TO ALL INTERESTED PARTIES

RE: POSTPONEMENT-Technical Conference on Large Computational Load Cost Allocation

The Pennsylvania Public Utility Commission (Commission) issued a notice on September 22, 2026 scheduling a Technical Conference on Large Computational Load Cost Allocation (Technical Conference). Subsequently, on September 29, 2026, the Federal Energy Regulatory Commission (FERC) issued an Order rejecting key elements of PJM's proposal to hold a reliability backstop procurement auction to acquire capacity to fill a pending shortfall.¹ Additionally, on October 9, 2026, FERC issued a separate Order rejecting PJM's proposed Interim Resource Adequacy Service proposal.² Since these recent decisions by FERC have a direct impact on the large computational load cost allocation topic that was to be discussed at the Commission's Technical Conference, it is prudent for the Commission to stand by and review future PJM and FERC action on these matters. Thus, by this Secretarial Letter the Commission is giving notice of its postponement of the November 17, 2026 Technical Conference. At a later time to be determined by the Commission, the Commission shall provide a future date for the re-scheduling of a Technical Conference regarding large computational load cost allocation in Pennsylvania

Additionally, the comment period for the Technical Conference has been closed until this matter is revisited by the Commission.

Any questions regarding this postponement can be directed to Executive Director Jennifer Berrier at jeberrier@pa.gov.

Sincerely,

A handwritten signature in black ink that reads 'Matthew L. Homsher'.

Matthew L. Homsher
Secretary
