October 15, 2026

The Honorable Matthew L. Homsher
Secretary, Pennsylvania Public Utility Commission
Commonwealth Keystone Building 400 North Street, 2nd Floor
Harrisburg, PA 17120

RE: Application of Transource Pennsylvania, LLC for Certificate of Public Convenience, Docket No. A-2026-3062675;
Application of Transource Pennsylvania, LLC for Siting Application for Franklin County, Docket No. A-2026-3062686;
Petition of Transource Pennsylvania, LLC for Zoning Exemption in Greene Township, Docket No. A-2026-3062687

Dear Mr. Secretary:

The Coalition To Protect Franklin County, on behalf of Franklin County land owners, rate payers and citizens are requesting that the Public Utility Commission take long hard look at the agreement signed on 7/3/2024 between Transource and Franklin County Commissioners and deem it null and void as it is not in the best interest of rate payers, land owners and citizens of Franklin County.

This settlement agreement was never approved by the Commission and is part of an earlier docket that has been closed. The agreement is particular to the Transource Independence Energy Connection (IEC) project which no longer exists. The settlement agreement is contingent upon the specific approval of the named Independence Energy Connection project rejected in a different docket. Because that project was never approved, it is now null and void. This settlement does not carry forward to the instant docket which is for a new project called the Rice-Ringgold Transmission Line Project. The settlement is no longer valid and should be rejected by the Commission.

The agreement is not just and reasonable. There is no reason a private company would be making such precarious agreements with a county.

Franklin County and Transource have no jurisdiction to negotiate private property rights, or influence the ability to negotiate to determine micro-siting or to get in the middle of landowner relationships with Transource.

Additionally the county has no jurisdiction to determine or fix eminent domain matters, micro-siting, or environmental damages. This settlement agreement is not necessary for the project and appears to be a contract to pay Franklin County for permitting results. The \$9M cost of this agreement should belong in FERC Account 426.4, Expenditures for certain civic, political and related activities, Civic and Political expenditures, as the cost of influencing the decisions of public officials.

To piece the details apart, why would we allow funds paid to the county to remediate environmental damages on private land owners properties? The Utility should be responsible to prevent and take care of environmental damages. According to all Transource's experts there are never environmental issues presented when high voltage transmission lines are constructed and installed. Is the county going to pay the land owners for these damages that are now expected to happen? Maybe we should not believe the experts. Why would the County take on such a risk such as this? The settlement makes Franklin County responsible for any environmental damages caused by Transource without capping such financial responsibility at the amount set in the settlement. When environmental damage is caused by Transource, who are landowners supposed to hold legally responsible?

It is the utilities responsibility to site and micro site a transmission line. Again why would Transource agree to give Franklin County an extremely large sum of money to do just this? Is Franklin County going to decide where micro-siting happens, or will micro-siting be something that happens between landowners and Transource? Franklin County has no authority to determine where transmission lines are placed on private property.

Franklin County has no right or authority to speak on the behalf of private land owners in the manner of eminent domain. Millions of dollars of State and county funds have been spent for farm land preservation and agricultural easements, it would be counter intuitive for the county not to defend its investments.

It is very unclear where the money comes from, It can not come from ratepayers if it is being used to influence public officials. It must come from Transource's shareholders. This appears to be simply smoke and mirrors to keep Franklin County from standing in

the path of a future attempt at the denied Independence Energy Connections project. It's terribly sad that Franklin County elected officials failed to educate themselves before signing such a bad agreement.

Franklin County is to support projects and initiatives that are in the interest of the citizens of Franklin County. This agreement along with any failed IEC project or new version of a project does not benefit Franklin County in any manner.

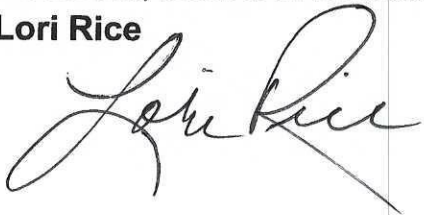

Please find this agreement unacceptable to the land owners, rate payers and citizens of Franklin County and deem it null and void. It is not applicable to the new Transource project or docket. Please see attached over one thousand verified signatures that are calling on the Franklin County Commissioners to withdraw from this agreement.

Thank you for your consideration.

Coalition To Protect Franklin County

President, Board of Directors

Lori Rice

A handwritten signature in cursive script, reading "Lori Rice". The signature is written in black ink and is positioned below the printed name "Lori Rice".

Front page for the online petition

<https://www.change.org/p/commissioners-stand-with-residents-not-corporations-end-the-transource-agreement>

For more than ten years, Franklin County residents have fought to protect our homes, farmland, and way of life from a for-profit corporation, Transource. The company proposes a 29-mile transmission line through eastern Franklin County, with towering 135-foot structures, that would permanently damage our rural landscape.

This project provides **no benefit to Franklin County and no benefit to Pennsylvania**. The Pennsylvania Public Utility Commission denied it, yet Transource continues to push forward for permission to proceed.

In July 2024, Franklin County Commissioners Dean Horst, John Flannery, and Robert Ziabrowski signed an agreement with Transource, in exchange for money, pledging not to oppose the project. This agreement was made **without** the support of the public and is **not in the best interest of Franklin County**.

We are demanding immediate action.

By signing this petition, you are calling on the Franklin County Commissioners to **withdraw from this agreement** and refuse any future deals that harm our county. Franklin County residents care, we are watching, and we will hold our elected officials accountable.

Protect our farmland. Protect our homes. Preserve Franklin County for future generations.

Commissioners! Stand With Residents, Not Corporations: End the Transource Agreement
