjustments. Indicate charitable donations and contributions in the tax calculation for rate making purposes.

* *

Please refer to pages 1-7 of this Schedule

								Att. 2

Peoples Natural Gas Company LLC

§ 53.53.III.A

56. Submit detailed calculations supporting taxable income before state and federal income taxes where the income tax is subject to allocation due to operations in another state, or due to operation of other taxable utility or non-utility business, or by operating divisions or areas.

* *

Peoples Natural Gas Company LLC's operations are solely within Pennsylvania. Therefore, no income tax is allocable to another state. However, the Company has contract storage inventory in other states that requires them to pay taxes on the value of inventory. Refer to Exhibit No. 6, Schedule No. 2 (53.53 III.A.50) for the amount of such tax.

Peoples Natural Gas Company LLC

§ 53.53.III.A

57. Submit detailed calculations showing the derivation of deferred income taxes for amortization of repair allowance if such policy is followed.

* *

The Company does not have deferred income taxes generated from amortization of a repair allowance.

Peoples Natural Gas Company LLC

§ 53.53.III.A

58. Furnish a breakdown of major items comprising prepaid and deferred income tax charges and other deferred income tax credits and reserves by accounting areas.

* *

Refer Exhibit No. 7, Schedule No. 8, Attachment 2 (53.53.III.A.55), which presents deferred income taxes for the Company.

Peoples Natural Gas Company LLC

§ 53.53.III.A

59. Provide details of the Federal Surtax Credit allocated to the Pennsylvania jurisdictional area, if applicable.

* *

No Federal Surtax Credit is available to the Company.

Peoples Natural Gas Company LLC

§ 53.53.III.A

62. Provide the accelerated tax depreciation and the book depreciation used to calculate test year deferrals in amounts segregated as follows:

For:

a. Property installed prior to 1970

b. Property installed subsequent to 1969 (indicate increasing capacity additions and nonincreasing capacity additions).

* *

a. As a result of its deemed asset acquisition of Peoples Natural Gas Division on February 1, 2010, the Peoples Gas Division on May 24, 2012 and the former Equitable Division on December 17, 2013, the Company has no assets that are considered for income tax purposes as placed in service prior to 1970.

b. All of Peoples Natural Gas Division's assets were acquired on or after February 1, 2010, the Peoples Gas Division were acquired on or after May 24, 2012 and the former Equitable Division's assets were acquired on or after December 17, 2013. Peoples Natural Gas Division, Peoples Gas Division and the former Equitable Division calculated their deferred taxes using the statutory tax rate. For the amounts of accelerated tax depreciation and book depreciation used to calculate test year deferrals refer to Exhibit No. 7, Schedule No. 8, Attachments 1 and 2 (53.53.III.A.55).

Peoples Natural Gas Company LLC

§ 53.53.III.A

63. State whether all tax savings due to accelerated depreciation on property installed prior to 1970 have been passed through to income. (If not, explain).

* *

Refer to Exhibit No. 7, Schedule No. 13 (53.53 III.A.62).

Peoples Natural Gas Company LLC

§ 53.53.III.A

64. Show any income tax loss/gain carryovers from previous years that may effect test year income taxes or future year income taxes. Show loss/gain carryovers by years of origin and amounts remaining by years at the end of the test year.

* *

Refer to Exhibit No. 7, Schedule No. 8, Attachment 4 (53.53.III.A.55).

Peoples Natural Gas Company LLC

§ 53.53.III.A

60. Explain the reason for the use of cost of removal of any retired plant figures in the income tax calculations.

* *

A difference exists between when cost of removal can be deducted for book purposes versus deducted on the income tax return. For book purposes, cost of removal is charged to accumulated depreciation and amortized over five years. For income tax purposes, cost of removal is deducted when incurred. This timing difference is reflected in calculating income tax expense in Exhibit No. 7, Schedule No. 8, Attachment 1 (53.53.III.A.55).

Peoples Natural Gas Company LLC

§ 53.53.III.A

61. Submit the corresponding data applicable to Pennsylvania Corporate Income Tax deferment.

a. Show the amounts of straight line tax depreciation and accelerated tax depreciation, the difference between which gave rise to the normalizing tax charged back to the test year operating statement.

b. Show normalization for both Federal and State Income Taxes.

c. Show tax rates used to calculate tax deferment amount.

* *

a-c: Refer to Exhibit No. 7, Schedule No. 8, Attachments 1 and 2 (53.53.III.A.55).

Peoples Natural Gas Company LLC

§ 53.53.III.A

65. State whether the company eliminates any tax savings by the payment of actual interest on construction work in progress not in rate base claim.

If response is affirmative:

a. Set forth amount of construction claimed in this tax savings reduction. Explain the basis for this amount.

b. Explain the manner in which the debt portion of this construction is determined for purposes of the deferral calculations.

c. State the interest rate used to calculate interest on this construction debt portion, and the manner in which it is derived.

d. Provide details of calculation to determine tax saving reduction. State whether state taxes are increased to reflect the construction interest elimination.

* *

Peoples Natural Gas Company LLC does not. The Company capitalizes interest under section 263A of the Internal Revenue Code for tax purposes. This may result in more or less interest capitalized compared to the books.

Peoples Natural Gas Company LLC

§ 53.53.III.A

66. Provide a detailed analysis of Taxes Accrued per books as of the test year date. Also supply the basis for the accrual and the amount of taxes accrued monthly.

* *

See page 2.

Peoples Natural Gas Company LLC
Exhibit 7, Schedule No. 19: 53.53 III.A.66
Accrued Taxes and Basis for Accruals
As of November 30, 2025

Taxes Accrued	Peoples Natural Gas	Basis for Accrual of Tax
Federal Income Tax	$ 66,750,953	Accrual is based on the taxable net income as defined by the Internal Revenue Code. The current tax rate is 21 percent of taxable income. The quarterly accrual is an adjustment to the prior quarters' balance based on a hard close with an estimated flow through repair benefit based on the ratio of the quarter to date Pre-Tax Book Income (PTBI) to the estimated annual PTBI.
Pennsylvania Corporate Net Income Tax	$ 1,972,099	Accrual is based on the taxable net income as defined by the Internal Revenue Code before the deduction for the Pennsylvania corporate net income tax itself. The current rate for 2025 is 7.49 of taxable income, respectively. The quarterly accrual is an adjustment to the prior quarters' balance based on a hard close with an estimated flow through repair benefit based on the ratio of the quarter to date Pre-Tax Book Income (PTBI) to the estimated annual PTBI. A valuation allowance is recorded on the full Pennsylvania NOL.
Pennsylvania Public Utility Realty Tax (PURTA)	$ 79,687	Accrual is based on the state taxable value of public utility land, buildings, and other structures at the 2024 PURTA Millage rate of 0.0233189 mills (2.33189 percent) on each dollar of state taxable value. The monthly accrual is based on an estimate (1/12th) of the final tax liability.
Non-PURTA Property Taxes	$ 811	Tax assessed is the amount charged by various state, county and local jurisdictions for property owned. The expense is accrued monthly based on prior year's payments and assessment then trued up each September when all the taxes are paid.
West Virginia Natural Gas Storage Tax	$ (195,713)	Tax is based on total assessed value of assets located in West Virginia. The assessed value is defined as 60% of the estimated FMV of the property. The average rate of tax is 2.018 percent is applied to the assessed value. The monthly accrual is based on an estimate (1/12th) of the final tax liability.
Accrued Employer P/R Tax	$ (21,330)	Accrual is based on the Pgh City taxable value of employee wages who work within the city of Pittsburgh. Pittsburgh City tax rate of 0.0055 on each dollar of taxable value. The tax is paid quarterly and represents 3/12 of the annual taxable value.
Total, per Balance Sheet	**$ 68,586,507**	

Peoples Natural Gas Company LLC

§ 53.53.III.A

67. For the test year as recorded on test year operating statement:

a. Supply the amount of federal income taxes actually paid.

b. Supply the amount of the federal income tax normalizing charge to tax expense due to excess of accelerated tax depreciation over book depreciation.

c. Supply the normalizing tax charge to federal income taxes for the 10% Job Development Credit during test year.

d. Provide the amount of the credit of federal income taxes due to the amortization or normalizing yearly debit to the reserve for the 10% Job Development Credit.

e. Provide the amount of the credit to federal income taxes for the normalizing of any 3% Investment Tax Credit Reserve that may remain on the utility books.

* *

a. During the twelve months ended November 30, 2025, the Company made no federal tax payments.

b. Refer to Exhibit No. 7, Schedule No. 8, Attachment 1 (53.53.III.A.55).

c, d, e. The Company has no federal Job Development or Investment Tax Credits.

Peoples Natural Gas Company LLC
§ 53.53 III.A

68. Provide the debit and credit in the test year to the Deferred Taxes due to Accelerated Depreciation for federal income tax, and provide the debit and credit for the Job Development Credits (whatever account) for test year.

* *

To record federal deferred taxes due to accelerated depreciation:

		Debit (Credit)
		Combined
Historical Test Year		
410.1	Provision for Deferred Income Taxes	33,414,660
282.1	Accumulated Deferred Income Taxes	(33,414,660)
Future Test Year		
410.1	Provision for Deferred Income Taxes	32,188,914
282.1	Accumulated Deferred Income Taxes	(32,188,914)
Fully Projected Future Test Year		
410.1	Provision for Deferred Income Taxes	31,034,150
282.1	Accumulated Deferred Income Taxes	(31,034,150)

Note: Deferred taxes above represent the current year Schedule M (Exhibit 7,Schedule 8, Attachment 2) for depreciation times the 21% federal income tax rate.

There were no Job Development Credits in the Historic Test Year.

Peoples Natural Gas Company LLC

§ 53.53.III.A

69. Reconcile all data given in answers to questions on income taxes charged on the test year operating statement with regard to income taxes paid, income taxes charged because of normalization and credits due to yearly write-offs of past years' income tax deferrals, and from normalization of investment tax and development credits. (Both state and federal income taxes.)

* *

Refer to Exhibit No. 7, Schedule No. 8, Attachment 1 (53.53.III.A.55), which details the complete tax calculation along with current income taxes payable, the adjustments for normalization and deferred income tax amounts.

Total income tax expense on Exhibit No. 7, Schedule No. 8, Attachment 1 agrees to the income taxes charged on the test year operating statement at Exhibit No. 2, Schedule No. 4 (53.53 III.A.17).

Peoples Natural Gas Company LLC

§ 53.53.III.A

70. With respect to determination of income taxes, federal and state:

a. Show income tax results of the annualizing and normalizing adjustments to the test year record before any rate increase.

b. Show income taxes for the annualized and normalized test year.

c. Show income tax effect of the rate increase requested.

d. Show income taxes for the normalized and annualized test year after application of the full rate increase.

[It is imperative that continuity exists between the income tax calculations as recorded for the test year and the final income tax calculation under proposed rates. If the company has more than one accounting area, then additional separate worksheets must be provided in addition to those for total company.]

* *

Refer to Exhibit No. 7, Schedule No. 8, Attachment 1 (53.53.III.A.55) for the calculation of federal and state income taxes.

Peoples Natural Gas Company LLC

§ 53.53.III.A

71. In adjusting the test year to an annualized year under present rates, explain any changes that may be due to book or tax depreciation change and to debits and credits to income tax expense due to accelerated depreciation, deferred taxes, job development credits, tax refunds or other items.

(The above refers only the adjustments going from recorded test year to annualized test year.)

* *

Various adjustments were made to test year revenues and operating expenses to annualize the test year under present rates. Refer to Exhibit No. 2, Schedule No. 4 (53.53 III.A.17) for an explanation of the adjustments.

Refer to Peoples Statement No. 7, the direct testimony of Angela Jiang for a description of adjustments made to deferred income taxes.

Peoples Natural Gas Company LLC

§ 53.53.II.A

10. Under Section 1552 of the Internal Revenue Code and Regulations 1.1552-1 thereunder, if applicable, Parent Company, in filing a consolidated income tax return for the group, must choose one of four options by which it must allocate total income tax liability of the group to the participating members to determine each member's tax liability to the federal government. (If this interrogatory is not applicable, so state.)

    a. State what option has been chosen by the group.

    b. Provide, in summary form, the amount of tax liability that has been allocated to each of the participating members in the consolidated income tax return.

    c. Provide a schedule, in summary form, of contributions, which were determined on the basis of separate tax return calculations, made by each of the participating members to the tax liability indicated in the consolidated group tax return. Provide total amounts of actual payments to the tax depository for the tax year, as computed on the basis of separate returns of members.

    d. Provide annual income tax return for group, and if income tax return shows net operating loss, provide details of amount of net operating loss allocated to the income tax returns of each of the members of the consolidated group.

* *

a. For Earnings and Profits purposes under Section 1552, the Company has not made an election. Under the law, if no election is made the tax liability shall be apportioned among the members of the group in accordance with the ratio which that portion of the consolidated taxable income attributable to each member of the group having taxable income bears to the consolidated taxable income.

b. Refer to Exhibit No. 7, Schedule No. 3 (53.53.II.A.26) for the tax liability of each member in the consolidated tax return..

c. Peoples Natural Gas Company LLC is a disregarded entity for income tax purposes and is included in the LDC Funding LLC income tax return, which is in the Essential Utilities Inc. consolidated return. Essential Utilities Inc. makes all necessary income tax payments to the IRS for the net tax liability that is due for its consolidated group.

Additionally, it collects the allocated tax liability from members of its group with positive taxable income and reimburses members of its group with a taxable loss. Refer to Exhibit No. 7, Schedule No. 3 for an allocation of taxable income.

d. The response to this question contains confidential information and is contained in a separate book of the filing marked confidential information. This information will be provided to parties upon execution of a CONFIDENTIALITY AGREEMENT, to be circulated by the Company, pursuant to the terms of that agreement. Peoples Natural Gas Company LLC is a disregarded entity for federal income tax purposes and, therefore, discrete amounts for Peoples are not reported within the tax return.

Peoples Natural Gas Company LLC

§ 53.52(c)

1. A statement showing the utility's calculation of the rate of return or operating ratio (if the utility qualifies to use an operating ratio under § 53.54 (relating to small water and wastewater utilities)) earned in the 12-month period referred to in subsection (b)(2), and the anticipated rate of return or operating ratio to be earned when the tariff, revision or supplement becomes effective. The rate base used in this calculation shall be supported by summaries of original cost for the rate of return calculation. When an operating ratio is used in this calculation, it shall be supported by studies of margin above operation and maintenance expense plus depreciation as referred to in § 53.54(b)(2)(B).

* *

Refer to Exhibit No. 8, Schedule No. 2 (53.53.I.A.2).

Peoples Natural Gas Company LLC

§ 53.53.I.A

2. Provide a schedule showing the measures of value and the rates of return at the original cost and trended original cost measures of value at the spot, three-year and five-year average price levels. All claims made on this exhibit should be cross-referenced to appropriate exhibits. Provide a schedule similar to the one listed above, reflecting respondent's final claim in its previous rate case.

* *

Refer to page 1 for the measures of value for this rate case, and refer to page 2 for the measures of value from Peoples' previous rate case.

Peoples Natural Gas Company LLC

§ 53.52(c)

4. A statement showing the amount of the depreciation reserve, at the date of the balance sheet required by paragraph (2), applicable to the property, summarized as required by paragraph (3).

* *

Refer to Exhibit No. 9, Schedule No. 1 (53.53 I.A.3).

Peoples Natural Gas Company LLC

§ 53.53.I.A

8. Provide a description of the trending methodology which was utilized. Identify all indexes which were used (include all backup workpapers) and the reasons particular indexes were chosen. If indexes were spliced, indicate which years were utilized in any splices. If indexes were composited, show all supporting calculations. Include any analysis made to ‘‘test’’ the applicability of any indexes.

a. Supply a comprehensive statement of any changes made in the selection of trend factors or in the methodology used in the current rate filing compared to the most recent previous rate filing.

* *

Pursuant to 52 Pa. Code § 53.51(c), Peoples is not providing trended original cost data.

Peoples Natural Gas Company LLC

§ 53.53.I.A

9. Provide an exhibit indicating the spot trended original cost at test year end by vintage by account and include applicable depreciation reserves. Include totals by account for all other trended measures of value.

* *

Pursuant to 52 Pa. Code § 53.51(c), Peoples is not providing trended original cost data.

Peoples Natural Gas Company LLC

§ 53.53.I.A

10. Supply an exhibit indicating the percentages of undepreciated original cost which were trended with the following indexes:

    a. Boeckh

    b. Handy-Whitman

    c. Indexes developed from suppliers' prices.

    d. Indexes developed from company records and company price histories.

    e. Construction equipment.

    f. Government statistical releases.

* *

Pursuant to 52 Pa. Code § 53.51(c), Peoples is not providing trended original cost data.

Peoples Natural Gas Company LLC

§ 53.53.I.A

11. Provide a table, showing the cumulative trended depreciated original cost (at the spot price level) by year of installation for utility plant in service at the end of the test year (depreciable plant only) as claimed in the measures of value, in the following form:

a. Year installed.

b. Trended original cost (at the spot price level) — the total surviving cost associated with each installation year from all plant accounts.

c. Trended calculated depreciation reserve—the calculated depreciation reserve associated with each installation year from all plant accounts.

d. Depreciated trended original cost — (Column B minus Column C).

e. Total—cumulation year by year of the figures from Column D.

f. Column E divided by the total of the figures in Column D.

* *

Pursuant to 52 Pa. Code § 53.51(c), Peoples is not providing trended original cost data.

Peoples Natural Gas Company LLC

§ 53.53.I.A

12. If a claim is made for construction work in progress, include, in the form of an exhibit, the summary page from all work orders, amount expended at the end of the test year and anticipated in-service dates. Indicate if any of the construction work in progress will result in insurance recoveries, reimbursements, or retirements of existing facilities. Describe in exact detail the necessity of each project claimed if not detailed on the summary page from the work order. Include final completion date and estimated total amounts to be spent on each project.

[These exhibits should be updated at the conclusion of these proceedings.]

* *

Peoples is not making a claim for Construction Work in Progress after the end of the Fully Projected Future Test Year.

Peoples Natural Gas Company LLC

§ 53.53.I.A

13. If a claim is made for non-revenue producing construction work in progress, include, in the form of an exhibit, the summary page from all work orders, amount expended at the end of the test year and anticipated in-service dates. Indicate if any of the construction work in progress will result in insurance recoveries, reimbursements, or retirements of existing facilities. Describe in exact detail the necessity of each project claimed if not detailed on the summary page from the work order. Include final completion date and estimated total amounts to be spent on each project.

[These exhibits should be updated at the conclusion of these proceedings.]

* *

Refer to the response to Exhibit No. 8, Schedule No. 9 (53.53.I.A.12).

Peoples Natural Gas Company LLC

§ 53.53.I.A

14. If a claim is made for plant held for future use, supply the following:

a. A brief description of the plant or land site and its cost.

b. Expected date of use for each item claimed.

c. Explanation as to why it is necessary to acquire each item in advance of its date of use.

d. Date when each item was acquired.

e. Date when each item was placed in plant held for future use.

* *

Peoples is not making a claim for plant held for future use.

Peoples Natural Gas Company LLC

§ 53.53.I.A

15. If materials and supplies comprise part of the cash working capital claim, attach an exhibit showing the actual book balances for materials and supplies by month for the thirteen months prior to the end of the test year. Explain any abrupt changes in monthly balances. [Explain method of determining claim if other than that described above.]

* *

Please see below for the thirteen months of materials & supplies book balances:

Month	Materials & Supplies Book Balance
Nov-24	6,045,119
Dec-24	6,112,088
Jan-25	6,172,865
Feb-25	6,201,018
Mar-25	6,199,650
Apr-25	6,232,605
May-25	6,218,639
Jun-25	6,327,586
Jul-25	6,321,408
Aug-25	6,035,638
Sep-25	6,041,662
Oct-25	6,120,478
Nov-25	6,167,508

Peoples Natural Gas Company LLC

§ 53.53.I.A

16. If fuel stocks comprise part of the cash working capital claim, provide an exhibit showing the actual book balances (quantity and price) for the fuel inventories by type of fuel for the thirteen months prior to the end of the test year by location, station, etc.

[Explain the method of determining claim if other than that described above.]

* *

Peoples is not making a claim for fuel stocks as part of its cash working capital claim.

Peoples Natural Gas Company LLC

§ 53.53.I.A

18. Explain in detail by statement or exhibit the appropriateness of claiming any additional items, not previously mentioned, in the measures of value.

* *

Peoples' measures of value claim and appropriate explanations are set forth and explained in Peoples Statement Nos. 12 and 16, the direct testimonies of Nick Tufarolo and John Spanos.

Peoples Natural Gas Company LLC

§ 53.53.II.A

21. Provide Original Cost, Trended Original Cost and Fair Value rate base claims.

* *

Pursuant to 52 Pa. Code § 53.51(c), Peoples is not providing trended original cost data.

Peoples Natural Gas Company LLC

§ 53.53.III.A

14. Provide schedules and data in support of the following working capital items:

a. Prepayments—List and identify all items

b. Federal Excise Tax accrued or prepaid

c. Federal Income Tax accrued or prepaid

d. Pa. State Income Tax accrued or prepaid

e. Pa. Gross Receipts Tax accrued or prepaid

f. Pa. Capital Stock Tax accrued or prepaid

g. Pa. Public Utility Realty Tax accrued or prepaid

h. State sales tax accrued or prepaid

i. Payroll taxes accrued or prepaid

j. Any adjustment related to the above items for ratemaking purposes.

* *

a. Refer to Exhibit No. 8, Schedule No. 18 (53.53.III.A.16)

b. None

c. Refer to Exhibit No. 7, Schedule No. 19 (53.53.III.A.66)

d. Refer to Exhibit No. 7, Schedule No. 19 (53.53.III.A.66)

e. Refer to Exhibit No. 7, Schedule No. 19 (53.53.III.A.66)

f. Refer to Exhibit No. 7, Schedule No. 19 (53.53.III.A.66)

g. Refer to Exhibit No. 7, Schedule No. 19 (53.53.III.A.66)

h. None

i. Refer to Exhibit No. 7, Schedule No. 19 (53.53.III.A.66)

j. Adjustments relied on to calculate the above are presented in Exhibit No. 2, Schedule No. 4 (53.53.III.A.17) and included in working capital based on lead-lag study in Exhibit No. 8, Schedule No. 17 (53.53.III.A.15).

Peoples Natural Gas Company LLC

§ 53.53.III.A

15. Supply an exhibit supporting the claim for working capital requirement based on the lead-lag method.

a. Pro forma expenses and revenues are to be used in lieu of book data for computing lead-lag days.

b. Respondent must either include sales for resale and related expenses in revenues and in expenses or exclude from revenues and expenses. Explain procedures followed (exclude telephone).

* *

Please refer to Peoples Statement No. 14, the direct testimony of Anton Ribich and Attachment AR-1 for the information requested.

Peoples Natural Gas Company LLC

§ 53.53.III.A

16. Provide detailed calculations showing the derivation of the tax liability offset against gross cash working capital requirements.

* *

Refer to Exhibit No. 7, Schedule No. 8 (53.53.III.A.55) for details on the tax liability and refer to Exhibit No. 8, Schedule No. 2 (53.53.I.A.2) for the offset against gross cash working capital requirements.

Peoples Natural Gas Company LLC

§ 53.53.I.A

3. Provide a description of the depreciation methods utilized in calculating annual depreciation amounts and depreciation reserves, together with a discussion of all factors which were considered in arriving at estimates of service life and dispersion by account. Provide dates of all field inspections and facilities visited.

* *

The depreciation methods utilized in calculating annual and accrued depreciation are discussed in the Future Test Year report in Part IV of the gas depreciation study. The calculation of annual and accrued depreciation are discussed in the Future Test Year report in Part IV of the gas depreciation study.

Field trips and facilities visited for Peoples Natural Gas LLC are presented in Part III. Service Life Considerations, in the Future Test Year report of those that had recent visits.

Peoples Natural Gas Company LLC

§ 53.53.I.A

4. Set forth, in exhibit form, charts depicting the original and estimated survivor curves and a tabular presentation of the original life table plotted on the chart for each account where the retirement rate method of analysis is utilized.

a. If any utility plant was excluded from the measures of value because it was deemed not to be "used and useful" in the public service, supply a detailed description of each item of property.

b. Provide the surviving original cost at test year end by vintage by account and include applicable depreciation reserves and annuities.

i. These calculations should be provided for plant in service as well as other categories of plant, including, but not limited, to contributions in aid of construction, customers' advances for construction, and anticipated retirements associated with any construction work in progress claims (if applicable).

* *

The original and estimated survivor curves and a tabular presentation of the original life table plotted on the chart for each account where the retirement rate method of analysis is utilized are presented in the Future Test Year report in Part VI. Service Life Statistics, for gas depreciation studies.

The surviving original cost at the end of the Historical Test Year, ending November 30, 2025, by vintage and by account and the applicable depreciation reserve for utility plant are presented in the Historic Test Year report beginning on page II-7.

The surviving original cost at the end of the Future Test Year, ending November 30, 2026, by vintage and by account and the applicable depreciation reserve for utility plant are presented in the Future Test Year report beginning on page VII-7.

The surviving original cost at the end of the Fully Projected Test Year, ending December 31, 2027, by vintage and by account and the applicable depreciation reserve for utility plant are presented in the Fully Projected Test Year report beginning on page II-7.

Peoples Natural Gas Company LLC

§ 53.53.I.A

5. Provide a comparison of respondent's calculated depreciation reserve v. book reserve by account at the end of the test year.

* *

A comparison of the calculated depreciation reserve v. book reserve by account as of November 30, 2025, as of November 30, 2026, and as of December 31, 2027, are attached.

PEOPLES NATURAL GAS COMPANY LLC

Peoples Natural Gas Company LLC

§ 53.53.I.A

6. Supply a schedule by account and depreciable group showing the survivor curve and annual accrual rate estimated to be appropriate:

a. For the purposes of this filing.

b. For the purposes of the most recent rate increase filing prior to the current proceedings.

i. Supply a comprehensive statement of any changes made in method of depreciation and in the selection of average service lives and dispersion.

* *

a. Refer to Table 1 in the Historic Test Year, Future Test Year and Fully Projected Test Year reports.

b. Refer to the attached pages for survivor curves and annual accrual rates estimated to be appropriate in the most recent prior gas rate filing.

i. No changes were made to the methodology used in the depreciation study between the prior filing and the current filing.

* LIFESPAN PROCEDURE IS USED. SURVIVOR CURVE SHOWN IS INTERIM CURVE.

Peoples Natural Gas Company LLC

§ 53.53.I.A

7. Provide a table, showing the cumulative depreciated original cost by year of installation for utility plant in service at the end of the test year (depreciable plant only) as claimed in the measures of value, in the following form:

a. Year installed.

b. Original cost—the total surviving cost associated with each installation year from all plant accounts.

c. Calculated depreciation reserve—the calculated depreciation reserve associated with each installation year from all plant accounts.

d. Depreciated original cost—(Column B minus Column C).

e. Total—cumulation year by year of the figures from Column D.

f. Column E divided by the total of the figure in Column D.

* *

The cumulative depreciated original cost at the end of the historical year November 30, 2025, by vintage is presented in the Historic Test Year report beginning on page II-3.

The cumulative depreciated original cost at test year end November 30, 2026, by vintage is presented in the Future Test Year report beginning on page VII-3.

The cumulative depreciated original cost at test year end December 31, 2027, by vintage is presented in the Fully Projected Test Year report beginning on page II-3.

Peoples Natural Gas Company LLC

§ 53.53.I.A

17. Regardless of whether a claim for net negative or positive salvage is made, attach an exhibit showing gross salvage, cost of removal, and net salvage for the test year and four previous years by account.

* *

The information is presented in Part III, Experienced Net Salvage for the Historic Test Year report. In Part VIII, Experienced and Estimated Net Salvage of the Future Test Year report. In Part III, Experienced and Estimated Net Salvage of the Fully Projected Test Year report for gas assets.

Peoples Natural Gas Company LLC

§ 53.53.III.E

12. Provide a schedule showing residential and commercial heating sales by unit (MCF) per month and degree days for the test year and three preceding twelve month periods.

* *

Refer to page 2 of this response.

Peoples Natural Gas Company LLC

Peoples Natural Gas Company LLC

§ 53.53.III.E

22. Provide supporting data detailing curtailment adjustments, procedures and policies.

* *

No curtailment adjustments have been made for the twelve months ended November 30, 2025 (Historic Test Year) and none are anticipated for the twelve months ended November 30, 2026 (Future Test Year).

Peoples' curtailment procedures and policies are contained in Peoples' tariff which is included in its entirety at Exhibit No. 14, Schedule No. 1 (53.53.IV.B.6).

Peoples Natural Gas Company LLC

§ 53.53.III.E

38. Identify company's policy with respect to replacing customers lost through attrition.

* *

Peoples actively seeks new business opportunities with residential, commercial and industrial developments to replace customers lost through attrition. Peoples has both a new business (Sales) department and a new construction area of the business. The Sales department engages with residential developers and contractors to bring natural gas service to new and growing neighborhoods. We also work to identify areas in our service territory that are using propane, oil, or electric in an effort to convert them to natural gas. In addition, we promote the use of additional gas appliances other than just for heat. The commercial and industrial specialists in the department assist new and existing customers in the evaluation of the benefits and costs of natural gas in comparison to alternate fuels to encourage the use of low cost, locally produced natural gas. The new construction area of the business contains a group of representatives that focus on the ease/convenience of applying for and receiving new service.

The Company manages a robust cold weather survey process which seeks to encourage occupants of homes that do not have active natural gas service to pursue reconnection. The survey process uses multiple outreach methods including letters through US mail, phone calls to the last known phone number and in-person visits to the premises. The information provided to the former customer or current resident includes materials about available energy assistance programs and payment plans to encourage those who may have arrears to apply for service. The survey process begins in the fall and is repeated again in the winter months, resulting in numerous attempts for each contact method.

Rules and regulations regarding service application processes are detailed in the Company tariffs that are provided as Exhibit No. 14, Schedule No. 1 (53.53.IV.B.6).

Peoples Natural Gas Company LLC

§ 53.53.III.E

39. Identify procedures developed to govern relationship between the respondent and potential customers—i.e., basically expansion, alternate energy requirements, availability of supply, availability of distribution facilities, ownership of metering and related facilities.

* *

Refer to Appendix A - Peoples Natural Gas Division – current Tariff No. 48, Section 4 in the Rules and Regulations titled "Connections for Service – Extension of Facilities" located in Exhibit 14, Schedule No. 1 (53.53.IV.B.6).

Proposed tariffs in this proceeding are included in Appendix C and D of Exhibit No. 14, Schedule No. 1.

Peoples Natural Gas Company LLC

§ 53.53.III.E

7. Provide details of respondent's attempts to recover uncollectible and delinquent accounts.

* *

When timely payments are not received on customer accounts, the Company sends payment reminders. The first notification to a customer that an adequate payment has not been received is a bill reminder. If the bill reminder does not result in either a payment or payment arrangement, the termination process begins. A written termination notice is issued. If a valid phone number exists on the accounts, two attempts are made to reach the customer by phone to discuss the termination notice and payment arrangements. If a valid phone number is not available, a field visit is made to post a notice advising the customer that service could be terminated in 72 hours if a payment is not made. If these steps fail to bring the customer's account to a current status or the customer does not enter into an acceptable payment arrangement, the customer's gas service is scheduled for termination. In cases of Protection from Abuse (PFA) or winter heating season, Peoples follows all established PA PUC guidelines and regulations.

In order to reduce the level of uncollectable balances, the Company follows the security deposit rules established by the Commission's regulations at 52 Pa. Code Chapter 56. When applicants are identified as credit risks, a security deposit based on two months' average consumption for the property is required. If a current customer's service is terminated for non-payment, the company requires a security deposit as a condition for reconnection. However, security deposits are not requested in any circumstances if the applicant or customer self-identifies as a low-income household.

The Company has a specialized team to monitor and contact customers that start to accrue higher balances.

When a customer's service is discontinued, a final bill is issued. If the final bill is not paid by the due date, a reminder letter is mailed. If merited, customers are able to enter into a reasonable payment agreement on a final bill by contacting the Company. If the account remains delinquent, the account is sent to a third-party agency for further collection efforts.

When an applicant applies for service, the Company completes a review of its records to determine if the customer has an outstanding balance from another service address. If one exists, payment in full of the balance or a payment arrangement in accordance with the Commission's regulations at 52 Pa. Code Chapter 56 is entered.

I. INTRODUCTION

The purpose of this document is to discuss the development and results of the Allocated Cost of Service Study ("ACOSS") model and related schedules prepared for Peoples Natural Gas Company, LLC ("Peoples" or the "Company") based on the Fully Projected Future Test Year ended December 31, 2027 ("FPFTY").

The document is organized into three sections. The first section includes an overview of Atrium's ACOSS model used to develop the cost allocation study. The second section includes details of the methodologies adopted in the development of the study. The last section exhibits the results of the COSS study.

1. Purpose of Cost Allocation

The purpose of an ACOSS is to determine the cost-of-service responsibilities of each customer class upon which the base rates may be established. The revenue requirement studies provide the overall level of costs of providing service, while the ACOSS is used to change the basic rate structures and/or the relative overall cost responsibility of each customer class. Based on the functionalization and classification of costs and allocation methodologies used in the ACOSS, the revenue requirement by customer class is determined and used in designing the Company's proposed base rates. In other words, the ACOSS measures each class's contribution to the Company's overall cost of service. Comparing the costs to serve any customer class with that class's rate revenues provides a measure of the return realized from that class and their associated revenue-to-cost ratio. This allows for a comparison across classes to ascertain the presence and extent of interclass subsidization (i.e., when one class pays more than its cost to serve, and another pays less than its cost to serve).

2. ACOSS Procedures

Cost of service studies utilize a three-step process: functionalization, classification, and allocation.

In the first step, the functionalization sets off with assigning the Federal Energy Regulatory Commission ("FERC") plant accounts and associated investment balances to appropriate cost of service functions, such as Storage, Transmission, Distribution, On-Site and Metering, Customer Accounts and Service, and Gas Supply. The expenses related to particular property investments or groups of investments can often follow the same functionalization and are allocated based on the ratios of gas plant assigned to each function. These plant ratios can be used to functionalize most other cost items.

In the second step, classification, each functional cost category is further separated by cost causation. There are three basic cost-defining characteristics of natural gas services: demand, commodity, and customer.

- Demand (Capacity) related costs are associated with the peak usage of the utility system. These costs are necessary to maintain the system at a level sufficient to satisfy the greatest demand that all the customers could place upon the system.
- Commodity-related costs are variable costs that vary with the quantity of gas consumed. These costs reflect the number of units consumed or supplied during a period of time.
- Customer-related costs are associated with serving customers regardless of their usage or demand characteristics. Customer-related costs are incurred to attach a customer to the distribution system, meter any gas usage and maintain the customer's account. Customer costs are a function of the number of customers served and continue to be incurred whether or not the customer uses any gas. They generally include capital costs associated with minimum size distribution mains, services, meters, regulators and customer service and accounting expenses.

The last step is to allocate these cost components among customer classes. The development of allocation factors by customer class uses principles of both economics and engineering. This results in appropriate allocation factors for different elements of costs based on cost causation.

3. Atrium Economics Cost of Service Study Model Overview

The Cost of Service Study is submitted in support of the direct testimony of John D. Taylor in Exhibit 2. The ACOSS model presented in this proceeding is an excel based model that allows the user to modify various inputs and assumptions.

ACOSS Model Capabilities

The Atrium Economics' ACOSS model provides a large range of analytical capabilities including:

- Unbundling of operations into functions: (i.e., production/supply, storage, transmission, distribution, metering, and billing services.)
- Classification and allocation of costs into customer classes.
- Reports on Rate of Return, Revenue Requirement, and Revenue-to-Cost ratio for each function and rate class.
- Development of unit costs of each functional classification for each rate class.
- Specification of the individual rate of return targets for each function or customer class.
- Provides detailed analyses of costs of gas, income taxes, working capital, depreciation reserve, and depreciation expenses.

- Use of detailed analysis of labor expenses by account to facilitate the analyses of administrative and general expenses and overhead costs.
- Facilitation of direct assignment of plant investment, expenses, and revenue dollars to individual functions, classifications, or customer classes.

Follows Traditional 3-Step Analysis Process

The Atrium ACOSS Model follows the standard three-step analysis process:1) functionalization of rate base and expenses into various functional categories; 2) classification of functionalized components into demand, energy/commodity, and customer cost categories; and 3) allocation of each component among the customer classes.

As part of the functionalization process, accounts for common costs that are not specifically related to the primary functions, such as general plant and administrative and general expenses, are automatically allocated to the proper function based on internally defined allocation factors. All components of the utility's total cost of service are grouped into one of the functions.

The Atrium ACOSS Model provides unbundled functionalized and classified cost information by customer class; develops unbundled revenue requirements by functional classification for each customer class; and calculates unit costs by function for customer, commodity, and demand categories. Accounting costs are reported by FERC account level, and the allocation of A&G expenses, general taxes, and income taxes are clearly reported.

Revenue requirements are calculated from the allocated rate base and expenses and are adjusted to reflect the user-determined target rate of return and statutory tax adjustments. The actual revenues collected are compared to the calculated cost-based revenue requirements to determine class-specific, revenue-to-cost ratios to assist in revenue allocation and pricing activities.

Unit Cost Output Functionality

The ACOSS model calculates the unit cost of each functional classification separately for each rate class based on the user-specified billing determinants. These unit cost data are among the most important outputs from an embedded cost of service analysis. They are defined as the average cost of providing service to customers per measure of service (i.e., per therm, per dekatherm of daily demand, and per customer). Unit costs are a key consideration in developing prices for bundled, unbundled, and re-bundled services.

Acceptance by Utility Regulatory Commissions

The format and presentation of the model's outputs have been used in many rate case proceedings and conform to standard utility commission requirements. Where necessary, the ACOSS model outputs can be easily modified to meet specific jurisdictional filing requirements.

II. PEOPLES' COST OF SERVICE PROCEDURES

1. Functionalization

The following functional cost categories were identified for purposes of Peoples' cost allocation:

- Gas Supply
- Gathering
- Storage
- Transmission
- Distribution
- Distribution On-Site
- Customer Accounts and Services

Peoples' assigned functional categories are presented on Schedule 4.

2. Classification

The following classification categories were identified for purposes of Peoples' cost allocation:

- Demand
- Commodity
- Customer

Peoples' assigned classification categories are presented on Schedule 4.

3. Allocation

The allocation step involves assigning classified costs to the customer classes based on cost causation. Therefore, the allocation of costs is usually based on some measure of class loads or class service characteristics. The External (Schedule 5) and Internal (Schedule 6) Allocation Factors are utilized to allocate costs among various customer classes. Peoples' assigned Allocation Factors are presented on Schedule 4.

3.1. Customer Classes and Tariff Schedules

The following customer classes were identified for purposes of cost allocation:

- Residential Service (Rate RS, Rate CAP, Rate E-CAP)
- Small General Service (Rate SGS)
- Medium General Service (Rate MGS)
- Large General Service (Rate LGS)
- Mainline Service (Rate MLS)

3.2. External Allocation Factors

Peoples' External Allocation Factors are presented on Schedule 5. The External Allocation Factors are developed based on the special studies conducted using various detailed data as discussed below.

Commodity and Revenue Allocation Factors

Costs classified as "Commodity" are allocated among customer classes based on the weather-normalized volumes for the FPFTY. The "Revenue" factors directly assign revenues to the relevant customer class.

Allocation Factor	Description
BASE_REVENUE	Total sales and transportation base rate revenue at current rates for the FPFTY.
GAS_COST_REVENUE	Gas cost revenue by customer class for the FPFTY. Also equivalent to gas cost expense.
RIDER_REVENUE	FPFTY revenues from riders at current rates.
TOTAL_VOLUME	Total volumes based on forecasted billing determinants for the FPFTY.
SALES_VOLUME	Total volumes for Sales customers based on forecasted billing determinants.
TRANSPORT_VOLUME	Total volumes for Transportation customers based on forecasted billing determinants.
GATHER_VOLUME	Allocation of forecasted Gathering System volumes to the classes.
LP_VOLUME	Total volumes for customers served from the Company's low pressure system based on forecasted billing determinants.

Customer Allocation Factors

Customer-related costs are generally allocated based on the number of customers within each class of service, with appropriate weighting to recognize specific service characteristics.

Allocation Factor	Description
CUSTOMERS	Customer Count factor based on the FPFTY proforma customer count.

Allocation Factor	Description
CUSTOMERS_DIST	Proforma FPFTY number of customers served from the Company's distribution system.
CUSTOMERS_LP	Proforma FPFTY number of customers in classes that are served from the Company's low-pressure mains (excludes the LGS and MLS classes).
SERVICES	The services factor is based on the replacement cost of Services (FERC Account 380) used to serve customers in different rate classes. The analysis calculation relies upon the Company's records, which provide an inventory of service sizes for a specific rate schedule
METERS	The meters factor is based on the cost of Meters (FERC Account 381) used to serve customers in different rate classes. The calculation relies upon the Company's records, which provide an estimate based on average costs per class of each category of meter for a specific rate schedule.
INDUSTRIAL_M&R	The factor was derived to allocate FERC Account 385 Industrial measuring and regulating station equipment. The analysis was performed based on the same set of data used to derive the Meters allocation factor but limited to the metering costs associated with industrial customers.
METER_READ	Factor developed to allocate meter reading–related costs among customer classes based on the number of customers that have their meter read by meter reading activity.
CUST_RECORDS	Factor developed to allocate customer records–related costs based on FERC Account 903 expenses. Customer class costs are calculated based on weighting of the various records expense categories.
UNCOLLECT	Account 904-Uncollectible Accounts are allocated to the customer classes based on the three year average of net write-offs.
ACCT_908	Account 908 – Customer Assistance Expenses are allocated to the customer classes based on historical customer assistance records.
ACCT_912	Account 912 – Demonstrating and Selling Expenses are allocated to the customer classes based on historical sales and demonstration cost records.

Allocation Factor	Description
LATE_FEES	Factor developed to directly assign revenues collected from forfeited discounts to the customer classes based on actual late fee billings. Forfeited discounts revenues are allocated in proportion to each customer class's contribution to total late payment charges, reflecting class-specific payment behavior and associated administrative activity.
MISC_REVENUE	Factor developed to directly assign miscellaneous revenues to customer classes based on the source of the underlying activity.
DEPOSITS	Based on a historical analysis of customer deposits by class.

Demand Allocation Factors

Demand-related costs are generally allocated based on peak capacity demand for each customer class.

Allocation Factor	Description
DESIGN_DAY	Design Day Peak Demand for each customer class.
DESIGN_DAY_DIST	Design Day Peak Demand for each customer class taking service from the distribution system.
DESIGN_DAY_LP	Design Day Peak Demand on the Company's low pressure system for each customer class.
WINTER_STORAGE	Factor developed to allocate storage facility based on volumes during the winter period of December through May weighted by monthly storage withdrawals.
PEAK_AVERAGE	Demand allocation factor for distribution mains based on a 50-50 weighting of the customer class's Design Day Peak Demand and Average Demand on the distribution system.
PEAK_AVERAGE_LP	Demand allocation factor for low pressure distribution mains based on a 50-50 weighting of the customer class's Design Day Peak Demand and Average Demand on the low pressure system.
AVG_STUDY_DD_P&A	Average of the Customer-Demand and Demand-Commodity study methods of allocating distribution mains (DESIGN_DAY_DIST and PEAK_AVERAGE)

Allocation Factor	Description
AVG_STUDY_DD_P&A_LP	Average of the Customer-Demand and Demand-Commodity study methods of allocating low pressure distribution mains (DESIGN_DAY_LP and PEAK_AVERAGE_LP)

3.3. Mains Analysis

The allocation of investment in facilities serving a distribution function should recognize that the cost of these facilities is driven by two principal factors. First is the cost of extending the system to connect individual customers. Second is the cost associated with the capacity requirements of the customers connected.

There are two widely accepted methods for the classification of mains between customer-related costs and demand-related costs. The two methods are the Minimum System Method and the Zero-Intercept Method, both relying on the Company's property record data to determine the cost of pipe by size and type. Diameter groups that did not contain enough sample data were removed. The unit cost for pipe in any year is determined by dividing the booked costs by the amount of pipe installed in a standard unit of measurement. A variety of factors, such as the length of pipe installed, location, installation conditions, etc., cause the annual unit cost of pipe by size and type to vary significantly. Thus, a simple average of the yearly costs is not adequate for a determination of the cost for each size of the pipe as it will not reflect a consistent set of data. Therefore, the original cost data was restated in terms of current cost using the Handy-Whitman index.

Minimum System Study:

The minimum system method has been used in Peoples' prior cost of service studies. It is intended to reflect the engineering considerations associated with installing distribution mains to serve gas customers. This method utilizes actual installed investment units to determine the minimum distribution system. The minimum-size system may include some capacity-related costs since any minimum size pipe considered will, in fact, be capable of delivering some volume of gas. However, a system built entirely of the minimum system sized pipe would be unable to serve the varied customer demands for gas throughout the entire distribution system, even in very low demand periods. The minimum system was adjusted to accommodate the load-carrying capacity of the minimum sized main. The minimum system study used 2" as the minimum-sized steel mains and 2" as the minimum-sized plastic mains. The minimum system study yielded a customer component of 48.14% for distribution mains as depicted below.

Minimum System

Material	Feet	Cost 2025$	Minimum Size Cost (per foot, 2025$)	Customer Component	Customer Component %
Plastic	38,813,104	$ 4,252,740,374	$ 63.01	$ 2,445,541,295	58%
Steel	28,080,227	$ 4,661,561,118	$ 74.03	$ 2,078,857,190	45%
Total	**66,893,332**	**$ 8,914,301,492**		**$ 4,524,398,485**	**51%**

Minimum System Adjusted for Load Carrying Capacity 48.14%

3.4. Internal Allocation Factors

Internal Allocation Factors are developed within the ACOSS model based on the cost ratios of allocated cost based the external allocation factors, representing various forms of the composite external and internal factors as mathematical sums.

Allocation Factor	Description
INT_STORPT	Distribution Mains and Services - The factor is based on the allocation of mains and services plant in FERC Accounts 376 and 380.
INT_PSTD_PLANT	Production, Storage, Transmission, and Distribution Plant - The factor is based on the allocation of production, storage, transmission, and distribution gross plant in service i.
INT_TOTPLT	Total Plant in Service - The factor is based on the allocation of total gross plant in service.
INT_RATEBASE	Rate Base - The factor is based on the allocation rate base.
INT_DMAINS_SERV	Distribution Mains and Services - The factor is based on the allocation of mains and services plant in FERC Accounts 376 and 380.
INT_MAINSPLT	Mains Plant – The factor is based on the allocation of mains plant in FERC Account 376.
INT_LABOR	Total Labor Expense – The factor is based on the allocated labor-related expenses
INT_50-50_PLANT-LABOR	Plant and Labor allocation factor based on equal weighting of the allocated total plant and labor-related expenses.
INT_REV_REQ	Revenue Requirement. The factor is based on revenue requirement.

Allocation Factor	Description
INT_REV_REQ_exludeTAX	Revenue requirement excluding taxes. The factor is based on the revenue requirement exclusive of taxes other than income tax, income taxes, and gross up items.
INT_STORPT_FERC_352-355	Allocated Storage Plant – The factor is based on the allocation of storage plant in FERC Accounts 352, 353, 354, and 355.
INT_DISTPT_FERC_376-386	Allocated Distribution Plant – The factor is based on the allocation of distribution plant in FERC Accounts 376, 378, 380, 381, 382, 385, and 386.
INT_DISTO&M	Allocated Distribution Operations and Maintenance Expenses – The factor is based on the allocation of distribution O&M in FERC Accounts 874, 875, 878, 879, 886, 887, 889, 892, and 893.

Peoples Natural Gas Company LLC

§ 53.53.IV.B

2. Provide a statement of testimony describing the complete methodology of the cost of service study.

* *

Refer to Peoples Statement No. 17 – the Direct Testimony of John Taylor.

Peoples Natural Gas Company LLC

§ 53.53.IV.B

3. Provide a complete description and back-up calculations for all allocation factors.

* *

Refer to Exhibit No. 11, Schedule No. 1 (53.53.IV.B.1), Schedules 5 and 6 for the external and internal allocation factors.

Peoples Natural Gas Company LLC

§ 53.53.IV.B

9. Supply a cost analysis supporting minimum charges for all rate schedules.

* *

Refer to Refer to Exhibit No. 11, Schedule No. 1 (53.53.IV.B.1), pages 16-18.

Peoples Natural Gas Company LLC

§ 53.53.IV.B

10. Supply a cost analysis supporting demand charges for all tariffs which contain demand charges.

* *

Peoples' tariff does not contain demand charges.

Peoples Natural Gas Company LLC

§ 53.53.IV.B

5. Submit a Bill Frequency Analysis for each rate. The analysis should include the rate schedule and block interval, the number of bills at each interval, the cumulative number of bills at each interval, the Mcf or therms at each interval, the cumulative Mcf or therms at each interval, the accumulation of Mcf or therms passing through each interval, and the revenue at each interval for both the present rate and the proposed rates. The Analysis should show only those revenues collected from the basic tariff.

* *

Refer to Exhibit No. 3, Schedule 15 (53.53.III.E.14), Attachment D for the analysis at current rates and Exhibit No. 3, Schedule 15 (53.53.III.E.14), Attachment E for the analysis at proposed rates.

Peoples Natural Gas Company LLC

§ 53.53.IV.B

7. Supply a graph of present and proposed base rates on hyperbolic cross section paper.

* *

Refer to Exhibit JDT-5, pages 18-34 as part of Peoples Statement No. 17 – the Direct Testimony of John Taylor.

Peoples Natural Gas Company LLC

§ 53.53.IV.B

12. Supply a tabulation of base rate bills for each rate schedule comparing the existing rates to proposed rates. The tabulation should show the dollar difference and the per cent increase or decrease.

* *

Refer to Exhibit JDT-5, pages 1-17 as part of Peoples Statement No. 17 – the Direct Testimony of John Taylor.

Peoples Natural Gas Company LLC

§ 53.53.III.A

47. Submit a schedule showing rate of return on facilities allocated to serve wholesale customers.

* *

Peoples serves few wholesale (NGDC) customers under its Rate SGS and MGS rate schedules. Since these customers represent a very small portion of the Peoples service, they have been included in the respective rate classes as commercial customers for cost allocation purposes. Refer to Exhibit No. 11, Schedule No. 1 (53.53.IV.B.1) for the calculated rate of return for these classes.

Peoples Natural Gas Company LLC
§ 53.53 III.E

5. Submit a schedule showing the sources of gas supply associated with annualized MCF sales.

* *

The following schedule shows the sources of supply expected to be used to meet Peoples' sales requirements during the twelve-month period ending December 31, 2026. Peoples' expects a similar supply for the twelve-month period ending December 31, 2027:

Source (in MMcf)	TME 12/31/26
Local Pennsylvania Purchases	3,273
Interstate Purchases	62,788
Storage – On and Off-System	
Withdrawals	25,292
Injections	(25,139)
(Net) Storage	153
TOTAL	66,214

Peoples Natural Gas Company LLC
§ 53.53 III.E

18. If the utility has a Fuel Adjustment Clause:

    a. State the base fuel cost per MCF chargeable against basic customers' rates during the test year. If there was any change in this basic fuel charge during the test year, give details and explanation thereof.

    b. State the amount in which the fuel adjustment clause cost per MCF exceeds the fuel cost per MCF charged in base rates at the end of the test year.

    c. If fuel cost deferment is used at the end of the test year, give

        i. The amount of deferred fuel cost contained in the operating statement that was deferred from the 12-month operating period immediately preceding the test year.

        ii. The amount of deferred fuel cost that was removed from the test period and deferred to the period immediately following the test year.

    d. State the amount of Fuel Adjustment Clause revenues credited to the test year operating account.

    e. State the amount of fuel cost charged to the operating expense account in the test year which is the basis of Fuel Adjustment Clause billings to customers in that year. Provide summary details of this charge.

    f. From the recorded test year operating account, remove the Fuel Adjustment Clause Revenues. Also remove from the test year recorded operating account the excess of fuel cost over base rate fuel charges, which is the basis for the Fuel Adjustment charges. Explain any difference between FAC Revenues and excess fuel costs. [The above is intended to limit the operating account to existing customers' base rate revenues and expense deductions relative thereto].

* *

Peoples does not have a Fuel Adjustment Clause.

Peoples Natural Gas Company LLC
§ 53.53 III.E

23. Submit a schedule showing fuel cost in excess of base compared to fuel cost recovery for the period two months prior to test year and the test year.

* *

Peoples does not have fuel costs in excess of base.

Peoples Natural Gas Company LLC
§ 53.53 III.E

24. Supply a detailed analysis of Purchased Gas for the test year and the twelve month period prior to the test year.

* *

Refer to Attachments 1 and 2 below.

Peoples Natural Gas Company, LLC / Peoples Gas Company, LLC

12	858	**Transmission/Compression Gas by Others**	-	$	107,285,481
13		**Total Gas Purchased Expense**	**67,277,956**	**$**	**343,298,754**

Peoples Natural Gas Company LLC
§ 53.53 III.E

26. Submit detailed calculations for bulk gas transmission service costs under supply and/or interconnection agreements.

* *

Peoples has no bulk gas transmission agreements.

Peoples Natural Gas Company LLC
§ 53.53 III.E

30. Provide a schedule showing suppliers, MCF purchased, cost (small purchases from independent suppliers may be grouped); emergency purchases, listing same information; curtailments during the year; gas put into and taken out of storage; line loss, and any other gas input or output not in the ordinary course of business.

* *

Refer to Ex. 12, Sch. 4 (53.53.III.E.24) and Ex. 12, Sch. 16 (53.53 IV.B.14).

Peoples Natural Gas Company LLC
§ 53.53 III.E

36. State the amount of gas, in Mcf, obtained through various suppliers in past years.

* *

Refer to Ex. 12, Sch. 4 (53.53.III.E.24) and Ex. 12, Sch. 16 (53.53 IV.B.14).

Peoples Natural Gas Company LLC

§ 53.53.III.E

25. Submit calculations supporting energy cost per MCF and operating ratio used to determine increase in costs other than production to serve additional load.

* *

Refer to Exhibit No. 2, Schedule No. 4 (53.53.III.A.17) and Exhibit No. 12, Schedule No. 9 (53.53.III.E.31).

Peoples Natural Gas Company LLC

§ 53.53.III.E

31. Provide a schedule showing the determination of the fuel costs included in the base cost of fuel.

* *

Purchased gas cost rates effective February 12, 2026.

Refer to page 2 of this response for the calculations supporting the February 12, 2026 purchased gas cost rates.

Interim 1307(f)
February 12, 2026
Page 1/10

Peoples Natural Gas Company LLC
INTERIM 1307(f) Rate Calculation
Effective: FEBRUARY 12, 2026

Line No.		Costs and Volumes	$/Mcf Rates
1	DC = Projected Annual Capacity Costs (Including AVC Capacity)	$143,276,708	
2	MINUS: Projected Balancing Revenue Credits	$17,451,960	
3	Projected Annual "Current" Period Capacity Costs (line 1 - line 2)	$125,824,748	
4	S + SBAC = Projected Annual Sales and Standby Volumes - October 2025 through September 2026 (Mcf)	69,373,007	
5	Projected "Current" Period Capacity Costs per Mcf (line 3 / line 4)		$1.8137
6	Capacity Over/(Under) "E-Factor" Collection	($3,496,759)	
7	S + SBAC = Projected Annual Sales and Standby Volumes - October 2025 through September 2026 (Mcf)	69,373,007	
8	Capacity "E-Factor" Cost per Mcf (line 6 / line 7)		($0.0504)
9	Projected Total Capacity Cost of Gas per Mcf (line 5 - line 8)		**$1.8641**
10	CC = Projected Commodity Costs	$122,203,002	
11	S = Projected Sales Volumes February 2026 through September 2026 (Mcf)	28,866,754	
12	Projected Commodity Cost of Gas per Mcf (line 10 / line 11)		$4.2333
13	MINUS: Current Commodity Over/(Under) Collection	($76,241,746)	
14	S = Projected Annual Sales Volumes (Mcf)	59,685,608	
15	Current Commodity Over/(Under) Collection Commodity Cost of Gas per Mcf (line 13 / line 14)		($1.2774)
16	Projected Commodity Cost of Gas per Mcf (line 12 - line 15)		**$5.5107**
17	Total Projected Cost of Gas per Mcf (line 9 + line 16)		**$7.3748**
18	Total Prior Period Over/(Under) Collection Balance	($20,715,799)	
19	S = Projected Annual Sales Volumes (Mcf)	59,685,608	
20	MINUS: E = Prior Period Over/(Under) Collection Rate per Mcf (line 18 / line 19)		**($0.3471)**
21	Overall Gas Cost Rate per Mcf (line 17 - line 20 - line 21)		**$7.7219**

Peoples Natural Gas Company LLC
§ 53.53 IV.B.

11. Supply the net fuel clause adjustment by month for the test year.

* *

Peoples does not have a fuel adjustment clause.

Peoples Natural Gas Company LLC
§ 53.53 I.C

1. Provide, with respect to the scope of operations of the utility, a description of all property, including an explanation of the system's operation, and all plans for any significant future expansion, modification, or other alteration of facilities.

   This description should include, but not be limited to the following:

   a. If respondent has various gas service areas, indicate if they are integrated, such that the gas supply is available to all customers.

   b. Provide all pertinent data regarding company policy related to the addition of new consumers in the company's service area.

   c. Explain how respondent obtains its gas supply, as follows:

      i. Explain how respondent stores or manufactures gas; if applicable.
      ii. State whether the company has peak shaving facilities.
      iii. Provide details of coal-gasification programs, if any.
      iv. Describe the potential for emergency purchases of gas.
      v. Provide the amount of gas in MCF supplied by various suppliers in the test year (include a copy of all contracts).
      vi. Provide the amount of gas in MCF supplied from company-owned wells during the test year.

   d. Provide plans for future gas supply, as follows:

      i. Supply details of anticipated gas supply from respondent's near-term development of gas wells, if any.

      ii. Provide gas supply agreements and well development ventures and identify the parties thereto.

   e. Indicate any anticipated curtailments and explain the reasons for the curtailments.

   f. Provide current data on any Federal Power Commission action or programs that may affect, or tend to affect, the natural gas supply to the gas utility.

* *

a. If respondent has various gas service areas, indicate if they are integrated, such that the gas supply is available to all customers.

The vast majority of Peoples' facilities are integrated. There are several isolated service territories. Grove City (the largest), Greene County, and Claysburg require special gas supply arrangements but are all served using common contracted transportation capacity and storage.

b. Provide all pertinent data regarding company policy related to the addition of new consumers in the company's service area.

Refer to Exhibit No. 10, Schedule No. 5 (53.53.III.E.39)

c. Explain how respondent obtains its gas supply, as follows:

i. Explain how respondent stores or manufactures gas; if applicable.

Peoples does not manufacture gas. Peoples stores gas in five on-system storage pools in western Pennsylvania and through contracted storage services provided by Columbia Transmission, Eastern Gas Transmission & Storage, Equitrans and National Fuel Gas Supply. Generally, gas is purchased, delivered and injected into these underground storage reservoirs during the summer and withdrawn during the following winter to meet weather affected increases in customer demand.

ii. State whether the company has peak shaving facilities.

Peoples' storage facilities are generally operated in a manner which provides for gas to be withdrawn throughout the winter season. On days when demand levels are increased due to cold weather, the capability to withdraw gas for serving those increased demands is also increased. By this coincident occurrence, all on-system storage pools in the system provide a "peaking service".

iii. Provide details of coal-gasification programs, if any.

Peoples has no coal-gasification programs.

iv. Describe the potential for emergency purchases of gas. Peoples does not anticipate any emergency purchases.

v. Provide the amount of gas in MCF supplied by various suppliers in the test year (include a copy of all contracts).

Refer to the responses to Exhibit No. 12, Schedule No. 4 (53.53.III.E.24) and Exhibit No. 12, Schedule No. 16 (53.53.IV.B.14) for the quantities of gas, in Mcf, supplied by various suppliers.

Attachment A is a sample of a standard Base Contract for interstate gas purchases. The Base Contract provides the general terms and conditions for the purchase and sale of natural gas. The parties agree to abide by the terms of the Base Contract to enter into a transaction. Transaction confirmations, when executed, are similar in format to the confirmation in Exhibit A in the attachment. Generally, confirmations for one month or less are not memorialized. However, details of transactions are recorded telephonically or electronically in the event there is a need for dispute resolution. There are numerous transactions, samples of which can be made available upon request.

Attachment B is a sample of Peoples' Base Gas Purchase Contract (GPC) for local Pennsylvania purchases. Due to the large number of local gas purchase contracts, they have been excluded from this response. Copies of these contracts can be made available upon request.

vi. **Provide the amount of gas in MCF supplied from company-owned wells during the test year**.

Peoples has no company-owned wells.

d. Provide plans for future gas supply, as follows:

i. Supply details of anticipated gas supply from respondent's near-term development of gas wells, if any.

Peoples has no plans to develop company-owned wells.

ii. Provide gas supply agreements and well development ventures and identify the parties thereto.

Peoples has no well development ventures.

e. Indicate any anticipated curtailments and explain the reasons for the curtailments.

Peoples does not anticipate any curtailments.

f. Provide current data on any Federal Power Commission action or programs that may affect, or tend to affect, the natural gas supply to the gas utility.

There are none.

Base Contract for Sale and Purchase of Natural Gas

This Base Contract is entered into as of the following date: _____

Base Contract for Sale and Purchase of Natural Gas

(Continued)

This Base Contract incorporates by reference for all purposes the General Terms and Conditions for Sale and Purchase of Natural Gas published by the North American Energy Standards Board. The parties hereby agree to the following provisions offered in said General Terms and Conditions. In the event the parties fail to check a box, the specified default provision shall apply. Select the appropriate box(es) from each section:

Section 1.2 Transaction Procedure
■ Oral (default)
OR
□ Written

Section 2.7 Confirm Deadline
■ 2 Business Days after receipt (default)
OR
□ _____ Business Days after receipt

Section 2.8 Confirming Party
□ Seller (default)
OR
□ Buyer
■ Peoples Natural Gas

Section 3.2 Performance Obligation
■ Cover Standard (default)
OR
□ Spot Price Standard

Note: The following Spot Price Publication applies to both of the immediately preceding.

Section 2.31 Spot Price Publication
■ Gas Daily Midpoint (default)
OR
□ _____

Section 6 Taxes
■ Buyer Pays At and After Delivery Point (default)
OR
□ Seller Pays Before and At Delivery Point

Section 7.2 Payment Date
■ **25th Day** of Month following Month of delivery (default)
OR
□ Day of Month following Month of delivery

Section 7.2 Method of Payment
■ Wire transfer (default)
□ Automated Clearinghouse Credit (ACH)
□ Check

Section 7.7 Netting
■ Netting applies (default)
OR
□ Netting does not apply

Section 10.2 Additional Events of Default
□ No Additional Events of Default (default)
□ Indebtedness Cross Default
□ Party A: _____
□ Party B: _____
■ Transactional Cross Default
Specified Transactions:
"Any physical or financial commodity contract or transportation between the parties for any energy or energy related products."

Section 10.3.1 Early Termination Damages
■ Early Termination Damages Apply (default)
OR
□ Early Termination Damages Do Not Apply

Section 10.3.2 Other Agreement Setoffs
■ Other Agreement Setoffs Apply (default)
■ Bilateral (default)
□ Triangular
OR
□ Other Agreement Setoffs Do Not Apply

Section 15.5 Choice Of Law
New York

Section 15.10 Confidentiality
■ Confidentiality applies (default)
OR
□ Confidentiality does not apply

☒ **Special Provisions** Number of sheets attached: Three (3)

General Terms and Conditions
Base Contract for Sale and Purchase of Natural Gas

SECTION 1. PURPOSE AND PROCEDURES

1.1. These General Terms and Conditions are intended to facilitate purchase and sale transactions of Gas on a Firm or Interruptible basis. "Buyer" refers to the party receiving Gas and "Seller" refers to the party delivering Gas. The entire agreement between the parties shall be the Contract as defined in Section 2.9.

The parties have selected either the "Oral Transaction Procedure" or the "Written Transaction Procedure" as indicated on the Base Contract.

Oral Transaction Procedure:

1.2. The parties will use the following Transaction Confirmation procedure. Any Gas purchase and sale transaction may be effectuated in an EDI transmission or telephone conversation with the offer and acceptance constituting the agreement of the parties. The parties shall be legally bound from the time they so agree to transaction terms and may each rely thereon. Any such transaction shall be considered a "writing" and to have been "signed". Notwithstanding the foregoing sentence, the parties agree that Confirming Party shall, and the other party may, confirm a telephonic transaction by sending the other party a Transaction Confirmation by facsimile, EDI or mutually agreeable electronic means within three Business Days of a transaction covered by this Section 1.2 (Oral Transaction Procedure) provided that the failure to send a Transaction Confirmation shall not invalidate the oral agreement of the parties. Confirming Party adopts its confirming letterhead, or the like, as its signature on any Transaction Confirmation as the identification and authentication of Confirming Party. If the Transaction Confirmation contains any provisions other than those relating to the commercial terms of the transaction (i.e., price, quantity, performance obligation, delivery point, period of delivery and/or transportation conditions), which modify or supplement the Base Contract or General Terms and Conditions of this Contract (e.g., arbitration or additional representations and warranties), such provisions shall not be deemed to be accepted pursuant to Section 1.3 but must be expressly agreed to by both parties; provided that the foregoing shall not invalidate any transaction agreed to by the parties.

Written Transaction Procedure:

1.2. The parties will use the following Transaction Confirmation procedure. Should the parties come to an agreement regarding a Gas purchase and sale transaction for a particular Delivery Period, the Confirming Party shall, and the other party may, record that agreement on a Transaction Confirmation and communicate such Transaction Confirmation by facsimile, EDI or mutually agreeable electronic means, to the other party by the close of the Business Day following the date of agreement. The parties acknowledge that their agreement will not be binding until the exchange of nonconflicting Transaction Confirmations or the passage of the Confirm Deadline without objection from the receiving party, as provided in Section 1.3.

1.3. If a sending party's Transaction Confirmation is materially different from the receiving party's understanding of the agreement referred to in Section 1.2, such receiving party shall notify the sending party via facsimile, EDI or mutually agreeable electronic means by the Confirm Deadline, unless such receiving party has previously sent a Transaction Confirmation to the sending party. The failure of the receiving party to so notify the sending party in writing by the Confirm Deadline constitutes the receiving party's agreement to the terms of the transaction described in the sending party's Transaction Confirmation. If there are any material differences between timely sent Transaction Confirmations governing the same transaction, then neither Transaction Confirmation shall be binding until or unless such differences are resolved including the use of any evidence that clearly resolves the differences in the Transaction Confirmations. In the event of a conflict among the terms of (i) a binding Transaction Confirmation pursuant to Section 1.2, (ii) the oral agreement of the parties which may be evidenced by a recorded conversation, where the parties have selected the Oral Transaction Procedure of the Base Contract, (iii) the Base Contract, and (iv) these General Terms and Conditions, the terms of the documents shall govern in the priority listed in this sentence.

1.4. The parties agree that each party may electronically record all telephone conversations with respect to this Contract between their respective employees, without any special or further notice to the other party. Each party shall obtain any necessary consent of its agents and employees to such recording. Where the parties have selected the Oral Transaction Procedure in Section 1.2 of the Base Contract, the parties agree not to contest the validity or enforceability of telephonic recordings entered into in accordance with the requirements of this Base Contract.

SECTION 2. DEFINITIONS

The terms set forth below shall have the meaning ascribed to them below. Other terms are also defined elsewhere in the Contract and shall have the meanings ascribed to them herein.

2.1. "Additional Event of Default" shall mean Transactional Cross Default or Indebtedness Cross Default, each as and if selected by the parties pursuant to the Base Contract.

2.2. "Affiliate" shall mean, in relation to any person, any entity controlled, directly or indirectly, by the person, any entity that controls, directly or indirectly, the person or any entity directly or indirectly under common control with the person. For this purpose, "control" of any entity or person means ownership of at least 50 percent of the voting power of the entity or person.

2.3. "Alternative Damages" shall mean such damages, expressed in dollars or dollars per MMBtu, as the parties shall agree upon in the Transaction Confirmation, in the event either Seller or Buyer fails to perform a Firm obligation to deliver Gas in the case of Seller or to receive Gas in the case of Buyer.

2.4. "Base Contract" shall mean a contract executed by the parties that incorporates these General Terms and Conditions by reference; that specifies the agreed selections of provisions contained herein; and that sets forth other information required herein and any Special Provisions and addendum(s) as identified on page one.

2.5. "British thermal unit" or "Btu" shall mean the International BTU, which is also called the Btu (IT).

2.6. "Business Day(s)" shall mean Monday through Friday, excluding Federal Banking Holidays for transactions in the U.S.

2.7. "Confirm Deadline" shall mean 5:00 p.m. in the receiving party's time zone on the second Business Day following the Day a Transaction Confirmation is received or, if applicable, on the Business Day agreed to by the parties in the Base Contract; provided, if the Transaction Confirmation is time stamped after 5:00 p.m. in the receiving party's time zone, it shall be deemed received at the opening of the next Business Day.

2.8. "Confirming Party" shall mean the party designated in the Base Contract to prepare and forward Transaction Confirmations to the other party.

2.9. "Contract" shall mean the legally-binding relationship established by (i) the Base Contract, (ii) any and all binding Transaction Confirmations and (iii) where the parties have selected the Oral Transaction Procedure in Section 1.2 of the Base Contract, any and all transactions that the parties have entered into through an EDI transmission or by telephone, but that have not been confirmed in a binding Transaction Confirmation, all of which shall form a single integrated agreement between the parties.

2.10. "Contract Price" shall mean the amount expressed in U.S. Dollars per MMBtu to be paid by Buyer to Seller for the purchase of Gas as agreed to by the parties in a transaction.

2.11. "Contract Quantity" shall mean the quantity of Gas to be delivered and taken as agreed to by the parties in a transaction.

2.12. "Cover Standard", as referred to in Section 3.2, shall mean that if there is an unexcused failure to take or deliver any quantity of Gas pursuant to this Contract, then the performing party shall use commercially reasonable efforts to (i) if Buyer is the performing party, obtain Gas, (or an alternate fuel if elected by Buyer and replacement Gas is not available), or (ii) if Seller is the performing party, sell Gas, in either case, at a price reasonable for the delivery or production area, as applicable, consistent with: the amount of notice provided by the nonperforming party; the immediacy of the Buyer's Gas consumption needs or Seller's Gas sales requirements, as applicable; the quantities involved; and the anticipated length of failure by the nonperforming party.

2.13. "Credit Support Obligation(s)" shall mean any obligation(s) to provide or establish credit support for, or on behalf of, a party to this Contract such as cash, an irrevocable standby letter of credit, a margin agreement, a prepayment, a security interest in an asset, guaranty, or other good and sufficient security of a continuing nature.

2.14. "Day" shall mean a period of 24 consecutive hours, coextensive with a "day" as defined by the Receiving Transporter in a particular transaction.

2.15. "Delivery Period" shall be the period during which deliveries are to be made as agreed to by the parties in a transaction.

2.16. "Delivery Point(s)" shall mean such point(s) as are agreed to by the parties in a transaction.

2.17. "EDI" shall mean an electronic data interchange pursuant to an agreement entered into by the parties, specifically relating to the communication of Transaction Confirmations under this Contract.

2.18. "EFP" shall mean the purchase, sale or exchange of natural Gas as the "physical" side of an exchange for physical transaction involving gas futures contracts. EFP shall incorporate the meaning and remedies of "Firm", provided that a party's excuse for nonperformance of its obligations to deliver or receive Gas will be governed by the rules of the relevant futures exchange regulated under the Commodity Exchange Act.

2.19. "Firm" shall mean that either party may interrupt its performance without liability only to the extent that such performance is prevented for reasons of Force Majeure; provided, however, that during Force Majeure interruptions, the party invoking Force Majeure may be responsible for any Imbalance Charges as set forth in Section 4.3 related to its interruption after the nomination is made to the Transporter and until the change in deliveries and/or receipts is confirmed by the Transporter.

2.20. "Gas" shall mean any mixture of hydrocarbons and noncombustible gases in a gaseous state consisting primarily of methane.

2.21. "Guarantor" shall mean any entity that has provided a guaranty of the obligations of a party hereunder.

2.22. "Imbalance Charges" shall mean any fees, penalties, costs or charges (in cash or in kind) assessed by a Transporter for failure to satisfy the Transporter's balance and/or nomination requirements.

2.23. "Indebtedness Cross Default" shall mean if selected on the Base Contract by the parties with respect to a party, that it or its Guarantor, if any, experiences a default, or similar condition or event however therein defined, under one or more agreements or instruments, individually or collectively, relating to indebtedness (such indebtedness to include any obligation whether present or future, contingent or otherwise, as principal or surety or otherwise) for the payment or repayment of borrowed money in an aggregate amount greater than the threshold specified in the Base Contract with respect to such party or its Guarantor, if any, which results in such indebtedness becoming immediately due and payable.

2.24. "Interruptible" shall mean that either party may interrupt its performance at any time for any reason, whether or not caused by an event of Force Majeure, with no liability, except such interrupting party may be responsible for any Imbalance Charges as set forth in Section 4.3 related to its interruption after the nomination is made to the Transporter and until the change in deliveries and/or receipts is confirmed by Transporter.

2.25. "MMBtu" shall mean one million British thermal units, which is equivalent to one dekatherm.

2.26. "Month" shall mean the period beginning on the first Day of the calendar month and ending immediately prior to the commencement of the first Day of the next calendar month.

2.27. "Payment Date" shall mean a date, as indicated on the Base Contract, on or before which payment is due Seller for Gas received by Buyer in the previous Month.

2.28. "Receiving Transporter" shall mean the Transporter receiving Gas at a Delivery Point, or absent such receiving Transporter, the Transporter delivering Gas at a Delivery Point.

2.29. "Scheduled Gas" shall mean the quantity of Gas confirmed by Transporter(s) for movement, transportation or management.

2.30. "Specified Transaction(s)" shall mean any other transaction or agreement between the parties for the purchase, sale or exchange of physical Gas, and any other transaction or agreement identified as a Specified Transaction under the Base Contract.

2.31. "Spot Price " as referred to in Section 3.2 shall mean the price listed in the publication indicated on the Base Contract, under the listing applicable to the geographic location closest in proximity to the Delivery Point(s) for the relevant Day; provided, if there is no single price published for such location for such Day, but there is published a range of prices, then the Spot Price shall be the average of such high and low prices. If no price or range of prices is published for such Day, then the Spot Price shall be the average of the following: (i) the price (determined as stated above) for the first Day for which a price or range of prices is published that next precedes the relevant Day; and (ii) the price (determined as stated above) for the first Day for which a price or range of prices is published that next follows the relevant Day.

2.32. "Transaction Confirmation" shall mean a document, similar to the form of Exhibit A, setting forth the terms of a transaction formed pursuant to Section 1 for a particular Delivery Period.

2.33. "Transactional Cross Default" shall mean if selected on the Base Contract by the parties with respect to a party, that it shall be in default, however therein defined, under any Specified Transaction.

2.34. "Termination Option" shall mean the option of either party to terminate a transaction in the event that the other party fails to perform a Firm obligation to deliver Gas in the case of Seller or to receive Gas in the case of Buyer for a designated number of days during a period as specified on the applicable Transaction Confirmation.

2.35. "Transporter(s)" shall mean all Gas gathering or pipeline companies, or local distribution companies, acting in the capacity of a transporter, transporting Gas for Seller or Buyer upstream or downstream, respectively, of the Delivery Point pursuant to a particular transaction.

SECTION 3. PERFORMANCE OBLIGATION

3.1. Seller agrees to sell and deliver, and Buyer agrees to receive and purchase, the Contract Quantity for a particular transaction in accordance with the terms of the Contract. Sales and purchases will be on a Firm or Interruptible basis, as agreed to by the parties in a transaction.

The parties have selected either the "Cover Standard" or the "Spot Price Standard" as indicated on the Base Contract.

Cover Standard:

3.2. The sole and exclusive remedy of the parties in the event of a breach of a Firm obligation to deliver or receive Gas shall be recovery of the following: (i) in the event of a breach by Seller on any Day(s), payment by Seller to Buyer in an amount equal to the positive difference, if any, between the purchase price paid by Buyer utilizing the Cover Standard and the Contract Price, adjusted for commercially reasonable differences in transportation costs to or from the Delivery Point(s), multiplied by the difference between the Contract Quantity and the quantity actually delivered by Seller for such Day(s) excluding any quantity for which no replacement is available; or (ii) in the event of a breach by Buyer on any Day(s), payment by Buyer to Seller in the amount equal to the positive difference, if any, between the Contract Price and the price received by Seller utilizing the Cover Standard for the resale of such Gas, adjusted for commercially reasonable differences in transportation costs to or from the Delivery Point(s), multiplied by the difference between the Contract Quantity and the quantity actually taken by Buyer for such Day(s) excluding any quantity for which no sale is available; and (iii) in the event that Buyer has used commercially reasonable efforts to replace the Gas or Seller has used commercially reasonable efforts to sell the Gas to a third party, and no such replacement or sale is available for all or any portion of the Contract Quantity of Gas, then in addition to (i) or (ii) above, as applicable, the sole and exclusive remedy of the performing party with respect to the Gas not replaced or sold shall be an amount equal to any unfavorable difference between the Contract Price and the Spot Price, adjusted for such transportation to the applicable Delivery Point, multiplied by the quantity of such Gas not replaced or sold. Imbalance Charges shall not be recovered under this Section 3.2, but Seller and/or Buyer shall be responsible for Imbalance Charges, if any, as provided in Section 4.3. The amount of such unfavorable difference shall be payable five Business Days after presentation of the performing party's invoice, which shall set forth the basis upon which such amount was calculated.

Spot Price Standard:

3.2. The sole and exclusive remedy of the parties in the event of a breach of a Firm obligation to deliver or receive Gas shall be recovery of the following: (i) in the event of a breach by Seller on any Day(s), payment by Seller to Buyer in an amount equal to the difference between the Contract Quantity and the actual quantity delivered by Seller and received by Buyer for such Day(s), multiplied by the positive difference, if any, obtained by subtracting the Contract Price from the Spot Price; or (ii) in the event of a breach by Buyer on any Day(s), payment by Buyer to Seller in an amount equal to the difference between the Contract Quantity and the actual quantity delivered by Seller and received by Buyer for such Day(s), multiplied by the positive difference, if any, obtained by subtracting the applicable Spot Price from the Contract Price. Imbalance Charges shall not be recovered under this Section 3.2, but Seller and/or Buyer shall be responsible for Imbalance Charges, if any, as provided in Section 4.3. The amount of such unfavorable difference shall be payable five Business Days after presentation of the performing party's invoice, which shall set forth the basis upon which such amount was calculated.

3.3. Notwithstanding Section 3.2, the parties may agree to Alternative Damages in a Transaction Confirmation executed in writing by both parties.

3.4. In addition to Sections 3.2 and 3.3, the parties may provide for a Termination Option in a Transaction Confirmation executed in writing by both parties. The Transaction Confirmation containing the Termination Option will designate the length of nonperformance triggering the Termination Option and the procedures for exercise thereof, how damages for nonperformance will be compensated, and how liquidation costs will be calculated.

SECTION 4. TRANSPORTATION, NOMINATIONS, AND IMBALANCES

4.1. Seller shall have the sole responsibility for transporting the Gas to the Delivery Point(s). Buyer shall have the sole responsibility for transporting the Gas from the Delivery Point(s).

4.2. The parties shall coordinate their nomination activities, giving sufficient time to meet the deadlines of the affected Transporter(s). Each party shall give the other party timely prior Notice, sufficient to meet the requirements of all Transporter(s) involved in the transaction, of the quantities of Gas to be delivered and purchased each Day. Should either party become aware that actual deliveries at the Delivery Point(s) are greater or lesser than the Scheduled Gas, such party shall promptly notify the other party.

4.3. The parties shall use commercially reasonable efforts to avoid imposition of any Imbalance Charges. If Buyer or Seller receives an invoice from a Transporter that includes Imbalance Charges, the parties shall determine the validity as well as the cause of such Imbalance Charges. If the Imbalance Charges were incurred as a result of Buyer's receipt of quantities of Gas greater than or less than the Scheduled Gas, then Buyer shall pay for such Imbalance Charges or reimburse Seller for such Imbalance Charges paid by Seller. If the Imbalance Charges were incurred as a result of Seller's delivery of quantities of Gas greater than or less than the Scheduled Gas, then Seller shall pay for such Imbalance Charges or reimburse Buyer for such Imbalance Charges paid by Buyer.

SECTION 5. QUALITY AND MEASUREMENT

All Gas delivered by Seller shall meet the pressure, quality and heat content requirements of the Receiving Transporter. The unit of quantity measurement for purposes of this Contract shall be one MMBtu dry. Measurement of Gas quantities hereunder shall be in accordance with the established procedures of the Receiving Transporter.

SECTION 6. TAXES

The parties have selected either "Buyer Pays At and After Delivery Point" or "Seller Pays Before and At Delivery Point" as indicated on the Base Contract.

Buyer Pays At and After Delivery Point:

Seller shall pay or cause to be paid all taxes, fees, levies, penalties, licenses or charges imposed by any government authority ("Taxes") on or with respect to the Gas prior to the Delivery Point(s). Buyer shall pay or cause to be paid all Taxes on or with respect to the Gas at the Delivery Point(s) and all Taxes after the Delivery Point(s). If a party is required to remit or pay Taxes that are the other party's responsibility hereunder, the party responsible for such Taxes shall promptly reimburse the other party for such Taxes. Any party entitled to an exemption from any such Taxes or charges shall furnish the other party any necessary documentation thereof.

Seller Pays Before and At Delivery Point:

Seller shall pay or cause to be paid all taxes, fees, levies, penalties, licenses or charges imposed by any government authority ("Taxes") on or with respect to the Gas prior to the Delivery Point(s) and all Taxes at the Delivery Point(s). Buyer shall pay or cause to be paid all Taxes on or with respect to the Gas after the Delivery Point(s). If a party is required to remit or pay Taxes that are the other party's responsibility hereunder, the party responsible for such Taxes shall promptly reimburse the other party for such Taxes. Any party entitled to an exemption from any such Taxes or charges shall furnish the other party any necessary documentation thereof.

SECTION 7. BILLING, PAYMENT, AND AUDIT

7.1. Seller shall invoice Buyer for Gas delivered and received in the preceding Month and for any other applicable charges, providing supporting documentation acceptable in industry practice to support the amount charged. If the actual quantity delivered is not known by the billing date, billing will be prepared based on the quantity of Scheduled Gas. The invoiced quantity will then be adjusted to the actual quantity on the following Month's billing or as soon thereafter as actual delivery information is available.

7.2. Buyer shall remit the amount due under Section 7.1 in the manner specified in the Base Contract, in immediately available funds, on or before the later of the Payment Date or 10 Days after receipt of the invoice by Buyer; provided that if the Payment Date is not a Business Day, payment is due on the next Business Day following that date. In the event any payments are due Buyer hereunder, payment to Buyer shall be made in accordance with this Section 7.2.

7.3. In the event payments become due pursuant to Sections 3.2 or 3.3, the performing party may submit an invoice to the nonperforming party for an accelerated payment setting forth the basis upon which the invoiced amount was calculated. Payment from the nonperforming party will be due five Business Days after receipt of invoice.

7.4. If the invoiced party, in good faith, disputes the amount of any such invoice or any part thereof, such invoiced party will pay such amount as it concedes to be correct; provided, however, if the invoiced party disputes the amount due, it must provide supporting documentation acceptable in industry practice to support the amount paid or disputed without undue delay. In the event the parties are unable to resolve such dispute, either party may pursue any remedy available at law or in equity to enforce its rights pursuant to this Section.

7.5. If the invoiced party fails to remit the full amount payable when due, interest on the unpaid portion shall accrue from the date due until the date of payment at a rate equal to the lower of (i) the then-effective prime rate of interest published under "Money Rates" by The Wall Street Journal, plus two percent per annum; or (ii) the maximum applicable lawful interest rate.

7.6. A party shall have the right, at its own expense, upon reasonable Notice and at reasonable times, to examine and audit and to obtain copies of the relevant portion of the books, records, and telephone recordings of the other party only to the extent reasonably necessary to verify the accuracy of any statement, charge, payment, or computation made under the Contract. This right to examine, audit, and to obtain copies shall not be available with respect to proprietary information not directly relevant to transactions under this Contract. All invoices and billings shall be conclusively presumed final and accurate and all associated claims for under- or overpayments shall be deemed waived unless such invoices or billings are objected to in writing, with adequate explanation and/or documentation, within two years after the Month of Gas delivery. All retroactive adjustments under Section 7 shall be paid in full by the party owing payment within 30 Days of Notice and substantiation of such inaccuracy.

7.7. Unless the parties have elected on the Base Contract not to make this Section 7.7 applicable to this Contract, the parties shall net all undisputed amounts due and owing, and/or past due, arising under the Contract such that the party owing the greater amount shall make a single payment of the net amount to the other party in accordance with Section 7; provided that no payment required to be made pursuant to the terms of any Credit Support Obligation or pursuant to Section 7.3 shall be subject to netting under this Section. If the parties have executed a separate netting agreement, the terms and conditions therein shall prevail to the extent inconsistent herewith.

SECTION 8. TITLE, WARRANTY, AND INDEMNITY

8.1. Unless otherwise specifically agreed, title to the Gas shall pass from Seller to Buyer at the Delivery Point(s). Seller shall have responsibility for and assume any liability with respect to the Gas prior to its delivery to Buyer at the specified Delivery Point(s). Buyer shall have responsibility for and assume any liability with respect to said Gas after its delivery to Buyer at the Delivery Point(s).

8.2. Seller warrants that it will have the right to convey and will transfer good and merchantable title to all Gas sold hereunder and delivered by it to Buyer, free and clear of all liens, encumbrances, and claims. EXCEPT AS PROVIDED IN THIS SECTION 8.2 AND IN SECTION 15.8, ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR ANY PARTICULAR PURPOSE, ARE DISCLAIMED.

8.3. Seller agrees to indemnify Buyer and save it harmless from all losses, liabilities or claims including reasonable attorneys' fees and costs of court ("Claims"), from any and all persons, arising from or out of claims of title, personal injury (including death) or property damage from said Gas or other charges thereon which attach before title passes to Buyer. Buyer agrees to indemnify Seller and save it harmless from all Claims, from any and all persons, arising from or out of claims regarding payment, personal injury (including death) or property damage from said Gas or other charges thereon which attach after title passes to Buyer.

8.4. The parties agree that the delivery of and the transfer of title to all Gas under this Contract shall take place within the Customs Territory of the United States (as defined in general note 2 of the Harmonized Tariff Schedule of the United States 19 U.S.C. §1202, General Notes, page 3); provided, however, that in the event Seller took title to the Gas outside the Customs Territory of the United States, Seller represents and warrants that it is the importer of record for all Gas entered and delivered into the United States, and shall be responsible for entry and entry summary filings as well as the payment of duties, taxes and fees, if any, and all applicable record keeping requirements.

8.5. Notwithstanding the other provisions of this Section 8, as between Seller and Buyer, Seller will be liable for all Claims to the extent that such arise from the failure of Gas delivered by Seller to meet the quality requirements of Section 5.

SECTION 9. NOTICES

9.1. All Transaction Confirmations, invoices, payment instructions, and other communications made pursuant to the Base Contract ("Notices") shall be made to the addresses specified in writing by the respective parties from time to time.

9.2. All Notices required hereunder shall be in writing and may be sent by facsimile or mutually acceptable electronic means, a nationally recognized overnight courier service, first class mail or hand delivered.

9.3. Notice shall be given when received on a Business Day by the addressee. In the absence of proof of the actual receipt date, the following presumptions will apply. Notices sent by facsimile shall be deemed to have been received upon the sending

party's receipt of its facsimile machine's confirmation of successful transmission. If the day on which such facsimile is received is not a Business Day or is after five p.m. on a Business Day, then such facsimile shall be deemed to have been received on the next following Business Day. Notice by overnight mail or courier shall be deemed to have been received on the next Business Day after it was sent or such earlier time as is confirmed by the receiving party. Notice via first class mail shall be considered delivered five Business Days after mailing.

9.4. The party receiving a commercially acceptable Notice of change in payment instructions or other payment information shall not be obligated to implement such change until ten Business Days after receipt of such Notice.

SECTION 10. FINANCIAL RESPONSIBILITY

10.1. If either party ("X") has reasonable grounds for insecurity regarding the performance of any obligation under this Contract (whether or not then due) by the other party ("Y") (including, without limitation, the occurrence of a material change in the creditworthiness of Y or its Guarantor, if applicable), X may demand Adequate Assurance of Performance. "Adequate Assurance of Performance" shall mean sufficient security in the form, amount, for a term, and from an issuer, all as reasonably acceptable to X, including, but not limited to cash, a standby irrevocable letter of credit, a prepayment, a security interest in an asset or guaranty. Y hereby grants to X a continuing first priority security interest in, lien on, and right of setoff against all Adequate Assurance of Performance in the form of cash transferred by Y to X pursuant to this Section 10.1. Upon the return by X to Y of such Adequate Assurance of Performance, the security interest and lien granted hereunder on that Adequate Assurance of Performance shall be released automatically and, to the extent possible, without any further action by either party.

10.2. In the event (each an "Event of Default") either party (the "Defaulting Party") or its Guarantor shall: (i) make an assignment or any general arrangement for the benefit of creditors; (ii) file a petition or otherwise commence, authorize, or acquiesce in the commencement of a proceeding or case under any bankruptcy or similar law for the protection of creditors or have such petition filed or proceeding commenced against it; (iii) otherwise become bankrupt or insolvent (however evidenced); (iv) be unable to pay its debts as they fall due; (v) have a receiver, provisional liquidator, conservator, custodian, trustee or other similar official appointed with respect to it or substantially all of its assets; (vi) fail to perform any obligation to the other party with respect to any Credit Support Obligations relating to the Contract; (vii) fail to give Adequate Assurance of Performance under Section 10.1 within 48 hours but at least one Business Day of a written request by the other party; (viii) not have paid any amount due the other party hereunder on or before the second Business Day following written Notice that such payment is due; or ix) be the affected party with respect to any Additional Event of Default; then the other party (the "Non-Defaulting Party") shall have the right, at its sole election, to immediately withhold and/or suspend deliveries or payments upon Notice and/or to terminate and liquidate the transactions under the Contract, in the manner provided in Section 10.3, in addition to any and all other remedies available hereunder.

10.3. If an Event of Default has occurred and is continuing, the Non-Defaulting Party shall have the right, by Notice to the Defaulting Party, to designate a Day, no earlier than the Day such Notice is given and no later than 20 Days after such Notice is given, as an early termination date (the "Early Termination Date") for the liquidation and termination pursuant to Section 10.3.1 of all transactions under the Contract, each a "Terminated Transaction". On the Early Termination Date, all transactions will terminate, other than those transactions, if any, that may not be liquidated and terminated under applicable law ("Excluded Transactions"), which Excluded Transactions must be liquidated and terminated as soon thereafter as is legally permissible, and upon termination shall be a Terminated Transaction and be valued consistent with Section 10.3.1 below. With respect to each Excluded Transaction, its actual termination date shall be the Early Termination Date for purposes of Section 10.3.1.

The parties have selected either "Early Termination Damages Apply" or "Early Termination Damages Do Not Apply" as indicated on the Base Contract.

Early Termination Damages Apply:

10.3.1. As of the Early Termination Date, the Non-Defaulting Party shall determine, in good faith and in a commercially reasonable manner, (i) the amount owed (whether or not then due) by each party with respect to all Gas delivered and received between the parties under Terminated Transactions and Excluded Transactions on and before the Early Termination Date and all other applicable charges relating to such deliveries and receipts (including without limitation any amounts owed under Section 3.2), for which payment has not yet been made by the party that owes such payment under this Contract and (ii) the Market Value, as defined below, of each Terminated Transaction. The Non-Defaulting Party shall (x) liquidate and accelerate each Terminated Transaction at its Market Value, so that each amount equal to the difference between such Market Value and the Contract Value, as defined below, of such Terminated Transaction(s) shall be due to the Buyer under the Terminated Transaction(s) if such Market Value exceeds the Contract Value and to the Seller if the opposite is the case; and (y) where appropriate, discount each amount then due under clause (x) above to present value in a commercially reasonable manner as of the Early Termination Date (to take account of the period between the date of liquidation and the date on which such amount would have otherwise been due pursuant to the relevant Terminated Transactions).

For purposes of this Section 10.3.1, "Contract Value" means the amount of Gas remaining to be delivered or purchased under a transaction multiplied by the Contract Price, and "Market Value" means the amount of Gas remaining to be delivered or purchased under a transaction multiplied by the market price for a similar transaction at the Delivery Point determined by the Non-Defaulting Party in a commercially reasonable manner. To ascertain the Market Value, the Non-Defaulting Party may consider, among other valuations, any or all of the settlement prices of NYMEX Gas futures contracts, quotations from leading dealers in energy swap contracts or physical gas trading markets, similar sales or purchases and any other bona fide third-party offers, all adjusted for the length of the term and differences in transportation costs. A party shall not be required to enter into a replacement transaction(s) in

order to determine the Market Value. Any extension(s) of the term of a transaction to which parties are not bound as of the Early Termination Date (including but not limited to "evergreen provisions") shall not be considered in determining Contract Values and Market Values. For the avoidance of doubt, any option pursuant to which one party has the right to extend the term of a transaction shall be considered in determining Contract Values and Market Values. The rate of interest used in calculating net present value shall be determined by the Non-Defaulting Party in a commercially reasonable manner.

Early Termination Damages Do Not Apply:

10.3.1. As of the Early Termination Date, the Non-Defaulting Party shall determine, in good faith and in a commercially reasonable manner, the amount owed (whether or not then due) by each party with respect to all Gas delivered and received between the parties under Terminated Transactions and Excluded Transactions on and before the Early Termination Date and all other applicable charges relating to such deliveries and receipts (including without limitation any amounts owed under Section 3.2), for which payment has not yet been made by the party that owes such payment under this Contract.

The parties have selected either "Other Agreement Setoffs Apply" or "Other Agreement Setoffs Do Not Apply" as indicated on the Base Contract.

Other Agreement Setoffs Apply:

Bilateral Setoff Option:

10.3.2. The Non-Defaulting Party shall net or aggregate, as appropriate, any and all amounts owing between the parties under Section 10.3.1, so that all such amounts are netted or aggregated to a single liquidated amount payable by one party to the other (the "Net Settlement Amount"). At its sole option and without prior Notice to the Defaulting Party, the Non-Defaulting Party is hereby authorized to setoff any Net Settlement Amount against (i) any margin or other collateral held by a party in connection with any Credit Support Obligation relating to the Contract; and (ii) any amount(s) (including any excess cash margin or excess cash collateral) owed or held by the party that is entitled to the Net Settlement Amount under any other agreement or arrangement between the parties.

Triangular Setoff Option:

10.3.2. The Non-Defaulting Party shall net or aggregate, as appropriate, any and all amounts owing between the parties under Section 10.3.1, so that all such amounts are netted or aggregated to a single liquidated amount payable by one party to the other (the "Net Settlement Amount"). At its sole option, and without prior Notice to the Defaulting Party, the Non-Defaulting Party is hereby authorized to setoff (i) any Net Settlement Amount against any margin or other collateral held by a party in connection with any Credit Support Obligation relating to the Contract; (ii) any Net Settlement Amount against any amount(s) (including any excess cash margin or excess cash collateral) owed by or to a party under any other agreement or arrangement between the parties; (iii) any Net Settlement Amount owed to the Non-Defaulting Party against any amount(s) (including any excess cash margin or excess cash collateral) owed by the Non-Defaulting Party or its Affiliates to the Defaulting Party under any other agreement or arrangement; (iv) any Net Settlement Amount owed to the Defaulting Party against any amount(s) (including any excess cash margin or excess cash collateral) owed by the Defaulting Party to the Non-Defaulting Party or its Affiliates under any other agreement or arrangement; and/or (v) any Net Settlement Amount owed to the Defaulting Party against any amount(s) (including any excess cash margin or excess cash collateral) owed by the Defaulting Party or its Affiliates to the Non-Defaulting Party under any other agreement or arrangement.

Other Agreement Setoffs Do Not Apply:

10.3.2. The Non-Defaulting Party shall net or aggregate, as appropriate, any and all amounts owing between the parties under Section 10.3.1, so that all such amounts are netted or aggregated to a single liquidated amount payable by one party to the other (the "Net Settlement Amount"). At its sole option and without prior Notice to the Defaulting Party, the Non-Defaulting Party may setoff any Net Settlement Amount against any margin or other collateral held by a party in connection with any Credit Support Obligation relating to the Contract.

10.3.3. If any obligation that is to be included in any netting, aggregation or setoff pursuant to Section 10.3.2 is unascertained, the Non-Defaulting Party may in good faith estimate that obligation and net, aggregate or setoff, as applicable, in respect of the estimate, subject to the Non-Defaulting Party accounting to the Defaulting Party when the obligation is ascertained. Any amount not then due which is included in any netting, aggregation or setoff pursuant to Section 10.3.2 shall be discounted to net present value in a commercially reasonable manner determined by the Non-Defaulting Party.

10.4. As soon as practicable after a liquidation, Notice shall be given by the Non-Defaulting Party to the Defaulting Party of the Net Settlement Amount, and whether the Net Settlement Amount is due to or due from the Non-Defaulting Party. The Notice shall include a written statement explaining in reasonable detail the calculation of the Net Settlement Amount, provided that failure to give such Notice shall not affect the validity or enforceability of the liquidation or give rise to any claim by the Defaulting Party against the Non-Defaulting Party. The Net Settlement Amount as well as any setoffs applied against such amount pursuant to Section 10.3.2, shall be paid by the close of business on the second Business Day following such Notice, which date shall not be earlier than the Early Termination Date. Interest on any unpaid portion of the Net Settlement Amount as adjusted by setoffs, shall accrue from the date due until the date of payment at a rate equal to the lower of (i) the then-effective prime rate of interest published under "Money Rates" by The Wall Street Journal, plus two percent per annum; or (ii) the maximum applicable lawful interest rate.

10.5. The parties agree that the transactions hereunder constitute a "forward contract" within the meaning of the United States Bankruptcy Code and that Buyer and Seller are each "forward contract merchants" within the meaning of the United States Bankruptcy Code.

10.6. The Non-Defaulting Party's remedies under this Section 10 are the sole and exclusive remedies of the Non-Defaulting Party with respect to the occurrence of any Early Termination Date. Each party reserves to itself all other rights, setoffs, counterclaims and other defenses that it is or may be entitled to arising from the Contract.

10.7. With respect to this Section 10, if the parties have executed a separate netting agreement with close-out netting provisions, the terms and conditions therein shall prevail to the extent inconsistent herewith.

SECTION 11. FORCE MAJEURE

11.1. Except with regard to a party's obligation to make payment(s) due under Section 7, Section 10.4, and Imbalance Charges under Section 4, neither party shall be liable to the other for failure to perform a Firm obligation, to the extent such failure was caused by Force Majeure. The term "Force Majeure" as employed herein means any cause not reasonably within the control of the party claiming suspension, as further defined in Section 11.2.

11.2. Force Majeure shall include, but not be limited to, the following: (i) physical events such as acts of God, landslides, lightning, earthquakes, fires, storms or storm warnings, such as hurricanes, which result in evacuation of the affected area, floods, washouts, explosions, breakage or accident or necessity of repairs to machinery or equipment or lines of pipe; (ii) weather related events affecting an entire geographic region, such as low temperatures which cause freezing or failure of wells or lines of pipe; (iii) interruption and/or curtailment of Firm transportation and/or storage by Transporters; (iv) acts of others such as strikes, lockouts or other industrial disturbances, riots, sabotage, insurrections or wars, or acts of terror; and (v) governmental actions such as necessity for compliance with any court order, law, statute, ordinance, regulation, or policy having the effect of law promulgated by a governmental authority having jurisdiction. Seller and Buyer shall make reasonable efforts to avoid the adverse impacts of a Force Majeure and to resolve the event or occurrence once it has occurred in order to resume performance.

11.3. Neither party shall be entitled to the benefit of the provisions of Force Majeure to the extent performance is affected by any or all of the following circumstances: (i) the curtailment of interruptible or secondary Firm transportation unless primary, in-path, Firm transportation is also curtailed; (ii) the party claiming excuse failed to remedy the condition and to resume the performance of such covenants or obligations with reasonable dispatch; or (iii) economic hardship, to include, without limitation, Seller's ability to sell Gas at a higher or more advantageous price than the Contract Price, Buyer's ability to purchase Gas at a lower or more advantageous price than the Contract Price, or a regulatory agency disallowing, in whole or in part, the pass through of costs resulting from this Contract; (iv) the loss of Buyer's market(s) or Buyer's inability to use or resell Gas purchased hereunder, except, in either case, as provided in Section 11.2; or (v) the loss or failure of Seller's gas supply or depletion of reserves, except, in either case, as provided in Section 11.2. The party claiming Force Majeure shall not be excused from its responsibility for Imbalance Charges.

11.4. Notwithstanding anything to the contrary herein, the parties agree that the settlement of strikes, lockouts or other industrial disturbances shall be within the sole discretion of the party experiencing such disturbance.

11.5. The party whose performance is prevented by Force Majeure must provide Notice to the other party. Initial Notice may be given orally; however, written Notice with reasonably full particulars of the event or occurrence is required as soon as reasonably possible. Upon providing written Notice of Force Majeure to the other party, the affected party will be relieved of its obligation, from the onset of the Force Majeure event, to make or accept delivery of Gas, as applicable, to the extent and for the duration of Force Majeure, and neither party shall be deemed to have failed in such obligations to the other during such occurrence or event.

11.6. Notwithstanding Sections 11.2 and 11.3, the parties may agree to alternative Force Majeure provisions in a Transaction Confirmation executed in writing by both parties.

SECTION 12. TERM

This Contract may be terminated on 30 Day's written Notice, but shall remain in effect until the expiration of the latest Delivery Period of any transaction(s). The rights of either party pursuant to Section 7.6, Section 10, Section 13, the obligations to make payment hereunder, and the obligation of either party to indemnify the other, pursuant hereto shall survive the termination of the Base Contract or any transaction.

SECTION 13. LIMITATIONS

FOR BREACH OF ANY PROVISION FOR WHICH AN EXPRESS REMEDY OR MEASURE OF DAMAGES IS PROVIDED, SUCH EXPRESS REMEDY OR MEASURE OF DAMAGES SHALL BE THE SOLE AND EXCLUSIVE REMEDY. A PARTY'S LIABILITY HEREUNDER SHALL BE LIMITED AS SET FORTH IN SUCH PROVISION, AND ALL OTHER REMEDIES OR DAMAGES AT LAW OR IN EQUITY ARE WAIVED. IF NO REMEDY OR MEASURE OF DAMAGES IS EXPRESSLY PROVIDED HEREIN OR IN A TRANSACTION, A PARTY'S LIABILITY SHALL BE LIMITED TO DIRECT ACTUAL DAMAGES ONLY. SUCH DIRECT ACTUAL DAMAGES SHALL BE THE SOLE AND EXCLUSIVE REMEDY, AND ALL OTHER REMEDIES OR DAMAGES AT LAW OR IN EQUITY ARE WAIVED. UNLESS EXPRESSLY HEREIN PROVIDED, NEITHER PARTY SHALL BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY OR INDIRECT DAMAGES, LOST PROFITS OR OTHER BUSINESS INTERRUPTION DAMAGES, BY STATUTE, IN TORT OR CONTRACT, UNDER ANY INDEMNITY PROVISION OR OTHERWISE. IT IS THE INTENT OF THE PARTIES THAT THE LIMITATIONS HEREIN IMPOSED ON REMEDIES AND THE MEASURE OF DAMAGES BE WITHOUT REGARD TO THE CAUSE OR CAUSES RELATED THERETO, INCLUDING THE NEGLIGENCE OF ANY PARTY, WHETHER SUCH NEGLIGENCE BE SOLE, JOINT OR CONCURRENT, OR ACTIVE OR PASSIVE. TO THE EXTENT ANY DAMAGES REQUIRED TO BE PAID HEREUNDER ARE LIQUIDATED, THE PARTIES ACKNOWLEDGE THAT THE DAMAGES ARE DIFFICULT OR IMPOSSIBLE TO DETERMINE, OR OTHERWISE OBTAINING AN ADEQUATE REMEDY IS INCONVENIENT AND THE DAMAGES CALCULATED HEREUNDER CONSTITUTE A REASONABLE APPROXIMATION OF THE HARM OR LOSS.

SECTION 14. MARKET DISRUPTION

If a Market Disruption Event has occurred then the parties shall negotiate in good faith to agree on a replacement price for the Floating Price (or on a method for determining a replacement price for the Floating Price) for the affected Day, and if the parties have not so agreed on or before the second Business Day following the affected Day then the replacement price for the Floating Price shall be determined within the next two following Business Days with each party obtaining, in good faith and from non-affiliated market participants in the relevant market, two quotes for prices of Gas for the affected Day of a similar quality and quantity in the geographical location closest in proximity to the Delivery Point and averaging the four quotes. If either party fails to provide two quotes then the average of the other party's two quotes shall determine the replacement price for the Floating Price. "Floating Price" means the price or a factor of the price agreed to in the transaction as being based upon a specified index. "Market Disruption Event" means, with respect to an index specified for a transaction, any of the following events: (a) the failure of the index to announce or publish information necessary for determining the Floating Price; (b) the failure of trading to commence or the permanent discontinuation or material suspension of trading on the exchange or market acting as the index; (c) the temporary or permanent discontinuance or unavailability of the index; (d) the temporary or permanent closing of any exchange acting as the index; or (e) both parties agree that a material change in the formula for or the method of determining the Floating Price has occurred. For the purposes of the calculation of a replacement price for the Floating Price, all numbers shall be rounded to three decimal places. If the fourth decimal number is five or greater, then the third decimal number shall be increased by one and if the fourth decimal number is less than five, then the third decimal number shall remain unchanged.

SECTION 15. MISCELLANEOUS

15.1. This Contract shall be binding upon and inure to the benefit of the successors, assigns, personal representatives, and heirs of the respective parties hereto, and the covenants, conditions, rights and obligations of this Contract shall run for the full term of this Contract. No assignment of this Contract, in whole or in part, will be made without the prior written consent of the non-assigning party (and shall not relieve the assigning party from liability hereunder), which consent will not be unreasonably withheld or delayed; provided, either party may (i) transfer, sell, pledge, encumber, or assign this Contract or the accounts, revenues, or proceeds hereof in connection with any financing or other financial arrangements, or (ii) transfer its interest to any parent or Affiliate by assignment, merger or otherwise without the prior approval of the other party. Upon any such assignment, transfer and assumption, the transferor shall remain principally liable for and shall not be relieved of or discharged from any obligations hereunder.

15.2. If any provision in this Contract is determined to be invalid, void or unenforceable by any court having jurisdiction, such determination shall not invalidate, void, or make unenforceable any other provision, agreement or covenant of this Contract.

15.3. No waiver of any breach of this Contract shall be held to be a waiver of any other or subsequent breach.

15.4. This Contract sets forth all understandings between the parties respecting each transaction subject hereto, and any prior contracts, understandings and representations, whether oral or written, relating to such transactions are merged into and superseded by this Contract and any effective transaction(s). This Contract may be amended only by a writing executed by both parties.

15.5. The interpretation and performance of this Contract shall be governed by the laws of the jurisdiction as indicated on the Base Contract, excluding, however, any conflict of laws rule which would apply the law of another jurisdiction.

15.6. This Contract and all provisions herein will be subject to all applicable and valid statutes, rules, orders and regulations of any governmental authority having jurisdiction over the parties, their facilities, or Gas supply, this Contract or transaction or any provisions thereof.

15.7. There is no third party beneficiary to this Contract.

15.8. Each party to this Contract represents and warrants that it has full and complete authority to enter into and perform this Contract. Each person who executes this Contract on behalf of either party represents and warrants that it has full and complete authority to do so and that such party will be bound thereby.

15.9. The headings and subheadings contained in this Contract are used solely for convenience and do not constitute a part of this Contract between the parties and shall not be used to construe or interpret the provisions of this Contract.

15.10. Unless the parties have elected on the Base Contract not to make this Section 15.10 applicable to this Contract, neither party shall disclose directly or indirectly without the prior written consent of the other party the terms of any transaction to a third party (other than the employees, lenders, royalty owners, counsel, accountants and other agents of the party, or prospective purchasers of all or substantially all of a party's assets or of any rights under this Contract, provided such persons shall have agreed to keep such terms confidential) except (i) in order to comply with any applicable law, order, regulation, or exchange rule, (ii) to the extent necessary for the enforcement of this Contract , (iii) to the extent necessary to implement any transaction, (iv) to the extent necessary to comply with a regulatory agency's reporting requirements including but not limited to gas cost recovery proceedings; or (v) to the extent such information is delivered to such third party for the sole purpose of calculating a published index. Each party shall notify the other party of any proceeding of which it is aware which may result in disclosure of the terms of any transaction (other than as permitted hereunder) and use reasonable efforts to prevent or limit the disclosure. The existence of this Contract is not subject to this confidentiality obligation. Subject to Section 13, the parties shall be entitled to all remedies available at law or in equity to enforce, or seek relief in connection with this confidentiality obligation. The terms of any transaction hereunder shall be kept confidential by the parties hereto for one year from the expiration of the transaction.

In the event that disclosure is required by a governmental body or applicable law, the party subject to such requirement may disclose the material terms of this Contract to the extent so required, but shall promptly notify the other party, prior to disclosure,

and shall cooperate (consistent with the disclosing party's legal obligations) with the other party's efforts to obtain protective orders or similar restraints with respect to such disclosure at the expense of the other party.

15.11. The parties may agree to dispute resolution procedures in Special Provisions attached to the Base Contract or in a Transaction Confirmation executed in writing by both parties

15.12. Any original executed Base Contract, Transaction Confirmation or other related document may be digitally copied, photocopied, or stored on computer tapes and disks (the "Imaged Agreement"). The Imaged Agreement, if introduced as evidence on paper, the Transaction Confirmation, if introduced as evidence in automated facsimile form, the recording, if introduced as evidence in its original form, and all computer records of the foregoing, if introduced as evidence in printed format, in any judicial, arbitration, mediation or administrative proceedings will be admissible as between the parties to the same extent and under the same conditions as other business records originated and maintained in documentary form. Neither Party shall object to the admissibility of the recording, the Transaction Confirmation, or the Imaged Agreement on the basis that such were not originated or maintained in documentary form. However, nothing herein shall be construed as a waiver of any other objection to the admissibility of such evidence.

DISCLAIMER: The purposes of this Contract are to facilitate trade, avoid misunderstandings and make more definite the terms of contracts of purchase and sale of natural gas. Further, NAESB does not mandate the use of this Contract by any party. **NAESB DISCLAIMS AND EXCLUDES, AND ANY USER OF THIS CONTRACT ACKNOWLEDGES AND AGREES TO NAESB'S DISCLAIMER OF, ANY AND ALL WARRANTIES, CONDITIONS OR REPRESENTATIONS, EXPRESS OR IMPLIED, ORAL OR WRITTEN, WITH RESPECT TO THIS CONTRACT OR ANY PART THEREOF, INCLUDING ANY AND ALL IMPLIED WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS OR SUITABILITY FOR ANY PARTICULAR PURPOSE (WHETHER OR NOT NAESB KNOWS, HAS REASON TO KNOW, HAS BEEN ADVISED, OR IS OTHERWISE IN FACT AWARE OF ANY SUCH PURPOSE), WHETHER ALLEGED TO ARISE BY LAW, BY REASON OF CUSTOM OR USAGE IN THE TRADE, OR BY COURSE OF DEALING. EACH USER OF THIS CONTRACT ALSO AGREES THAT UNDER NO CIRCUMSTANCES WILL NAESB BE LIABLE FOR ANY DIRECT, SPECIAL, INCIDENTAL, EXEMPLARY, PUNITIVE OR CONSEQUENTIAL DAMAGES ARISING OUT OF ANY USE OF THIS CONTRACT.**

MASTER INTERCONNECT AND MEASUREMENT AGREEMENT

THIS MASTER INTERCONNECT AND MEASUREMENT AGREEMENT is entered into this ____ day of _____ 2025, by and between **Peoples Natural Gas Company LLC**, a Pennsylvania limited liability company, with an office located at 375 North Shore Drive, Pittsburgh, Pennsylvania 15212 (hereinafter referred to as "Peoples"), and **[PRODUCER]**, a _____[state] _____[type of company], with an office at [ADDRESS] (hereinafter referred to as "Producer"). As used in this Agreement, Peoples and Producer are also referred to individually as a "Party" and collectively as the "Parties."

WHEREAS, Peoples owns and operates certain Gas facilities and pipelines located in the Commonwealth of Pennsylvania (the "Peoples' System");

WHEREAS, Producer has available certain supplies of Gas which it desires to have delivered onto Peoples' System;

WHEREAS, this Agreement shall supersede, in its entirety, and terminate without cause, any previously executed Agreement(s) between the Parties for the transport and/or purchase of Gas for the Receipt Point(s) identified herein, including, but not limited to, prior Transportation Agreements, Gas Purchase Agreements, Production Enhancement Agreements, Field Purchase Agreements, Measurement Operating Agreements and Interconnection Agreements; however agreements related to blending and compression requirements, such as Gathering Interconnect Compression Agreements and Blending Service and Operation Agreements, shall not be terminated and shall continue pursuant to their terms and conditions;

NOW THEREFORE, in consideration of the promises and covenants contained herein, Peoples and Producer hereby agree as follows:

ARTICLE I
PURPOSE AND PROCEDURES

1.01 **Master Agreement**. This Master Agreement establishes the general terms and conditions under which Producer will deliver Gas onto Peoples' System at specified Receipt Point(s) through Interconnection Facility(ies), and thereafter the Gas shall either be transported through Peoples' System or sold directly to Peoples for whatever use deemed necessary and appropriate by Peoples.

1.02 **Exhibits**. The terms and conditions of each particular transaction whereby Producer will deliver Gas onto Peoples' System at specified Receipt Point(s) shall be included in individual Exhibits (hereinafter "Exhibit" or "Exhibits"). Information contained in the Exhibits shall include, but not be limited to:

(a) The designation for the transportation or sale of Gas for specific Receipt Point(s);

(b) The meter number and location at the Receipt Point;

(c) The time period (hereinafter "Service Term") during which the Gas is to be sold to Peoples or delivered onto Peoples' System;

(d) Applicable prices, rates and associated fees; however, the Parties agree that the Construction and Installation Fees, and any other operation, installation, or maintenance

types of fees addressed in the Master Agreement, shall not be included on the Exhibit and shall instead be identified in separate written format(s), such as an invoice.

1.03 **Appendices and Exhibits as Part of Agreement**. Appendices to the Master Agreement establish additional terms and conditions required as a part of the Master Agreement. The entire agreement between the Parties shall include those provisions contained in the Master Agreement, the Appendices, and any effective Exhibits. The Appendices and each duly executed Exhibit are hereby incorporated into and made a part of this Master Agreement. The provisions of each respective Exhibit shall apply only to the Producer Sales Volume(s) subject to such Exhibit; however, the provisions of this Master Agreement and Appendices shall apply to all volumes in all Exhibits.

ARTICLE II
DEFINITIONS

2.01 **Definitions.** For the purposes of this Master Agreement, the following terms, when capitalized herein, shall have the meanings set forth below:

(a) "**Authorizations**" means any and all approvals, permits, licenses, franchises, or other authorizations required by any federal or state governmental authority which are necessary for the performance of a Party's obligations hereunder.

(b) "**Btu**" means a British thermal unit.

(c) "**Commission"** means the Pennsylvania Public Utility Commission that regulates the intrastate sales and transportation of Gas.

(d) **"Construction and Installation Fee"** means the fees charged to Producer for the actual labor, tools, materials, equipment and overhead expenses for the development, design and construction activities relative to completing the New Facilities contemplated by this Master Agreement.

(e) **"Contract Price"** means, in the instance in which Gas is sold to Peoples by Producer, the price paid for Gas delivered and taken as set forth in any then-effective Exhibit.

(f) **"Day"** means a period of twenty-four (24) consecutive hours, coextensive with a "day" as defined by the North American Energy Standards Board ("NAESB").

(g) "**Dekatherm**" means one million (1,000,000) Btus or one MMBtu.

(h) "**Existing Facility(ies)**" means Producer owned, operated or managed equipment and facilities, including, but not limited to, any measurement equipment transferred from Peoples to Producer pursuant to this Agreement, installed upstream of the Interconnect prior to October 29, 2019 that involve, at a minimum: (i) measurement equipment of whatever type used to determine the Producer Sales Volumes; (ii) any gas quality device of whatever type used to determine the quality of the gas being delivered to Receipt Point(s); (iii) any over-pressure control system of whatever type being used to protect Peoples' System's maximum pressure limitations; and (iv) any and all other equipment and devices installed from Producer's pipeline riser coming out of the ground from Producer's pipeline system through the measurement equipment and to the Interconnect. This term includes all of the above Producer owned, operated or managed equipment and facility(ies) (i) sold or assigned to an affiliated or legally associated company of that producer; or (ii)

required to be moved to another Peoples' pipeline as a result of the abandonment of a Peoples pipeline pursuant to Sections 6.07, 10.17.

(i) **"FERC"** means the Federal Energy Regulatory Commission or any successor federal agency that regulates, or has the authority to regulate, the transportation of Gas in interstate commerce by pipeline.

(j) **"Gas"** means a mixture of hydrocarbon and non-hydrocarbon gases that satisfies the requirements of Article IX of this Master Agreement.

(k) **"Gathering Rate"** means for any Gas delivered by Producer onto Peoples' System at a Receipt Point which is subject to this Master Agreement, Producer shall pay to Peoples a gathering fee as set forth in an Exhibit hereto.

(l) "**Interconnect**" means the point of connection between the Producer's Existing Facility(ies) or New Facility(ies) and Peoples' System, comprised of the insulator, pipeline extension, riser, and the isolation valves installed downstream of the insulator, all owned by Peoples.

(m) "**Interconnect Facility(ies)**" means the Producer-owned Existing Facility(ies) and New Facility(ies) connected to Peoples' System at the Interconnect in accordance with the Master Agreement as amended from time-to-time.

(n) "**Mcf**" means one thousand (1,000) cubic feet of Gas.

(o) "**MMBtu**" means one million (1,000,000) Btu's or one Dekatherm.

(p) "**Modification to an Existing Facility**" means any non-emergency replacement, upgrade or downgrade on Existing Facility(ies).

(q) "**New Facility(ies)**" means Producer owned, operated or managed equipment and facilities (i) installed upstream of the Interconnect after October 29, 2019 through which Producer will deliver Gas onto Peoples' System at specified Receipt Point(s) and (ii) approved, designed, constructed and operated as set forth in herein, including any Existing Facility(ies) sold or assigned to a non-affiliated party of Producer or a party with whom Peoples does not have a current master interconnection and measurement agreement with Peoples.

(r) "**Peoples Approved Vendor**" means any vendor Peoples has approved to provide the services required by the Master Agreement to be performed on behalf of the Producer by an independent contractor to comply with the Master Agreement; a list of approved vendors is posted on Peoples website, which list may change from time-to-time.

(s) "**PIOGA**" means the Pennsylvania Independent Oil & Gas Association, its successors and assigns.

(t) "**Producer**" is the owner, operator, or agent for the underlying well(s), meter(s), and gathering system(s) that deliver gas to the Receipt Point(s). Producer is authorized to execute this Agreement, on behalf of its various investors, partners, and/or owners.

(u) "**Producer Sales Volume(s)**" means the volume(s) of Gas measured at and credited to the Producer's Receipt Point(s) for the Production Period as determined and reported to Peoples by the Producer Chart Process, or as measured in accordance with Section 10.11.

(v) **"Production Period"** means a span of approximately thirty (30) days, which may or may not conform to the calendar month, during which time Producer's Gas will be measured for delivery and purchase payment purposes. Production Periods shall be identified by the name of the month in which the period ends.

(w) "**Production Statement**" means the statement generated each calendar month by Peoples that details the Production Period and, for each Receipt Point, Producer Sales Volume(s) in Mcfs and MMBtus.

(x) **"Receipt Point(s)"** means the point(s) of receipt, or meter(s), of Producer's supplied Gas as set forth in the Exhibit specific to said point of receipt.

(y) **"Retainage Percentage"** means, for any Gas delivered by Producer onto Peoples' System at a Receipt Point which is subject to this Master Agreement, Peoples shall withhold a retainage percentage as set forth in an Exhibit hereto.

ARTICLE III
APPLICATION FOR NEW FACILITIES AND MODIFICATION TO EXISTING FACILITIES

3.01 **Application/Notification.** Producer shall submit to Peoples in writing the application for connecting a New Facility, and a notification request for any Modification to an Existing Facility.

3.02 **Application to Connect New Facility.** Within the application for connection of a New Facility, the Producer shall provide accurate information to Peoples concerning the following: (i) the location of the proposed connection utilizing the latitude and longitude coordinates on a USGS map; (ii) well plats, if applicable; (iii) the proposed maximum allowable operating pressure of the Producer's gathering line that will feed into the Receipt Point; (iv) the desired date for completion of the connection; (v) the Producer's estimated maximum, minimum and average amount of Gas to be delivered through the connection on a daily basis; (vi) the source of Gas; (vii) the Producer's estimated maximum, minimum and average receipt pressure through the connection; and (viii) any other information required by Peoples for the specific connection, including, but not limited to, Gas quality and odor intensity test results.

3.03 **Consideration of Application to Connect New Facility.** Peoples shall respond to the feasibility of Peoples' System's accepting delivery of Gas through the proposed New Facility connection and whether the application is approved, rejected or requires additional information or consideration. If the application is approved, Producer shall advance the application according to Article IV. If the application is rejected, Peoples shall explain the reason(s) for the rejection and may suggest alternatives that may, in Peoples' commercially reasonable discretion, be acceptable to Peoples, and Producer shall respond to the alternatives. If the application is acceptable but requires additional information or consideration, Peoples shall specify the additional information that, in Peoples' commercially reasonable discretion, may be required or the concerns requiring additional consideration for approval, and Producer shall provide the additional information or address the concerns requiring additional consideration. Thereafter Peoples shall approve the application if (1) its concerns have been satisfied and (2) no material changes in System conditions have occurred which would render the application no longer acceptable to Peoples.

3.04 **Modification to Existing Facilities.** Producer shall provide notice of Modification to an Existing Facility which shall include the current Peoples' meter station name, PO # being utilized to identify

the existing Interconnect, and the details of the Modification. Provided the Modification is in accordance with the conditions in this Agreement and such Modification does not cause operational, safety or service-related concerns, as determined by Peoples using commercially reasonable discretion, Peoples shall approve the Modification by providing written notice to Producer.

ARTICLE IV
INTERCONNECT DESIGN, INSTALLATION, ACTIVATION AND MAINTENANCE

4.01 **New Facility Design Specifications.** After approval of an application a for a New Facility connection, Producer shall submit to Peoples, for approval, the complete design, specifications and construction plans for the proposed New Facility. Producer agrees to make those changes to such design and construction plans as Peoples, in its commercially reasonable discretion, believes are necessary for the safe and reliable delivery of Gas into the Peoples' System. If the plans are approved, Peoples' response shall provide the Producer with the construction date when Peoples will endeavor to make the tap onto Peoples' System. If the plans require modification, Peoples shall specify the modifications that Peoples, in its commercially reasonable discretion, believes are necessary for the safe and reliable delivery of Gas into the Peoples' System. Producer shall resubmit the plans that address the modifications that Peoples requests and Peoples shall respond whether the resubmitted plans are approved or denied.

4.02 **Equipment Requirements for New Facility.**

(a) The New Facility shall be comprised of equipment that includes: (i) Gas measurement equipment; (ii) two forms of overpressure protection; (iii) certain interconnect piping facilities including a check valve and an insulated/welded tie-in connection; and (iv) such other equipment as may be required by Peoples at the New Facility. Peoples shall specify the type of equipment to be provided by Producer and Producer shall not install any non-Peoples approved equipment at the New Facility. The minimum engineering and technical specifications for the New Facility are further detailed in Appendix A.

(b) Unless waived in writing by Peoples, all costs associated with the New Facility shall be the Producer's responsibility and any such costs paid by Peoples shall be reimbursed by Producer through the Construction and Installation Fee. If Producer does not remit payment for the Construction and Installation Fee within thirty (30) days after receiving Peoples' invoice for same, then Peoples may, at its sole option, shut-in the Interconnect until payment is made and may require all future payments for other operation, installation, or maintenance related work to be made in advance.

4.03 **New Facility Construction.** Scheduling of installation of the New Facility must be coordinated with Peoples. No New Facility construction shall commence until Producer has satisfied all of its prerequisite obligations under this Master Agreement and Peoples has notified Producer in writing that construction may commence. Producer and Peoples shall coordinate the construction of their respective facilities (New Facility and Interconnect).

4.04 **Activation of New Facility and Interconnect.** Producer shall notify Peoples in writing that Producer is ready to activate the New Facility and Interconnect. Activation of the New Facility and Interconnect shall be contingent upon readiness of Peoples, Peoples' acceptance of Gas analysis results as submitted by Producer, and completion of construction as specified and agreed upon by and between Peoples and Producer. Peoples shall have the right to conduct a separate Gas analysis for verification purposes. Peoples and Producer shall coordinate the installation, testing, and physical final tie-in to Peoples' System: Peoples shall perform the physical tie-in and Producer shall set the meter and commence the flow of Gas. Peoples shall develop all operations associated with purging the meter set and piping into

service and, after physical tie-in, coordinate and oversee all such operations. After completion of all such operations, the New Facility and Interconnect shall be activated.

4.05 **Commencement of Operation of New Facility and Interconnect**. Producer shall notify Peoples, in writing, when the New Facility and Interconnect is complete, tested, and ready for operation. Unless otherwise indicated, deliveries of Gas through the New Facility and Interconnect may commence as soon after activation as all Authorizations have been granted, the requisite documents have been submitted, and Producer has satisfied the terms and conditions of this Master Agreement.

4.06 **Debris and Obstructions.** At all times, Producer's New Facilities and Existing Facilities shall be cleared of all debris and obstructions.

4.07 **Maintenance.** Producer is responsible for, and shall assume the initial costs of landscaping, sign posting, painting, and final, post-construction cleanup at and around the New Facility.

4.08 **Identification.** A meter set identification sign shall be posted at each New Facility, and if not already done so, at each Existing Facility location. The sign shall, at a minimum, list the name of the Producer and the telephone number (including area code) where the Producer, or its operator, can be reached at all times (i.e., emergency contact number). Producer shall be responsible to replace and/or update the notification information as it changes, from time-to-time.

4.09 **As-built Drawings.** If requested by Peoples, Producer shall develop an "as-built" location drawing of the New Facility. The "as-built" drawing shall include all equipment from the inlet side of the Gas measurement equipment to the tie-in with Peoples' System. This detailed drawing shall include centerline measurements, valve, regulator, meter identification, pipe size(s) and type(s), and telemetering details. Producer shall provide a copy of this drawing (AutoCAD format) to Peoples, upon request. Upon request, Producer shall provide an "as-built" location drawing of any Existing Facility, when Peoples determines that such drawing is needed, in its commercially reasonable discretion, to rectify operational, safety or service-related concerns.

4.10 **Telemetry**.

(a) For a New Facility electronic Gas measurement and communications equipment installed as part of the New Facility shall include equipment for monitoring, recording, and transferring data deemed essential by Peoples. Producer shall acquire, install and pay the on-going operating expenses for the electronic Gas measurement and communications equipment to provide Peoples, at a minimum, real-time information related to pressure, temperature, Gas flow and Gas quality (i.e., chromatograph) provided however that for any Receipt Point with a daily volume below 1,000 mcf/day, Producer may request an exception to the telemetry requirement. Upon receiving such request, Peoples and Producer shall engage in a good faith discussion to determine if alternative(s) to telemetry equipment are available.

(b) For an Existing Facility, electronic Gas measurement and communications equipment shall be required when Peoples provides at least sixty (60) days advance notice to Producer detailing required modifications to the existing telemetry equipment, if any, which are required, as determined by Peoples' commercially reasonable discretion, to rectify operational, safety or service-related concerns. In which case, the telemetry equipment shall be modified to include equipment for monitoring, recording, and transferring data deemed essential by Peoples. Producer shall acquire, install and pay the on-going operating expenses for the electronic Gas measurement and communications equipment to provide Peoples, at a minimum, real-time information related to pressure, temperature, Gas flow and Gas quality

(examples of such equipment shall include, but not be limited to a chromatograph or in-line moisture analyzer).

ARTICLE V
FACILITIES OWNERSHIP

5.01 **Peoples' Facilities.** Peoples shall own, and Peoples or its designee shall design, install, operate, and maintain, all facilities and equipment on the downstream side of the isolation valve which connects the Peoples' System to the Producer's New Facility or Existing Facility as more specifically described in the Appendices and on the Typical Gas Purchase Meter Set drawing, a copy of which is maintained on the Peoples' producer services section of its website.

5.02 **Producer's Facilities.** Producer shall own, and Producer or its designee shall design, install, operate, and maintain all facilities and equipment upstream of the Interconnect. The location and positioning of the New Facility or Existing Facility shall be in accord with Peoples' standard design specifications as more specifically described in the Appendices and on the Typical Gas Purchase Meter Set drawing, a copy of which is maintained on the Peoples' producer services section of its website.

ARTICLE VI
INTERCONNECTION OPERATIONS

6.01 **Gathering Obligations.** Peoples will receive Gas from Producer at the Receipt Point, provided that if any person or entity besides Producer is flowing Gas through the Interconnect, all such persons or entities utilizing the Interconnect have entered into valid agreements with Peoples. Peoples shall receive Gas from the Receipt Point and permit that Gas to flow against the existing pressure in Peoples' facilities. Peoples shall not be obligated to lower existing line pressure by compression or otherwise to accommodate receipts from the point of interconnection. As set forth elsewhere in this Agreement, it is expressly understood that Peoples may restrict the flow or discontinue the taking of Gas temporarily. Peoples shall not be obligated to add any facilities or expand the capacity of its pipeline system in any manner in order to provide the services hereunder. Nothing in this Master Agreement or any applicable Exhibit shall limit Peoples' right to interrupt service or to take other action on a non-discriminatory basis as may be required to alleviate conditions which threaten the integrity of its system.

6.02 **Environmental Responsibility.** Each Party represents that no hazardous substance as that term is defined in the Federal Comprehensive Environmental Response Compensation Liability Act (CERCLA), petroleum or petroleum products, "asbestos material" as that term is defined in 40 CFR 61.41 (1987), polychlorinated biphenyls (PCBs), or "solid waste" as that term is defined in the Federal Resource Conservation Recovery Act (RCRA), will be leaked, spilled, deposited or otherwise released by either Party on the other Party's property. In the event that any of said above referenced materials are discovered on said property, each Party shall immediately notify the other Party of the discovery and existence of said materials. In the event of either Party's breach of the representations contained in this section, the full responsibility for the handling, remediation, treatment, storage or disposal of any such hazardous substance, petroleum or petroleum product, asbestos material, PCBs or solid waste discovered on said property, including the handling of such materials in compliance with all environmental laws including federal, state and local laws, rules and regulations, shall remain with such Party and such Party shall indemnify the other Party for any loss, injury, theft, damage to persons or property, or fines, penalties or compliance order issued by any governmental agency relating to pollution or protection of the environment including without limitation, laws and regulations relating to emissions, discharges, releases or threatened releases of

chemicals, pollutants, contaminants, waste petroleum, toxic substances and hazardous substances occurring on said property. This section shall survive the termination of this Master Agreement.

6.03 **Facility Improvements.** Peoples retains the unilateral right to change the operations of its System and/or upgrade its System; provided, however, that such changes must be consistent with good utility practices and not violate local, state or Federal requirements. Such operational changes may require the adjustment and/or addition of equipment to an Existing Facility or a New Facility by the Producer in order to maintain delivery of Gas volumes; the cost of such adjustment and/or addition of equipment will be borne entirely by the Producer.

6.04 **Peoples Shut-in of Interconnect.** Peoples retains the unilateral right to immediately shut-in or cause Producer to shut-in any Interconnect that, in Peoples' sole judgment, using commercially reasonable discretion, threatens the integrity and safe operation of Peoples' System. Additionally, if Peoples is purchasing the Gas from a particular Receipt Point, upon thirty (30) days advance written notice, Peoples may shut-in or cause Producer to shut-in that Receipt Point for economic reasons. As soon as possible after the threat to the integrity and safe operation of the system, or that the economic reasons no longer exist, Peoples will use best efforts to limit flows of transmission or pipeline supplemental volumes to give conventional production flow-preference.

6.05 **Producer Shut-in and Discontinuance.**

(a) Producer shall not shut-in or discontinue delivery of Gas at any Receipt Point, excepting that the shut-in or discontinuance of gas delivery is caused by an emergency or other unplanned event, without first obtaining Peoples' consent, which consent will not be unreasonably withheld, but may be conditioned in the event the shut-in or discontinuance of the Gas delivery may, as determined by Peoples using commercially reasonable discretion, result in an operational, safety or service related concern on Peoples' System.

(b) Producer shall provide thirty (30) days advance notice to Peoples of its intention to shut-in or discontinue delivery of Gas at any Receipt Point, after which notice the Parties shall engage in a good-faith discussion to determine if Peoples consent must be conditioned or withheld. If the shut-in or discontinuance is caused by an emergency event, Producer shall notify Peoples as quickly as possible, but in no event more than 24 hours after the event.

(c) If a shut-in occurs, Peoples shall have the right to remove its facilities at the Interconnect Point and terminate the Exhibit governing that Receipt Point, only after Peoples has communicated the cause, and the Producer is given a good-faith opportunity to propose a remedy and resolve the issue within a timeframe acceptable to Peoples.

6.06 **Notice of Interruption of Gas Delivery at Receipt Point.**

(a) Peoples shall be notified of any and all repairs, changes, or other actions that may result in any interruption or discontinuance of Gas delivery at a Receipt Point as set forth in this paragraph. Unless caused by an emergency event, Producer shall advise Peoples in writing at least five (5) business days before taking the Receipt Point out of service for repairs or for any other reason that is anticipated to last more than seven calendar (7) days. When an emergency event occurs at the Receipt Point Producer shall notify Peoples as quickly as possible, but in no event more than 24 hours after the event. After Producer has completed all repairs to the Receipt Point or is otherwise prepared to resume delivery of Gas at the Receipt Point, Producer shall immediately reconnect the Receipt Point to Peoples' System and resume service, subject to ten (10) days' advance notification to Peoples, provided that

the notice may be less than ten (10) days, however, Peoples may require the full ten (10) days to arrange for the reinstated flow of Gas through the Receipt Point.

6.07 **System Abandonment.** In the event Peoples should ever abandon, retire or cease to operate, in whole or in part, facilities used to purchase and/or transport Gas on a system-wide basis, or throughout a geographic portion of its system, (as opposed to one-off facility abandonments that are addressed in subsection 10.17(c)), Peoples shall advise the Producer(s) of the abandonment, retirement or cessation of operation as soon as reasonably practicable. Peoples may, in its commercially reasonable discretion, either terminate this Master Agreement, or terminate an Exhibit specific to the Receipt Point(s) impacted, upon at least ninety (90) days' written notice to Producer. During such ninety (90) day period, Peoples and Producer shall continue to engage in good-faith discussions, if so requested by Producer, to reasonably assist Producer in locating alternative delivery points for the Gas flowing through the impacted Receipt Point(s).

ARTICLE VII
OPERATIONAL COSTS AND PAYMENTS TO BE BORNE BY PRODUCER

7.01 **Gas Quality and Monitoring Costs.** Producer agrees to install, operate and keep in efficient operating condition, at Producer's own expense, the equipment necessary to insure that the gas delivered from each well hereunder meets the gas quality and other operational standards and requirements contained in this Master Agreement, Producer also agrees to install, own, operate and keep in efficient operating condition, equipment necessary, including, but not limited to, Type OSE Slam-Shut Valves if required by Peoples, to avoid excessive pressure in Peoples' and/or Producer's line. Producer shall be solely responsible for all costs and charges associated with monitoring, ensuring and maintaining the quality of Gas delivered into Peoples' System to meet the requirements in Article IX and all costs associated with quality remediation for Gas that does not meet those requirements. Peoples shall have access to Producer's Interconnect Facility and shall have the right, but not the obligation, to operate such Facility in the event Peoples determines, using commercially reasonable discretion, that its operation is required to prevent or alleviate operational, safety or service related concerns on Peoples' System; in such event, Peoples shall provide notice to the Producer of such operation as soon as practical and in-advance, when reasonable. Peoples shall indemnify and hold harmless Producer for any and all environmental, health and safety liabilities directly resulting from Peoples' or its designee's access or operation of Producer's Interconnect Facility. Peoples shall replace, fix and repair, at its cost, any portion of Producer's Interconnect Facility that Peoples or its designee intentionally or negligently harms, damages or breaks as a result of Peoples' access or operation of the Facility.

7.02 **Producer Interconnect Facilities Costs.** Producer shall be solely responsible for all costs and charges associated with monitoring, ensuring and maintaining the safe and reliable operation of pipeline, measurement, compression, regulation, dehydration, and any other appurtenant equipment associated with the Interconnect Facilities, which are upstream of the Interconnect. Peoples reserves the right to refuse receipts and/or deliveries through the Interconnect if Peoples, in its sole judgment, using commercially reasonable discretion, deems the operation of these facilities to threaten the safety or reliability of the Peoples' System.

7.03 **Royalty Payments**. Producer shall be solely responsible for all royalty, overriding royalty, and working interest payments attributable to Gas delivered to Peoples under this Master Agreement. In no event shall Peoples be obligated to make any royalty, overriding royalty, or working interest payments for Gas purchased under this Master Agreement.

ARTICLE VIII
ADDITIONAL WELLS

8.01 **Completion of Wells**. No well shall be added to any existing Receipt Point(s) without first obtaining the prior written consent of Peoples. All requests for new well additions shall be accompanied by a well plat, completion report, estimated flow rate and Gas quality sample, at the meter, and/or at the new well location, to evaluate the feasibility if adding the Gas deliveries from the new well to the existing Receipt Point(s). Peoples reserves the right, at its sole discretion, to request other information to inform its evaluation concerning the new well.

8.02 **Introduction of Well Gas**. At the time of introduction of Producer's well Gas into Peoples' System, a Peoples' representative shall operate the valves at the meter. During this operation, Producer and Peoples shall provide experienced personnel at the meter site.

8.03 **Producer's Facilities**. Producer shall promptly furnish the pipe and shall construct and place in operation a suitable gathering pipeline to connect those wells currently or subsequently included under this Master Agreement to Peoples' System at the Receipt Point(s). Producer's meter site shall be cleared of all debris and obstructions before it is connected at the Receipt Point(s). Producer shall install all drips complete with automatic shut off and other devices necessary to separate fluids from the Gas in Producer's gathering pipelines. Producer shall operate such drips and other devices so that all Gas delivered under this Master Agreement will meet at all times Peoples' gas quality specifications set forth in Article IX or Peoples' transporter's gas quality specifications. Peoples shall have access to such drips and other devices at the meter site and shall have the right, but not the obligation, to operate such drips and other devices in the event Peoples determines, using commercially reasonable discretion, that its operation is required to prevent or alleviate an operational, safety or service related concerns on the Peoples system; in such event, Peoples shall provide notice to the Producer of such operation as soon as practical.

8.04 **New Well Costs**. Producer shall be solely responsible for all costs associated with drilling, operating, and connecting new wells including, but not be limited to, hook-up fees; usage fees; all costs associated with the construction of gathering lines, tie-in lines, drip lines, measurement, compression, regulation and connection facilities; and all costs attributable to rentals, except as otherwise provided in this Master Agreement.

8.05 **General**. The wells located upstream of Receipt Point(s) shall remain continuously connected to Producer's gathering lines for production deliveries, except to the extent that disconnection is required for well repairs. Producer's Gas which is governed by an Exhibit A for the purchase of Gas cannot be diverted to other buyers without the express written consent of the Peoples, which consent shall not be unreasonably withheld, but may be conditioned in the event the deviation of gas may, as determined by Peoples using commercially reasonable discretion, result in an operational, safety or service related concern on the Peoples system. Producer shall provide ninety (90) days advance notice to Peoples of its intention to divert gas from upstream wells to other buyers; after which notice the Parties shall engage in a good-faith discussion to determine if Peoples consent must be conditioned or withheld. Producer shall operate such wells in a reasonable and prudent manner at all times and shall keep such wells in good condition in order to ensure the gas delivered onto the Peoples system meets the requirements and standards set forth in this Agreement, including any Appendixes, Exhibits, Addendums, Schedules and Amendments.

8.06 **Timing of Well Repairs**. To the extent possible, Producer shall make all necessary well repairs between May 1 and October 31 of the calendar year.

8.07 **Notice of Well Repairs**. Unless caused by an emergency event Producer shall advise Peoples in writing at least five (5) business days before taking any well located upstream of Receipt Point(s) out of production for repairs which are anticipated to last for more than seven calendar (7) days. When an emergency event occurs which impacts the availability of the Receipt Point, Producer shall notify Peoples as quickly as possible, but in no event more than 24 hours after the event. After Producer has completed

all repairs, Producer shall immediately reconnect the well and resume production, subject to authorization for turn-in by Peoples' field personnel.

ARTICLE IX
PRESSURE, GAS QUALITY AND HEATING VALUE

9.01 **Regulation.** Peoples may require regulation and shall require over-pressure protection at the Receipt Point(s) under this Master Agreement. Such regulation shall maintain delivery pressures suitable to pressures in Peoples' System. Peoples shall specify and/or approve the type of regulators to be used and shall specify pressure ranges, and operating settings. All costs associated with such equipment, including installation costs, shall be the Producer's responsibility and any such costs paid by Peoples shall be reimbursed by Producer through the Construction and Installation Fee.

9.02 **Compression.** Producer shall not use any mechanical means or accessory equipment to pump or compress Gas to aid its delivery into Peoples' System without first obtaining and executing the Peoples' standard Compression Agreement.

9.03 **Pressure in Peoples' System.**

(a) Peoples makes no representations concerning the pressure that will be maintained in its pipeline system from time-to-time, or any other factors, which may affect the quantity of Gas that Producer may be able to deliver to Peoples. Subject to Section 6.03 Peoples has the right to upgrade, when necessary, pipeline operating pressures with no obligation to Producer other than providing notification of such matters.

(b) Although regulators are part of Producers' Interconnect Facilities and therefore owned by Producers, Peoples shall operate these regulators as provided by this Master Agreement. Accordingly, Peoples shall indemnify and hold harmless Producers for any and all environmental, health and safety liabilities directly resulting from Peoples' or its designee's access or operation of the regulators when setting the maximum allowable pressure set points within the Interconnect Facilities. Peoples shall replace, fix and repair, at its cost, any portion of Producers' Interconnect Facilities that Peoples or its designee intentionally or negligently harms, damages or breaks as a result of operating the regulators within the Facilities.

9.04 **Gas Quality.** All Gas delivered through an Interconnect into Peoples' System shall at all times meet or exceed the Gas quality specifications set forth in Appendix B hereto, as well as any quality and heat content requirements established by the operator of the downstream pipeline system(s) on which the Gas is ultimately transported.

9.05 **Siloxane.** All Gas delivered through an Interconnect into Peoples' System that includes Gas from landfill well(s) or gathering lines fed by landfill gas sources shall at all times meet, or exceed, the Gas quality siloxane specifications set forth in Appendix B hereto, as well as any siloxane specifications established by any operator of the downstream pipeline system(s) on which the Gas is ultimately transported. Before Peoples permits any flow of any amount of Gas into the Peoples' system, Producer shall provide Peoples with a certified siloxane analysis from a Peoples-approved agency denoting that the Gas proposed to be delivered into Peoples' System meets and/or exceeds those requirements. Peoples shall require monthly siloxane analysis tests performed by the Producer and timely submitted to Peoples. Peoples shall have the right to witness siloxane sampling and witness custody of that sample from source to destination. In the event Producer does not provide siloxane analysis, Peoples reserves the right to shut-in the Interconnect until said analysis is provided.

In the event Producer Gas quality, including, but limited to, siloxane causes damage to Peoples System, equipment, downstream pipeline, downstream equipment, downstream customer pipeline and/or downstream customer equipment, the Producer will be responsible for all costs to remedy the damage upon documentation proving Producer has caused the damage.

9.06 **Temperature.** Gas delivered through an Interconnect into Peoples' System shall not exceed 100° F. Gas having a temperature greater than 100° F may be delivered into Peoples' System only upon prior written approval by Peoples.

9.07 **Gas Taken and Co-mingled.** Peoples shall accept Gas taken and measured at the Receipt Point(s) in accordance with this Master Agreement. Such Gas shall be taken in its natural state, except as otherwise provided in this Master Agreement, subject to any modification thereof required by this Master Agreement, at the pressure of the Gas flowing from Producer's pipelines into Peoples' System, against the varying pressures from time to time maintained therein.

ARTICLE X
MEASUREMENT

10.01 **Measurement Equipment.**

(a) Gas delivered to or received from Peoples' System through the Interconnect shall be measured at a site satisfactory to Peoples using measurement equipment designated by Peoples and owned by Producer. The requirements in this Section 10.01 shall not apply to any Existing Facility, unless the meter is nonfunctioning or inaccurate which requires Producer to immediately self-shut-in until the meter is replaced or Peoples provides at least sixty (60) days advance notice to Producer detailing modifications to the existing Interconnection Facilities which are required, in Peoples' commercially reasonable discretion, to rectify accuracy, operational, safety or service related concerns.

(b) The measurement facilities will be required to use electronic gas measurement (EGM), and the Producer is required to forward monthly EGM item trail(s) and audit trail(s) to one of Peoples' approved integration companies (which list of approved companies shall be maintained on the Peoples website) by the 28th of the month. The integration company will forward corrected volume(s) to Peoples once a month for processing of credit/payment. Producer is required to use the same integration company for both volume collection and meter testing.

(c) The measurement equipment for New Facilities shall be designed, installed, operated, maintained and owned by: (i.) Producer; or (ii.) Producer's designee as set forth in the Appendices. Producer is responsible for maintaining the accuracy of the measurement equipment and shall do so according to the Annual Measurement Equipment Testing requirement in Appendix B, Section 1.07. If Peoples determines, using commercially reasonable discretion, the measurement equipment is not accurate, Peoples may shut in the Interconnect until Producer corrects the deficiency. If repeated defects occur, Peoples reserves the right to shut in the Interconnect indefinitely. At any time after the termination of an Exhibit, Peoples shall have the right to remove its Interconnect facilities associated with the Receipt Point(s) identified in the terminated Exhibit. Producer shall be solely responsible for and shall bear the full costs of delivering Gas to the Receipt Point(s). Producer shall not modify the measurement equipment without the prior written consent of Peoples.

10.02 **Pipeline Safety.** Producer agrees to operate, maintain, test, and repair the meter set as a prudent operator in accordance with 49CFR DOT Part 192, PAPUC Chapter 59, and all other applicable state regulations and requirements, applicable industry codes and standards at Producer's expense.

10.03 **Check Measurement.** Producer may install, maintain and operate, at its sole cost and expense, check measuring equipment; provided, however, that such equipment shall be installed in a manner that will not interfere with the operation of the measuring equipment required by this Master Agreement.

10.04 **Orifice Meters.** Orifice meters installed in such measuring stations shall be constructed and operated in accordance with American National Standard Institute ("ANSI") standards, American Petroleum Institute ("API") 2530, American Gas Association ("AGA") AGA Report No. 3, Orifice Metering of Natural Gas and Other Related Hydrocarbon Fluids, Second Edition, dated September 1985, and any subsequent modifications and amendments thereto.

10.05 **Positive Displacement Meters.** Positive Displacement Meters installed at the measurement site shall be constructed and operated in accordance with provisions of AGA Measurement Committee Report No. 6 (AGA Report No. 6) dated January 1971 and any subsequent amendment or revisions thereto.

10.06 **Turbine Meters.** Turbine Meters installed at the measurement site shall be constructed and operated in accordance with the provisions of AGA Measurement Committee Report No. 7 (AGA Report No. 7), First Revision, dated November 1984, and any subsequent modifications and amendments thereto.

10.07 **Ultrasonic Meters.** Ultrasonic Meters installed at the measurement site shall be constructed and operated in accordance with the provisions of AGA Measurement Committee Report No. 9 (AGA Report No. 9), dated June 1998 and any subsequent modifications and amendments thereto.

10.08 **Electronics.** When and where electronic equipment and flow computers are installed at the measurement site, the Gas may have its volume, mass and/or energy content determined and computed in accordance with the applicable industry standards including, but not limited to, API 21.1, AGA Report Nos. 3, 5, 6, and 7 and any subsequent modifications and amendments thereto.

10.09 **Testing and Calibration**:

(a) Peoples shall have the right, at any time, to verify the accuracy of measurement equipment beyond the Producer Annual Measurement Equipment Testing requirements in Appendix B, Section 1.04, on all Receipt Points used in the measurement of Gas hereunder and shall do so at its expense. Peoples shall indemnify and hold harmless Producer for any and all environmental, health and safety liabilities directly resulting from Peoples' or its designee's access or operation of the measurement equipment when verifying the accuracy of the measurement equipment. Peoples shall replace, fix and repair, at its cost, any portion of Producer's Interconnect Facilities that Peoples or its designee intentionally or negligently harms, damages or breaks as a result of verifying the accuracy of the measurement equipment within the Facilities. Producer may request a special test be performed as described in Section 10.10 below.

(b) If during any test of the measuring equipment, an adjustment or calibration error is found which results in an incremental adjustment to the calculated hourly flow rate through each meter run in excess of two percent (2%) of the correct flow rate (whether positive or negative and using the correct flow rate as the percent error equation denominator), then any previous recording of such equipment shall be corrected to zero error in computing deliveries for any period during which the error existed (and which is either known

definitely or agreed to by both Parties) and the total flow for the period predetermined in accordance with the provisions of Section 10.11 below. If the period of error cannot be determined or agreed upon between the Parties, such correction shall be made over a period extending over the last one-half (1/2) of the time elapsed since the date of the latest test, not exceeding a correction period of six (6) months.

(c) If, during any test of the measuring equipment, an adjustment or calibration error is found which results in an incremental adjustment to the calculated hourly flow rate which does not exceed two percent (2%) of the adjusted flow rate (as described in part (b) of this Section), all prior recording shall be considered to be accurate for quantity determination purposes.

(d) All equipment shall, in any case, be adjusted at the time of the test to record correctly.

10.10 **Special Test.** In the event Producer desires a special test (a test not scheduled by Peoples under the provisions of subsection 10.9(a) above) of any measuring equipment, seventy-two (72) hours advance notice in writing shall be given to Peoples, and both Parties shall cooperate to secure a prompt test of the accuracy of such equipment. If the measuring equipment tested is found to fall under the provisions of Paragraph 10.9(b) above or if an inspection of the primary measurement equipment indicates no problems, Peoples shall have the right to bill Producer for the cost of such special test including any labor, and other costs pertaining to such special test and Producer shall pay such costs.

10.11 **Measuring Adjustment.** If, for any reason, any measurement equipment is: (i) out of adjustment; (ii) out of service; or (iii) out of repair, and the total calculated hourly flow rate through each meter run is found to be in error by an amount of the magnitude described in subsection 10.9(b) above, the Producer Sales Volume(s) may be determined by Peoples in accordance with the first of the following methods which is, in Peoples' sole opinion, feasible:

(a) by using the registration of any mutually agreeable check metering facility, if installed and accurately registering (subject to testing as described in subsection 10.9(a) above;

(b) where parallel multiple meter runs exist, by calculation using the registration of such parallel meter runs; provided that they are measuring Gas from upstream and downstream headers in common with the faulty metering equipment, are not controlled by separate regulators, and are accurately registering;

(c) by correcting the error by re-reading of the official charts, or by straightforward application of a correction factor to the quantities recorded for the period (if the net percentage of error is ascertainable by calibration, tests or mathematical calculation); or

(d) by estimating the quantity, based upon deliveries made during periods of similar conditions when the meter was registering accurately.

Peoples will not be required to use check measurement, parallel measurement, re-read charts or estimates for more than three (3) consecutive billing periods. If Producer fails to fix the measurement equipment, Peoples may, at its discretion, upon advance notice, cause the shut in of the Interconnect. Failure to shut in will result in no credit for Gas delivered through a Receipt Points that is not recording for more than three (3) consecutive billing periods.

The estimated readings or deliveries so determined shall be used in determining the Producer Sales Volumes delivered for any known or agreed upon applicable period. In case the period is

not known or agreed upon, such estimated deliveries shall be used in determining the quantities of Gas delivered hereunder during the latter half of the period from the date of the immediately preceding test to the date the measurement equipment has been adjusted to record accurately. The recordings of the measurement equipment during the first half of said period shall be considered accurate in computing Producer Sales Volumes.

10.12 **Measurement Corrections.** If an error is discovered in the Producer Sales Volumes, such error shall be adjusted within thirty (30) days of the determination thereof; provided, however, that any claim for adjustment shall be made within twenty-four (24) months of the Production Period in which the claimed error occurred. Such time limits shall not apply in the case of a deliberate act of omission or misrepresentation, or mutual mistake of fact.

10.13 **Termination.** If in Peoples' reasonable judgment, the Producer has tampered with the measurement equipment so as to misrepresent the actual volume of Gas delivered through the Receipt Point, Peoples has the right to immediately shut-in the Interconnect Facility for an indefinite period of time. The Interconnect will remain shut-in until Peoples and Producer reach an agreement as to the most accurate Producer Sales Volumes during the period in question and the Producer provides restitution to the satisfaction of Peoples. If Peoples determines, using commercially reasonable discretion, that measurement equipment has been tampered with by Producer, Peoples reserves the right to remove its facilities at the Interconnect and, in its commercially reasonable discretion, terminate this Master Agreement and any other agreement(s) between Producer and Peoples, or any other natural gas company owned, or operated, by Peoples or its parent company, including, but not limited to Delta Natural Gas Company, Inc.

10.14 **Data and Records Retention.** Peoples and Producer shall retain and preserve for a period of at least two (2) years all measurement data, original test data, charts, and other similar records, in such Party's possession and shall provide requested documentation to the other Party upon thirty (30) days' written notice.

10.15 **Volume and Quality Determination.** The measurement of the quantity and quality of all Gas received and delivered hereunder shall be conducted in accordance with the following:

(a) Unit of Volume. The unit of volumetric measurement shall be a standard cubic foot of Gas at a pressure base of fourteen and seventy-three hundredths (14.73) pounds per square inch absolute, a temperature base of sixty degrees (60°) Fahrenheit (five hundred twenty degrees (520°) absolute) and without adjustments for water vapor. The unit of volume for measurement shall be one (1) cubic foot of Gas. To determine the Gross Heating Value of the unit of volume, such measured volumes will be converted to Mcf by multiplying by 1,000 and then, at the Company's discretion, multiplied by either (i) the Company's system average MMBtu/Mcf factor if the Receipt Point heat value has not been determined or (ii) the Receipt Point's Gross Heating Value per thousand cubic foot determined by a Gas sample analysis or Gas chromatograph to determine the MMBtus received, delivered and credited as the Producer Sales Volume at the Receipt Point hereunder. The Parties agree that nothing in this Master Agreement shall preclude either Party from proposing a modification to the unit of volume components defined herein in a future purchase Gas cost proceeding at the Commission.

(b) Orifice Meter Volume Computations. Computations of Gas Volumes from measurement data shall be made in accordance with ANSI/API2530 (AGA Report No. 3), Orifice Metering of Natural Gas and Other Related Hydrocarbon Fluids, Second Edition, dated September 1985, and any subsequent amendments or revisions.

(c) Positive Displacement Meter Volume Computation. Computation of Gas Volumes from data shall be in accordance with the AGA Measurement Committee Report No. 6 (AGA Report 6), dated January 1971, and any subsequent amendments or revisions.

(d) Turbine Meter Volume Computations. Computations of Gas Volumes from data shall be in accordance with AGA Measurement Committee Report No. 7 (AGA Report 7), First Revisions, dated November 1984, and any subsequent amendments or revisions.

(e) Ultrasonic Meter Volume Computations. Computations of Gas Volumes from data shall be in accordance with AGA Measurement Committee Report No. 9 (AGA Report 9), dated June 1998, and any subsequent amendments or revisions.

(f) Electronic Devices and Flow Computers Volume Computations. Computation of Gas Volumes from data or devices shall be in accordance with API 21.1, AGA Measurement Committee Report Nos. 3, 5, 6, and 7 and any subsequent amendments or revisions.

(g) Assumed Atmospheric Pressure. In connection with the use of any type of measuring device, an atmospheric pressure of fourteen and four tenths (14.4) pounds per square inch shall be assumed, with no allowance for variation in atmospheric pressure. The flowing Gas temperature may be recorded at Peoples' discretion. In the absence of a flowing Gas temperature recorder, a temperature of sixty degrees (60°) Fahrenheit will be assumed.

(h) Gross Heating Value. At least yearly, the Gross Heating Value of the Gas stream at each Receipt Point hereunder shall be determined by calculating the Gross Heating Value from an in-line chromatograph or a Gas analysis of a spot or continuous Gas sample except that for Receipt Point(s) with daily volumes below 1,000 mcf/day, the Gross Heating Value determination shall be required every five (5) years after the initial determination. The spot or continuous sample shall be taken at a suitable point to be representative of the Gas being analyzed.

(i) Other Tests. Other tests to determine water content, sulfur, and other impurities in the Gas shall be conducted by Peoples as necessary and shall be conducted in accordance with standard industry testing procedures.

(j) New Test Methods. If at any time during the term hereof, a new method or technique is developed with respect to Gas measurement, such new method or technique may be substituted for the method set forth in this Article when such methods or techniques are in accordance with the currently accepted standards of the American Gas Association, if mutually agreed upon by the Parties.

10.16 **Right of Inspections.** Peoples shall have the right to inspect equipment installed on the Interconnect Facility, measurement charts and other measurement or testing data at all times during business hours; but the reading, calibration and adjustment of such equipment and changing of charts shall be done by Producer, or its designee, unless agreed to otherwise by the Parties.

10.17 **Low Volumes for Receipt Points.**

(a) In the event that Producer does not deliver to Peoples an average of three (3) Dekatherms of Gas per Day at each Receipt Point during any ninety (90) consecutive day period, then Peoples may permit the low volume delivery to continue or notify Producer of the low volume situation to initiate a discussion of the operational and commercial circumstances of

the Receipt Point, including line pressures impacting the Receipt Point. The Parties shall engage in a good-faith discussion to determine if there is a mutually agreeable basis for the Receipt Point to remain on Peoples' System. If a resolution is not possible, the Receipt Point may be terminated, in which case Peoples may remove its Interconnect facilities, as they relate to such Receipt Point(s), by giving Producer notice in writing sixty (60) days prior to the effective date of termination.

(b) In the event that the amount of Gas, or the quality of Gas, passing through any Receipt Point(s) is less than the measurement equipment minimum design requirements for accurate measurement, Peoples shall have the right to shut-in service from Producer until: (i) Producer has provided adequate supply to meet such design requirements and has proven to Peoples that such volumes exist; and/or (ii) the measurement equipment and Interconnect Facilities have been redesigned and installed for the effective and efficient measurement of the revised volumes within the accuracy allowed and required by Peoples; and/or (iii) Producer has proposed, and Peoples has accepted in its sole discretion, an alternate method to accurately measure the volumes.

(c) Peoples may in its sole discretion, for operational, safety or unaccounted for Gas mitigation reasons, abandon pipelines connected to any Receipt Point. Prior to the abandonment, Peoples shall provide sixty (60) days advance notice to the Producer of its intention to abandon the facilities and, during such sixty (60) day period, shall engage in a good-faith discussion with Producer to determine if there is a mutually agreeable arrangement by which the Receipt Point(s) impacted by the abandonment may remain on the system. If a resolution during said period is not possible, Peoples may proceed with the pipeline abandonment and Interconnect termination. The Producer in its sole discretion may reconnect to Peoples at the nearest pipeline not affected by the abandonment.

ARTICLE XI
TERM

11.01 **Term.** This Term of this Master Agreement shall become effective upon its execution by both Parties and shall continue in full force and effect for a period of five (5) years thereafter ("Master Agreement Term"), unless earlier terminated as provided herein. At the end of the Master Agreement Term, the Master Agreement shall automatically renew on a month-to-month basis until terminated by either party upon thirty (30) days' prior written notice to the other party.

The term of service for each specific Receipt Point shall be as set forth in Exhibit A (the "Service Term"). To the extent that the Service Term for any specific Interconnection extends beyond the Master Agreement Term, then the Master Agreement shall remain in full force and effect for the specific Interconnection until the expiration or termination of the applicable Service Term.

The obligations of (i) Producer to indemnify Peoples and (ii) Peoples to indemnify Producer pursuant hereto shall survive the termination or cancellation of this Master Agreement and the Exhibits. Termination of this Master Agreement will result in the termination of all Exhibits and the disconnection of all Receipt Points governed by Exhibit A's. Costs associated with disconnection will be the responsibility of the Producer.

Upon termination of this Master Agreement, Peoples shall have the right to remove all its facilities from the Interconnect of the Receipt Point(s) identified in the Exhibit As hereto.

ARTICLE XII
BILLING AND PAYMENT

12.01 **Quantities Deemed Conclusive.** The Production Statement of the Producer Sales Volume(s) shall be deemed conclusive unless Producer forwards an objection to Peoples in writing within sixty (60) days after the receipt of the Statement.

12.02 **Withholding Payments** In the event of any adverse claim to or against the proceeds of this Master Agreement or any Gas delivered under this Master Agreement, or any part thereof, or against the proceeds of any other Gas supply and/or delivery contract that Peoples, any other natural gas company owned, or operated, by Peoples or its parent company, including, but not limited to, Delta Natural Gas Company, Inc., has with Producer, is made by any person, Peoples may, upon written notice to Producer, refuse to receive Gas under this Master Agreement, as the case may be, until the dispute is settled by agreement between Producer and such adverse claimant or by a final decree of a court of competent jurisdiction.

In the event the Producer fails to comply with any of the covenants or terms herein contained, Peoples may immediately withhold, without liability for interest, all payments due to Producer under the terms of this Master Agreement.

12.03 **Adjustments**. In the event that Peoples mistakenly overpays or underpays Producer for Gas purchased under this Master Agreement, and such overpayment or underpayment is the result of a mistake of law or fact, miscalculation, coercion, duress, fraud, governmental or regulatory constraint, then Producer or Peoples, as the case may be, shall promptly, upon demand by the other Party, make appropriate refund or adjustment in such overpayments or underpayments, without liability for the payment of any interest by either Party; provided, however, that the obligation of either Party to make restitution under this Master Agreement shall be limited to mistaken payments made within the period commencing four (4) years prior to the date on which demand for refund or adjustment is made. In the event of Producer's refusal or inability to refund any overpayments, Peoples may withhold payment for Gas purchased under this Master Agreement or any other contract between Peoples, any other natural gas company owned, or operated, by Peoples or its parent company, including, but not limited to, Delta Natural Gas Company, Inc., and Producer in an amount equivalent to the overpayment, without liability for the payment of any interest on the amount withheld. Nothing in this Master Agreement shall be construed as a waiver or relinquishment by Peoples or Producer of its rights to recover any such overpayments or underpayments.

12.04 **Late Payments.** Charges billed to Producer, for which payment has not been received by Peoples in full by the due date indicated on the invoice, will be assessed a late-payment charge of two percent (2%) per month on the unpaid balance. If Producer's failure to pay any undisputed amount continues for fifteen (15) days after the due date, then Peoples, in addition to any other remedy it may have, may (a) shut in the Receipt Point until Peoples has received payment in full; (b) deduct the unpaid amount from any payments accruing to Producer under any agreement between the Producer and Peoples; (c) take Gas in kind from Producer in satisfaction of obligations; or, (d) terminate the Exhibit associated with the Receipt Point and/or terminate the entire Master Agreement, upon ten (10) days written notice to Producer. Peoples reserves its rights to exercise any and all remedies at law appropriate to collect any amounts due hereunder, including interest, not timely paid by Producer.

ARTICLE XIII
FAILURE TO PERFORM

13.01 **Suspension.** If Producer fails to comply with any of the covenants contained in this Master Agreement, or any other Gas supply and/or delivery agreement between Producer and any other natural gas company owned, or operated, by Peoples or its parent company, including, but not limited to, Delta Natural Gas Company, Inc., Peoples may refuse to allow Gas to flow through the Interconnect until, in Peoples' sole opinion, Producer is fully complying with all of the terms and conditions of this Master Agreement. Peoples, in its sole judgment, shall have the right to shut-in the Interconnect immediately if equipment is not operating properly, an overpressure condition exists, design limitations are exceeded, or safe operating conditions are compromised. Furthermore, Peoples has the right to keep the Interconnect shut-in until the Producer makes the necessary provisions to rectify the situation. If the abnormal conditions repeatedly arise, Peoples has the right to shut-in the Interconnect indefinitely and/or to terminate this Master Agreement.

Producer shall reimburse Peoples for any damages caused by Producer failing to comply with any of the covenants contained in this Master Agreement, including payments made by Peoples to other affected customers in settlement of claims arising out of such service if Producer was notified that Peoples was invoking indemnification under Section 13.03 and Producer was given the opportunity to defend against the claim prior to such settlement agreement. To the extent any damages required to be paid hereunder are liquidated, the Parties acknowledge that the damages are difficult or impossible to determine, otherwise obtaining an adequate remedy is inconvenient and the liquidated damages constitute a reasonable approximation of the harm or loss.

If litigation results from any dispute between Producer and Peoples, Peoples may pay any money withheld under this Master Agreement to a court of competent jurisdiction without any further liability, or may interplead all claimants, including Producer. The prevailing party in a litigated dispute between Peoples and Producer shall have the right to collect from the other party its reasonable costs and necessary disbursements and attorneys' fees incurred in enforcing this Master Agreement.

13.02 **Damages.** IN NO EVENT WILL EITHER PARTY BE LIABLE OR RESPONSIBLE FOR, EITHER UNDER THIS ARTICLE XIII, UNDER ANY THEORY OF LIABILITY OR UNDER ANY OTHER TERM OR PROVISION OF THIS MASTER AGREEMENT, FOR ANY LOSS OF PROFITS, LOSS OF BUSINESS, INTERRUPTION OF BUSINESS OR FOR INDIRECT, INCIDENTAL, SPECIAL, PUNITIVE OR CONSEQUENTIAL DAMAGES OF ANY KIND, EVEN IF A PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

13.03 **Indemnity.**

(a) Producer agrees to indemnify, hold harmless and provide a defense for Peoples, its officers, directors, affiliates, agents, employees and contractors against any third party claims for any liability, loss or damage whatsoever (including, without limitation, claims for royalties, taxes, fees or other charges) occurring in connection with or relating in any way to: (i) breach of this Master Agreement by Producer; (ii) the negligence, willful misconduct or other tortious act(s) or omission(s) by Producer, its officers, directors, affiliates, agents, employees or contractors; (iii) the Gas prior to its delivery to Peoples at the Interconnect Facility; and/or (iv) the Gas to the extent the claim, liability, or damage arises as a result of the quality of the Gas delivered by Producer or other condition of the Gas. Such indemnification shall include, but not be limited to, all costs and reasonable attorneys' fees, whether or not such liability, loss or damage results from any demand, claim, action, or cause of action, by any person, association or entity, public or private, that is not a party to this Master Agreement.

(b) Peoples agrees to indemnify, hold harmless and provide a defense for Producer, its officers, directors, affiliates, agents, employees and contractors against any third party claims for any liability, loss or damage whatsoever occurring in connection with or relating in any way to: (i) the negligence, willful misconduct or other tortious act(s) or omission(s) by Peoples' when accessing, operating, adjusting, changing, or repairing any Producer-owned facilities or equipment in accordance with Peoples' rights to do so granted by this Master Agreement and (ii) the negligence, willful misconduct or other tortious act(s) or omission(s) by Peoples' when accessing, operating, adjusting, changing, or repairing any of the Producer facilities not pursuant to Peoples' rights to do so granted by this Master Agreement. Such indemnification shall include, but not be limited to, all costs and reasonable attorneys' fees, whether or not such liability, loss or damage results from any demand, claim, action, or cause of action, by any person, association or entity, public or private, that is not a party to this Master Agreement.

13.04 **Shut-In Remedy.** In any instance set forth in this Master Agreement in which Peoples has the right to shut-in an Interconnect, Peoples shall further have the right to remove its facilities associated with the Interconnect and terminate this Master Agreement if whatever action resulted in the shut-in has not been remedied in the amount of time set forth in this Master Agreement, or if no exact time is set, within a reasonable timeframe as determined by Peoples.

ARTICLE XIV
REGULATORY APPROVALS

14.01 **Initial Regulatory Filing Requirements.** Both Peoples and Producer are responsible for identifying and obtaining any governmental and/or regulatory approvals that may be required for construction and operation of the facilities contemplated by this Master Agreement.

14.02 **Changes in Regulation Results in Material Adverse Effect.** If any other governmental agency, whether state or federal, takes any action or issues any determination that directly or indirectly results in a material adverse change to any provision of this Master Agreement, then the materially adversely affected Party (hereinafter "Affected Party") may either:

(a) continue to fulfill its obligations under this Master Agreement as altered by the change in regulation; or

(b) seek to renegotiate the affected terms of this Master Agreement by giving notice to the other Party within thirty (30) days of the material adverse change. If the Affected Party elects to renegotiate the terms of this Master Agreement, both Parties shall be obligated to renegotiate in good faith.

14.03 **Changes in Regulatory Proceedings.** The Parties agree that any amendments or modifications to this Agreement and/or the Exhibits or Appendices that are part of this Agreement, which are the result of a regulatory proceeding before the Pennsylvania Public Utility Commission shall become effective, regardless of materiality, upon 30 days written notice of the same.

ARTICLE XV
GENERAL REPRESENTATIONS AND WARRANTIES

15.01 **Producer's General Representations and Warranties.** Producer makes the following general representations and warranties:

(a) Producer is duly organized, validly existing, and in good standing under the laws of the state in which it is organized and/or has full power and authority to execute and deliver this Master Agreement and to perform its obligations hereunder;

(b) Producer holds all necessary corporate authorizations and by the execution and delivery of this Master Agreement will not violate its Articles of Incorporation, Limited Liability Company Agreement or other applicable governing agreement or any applicable laws or regulations;

(c) There is no litigation, investigation, administrative proceeding or other action existing, pending, or threatened that would materially adversely affect the ability of Producer to fulfill its obligations under this Master Agreement;

(d) Producer's signatories possess authority to execute this Master Agreement such that a legal, valid, and binding obligation enforceable against Producer is created; and

(e) Producer shall be deemed to be in control and possession of the Gas hereunder until it shall have been delivered to Peoples at the Receipt Point. Producer assumes the full cost and expense, as well as full and complete liability and responsibility, for collecting, gathering, and transporting the Gas to the Receipt Point hereunder at the quality hereinafter specified.

15.02 **Peoples' General Representations and Warranties.** Peoples makes the following general representations and warranties:

(a) Peoples is duly organized, validly existing, and in good standing under the laws of the state in which it is organized and/or has full power and authority to execute and deliver this Master and to perform its obligations hereunder;

(b) Peoples holds all necessary corporate authorizations and by the execution and delivery of this Master Agreement will not violate its Articles of Incorporation, Limited Liability Company Agreement or other applicable governing agreement or any applicable laws or regulations;

(c) There is no litigation, investigation, administrative proceeding or other action existing, pending, or threatened that would materially adversely affect the ability of Peoples to fulfill its obligations under this Master Agreement; and

(d) Peoples' signatories possess authority to execute this Master Agreement such that a legal, valid, and binding obligation enforceable against Producer is created.

ARTICLE XVI
ASSIGNMENT

16.01 **Assignment of this Master Agreement.** This Master Agreement shall be binding upon and inure to the benefit of the successors, assigns, personal representatives, and heirs of the respective Parties hereto, and the covenants, conditions, rights and obligations of this Master Agreement shall run for the full term of this Master Agreement. No assignment of this Master Agreement, in whole or in part, will be made without the prior written consent of the non-assigning party, which consent will not be unreasonably withheld or delayed; provided, either party may transfer its interest to any parent or affiliate by assignment, merger or otherwise without the prior approval of the other party. Upon any transfer and assumption, the transferor shall not be relieved of or discharged from any obligations hereunder.

Producer shall give prompt notice in writing to Peoples of any sale or assignment or other disposition of all or any part of its interest in the Interconnect Facilities hereinbefore described and covered by this Master Agreement and Exhibit(s). Producer shall furnish to Peoples copies of any relevant documents evidencing the transfer or assignment of said Producer's interest. Until said notice and relevant documents have been given and furnished to Peoples, Peoples, upon written notice to Producer, may shut-in the Interconnect hereunder, and/or escrow any payments required hereunder, without liability. In the event that Producer fails to promptly provide said notice and relevant documents, Peoples shall have the right to terminate this Master Agreement, and/or any Exhibits, upon fifteen (15) days' notice.

ARTICLE XVII
NOTICE

17.01 **Notices.** Following execution and activation of this Master Agreement, all communications, invoices and payments ("Notices") required hereunder may be sent by a nationally recognized overnight courier service, hand delivered, by electronic mail, or by First Class U.S. mail. Upon request by the Producer, Peoples will send a duplicate copy of any Notice delivered by electronic mail, via First Class U.S. mail or equivalent shipping service.

17.02 **Receipt of Communications.** Any notice required or permitted under this Master Agreement shall be communicated in writing. Notice shall be deemed to have been received: (i) when sent by overnight mail or courier, on the next business day after it was sent or such earlier time as is confirmed by the receiving Party; (ii) when delivered by hand, at the time it is delivered to an officer or to a responsible employee of the receiving Party; (iii) when delivered via First Class U.S. Mail, two (2) business days after mailing or (iv) when electronically mailed on or before 5:00 p.m. EST on the business day it was sent or on the next business day if electronically mailed after 5:00 p.m. EST. Either Party may change its address, electronic mailing address or telephone number at any time by promptly giving notice of such change to the other Party. Either Party may modify any notice information specified above by written notice to the other Party.

ARTICLE XVIII
MISCELLANEOUS

18.01 **Choice of Law.** This Master Agreement shall be governed by and interpreted in accordance with the laws of the Commonwealth of Pennsylvania, without regard to the State's conflict of laws principles. This Master Agreement shall be deemed to have been executed in Pennsylvania.

18.02 **Construction of this Master Agreement.** No presumption shall operate in favor of or against either Party as a result of any responsibility either Party may have had for drafting this Master Agreement.

18.03 **Execution.** This Master Agreement may be executed in one or more counterparts, each of which shall be deemed an original, and all of which together shall constitute one and the same instrument. As used herein, the singular of any term shall include the plural.

18.04 **Captions.** The article and section captions of this Master Agreement are for purposes of reference only and shall not affect the meaning of any provision of this Master Agreement.

18.05 **Amendments.** This Master Agreement may only be amended or modified by written instrument signed by the duly authorized representatives of Producer and Peoples, except for any amendments or modifications approved by the Pennsylvania Public Utility Commission in a regulatory proceeding, shall become effective upon 30 days written notice.

18.06 **Severability.** If any provision of this Master Agreement is held by any court of competent jurisdiction to be illegal, invalid, unenforceable, or in conflict with any law of the Commonwealth of Pennsylvania, the validity of the remaining provisions of this Master Agreement shall not be affected, and the rights and obligations of the Parties shall continue in full force and effect to the full extent permitted by law. If any provision of this Master Agreement is held invalid, illegal, unenforceable or in conflict with any Pennsylvania law, the Parties shall meet promptly and negotiate in good faith a replacement provision to effectuate the intent of the Parties.

18.07 **Confidentiality.** This Master Agreement and all notices, statements, correspondence, and other communications or documents relating to the negotiation and administration of this Master Agreement are non-public, confidential, and proprietary ("Proprietary Information"). Each Party shall keep such Proprietary Information strictly confidential for a period ending two (2) years after the expiration or termination of this Master Agreement, except as may be required to comply with any statute or order of a court or government agency having subject matter jurisdiction, the Parties shall not disclose, reveal or divulge any Proprietary Information to any person or entity without the prior written consent of the other Party.

18.08 **Audits.**

(a) Accounting Audits: Peoples shall have the right to audit Producer's accounting records and other documents relating to materials delivered by or on behalf of Producer for Peoples' account for any calendar year within the twenty-four (24) month period following the end of such calendar year. This provision shall continue in full force and effect for a period of twenty-four (24) months from the effective date of termination of this Master Agreement.

(b) Field Audits: Producer gives Peoples permission to periodically come onto Producer's property in order to audit the Interconnect Facility to determine if it is in compliance under the terms of this Master Agreement. Permission for ingress/egress includes personnel, vehicles, and other equipment deemed necessary by Peoples. Peoples shall have permission to perform all operating and maintenance functions associated with verifying the integrity and functionality of equipment, piping, and appurtenances. If, in Peoples' judgment, modifications are necessary in order to assure proper operation of the equipment, Peoples

shall notify Producer and describe the modifications and shut in the Interconnect. Peoples shall indemnify and hold harmless Producer for any and all environmental, health and safety liabilities resulting from Peoples' or its designee's intentional or negligent actions during a field audit. Peoples shall replace, fix or repair, at its cost, any portion of Producer's Interconnect Facility that Peoples or its designee intentionally or negligently harms, damages or breaks as a result of operating or attempting to maintain the Producer's Interconnect Facility.

18.09 **Waiver.** Any waiver by either Party of performance due by the other Party under the terms of this Master Agreement shall not operate as a waiver of any or all of such Party's rights with respect to all prior or subsequent obligations of the other Party.

18.10 **Incorporation of Appendices.** Each Appendix hereto is made subject to the terms and conditions hereof and is fully incorporated into this Master Agreement by reference.

18.11 **Entire Agreement.** The entire agreement between the Parties shall include those provisions contained in this Master Agreement, which includes the Appendices and any effective Exhibit. In the event of a conflict between the terms of any Appendix and the terms of this Master Agreement, the terms of the Master Agreement shall govern. In the event of a conflict between the terms of any Exhibit and the terms of this Master Agreement, which includes the Appendices, the terms of the Exhibit shall govern.

18.12 **Force Majeure** In the event either party is rendered unable, wholly or in part, by Force Majeure to carry out its obligations under this Master Agreement, other than demand payments of amounts due hereunder, then the obligations of such party, so far as they are affected by such force majeure, shall be suspended during the continuance of any inability so caused. However, the party claiming the existence of force majeure shall use all reasonable efforts to remedy any situation, which may interfere with the performance of its obligations hereunder. The term "Force Majeure" as used herein, and as applied to either party hereto, shall mean acts of the law, acts of God, strikes, lockouts, or other labor disturbances, acts of the public enemy, war, blockades, insurrections, riots, epidemics, fires, floods, washouts, arrests, and restraint of rulers and people, civil disturbances, explosions, breakage or accidents to machinery or lines of pipe, freezing of wells or pipelines, partial or entire failure of such wells, or any other cause, whether of the kind herein enumerated, or otherwise, not reasonably within the control of the party claiming suspension. It is understood that settlement of strikes, lockouts, or labor disturbances shall be entirely within the discretion of the party having the difficulty and that the above requirement that any Force Majeure shall be remedied with all reasonable dispatch shall not require the settlement of strikes, lockouts, or labor disturbances by acceding to the demands of the opposing party when such course is inadvisable in the discretion or judgment of the party having the difficulty.

This Master Agreement, as amended from time to time, constitutes the entire agreement between the Parties for the transportation and/or purchase and sale of Gas and supersedes all previous offers, negotiations, understandings and agreements between the Parties with respect to the transportation and/or purchase and sale of Gas. There are no agreements, modifications, conditions or understandings, written or oral, expressed or implied, pertaining to the transportation and/or purchase and sale of Gas which are not contained in this Master Agreement.

SIGNATURE PAGE IMMEDIATELY FOLLOWS

IN WITNESS WHEREOF, Peoples and Producer have duly executed this Master Agreement to be effective as of the day and year first written above.

APPENDIX A TO MASTER AGREEMENT
MINIMUM ENGINEERING & TECHNICAL SPECIFICATIONS

SECTION I
DESIGN OF INTERCONNECT FACILITIES

1.01 **General.** Producer shall be responsible for all aspects of the design and construction of a New Facility, subject to the terms and conditions of the Master Agreement, unless specifically noted otherwise by Peoples. Producer shall be responsible for maintaining any Existing Facility and New Facility to the specifications set forth in the Master Agreement, including all Appendices and Exhibits. Peoples reserves the right to inspect an Existing Facility and a New Facility to ensure it complies with the specifications and is operable; in the event said facility does not meet with the specifications or is inoperable, the Interconnect may be shut-in until the Producer remedies the deficiency(ies).

1.02 **Materials**. All material and equipment furnished for a New Facility shall be new and shall satisfy: (i) the generally accepted industry standards; and (ii) the specifications set forth in this Appendix.

1.03 **Site/Land Acquisition**

(a) Producer shall provide Peoples with the necessary rights-of-way, permits, and related surface rights including the rights of ingress, egress and regress necessary for Peoples to access the location of the New Facility. Producer shall also provide, if required, a right of way necessary for the tie-in of proposed New Facility to Peoples' System that is free of all costs and from all claims and liabilities for damages arising out of installation or the construction of the New Facility. To the extent that Producer has not previously provided Peoples with the necessary rights-of-way, permits, and related surface rights including the rights of ingress, egress and regress necessary for Peoples to access the location of an Existing Facility, and Peoples is hindered from accessing the location, Peoples shall have right to shut in the Interconnection, remove its facilities associated with the Interconnect and terminate the portion of the Exhibit applicable to the Interconnection.

(b) Producer and Peoples must agree beforehand to the location of the New Facility as well as the final tie-in location.

(c) Producer shall satisfy itself as to the character and types of surface and subsurface materials to be encountered in construction of the New Facility.

(d) Producer's right-of-way shall be cleared of all debris and obstructions before the New Facility is tied into Peoples' System. For Existing and New Facilities, Producer's right-of-way shall be maintained such that regular access to the Interconnection may be obtained.

(e) A New Facility shall be readily accessible, located in an area that is not susceptible to vehicular or other damage but as near as practical to the final tie-in point. Peoples reserves the right to require that a New Facility be enclosed within a locked fence or building. In the event of safety or operational concerns, Peoples reserves the right to require that an Existing Facility be enclosed within a locked fence or building.

(f) The meter set shall be readily accessible, located in an area that is not susceptible to vehicular or other damage but as near as practical to the final tie-in point.

(g) All costs associated with Producer's obligations under this section shall be the Producer's responsibility and any such costs paid by Peoples shall be reimbursed by Producer through the Construction and Installation Fee.

(h) To the extent that Peoples is at any time required to pay for such rights-of-way or such costs or claims or liabilities, then such amounts and related expenses shall be incorporated within the Initial Construction and Installation payment made under this Master Agreement.

1.04 **Responsibility for Interconnect Facility Equipment**. The following table establishes the design, construction, operation, maintenance and cost responsibility for certain aspects of the Interconnect Facilities. All of the following design specifications designated as the Producer's responsibility shall be incorporated into the design and construction of the Receipt Point at Producer's sole cost unless waived by Peoples. Excluding Measurement Equipment, for which requirements are set forth in Section 10.01 of the Master Agreement, and Pressure/Flow Control Equipment, for which requirements are set forth in Section 4.01 of the Master Agreement, the Parties specifically agree that the design specifications identified in this Section 1.04 shall not apply to any Existing Facility(ies), unless required by the Pennsylvania Public Utility Commission or in order to address operational, safety or service related issues, in which case Peoples agrees to provide at least sixty (60) days advance notice to Producer documenting the operational, safety or service related issues and detailing required modifications to the existing Receipt Points(s).

1.05 **Inlet Filter.** Filter/filter-separator facilities installed upstream of the Interconnect Facility at Receipt Point(s) must be considered and based upon specific Gas analysis. This Section 1.05 shall not apply to any Existing Facility, unless required by the Pennsylvania Public Utility Commission or in order to address operational, safety or service related issues, in which case Peoples agrees to provide at least sixty (60) days advance notice to Producer documenting the operational, safety or service related issues and detailing required modifications to the Existing Facility,

1.06 **Freeze Prevention.** In circumstances where heavier hydrocarbons and/or water vapor may be present within the Gas stream, Producer shall incorporate freeze protection measures into the design of the Interconnect Facility. The method and design of the freeze protection measures shall be submitted to the Peoples for approval and no construction shall commence until such time as Producer receives written approval from Peoples. If Producer's freeze protection measures involve the use of Gas for fuel, then the tap for such fuel supply line shall be made upstream of the measuring equipment, such that Producer bears the costs of the fuel. This Section 1.06 shall not apply to any Existing Facility, unless required by the Pennsylvania Public Utility Commission or in order to address operational, safety or service related issues, in which case Peoples agrees to provide at least sixty (60) days advance notice to Producer documenting the operational, safety or service related issues and detailing required modifications to the Existing Facility. Freeze protection measures which may be acceptable to Peoples include the following:

(a) Methanol Injection – should be installed downstream of meters

(b) Catalytic heaters / heat trace - for regulator bodies

(c) Indirect water bath heaters – for large pressure cuts and large flow volumes

(d) All Gas provided and delivered to Peoples shall have a temperature of no less than 45° F.

1.07 **Regulating and Overpressure Protection.** Peoples may require regulation and shall require over-pressure protection for all Receipt Point(s) under this Master Agreement. Such regulation shall deliver pressures suitable to pressures in Peoples' System. Peoples shall specify and/or approve the type of regulators to be used and shall specify pressure ranges, and operating settings. Producer will contract with a Peoples Approved Vendor to perform annual inspection and lock up test of each regulating and overpressure device and provide inspection reports to Peoples.

(a) A primary pressure-limiting device shall be required whenever the Peoples' System has the possibility of realizing pressures exceeding the Peoples' pipeline MAOP.

(b) Overpressure protection devices shall be set such that pressures may not exceed the maximum allowable operating pressure for the facility into which Producer is delivering Gas.

(c) Overpressure protection devices must be designed to prevent a single incident from affecting the operation of the Interconnect.

(d) Security valves, monitor regulators, or control valves should be used for overpressure protection.

(e) Overpressure protection devices shall consist of a stand-alone valve operating on a pneumatic signal taken directly from the pipeline.

(f) If pilot loaded valves are used, the pilots shall not bleed when they are not operating. Pilot bleeds should be routed to downstream piping.

1.08 **Control Valves**

(a) Control valves shall be sized using the highest flow rate compounded with the lowest delivery pressure.

(b) All flow control valves should be installed to fail in the open position or in the last set positions, as applicable.

(c) Peoples shall approve the type and brand of control valve.

(d) Downstream taps for pressure control valves shall be noted on detail drawings and shall also possess a pressure transducer for stations designed with telemetry.

1.09 **Miscellaneous Valves and Piping**

(a) Blow-down valves shall be installed to provide for venting of all sections.

(b) Meter header piping shall be sized for 1.5 times the total combined area of the total meter runs.

(c) Isolation valves will be installed on either side of regulators, meters, and control valves.

(d) Piping shall be Standard Weight unless approved otherwise by Peoples.

1.10 **Emergency Valve.** The design and installation shall include an emergency valve (ball valve preferred) located at least twenty-five (25) lineal feet (point to point) but not to exceed fifty (50) lineal feet from the tie-in with Peoples' System. The emergency valve shall be readily accessible, easily operated, and sufficiently marked for quick identification.

1.11 **Peoples Tie-in and Tap Sizing.** Peoples shall provide for the sizing and actual installation of tap for tie-in of a New Facility to Peoples' System. Producer shall provide data necessary for the sizing of the tap.

1.12 **Gas Chromatograph.** Auxiliary equipment may be required for measurement of Btu variations. Peoples shall have the final decision as to the type of Gas analysis required.

1.13 **Dehydration.** Gas received by Peoples at Receipt Point(s) shall be consistent with the requirements in Appendix B, Schedule 1 and contain no free liquids. In accordance with Section 7.01 of the Master Agreement, Peoples has the right to discontinue and/or terminate any Receipt Point(s) where Gas delivered contains free liquids.

1.14 **Dew Point Tester.** When deemed necessary by Peoples, Producer shall incorporate an on-line dew point tester as part of the Interconnect Facility. The unit shall be set such that any Gas volumes detecting

water content levels in excess of contractual specifications shall result in the automatic closure of an in-line valve thereby preventing further delivery of Gas into system. Valve shall remain closed until an acceptable water moisture content of the Gas can be provided. This Section 1.14 shall not apply to any Existing Facility, unless required by the Pennsylvania Public Utility Commission or in order to address operational, safety or service related issues, in which case Peoples agrees to provide at least sixty (60) days advance notice to Producer documenting the operational, safety or service related issues and detailing required modifications to the Existing Facility.

1.15 **Corrosion Coupon Tap.** When specified by Peoples, Producer shall provide for an in-line valve tap for installing corrosion coupons.

1.16 **Check Valve.** All Interconnect Facilities shall be installed with a check valve of some type so as to assure Gas flows in the direction proposed by this Master Agreement. Producer will contract with a Peoples Approved Vendor to perform annual inspection of each check valve and, in accordance with Appendix B, Section 1.07, shall provide the inspection report to Peoples.

1.17 **Building, fences, and site security**

(a) Buildings, or shelters, shall be provided to protect electronic Gas measurement and control equipment, as well as to act as noise barriers, protection from damage, and for meeting compliance with local ordinances. All buildings, shelters, fences, or the like, shall be designed to permit safe access around all facility piping and equipment. Designs for buildings, shelters, fences, or the like shall be submitted to Peoples' approval prior to installation or modification.

(b) Unless waived by Peoples in its reasonable discretion, all Interconnect Facility shall be fenced, consisting of chain link fencing eight feet (8') in height complete with three (3) strands of barbed wire, and at a minimum; one pedestrian gate and one truck gate installed at opposing ends of the site. This sub-section 1.17(b) shall not apply to any Existing Facility, unless required by the Pennsylvania Public Utility Commission or in order to address operational, safety or service related issues, in which case Peoples agrees to provide at least sixty (60) days advance notice to Producer documenting the operational, safety or service related issues and detailing required modifications to the Existing Facility.

(c) The site selected must be large enough to hold all equipment and accommodate all activities required for normal and maintenance operations.

1.18 **Power and telephone.** If required, Producer shall provide electric power and telephone at site.

SECTION II
INSTALLATION, TESTING, and INSPECTION

2.01 **Testing**

(a) All measurement equipment shall be tested in accordance with specifications provided by Peoples. Peoples shall specify minimum test pressure and test duration. Tests shall be conducted using a recording chart of which Peoples shall receive the original or a clear copy of the original test chart.

(b) Peoples shall not activate the New Facility and Interconnect until a copy (or original) of the test chart has been received and approved.

2.02 **Inspection**

(a) Peoples reserves the right to inspect all New Facilities during construction.

(b) Prior to startup of construction, Producer shall provide three (3) days' notice to Peoples.

(c) All girth welds must be 100% radiographically inspected and approved.

(d) Producer shall be responsible for all expenses, including inspection by Peoples, relative to construction inspections of the New Facilities.

APPENDIX B TO MASTER AGREEMENT
INSPECTIONS AND GAS QUALITY

SECTION I
ROUTINE INSPECTIONS OF INTERCONNECT FACILITIES

1.01 **Interconnect Facility(ies) Maintenance**. Peoples shall have the right to periodically inspect Producer's records and the Interconnect facilities to verify that all operating and maintenance functions are being performed effectively. If Producer cannot provide adequate documentation, or if Producer's operating and maintenance procedures are inadequate as determined by Peoples, Producer will have seventy-two (72) hours to produce proper documentation and/or revise inadequate procedures. If, after the seventy-two-hour period, documentation is not provided and/or procedures are not modified, Peoples retains the right to take further action as it deems necessary including the right to shut-in the Interconnect until adequate documentation/procedures have been verified and secured.

1.02 **Changes to Interconnect Facility.** The Producer has an obligation to notify Peoples in writing 24 hours prior to changes to Producer Interconnect facilities that would require modifications to an Interconnect, Peoples' System or Gas composition, and Peoples shall have the right to reject changes to the Interconnect Facility. Peoples retains the right to take action as it deems necessary in its reasonable discretion, including the right to shut-in the Interconnect, in the event notification does not occur. The cost of any damages as a result of changes to Producer's Interconnect Facility will be borne entirely by the Producer; provided, that if Peoples or its designee accesses and operates Producer's Interconnect Facility, Peoples shall indemnify and hold harmless Producer for any and all environmental, health and safety liabilities directly resulting from Peoples' or its designee's access or operation of the Producer's Interconnect Facility. Peoples shall replace, fix and repair, at its cost, any portion of Producer's Interconnect Facility that Peoples or its designee intentionally or negligently harms, damages or breaks as a result of Peoples' accessing or operating the Facility.

1.03 **Interconnect Facility Operations.** Peoples shall have the right to shut-in the Interconnect immediately if meter set equipment is not operating properly, an overpressure condition exists, design limitations are exceeded, or safe operating conditions are compromised. Furthermore, Peoples has the right to keep the Interconnect shut-in until the Producer makes the necessary provisions to rectify the situation. If the abnormal conditions repeatedly arise, Peoples has the right to shut-in the Interconnect indefinitely.

1.04 **Interconnect Facility Inspections.** Peoples shall have the right to inspect the Interconnect Facility including, but not limited to, the following: calibrate the meter; inspect regulators; inspect valves; and inspect and calibrate Gas quality facilities. If during the course of these inspections, Peoples determines, using commercially reasonable discretion, that installation procedures where not followed, equipment was not maintained, or equipment was modified to not comply with specifications established in this Master Agreement, Peoples has the right to shut-in the Interconnect until corrective actions by the Producer occur and additional inspections performed. If continued inspection violations occur, Peoples has the right to shut-in the Interconnect indefinitely. Peoples shall indemnify and hold harmless Producer for any and all environmental, health and safety liabilities directly resulting from Peoples' or its designee's inspection in calibrating the meter, inspecting regulators, inspecting valves, and inspecting and calibrating gas quality equipment within the Producer's Interconnect Facility. Peoples shall replace, fix and repair, at its cost, any portion of Producer's Interconnect Facility that Peoples or its designee intentionally or negligently harms, damages or breaks as a result of the activities described above.

1.05 **Reserved.**

1.06 **Reserved.**

1.07 **Annual Measurement Equipment Testing**. All measurement equipment shall be inspected and tested by a Peoples Approved Vendor once each calendar year not to exceed fifteen (15) months from the previous inspections at Producer's expense. This annual inspection must be completed by technicians trained to operate pressure regulating equipment in accordance with the manufacturer's procedures and specifications. Peoples reserves the right to request documentation for regular testing and technician training. The annual testing shall include, but is not limited to the following equipment: Check Valve, Regulator(s) Lock-up test, electronic corrector (EGM) calibration, meter calibration and spot sample Gas analysis (frequency according to section 2.01 of this Appendix B) at the Interconnect. Inspection reports shall be submitted, within 30 days after the yearly inspection date, to Peoples. In the event the Producer fails to submit the yearly inspection reports, Peoples shall have the right to periodically inspect Producer's records to determine if measuring equipment has been inspected and tested, as required by the Master Agreement. If Producer cannot provide documentation, within five (5) days of Peoples' request, Producer is required to immediately shut-in the Interconnect at which measurement and testing records are deficient, for a period of one week, or until the Producer can provide proof that the measuring equipment has been inspected and tested, and is working properly, whichever is longer. If Producer cannot provide documentation that its measuring equipment has been inspected and tested on additional occasions, Peoples retains the right to take further action at its discretion, including the right to require the shut-in of the applicable Interconnect for additional time periods. If Producer repeatedly violates this provision, Peoples has the right to permanently discontinue accepting Gas from wells that Producer has dedicated to said Interconnect Facility.

SECTION II
GAS QUALITY REQUIREMENTS

2.01 **General.** Before Peoples permits the flow of Gas from a New Facility into the Peoples' System, Producer will provide a Gas sample analysis by a Peoples Approved Vendor and Peoples shall review the Gas sample analysis to verify that it is of marketable quality. Producer will contract with a Peoples Approved Vendor to perform an initial (within one (1) year of the execution of this Agreement) Gas quality sample analysis and provide inspection report to Peoples for each Interconnect Facility that have not otherwise been tested by Producer or Peoples within the year prior to the execution of this Agreement. Receipt Point(s) with daily volumes at or above 1,000 mcf/day will be required to have a Gas quality sample analysis conducted on an annual basis. Receipt Point(s) with daily volumes below 1,000 mcf/day will be required, after obtaining the initial analysis, to have a Gas quality sample analysis' conducted every five (5) years thereafter, unless the Gas sample analysis does not meet Peoples specifications, requirements and/or standards, as set forth in this Agreement, including any Appendixes, Exhibits, Addendums, Schedules and Amendments, in which case, Peoples will require the Interconnect to be shut in until Gas sample meets Peoples specifications. Peoples reserves the right to require more frequent Gas quality sample analyses in order to address operational, safety or service-related issues. The initial and ongoing Gas sample analyses shall include testing for water vapor, N2, O2, CO2, CH4 (methane through pentane), heating value (BTU - dry and saturated), specific gravity by a certified tester using GPA 2261-13 and GPA 2172-09 standards and shall conform with the following specifications:

(a) Liquids – The Gas shall be free of water and hydrocarbons in liquid form at the temperature and pressure at which the Gas is delivered.

(b) Moisture Content – The Gas shall not have water content in excess of seven (7) pounds of water per million cubic feet of Gas measured at standard conditions of 14.73 psia and 60°F, unless otherwise approved by an authorized representative of Peoples or as set forth in Schedule 1. The moisture content of the Gas shall be such that it is of marketable quality, and does not cause any safety or operational problems or other adverse effects on Peoples' System or any downstream systems to which the Gas may flow. Producer will be advised of any additional or specific moisture content limits for the Interconnect, or of any changes in such limits, should they be required.

(c) Water Vapor – Peoples will authorize water content according to the chart attached as Schedule 1 to this Appendix B. However, Peoples maintains the right to require a lower (more stringent) water vapor content than the level set forth in Appendix B if the water vapor levels at specific Receipt Point(s) are detrimentally affecting customer service or creating operational issues.

(d) Carbon Dioxide and Other Inerts – The Gas shall not contain more than four percent (4%) by volume of total combined inerts such as carbon dioxide, nitrogen, argon, and helium; provided that the total carbon dioxide content shall not exceed two percent (2.0%) by volume.

(e) Dust, Gums and Solid Matter – The Gas shall be commercially free of dust, gums, gum-forming constituents, or other liquid or solid matter which might become separated from the Gas in the course of transportation through pipeline.

(f) Heating Value – Unless otherwise approved, in writing, by Peoples, the Gas delivered shall contain not less than 967 BTU per standard cubic foot and shall not exceed 1,100 BTU per standard cubic foot of Gas calculated as the gross saturated value at 14.73 psia and 60° Fahrenheit, and a utilization factor of one thousand three hundred (1,300) plus or minus six percent (6%), the utilization factor being defined as that number obtained by dividing the heating value of the Gas by the square root of its specific gravity. Gas accepted by the Company that contains less than 967 BTU per cubic foot will be enhanced to ensure that Gas delivered by the Company to its end-use customers shall meet the heating value requirements set forth in applicable regulations, orders or laws. The Producer may be responsible for the costs of such enhancement.

(g) Temperature – The temperature of the Gas delivered into the Peoples' System shall not exceed 100°F unless approved by an authorized representative of Peoples. The temperature shall not be less than 40°F as delivered to Peoples' System after passing through all regulation, measuring and over protection equipment.

(h) Oxygen – The Gas shall not contain more than 2,000 parts per million (0.2% of one percent) of oxygen by volume.

Should circumstances warrant more in-depth Gas sample analyses, such as the suspected or known presence of other constituents, Peoples reserves the right to require testing for additional compounds including not limited to the following:

(a) Hydrogen Sulfide – The Gas shall not contain more than four (4) parts per million on a volumetric basis, or three-tenths (0.3) of a grain of hydrogen sulfide per one hundred (100) cubic feet.

(b) Total Sulfur – The Gas shall not contain more than 170 parts per million, on a volumetric basis, or ten (10.0) grains of total sulfur per one hundred (100) standard cubic feet.

(c) Carbon Monoxide – The Gas shall not contain more than one-tenth percent (0.1%) by volume of carbon monoxide.

(d) Gasoline - Not contain more than two-tenths (0.2) of a gallon of gasoline per one thousand (1,000) standard cubic feet unless otherwise approved by an authorized representative of Peoples.

(e) Bacteria – The Gas, including any associated liquids, shall not contain any microbiological organism, active bacteria, or bacterial agent capable of causing or contributing to: (i) injury to Peoples' pipelines, meters, regulators, or other facilities and appliances through which Producers Gas flows; or (ii) interference with the proper operation of Peoples' System. Microbiological organisms, including, but not limited to, sulfate reducing bacteria (SRB) and acid producing bacteria (ACB), when considered as a possibility, shall be tested for their existence utilizing the

American Petroleum Institute test method API-R38 or other acceptable test method as determined by both Parties.

(f) Siloxane – All Gas delivered through an Interconnect into Peoples' System that includes Gas from landfill well(s) or gathering lines fed by landfill Gas sources shall meet the following on-going testing protocol:

Test Results, mg of SI / Nm^3	Action
≤ 0.4	November through February = once per week March through October = twice per month
0.40 - 0.60	Test daily until results are below 0.40
3 consecutive results ≥ 0.60 or a single test ≥ 1.0	Shut in gas until start-up conditions are re-established

2.02 **Gas Odorant.** Peoples will perform Gas odorant tests to confirm that the Gas delivered at the Producer's Interconnect Facility is properly odorized. If is found to have insufficient odor, then Producer will be required to purchase and install odorizing units and monitoring equipment according to Peoples' specifications and as set forth herein. The Producer is also responsible for the maintenance of this facility including the costs of odorant supply needed to maintain a sufficient odor in all Gas delivered at the Producer's Interconnect Facility. Odorizing units and monitoring equipment specifications

(a) Equipment and Ownership. The Producer will own the odorizer with associated equipment necessary to operate and deliver odor (odorizer system) and is responsible for all costs associated with operating the system. Peoples will approve the design of the odorizer system, whereinafter the Producer will purchase and install the odorizer system. Peoples may choose to be present for the installation and shall have the right to test the system after its installation. Thereafter, Peoples will operate and maintain the odorizer systems and, where applicable, a thermal electric generator (unless a public electric power supply can be made available to the site), together with necessary valves, tubing and fittings, in order to properly odorize Gas delivered to measurement equipment. If the odorizer system is located outside of the Interconnect Facility location, the Producer shall provide site access to Peoples, as described in Section 1.03 of Appendix A, for the site where the odorization system is located. Peoples shall indemnify and hold harmless Producer for any and all environmental, health and safety liabilities directly resulting from Peoples' or its designee's accessing or operating Producer's odorizer system. Peoples shall also replace, fix and repair, at its cost, any portion of Producer's odorizer system that Peoples, or its designee intentionally or negligently harms, damages or breaks as a result of operating the odorizer system.

(b) Upgrades. If Producer should desire to upgrade or replace any of the currently existing odorizers or generators, all equipment must be subject to the review and approval of Peoples.

(c) Refill. Peoples will manage the filling and refilling (or tank exchange) of the odorant to make sure, that sufficient odorant is available for Gas delivered to the measurement equipment.

(d) Odorant Cost. Producer will reimburse Peoples, upon receipt of its invoices, for the cost of odorant, including all future tank refills.

(e) Odorizer Site. Producer will provide and maintain, at its own cost, perimeter fencing around the Odorizer sites to enclose and protect the odorizers and related equipment.

(f) Communication Cost. Producer will reimburse Peoples, upon receipt of its invoices, for the monthly cost of public telephone or cellular service for the communications equipment used to monitor the operation of the odorizers and the odorant level and for the monthly cost of electrical service used to operate and maintain the odorizers, if electric power is provided to the odorizers from a public supplier.

(g) Maintenance Cost. Producer will reimburse Peoples, upon receipt of its invoices, for the cost of any regular, periodic, and other odorizer maintenance service, including all labor and necessary replacement parts or equipment, to assure the continued efficient operation of the odorizers. This includes reserve parts held in Peoples' stock to enable timely and proficient resolutions.

2.03 **Gas Quality Inspections.** If Gas sample analysis indicates that any of the Gas quality specifications, requirements and/or standards set forth in this Master Agreement have not been met, Peoples may refuse deliveries until the Producer makes the necessary provisions to fully comply with the Gas quality requirements.

2.04 **Gas Quality Inspections**. After initial deliveries are received, Peoples reserves the right to periodically sample Gas at the measurement equipment to validate the Gas quality. If the analysis indicates that Gas quality specifications, requirements and/or standards set forth in this Master Agreement are not met, Peoples has the right to shut in the Interconnect indefinitely until the Producer makes the necessary provisions to fully comply. Peoples shall indemnify and hold harmless Producer for any and all environmental, health and safety liabilities directly resulting from Peoples' or its designee's accessing Producer's measurement equipment. Peoples shall also replace, fix and repair, at its cost, any portion of Producer's measurement equipment that Peoples or its designee intentionally or negligently harms, damages or breaks as a result of accessing the equipment.

2.05 **Remedies.** Should any of the above substances enter Peoples' System and cause damage to metering, regulating and/or other equipment, or interruption of service, Producer shall reimburse Peoples for the costs to repair such damage and for any related costs which Peoples may incur to restore service to, and/or repair facilities of, its customers, including payments made by Peoples to customers in settlement of claims arising out of interruption of Gas service; provided that Producer was notified that Peoples was invoking indemnification under Section 13.03 and Producer was given the opportunity to defend against the claim prior to such settlement agreement.. Any such costs may be deducted from payments due Producer for Gas delivered. In addition, if the Gas delivered fails, in Peoples' reasonable opinion, using commercially reasonable discretion, to meet the quality specifications set forth herein, Peoples may elect to refuse to take all, or any portion of such Gas until the Producer bring the Gas into conformity with such specifications. In the case of any such refusal, Producer agrees to exercise all due diligence to bring such Gas into conformance with the specifications set forth herein. Peoples has the right to shut in the Interconnect indefinitely until the Producer makes the necessary provisions to meet the Gas quality standards. Peoples may also elect to require continuous Gas quality monitoring with fail safe shut off as a provision to accept existing or new deliveries. Damages as a result of Gas quality violations are the responsibility of the Producer and the Interconnect shall be shut-in until damages are paid in full.

Peoples reserves the right to require more stringent water vapor standards in limited and specific situations where Peoples has determined through water vapor testing that the water vapor levels at identified production meter points are affecting customer service or creating operational issues.

EXHIBIT A-__
to
Master Agreement

Additional Terms and Conditions Governing Transportation of Gas

This Exhibit A ("Exhibit") is made part of and is subject to the terms and conditions of the Master Agreement made and entered into by and between **Peoples Natural Gas Company LLC**, with an office located at 375 North Shore Drive, Pittsburgh, Pennsylvania 15212 (hereinafter referred to as "Peoples"), and **[Producer]** with and office at [Address] (hereinafter referred to as "Producer"). Producer and Peoples are also referred to herein individually as a "Party" and collectively as the "Parties."

This Exhibit A-__ shall supersede, in its entirety, and terminate without cause, any the previously executed Agreement(s) between the Parties for the transport of Gas for the Receipt Point(s)identified herein including, but not limited to, prior Transportation Agreements, Gas Purchase Agreements, Production Enhancement Agreements, Field Purchase Agreements, Measurement Operating Agreements and Interconnection Agreements; however agreements related to blending and compression requirements, such as Gathering Interconnect Compression Agreements and Blending Service and Operation Agreements, shall not be terminated and shall continue pursuant to their terms and conditions.

The Service Term Start Date for each individual Receipt Point shall be the latter of _____ or the first day of the immediately succeeding Production Period in which Producer delivers Gas to Peoples at the Receipt Point. The Service Term End Date for each individual Receipt Point shall be _____. After this initial term, this Exhibit will automatically renew for month-to-month periods unless either Producer or Peoples provides written notice of termination to the other party at least (thirty) 30 days prior to the expiration date. If either party terminates a Receipt Point, the Producer's Interconnect Facility(ies) will be disconnected, and the Interconnect shall be abandoned unless a subsequent Exhibit is executed within thirty (30) calendar days.

The Rates for Gathering are subject to the applicable tariff in effect at the time of delivery into the Peoples' System. These charges are subject to change. Rates for certain qualifying incremental conventional production, and for unconventional horizontal production and landfill production shall be determined by Peoples based on supporting information provided to Peoples by the Producer and in accordance with the applicable tariff and shall be specified in Schedule 1 to this Exhibit. On behalf of PIOGA, Peoples will charge an optional $0.01/Mcf retention fee for Producer Sales Volumes associated with the Receipt Point(s) identified in this Exhibit; said fee will be remitted directly to PIOGA by Peoples. Producer specifically authorizes Peoples to provide the Producer Sales Volumes associated with the Receipt Point(s) identified in this Exhibit to PIOGA, in writing, on a regular basis in order to verify the remitted retention fee. Should Producer decline the optional retention fee, no Producer Sales Volumes associated with the Receipt Point(s) identified in this Exhibit will be provided to PIOGA.

The Receipt Point(s) and applicable Retainage Percentage and Gathering Rate shall be identified in Schedule 1 to Exhibit A-__, which is attached hereto and made a part hereof.

This Exhibit shall become effective upon its execution by both Peoples and Producer and shall continue in full force and effect through the end of the latest Service Term End Date set forth herein, including any extensions thereof. The obligations of Producer to make payment hereunder and the obligation of Producer to indemnify Peoples, and Peoples to indemnify Producer, pursuant hereto shall survive the termination or cancellation of the Master Agreement and this Exhibit. Peoples shall have the right to terminate this Exhibit, upon thirty (30) days advance written notice to Producer, if Gas has not flowed for the previous period of twelve (12) consecutive months, or if Peoples or its designee has caused the Interconnect Facilities to be disconnected or removed.

SCHEDULE 1 TO
EXHIBIT A-__ TO MASTER AGREEMENT
RECEIPT POINT(S), RETAINAGE PERCENTAGE AND GATHERING RATE

Unless otherwise set forth below, the Retainage Percentage and the Gathering Rate for the following Receipts Point(s) are subject to the applicable tariff in effect at the time of Gas delivery into the Peoples' System and are subject to change.

Receipt Point(s)	Special Terms for Unconventional Wells

EXHIBIT A-__
to
Master Agreement

Additional Terms and Conditions Governing the Purchase of Gas

This Exhibit A ("Exhibit") is subject to the terms and conditions of the Master Agreement made and entered into by and between **Peoples Natural Gas Company LLC**, with an office located at 375 North Shore Drive, Pittsburgh, Pennsylvania 15212 (hereinafter referred to as "Peoples"), and **[Producer]** with an office at [Address] (hereinafter referred to as "Producer"). Producer and Peoples are also referred to herein individually as a "Party" and collectively as the "Parties."

This Exhibit A-__ shall supersede, in its entirety, and terminate without cause, the previously executed Agreement(s) between the Parties for the purchase of Gas for the Receipt Point(s) identified herein, including, but not limited to, prior Transportation Agreements, Gas Purchase Agreements, Production Enhancement Agreements, Field Purchase Agreements, Measurement Operating Agreements and Interconnection Agreements; however agreements related to blending and compression requirements, such as Gathering Interconnect Compression Agreements and Blending Service and Operation Agreements, shall not be terminated and shall continue pursuant to their terms and conditions.

The following sets forth the additional terms and conditions whereby Peoples shall purchase Gas from Producer at the specific Receipt Point(s) identified in this Exhibit.

1. **Sale and Purchase Obligations**. Producer shall produce and sell to Peoples, and Peoples shall take and pay for, quantities of Gas delivered to the Receipt Point(s) set forth below. Peoples shall have no obligation to pay for any Gas until such time as it has been produced and delivered to the designated Receipt Point(s). Except in instances where Peoples and Producer agree otherwise, Producer's sale shall be a full requirements sale where all Gas produced shall be delivered to Peoples. Notwithstanding the foregoing, Peoples may reduce or suspend its purchases under this Master Agreement in the event that Peoples has insufficient pipeline capacity or insufficient market demand to facilitate the sale and/or use of Producer's Gas. Upon notice to Producer, Producer shall promptly comply with Peoples' reduction or suspension request. As provided for in Section 6.07 of the Master Agreement, in the event Peoples should ever cease, in whole or in part, to sell Gas directly to end-use customers (otherwise known as providing merchant or sales service), then Peoples may, in its sole discretion, terminate this Exhibit, or the Master Agreement, upon at least sixty (60) days written notice to Producer.

2. **Agency**. Peoples reserves the right to act as Producer's agent to market the production dedicated hereunder while continuing to pay Producer the price set forth in this Exhibit. All other terms and conditions of the agreement shall remain in full force and effect.

3. **Title to Gas**. Producer warrants that it will have good and merchantable title to or will have the right to sell all Gas delivered under this Master Agreement and that such Gas will be free and clear of all liens, encumbrances, and adverse claims by third parties. Producer shall indemnify and hold Peoples harmless from any and all suits, claims, actions, debts, levies, accounts, damages, costs, losses, and expenses of any nature arising from or out of any adverse claims of any kind or nature asserted by any person or entity concerning such Gas, including, but not limited to any claims, suits, actions, or demands that may arise due to the nonpayment of any landowner royalties, overriding royalties, or rentals.

4. **Possession, Control, and Liability**. Title to all Gas purchased under this Master Agreement shall pass from Producer to Peoples at the Receipt Point(s). As between the Parties to this Master Agreement, Producer shall be deemed to be in possession and control of the Gas to be delivered to Peoples until

Producer delivers the Gas to Peoples at the Receipt Point(s), and Peoples shall be deemed in possession and control thereafter.

5. **Peoples' Monthly Production Statement and Payment**. On or before the last business day of each calendar Month during the term of this Master Agreement, Peoples shall: (i) send Producer a Production Statement, in either hardcopy or electronic form, reflecting the Producer Sales Volume(s) during the relevant Production Period; and (ii) make payment to Producer by check or by automated clearinghouse (ACH) direct deposit pursuant to a separate ACH direct deposit agreement.

6. **Producer's Agent**. Although the terms of this Master Agreement extend to and are binding upon all Parties hereto, their respective heirs, successors, personal representatives and assigns, in no event will Peoples remit, or be required to remit, payment to more than one (1) payee per month in exchange for the Gas produced and sold hereunder. Accordingly, Producer hereby appoints the following Agent to receive all statements and payments hereunder:

   Name: _____ (the "Agent")
   Address: _____
   _____

   The Agent is authorized to give the necessary receipts and acquaintances to Peoples and to make adjustments and settlements under this Master Agreement, and Peoples shall have no obligation with respect to, or responsibility for, the application of any Gas purchase proceeds paid to the Agent. If at any time the Agent shall resign or be discharged or shall otherwise be unable or unwilling so to act, Peoples may withhold further payment of money for purchase of Gas hereunder, without liability for interest, until Peoples is furnished by Producer with the necessary documentation (properly executed and acknowledged by all necessary parties) designating a new agent, as the case may be, to receive such payment, for all parties interested in such payment.

7. **Royalties**. In no event will Peoples be obligated to make royalty, over-riding royalty or working interest payments for Gas purchased under this Master Agreement.

8. **Regulatory Authorities**. Peoples shall use reasonable efforts to obtain the necessary regulatory approvals from the Commission to recover the prices paid to Producer for Gas purchased under this Master Agreement. If the Commission issues an order, opinion, act, regulation, or rule that prohibits Peoples from recovering as part of Peoples' Gas cost recovery proceeding the full price paid to Producer for Gas purchased under this Master Agreement, then Peoples may at any time: (i) credit the difference between the price paid for Gas under this Master Agreement and the amount permitted to be recovered through Peoples' rates against amounts due Producer; or (ii) receive a refund of such amounts directly from Producer upon request by Peoples.

9. **Taxes**. Producer shall pay or cause to be paid all taxes, fees, levies, penalties, licenses or charges imposed by any government authority ("Taxes") on or with respect to the Gas upstream of Receipt Point(s) and all Taxes at the Receipt Point(s). Peoples shall pay or cause to be paid all Taxes on or with respect to the Gas downstream of Receipt Point(s). If a party is required to remit or pay Taxes which are the other Party's responsibility hereunder, the Party responsible for such Taxes shall promptly reimburse the other Party for such Taxes. Any Party entitled to an exemption from any such Taxes or charges shall furnish the other Party any necessary documentation thereof.

10. **Service Term**. The Service Term Start Date for each individual Receipt Point shall be the latter of the _____ or the first day of the immediately succeeding Production Period in which Producer delivers Gas to Peoples at the Receipt Point. The Service Term End Date for each individual transaction shall be _____. After this initial Service Term, this Exhibit will automatically renew

from month-to-month periods unless either Producer or Peoples provides written notice of termination to the other party at least thirty (30) days prior to the expiration date. If either party terminates a Receipt Point Exhibit, the Producer will be disconnected, and the Interconnect shall be abandoned unless a subsequent Exhibit is executed within thirty (30) calendar days.

11. **Receipt Point(s)**. The Receipt Point(s), Retainage Percentage, Gathering Rate and Purchase Price shall be identified in Schedule 1 to Exhibit A-__, which is attached hereto and made a part hereof.

12. **Rates**. The rates for gathering charges are subject to the applicable tariff in effect at the time of delivery into the Peoples system. These charges are subject to change. Rates for certain qualifying incremental conventional production, and for unconventional horizontal production and landfill production shall be determined by Peoples based on supporting information provided to Peoples by the producer and in accordance with the applicable tariff. On behalf of PIOGA, Peoples will charge an optional $0.01/Mcf retention fee for Producer Sales Volumes associated with the Receipt Point(s) identified in this Exhibit; said fee will be remitted directly to PIOGA by Peoples. Producer specifically authorizes Peoples to provide the Producer Sales Volumes associated with the Receipt Point(s) identified in this Exhibit to PIOGA, in writing, on a regular basis in order to verify the remitted retention fee. Should Producer decline the optional retention fee, no Producer Sales Volumes associated with the Receipt Point(s) identified in this Exhibit will be provided to PIOGA.

    The Receipt Point(s) and applicable Retainage Percentage and Gathering Rate shall be identified in Schedule 1 to Exhibit A-__, which is attached hereto and made a part hereof.

This Exhibit shall become effective upon its execution by both Peoples and Producer and shall continue in full force and effect through the end of the latest Service Term End Date set forth herein, including any extensions thereof. The obligations of Peoples to make payment hereunder for Gas which has been delivered and the obligation of Producer to indemnify Peoples, and Peoples to indemnify Producer, pursuant hereto shall survive the termination or cancellation of the Master Agreement and this Exhibit. Peoples shall have the right to terminate this Exhibit, upon thirty (30) days advance written notice to Producer, if Gas has not flowed for the previous period of twelve (12) consecutive months, or if Peoples or its designee has caused the Interconnect facilities to be disconnected or removed.

xxxx	____% Inside F.E.R.C. First of the Month Eastern Gas Appalachia Index* $/xxx	

Peoples Natural Gas Company LLC
§ 53.53 III.E

28. Provide a statement explaining the details of firm gas purchase (long-term) contracts with affiliated and nonaffiliated utilities, including determination of costs, terms of contract, and other pertinent information.

* *

Peoples does not have any firm gas purchase contracts with an affiliate.

Peoples Natural Gas Company LLC has two long-term natural gas purchase arrangements with the nonaffiliated EQT Energy. The term of one arrangement is from December 17, 2013 through December 16, 2033. It allows Peoples to purchase a daily minimum of zero dekatherms to a daily maximum of 164,935 dekatherms. These purchases may be made at any receipt point on Equitrans' Mainline or Sunrise systems, or at other mutually agreed upon Equitrans points. The arrangement requires a minimum calendar year annual purchase of 20,000,000 dekatherms. The arrangement specifies different terms for purchases that are baseload or intra-month. For baseload purchases, Peoples must provide EQT Energy its requested daily baseload purchase quantity no later than 8:00 AM EDT, five business days before the first day of the relevant month. Only baseload purchases are permitted under the arrangement for the months of April through October. All baseload purchases are priced at "Inside FERC" Eastern Gas, Appalachia, index with no adjustment, related to the month of flow. The agreement allows Peoples to make daily intra-month calls for the months of November, December, January, February and March. The intra-month purchase provisions require Peoples to make its daily election by 8:00 AM EDT for the following day of flow, or days of flow if the next days are weekends or holidays. Intra-month quantities are priced as "Gas Daily", Eastern Gas, South Point, Midpoint, index, with no adjustment, related to the days of flow. During the months of November, December, January, February and March, Peoples pays a demand charge of $0.1746 multiplied by 164,935 dekatherms for each day of the month in consideration of the intra-month purchase option. For any day of the year, the maximum daily and baseload purchase total cannot exceed 164,935 dekatherms.

Peoples' second long-term agreement with EQT Energy has a term of April 1, 2014 through March 31, 2034. It allows Peoples to purchase a daily minimum of zero dekatherms and a daily maximum of 251,700 dekatherms. These purchases may be made at any receipt point on Equitrans' Mainline or Sunrise systems, or at other mutually agreed upon Equitrans points. The arrangement requires a minimum purchase of 15,000,000 dekatherms for periods starting with April 1st and ending March 31st of the following calendar year. The arrangement specifies different terms for purchases that are baseload or intra-month. For baseload

purchases, Peoples must provide EQT Energy its requested daily baseload purchase quantity no later than 8:00 AM EDT, five business days before the first day of the relevant month. Only baseload purchases are permitted under the arrangement for the months of April through October. All baseload purchases are priced at "Inside FERC" Eastern Gas, Appalachia, index with no adjustment, related to the month of flow. The agreement allows Peoples to make daily intra-month calls for the months of November, December, January, February, and March. The intra-month purchase provisions require Peoples to make its daily election by 8:00 AM EDT for the following day of flow, or days of flow if the next days are weekends or holidays. Intra-month quantities are priced as "Gas Daily", Eastern Gas, South Point, Midpoint, index, with no adjustment, related to the days of flow. During the months of November, December, January, February and March, Peoples pays a demand charge of $0.1746 multiplied by 251,700 for each day of the month in consideration of the intra-month purchase option. For any day of a period starting with April 1st and ending March 31st of the following calendar year, the maximum daily and baseload purchase total cannot exceed 251,700 dekatherms.

Peoples Natural Gas Company LLC
§ 53.53 IV.B

4. Provide an exhibit for each customer classification showing the following data for the test year and the four previous years:

   a. The maximum coincident peak day demand.

   b. The maximum coincident 3-day peak day demand.

   c. The average monthly consumption in MCF during the Primary Heating Season (November-March).

   d. The average monthly consumption in MCF during the Non-heating season (April-October).

   e. The average daily consumption in MCF for each 12-month period.

* *

a.b. Page 2 of this response shows the maximum peak and 3-day peak for Peoples combined divisions for the prior five years.

c.d.e. Refer to the response to Exhibit 10 Schedule 2.

Peoples Natural Gas Company LLC
Peoples Division
§ 53.53 IV.B

13. Submit the projected demands for all customer classes for both purchased and produced gas for the three years following the test year filing.

* *

Refer to Exhibit No. 3, Schedule No. 15 (53.53.III.E.14) Attachment D for FTY and FPFTY projected demands. For periods beyond the FPFTY, the FPFTY can be used as a proxy.

Peoples Natural Gas Company LLC
§ 53.53 III.E

3. Submit a schedule showing a reconciliation of test year MCF sales and line losses. List all amounts of gas purchased, manufactured and transported.

* *

Refer to Exhibit No. 12, Schedule No. 13 (53.53.IV.B.4).

Peoples Natural Gas Company LLC

§ 53.53.IV.B

14. Supply an exhibit showing the gas deliveries to each customer class for the most recent 24 month period. The exhibit should identify the source of the gas, such as ''purchased'' (pipeline), ''production'' (includes purchases from local producers), ''storage withdrawal,'' ''propane/air,'' and ''unaccounted for.''

* *

Refer to pages 2-3 which reflect the gas deliveries and gas received for the twelve months ended August 31, 2024 and August 31, 2025. The time periods reflect the same time periods as are required for the Unaccounted For Gas (UFG) filings made with the Commission.

Peoples Natural Gas Company LLC

§ 53.52(a)

6. The effect of the change on the service rendered by the utility.

* *

Services rendered by the utility will not be impacted by the changes to rates.

Peoples Natural Gas Company LLC

§ 53.53.II.A

13. Attach copies of the summaries of the projected 2 year's Company's budgets (revenue, expense and capital).

* *

Refer to the response to Exhibit No. 2, Schedule No. 4 (53.53.III.A.17) for Revenues and Expenses and Exhibit No. 19, RR-14 (VI.I.RR.14) for the Capital Budget.

Peoples Natural Gas Company LLC

§ 53.53.III.A

40. Adjustments which are estimated shall be fully supported by basic information reasonably necessary.

* *

All adjustments were based on annualizing and normalizing the 12 months ended November 30, 2025. The derivation and support behind the adjustments are shown in the following exhibits:

Exhibit 2	Income Statement
Exhibit 3	Revenues
Exhibit 4	O&M Expenses
Exhibit 5	Depreciation
Exhibit 6	Taxes Other Than Income Taxes
Exhibit 7	Income Taxes
Exhibit 8	Rate Base

Peoples Natural Gas Company LLC

§ 53.53.III.A

44. Ratios, percentages, allocations and averages used in adjustments must be fully supported and identified as to source.

* *

When ratios, percentages, allocations and averages are used in adjustments, they are identified on the appropriate exhibits.

Peoples Natural Gas Company LLC

§ 53.53.III.A

46. Supply a copy of internal and independent audit reports of the test year and prior calendar year, noting any exceptions and recommendations and disposition thereof.

* *

Internal Audit report recommendations are required to be addressed in a timely manner, and accordingly the implementation of management commitments is monitored by Internal Audit.

The response to this question contains confidential information and is contained in a separate book of the filing marked confidential information. This information will be provided to parties upon execution of a CONFIDENTIALITY AGREEMENT to be circulated by the Company pursuant to the terms of that agreement.

Peoples Natural Gas Company LLC

§ 53.53.III.E

27. Submit a schedule for gas producing units retired or scheduled for retirement subsequent to the test year showing station, units, MCF capacity, hours of operation during test year, net output produced and cents/MCF of maintenance and fuel expenses.

* *

Peoples Natural Gas Company LLC has no gas producing units retired or scheduled for retirement.

Peoples Natural Gas Company LLC

§ 53.53.III.A

41. Submit a statement explaining the derivation of the amounts used for projecting future test year level of operations and submit appropriate schedules supporting the projected test year level of operations.

* *

Exhibits explaining the derivation of the amounts used for projecting a Future Test Year (12 months ending November 30, 2026) and a Fully Projected Future Test Year (12 months ending December 31, 2027) are:

Exhibit 2	Income Statement
Exhibit 3	Revenues
Exhibit 4	O&M Expenses
Exhibit 5	Depreciation
Exhibit 6	Taxes Other Than Income Taxes
Exhibit 7	Income Taxes
Exhibit 8	Rate Base

Peoples Natural Gas Company LLC

§ 53.53.III.A

19. List extraordinary property losses as a separate item, not included in operating expenses or depreciation and amortization. Sufficient supporting data must be provided.

* *

Peoples Natural Gas Company LLC had no extraordinary property losses during the twelve months ended November 30, 2025.

Peoples Natural Gas Company LLC

§ 53.52(a)

1. The specific reasons for each change.

* *

The rate changes are being proposed to allow Peoples a reasonable opportunity to recover revenue sufficient to cover its operating expenses and increases to rate base and provide a reasonable opportunity to earn a fair rate of return.

Peoples Natural Gas Company LLC

§ 53.53.III.A

45. Provide an explanation of any differences between the basis or procedure used in allocations of revenues, expenses, depreciation and taxes in the current rate case and that used in the prior rate case.

* *

Refer to Peoples Statement No. 17, the direct testimony of John Taylor for an explanation and description of proposed changes in allocation methodologies and rate classes.

Peoples Natural Gas Company LLC
§ 53.52 (a)

(11) FCC, FERC or Commission orders or rulings applicable to the filing.

* *

On May 6 2021, the Pennsylvania Public Utility Commission approved the Joint Petition Settlement for surcredit associated with tax repair election submitted by Peoples Natural Gas Company LLC ("Peoples" or the "Company") at Docket No. P-2020-3021191. Effective for the tax year ended December 31, 2020, Peoples applied a negative percentage to the customer and base rate delivery charge under all rate schedules excluding any customer who received a discounted flexible delivery charge rate. The purpose of the surcredit is to refund the entire tax benefit of a catch-up tax deduction resulting from the Company's defining its property under the Internal Revenue Services' Treasury Regulations 1.263(a)-3 and 1.162-4. This catch-up deduction represents the difference between federal and state income tax depreciation claimed versus the repair deductions that would have been claimed for the tax years ended December 31, 2012 through March 15, 2020. The refund period was increased from a five-year period to a ten-year period, pursuant to the amendment issued at Docket No. R-2023-3044549. The amount of the tax benefit to be refunded in the extended amortization period is net of amounts already refunded prior to January 1, 2025.

On August 25, 2022, the Pennsylvania Public Utility Commission approved the Joint Application for Merger of Peoples Natural Gas Company LLC and Peoples Gas Company LLC at Docket Nos. A-2021-3029831 and A-2021-3029833. Effective January 1, 2023, Peoples Gas Company LLC was legally merged with and into Peoples Natural Gas Company LLC. The merged entity operated two separately tariffed rate divisions at the state level: Peoples Natural Gas Company LLC – Peoples Natural Gas Division and Peoples Natural Gas Company LLC – Peoples Gas Division through September 26, 2024. Effective September 27, 2024, with the approval of Peoples' base rate case filing at Docket No. R-2023-3044549, the previous separately tariffed rate divisions were merged into one tariffed rate entity, Peoples Natural Gas Company LLC.

On January 29, 2026 the Pennsylvania Public Utility Commission approved the Merger Application of PNG Gathering LLC into Peoples Natural Gas Company LLC at Docket Nos. A-2025-3056882 and G-2025-3056883. PNG Gathering is a non-utility entity that was formed when Peoples acquired Equitable Gas Company in 2013. PNG Gathering is the owner of the Goodwin/Tombaugh gathering system. When Aqua America, Inc., now Essential, acquired Peoples in 2020, Essential agreed to remediate the Goodwin/Tombaugh gathering system over a 7-year period. Under the Essential Acquisition Settlement, the parties agreed that as the Goodwin/Tombaugh plant was replaced, the plant would be transferred to Peoples and regulated by the Commission as distribution pipeline. The merger of PNG Gathering into Peoples will allow Peoples to transfer the remaining used and useful Goodwin/Tombaugh plant from PNG Gathering to Peoples' books upon final rehabilitation of the system and dissolve PNG Gathering as a separate corporate entity.

Peoples Natural Gas Company LLC

§ 53.52(b)

1. The specific reasons for each increase or decrease.

* *

The rate changes are being proposed to allow Peoples a reasonable opportunity to recover revenue sufficient to cover its operating expenses and increases to rate base and provide a reasonable opportunity to earn a fair rate of return.

Peoples Natural Gas Company LLC

§ 53.52(a)

5. The direct or indirect effect of the proposed change on the utility's revenue and expenses.

* *

Refer to the Proposed Fully Projected Future Test Year information provided in Exhibit No. 2, Schedule No. 4 (53.53.III.A.17).

Peoples Natural Gas Company LLC

§ 53.52(a)

10. Plans the utility has for introducing or implementing the changes with respect to its ratepayers.

* *

Peoples will notify its ratepayers of the proposed changes through a bill insert in compliance with the Commission's Regulations (52 Pa. Code Section 59.45).

Peoples Natural Gas Company LLC

§ 53.52(a)

7. A list of factors considered by the utility in its determination to make the change. The list shall include a comprehensive statement about why these factors were chosen and the relative importance of each. This subsection does not apply to a portion of a tariff change seeking a general rate increase as defined in 66 Pa.C.S. § 1308 (relating to voluntary changes in rates).

* *

Not applicable.

Peoples Natural Gas Company LLC

§ 53.52(a)

8. Studies undertaken by the utility in order to draft its proposed change. This paragraph does not apply to a portion of a tariff change seeking a general rate increase as defined in 66 Pa.C.S. § 1308.

* *

Not applicable.

Peoples Natural Gas Company LLC

§ 53.52(a)

9. Customer polls taken and other documents which indicate customer acceptance and desire for the proposed change. If the poll or other documents reveal discernible public opposition, an explanation of why the change is in the public interest shall be provided.

* *

No customer polls were taken to indicate customer acceptance and desire for the proposed rate changes.

Peoples Natural Gas Company LLC

§ 53.53.IV.B

6. Supply copies of all present and proposed Gas Tariffs.

* *

DEFINITIONS OF TERMS

Applicant - Any person, corporation or other entity that (i) desires to receive from the Company natural gas or any other service provided for in this Tariff, (ii) complies completely with all Company requirements for obtaining natural gas or any other service provided for in this Tariff, (iii) has filed and is awaiting Company approval of its application for service, and (iv) is not receiving from the Company any service provided for in this Tariff. An Applicant shall become a customer for purposes of this Tariff only after it actually starts receiving the applicable service(s) from the Company under this Tariff. Applicants for residential service shall be further defined as a natural person not currently receiving service who applies for residential service provided by a public utility or any adult occupant whose name appears on the mortgage, deed or lease of the property for which the residential utility service is requested.

Capacity Charge – A charge designed to recover the costs that the Company incurs to reserve capacity on interstate pipelines.

Chapter 56 – The Commission regulations that govern, among other things, metering, billing and collections for residential gas and electricity service.

City Gate – The point where interstate pipelines deliver gas into natural gas distribution company facilities.

Commission – The Pennsylvania Public Utility Commission or any lawful successor thereto that provides oversight, policy, guidance and direction to public utilities and NGSs.

Commodity Charge – A charge designed to recover the cost of producing or procuring natural gas.

Commodity Service – Service provided by the Company or a natural gas supplier which involves the purchase of gas commodity by the customer.

Company – The entity doing business as Peoples Natural Gas Company LLC.

Customer – Any person, partnership, association, corporation, or other entity (i) in whose name a service account is listed, (ii) who occupies or is the customer for any premises, building, structure, etc, (iii) is primarily responsible for payment of bills, or (iv) any adult occupant whose name appears on the mortgage, deed or lease of the property. A customer includes anyone taking Supplier of Last Resort Service and/or Distribution Service under this Tariff

Customer Charge – A monthly charge to cover such natural gas distribution company costs as maintaining the gas lines, meter reading and billing.

Daily Available Volume – The total volume of gas actually delivered to the Company for the customer's account on a particular day, less an appropriate retainage percentage plus any adjustments associated with the reconciliation of monthly volumes as set forth in Rate GS-T and Rate T.

Daily Consumption Volume – The quantity of gas estimated by the Company to be consumed by the customer on any day.

Day – A 24-hour period beginning at 10 a.m. and ending at 10 a.m. or as subsequently defined by natural gas industry standards promulgated by FERC.

Delivery Charge – A charge designed to recover the costs the Company incurs in using its distribution system or local pipelines to deliver natural gas to a customer.

Distribution Charges – Various natural gas distribution charges that may include the Delivery Charge, Capacity Charge and Gas Cost Adjustment Charge.

Distribution Service – Service provided by the Company involving the delivery of gas to the customer.

Gas Cost Adjustment Charge – The amount billed or credited each month to account for differences between projected and actual gas supply costs of the Company.

Mcf – 1,000 cubic feet of gas. This is a measure of gas usage.

DEFINITIONS OF TERMS

Natural Gas Distribution Company - A public utility that provides natural gas distribution services and which may provide natural gas supply services and other services.

Natural Gas Supplier (NGS) – An entity that has received a license from the Commission and that sells natural gas to customers that is delivered through the distribution lines of the Company.

Small Business Customer – Any commercial or industrial customer with annual consumption of less than 300 Mcf.

Storage – Placing natural gas into an underground facility for removal and use at a later date.

Supplier of Last Resort – The Company or another entity that provides natural gas supply services to customers that do not elect another supplier or choose to be served by the supplier of last resort, customers that are refused service from another natural gas supplier, or customers whose natural gas supplier fails to deliver the required gas supplies. Currently, the Company is the supplier of last resort for all Priority-One customers under the terms of this tariff. Each customer may only have one supplier of last resort.

Supplier of Last Resort Service – Service that includes both Distribution Service and Commodity Service provided by the Company in its role as Supplier of Last Resort.

(C) – Indicates change.

(D) – Indicates decrease.

(I) – Indicates increase.

CLASSIFICATION OF CUSTOMERS
TO WHOM SERVICE IS MADE AVAILABLE

Gas service is made available under the rules, regulations, and terms and at the rates contained in this tariff, based upon the use to which such gas is put and not upon volumes consumed (except where indicated), to the following classes of customers:

RESIDENTIAL CUSTOMERS

Residential customers are customers who use gas for household purposes, including single-family dwellings, boarding and rooming houses, duplex houses, private garages appurtenant to private homes or dwellings, apartments, apartment buildings, and governmental housing in which the units are individually metered. In this class the element of human welfare and comfort in a residential setting is the distinguishing test of the customer's use of gas. Each meter represents one customer.

COMMERCIAL CUSTOMERS

Commercial customers are customers who are engaged in selling, warehousing or distributing a commodity or service, including boarding homes and personal care homes, engaged in some business activity or profession, or in some other form of economic, social, or cultural activity, not primarily involving the manufacturing or processing of a product; and any non-industrial premises where one meter is serving more than one unit. If the customer's predominant usage is for natural gas-powered vehicle service, then the customer will be classified as a Commercial customer.

INDUSTRIAL CUSTOMERS

Industrial customers include customers who are engaged in a process which creates or changes raw material or unfinished materials into another form; customers who use gas for large-volume power; customers who use gas for process steam generation; and customers who use gas for any other purpose not predominantly residential or commercial.

CLASSIFICATION OF CUSTOMERS TO WHOM SERVICE IS MADE AVAILABLE

NATURAL GAS DISTRIBUTION COMPANY (NGDC) CUSTOMERS

NGDC customers are companies regulated by the Commission. Within this classification the NGDC can be acting either on its own or on its end user's behalf.

CHANGE IN CLASSIFICATION

Any customer who believes that, as a result of a change in the use of the premises served, his classification ought to be changed must contact the Company. All changes will be determined by the Company, on a prospective basis, after it has been notified of the change; however, the Company reserves the right to make changes in classification on its own initiative. The decision of the Company as to classification shall be final.

Eligibility for a particular rate schedule under this tariff and application of the appropriate monthly customer charge shall be based on a review of the customer's annual usage. This review shall not be conducted more frequently than once per year. All changes in rate schedule classification and monthly customer charges as a result of this usage review shall be implemented on a prospective basis. Rate schedule classification and the appropriate customer charge for new customers, shall be determined by the Company based on an estimate of annual usage. The Company also reserves the right to establish the appropriate rate schedule classification and monthly customer charge based on anticipated customer usage.

RATES AVAILABLE UNDER THIS TARIFF

Rate RS - Residential Service
This rate is available to residential customers throughout the territory served by the Company.

Rate CAP and Rate E-CAP
This is available to residential customers who meet the criteria as detailed in this Rate Schedule.

Rate SGS – Small General Service
This rate is available to commercial and industrial customers and NGDCs consuming less than 1,000 Mcf of natural gas service annually throughout the territory served by the Company with the exception of commercial customers qualifying under Rate NGPV.

Rate MGS – Medium General Service
This rate is available to commercial and industrial customers and NGDCs consuming between 1,000 and 24,999 Mcf of natural gas service annually throughout the territory served by the Company with the exception of commercial customers qualifying under Rate NGPV.

Rate LGS – Large General Service
This rate is available to commercial and industrial customers and NGDCs consuming more than 25,000 Mcf annually throughout the territory served by the Company with the exception of commercial customers qualifying under Rate NGPV.

Rate CER - Competitive Energy Rate
This rate is available to all customers throughout the territory served by the Company who, in the determination of the Company, meet the criteria set forth under Rate Schedule CER.

Rate GS-T - General Service Transportation
This rate offers firm transportation service for residential, commercial, industrial, and NGDC customers. Commercial, industrial, and NGDC customers that consume less than 1,000 Mcf per year are classified as Small General Service customers under this tariff. Commercial, industrial, and NGDC customers that consume between 1,000 and 24,999 Mcf per year are classified as Medium General Service customers under this tariff. Commercial, industrial, and NGDC customers that consume more than 25,000 Mcf per year are classified as Large General Service customers under this tariff.

Rate GS-SB - General Standby Service
This rate offers standby service for residential, commercial, and industrial transportation customers.

Rate NGPV
This rate offers service for natural gas powered vehicles.

Rate Schedule - Appalachian Gathering Service
This rate is available to any party desiring to deliver conventional well gas directly into the Company’s system.

Rate GL- Gas Lights
This rate offers service for any gas lighting where the gas is not measured by a meter.

EFFECTIVE: September 27, 2024

RULES AND REGULATIONS

1. APPLICATION FOR SERVICE

Applicants desiring any type of service from the Company under this Tariff shall contact the Company and specifically request the type and nature of service. Upon request, the Company will inform the customer of the identity of those NGSs offering retail service in its service territory and either provide a list of licensed suppliers or refer the customer to the Commission for further information. In any circumstance where an application to the Company for any service under this Tariff involves or is related to an NGS, such application cannot and shall not be processed by the Company unless the Applicant and/or the Applicant's NGS provides the necessary information relating to service.

A non-residential Applicant for any service under this Tariff will be required to sign an application for natural gas service, unless the Company, in its sole discretion, accepts an oral application from a non-residential Applicant. The Company shall accept an oral application from a residential Applicant except that the Company may require a written application from a residential Applicant if the Company determines positive identification or other documentation is necessary. The application information required from a residential Applicant shall include but not be limited to complete name and contact information, including all members of the household, employment information and landlord contact information, if Applicant is renting the service address. The Company may request verification of the identity of Applicant and other adult occupants of service address in the form of government issued photo ID (i.e., driver's license) or two alternative forms of identification, one of which must be a photo ID. The Company may, as a condition of furnishing service to an Applicant, require the Applicant, in accordance with applicable Commission regulations, to pay an outstanding gas service account balance, if the Company can show that the Applicant resided at, or occupied if a non-residential account, the property for which service is requested during the period of time that the outstanding balance accrued. The methods used by the Company to determine an Applicant's liability for any such previously furnished service may include reference to customer service records of the Company, including internal Company notes, service contracts, information collected from the Applicant and other members of the household in connection with any help provided by the Company in determining eligibility for and completing applications to various assistance programs. Other methods which may be used by the Company for such purposes include identity authentication services, public data and information, mortgage, deed or lease information, commercially available consumer credit reporting services, skip-tracing tools, and other methods which are or have been approved as valid by the Commission.

Upon the receipt of natural gas service, the Applicant shall become a customer of the Company. Acceptance of service by a Customer shall constitute an agreement to accept service under the Rules and Regulations of this Tariff, as amended from time to time, the orders and regulations of the Commission and the applicable laws of the Commonwealth of Pennsylvania.

The Company may decline or refuse to serve an Applicant for any of the following reasons:

i. The Applicant has failed to comply with state and municipal regulations governing gas service, including the Commission's regulations, and the approved Rules and Regulations of the Company contained in this Tariff and any supplement thereto.
ii. The Company does not have adequate facilities in place to render the service desired or if rendering such service would adversely affect service to the Company's existing Customers.
iii. The Applicant's installation of piping or gas equipment is, in the Company's judgment, hazardous, not installed by qualified personnel or of such character that safe and adequate service cannot be delivered.
iv. An extension of Company facilities is required and the Applicant refuses to pay the required contribution in-aid-of-construction as calculated in accordance with Rules and Regulations.
v. Amounts due for service to Applicant at a previous location have not been paid or covered by a payment agreement as outlined under Commission regulations.
vi. Where the requested service may need to be delivered from non-jurisdictional gathering pipeline facility.
vii. The Applicant has another source of gas supply separately delivered or available to the structure(s) or building(s) where the Company's gas service is desired, such that the gas supplied by the Company would be commingled with the separately delivered gas supply, contrary to Company policy against commingled gas.

The customer shall inform the Company in advance of any proposed additions to (or decreases in) the customer's connected natural gas load.

RULES AND REGULATION

2. CHARACTER OF SERVICE

The Company offers firm service, unless otherwise provided in this tariff.

3. RULES FOR DEPOSIT

RESIDENTIAL CUSTOMERS

A. A deposit from a Customer shall conform to the requirements of all applicable Commission regulations and statutory requirements. Deposits required by the Company for services under this Tariff shall not be based on unpaid charges for gas supply services provided by an NGS.

B. The Company may also require a security deposit from an Applicant if any of the following conditions exist:

1) The Applicant was a residential distribution service Customer of the Company whose service was terminated for any of the following reasons:
   a. Nonpayment of an undisputed delinquent account.
   b. Failure to complete payment of a deposit, provide a guarantee, or establish credit.
   c. Failure to permit access to meters, service connections or other property of the Company for the purpose of replacement, maintenance, repair or meter reading.
   d. Unauthorized use of the utility service delivered on or about the affected dwelling.
   e. Failure to comply with the material terms of a settlement or payment agreement.
   f. Fraud or material misrepresentation of identity for the purpose of obtaining utility service.
   g. Tampering with meters, including, but not limited to, bypassing a meter or removal of an automatic meter reading device or other Company equipment.
   h. Violating Tariff provisions which endanger the safety of a person or the integrity of the Company's gas delivery system.

2) The Applicant is unable to establish creditworthiness to the satisfaction of the Company through the use of a generally accepted credit scoring methodology which employs standards for using the methodology that fall within the range of general industry practice, provided that the methodology does not directly, or have the effect of, discriminating based on a protected class as set forth in the federal Equal Credit Opportunity Act.

3) The Applicant has failed to comply with any material term or condition of a settlement or payment agreement.

C. If an Applicant is required to post a security deposit, the Applicant may, in the alternative:

1) Furnish a written guaranty from a third party, which can, to the Company's satisfaction, establish credit in Applicant's favor sufficient to assure payment to the Company upon demand of an amount equal to that which would otherwise be required in a security deposit.

2) Provide income documents or other information attesting to his or her eligibility for state benefits based on household income eligibility requirements that are consistent with those of the public utility's Customer Assistance Program.

A written guaranty in a form acceptable to the Company must be received by the Company prior to commencement of utility service to any Applicant who elects the foregoing alternative to the posting of a security deposit.

3. RULES FOR DEPOSIT (continued)

D. The Company may require an existing or terminated Customer to post a security deposit in order to re-establish credit under any of the following circumstances, after giving the Customer due notice of its intention to require a security deposit in accordance with prevailing Commission regulations:

1) The existing Customer has been delinquent on any two (2) consecutive bills or three (3) or more bills within the preceding twelve (12) month period.

2) The existing Customer has failed to comply with a material term or condition of a settlement or payment agreement, as defined in applicable Commission regulations.

3) The Customer's utility service has been terminated and the Customer desires reconnection.

Notwithstanding subsection (D), the Company may not require a cash deposit from a customer who is, based upon household income, confirmed to be eligible for a customer assistance program. A customer is confirmed to be eligible for a customer assistance program by the public utility if the customer provides income documents or other information attesting to his or her eligibility for state benefits based on household income eligibility requirement that are consistent with those of the public utility's Customer Assistance Program.

E. When the Company requires a security deposit from an Applicant or Customer, the due date for the payment of such security deposit will be in accordance with the applicable Commission regulations.

F. A security deposit may be required in an amount equal to twice the average estimated monthly bill of the Applicant. This estimate shall be based upon prior consumption for like service at the subject premises, wherever available. Should the character or degree of the Customer's usage materially change, or if it is established clearly that either will materially change in the immediate future, the amount of the deposit may be adjusted at the request of either the Company or the Customer.

G. All residential deposits shall bear interest at the simple annual interest rate determined by the Secretary of Revenue for interest on the underpayment of tax under section 806 of the act of April 9, 1929 (P.L. 343, No. 176), known as the Fiscal Code. Such interest will be credited to the Customer's account at the end of each year after the date of the deposit and if return of deposit results in a credit balance on the account, the credit may be returned to customer in the form of a refund check.

H. The Company shall refund or apply to a Customer's outstanding balance any security deposit held, plus accrued interest, under the following conditions:

1) Upon discontinuance or termination of service.

2) After a Customer has paid bills for utility service in full and on time for twelve (12) consecutive months.

3) At the option of the Company, a security deposit including accrued interest may be refunded in whole or in part at any time earlier than the time stated in this Rule.

4) After the Company has held the Customer deposit for a maximum of 24 months, if none of the above conditions are met.

I. When a security deposit is refunded or applied against an existing account balance, the Company will provide the Customer with a written statement showing the amount of the deposit, the accrued interest thereon, the application of the deposit to any prior or current utility service account balance(s) and the remaining balance(s). Any refunded deposit, together with accrued interest, shall be paid to the Customer.

3. RULES FOR DEPOSIT (continued)

NON-RESIDENTIAL CUSTOMERS

A. The Company reserves the right to require a security deposit for all services to be supplied, or to require an increase in an existing deposit if there is an increase in the monthly bill for services rendered. The Company further reserves the right to apply such deposit to bills previously incurred by the Customer under the existing or any previous utility service contract with the Company.

B. A deposit may be required from a Customer in an estimated amount equal to twice the average of the three (3) highest monthly bills anticipated during the succeeding twelve (12) month period. Such estimate shall be made from the record of service rendered to the same premises during the last twelve (12) months of use, whether by Customer or by a prior occupant of the premises, adjusted to recognize the extent of the proposed use as compared with the past use thereof. If there is no prior record of service rendered to the premises, an estimated deposit shall be calculated by the Company based upon the Customer's proposed use of utility service to be provided.

C. All non-residential Customer security deposits shall bear interest at the rate of six percent (6%) per annum, without deduction for any taxes thereon. Interest will be credited at the end of each year after the date of the deposit to the Customer's account and applied against the oldest unpaid bill. Upon final discontinuance or termination of utility service, any security deposit and accrued interest remaining with respect to said discontinued or terminated account will be first applied against the unpaid account balance, if any, with the remainder to be refunded to the Customer restricted in accordance with the Customer's direction.

RULES AND REGULATIONS

4. CONNECTIONS FOR SERVICE - EXTENSION OF FACILITIES

The Applicant hereby undertakes to furnish, be responsible for, and pay the necessary costs of customer-owned service pipe, fixtures, fittings, valves, regulators, and appliances to make the necessary connections between the Company's lines and the place of consumption or the delivery point to the Applicant and keep the same in good repair, in a skillful and workmanlike manner, furnishing at his own expense said materials, and the labor, care, and supervision necessary and proper to safely conduct and burn the gas, but the Applicant shall not otherwise make changes in or interfere with said pipes and appliances and material. The arrangement and location of all piping and appliances (including meters) shall be subject to the approval of the Company, but the Company shall not be responsible in any manner for the selection, installation, maintenance, or use of said pipes and appliances, or for said labor, care, or supervisions, and shall have no duty or obligation with respect to the care, maintenance or supervision of the facilities. To facilitate this process, the Company makes available a manual entitled "Service Line Installation Standards" on its website.

The Company shall make the necessary connections between its curb cock or shutoff valve and the Applicant's service pipe, provide a meter and the necessary fittings, and connect the meter.

The meter and all pipe fittings and appliances furnished by the Company on the premises shall remain the property of the Company, and the Company shall have the right at all reasonable times to enter in and upon the premises to read, maintain, remove, change, replace, inspect, and/or reclaim the meter and associated equipment.

Meters will be installed at the Company's expense only upon request and subject to the following conditions:

a) The Company will install one (1) meter per customer service line

b) The type, size and location of the meter will be determined by the Company.

c) An individual service line shall be required for each unit of a newly constructed structure consisting of modules which can be sold or leased as and function as separate entities, and having within each such unit control of the total gas energy requirements of that unit, including all interior piping. The requirement of one meter per service line shall apply to renovations of existing structures which meet the aforesaid independency requirements and to which gas service has not been provided for a period of at least one (1) year. The requirement of one meter per service line may be waived for other structures. In this latter event, additional meters will be set by the Company, provided the customer shall bear the cost of all additional meter installations and house line alterations, and such cost of service line alterations as shall be permitted by law.

d) Outlet piping from the meter shall not pass through space or property that is or could be controlled or owned by an individual or individuals other than the customer.

RULES AND REGULATIONS

4. **CONNECTIONS FOR SERVICE - EXTENSION OF FACILITIES (continued)**

The Company will extend its facilities to a new point of delivery within its service territory if, in its judgment and consistent with Commission regulations, the service to such new point of delivery will have no adverse effect upon the availability of gas to meet the present and reasonably foreseeable volume and pressure needs of existing customers. The Company, at its discretion, may extend its distribution mains up to a distance of one-hundred fifty (150) feet on any street or highway without cost to a residential applicant(s), absent any abnormal underground conditions or unusual permitting requirements. When abnormal underground conditions or unusual permitting requirements exist, as determined by the Company, the applicant(s) will be required to pay a contribution in aid of construction (CIAC) in an amount determined by the Company. The Company may also condition the extension of facilities upon the Applicant's providing a CIAC, the amount of which will be determined by the Company and consistent with any parameters approved or required by the Commission.

If the Company requests a CIAC from an Applicant and additional customers are added to the extended facilities financed by the Applicant's CIAC within three years of the date of completion of the facilities, the Applicant who paid the CIAC will be entitled to a pro rata refund during the three-year period immediately following completion of the extension.

Any CIAC, customer advance, or other like amounts received from the customer that constitute taxable income as defined by the Internal Revenue Service may include a gross up for federal income taxes. To the extent that federal taxes are not included in the CIAC, they shall be segregated in a deferred account for inclusion in rate base in a future rate case proceeding.

Where evidence is found that Company facilities or service lines, meters, or other appurtenances on the customer's premises have been tampered with, the customer shall be required to bear all costs incurred by the Company for investigations and inspections, repairs, and for such protective equipment as, in the judgment of the Company, may be necessary. In addition, where the tampering has resulted in improper measurement of the service supplied, the customer shall be required to pay for such natural gas service, including interest at the late-payment charge rate, and all applicable costs and fees associated with collecting such charges based on the Company's estimate, from available information, of the amount of gas used but not registered by the Company's meters.

The customer shall pay the Company for any repairs to or any loss of the Company's property on the premises when such repairs are necessitated, or loss occasioned, by the willful acts or negligence on the part of the customer or failure to comply with the rules and regulations under which service is furnished.

RULES AND REGULATIONS

5. DISCONTINUANCE AND TERMINATION OF SERVICE

The authorized agents of the Company shall at all reasonable times have free access to the premises of the customer with the right to shut off the gas and remove its property from the premises for any of the following reasons: failure to permit access to meters, service connections or other property of the Company for the purpose of replacement, maintenance, repair or meter reading; nonpayment of any undisputed delinquent bills due for existing or any previous service; tampering with the meter or connections; fraudulent representation in relation to the consumption of gas; removal of Applicant from the premises; selling or delivering gas to other occupants of the premises without application to the Company; failure to make or increase any deposit; failure to provide a guarantee of payment or establish credit; want of supply or waste of gas from customer's lines or appliances; failure to comply with payment agreements; and failure to comply with or violation of Tariff Rules and Regulations. However, service may not be discontinued or terminated under any circumstances except under Commission Regulations or PA Statute(s) in effect and applicable at the time of such contemplated discontinuance.

The Company may immediately terminate service for any of the following actions by the customer: unauthorized use of the service delivered on or about the affected dwelling; fraud or material misrepresentation of the customer's identity for the purpose of obtaining service; tampering with meters or other public utility's equipment; or violating tariff provisions on file with the Commission so as to endanger the safety of a person or the integrity of the public utility's delivery system. Upon termination for such reasons, the Company will make a good faith attempt to provide a post termination notice to the customer or a responsible person at the affected premises, and, in the case of a single meter, multiunit dwelling, the Company will conspicuously post the notice at the dwelling, including in common areas when possible.

Unless otherwise authorized by the Commission, after November 30 and before April 1, the Company will not terminate service to residential customers with household incomes at or below 250% of the federal poverty level except for: 1) customers whose actions are grounds for immediate termination, as described above, and 2) any person receiving gas service as a User without Contract. The Company will use financial information from the customer provided within the most recent twelve month period to determine if a customer exceeds the 250% federal poverty level.

The Company may terminate service for nonpayment of billings for service provided under this tariff or for NGS supply charges purchased by the Company under the purchase of receivables provisions set forth in Rate SBS of the Company's Supplier Tariff.

If service is terminated, the same customer, whether an Applicant or customer as defined in the Commission's regulations or PA Statutes, shall pay a reasonable turn-on fee for resumption of service at the same address after termination. The turn-on fee for Residential customers is $56. This fee is waived for customers at or below 150% of the federal poverty level. The turn-on fee for Commercial customers is $114. The turn-on fee for Industrial customers shall be an amount equal to the customer charge for each month of the intervening period since service was terminated.

Upon discontinuance or termination of service, the customer or its agent shall be responsible to winterize the premises to withstand winter conditions, which actions may include, but not limited to, draining plumbing systems, adding insulation and alternative heating units. The Company shall not be responsible for any damages resulting from the customer, or its agent, as a result of a failure to winterize the property.

The Company reserves it rights to use any and all remedies at law to collect any outstanding debts, including, but not limited to, filing a Complaint in civil court seeking a judgment of record for the debt, with interest and recovery of court costs, attorneys' fees and other collection expenses incurred in the process.

6. TERMINATION OF CUSTOMER'S CONTRACT

In case a writ of execution shall be issued against a customer, or in case the premises described or referred to in the contract as the place at which gas is to be delivered or consumed, or the personal property upon said premises shall be levied upon under execution, or in case of any acts of assignment, filing of involuntary or voluntary petitions in bankruptcy, or any action in court for the reorganization of any corporation, partnership, or other customer, the contract, at the option of the Company, shall cease and terminate, and all claims for retail or transportation service previously provided or amounts purchased from a NGS through the purchase of receivables provisions set forth in Rate SBS of the Company's Supplier Tariff shall become forthwith due and payable without notice from said Company to the extent permissible under applicable bankruptcy statutes and Commission regulations.

RULES AND REGULATIONS

7. LEAKS AND WASTE

The customer shall use all due care to prevent a waste of gas. It is the responsibility of the customer to exercise all due care in the detection of defects and leaks, and in case of failure or deficiency of gas, leakage, excess pressure, or other dangerous developments incident to the handling of gas under pressure, the customer agrees to give immediate notice thereof to the Company, and his failure to do so, should loss follow, shall be conclusive evidence of his contributory or comparative negligence.

8. NONLIABILITY OF COMPANY/LIMITATION OF LIABILITY

The Company does not guarantee continuous, regular and uninterrupted supply of service. The Company may, without liability, interrupt or limit the supply of service for the purpose of making repairs, changes, or improvements in any part of its system for the general good of the service or the safety of the public or for the purpose of preventing or limiting any actual or threatened instability or disturbance of the system. The Company is also not liable for any damages due to accident, strike, storm, riot, fire, flood, legal process, state or municipal interference, or any other cause beyond the Company's control. The Company shall not be liable for any injury to person or property arising from the use of gas by or the supply of gas to the Customer which is not the result of negligence solely on the part of the Company.

In no event shall the Company be liable for incidental, indirect, special or consequential damages, including loss of use or profit or loss of business. The liability of the Company to customers or other persons for damages other than incidental, indirect, special or consequential damages, including loss of use or profit or loss of business shall in no event, unless caused by the willful and/or wanton misconduct of the Company, exceed an amount in liquidated damages equivalent to the greater of $500 or two times the charge to the customer for the service affected during the period in which the damages occurred. These limitations shall apply whether the claim is pleaded in contract or in tort, including negligence and strict liability in tort.
The Company makes no warranty as to merchantability or fitness for a particular purpose, express or implied, by operation of law or otherwise. To the extent applicable under the Uniform Commercial Code or on any theory of contract or products liability, the Company limits its liability in accordance with the previous paragraph to any Customer or third party for claims involving and including, but not limited to, strict products liability, breach of contract, and breach of actual or implied warranties of merchantability or fitness for an intended purpose.

For the purposes of this Rule, all pipe, fittings, and appliances, and associated materials/equipment on the customer's side of the curbstop or shutoff valve, or the property or lot line if there is no curb valve, of the service pipes which connect with the Company's main line are the property and responsibility of the customer, and in no event shall the Company be liable for any injury to person or property arising there from.

9. MEASUREMENT OF GAS

All gas delivered shall be measured by meter. The term "Mcf," as used in the Company's schedule of rates, shall mean 1,000 cubic feet of gas at no more than 8 ounces above an assumed atmospheric pressure of 14.4 pounds at whatever temperature the gas may be during the period of measurement. If gas is supplied from a low-pressure distribution system in which the pressure of the gas is regulated not to exceed 8 ounces, the measurement will be at whatever pressure the gas may be during the period of measurement. If gas is delivered from a high-pressure system, measurement will be corrected to a pressure base of 14.73 psia. If measurement is corrected for temperature, measurement will be corrected to 60ºF.

All meters shall be owned by the Company. All such meters and any regulators installed in connection therewith shall be open to inspection at reasonable times by both the Company and the Customer for the purpose of seeing that they are in good condition. If, at any time after installation of any meter or regulator, conditions change so that its location becomes unsuitable, the Company shall have the right to move the meter or regulator to a suitable place at the expense of the Customer or property owner. The measurement of gas by meter shall be conclusive on the customer and the Company, excepting that from the time the meter is found to be defective or ceases to register, until the meter is repaired, the gas delivered shall be estimated by the average of another meter, or by the amount delivered by meter during a previous corresponding period under similar conditions. In the event of the customer's dissatisfaction with the registration of the meter, the Company will, upon request, accompanied by the fee specified in the regulations of the Commission, have the same removed, sealed, and tested and results of the test given to the customer upon request. If the meter so tested shall be found to be inaccurate within the limits specified in the regulations of the Commission, the Company shall refund the charge for such test.

RULES AND REGULATIONS

10. BILLING AND PAYMENT

No entity providing billing may share or use information concerning individually negotiated rates of a customer, which has been acquired only through the entity's role as a billing agent, with another customer or any third party without the prior written authorization of the Company. The Company shall offer a separate payment option for residential customers to equalize monthly payment amounts.

No entity providing billing may share or use information concerning individually negotiated rates of a customer, which has been acquired only through the entity's role as a billing agent, with another customer or any third party without the prior written authorization of the Company. The Company shall offer a separate payment option for residential customers to equalize monthly payment amounts.

Billing Options
The Company will offer two billing options: (1) the issuance of a bill by the Company which contains the NGS charges; or (2) the issuance of a bill that contains only the Company's charges, in which case the NGS will bill the customer separately for NGS charges. The right of a customer to receive a separate bill from his/her NGS for the NGS' charges is subject to the ability of the NGS to provide a separate bill and the terms under which the NGS may offer to provide a separate bill.

Allocation of Payments
Under billing option (1), the following order for the application of partial payments shall apply to all residential customers and to non-residential customers unless the contract between the non-residential customer and the NGS provides for a different method:

a. Pre-existing Company balance;
b. Current Company charges;
c. NGS charges;
d. Non-basic service charges (including but not limited to warranty charges);
e. Hardship energy fund contribution.

Residential and Commercial Customers

Bills will be rendered and be payable once each month. Amounts due for gas services must be made using US currency in one of the following formats: cash at a valid payment center, credit card, debit card, atm card, or personal check, business check, or money order issued by a properly licensed financial institution, or other commercially acceptable form of payment as determined by the Company. The Company strives to read the meter once every month, but may read every other month. As to any customer whose meter is read once every two months, the volumes consumed for the first month of each bimonthly meter reading period shall be determined by estimation, on the basis of the customer's previous service, adjusted for weather conditions, and the volumes consumed for the second month of each bimonthly meter reading period shall be determined by subtracting the first month's estimated volumes from the total actual volumes consumed or delivered for the bimonthly period as shown by the meter. The bill for each month shall be the result of applying to the volumes consumed or delivered, the applicable rates, charges, and penalties (if any) set forth in this tariff.

Upon request, the Company will supply any customer with an option upon which he may record his meter reading at the end of the first month of each bimonthly meter reading period, and if such reading is received by the Company within two days after the close of such billing month, the bill for such month will be computed from the meter reading provided by the customer instead of by estimate. The Company will adjust estimates of bills for changes in conditions of which it has been notified in advance by a customer.

A bill will be rendered to each residential and commercial customer on account of each meter. Bills will be rendered as nearly as possible on the same day of every month and shall be payable upon presentation. The Company reserves the right to reassign customers into a different billing cycle and the timing of the issuance of the monthly bill may be altered. A bill shall be deemed delinquent if it is not paid by the due date. The due date for residential and commercial customers shall be twenty (20) days after the date of mailing the bill unless the Company agrees to an extension. Delinquent residential accounts shall be subject to a late-payment charge of one and one-half percent (1 ½%) per month for bills not paid within five days after the due date. Delinquent commercial accounts shall be subject to a late-payment charge of one and one-half percent (1 ½%) per month. Late-payment charges will be based on delinquent charges for services

RULES AND REGULATIONS

10. BILLING AND PAYMENT (continued)

provided under this tariff or for NGS supply charges purchased by the Company under the purchase of receivables provisions set forth in Rate SBS of the Company's Supplier Tariff. Payment of bills may be made at authorized collection offices or agencies of the Company during the regular business hours thereof. Payment may be deemed to have been made on the date it is received at any such office or, if remittance is made by mail, on the date of the official U.S. Postal Service postmark.

Industrial Customers

Bills will be rendered and be payable once each month. A bill will be rendered to each industrial account. Bills will be rendered as nearly as possible on the same day of every month and shall be payable monthly upon presentation. The Company reserves the right to reassign customers into a different billing cycle and the timing of the issuance of the monthly bill may be altered. An industrial customer's bill shall be deemed delinquent when it remains unpaid after the payment due date specified on the bill. A payment received from a customer owing a previous balance shall be applied first to the previous balance and only after such previous balance has been fully paid shall any balance of the payment be applied to the current bill. Industrial accounts shall be subject to a late-payment charge of two percent (2%) per month if the bill is not paid in its entirety on or before the payment due date specified on the bill, which shall be fifteen (15) days after the date of mailing the bill. Late-payment charges will be based on delinquency charges for services provided under this tariff or for NGS supply charges purchased by the Company under the purchase of receivables provisions set forth in Rate SBS of the Company's Supplier Tariff.

Final Bill

At the time the Company receives a notice, which notice must be received at least seven days in advance, to discontinue service. The Company may estimate the final reading if the Company's actual read parameters have been met in previous months. Upon request, the customer may submit a customer meter reading, or request the Company read the meter., The Company will read the meter if the two customer readings are significantly different. The Company will inform the customer that if they elect the customer meter reading and the customer fails to provide the Company with an acceptable reading in a timely manner, the Company may estimate the final meter reading. The Company will make reasonable efforts to obtain actual meter readings: (a) when the Company has insufficient data to estimate the Customer's usage; (b) when, in the case of a transfer of service, disconnect and reconnect orders are executed on different days; and (c) when the customer, at least seven days prior to the disconnect order date, specifically requests that the meter be read. The Company reserves the right to establish a Customer's usage for a final bill whenever the Company is unable to gain access to its meter on the disconnect order date. The Company will accept meter readings from customers for final bills if the customer reading is provided in a timely manner and if, upon review, the Company finds the customer reading to be reasonable and consistent with prior usage levels. Notwithstanding the foregoing, the Company may not discontinue service unless in compliance with the Rules, Regulations or Orders of the Pennsylvania Public Utility Commission pertaining thereto and in effect at the time of such discontinuation.

Dishonored Payment

If the Company receives a negotiable instrument from an Applicant or customer as payment of any bill, charge or deposit due, and if the instrument (including electronic payment) is subsequently dishonored or is uncollectible for any reason, the Company may charge the Applicant or customer a fee of $26.

11. AUTHORITY OF AGENTS

No agent or employee of the Company has authority to make any promise, agreement or representation not consistent with this Tariff.

RULES AND REGULATIONS

ADDITIONAL RULES FOR RETAIL CUSTOMERS ON LINES OUTSIDE OF DISTRIBUTION SYSTEMS (RULES 12-14)

12. CONDITIONS UNDER WHICH SERVICE WILL BE RENDERED

Applications for service from a transmission, gathering, or storage line outside of the Company's distribution system will not be accepted unless such line is being operated in a manner which will permit gas to be served to the Applicant without interference with the Company's operation. Applications will be accepted only with the understanding that the use or manner of use of the Company's line from which gas is to be supplied is not permanent and that service to the Applicant is subject to temporary or absolute change or discontinuance at the sole discretion of the Company which may at any time remove, repair, or change the use or manner of operating said line after having first canceled the service contract with the Applicant by thirty days written notice to him. The customer agrees that the Company shall have the right to discontinue service for any such reason or in accordance with any other published rule or regulation of the Company, and the customer further agrees that during the term of service the Company shall not be liable for any deficiency in the supply of gas caused by the use of compressing stations, breakage of lines, or other causes or for any claim for damages on account of any matters set forth in this paragraph, subject to the terms and conditions of Rule 8 of this tariff. Every Applicant must obtain adequate and suitable written rights-of-way and regulator sites, and permit copies thereof to be made before the Company will make any tap or connection for service or install any regulating apparatus for Applicant.

13. CONNECTION FOR SERVICE AND RESPONSIBILITY THEREFOR

The Company will furnish gas service from a transmission, gathering, or storage line, subject to the conditions of Rule 12, Rule 14, and its other rules and regulations, at the varying pressures at which the line is operated from time to time. The Applicant assumes all risks from variation in pressure, defects in pipe, connections, and appliances, from the escape and leakage of gas, from the sticking of valves and regulators, and from the burning of gas on his premises and like causes incident to the use of gas. The Applicant shall provide at his own expense and risk the necessary service line from the place of consumption or other mutually agreed upon delivery point to a point designated by the Company near the Company's pipe line from which gas is to be supplied for safely conducting the gas from the stop or shutoff valve on the connection which the Company will make with its pipe line to the place of consumption or other mutually agreed upon delivery point.

14. COST OF CONNECTION

The Company will at its own cost tap its line and furnish and lay a service line terminating with a stop or shutoff valve at or near the point designated by it under Rule 13. Connection for service will be made under Rule 4.

RULES AND REGULATIONS

SPECIAL RULES APPLICABLE TO INDUSTRIAL CUSTOMERS (RULE 15-16)

All service to industrial customers is made subject to the following special rules. The foregoing rules are also applicable to such service unless inconsistent with the following rules.

15. METERS AND REGULATORS

All gas delivered to the customer shall be delivered at and measured by a standard meter to be placed by the Company upon the customer's premises or at another delivery point, as determined by the Company. The said meter or meters and any necessary regulators shall be owned by the Company, and the Company shall pay the cost of keeping the meters and regulators in repair; customer will furnish and maintain suitable building or buildings for same but said meters and regulators shall be at all times open to inspection of both the Company and the customer for the purpose of seeing that they are in a condition of good repair. The customer, or owner of the property where the meter is located, shall not construct any structure(s) on, or around the meter, or permit any obstruction that blocks or encumbers access to the meter. In the event a meter is obstructed, and the Company is unable to obtain access, the Company may take necessary action to obtain access to the meter and the Company shall not be liable for any damage or loss to the property of the customer or the property owner.

All meters shall be owned by the Company and said meters and any regulators in connection therewith shall be at all times open to inspection by both the Company and the customer for the purpose of seeing that they are in condition of good repair. The meter providing service to the customer's premises shall be placed on the property located on the premises. Any meter located on property owned by a third-party who is not the customer or the owner of the real property where the premises is located, shall be relocated to an appropriate location that complies with this Rule.

16. RESPONSIBILITY FOR FIRE, EXPLOSIONS, AND FAILURE OF SUPPLY

The Company shall not be responsible for any lines laid beyond the meter; shall not be held liable for any damage or loss to person or property resulting from explosions or fire or from use of gas in the works of the customer; and shall not be liable for failure to furnish a sufficient supply of gas or for failure to transport the customer's gas to the customer for his purpose arising from any cause not the result of the willful and/or wanton misconduct of the Company, subject to the terms and conditions of Rule 8 of this tariff.

17. EMERGENCY CURTAILMENT

This rule has been adopted pursuant to regulations of the Commission set forth at Pa. Code §§59.71 – 59.75 entitled 'Gas Emergency Plans'.

The definitions for terms used in this Rule 17 shall be shown in Appendix A hereto.

An emergency exists whenever the aggregate demand of firm service customers on the Company's system or confined segment of the system exceeds or threatens to exceed the gas supply or capacity that is actually and lawfully available to the Company to meet the demands, and the actual or threatened excess creates an immediate threat to the Company's system operating integrity with respect to Priority-One customers. If this occurs, the Company may require each commercial and industrial customer, who is not a Priority-One customer, to reduce its consumption of gas. The reduction required shall be determined by the Company without regard to priorities of use, as necessary to minimize the potential threat to public health and safety; however, the authorized volume shall provide only the minimum volume of firm service necessary for the prevention of damage to plant equipment.

As part of the emergency planning process, the Company shall attempt to make every responsible effort to make contractual or informal arrangements with their sales Customers, transportation Customers, and others to obtain supplies or, as an alternative, to implement voluntary and/or mandatory usage reductions so that resorting to firm service.

RULES AND REGULATIONS

17. EMERGENCY CURTAILMENT (continued)

reductions or curtailments under applicable Commission regulations can be avoided, and severe supply or capacity disruptions can be mitigated. The Plan is designed to minimize the potential for supply shortfalls that threaten public health and safety, not to make up for inadequate performance by individual parties.

When all other service has been curtailed except for Priority-One service and the Company continues to be unable to meet Priority-One requirements, the Company shall exercise its judgment as to any further curtailment that may be necessary and shall utilize measures designed to minimize harm to customers if curtailments to plant protection use are found to be necessary.

The Company will specify in a notice of emergency curtailment the authorized daily consumption until further notice. An emergency curtailment may be made after oral notice to the customer effective when so given and confirmed in writing within 48 hours thereafter.

If a customer exceeds its authorized consumption during a period of emergency curtailment, then a customer shall be subject to penalties as set forth below:

Actual Usage as a Percentage of Emergency Authorized Consumption	Penalty for Excess Takes (in Dollars Per Mcf)
Greater than 103%, but not in excess of 110%	The higher of $10 per Mcf or 110% of the highest cost gas supply purchased by the Company during the month of usage.
Greater than 110%	The higher of $25 per Mcf or 125% of the highest cost gas supply purchased by the Company during the month of usage.

The Company shall have the right to waive any penalty for unauthorized use of gas.

The number of days of emergency curtailment multiplied by the authorized daily consumption volume shall be the customer's authorized consumption for the emergency curtailment period. The Company will determine actual consumption during the emergency curtailment period by actual measurement at the beginning and end of the emergency curtailment.

Utility Liability

The Company may restrict or discontinue service in accordance with 52 PA Code, Sections 59.72 through 59.75 of the Emergency Plan Regulations without thereby incurring any penalty or liability for any loss, injury or expense that may be sustained by the Customer, except when the restriction or discontinuation of service is as a result of the Company's willful or wanton misconduct.

The Company's liability for actions taken under 52 PA Code, Section 59.73, or pursuant to any other regulation, policy statement, directive or Order issued by the Commission, or an emergency order issued by the Governor, shall be governed by the following principles:

RULES AND REGULATIONS

17. EMERGENCY CURTAILMENT (continued)

1) If the Company appropriates natural gas during an emergency action, the Company will compensate the applicable entity, whether the Customer or the Customer's NGS, for the cost of lost, firm gas service. The compensation, in the aggregate, shall equal but not exceed the greater of the city gate cost of the appropriated natural gas, including transportation charges up to the Company's city gate, or the reasonable cost actually paid by the Customer for delivered substitute energy, as documented to the Company. The Company may provide compensation in kind only at the discretion of the affected Customer or NGS.
2) The Company will have the right to discontinue service, for the duration of an emergency, to a Customer that continues to take gas in violation of these rules.

Discontinuance of Service and Curtailment

When the evidence available to the Company reasonably indicates that a customer is using gas in violation of this rule or an order of the Commission, the Company will discontinue all service to such customer unless the use causing such violation is discontinued within ten days after written notice from the Company. This provision shall not affect the Company's right or obligation to discontinue service under other provisions of this tariff, the rules and regulations of the Pennsylvania Commission, or for any other lawful right or reason. The Company will inform the Commission of any termination pursuant to this rule.

RULES AND REGULATIONS

17. EMERGENCY CURTAILMENT (continued)

Appendix A to Rule 17

DEFINITIONS FOR TERMS USED IN EMERGENCY CURTAILMENT

1. Alternate Fuel: Any fuel other than natural gas.

2. Alternate Fuel Capability: The installed and operable ability to use any fuel other than natural gas on a time sensitive basis.

3. Commercial Use: Gas usage by customers engaged primarily in the sale of goods or services including but not limited to consumption by office buildings, institutions, and governmental agencies.

4. Critical Uses: Gas usage where natural gas is the only feasible form of energy due to its combustion characteristics, controllability, or chemical properties.

5. Essential Human Needs Use: Gas usage by customers for service to any buildings where persons normally dwell, including but not limited to residences, apartment houses, dormitories, hotels, hospitals, and nursing homes.

6. Firm Service: Natural gas service offered to consumers under tariffs or contracts that anticipate no interruption.

7. Industrial Use: Gas usage by customers engaged primarily in a process which creates or changes raw or unfinished materials into another form or product, including the generation of electric power.

8. Interruptible Service: Natural gas services that can be temporarily discontinued under terms and conditions specified by tariff or contract.

9. NGDC: Natural gas distribution company.

10. NGS: Natural gas supplier.

11. Noncritical Use: Gas usage where natural gas is not the only feasible form of energy, that is, where the user has alternate fuel capability.

12. Plant Protection Use: Minimum usage of natural gas required to prevent physical harm to an industrial or commercial consumer's facility, or danger to personnel at the facility when such protection cannot be afforded through the use of an alternate fuel. Plant protection use includes usage necessary for the protection of the material in process as would otherwise be destroyed, but does not include deliveries required to maintain production.

13. Residential Use: Gas usage in a residential dwelling or unit for space heating, air-conditioning, cooking, water heating, or other domestic purposes.

RULES AND REGULATIONS

18. PRIORITY OF SERVICE CURTAILMENT

Upon issuance of an order to initiate priority-based curtailments, the available gas supplies to the Company shall be allocated among its customers in accordance with the priorities of use listed below. Customers in higher priority will not be curtailed until all customers falling into the lower classifications have been completely curtailed; where only partial curtailment of any one classification is required, the implementation of curtailment shall be prorated, to the extent possible under the circumstances, based upon recent consumption data. The ability to curtail a Priority-One customer is not affected by whether the customer pays for standby service under Rate GS-SB. Following are the priority categories and subcategories listed in descending order. Small commercial and industrial customers as described below are those customers that use less than 25,000 Mcf per year. Large commercial and industrial customers as described below are those customers that use 25,000 Mcf per year or more:

1. a. Residential.
1. b. Firm critical commercial essential human needs.

2. a. Firm small commercial requirements, excluding critical essential human needs requirements in category 1., firm large commercial and industrial requirements for plant protection, and operational facilities of electric distribution companies.

2.b. Firm small industrial requirements.

2.c. Firm large critical commercial and industrial requirements, excluding firm critical commercial essential human needs requirements in category 1 and excluding firm large commercial and industrial requirements for plant protection in category 2.

2.d. Firm large noncritical commercial and industrial requirements other than requirements for boiler fuel use.

2.e. Firm large noncritical commercial and industrial requirements for boiler fuel use.

2.f. Contractually interruptible use.

19. SALES OF GAS FOR RESALE

All gas sales to residential customers are to the ultimate purchaser and are not to be resold for profit.

20. SERVICE AGREEMENT & FLEXIBLE RATES

Service agreements for delivery services are not required unless the customer has negotiated a delivery rate less than the maximum rate. When a service agreement is required, an agreement for a minimum of one year must be executed by each Applicant as a condition to receiving delivery service, unless the Company agrees to a shorter term. The Service Agreement, when required, shall include but not be limited to: 1) the point(s) at which the Company will receive customer's gas; 2) the points at which the Company will deliver customer's gas to customer's facilities; 3) maximum daily volumes and annual delivery service volumes. Delivery of gas will not begin until a Service Agreement is fully executed.

Specific components of a customer's rate may be lowered or waived if such an adjustment is required to meet competition from an alternative fuel source (including electricity), for economic development purposes, for service to new facilities, or for existing customers that install new technologies utilizing natural gas such as but not limited to: fuel cells, gas heat pumps and cooling, and Combined Heat and Power (CHP) project(s). Determination of eligibility for a flexible rate will be made by the Company and execution of a contract by the customer. When the discount is based on competition from an alternative fuel source, the customer will be required to certify the existence of the alternative fuel source. Electricity delivered by an electric distribution company shall constitute a competitive alternative. Prior to flexing distribution charges for distribution service customers, the Company may reduce charges that are for recovery of balancing charges, and/or the retainage percentage applied to the gas received on behalf of the distribution service customer. **(C)**

(C)-Indicates Change

RULES AND REGULATIONS

SPECIAL RULES APPLICABLE TO ALTOONA AND JOHNSTOWN AND VICINITY (Rules 21 and 22)

21. CONNECTION FOR SERVICE

In the city of Altoona, Blair County, and the city of Johnstown, boroughs of Ferndale, Westmont, Lorain, Dale, Southmont, and townships of Lower Yoder, Upper Yoder, and Stony creek, and vicinity in Cambria County, and not elsewhere, the following rule has been adopted and is applicable in place of Rule 4 above: The meter and all pipes, fittings, and stop cocks furnished by the Company on the premises shall remain the property of the Company which shall have the free right and privilege of ingress and egress at all reasonable times, to lay, maintain, inspect, operate, repair, and finally reclaim its property and for reading and change of meters.

22. LEAKS AND WASTE

In the city of Altoona, Blair County, and the city of Johnstown, boroughs of Ferndale, Westmont, Lorain, Dale, Southmont, and townships of Lower Yoder, Upper Yoder, and Stonycreek, and vicinity in Cambria County, and not elsewhere, the following rule has been adopted and is applicable in place of Rule 7 above: The customer shall use all due care to prevent waste of gas. It is the responsibility of the customer to exercise all due care in the detection of leaks and defects in the service pipes, meter, fittings, and stop cocks on the customer's premises and in case of failure or deficiency of gas, leakage, excess pressure, or other dangerous developments incident to the handling of gas, the customer agrees to give immediate notice thereof to the Company at its office and to take the necessary precaution to prevent explosion and fire, and the failure of the customer to do so, should loss or injury follow, shall be evidence of the customer's negligence and shall relieve the Company from liability for such loss or injury.

23. ORDER OF GAS DELIVERIES THROUGH THE METER FOR BILLING PURPOSES

For purposes of billing more than one type of service provided by the Company to a customer through one meter, the following order of application of rates shall be used:

a. Rate GS-T

b. Firm Retail or Standby

c. Rate CER

24. OPERATIONAL FLOW ORDERS

To the extent the Company issues an operational flow order (OFO) pursuant to Rule 4 of its Supplier Tariff, a transportation customer shall comply (or direct its NGS to comply) with the same OFO conditions, including the penalty provisions, outlined in the Company's Supplier Tariff Rule 4. The Company may waive the penalties applicable under the Company's Supplier Tariff Rule 4, for transportation customers.

RULES AND REGULATIONS

25. SELECTION OF NGS

a. When the Company receives notice that a customer has elected to switch NGSs or to return to the Company's Supplier of Last Resort service, the Company shall initiate the confirmation procedure described herein. Such changes shall coincide with the start of customer's billing cycle.

b. Customers can obtain information at any time on the ability to select an NGS other than the Company by contacting the Company via letter, phone, e-mail, or by visiting the Company's internet web site. The Company will also periodically mail to customers information on the opportunity to choose an alternate supplier.

c. Disclosure Requirements: If a customer selects an NGS, the customer should note that the NGS is required pursuant to the Commission's Customer Information Disclosure Guidelines at Docket No. M-00991249F0005, to disclose certain information to the customer, including but not limited to, agreed-upon pricing in the Company's standard pricing unit, conditions of pricing availability, the length of the agreement, cancellation provisions, and the three-day right of rescission.

d. Selection and Set-up: The customer, or person or entity that is authorized to act on the customer's behalf, should contact their chosen NGS to initiate the request. When a customer, person or entity authorized to act on the customer's behalf contacts the Company with a request, the Company will inform such party to contact the NGS directly. After the Company has received notification from the NGS of the customer's request, the Company shall mail out a confirmation letter to the customer by the end of the next business day after the date the Company receives notification by the NGS of the new customer, asking the customer to notify the Company if information in the confirmation letter is inaccurate. Such confirmation letter shall include the customer's NGS, the applicable billing option, the approximate date when service from the new NGS will begin and the date that the first bill will be mailed, and notification that service may be terminated for failure to pay NGS supply charges. The confirmation letter also shall include the notice of a five (5) day waiting period in which the request may be cancelled by the customer before the change of the NGS takes place. The five (5) day waiting period shall start on the day the confirmation letter is mailed.

Should the Company receive notification from customer within the five (5) calendar days required under the confirmation letter that customer's gas service or gas supply election as described by the NGS is in error, the Company shall so notify the NGS. In case of notification by customer of such error, the Company shall continue billing customer under customer's current billing arrangement. Should the Company receive notification from customer that customer's gas service or gas supply election as described by the NGS is in error, but not receive such notification within the five (5) calendar days period, the Company shall advise the customer to contact the NGS to request cancellation and if requested by customer the Company will treat this as an alleged slamming complaint under Rule 26.

Should the Company receive notification by more than one NGS within a one-month period that the customer has elected said NGS to supply customer's natural gas, the Company shall proceed with the confirmation process using the first NGS which notifies the Company, unless the customer informs the Company such NGS is in error.

RULES AND REGULATIONS

26. COMPLAINT PROCEDURES

a. General Complaints - Inquiries and complaints from any customer will be received and processed in a timely manner. Residential customer inquiries and complaints will be handled in conformance with Chapter 56 of the Commission's Rules. When a customer inquiry or complaint relates to services provided by an NGS, the Company will refer the customer to the NGS for a responseIf a customer is dissatisfied with the Company's response, or indicates dissatisfaction with the NGS's response to the customer with respect to the NGS's services, the Company will inform the customer of the right to file an informal appeal with the Bureau of Consumer Services (BCS) at the Commission and provide the customer with the toll-free telephone number and mailing address of the Commission.

RULES AND REGULATIONS

27. REQUEST FOR INFORMATION

a. Upon customer request, the Company shall provide to its residential and small business customers appliance energy efficiency information that is readily available to the Company.

b. Upon request, the Company shall provide to a residential or small business customer or the customer's designee, historical billing data, to the extent such information is readily available on Company's billing system. Historical billing data shall be conveyed in Mcf, and associated charges for the current billing period, and for the year preceding the current billing period. The initial request per year shall be provided at no charge to customer.

28. RELEASE OF CUSTOMER INFORMATION

a. The Company shall notify residential and small business customers of its intent to release private customer information before it releases such information to a third party, excluding those instances noted below in paragraph (c). The notification to customer shall provide a convenient method of notifying the Company of the customer's desire to restrict the release of the private information. Customer shall be permitted to restrict information as specified in this section by returning a signed form, orally or electronically. If the customer changes its election on the restriction of the release of information, the customer must inform the Company in a signed form. The Company shall use its best efforts to ensure that any request or a change in request for restricted information be processed in a timely and expeditious manner.

For all other customers, the Company will not disclose customer information to a third party, excluding those instances noted below in paragraph (c), without the consent of the customer.

Nothing herein shall preclude the Company from releasing aggregated customer information or non-private customer information to a third-party.

b. Residential and small business customers may request that the release of its private information be restricted based on one of the following two restrictions:

i. Restrict the release of only the customer's historical billing data in the Company's standard pricing unit, or

ii. Restrict the release of all private customer information including name, billing address, service address, rate class, rate sub-class, account number and historical billing data in the Company's standard pricing unit.

If customer does not choose to restrict the release of information based on one of the two restrictions above, then all of the customer's private information may be released to a third party except for the telephone number. Telephone numbers may not be released to third parties under any circumstances.

iii. Nothing in this section prohibits the Company from performing its mandatory obligations to provide natural gas service as specified in the disclosure statement and in the Public Utility Code.

c. The Company may release private information to (i) law enforcement officers, as part of a legal process (such as in response to a warrant, subpoena, or grand jury investigation issued by a court or governmental agency); (ii) to contractors providing utility-related services on behalf, of Peoples, but only to the extent necessary to render the service and subject to confidentiality and security obligations; (iii) to governmental agencies with jurisdiction over Peoples, when they require such information; (iv) to a third-party bill payment company, for the sole purpose of facilitating electronic payments to a natural gas account as requested by a customer; (v) to others as required by court order or by applicable laws, rules, or regulations governing Peoples; and (vi) to credit reporting agencies, and to collection agencies (if a natural gas account is assigned for collection).

RULES AND REGULATIONS

28. RELEASE OF CUSTOMER INFORMATION (continued)

d. The Company will retain Personal Information for as long as is reasonably necessary to meet its business needs and regulatory and compliance obligations.

29. AUTHORIZATION

A customer may identify persons authorized to make changes to the customer's account. To accomplish this, the customer must provide the Company with a signed document identifying, by name, those persons who have the authority to initiate any change to the customer's account, including a change of the customer's NGS.

30. RULES PART OF CONTRACT

These rules (1 to 29, inclusive), insofar as applicable, are hereby made a part of any contract for public utility service provided by the Company.

Contact Information

A Customer is responsible for providing, and updating when necessary, accurate contact information including telephone number(s), billing address and email addresses, if provided. If a customer's contact information changes and the customer does not timely provide updated contact information, the Customer agrees and understands that the Company shall not be liable for any notices, statements or other communications that are otherwise undeliverable to the Customer.

The Company may use contact information to reach the customer to discuss their natural gas account, to respond to an inquiry that the customer sent to the Company or to keep the customer informed about the services, products and programs offered by the Company, and its affiliates and partners. By providing an e-mail address to the Company, the customer consents to receive communications from the Company electronically. If the customer provides the Company a with a cell phone number, the customer expressly agrees that the Company may contact the customer at this number to discuss their natural gas account. The customer also agrees to receive, from the Company and the Company's service providers, calls and messages, including prerecorded messages, calls from automated dialing systems and text messages. Normal cell phone charges may apply.

RULES AND REGULATIONS

31. GAS QUALITY

Unless otherwise agreed to by the Company through separate agreement, gas delivered by a Customer, supplier or producer shall not contain more than:

(a) Seven (7) pounds of water per million cubic feet on an approved dew point apparatus.
(b) Four (4) percent by volume total inerts including carbon dioxide, nitrogen, argon, and helium provided that total carbon dioxide content shall not exceed two (2) percent by volume.
(c) Thirty hundredths (0.3) grains of hydrogen sulfide per 100 cubic feet.
(d) Ten (10) grains of total sulfur per 100 cubic feet.
(e) Two tenths (0.2) percent by volume oxygen.
(f) No more than (5) percent Hydrogen.

Gas delivered into the Company's system should be free from oil, water, salt, gum, dust, and other foreign substances that might interfere with the marketability of the gas. Unless otherwise agreed to by the Company, the gas delivered shall contain not less than 967 Btu per cubic foot and shall not exceed 1,100 Btu per cubic foot (as determined by calorimeter test @ 60 degrees Fahrenheit and saturated with water vapor). Gas accepted by the Company that contains less than 967 Btu per cubic foot will be enhanced to ensure that gas delivered by the Company to customers shall meet Commission heating value requirements and the Company may charge for this.

Nonconformance – If the gas offered for delivery by a producer, Customer and/or its NGS shall fail at any time to conform to any of the specifications set forth herein, then the Company shall notify the Customer, producer and/or NGS of such deficiency and may at the Company's option refuse to accept delivery pending correction by the Customer, producer or NGS. Should any substances not in conformity with the quality standards specified herein enter the Company's facilities and cause damage to gas meters, regulators and/or other equipment, or interruption of service, Customer, Producer and/or NGS shall reimburse the Company for the costs to repair such damage and for any related costs which the Company may incur to restore service to, and/or repair facilities, of its Customers, including payments made by the Company to Customers in settlement of claims arising out of interruption of gas service.

32. OTHER FEES AND SERVICES

The following customer requested services will require a fee as defined below:

Temporary Customer Service Line Installation – If service to a premises would be discontinued due to a customer service line leak and gas service is required to serve essential human needs, the customer or occupant may request the installation of a temporary customer service line. If the Company is able to install such a line, at the occupant's or customer's request, the Company may charge a fee of $300. The line shall be placed only for a temporary period and the Company reserves the right to identify the temporary period and remove the line if that period is exceeded.

Excess Flow Valve – At the Customer's request, the Company will install an excess flow valve. If the customer requests installation of the excess flow valve and the Company has not scheduled the location for a service line replacement or a new service line, or the customer requests the installation prior to the Company's scheduled installation time, the customer shall be responsible for the cost of the materials and installation to be paid prior to installation.

High Bill Investigation Fee – At the Customer's request, the Company will provide a scheduled visit to the customer's home to conduct an investigation into the usage measured and billed to the Customer for service. If the investigation identifies an error in the measurement of gas used or the customer's income is at or below 150% of the federal poverty level, the fee will be waived. The fee for this service is $75. This fee is not applicable to foreign load investigations.

RATE RS
RESIDENTIAL SERVICE

AVAILABILITY

This rate is available to residential customers (other than those that the Company determines shall acquire service under Rate GS-SB) located throughout the territory described in the "Description of Territory" in this tariff and shall be applied to consumption for each month determined in accordance with Rule 10.

This rate will be used for provision of supplier of last resort service to residential customers.

RATE TABLE

Customer Charge per meter per month	$16.80
Delivery Charge per Mcf	$5.3537

The currently effective gas cost charges under Rider Purchased Gas Cost and all charges under other applicable tariff riders are set forth on the Summary of Rates located on Page No. 3 of this tariff.

MINIMUM MONTHLY BILL

The minimum monthly bill per meter shall be the customer charge per customer per month. In the event of an emergency curtailment in the delivery of gas by the Company to a customer pursuant to Rule 17, or complete or partial suspension of operation by the customer due to fire, flood, explosion, or other similar acts of God, the minimum monthly bill may be reduced in direct proportion to the ratio of the number of days of curtailed service or complete or substantial suspension of operation to the number of days in the billing period.

SURCHARGES

All applicable riders to this tariff.

LATE-PAYMENT CHARGE

The Company will assess a late payment charge of 1.50 percent per month when the Company receives the customer’s full payment more than five days after the bill’s due date. This charge is to be calculated on the overdue portion of the bill, excluding any unpaid late-payment charges.

RULES AND REGULATIONS

The Company's Rules and Regulations in effect from time to time, where not inconsistent with any specific provision hereof, are a part of this rate schedule.

WAIVER

The Company reserves the right to waive the customer charge per meter for additional meters. An example of when such waiver may occur is when the Company determines that such meters have been installed principally and primarily for the Company's convenience and not due to the customer's load characteristics.

CUSTOMER ASSISTANCE PROGRAM (CAP)

AVAILABILITY

Rate CAP is a program designed to enroll residential customers who satisfy the criteria set forth below. Please refer to Peoples' Universal Service and Energy Conservation Plan on file with the PA PUC for a full description of the CAP program terms and conditions. In addition to the terms and conditions in this Tariff, Peoples' Universal Service and Energy Conservation Plan shall govern the provision of service under this rate category

1. Processing and verification by authorized agencies upon referral by the Company's offices, Customer Assistance Referral Evaluation Service (CARES) representatives, other agencies, or BCS.

2. Customer of the Company and using natural gas for space heating.

3. Annual income no greater than 150 percent of the federal poverty level. The Company will accept a customer's participation in an electric CAP program as verification of income, if the Company is satisfied that the electric company verifies income. For payment purposes, the customers will be defined as follows:

    a. Group A - Customers whose annual income has been verified as being from 0 to 50 percent of poverty.

    b. Group B - Customers whose annual income has been verified as being from 51 to 100 percent of poverty.

    c. Group C - Customers whose annual income has been verified as being from 101 to 150 percent of poverty.

4. A customer who meets the eligibility criteria for the Low Income Home Energy Assistance Program (LIHEAP) should complete an application for a LIHEAP grant when available.

5. The company will monitor the usage of CAP customers on an ongoing basis. Any unjustified excess CAP usage or unjustified CAP credit (designed as the difference between the CAP payment amount, and the current charges as billed under Rate RS) that exceeds a maximum of $1,000 per year will be billed to the CAP customer. An increase in CAP usage or annual CAP credit over $1,000 may be justified if the CAP customer can demonstrate the household has experienced the addition of a family member; a member of the household experienced a serious illness; energy consumption was beyond the ability of the household to control; or the household is located in housing that is or has been condemned or has housing code violations that negatively affect energy consumption. Before responsibility for the excess CAP usage is imposed on the household, the Company shall notify the customer of the grounds for exemption and assure that the customer has received and understands the grounds for exemption.

6. Agreement by customer to apply for any other energy assistance programs, if available, as referred to by the Company.

7. Customers will automatically be enrolled in CAP if:

    a. the customer has a significant account balance, and

    b. the customer has received a LIHEAP payment within the past two years.

CUSTOMER ASSISTANCE PROGRAM (CAP)

RATE TABLE

Customers will pay a specified percentage of their monthly income or $25/month, whichever is greater. The applicable percentage by Group follows:

Group[1]	Percentage
A	4%
B	5%
C	6%

If the customer's monthly CAP payment, as calculated above, exceeds the otherwise applicable monthly budget payment amount, the monthly budget payment amount will be accepted as the CAP payment. The Company will review any customer account where usage exceeds 125% of the customer's annual usage. In cases where the Company determines that the increase in a CAP customer's usage is unjustified, the Company will provide the customer with conservation information, refer the customer to a usage reduction program, and bill the customer for excess usage.

SURCHARGES

All riders to this tariff, as would otherwise be applicable to Rate RS with the exception of Rider Universal Service.

LATE-PAYMENT CHARGES

No late-payment charges shall be applied to arrearages existing at the time the customer begins receiving service under Rate Schedule CAP. Late-payment charges will not be applied during participation in the CAP program.

1/ Defined under Availability Criteria 3.

CUSTOMER ASSISTANCE PROGRAM (CAP)

RULES AND REGULATIONS

1. Customer with earned income must recertify income eligibility biennially. Customers with only certain fixed incomes, such as social security, pension and disability must recertify income eligibility triennially. Customers reporting zero income using the Company's zero income form must recertify within 6 months.

2. If, at any time after acceptance into CAP, a customer's family size or income changes, the customer must notify the Company of the change within 30 days of the change. Failure to do so may result in the Company ending the customer's opportunity to receive service under CAP.

3. If a customer no longer satisfies the criteria set forth under Availability, with the exception of Item 4, the customer will no longer be eligible to receive service under CAP.

4. At the time of application for CAP, the customer will be advised of the importance of timely payments and energy conservation. The CAP screening administrator will review relevant assistance programs and offer help in applying for programs such as weatherization or energy assistance as appropriate. Energy saving tips will be provided and all participants will be advised that usage will be reviewed on an ongoing basis. Unjustified excess CAP usage will be billed to the CAP customer.

5. If a customer fails to allow access to the Company's meter or fails to provide meter readings in four consecutive months, the customer will no longer receive service under CAP.

6. Failure to make payments will result in the Company returning the participant to the regular collection cycle and may lead to termination of service. To avoid termination, the participant must pay the amount set forth in the termination notice prior to the scheduled termination date.

7. A customer whose service has been terminated pursuant to Rule 5 may be required to pay all CAP arrearages prior to reinstatement and will be advised of appropriate energy assistance programs, including LIHEAP, LIHEAP Crisis and Dollar Energy Fund, which are available to assist in restoration of service.

8. Customers who have been dropped from CAP for the reasons outlined above will be subject to normal termination procedures. The customer will receive a communication providing an opportunity to correct the problem before being removed from CAP.

PILOT EXTENDED CUSTOMER ASSISTANCE PROGRAM (E-CAP)

This Rate is established as a Pilot in the Company's Universal Service and Energy Conservation Plan. All provisions of Rate CAP will additionally apply to participants of E-CAP.

AVAILABILITY

Rate E-CAP is a program designed to enroll residential customers who satisfy the criteria set forth below.

a. Customer of the Company, using natural gas for space heating, who has a significant delinquent balance, broken payment arrangement, termination notice or lack of utility service.
b. Annual income verified annually as being between 151 and 200 percent of the federal poverty level.
c. Agreement by customer to apply for any other energy assistance programs, if available, as referred to by the Company and before enrolling in E-CAP.

RATE TABLE

Customers will pay 11% of their monthly income as their E-CAP Payment. If the customer's monthly E-CAP payment exceeds the otherwise applicable monthly budget payment amount, the monthly budget payment amount will be accepted as the E-CAP payment.

SURCHARGES

All riders are applicable to this tariff, as would otherwise be applicable to Rate RS, with the exception of Rider Universal Service.

LATE-PAYMENT CHARGES

No late-payment charges shall be applied to arrearages existing at the time the customer begins receiving service under Rate Schedule E-CAP. Late-payment charges will not be applied during participation in the E-CAP program.

RATE SGS
SMALL GENERAL SERVICE

AVAILABILITY

This rate is available to commercial, industrial, and NGDC customers consuming less than 1,000 Mcf annually (other than those that the Company determines shall acquire service under Rate GS-SB or those that use natural gas as a motor vehicle fuel), located throughout the territory described in the "Description of Territory" in this tariff and shall be applied to consumption for each month determined in accordance with Rule 10.

This rate will be used for provision of supplier of last resort service to all commercial, industrial and NGDC customers.

RATE TABLE

Customer Charge per meter per month:

For customers with annual consumption less than 500 Mcf	$22.00
For customers with annual consumption equal to or greater than 500 Mcf but less than 1,000 Mcf	$44.00
Delivery Charge per Mcf	$3.9844

The currently effective gas cost charges under Rider Purchased Gas Cost and all charges under other applicable tariff riders are set forth on the Summary of Rates on page No. 3 of this tariff.

RATE SGS
SMALL GENERAL SERVICE

MINIMUM MONTHLY BILL

The minimum monthly bill per meter shall be the customer charge per customer per month. In the event of an emergency, curtailment in the delivery of gas by the Company to a customer pursuant to Rule 17, or complete or partial suspension of operation by the customer due to fire, flood, explosion, or other similar acts of God, the minimum monthly bill may be reduced in direct proportion to the ratio of the number of days of curtailed service or complete or substantial suspension of operation to the number of days in the billing period.

SURCHARGES

All applicable riders to this tariff.

LATE-PAYMENT CHARGE

A late-payment charge of 1.50 percent per month for commercial customers and 2.00 percent per month for industrial customers shall be applied for failure to make payment in full for all charges billed by the Company by the due date shown on the bill. This charge is to be calculated on the overdue portion of the bill, excluding any unpaid late-payment charges.

RULES AND REGULATIONS

The Company's Rules and Regulations in effect from time to time, where not inconsistent with any specific provision hereof, are a part of this rate schedule.

WAIVER

The Company reserves the right to waive the customer charge per meter for additional meters. An example of when such waiver may occur is when the Company determines that such meters have been installed principally and primarily for the Company's convenience and not due to the customer's load characteristics.

RATE MGS
MEDIUM GENERAL SERVICE

AVAILABILITY

This rate is available to commercial, industrial, and NGDC customers consuming between 1,000 and 24,999 Mcf annually (other than those that the Company determines shall acquire service under Rate GS-SB or those that use natural gas as a motor vehicle fuel), located throughout the territory described in the "Description of Territory" in this tariff, and shall be applied to consumption for each month determined in accordance with Rule 10.

The Company shall determine the annual consumption of each MGS customer in order to assess the appropriate customer charge. This rate will be used for provision of supplier of last resort service to commercial, industrial, and NGDC customers.

RATE TABLE

Customer Charge per meter per month:

For customers with annual consumption equal to or greater than 1,000 Mcf but less than 2,500 Mcf	$101.00
For customers with annual consumption equal to or greater than 2,500 Mcf but less than 25,000 Mcf	$145.00
Delivery Charge per Mcf	$3.6941

The currently effective gas cost charges under Rider Purchased Gas Cost and all charges under other applicable tariff riders are set forth on the Summary of Rates located on Page No. 3 of this tariff.

RATE MGS
MEDIUM GENERAL SERVICE

MINIMUM MONTHLY BILL

The minimum monthly bill per meter shall be the customer charge per customer per month. In the event of an emergency curtailment in the delivery of gas by the Company to a customer pursuant to Rule 17, or complete or partial suspension of operation by the customer due to fire, flood, explosion, or other similar acts of God, the minimum monthly bill may be reduced in direct proportion to the ratio of the number of days of curtailed service or complete or substantial suspension of operation to the number of days in the billing period.

WAIVER

The Company reserves the right to waive the customer charge per meter for additional meters. An example of when this charge may be waived is if the Company determines that such meters have been installed principally and primarily for the Company's convenience and not due to the load characteristics of the customer.

RATE LGS
LARGE GENERAL SERVICE

AVAILABILITY

This rate is available to commercial, industrial, and NGDC customers consuming greater than 25,000 Mcf annually (other than those that the Company determines shall acquire service under Rate GS-SB or those that use natural gas as a motor vehicle fuel), located throughout the territory described in the "Description of Territory" in this tariff, and shall be applied to consumption for each month determined in accordance with Rule 10.

The Company shall determine the annual consumption of each LGS customer in order to assess the appropriate customer charge. This rate will be used for provision of supplier of last resort service to commercial, industrial, and NGDC customers.

For purposes of this Rate LGS schedule, Transitional LGS customers shall consist of Peoples Gas Division LGS Ratepayers with annual consumption equal to or greater than 100,000 Mcf and that took service on the Peoples Gas Division Rate LGS rate schedule as of September 27, 2024. No other customers will be eligible for the Transitional LGS rates. In addition, Transitional customers will not retain their Transitional status upon any discontinuance of service and will not be able to transfer their Transitional status to any other entity. These transitional customers may switch between rate schedules based upon their usage.

RATE TABLE

Customer Charge per meter per month:

For customers with annual consumption equal to or greater than 25,000 Mcf but less than 50,000 Mcf	$940.00
For customers with annual consumption equal to or greater than 50,000 Mcf but less than 100,000 Mcf	$1,465.00
For customers including Transitional LGS) with annual consumption equal to or greater than 100,000 Mcf but less than 200,000 Mcf	$2,130.00
For customers (including Transitional LGS) with annual consumption equal to or greater than 200,000 Mcf	$5,630.00

Delivery Charge per Mcf

For customers with annual consumption equal to or greater than 25,000 Mcf but less than 50,000 Mcf	$2.6360

RATE GS-T
GENERAL SERVICE - TRANSPORTATION

AVAILABILITY

This service is available to provide for the delivery of transportation volumes to residential, commercial, (other than those that use natural gas as a motor vehicle fuel), industrial, and natural gas distribution company customers regulated by the Commission. Priority-one customers (as defined in Rule 17), must purchase standby service in accordance with the terms and conditions of GS-SB.

RULES AND DELIVERY TERMS

(1) The entity to whom the Company delivers the transported gas shall be considered the customer under this rate schedule. The customer is responsible for paying the Company's bill unless the Company agrees to receive payment from a third party.

(2) Any customer consuming less than 500 Mcf per year who wishes to acquire transportation service may do so as long as the customer agrees to collectively pool supplies for balancing purposes on the Company's System, in order to make provision of transportation service to these small consumers administratively feasible.

(3) A single-entity customer is a customer with multiple meters and/or multiple locations within the Company's service territory which, in the sole determination of the Company, shall be recognized as one customer for administrative purposes. Any retail or standby service shall be billed as if an equal amount of gas passed through each meter of the single-entity customer each month. Only one bill will be issued each month to a single-entity customer.

(4) The customer will pay for any investment costs required to receive the customer's gas into the Company's system at agreed-upon transportation gas receipt points. The Company will own and maintain each natural gas connection's tapping tee or pipe and valve.

(5) A Transportation Agreement, as prepared by the Company, must be executed by the customer(s) with competitive alternatives to whom Rate GS-T is made available at less than maximum rate. This Agreement shall be for a minimum term of one year, unless the Company agrees otherwise. This Agreement may set forth the maximum daily volumes that may be transported and other negotiated conditions of service.

(6) This service will be provided by the Company only if the customer provides gas of reasonable quality to the Company. The volumes, pressures, and receipt points will be agreed upon by the parties in advance and set forth in the Transportation Agreement or in the Company’s pooling agreement with the NGS providing gas supply service to the customer.

(7) Unless otherwise agreed to by the customer and the Company, the customer or its NGS is responsible for all arrangements required to acquire and to deliver the customer's natural gas to the receipt points set forth in the Transportation Agreement.

(8) On those days when the transportation gas of an individual industrial customer who uses at least 50,000 Mcf annually is not received into the Company’s system at its nominated level, or if the said transportation customer has failed to arrange for deliveries to be made into the Company’s system on its behalf, and the Company determines that it may not be able to satisfy all the demands of its firm retail and transportation customers without exceeding its pipeline contract level, then the Company may declare an ”upset day.”

On an upset day, those customers described in this subparagraph No. 8, whose transportation volumes are not received at all or at the nominated level into the Company’s system shall be restricted to the following consumption levels:

1) Transportation gas volumes received by the Company on the customer’s behalf on that day; and

RATE GS-T
GENERAL SERVICE - TRANSPORTATION

RULES AND DELIVERY TERMS (Continued)

2) All standby volumes contracted for the month by the customer.

Transportation customers whose nominated daily volume are received in whole by the Company shall not be affected by the provisions in this subparagraph No. 8.

At least six hours prior to the beginning of an “upset day,” the utility will provide notice to any one of three persons designated by the customer. After contact is attempted by the Company with the three persons designated by the customer, the Company will be deemed to have satisfied its notice obligations.

(9) Unless otherwise agreed under paragraph (17) below, the Company will arrange its utilization of available capacity by endeavoring to fairly accommodate, to the extent practicable, the interests of its retail and transportation customers.

a. Available System Capacity for Transportation Service: Capacity for the transportation of customer-owned gas is available on the Company's system to the same extent as capacity is available for the general system supplies that the Company acquires for its retail customers, except where operational constraints may require otherwise. Those operational constraints can include the safety of persons or property and the displacement of locally produced or purchased retail gas supplies.

b. Actual Unavailability of or Restrictions on Capacity: In the event that capacity on the Company's system either is unavailable for the transportation of customer-owned gas or is available but restricted, the Company will provide its transportation customer or the customer's designated representative with a written explanation of why capacity is unavailable or restricted and the steps examined by the Company to alleviate the unavailability or restriction. Where capacity is restricted, the Company will allocate capacity to its transportation customers without regard to the sources of the customers' natural gas supplies.

c. Anticipated Unavailability of or Restrictions on Capacity: Whenever the Company anticipates that an extraordinary activity or occurrence will make capacity either unavailable or available but restricted, the Company will provide written notice to Pennsylvania producers, as early as possible, of the specific portions of the Company's system on which capacity may be unavailable or available but restricted and of the length of time that the unavailability or restriction likely will last.

(10) As soon as practical after the customer learns of any disruption or interruption in its supply of gas, the customer shall notify the Company.

(11) The measurements at the point of receipt and delivery shall be the responsibility of the Company. All quantities of gas received, transported, and delivered shall be expressed in terms of "Mcf." A customer's gas received by the Company in Btus will be converted to Mcf using the current applicable conversion factor as determined annually in the Company’s 1307(f) proceeding.

(12) The Company shall retain 6.5 percent of the total volume of gas received into its system on behalf of all customers as gas used in Company operations and for unaccounted-for gas under Transportation Agreements that have been or are entered into pursuant to this rate, except in the following circumstances, where the Company may exercise its discretion to waive retainage in conjunction with a positive cost/benefit analysis: **(I)**

(I)- Indicates Increase.

RATE GS-T
GENERAL SERVICE - TRANSPORTATION

RULES AND DELIVERY TERMS (Continued)

1) If customer can obtain alternate transportation service via direct bypass;
2) If customer receives transportation service through Company-owned facilities which do not produce the retainage percentage set forth in this rate schedule;
3) If customer has a competitive offer from a non-PUC-jurisdictional entity;
4) If customer can demonstrate economic development or job retention considerations are present; or
5) If customer has a bona fide competitive offer from an alternative energy source.

As used in this rate schedule, “alternative energy source” shall not include natural gas service from other Natural Gas Distribution Companies.

(13) Customer-owned locally produced gas received into the Company’s system will be available as nominated by the customer or his agent in the current month. Nominations will be accepted if determined to be reasonable by the Company. Reconciliation of the actual volumes delivered to the Company’s system to nominated volumes will be made in the first month available.

(14) Monthly Balancing Provisions Applicable to Rate GS-T Customers Not Served by a Pool

The Company will bank for one month following the month that the customer’s gas is available for the customer’s use, up to 3.5 percent of the volumes delivered on the customer’s behalf (net of the payback of advanced gas). Banked gas shall precede current deliveries of gas through the customer’s meter during the month following the banking period. The Company will balance customer’s daily deliveries with customer’s actual daily consumption during the month. The Company will advance up to 3.5 percent of the volumes received on the customer’s behalf in any month. The first gas received on the customer’s behalf in the succeeding month will be deemed the payback of advanced gas. Any difference between the customer’s consumption and deliveries shall be subject to the following charges:
Negative Monthly Imbalance - A negative imbalance fee will be assessed on consumption by the customer in excess of gas deliveries plus gas advanced and any contracted for standby service. The negative imbalance volume will be sold by the Company at the highest Midpoint price published in Platts, Gas Daily publication, under the heading Appalachia, Eastern South for the month multiplied by 120%. Volumes sold by the Company are subject to applicable taxes.

Positive Monthly Imbalance - If the customer fails to use at least 96.5 percent of the volumes delivered to the Company on customer's account in any month, then the Company may buy the gas which has remained in the bank longer than the banking period or in excess of the amount used and banked in the month from the customer. The positive imbalance volume will be purchased by the Company at the lowest Midpoint price published in Platts, Gas Daily publication, under the heading Appalachia, Eastern South for the month multiplied by 85%.

RATE GS-T
GENERAL SERVICE - TRANSPORTATION

RULES AND DELIVERY TERMS (Continued)

A balancing charge will be assessed against each Mcf of gas transported for small and medium general service customers and for large general service customers. This rate will be recalculated in each of the Company's annual 1307(f) gas cost proceedings. The currently effective balancing charges are reflected on Tariff Page Nos. 3 and 4.

The balancing charge will not be assessed if (1) the customer is already paying the standby charge under Rate Schedule GS-SB on the same volumes or (2) if the customer or pool can match its supply and actual consumption on a daily basis in a manner satisfactory to the Company.

(15) Backup service is available to customers under this rate schedule only under Rate GS-SB, unless the customer qualifies for service under Rate CER or unless otherwise agreed under paragraph (17) below.

(16) The Company reserves the right, as a condition of service under this rate schedule, to require any customer requesting service under this rate schedule to install and bear the costs of enhanced metering capability. The Company also reserves the right to require installation of such metering capability, at the customer's expense, as a condition of continuation of service under this rate schedule.

(17) When the customer purchasing service under this rate is using natural gas for generating power or steam for use by third parties, customer and the Company may require a separate (operating) agreement by which the customer and the Company will agree to, among other things, set limits on hourly or daily consumption; require provision of notice of customer's specific plans concerning intent to consume natural gas, the volume that will be used, the time period of which such consumption will occur, and when usage will end; establish criteria for interruption of all or part of customer's planned consumption, whether through transportation or retail service; establish penalties for failure of customer to adhere to agreed-upon usage levels or to interrupt consumption as agreed upon by the parties; agree upon the availability of retail service; and establish and impose any other rules or restrictions necessary to ensure reliable service for all customers.

(18) The Company will from time to time make pipeline capacity available for release to transportation customers. Each release transaction will be made in accordance with and subject to applicable pipeline tariff requirements and necessary regulatory requirements.

RATE GS-T
GENERAL SERVICE - TRANSPORTATION

RATE TABLE

Customer Charge - The Company shall determine the annual consumption of each General Service customer in order to assess the appropriate customer charge.

$16.80	Customer Charge per month per meter for all Residential customers.
$22.00	Customer Charge per month per meter for all NGDC customers consuming less than 500 Mcf annually.
$44.00	Customer Charge per month per meter for NGDC customers with annual consumption equal to or greater than 500 Mcf but less than 1,000 Mcf.
$101.00	Customer Charge per month per meter for NGDC customers with annual consumption equal to or greater than 1,000 Mcf but less than 2,500 Mcf.

For Large General Service Customers with annual consumption greater than 2,000,000 Mcf	$1.1754

RATE GS-T
GENERAL SERVICE – TRANSPORTATION

The delivery charge will be assessed on all volumes at the time of delivery to the customer, including current transportation and storage volumes withdrawn and delivered to the Company. A transportation standby charge will be applicable to all volumes transported under Rate Schedule GS-T for Priority One customers (refer to Rate Schedule GS-SB).

The currently effective gas cost charges under Rider Purchased Gas Costs and all charges under other applicable tariff riders are set forth on the Summary of Rates located on Page No. 3 of this tariff.

LATE-PAYMENT CHARGE

A late-payment charge of 1.50 percent per month for residential customers will be made for failure to make payment in full for all charges billed by the Company within five days after the due date shown on the bill. A late-payment charge of 2.00 percent per industrial customers and 1.50 percent per month for commercial and NGDC customers shall be applied for failure to make payment in full for all charges billed by the Company by the due date shown on the bill. This charge is to be calculated on the overdue portion of the bill, excluding any unpaid late-payment charges. The overdue portion of the bill may include NGS supply charges purchased by the Company under the purchase of receivables provisions set forth in Rate SBS of the Company's Supplier Tariff.

RATE GS-T
GENERAL SERVICE - TRANSPORTATION

SURCHARGES

All applicable riders to this tariff.

CURTAILMENT

Service under this rate may be curtailed when gas supply shortages force the Company to invoke emergency curtailment provisions pursuant to Tariff Rule No. 17 because gas supply to Priority-One customers is threatened. Under this circumstance, the transportation customer must agree to sell its gas supply to the Company at either the customer's city gate price or at the Company's average gas cost contained in the prevailing 1307(f) rate applicable to that class of customer, whichever is greater, to be used to supply the needs of Priority-One customers.

LIABILITY

1. The Company shall not be liable for disruption of service under this rate or loss of gas of the customer as a result of any steps taken to comply with any law, regulation, or order of any governmental agency with jurisdiction to regulate, allocate, or control gas supplies or the rendition of service hereunder, and regardless of any defect in such law, regulation, or order.

2. Gas shall be and remain the property of the customer while transported and delivered by the Company. The customer shall be responsible for maintaining all insurance it deems necessary to protect its property interest in such gas before, during, and after receipt by the Company.

3. The Company shall not be liable for any loss to the customer arising from or out of service under this rate, including loss of gas in the possession of the Company or any other cause, except upon gross negligence or willful misconduct of the Company's own employees or agents. The Company reserves the right to commingle gas of the customer with that of other suppliers and customers.

4. The Company will not be liable for disruption along upstream pipelines, or disruption caused by the Company's inability to physically receive the gas.

5. If service furnished pursuant to this rate is disrupted, the Company will notify the customer as soon as it is reasonably practicable. If delivery of volumes is disrupted for any of the above reasons, the Company shall not be liable for delivering said volumes at a later date.

ARRANGEMENT OF INTERSTATE TRANSPORTATION

At the request of a customer, other than an NGDC, the Company will act as its agent for arranging transportation of customer-owned gas by an interstate pipeline(s). The Company will bill the customer the applicable pipeline tariff rate(s) for any interstate transportation billed to the Company in its role as customer's agent for arranging interstate transportation.

(C)

(C)-Indicates Change

RATE GS-SB
GENERAL SERVICE - STANDBY

AVAILABILITY

This service is available to transportation service customers served under Rate GS-T and/or customers who need or use the Company as backup service to service from an alternate supplier.

RULES AND DELIVERY TERMS

Priority-One Transportation Customers
Priority One customers must pay for standby service through a transportation standby charge applicable to all volumes transported under Rate Schedule GS-T. Backup service for Priority-One customers shall be provided pursuant to the applicable retail rate schedules.

Non-Priority-One Transportation Customers
The customer may execute a Standby Contract for a specified monthly volume. The term of the Standby Contract will be a minimum period of not less than one year. Customers that execute a Standby Contract will pay for standby service through a capacity charge applicable to contracted for monthly volumes and through a standby commodity charge applicable to all standby volumes actually purchased under Rate Schedule GS-SB.

Back-up Standby Service
If a customer is using the Company as back-up service to service from an alternative supplier, the Company shall charge the customer the standby service fees set forth in the rate table below. The Company reserves the right to determine when and the level to which a customer is using the Company as a backup supplier. In situations where the alternative supply is from local well production and before the Company provides backup standby service under the terms of this rate schedule, the Company shall have the right to inspect the pipeline and related facilities of the customer and require that the customer install, at its own expense, any necessary equipment to protect the integrity and safe operation of the Company's system.

RATE TABLE

Capacity Charges Applicable under the Rate Schedule:

RS Capacity Charge per Mcf	$1.8641	**(I)**
SGS Capacity Charge per Mcf	$1.8641	**(I)**
MGS Capacity Charge per Mcf	$1.8641	**(I)**
LGS Capacity Charge per Mcf	$1.8641	**(I)**

Standby Charges for Priority One Transportation Customers

For customers that pay the capacity charge, the Company may release pipeline capacity, the terms of which will be pursuant to the capacity-release terms of the Company's Supplier tariff and this rate schedule.

Priority-One customers who take service under this rate schedule, or their agents, must take assignment of a pro-rata or other agreed upon share of the pipeline and storage capacity and Pennsylvania produced gas supplies ("assigned capacity") that would otherwise be utilized by the Company to meet the customer's service requirements. Assigned capacity shall be subject to recall pursuant to the conditions described in the Company's Supplier Tariff, in which case the Company will provide for the delivery of necessary gas supplies pursuant to the terms of this rate schedule. More specific terms with respect to capacity assignment requirements may be set forth in the Company's Supplier Tariff and in its contracts with Priority One NGSs. However, such additional terms with respect to capacity assignment requirements shall be subject to review in the Company's annual Section 1307(f) proceeding.

(I) – Indicates increase.

RATE GS-SB
GENERAL SERVICE - STANDBY

RATE TABLE

Standby Charges For Non Priority One Customers With a Standby Contract

Standby volumes delivered to the customer will be billed at the applicable supplier of last resort rates, excluding the pipeline demand component that has been paid through the capacity charge up to the contracted for monthly volumes in the standby contract. Volumes consumed in excess of contracted for volumes will be billed using the imbalance fee formula shown in Rate GS-T, paragraph 13, plus applicable taxes.

Customers Using The Company as a Back-up Supplier

Any customer using the Company as back-up service to service from an alternative supplier shall be subject to the charges set forth below. The following charges shall be assessed in lieu of any other standby charges applicable under this rate schedule.

Monthly Capacity Charge – In order to recover demand related purchased gas costs incurred by the Company, the customer shall be charged a monthly capacity charge equal to the customer's projected annual natural gas usage divided by twelve and multiplied by the capacity charges set forth above in this Rate Table. The projected annual natural gas usage shall reflect the estimated volumes assuming that all of the customer's natural gas consumption is served by the Company. The Company may waive this fee if the customer is receiving gas supplies from a NGS and the customer can demonstrate that its NGS has agreed to serve its peak day usage requirements. This charge will be assessed instead of the Capacity Charge applicable under other rate schedules.

Standby Customer Charge – In order to recover the fixed non-purchased gas charges incurred by the Company, the customer shall be charged a standby customer charge on a monthly basis. The standby customer charge shall be the monthly Customer Charge otherwise applicable under other rate schedules.

SURCHARGES - All applicable riders to this tariff.

LATE-PAYMENT CHARGE

A late-payment charge of 1.50 percent per month for residential customers will be made for failure to make payment in full for all charges billed by the Company within five days after the due date shown on the bill. A late-payment charge of 1.50 percent per month for commercial and NGDC customers and 2.00 percent for industrial customers will be made for failure to make payment in full for all charges billed by the Company by the due date shown on the bill. This charge is to be calculated on the overdue portion of the bill, excluding any unpaid late-payment charges.

RATE MLS
MAINLINE SERVICE RATE

APPLICATION
For customers throughout the territory served under this Tariff.

REQUIREMENTS
Available at one location, for the total requirements of a commercial or industrial customer when: (i) the customer does not take service under any other rate schedule; (ii) the Customer meets either one of the following qualifications:

a) the Customer has annual throughput requirements greater than 500,000 mcf and is within 1,000 feet of an Interstate pipeline supplier of the Company;
or
b) the Customer has annual throughput requirements of greater than 500,000 mcf and Is located within 1,000 feet of PNG Transmission class pipeline facilities.

Customers who take service under this rate schedule are entitled to firm retail gas service from the Company.

RATE
Customers being served with this rate schedule shall have all applicable riders and surcharges applied except for DSIC.

The rate information is detailed in the Rate Summary pages of this Tariff.

The applicable Distribution Charge for all distribution quantities shall be determined based upon the Customer Charge group in which the Customer is placed, as established annually.

The Distribution Charge may be flexed in accordance with the Flexible Rate Provisions set forth in the Rules and Regulations of this Tariff.

Delivery Charge per Mcf (if within 1,000 feet of a PNG transmission line)	$0.7430
Delivery Charge per Mcf (if within 1,000 feet of an interstate pipeline)	$0.4422

DETERMINATION OF CUSTOMER CHARGE
The Customer Charge will be determined based upon the customer's actual throughput quantities, including sales and distribution if the customer previously contracted for distribution service, measured in 1,00 cubic feet of gas (mcf), for the twelve most recent billing cycles ending with the October billing cycle.

If a customer does not have sufficient consumption history to determine its Customer Charge based on twelve months, the Customer Charge will be developed by annualizing the consumption history available. In the instance where a customer has no consumption history, the Company will request the customer to submit estimated annual gas requirements, upon which to develop the Customer Charge. The Company in all cases retains the right to review and modify the customer's estimate where necessary. A customer's Customer Charge will remain constant annually, subject to change as of the January billing cycle of each year.

In all cases, the Company reserves the right to review the Customer Charge and, upon receipt of satisfactory proof, to adjust the Customer Charge to reflect the installation and use of energy efficient gas burning equipment, or the implementation of energy conservation practices or measures, which results in a measurable permanent change in the customer's requirement or consumption.

MAIN LINE EXTENSION DEPOSIT INSTALLMENT PLAN
Applicants eligible for Rate Schedule MLS who have entered into an agreement with the Company to make payments for a main line extension pursuant to the Payment Period of Deposit paragraph in the Connections for Service – Extension of Facilities section of Rule 4. Extensions of these Rules and Regulations Governing the Distribution and Sale of Gas, will have the installment amount included in the cyclical bill for service issued by the Company. The installment amount will be added to the Customer Charge for the duration of the installment payment plan.

PEOPLES NATURAL GAS COMPANY LLC

SUPPLEMENT NO. 17 TO GAS—PA PUC NO. 48
SECOND REVISED PAGE NO. 62
CANCELLING FIRST PAGE NO. 62

RATE MLS
MAINLINE SERVICE RATE

MINIMUM CHARGE

The minimum charge shall be the Customer Charge. In the event of curtailment in the delivery of gas by the Company or complete or partial suspension of operation by the customer due to strikes, fires, floods, explosions or other similar casualties, the Customer Charge shall be reduced in direct proportion to the ratio which the number of days of curtailed service or complete or partial suspension of operation bears to the number of days in the billing period.

STATE TAX ADJUSTMENT SURCHARGE

The charges described in this rate schedule are subject to a State Tax Adjustment Surcharge as set forth in the tariff.

DISTRIBUTION SYSTEM IMPROVEMENT CHARGE

Rate MLS is subject to a Distribution System Improvement Charge as specified within Rider DSIC of this Tariff.

RIDER PGC

The Pass-through Charge and Gas Supply Charge in this rate schedule include recovery of purchased gas costs pursuant to the Purchased Gas Cost Rider as set forth in this Tariff.

RETAINAGE

The retainage rate for MLS customers shall be the greater of the actual lost and unaccounted for gas percentage on the facilities used by each MLS customer (if available) or 1%. If the actual lost and unaccounted for gas percentage on the facilities used by each MLS customer is not available, the retainage rate shall be the Distribution UFG percentage per the most recently filed UFG report with the PA Public Utility Commission. **(C)**

TERMS OF PAYMENT

Bills for sales service will be rendered monthly and are due and payable upon presentation. All bills shall be paid on or before the final date of payment shown on the bill, which date shall not be less than twenty (20) days after presentation (date of postmark).

If the customer fails to pay the full amount of any bill, a delayed payment penalty charge of one and one half percent (1 1/2%) per billing cycle shall accrue on the portion of the bill that is unpaid on the due date.

SPECIAL PROVISIONS APPLICABLE TO ALL MLS CUSTOMERS

1. Customers desiring to transfer to or from this rate schedule must notify the Company in writing. Transfers to or from this rate schedule will be allowed only if:
   a) the Company can obtain any increase or decrease in its gas supplies, pipeline capacity and storage capacity, or any combination thereof that is required to accommodate such change; or
   b) the Company, in its sole judgment, concludes that no increase or decrease is required. The Company shall establish the date any transfer is to be effective.

2. Energy usage eligibility for this rate schedule shall be determined annually. In the event Customer's annual purchases are less than or equal to 500,000 mcf, the customer shall be transferred to either Rate LGS effective the immediately succeeding January billing cycle.

3. New customers or existing customers requesting a transfer to this Rate Schedule shall be permitted to take service under this Rate Schedule only if:
   a) the Company can obtain an increase in its firm pipeline capacity with an interstate pipeline having delivery points on the Company's system where the customer's facility is located, that is required to accommodate such transfer; or
   b) the Company, in its sole judgment, concludes that no increase in the Company's pipeline capacity under an interstate pipeline firm rate schedule or any successor rate schedule is required. The Company shall establish the date any transfer is to be effective.

RULES AND REGULATIONS

The Rules and Regulations Governing the Distribution and Sale of Gas of this Tariff, which are not inconsistent with the provisions of this rate schedule, shall govern, where applicable, the supply of distribution service under this rate schedule.

WAIVER

The Company reserves the right to waive the customer charge per meter for additional meters. An example of when this charge may be waived is if the Company determines that such meters have been installed principally and primarily for the Company's convenience and not due to the load characteristics of the customer.

(C)- Indicates Change

RATE NGPV

NATURAL GAS POWERED VEHICLES

AVAILABILITY

This rate schedule applies to use of natural gas retail or transportation service as a motor vehicle fuel to the operator of a public or private fueling station.

RULES AND DELIVERY TERMS

If transportation service is provided hereunder, the applicable rules and delivery terms under rate schedule GS-T apply.

RATES

Retail or Transportation service provided to an operator of a public fueling station, shall be made pursuant to a contract for service under this rate schedule. The contract may provide for a negotiated customer charge and either a fixed commodity charge or a methodology for determining the commodity charge.

If retail service is provided hereunder, the negotiated rate shall be no lower than the Company's average cost of gas, as determined from the Company's Section 1307(f) gas cost calculation. Any gas cost revenue collected as a result of providing retail service under this rate schedule will be reflected in the Company's 1307(f) mechanism.

Gas purchased under this rate schedule shall be separately metered and not used interchangeable with gas purchased under any other schedule.

SURCHARGES

All applicable riders to this tariff.

LATE PAYMENT CHARGE

A late-payment charge of 1.50 percent shall be applied for failure to make payment in full, for all charges billed by the Company, by the due date shown on the bill.

RULES AND REGULATIONS

The Company's Rules and Regulations in effect from time to time, where not inconsistent with any specific provision hereof, are a part of this rate schedule.

RATE APPALACHIAN GATHERING SERVICE

AVAILABILITY

Service under this rate schedule is available to any party desiring to transport gas through the gathering system, as well as to deliver gas directly into the Company's distribution and transmission system*, provided that:

(1) a Master Interconnect and Measurement Agreement ("MIMA") has been executed between the Company and the party; and

(2) the party is in compliance the MIMA, the provisions of this Rate Schedule and with all other provisions of this Tariff.

RATES

The gathering rate is $0.24 per Mcf, plus applicable retainage**.

If a conventional producer adds incremental conventional production to the Peoples' system, that producer's incremental production shall qualify for a reduced Rate AGS fee equal to 50% of the effective monthly Rate AGS fee.

Incremental conventional production is any conventional production that is not connected to the Company's facilities as of June 15, 2019 and shall not include any existing production delivered to Peoples' system and subsequently acquired by the producer from any other producer. Incremental conventional production shall also include increased production volumes from existing conventional wells as a result of well stimulation or similar actions. The level of incremental production volumes from existing wells shall be determined by the Company based on supporting information provided to the Company by the producer.

Gathering of natural gas from unconventional sources, including but not limited to, horizontally drilled Marcellus and Utica shale gas and landfill gas, shall be negotiated and agreed to within the MIMA.

TERM

The terms for gathering service shall be a set forth in the MIMA.

CHARACTER OF SERVICE

The Company's only obligation under this Rate Schedule shall be to receive gas from any gathering receipt point and to permit that gas to flow against the existing pressure in the Company's facilities. Peoples shall not be obligated to lower such line pressure by compression or otherwise to accommodate receipts from local Appalachian producers under this Rate Schedule.

Service under this Rate Schedule shall be subject to Operational Flow Orders pursuant to Item 24 of the Rules and Regulations of this Tariff. Nothing in this Rate Schedule shall limit the Company's right to interrupt service or to take other action as may be required to alleviate conditions, which threaten the integrity of its system.

* This applies to production into both the former Peoples Natural Gas Division and the former Peoples Gas Division.

** The current applicable retainage rate is 2.61% for all conventional production and is negotiable for unconventional production. **(C)**

(C) Indicates Change

RATE GL - GAS LIGHTS

APPLICABILITY

This rate shall be applicable throughout the territory served by the Company.

AVAILABILITY

Available for any gas lighting where the gas is not measured by meter.

USAGE

Consumption per light will be assumed at:

Residential 1.8 Mcf/Month
Commercial and Industrial 2.8 Mcf/Month

These volumes will be billed monthly under the customer's otherwise applicable rate schedule.

SURCHARGES AND RIDERS

Customers served under this rate schedule are subject to Rider Distribution System Improvement Charge (DSIC) except that the DSIC rate may be reduced or eliminated for any customer with competitive alternatives or negotiated contracts.

SPECIAL TERMS AND CONDITIONS

Gas will be supplied only to lamps furnished, erected, and maintained by the customer and equipped with devices satisfactory to the Company. Consumption and billing will be assumed to be continuous until customer notifies Company that gas light(s) has been permanently shut off and Company verifies to its satisfaction that service has been disconnected. Company may require gas lights to be metered except in instances where it is not economically feasible or is otherwise impractical, to be determined solely at the discretion of the Company.

RATE CER
COMPETITIVE ENERGY RATE

AVAILABILITY

This Rate Schedule CER - Competitive Energy Rate is a firm service available in the Company's sole discretion to residential, commercial, and industrial customers who would not request service from the Company but for the availability of service under this rate and whose competitive options are not solely limited to other NGDCs.

RULES AND DELIVERY TERMS

Any qualified customer taking service under this Rate Schedule shall do so by agreement.

The agreement shall set forth the percentage of consumption to be made available under this rate schedule. Volumes taken by the customer in excess of the percentage specific on this contract shall be billed at applicable retail rates.

The magnitude of service hereunder shall not exceed that service replaced or subject to replacement.

RATE

The rate will be negotiated between the customer and the Company and may be subject to periodic redetermination. The negotiated rate shall be no lower than the Company's commodity cost of gas at the time the contract is negotiated, as determined from the Company's Section 1307(f) gas cost calculation.

SURCHARGES

All applicable riders to this tariff.

LATE-PAYMENT CHARGE

A late-payment charge of 2 percent per month for industrial customers and 1.50 percent for commercial customers will be made for failure to make payment in full, for all charges billed by the Company, by the due date shown on the bill. A late-payment charge of 1.50 percent per month for residential customers will be made for failure to make payment in full within five days after the due date shown on the bill. This charge is to be calculated on the overdue portion of the bill, excluding any unpaid late-payment charges.

RIDER
STATE TAX SURCHARGE

There shall be added to gas bills rendered by the utility for retail gas service a surcharge percent applied to the delivery charge under all rate schedules served by this tariff to reflect changes and new taxes imposed by the General Assembly. The currently effective surcharge percentage is reflected on Tariff Page Nos. 3 and 4.

The Company will recompute the surcharge (i) whenever any of the state tax rates upon which the surcharge is computed are changed and (ii) as of March 31 of every year. The recomputation shall take into account the changed state tax rates as prescribed by the Commission (Policy Statement at 52 Pa. Code § 69.52) in the following manner:

1. Capital Stock Tax ("CST"): To determine the amount to be recovered, the Company shall multiply the change in the CST tax rate by the CST value as reported in the most recent CST return filed with the Department of Revenue.

2. Corporate Net Income Tax ("CNIT"): To determine the amount to be recovered, the Company shall multiply the change in the CNIT tax rate by the taxable income reported in the most recent CNIT return filed with the Department of Revenue. Pursuant to Docket No. R-2023-3044549, impacts of change in the CNI rate should not be adjusted for as the company did not recover state taxes in the referenced proceeding.

3. Public Utility Realty Tax ("PURT"): To determine the amount to be recovered, the Company shall calculate the difference between the PURT liability as stated in the most recent Notice of Determination issued by the Department of Revenue and the current amount of PURT recovered in base rates

Every recomputation made pursuant to the above paragraph shall be submitted to the Commission within ten (10) days after the occurrence of the event or effective date of such state tax rate change, which occasioned such recomputation. If the recomputed surcharge is less than the one than in effect then the Company will, and if the recomputed surcharge is more than the one then in effect then the Company may, accompany such recomputation with a Tariff or Supplement to reflect such recomputed surcharge - the effective date of which shall be ten (10) days after filing.

SPECIAL PROVISION – This Rider shall not apply to Customers receiving discounted retail or discounted transportation service.

RIDER
PURCHASED GAS COST (1307(f) RATES)

COMPUTATION OF PURCHASED GAS COSTS

The purchased gas cost rates for Residential, Commercial, and Industrial Service customers shall be computed to the nearest one-hundredth cent (0.01¢) in accordance with the formula set forth below:

$$\text{Demand} = \frac{DC - B - R - DOU}{S+P1AC+SBC}$$

$$\text{Commodity} = \frac{CC}{S+SBR}$$

$$\text{Over/Under Collection} = \frac{E}{S+SBR}$$

(C)

(For definitions of "DC", "CC", "E", "S", "SBC", “SBR”, “NP1”, P1AC”, "R", "B", and “DOU” refer to Section below this rider).

The currently effective purchased gas cost rates are reflected on Tariff Pages 3 and 4. **(C)**

(C)

(C)-Indicates Change

RIDER
PURCHASED GAS COST (1307(f) RATES)

DEFINITIONS

"DC": The projected demand or capacity cost of purchased gas. **(C)**

"CC": The projected commodity cost of purchased gas.

"DOU": Experienced net overcollection or undercollection of the demand or capacity cost of purchased gas, including any interstate pipeline refunds of demand costs. Any changes in demand costs will be reflected in this calculation.[1] **(C)**

"E": Experienced net overcollection or undercollection of the commodity cost of purchased gas[1].

"S": Projected retail sales in Mcf during the application period.

"NP1": Projected volumes in Mcf for NP-1 transportation customers and any customer served by a NP-1 Supplier.

"P1AC": Projected volumes in Mcf for P-1 transportation customers who are assigned capacity.

"SBC": Projected contracted standby volumes in Mcf by NP-1 transportation customers.

"SBR": Projected retail commodity standby volumes in Mcf.

"R": Shared (savings) or costs for demand charge recovery from the capacity-release program.

"B": Balancing recovery.

"Projected" refers to the twelve-month period beginning with October 1 of the year that the calculation is made.

ADJUSTMENT TO BASE RATES

Whenever a change occurs in the calculation rates for collection of purchased gas costs, a corresponding change will occur in the base rates of applicable rate schedules.

SUPPLIER REFUND

Supplier refunds will be included in the calculation of current period gas costs and will be reflected in the month such refund is received by the Company. Interest beyond that included from the supplier is not applicable. **(C)**

FILING WITH THE COMMISSION

The Company shall meet all the filing requirements set forth in the regulations implementing Section 1307(f) of the Public Utility Code.

REPORTING REQUIREMENTS

The Company shall file quarterly reports within thirty (30) days following the conclusion of each computation year quarter. These reports will be in such form as the Commission shall have prescribed.

- - - - - - - -

[1]Interest will be applied in accordance with the applicable law.

(C) – Indicates Change

THIS PAGE INTENTIONALLY LEFT BLANK

(C)

THIS PAGE INTENTIONALLY LEFT BLANK

(C)

RIDER
TRANSITION COST RECOVERY MECHANISM

1. This Rider establishes a mechanism for the recovery of nongas transition costs from the Company's customers, except to the extent that a customer uses transportation service under Rate GS-T for the delivery of gas transported solely on intrastate pipeline facilities. Nongas transition costs are defined as pipeline gas supply realignment costs and stranded costs.

2. For purposes of nongas transition costs recovery, the Company will assign its recoverable transition costs and any reconciliations of transition costs between two groups of customers--those customers whom the Company designates as "competitive" and those customers whom the Company designates as "noncompetitive." For purposes of this recovery mechanism, competitive customers shall include all customers to whom the Company charges less than its maximum tariffed retail or transportation rates in order to gain or maintain the customers' patronage in the face of competitive pressures. For purposes of this recovery mechanism, noncompetitive customers shall include all of the Company's customers who are not competitive.

3. The assignment of nongas transition cost responsibility to the Company's competitive customers shall be equal to that portion of the revenues that those customers contribute under the Company's program for the release of firm transportation pipeline capacity as set forth in this tariff, and that is designated, either through prearrangement or open bidding, as "transition costs." Notwithstanding the foregoing, the Company may charge a volumetric surcharge to competitive customers. Any additional recovery from competitive customers shall be credited against the nongas transition costs allocated to the Company's noncompetitive customers. The assignment of transition cost responsibility to the Company’s noncompetitive customers shall be equal to the difference between the Company’s total nongas transition cost liability and the amount of that liability that is allocated to competitive customers.

4. A surcharge for the recovery of nongas transition costs from noncompetitive customers will be recalculated every three months, with the recalculations to be effective on or around January 1, April 1, July 1, and October 1 of each year. The Company will file the January 1, April 1, and July 1 recalculations on one day's notice to the Commission, and these filings are referred to in this rider as the "quarterly recalculation," and will file the October 1 recalculation on thirty days' notice to the Commission.

5. The surcharge will be designed to recover (a) those nongas transition costs that have been billed to the Company by interstate pipelines and (b) those costs that have been approved by the Federal Energy Regulatory Commission to be billed to the Company during the 12-month period following the surcharge filing date.

6. At the time of each quarterly recalculation of the surcharge, the Company will reconcile its actual billed costs over the three-month period that ends one month prior to the filing of the recalculation against the costs that had been projected for that same period and will incorporate the reconciliation within its recalculations; however, no adjustment will be made to reflect variations in billed throughput during such periods. The Company will accompany its recalculation of the surcharge that will become effective on October 1, 1994, with a reconciliation of actual transition cost revenues recovered from the Company's customers from the effective date of the surcharge through July 31, 1994, against the revenues projected to have been recovered over the same period, including adjustments to reflect volumetric variations. The Company will accompany its recalculations of the surcharges that will become effective on or around each October 1 after 1994 with a reconciliation of actual transition cost revenues recovered from its customers over the 12 months ending July 31 of the particular year against the revenues projected to have been recovered over the same 12-month period.

RIDER
TRANSITION COST RECOVERY MECHANISM

7. The Company will reduce the recoverable nongas transition costs allocated to its noncompetitive customers by the portion of the revenues that those customers are projected to contribute under the Company's program for the release of firm transportation pipeline capacity as set forth in this tariff and that is designated, either through prearrangement or open bidding, as transition costs. The Company will calculate the unit surcharge rates applicable to noncompetitive customers by dividing the recoverable nongas transition costs allocated to them, net of any reconciliations (including any additional nongas transition costs recovered by the Company from competitive customers under paragraph 3), and net of capacity release revenues as described in this paragraph, by the retail and transportation volumes projected to be consumed by noncompetitive customers, exclusive of those volumes of Pennsylvania-produced natural gas supplies transported by noncompetitive customers.

8. The surcharge rates applicable to noncompetitive customers are as follows:

Retail	$0.0000/Mcf
Transportation	$0.0000/Mcf

The surcharge rates, if any, applied to competitive customers will be determined on an individual customer basis.

RIDER SUPPLIER CHOICE

This Rider has been established to recover costs associated with Supplier Choice. The initial filing includes costs related to implementation and administration of the Account Number Access Mechanism per the Commission's Final Order at Docket No. M-2015-2468991 entered June 30, 2016 and costs associated with the implementation and administration of the Supplier Bill in accordance the Commission's Final Order entered August 20, 2015 at Docket No. M-2015-2474802.

The charges assessed per this rider shall be assessed to customers served under rate schedules RS, Commercial SGS, Industrial SGS, Rate GS-T – Residential, Rate GS-T Commercial SGS, and Rate GS-T Industrial SGS. Charges assessed per this rider shall not be applicable to customers served in the Company's CAP or Pilot E-CAP (E-CAP) program.

The Company shall provide a reconciliation of actual costs with actual revenues recovered under Rider – Supplier Choice for the twelve month period ended August 31. The rate will be adjusted annually for the resulting over/undercollection to be effective October 1.

Application of the Supplier Choice Charge shall be subject to review and audit by the Commission at intervals that it shall determine. The Commission shall review the level of charges produced by the Supplier Choice Charge and the costs included therein.

No interest shall be included in the Supplier Choice Charge.

The Supplier Choice Rider shall become effective upon Commission approval and shall remain in effect until otherwise directed by the Commission and until the final reconciliation statement is approved and charges fully recovered.

The currently effective Supplier Choice Charge per Month is reflected on Tariff Page Nos. 3 and 4.

RIDER
MERCHANT FUNCTION CHARGE (MFC)

The Merchant Function Charge (MFC) shall be added to the gas cost charges applicable under rate schedules Rate RS, Rate SGS, Rate MGS, LGS and GS-T. The gas costs charges include the Capacity Charge, Gas Cost Adjustment Charge and Commodity Charge.

The MFC shall be updated quarterly effective with each 1307(f) rate change. The write-off factor used to calculate the quarterly MCF shall only be determined in a base rate case filing.

For residential customers receiving service under Rate RS and Rate GS-T, the MFC shall equal the write-off factor of 2.200% times the gas cost charges as set forth in Peoples' Rider Purchase Gas Cost. The current MFC applicable to Rate RS customers is shown on Tariff Page Nos. 3 and 4**.**

For Small, Medium, and Large General Service customers receiving service under Rate SGS, MGS, LGS and Rate GS-T, the MFC shall equal the write-off factor of 0.332% times the gas cost charges as set forth in Peoples' Rider Purchase Gas Cost. The current MFC applicable to these customers is shown on Tariff Page Nos. 3 and 4**.**

RIDER
UNIVERSAL SERVICE

This rider shall be applicable to all residential customers except for any residential customer served in the Company's Customer Assistance Program (CAP). This rider recovers costs related to the Company's universal service programs.

The charges assessed per this rider shall be assessed to residential customers served under rate schedules Rate RS and Rate GS-T. Charges assessed per this rider shall not be applicable to customers served in the Company's CAP or Pilot E-CAP (E-CAP).

The currently effective Rider Universal Service Charge is reflected on Tariff Page Nos. 3 and 4.

Costs related to the following universal service programs shall be calculated and recovered per this rider: CAP; Low Income Usage Reduction Program (LIURP); Community Partnership for Weatherization; and the Emergency Furnace and Houseline Repair Program.

CAP Costs will be calculated to include the following components:

1. Projected CAP Credit – The difference between the total Rate RS bill, excluding Rider Universal Service, and the CAP or E-CAP payment amount which is comprised of the sum of the percentage of income payment or minimum bill, whichever is greater. The projected CAP Credit shall be calculated based on current rates, current CAP or E-CAP payment amounts and projected normalized annual volumes for CAP and E-CAP participants. Separate CAP credit costs will be calculated for: 1) current active CAP and E-CAP participants; and 2) the projected average net change in the number of CAP and E-CAP participants for the projected quarter.
2. Pre-Program Arrearage Forgiveness – Projected CAP and E-CAP pre-program arrearage forgiveness costs for the projected annual period.

Costs for the LIURP and Emergency Furnace and Houseline Repair programs will be calculated based on the projected number of eligible participants for the projected annual period. Recoverable CAP credit and arrearage forgiveness amounts will be reduced by 4.7% times the average CAP credit and arrearage forgiveness of existing CAP customers times the incremental number of CAP participants in excess of 30,800 CAP customers. Historical payment statistics will be utilized in the development of projected CAP credit and arrearage forgiveness amounts. Third party costs for the purposes of CAP administration will be included in the calculation of the Rider.

The applicable unit for this rider shall be determined by dividing the total costs universal service plan costs by the annual projected non-CAP residential volumes established in the most recent 1307(f) gas cost recovery proceeding. For bill display purposes, the unit rate calculated under this rider shall be included in a single delivery charge that also includes the residential delivery charge set forth in rate schedules Rate RS and Rate GS-T.

QUARTERLY ADJUSTMENT

Effective with each quarterly 1307(f) gas cost change, the unit rate under this rider shall be recalculated to reflect current cost data for the cost components outlined above. The updated rate will be filed to be effective one day after the filing.

ANNUAL RECONCILIATION

As part of the quarterly adjustment filing effective on April 1 of each year, the Company shall include a reconciliation of actual revenues recovered under Rider Universal Service and actual universal service costs incurred for the twelve month period ended December 31. The resulting over/undercollection will be included in the quarterly Rider Universal Service rate adjustment to be effective April 1.

RIDER
GAS PROCUREMENT CHARGE

For bill presentment purposes, the Gas Procurement Charge (GPC) shall be added to the Commodity Gas Cost Charge applicable to sales rate schedules Rate RS, Rate SGS, Rate MGS, Rate LGS and any other applicable sales service rate schedule under this tariff.

Recoverable Costs

The GPC shall include gas procurement costs incurred by the Company solely on behalf of its sales service customers. The GPC shall exclude any costs recovered through Rider Purchased Gas Cost - 1307(f) gas cost recovery mechanism. The GPC shall exclude any gas procurement costs incurred by the Company in support of transportation or shopping customers or programs.

Recalculation of the GPC

The costs to be included in the GPC shall be calculated in accordance with Commission regulations and shall be determined and updated in each base rate case filed by the Company. The GPC shall not be subject to reconciliation for any prior-period or over-or-under collections.

The currently effective Rider GPC Charge is reflected on Tariff Page No. 3.

PEOPLES NATURAL GAS COMPANY LLC

SUPPLEMENT NO. 8 TO GAS—PA PUC NO. 48
THIRD REVISED PAGE NO. 78
CANCELLING SECOND PAGE NO. 78

RIDER
TAX REPAIRS SURCREDIT (TRS)

Pursuant to Docket Nos. P-2020-3021191, A-2021-3029831 and A-2021-3029833, as amended at Docket No. R-2023-3044549, there shall be a surcredit of negative 0.6146% applied to the customer charge and the base rate delivery charge under all rate schedules served by this tariff. Any customer receiving a discounted flexible delivery charge rate will not be eligible for the surcredit. **(I)**

Purpose: The purpose of this surcredit is to refund, over a ten-year period beginning January 1, 2025, the tax benefits of certain catch-up tax deduction resulting from the Company's defining its unit of property under the Internal Revenue Service's Treasury Regulations 1.263(a)-3 and 1.162-4 and IRS Rev. Proc. 2023-15. Specifically, the surcredit shall reflect:

- the difference between federal and state income tax depreciation claimed versus the repair deductions that would have been claimed for the tax years ended December 31, 2012 through March 15, 2020 for Peoples Natural Gas Company, net of amounts refunded prior to January 1, 2025;
- the difference between federal and state income tax depreciation claimed versus the repair deductions that would have been claimed for the tax years ended December 31, 2013 through December 31, 2020 for the former Peoples Gas Company;
- the difference between federal and state income tax depreciation claimed versus the repair deductions that would have been claimed for mandatory relocation projects for the tax years ended December 31, 2012 through December 31, 2021 for Peoples Natural Gas Company; and December 31, 2013 through December 31, 2021 for the former Peoples Gas Company.
- the amortization of excess deferred taxes that are no longer protected under the IRS normalization rules due to the change in tax accounting methods.
- adjustments to reflect reduced state income tax benefits resulting from changes to the state Corporate Net Income Tax rate.

Effective Date: Beginning with service rendered January 1, 2025.

Calculation: The annual amount of the surcredit will be approximately $3.9 million, equal to 100% of the tax benefit from the afore-mentioned items of approximately $473.7 million refunded over a ten-year period. **(D)**

Reconciliation: In accordance with Section 1307(e) of the Public Utility Code, the Company shall provide a reconciliation of the amount refunded and one-tenth of the projected tax benefit of the afore-mentioned items for the twelve-month period ended December 31. The rate will be adjusted annually for the resulting over/undercollection to be effective April 1. The annual reconciliation will be filed by March 21 for the preceding calendar year.

Interest on over or under collections shall be computed monthly at the residential mortgage lending rate specified by the Secretary of Banking in accordance with the Loan Interest and Protection Law (41 P.S. §§ 101, et seq.) from the month that the over or under collection occurs to the mid-point of the recoup or refund period.

This surcredit will remain in place for eleven years (ten years of refund period and one year for a final reconciliation period). In the final year, the Company also shall include the difference between the actual tax benefits received and the projected tax benefits previously reflected in calculating the surcredit, as provided by the Order at Docket No. P-2020-3021191. Any over or under ratepayer surcredit amounts remaining at the end of year eleven shall be flowed through to Customers in the Company's next quarterly 1307(f) gas cost filing. Within 60 days of termination of the distribution of the rate credit, the Company shall file with the Commission and provide a copy to all parties to Docket No. P-2020-3021191, A-2021-3029831 and A-2021-3029833, as amended at Docket No. R-2023-3044549 a final reconciliation of all surcredit amounts.

Upon determination that this surcredit, if left unchanged, would result in a material over or under collection, the Company may file with the Commission, on at least 10 days' notice, for an interim revision of this surcredit.

(I) – Indicates increase, **(D)** – Indicates decrease.

ISSUED: March 21, 2025 **EFFECTIVE: April 1, 2025**

RIDER
WEATHER NORMALIZATION ADJUSTMENT (WNA)

APPLICATION AND PURPOSE

A Weather Normalization Adjustment ("WNA") shall be applied to Residential, Commercial SGS, and Commercial MGS customers receiving service under Rate Schedules RS, CAP, SGS, and MGS for bills rendered during the heating season of October 1st through May 31st.

WNA is a distribution charge adjustment and is considered a basic service charge.

Calculated WNA amounts shall be subject to Rider DSIC, Rider STAS, Rider Tax Repairs Surcredit, and Rider TCJA. No additional riders or surcharges will be applied to the calculated WNA.

CALCULATION

The WNA will be applied to bills rendered October 1st through May 31st and shall be calculated on a customer account specific basis in accordance with the formula below:

WNBM = BLMM+ [(NHDD +/- (NHDD x 3%)) /AHDD) x (AMUM-BLMM)]
WNAM = WNBM – AMUM
WNAM = WNAC x Distribution Charge

a) Weather Normalized Billing Mcfs ("WNBM") will be calculated as the Base Load Monthly Mcfs ("BLMM") added to the product of the [Normal Heating Degree Days ("NHDD"), adjusted for a 3% deadband, divided by the Actual Heating Degree Days ("AHDD")] and the [Actual Monthly Usage Mcfs ("AMUM") less the BLMM]. Weather Normalized Billing Mcfs (WNBM) will only be calculated if the AMUM exceeds the BLMM. WNA will not be applicable for the billing period if AMUM is less than the BLMM.

b) BLMM shall be established for each customer by averaging the actual daily consumption from the billing system, measured in Mcf, for service rendered July 1st thru August 31st of the most recent period.

c) AMUM shall be measured for each customer and billing cycle.

d) NHDD shall be based upon the heating degree days utilized to develop the revenue requirement in the Company's general rate case proceeding at Docket No. R-2023-3044549. NHDD shall be updated in future general rate case proceedings.

e) AHDD shall be the actual experienced heating degree days during the billing cycle days for the customer based upon experienced actual temperatures as reported by the National Oceanic and Atmospheric Administration (NOAA) for weather stations utilized by the Company for the area.

f) AMUM will be subtracted from the WNBM to compute the Weather Normalized Adjustment Mcfs ("WNAM").

g) A deadband of 3% shall apply. The WNA for a billing cycle will apply only if the AHDD for the billing cycle are lower than 97% or higher than 103% of the NHDD for the billing cycle.

RIDER
WEATHER NORMALIZATION ADJUSTMENT (WNA)

h.The WNAM shall then be multiplied by the applicable Rate Schedule Distribution Charge based on service rendered to compute the WNA amount that will be charged or credited to each Residential, SGS, and MGS customer receiving service under Rate Schedules RS, CAP, SGS, and MGS.

i.In the event a customer's bill needs to be canceled and rebilled at any time, the WNA will be recalculated using the most recently available data for the billing period. In some cases, updates in data used in the calculation, may result in a different WNA for the billing period.

j. WNA amounts will be displayed as a separate line item on the customer's bill.

k. The WNA adjustment for bills rendered in May will not exceed 100% percent of the billed distribution amount (delivery charge amount plus customer charge amount) for that same period.

l. The Company will file a report annually with the Commission on or before September 1st for the 12-month period ending June of the same year. The filing will contain WNA details as defined in the Company's most recent general rate case proceeding.

RIDER
Distribution System Improvement Charge (DSIC)

In addition to the net charges provided for in this Tariff, a charge of 4.04% will apply consistent with the Commission Order dated May 23, 2013 at Docket No. P-2013-2346161 approving the DSIC. **(I)**

Purpose: To recover the reasonable and prudent costs incurred to repair, improve, or replace eligible property which is completed and placed in service and recorded in the individual accounts, as noted below, between base rate cases and to provide the Company with the resources to accelerate the replacement of aging infrastructure, to comply with evolving regulatory requirements and to develop and implement solutions to regional supply problems.

The costs of extending facilities to serve new customers are not recoverable through the DSIC.

Eligible Property:

- Gathering Lines (account 332);
- Storage Lines (account 353);
- Transmission Lines (account 367);
- Piping (account 376);
- Couplings (account 376);
- Gas service lines (account 380) and insulated and non-insulated fittings (account 378);
- Valves (account 376);
- Excess flow valves (account 376);
- Risers (account 376);
- Meter bars (account 382);
- Meters (accounts 334,369,381);
- Unreimbursed costs related to highway relocation projects where a natural gas distribution company or city natural gas distribution operation must relocate its facilities; and
- Other related capitalized costs (accounts 303, 387, 391.02 and 392)

Effective Date: The DSIC will become effective for bills rendered on and after 7/1/2013.

Computation of the DSIC

The initial DSIC, effective July 1, 2013, shall be calculated to recover the fixed costs of eligible plant additions that have not previously been reflected in the Company's rates or rate base and will have been placed in service during the (*three-month period ending one month prior to effective date*). Thereafter, the DSIC will be updated on a quarterly basis to reflect eligible plant additions placed in service during the three-month period ending one month prior to the effective date of each DSIC update. Thus, changes in the DSIC rate will occur as follows:

Effective Date of Change	Date to which DSIC-Eligible Plant Additions Reflected
July 1	March 1 through May 31
October 1	June 1 through August 31
January 1	September 1 through November 30
April 1	December 1 through February 28

Determination of Fixed Costs: The fixed costs of eligible distribution system improvements will consist of depreciation and pre-tax return, calculated as follows:

1. Depreciation: The depreciation expense shall be calculated by applying the annual accrual rates employed in the Company's most recent base rate case for the plant accounts in which each retirement unit of DSIC-eligible property is recorded to the original cost of DSIC-eligible property.

(I)= Indicates increase

RIDER
Distribution System Improvement Charge (DSIC)

2. Pre-tax return: The pre-tax return shall be calculated using the statutory state and federal income tax rates, the Company's actual capital structure and actual cost rates for long-term debt and preferred stock as of the last day for the three-month period ending one month prior to the effective date of the DSIC and subsequent updates. The cost of equity will be the equity return rate approved in the Company's last fully litigated base rate proceeding for which a final order was entered not more than two years prior to the effective date of the DSIC. If more than two years shall have elapsed between the entry of such a final order and the effective date of the DSIC, then the equity return rate used in the calculation will be the equity return rate calculated by the Commission in the most recent Quarterly Report on the Earnings of Jurisdictional Utilities released by the Commission.

Application of DSIC: The DSIC will be expressed as a percentage carried to two decimal places and will be applied to the total amount billed to each customer for distribution service under the Company's otherwise applicable rates and charges, excluding amounts billed for Rider State Tax Adjustment and Rider Purchased Gas Cost. To calculate the DSIC, one-fourth of the annual fixed costs associated with all property eligible for cost recovery under the DSIC will be divided by one-fourth of the Company's annual projected revenue for distribution service (including all applicable clauses and riders), exclusive of Rider State Tax Adjustment Surcharge and Rider Purchased Gas Cost. **(C)**

Formula: The formula for calculation of the DSIC is as follows

$$DSIC = \frac{(DSI*PTRR)+STFT+Dep+S}{PQR} + \frac{e}{PQR:}$$

Where:

DSI = Original cost of eligible distribution system improvement projects net of accrued depreciation and associated accumulated deferred income taxes pertaining to property-related book/tax depreciation timing differences resulting from the use of accelerated depreciation per Internal Revenue Code, 26 U.S. Code § 168.

PTRR = Pre-tax return rate applicable to DSIC-eligible property.

STFT = (State Tax Flow Through) Pre-tax flow through calculated on book-tax timing differences between accelerated tax depreciation and book depreciation net of federal tax. **[NOTE: UTILITY MAY ELECT TO INCLUDE THE STFT IN THE PTRR COMPONENT.]**

Dep = Depreciation expense related to DSIC-eligible property.

e = Amount calculated under the annual reconciliation feature or Commission audit, as described below.

S = Synergy fees/(revenues); cost assessed (revenue received) for serving customers of another legal entity approved at G-2014-2448803.

PQR = Projected annual revenues for distribution service (excluding Rider State Tax Adjustment and Rider Purchased Gas Cost) from existing customers plus netted revenue from any customers which will be gained or lost by the beginning of the applicable service period will be divided by four to arrive at a quarterly revenue figure. **(C)**

Quarterly Updates: Supporting data for each quarterly update will be filed with the Commission and served upon the Commission's Bureau of Investigation and Enforcement, the Office of Consumer Advocate, Office of Small Business Advocate, and Commission's Bureau of Audits at least (10) days prior to the effective date of the update.

(C)-Indicates Change

RIDER
Distribution System Improvement Charge (DSIC)

Customer Safeguards:

1. **Cap:** The DSIC is capped at 5.0% of the amount billed to customers for distribution service (including all applicable clauses and riders) as determined on an annualized basis.

2. **Audit/Reconciliation**: The DSIC is subject to audit at intervals determined by the Commission. Any cost determined by the Commission not to comply with any provision of 66 Pa C.S. §§ 1350, *et seq,* shall be credited to customer accounts. The DSIC is subject to annual reconciliation based on a reconciliation period consisting of the twelve months ending December 31 of each year or the utility may elect to subject the DSIC to quarterly reconciliation but only upon request and approval by the Commission. The revenue received under the DSIC including Synergy fees received, for the reconciliation period will be compared to the Company's eligible costs, including Synergy fees paid, for that period. The difference between revenue and costs will be recouped or refunded, as appropriate, in accordance with Section 1307(e), over a one-year period commencing on April 1 of each year, or in the next quarter if permitted by the Commission. If DSIC revenues exceed DSIC-eligible costs, such over-collections will be refunded with interest. Interest on over-collections and credits will be calculated at the residential mortgage lending specified by the Secretary of Banking in accordance with the Loan Interest and Protection Law (41 P.S. §§ 101, *et seq*.) and will be refunded in the same manner as an over-collection. The utility is not permitted to accrue interest on under collections.

3. **New Base Rates**: The DSIC will be reset to zero upon application of new base rates to customer billings that provide for prospective recovery of the annual costs that had previously been recovered under the DSIC. Thereafter, only the fixed costs of new eligible plant additions that have not previously been reflected in the Company's rates or rate base will be reflected in the quarterly updates of the DSIC.

4. **Customer Notice**: Customers shall be notified of changes in the DSIC by including appropriate information on the first bill they receive following any change. An explanatory bill insert shall also be included with the first billing.

5. **All Customer Classes**: The DSIC shall be applied equally to all customer classes, except that the Company may reduce or eliminate the Rider DSIC to any customer with competitive alternatives or potential competitive alternatives and customers having negotiated contracts with the Company, if it is reasonably necessary to do so.

6. **Earnings Reports**: The DSIC will also be reset to zero, if, in any quarter, data filed with the Commission in the Company's then most recent Annual or Quarterly Earnings reports show that the Company would earn a rate of return that would exceed the allowable rate of rate of return used to calculate its fixed costs under the DSIC as described in the pre-tax return section. The utility shall file a tariff supplement implementing the reset to zero due to overearning on one-day's notice and such supplement shall be filed simultaneously with the filing of the most recent Annual or Quarterly Earnings reports indicating that the Utility has earned a rate of return that would exceed the allowable rate of return used to calculate its fixed costs.

7. **Residual E-Factor Recovery Upon Reset to Zero**: The utility shall file with the Commission interim rate revisions to resolve the residual over/under collection or E-factor amount after the DSIC rate has been reset to zero. The utility can collect or credit the residual over/under collection balance when the DSIC rate is reset to zero. The utility shall refund any overcollection to customers and is entitled to recover any undercollections as set forth in Section 4.B. Once the utility determines the specific amount of the residual over or under collection amount after the DSIC rate is reset to zero, the utility shall file a tariff supplement with supporting data to address that residual amount. The tariff supplement shall be served upon the Commission's Bureau of Investigation and Enforcement, the Bureau of Audits, the Office of Consumer Advocate, and the Office of Small Business Advocate at least ten (10) days prior to the effective date of the supplement.

PEOPLES NATURAL GAS COMPANY LLC

SUPPLEMENT NO. 15 TO GAS—PA PUC NO. 48
FOURTH REVISED PAGE NO. 84
CANCELLING THIRD PAGE NO. 84

Rider TCJA - TCJA TEMPORARY SURCHARGE FOR FORMER PG DIVISION CUSTOMERS

To implement the effects of the Tax Cuts and Jobs Act (TCJA), on March 15, 2018 the Pennsylvania Public Utility Commission (Commission) issued a Temporary Rates Order at Docket No. M-2018-2641242 directing the utility to file its current base rates and riders as temporary rates, pursuant to Section 1310(d) of the Public Utility Code. 66 Pa. C.S. § 1310(d). Subsequently, on May 17, 2018 and June 14, 2018, the Commission entered Orders superseding the March 15, 2018 Temporary Rates Order directing the utility to establish temporary rates and required utilities to implement negative surcharges as a credit for intrastate service to all customer bills to reflect reduced taxes under the TCJA. This negative surcharge was distributed equally among the utility's various customer classes, exclusive of STAS and automatic adjustment clause revenues.

This negative surcharge was reconciled at the end of each calendar year and remained in place until the utility filed and the Commission approved new base rates for the utility pursuant to Section 1308(d) that include the effects of the TCJA tax rate changes. The effects of the TCJA for Peoples Natural Gas Division were fully reflected in the Company's rate case at Docket No. R-2018-3006818. The effects of the TCJA for Peoples Gas Division customers were reflected in the Company's base rate case at Docket No. R-2023-3044549, except for the remaining over/under collection as of the effective date of new rates.

Rider TCJA will remain in effect for former PG Division customers until the remaining TCJA over/under collection is refunded or recovered from customers.

Interest on over or under collections shall be computed monthly at the residential mortgage lending rate specified by the Secretary of Banking in accordance with the Loan Interest and Protection Law (41 P.S. §§ 101, et seq.) from the month that the over or under collection occurs to the mid-point of the recovery period.

Upon determination that the negative surcharge, if left unchanged, would result in a material over or under collection, the Company may file with the Commission, on at least 10 days' notice, for an interim revision of the TCJA Temporary Surcharge.

The TCJA Temporary Surcharge will be filed with the Commission by December 1 of each year to become effective the following January 1.

RATE CHART

	Surcharge per meter per month	Surcharge per MCF	
Residential	$0.0000	$0.0000	(I)
SGS with annual consumption less than 500 Mcf	$0.0000	$0.0000	
SGS with annual consumption equal to or greater than 500 Mcf but less than 1,000 Mcf	$0.0000	$0.0000	
MGS with annual consumption equal to or greater than 1,000 Mcf but less than 2,500 Mcf	$0.0000	$0.0000	
MGS with annual consumption equal to or greater than 2,500 Mcf but less than 25,000 Mcf	$0.0000	$0.0000	
LGS with annual consumption equal to or greater than 25,000 Mcf but less than 50,000 Mcf	$0.0000	$0.0000	
LGS with annual consumption equal to or greater than 50,000 Mcf but less than 100,000 Mcf	$0.0000	$0.0000	
LGS with annual consumption equal to or greater than 100,000 Mcf but less than 200,000 Mcf	$0.0000	$0.0000	
LGS with annual consumption equal to or greater than 200,000 Mcf but less than 750,000 Mcf	$0.0000	$0.0000	
LGS with annual consumption equal to or greater than 750,000 Mcf but less than 2,000,000 Mcf	$0.0000	$0.0000	
LGS with annual consumption greater than 2,000,000 Mcf	$0.0000	$0.0000

DEFINITION OF TERMS

The following is a list of some of the most commonly used terms in this Tariff. In the event of a conflict between any of the definitions set forth below or those contained in a more specific provision of this Tariff, the definition contained in the more specific provision shall prevail.

Aggregate Daily Consumption Volume - The aggregate quantity of gas estimated by the Company to be consumed by all Customers served by the NGS on any day or the direct end user in an OFO situation under Rule 4 of the Tariff.

Aggregate Monthly Consumption Volume - The aggregate quantity of gas actually consumed by all Customers of Pool Operator's pool over their respective Billing Cycles for the month as determined by the Company through actual or estimated meter readings.

Aggregator - A broker, marketer or producer of natural gas which aggregates locally produced gas, injected directly into the Company's lines, into a pool.

Billing Cycle - The period that occurs between actual or estimated meter readings taken by the Company for billing purposes.

Calendar Month Pool Sendout - The sum of (1) the Aggregate Monthly Consumption Volumes plus (2) Pool-to-Pool Volumes nominated for the month.

Calendar Month Pool Supply - The sum of the Daily Available Volumes during the month as adjusted for any gas received from other Pool Operators during the month and any imbalance sales to or purchases from the Company.

Chapter 56 – The Commission regulations that govern, among other things, metering, billing and collections for residential gas and electricity service.

Commodity Charge – A charge designed to recover the cost of producing or procuring natural gas.

Commodity Service – Service provided by the Company or a natural gas Supplier which involves the purchase of gas commodity by the Customer.

Company – The entity doing business as Peoples Natural Gas Company LLC.

Customer – Any person, partnership, association, corporation, or other entity (i) in whose name a service account is listed, (ii) who occupies or is the Customer for any premises, building, structure, etc. or (iii) is primarily responsible for payment of bills. A Customer includes anyone taking Supplier of Last Resort Service and/or Distribution Service under the Company's Retail Tariff.

Daily Available Volume - The total quantity of gas available to be allocated by the NGS for delivery by the Company to all Customers on any day. This quantity is equal to the total volume of gas actually delivered to the Company for the NGS's account on that day, less an appropriate retainage percentage, plus any adjustments associated with the reconciliation of local gas volumes and/or the reconciliation of monthly volumes as set forth in Rates P-1 and NP-1**.**

Day – A 24-hour period beginning at 10 a.m. and ending at 10 a.m. or as subsequently defined by natural gas industry standards promulgated by FERC.

Dekatherm (Dth) – 10 therms or 1,000,000 British thermal units ("Btu")

Direct End User – A Customer that receives distribution service from the Company and purchases commodity service from a natural gas Supplier who does not pool supplies under the Company's Rate P-1 or Rate NP-1.

DEFINITION OF TERMS (continued)

Local Gas Aggregation Agreement - The Local Gas Aggregation Agreement between the Company and the NGS.

Mcf – 1,000 cubic feet of gas. This is a measure of gas usage.

Measurement Operating Agreement - The agreement between a producer of natural gas and the Company which sets forth the obligations and responsibilities for owning and operating measurement equipment for designated measuring stations.

Monthly Available Volume - The total quantity of gas available to be allocated by the NGS for delivery by the Company to all Customers for the applicable month. This quantity is equal to the total volume of gas actually delivered to the Company for the NGS's account for the applicable month, less an appropriate retainage percentage, plus any adjustments associated with the reconciliation of local gas volumes.

Natural Gas Supplier (NGS) – An entity that has received a license from the Commission and that sells natural gas to Customers that is delivered through the distribution lines of the Company.

Non-Priority One Pool Operator – A pool operator which aggregates natural gas supplies needed to satisfy the full requirements of one or more Non-Priority One transportation Customers of the Company.

Non-Priority One Pooling Agreement - The Non-Priority-One Pooling Agreement between the Company and the Pool Operator.

Pool Operator – A broker, marketer or producer of natural gas licensed as a gas Supplier by the Pennsylvania Public Utility Commission which has executed a Priority-One or Non-Priority One Pooling Agreement with the Company.

Priority One Pool Operator – A pool operator which aggregates natural gas supplies needed to satisfy the full requirements of Priority One transportation Customers of the Company.

Small Business Customer – A Customer receiving natural gas service for commercial or industrial use whose annual usage is equal to or less than 300 MCF.

Supplier – Shall include, but is not limited to, aggregators, brokers, marketers, natural gas distribution companies, natural gas suppliers or producers.

Supplier of Last Resort – The Company or another entity that provides natural gas supply services to Customers that do not elect another Supplier or choose to be served by the Supplier of last resort, Customers that are refused service from another natural gas supplier, or Customers whose natural gas Supplier fails to deliver the required gas supplies. Currently, the Company is the Supplier of last resort for all Priority-One Customers under the terms of this tariff. Each Customer may only have one Supplier of last resort.

RATES AVAILABLE UNDER THIS TARIFF

Service is made available to NGSs under the rules, regulations, rates and terms contained in this tariff. The following rates are made available to NGSs:

Rate P-1 - Priority One Pooling Service
This rate is available to any broker, marketer or producer of natural gas which aggregates natural gas supplies needed to satisfy the full requirements of Priority One (P-1) transportation Customers of the Company.

Rate NP-1 - Non-Priority One Pooling Service
This rate is available to any broker, marketer or producer of natural gas which aggregates natural gas supplies needed to satisfy the full requirements of Non-Priority One (NP-1) transportation Customers of the Company.

Rate LGA - Local Gas Aggregation Service
This rate is available to any broker, marketer or producer of natural gas which aggregates locally produced gas injected directly into the Company's pipeline system.

Rate SBS – NGS Billing Service
This rate is available to the NGS which receives service under Rate P-1 or Rate NP-1 and elects to have the Company bill Customers for natural gas sold by the NGS.

PEOPLES NATURAL GAS COMPANY LLC **SUPPLEMENT NO. 2 TO GAS—PA PUC NO. S-4**
FIRST REVISED PAGE NO. 7
CANCELING ORIGINAL PAGE NO. 7

RULES AND REGULATIONS

1. Sources of Supply

The Company agrees to receive, for the NGS's account, upstream pipeline transportation volumes, local gas volumes, storage volumes, and Pool-to-Pool Volumes.

In determining the volumes available for delivery to Customers in the applicable month, the Company may retain an appropriate percentage, as set forth in the Company's Retail Tariff, of gas used in Company operations and unaccounted for gas from upstream pipeline transportation volumes and local gas volumes as they are received by the Company. For purposes of determining storage inventory volumes, the retainage percentage shall be applied to volumes at the time the volumes are nominated for injection into storage. Pool-to-Pool Volumes shall be added to the adjusted volumes.

Suppliers will pay for any investment costs and any other agreed-upon fees relating to the delivery of gas into the Company's system. The Company will own and maintain each natural gas connection's tapping tee or pipe and valve.

2. Measurement and Quality of Gas

All gas delivered shall be measured by meter. The term "mcf" as used in the Company's schedule of rates, shall mean 1,000 cubic feet of gas at no more than 8 ounces above an assumed atmospheric pressure of 14.4 pounds at whatever temperature the gas may be during the period of measurement. If gas is supplied from a low-pressure distribution system in which the pressure of the gas is regulated not to exceed 8 ounces, the measurement will be at whatever pressure the gas may be during the period of measurement. If gas is delivered from a high-pressure system, measurement will be corrected to a pressure base of 14.73 psia. If measurement is corrected for temperature, measurement will be corrected to 60ºF.

Gas delivered into the Company's system should be free from oil, water, salt, gum, dust, and other foreign substances that might interfere with the marketability of the gas. Unless otherwise agreed to by the Company, the gas delivered shall contain not less than 967 Btu per cubic foot and shall not exceed 1,100 Btu per cubic foot (as determined by calorimeter test @ 60 degrees Fahrenheit and saturated with water vapor). Gas accepted by the Company that contains less than 967 Btu per cubic foot will be enhanced to ensure that gas delivered by the Company to Customers shall meet Commission heating value requirements, and the Company may charge for this.

Unless otherwise agreed to by the Company through separate agreement, gas delivered by a Supplier shall not contain more than:

(a) Seven (7) pounds of water per million cubic feet on an approved dew point apparatus.
(b) Four (4) percent by volume total inerts including carbon dioxide, nitrogen, argon, and helium provided that total carbon dioxide content shall not exceed two (2) percent by volume.
(c) Thirty hundredths (0.3) grains of hydrogen sulfide per 100 cubic feet.
(d) Ten (10) grains of total sulfur per 100 cubic feet.
(e) Two tenths (0.2) percent by volume oxygen.
(f) No more than (5) percent Hydrogen.

The Company may enter into agreements with suppliers whereby the Company will agree to treat gas on behalf of a Supplier in order to meet such gas quality requirements outlined above. Should the Supplier not enter into such an agreement and fail to meet these gas quality requirements, the Company may refuse to accept gas delivered by the Supplier and should a Supplier cause damage to any metering, regulating and/or other equipment or interruption of service, the Supplier shall reimburse the Company for the costs to repair such damage and for any related costs which the Company may incur to restore service to Customers and/or repair facilities, including payments made by the Company to Customers in settlement of claims arising out of interruption of gas service. The Supplier agrees to allow the Company to make necessary gas samples to permit testing of the delivered gas to determine quality of gas delivered by the supplier.

RULES AND REGULATIONS

2. Measurement and Quality of Gas (continued)

Nonconformance – If the gas offered for delivery by the NGS shall fail at any time to conform to any of the specifications set forth herein, then the Company shall notify the NGS of such deficiency and may at the Company's option refuse to accept delivery pending correction by the NGS. Should any substances not in conformity with the quality standards specified herein enter the Company's facilities and cause damage to gas meters, regulators and/or other equipment, or interruption of service, NGS shall reimburse the Company for the costs to repair such damage and for any related costs which the Company may incur to restore service to, and/or repair facilities, of its Customers, including payments made by the Company to Customers in settlement of claims arising out of interruption of gas service.

3. Critical Day Planning

As events occur that could develop into system emergencies or lead to a threatening of system integrity, the Company may request and/or require NGSs or Customers to take certain actions to protect, maintain, or reestablish the safe operation of the system.

a. Maintenance Alerts (MA) – A maintenance alert is an announcement of actual or pending events related to various physical connections to the Company's system. These communications shall occur on an as needed basis and shall be communicated via the electronic bulletin board as soon as practical.

b. Operational Alert (OA) – An operational alert may be called during periods of projected increased or decreased consumer demand for natural gas. An "OA" is a request for specific action on the part of an individual NGS, or all NGSs. The NGSs are expected to respond to "OAs" as soon as practical by giving notice to the Company of their intended action. These communications shall occur on an as needed basis and shall be communicated via the electronic bulletin board and/or through email as soon as practical.

c. Operational Flow Order (OFO) – An OFO is defined in paragraph 4 of the Supplier Tariff. NGSs are expected to comply with an OFO.

d. Curtailment – In the event of an emergency curtailment of Customer consumption, the Company will alert the appropriate NGSs, and if appropriate, will coordinate with them responses to media and elected officials.

RULES AND REGULATIONS

4. Operational Flow Orders

a. Issuance of OFOs

The Company may issue, in its sole discretion, an OFO (Operational Flow Order) in any of the following circumstances: To the extent possible, the Company will provide a 24-hour prior notice of an OFO in situations where a prior indication of the need to issue an OFO exists.

i. to alleviate conditions that threaten the operational integrity of the Company's system;

ii. to maintain pressures necessary for the Company's operations;

iii. to insure adequate flowing supplies are delivered to specific receipt points on the Company's system; or

iv. to alleviate operational problems arising from overdeliveries or underdeliveries by NGSs or Customers transporting supplies for their own consumption ("Direct End User"), in violation of their agreements or Company tariffs.

b. OFO Procedures

In the event of the issuance of an OFO, NGSs and Direct End Users (or a Supplier that the Direct End User has arranged with and designated to the Company to receive notification of the OFO) will be directed to maintain its supply according to the steps set forth below.

i. The NGS or the Direct End User must adjust supply nominations, including any Pool-to-Pool Volumes to equal Aggregate Daily Consumption Volume and/or hourly consumption levels if necessary, with gas delivered at the points specified by the Company. The Company shall provide such estimates via the electronic bulletin board and/or through email as soon as practical.

ii. Upon the NGS or Direct End User request, the Company will consider, if time permits, adjustments to the Aggregate Daily Consumption Volume or the Daily Available Volume to the extent such adjustment, in the Company's discretion, benefits system operations during the OFO event and if such adjustment is confirmable the Company.

RULES AND REGULATIONS

4. Operational Flow Orders (continued)

c. OFO Penalties

Failure to comply with an OFO may result in the following:
