

Comment on docket M-2026-3059601 – Opposing Power Plant on Barbadoes Island

Dear Secretary,

I am a resident just down river from Barbadoes Island and I vehemently oppose the redevelopment of it for new power generation. The ridiculousness of developing in the Schuylkill's floodway is pure human folly. We know the river floods and not just with hurricane remnants. There can be no grid reliability with such a fickle site. A plant built in this flood zone would be very expensive to build and maintain. I cannot support such a reckless and feckless plan.

More industrial development in the Norristown area would also negatively impact property values in an area surrounded by residential neighborhoods. We deserve development that enhances communities, not rests more environmental and financial liabilities on our shoulders. Please focus on sites that are not flood-prone and that have community support.

Sincerely,
Mari Frances Greipp
West Conshohocken PA
