

Re: Docket No M-2026-3059601 Opposition to Redevelopment of Barbadoes Island

To Whom It May Concern at the PUC:

Norristown's Barbadoes Island is NOT a suitable place for an energy generator due to it being susceptible to flooding.

Additionally, Norristown is an Environmental Justice area. We are a lower income community and we are burdened with cleaning up from an industrial past. We do not need air pollution in our community. We need clean electricity generation, which also happens to be the most price stable and cost efficient kinds of new generation.

Thank you,

Jane Pekol
Norristown
