STATUS REPORT TO THE
PENNSYLVANIA PUBLIC
UTILITY COMMISSION OF
THE
WONDERVIEW WATER CO. AND WONDERVIEW SANITARY
FACILITIES INC.

DATED AUGUST 19, 2026

BY VEOLIA WATER PENNSYLVANIA, INC. AS RECEIVER

DOCKET NO. M-2025-3053936

BACKGROUND

On March 14, 2025, the Pennsylvania Public Utility Commission (Commission) issued an Emergency Order at Docket No. M-2025-3053936, wherein it was directed that Veolia Water Pennsylvania, Inc. (VWPA) act as receiver for Wonderview Water Co. (WWC) and Wonderview Sanitary Facilities Inc. (WSF), beginning on March 21, 2025 and an investigation be instituted into whether the Commission should order a capable public utility to acquire WWC and WSF pursuant to Section 529 of the Pennsylvania Public Utility Code.

VWPA has operated WWC and WSF since March 21, 2025. VWPA used the available customer data provided to contact the customers of WWC and WSF by email/text/phone via the Notify System and by letter via the USPS. The content of these communications alerted the customers to the change in operator, the next steps related to billing, and how to contact VWPA with questions or in the event of an emergency.

This status report provides information on events since VWPA's last status report on May 20, 2026.

STATUS REPORT

Customer Notifications

1. Public notifications issued

VWPA issued a Tier II notice on behalf of WWC on June 30, 2026. This notification is a PADEP requirement in a Consent Order issued January 2024 and is to be issued every 3 months until all conditions listed in the Consent Order are corrected. This Consent Order requires WWC to install meters at wells 2, 3, & 4 for the purpose of measuring and limiting water withdrawal to permitted levels, install a meter at the system entry point to verify the permitted instantaneous max flow into the system is adhered to, install well 3 well head protection, and install well 3 level sensing.

To date VWPA has completed the install of meters on wells 2, 3, & 4, restricted the flow to no more than permitted withdrawal limits on wells 2, 3, & 4, and installed level sensing within well 3. VWPA is currently working on the completion of a project that will move the system entry point and place a meter in a suitable location to correct the entry point flow measurement violation. This project is currently under construction and awaiting PADEP final inspection and the receipt of an operations permit.

Operations

1. Daily operational activities

VWPA has operated WWC and WSF since March 21, 2025. Staff from VWPA continue to visit these locations daily. Chlorine residuals are monitored, chemicals maintained, and daily required DEP testing is conducted. A sampling schedule has been created by VWPA Water Quality to meet PADEP permit compliance requirements and required monthly reports are being filed. VWPA has integrated WWC and WSF system assets into the VWPA GIS mapping system and continues to update these maps with real time data from the field. VWPA Non Revenue Water (NRW) personnel have swept the system to identify existing leaks. These leaks are being repaired by VWPA T&D personnel or contractors.

2. Assessment of customer base and connection status

VWPA has integrated all 162 WWC and 161 WSF customers into its customer management and billing systems. Customers continue to have their meters read and billed monthly in accordance with the WWC and WSF Tariff.

System Improvements

Since VWPA provided the last status update of WWC and WSF, it has done the following:

1. Infrastructure upgrades

Wonderview Water Co.

- Continued Engineering work on the remaining items from DEP consent order.
- Conducted an annual inspection with PADEP July 8th 2026. No additional violations were noted and future improvement plans were discussed.

Wonderview Sanitary Facilities Inc.

- Completed Jetting, Camera, and GPSing of the collection system to assess condition and create accurate mapping.

2. Wonderview Plans for Improvements

- Veolia has submitted plans for improvements to PADEP for their review.

Finance

VWPA has established deferred accounts for Labor and OPEX expenses being incurred by the operation of the WWC and WSF systems. Customers are being billed on the same cycle as before receivership began, with the meters being read on or about the 21st of each month.

2025 Financial Performance

Wonderview Water earned \$61,304 while under receivership with total expenses of \$186,873, providing a loss of \$125,569.

Wonderview Sanitary earned \$80,952 while under receivership with total expenses of \$106,467, providing a loss of \$25,515.

2026 Financial Performance to 6/30/2026

Wonderview Water earned \$52,710 while under receivership with total expenses of \$198,480, providing a loss of \$145,770.

Wonderview Sanitary earned \$47,644 while under receivership with total expenses of \$12,482, providing a profit of \$35,162.

DEP required improvements and improvements to general operating condition have driven most of the variance.

VWPA did not receive the PUC assessments for calendar year 2025 for Wonderview Water and Wonderview Sanitary until July, 2026. The assessments were paid by the end of July.

Purchase

VWPA has completed purchase discussions with the owner of WWC and WSF. Agreements have been signed by VWPA and the owner of WSF and WWC for the purchase of the assets of both companies as well as 3 additional parcels of land necessary to run the operations. The agreements are currently being reviewed by all interested parties for approval.

CONCLUSION

VWPA will continue to operate Wonderview Water Co. and Wonderview Sanitary Facilities Inc. as receiver during the pendency of the 529 Proceeding and will continue to provide

quarterly status reports, as directed by the Commission, in the Emergency Order dated March 14, 2025, Docket No. M-2025-3053936.
