Listing of Completed Third-Party Audits Performed for PPL Electric Utilities Corporation (July 1, 2023 through June 30, 2025)

PPL Corporate Audit Services

The information provided is intended solely for the information and use of the PUC and is not intended to be, and must not be, used by anyone other than the specified party.

Request for Third-Party Audit Reports in Support of PPL Electric's 2025 Rate Case Filing

Below is a listing of completed third-party audit reports for PPL Electric Utilities between July 1, 2023 and June 30, 2025. This listing includes financial, regulatory compliance, and audits performed by / for outside parties. This listing excludes employee benefit plan audits, FERC / NERC related audits, and IRS audits on the PPL Corporation consolidated tax return. The listing also excludes routine project inspections, permit compliance inspections, complaint inspections or spill audits performed by Conservation Districts, PA Department of Agriculture or PA Department of Environmental Protection.

Audit Reports Issued From July 1, 2023 to June 30, 2024

- PA Public Utility Commission – audits of PPL Electric Utilities Act 129 Compliance Rider
- WIPFLI – LIHEAP Compliance Audit 2022/2023
- PA Department of Revenue – Sales/Use Tax Audit on PPL Electric Utilities
- Deloitte Audit of the Financial Statements of PPL Electric Utilities Corporation for the year ended December 31, 2023
- Deloitte Audit of the Financial Statements included in PPL Electric Utilities Corporation FERC Form 1 filing for the year ended December 31, 2023
- Deloitte Audit of the Financial Statements of Operation Help for the year ended December 31, 2023

Audit Reports Issued From July 1, 2024 to June 30, 2025

- Fiscal Technologies – PPL Accounts Payable Recovery Audit
- PA Public Utility Commission – Management & Operations Audit
- PA Public Utility Commission – audits of PPL Electric Utilities Smart Meter Rider
- PA Public Utility Commission – audits of PPL Electric Utilities Universal Service Rider
- Deloitte Audit of the Financial Statements of PPL Electric Utilities Corporation for the year ended December 31, 2024
- Deloitte Audit of the Financial Statements included in PPL Electric Utilities Corporation FERC Form 1 filing for the year ended December 31, 2024
- Deloitte Audit of the Financial Statements of Operation Help for the year ended December 31, 2024

Q.13. Regardless of whether a claim for negative or positive net salvage is made, attach an exhibit showing gross salvage, cost of removal, third party reimbursements, if any, and net salvage for the test year and 4 previous years.

A.13. Attachment II-D-13 provides PPL Electric's claimed provision for negative net salvage. This claim follows principles previously proposed and accepted by the Commission at Docket No. R-842651 for the accounting of the Company's net salvage.

PPL ELECTRIC UTILITIES CORPORATION

Negative Net Salvage
(Thousands of Dollars)

12 Months Ending	Cost of Removal	Gross Salvage	Negative Net Salvage
June 30, 2022	64,914	(1,821)	63,093
June 30, 2023	47,343	(2,792)	44,551
June 30, 2024	44,660	(4,469)	40,191
June 30, 2025	72,870	(4,816)	68,054
June 30, 2026	90,665	(4,419)	86,246
Total for 5-year period ended June 30, 2026	$ 320,452	$ (18,317)	$ 302,135
Five-year average and Negative Net Salvage claim			$ 60,427

Q.14. State the amount of debt interest utilized for test year income tax calculations, including the amount so utilized which has been allocated from the debt interest of an affiliate, and provide details of debt interest and allocation computations.

A.14. PPL Electric does not utilize any debt interest, which has been allocated from the debt interest of an affiliate, in the computation of taxable income. The debt interest utilized for test year income tax calculations is provided in Schedule D-17 of Exhibit Future 1 and Fully Projected Future 1.

Q.15. Provide a schedule for the test year of Federal and Pennsylvania taxes other than income taxes, per books, pro forma at present rates, and pro forma at proposed rates, including the following tax categories:

a) Social security.
b) Unemployment.
c) Capital stock.
d) Public utility.
e) P.U.C. assessment.
f) Other property taxes.
g) Any other appropriate categories.

A.15. Attachment II-D-15 provides a schedule of taxes other than income per books for the Exhibit Historic 1 and per the budget for the Exhibit Future 1 and Exhibit Fully Projected Future 1.

Q.16. Submit a schedule showing the adjustments from taxable net income per books to taxable net income pro forma under existing rates and pro forma under proposed rates, together with an explanation of all normalizing adjustments. Submit detailed calculations supporting taxable income before State and Federal income taxes where the income tax is subject to allocation due to operations in another state or due to operation of other taxable utility or non-utility business, or by operating divisions or areas.

A.16. Detailed calculations supporting PPL Electric's taxable income are shown in Schedule D-17 of Exhibit Future 1 and Exhibit Fully Projected Future 1.

Q.17. Submit a schedule showing for the last 5 years the income tax refunds, plus interest - net of taxes, received from the Federal government due to prior years' claims.

A.17. A schedule of US income tax refunds received for the last 5 years from the federal government follows:

Year Received	Tax Year	Principal	Interest	Total
2020	2019	$1,194	$0	$1,194
2020	2019	$7,584,133	$ 502,542	$8,086,675
2020	2020	$7,584,133	$0	$ 7,584,133
2023	2022	$55,500,000	$0	$ 55,500,000
2024	2021	$200,245,670	$0	$200,245,670
2025	2021	$579,543	$1,267,524	$1,847,067

Q.18. Furnish a breakdown of major items comprising prepaid and deferred income tax charges and other deferred income tax credits, reserves and associated reversals on liberalized depreciation.

A.18. Attachments II-D-18a and II-D-18b provide a breakdown of the major items comprising prepaid and deferred income tax charges and other deferred income tax credits as reflected in Schedule B-1 in Exhibit Future 1 and Exhibit Fully Projected Future 1.

Q.19. Explain how the Federal corporate graduated tax rates have been reflected for rate case purposes. If the Pennsylvania jurisdictional utility is part of a multi-corporate system, explain how the tax savings are allocated to each member of the system.

A.19. The Federal corporate graduated tax rates do not apply to the consolidated group because taxable income exceeds the graduated income limitations.

Tax savings are computed and allocated between the parent corporation and affiliates. PPL Corporation, the parent of the affiliated group, allocates federal income tax based upon the taxable income of each member included in the consolidated return. PPL Corporation allocates tax credits to the member(s) that generated the credits in proportion to the amount of credits such member(s) generated on a separate return basis. Similarly, members that generate net operating losses are allocated a credit equivalent to the tax benefit associated with such loss.

PPL Electric reflected the utilization of Research and Development Tax Credits on Schedule D-17 of the Historic 1, Future 1, and Fully Projected Future 1 Exhibits. PPL Electric did not incur or reflect the utilization or generation of Federal and Pennsylvania net operating losses in the income tax provision calculation shown on Schedule D-1 of the Historic 1, Future 1, and Fully Projected Future 1 Exhibits.

Q.20. Explain the treatment given to costs of removal in the income tax calculation and the basis for such treatment.

A.20. Section 1.167(a)-11(d)(3) of the IRS regulations related to ADR provides: "The cost of dismantling, demolishing, or removing an asset in the process of a retirement from the vintage account shall be treated as an expense deductible in the year paid or incurred, and such costs shall not be subtracted from the depreciation reserve for the account." This applies to ADR property acquired after December 31, 1970.

In 1972, PPL Electric requested, and was granted, permission from the IRS national office in Washington, D.C. to deduct as expense all removal costs applicable to property retired after December 31, 1971. This accounting change applied to all property retired after December 31, 1971, regardless of when it was acquired or the method of depreciation used to recover the expenditure. The Company consistently has followed this method of accounting on all income tax returns filed since 1972.

PPL Electric provided deferred income taxes on these expense deductions through December 31, 1980. In accordance with the Commission's order dated January 31, 1981, at Docket No. R-80031114, the Company terminated provisions for deferred income taxes. The Company fully amortized the December 31, 1980 balance of deferred income taxes through December 31, 2006.

Q.21. Show income tax loss/gain carryovers from previous years. Show loss/gain carryovers by years of origin and amounts remaining by years at the beginning of the test year.

A.21. PPL Electric does not have any Federal or Pennsylvania Net Operating Losses or Gains at the beginning of the test year.

Q.22. State whether the company eliminates tax savings by the payment of actual interest on construction work in progress not in rate base claim.
If response is affirmative:

a) Set forth amount of construction claimed in this tax savings reduction, and explain the basis for this amount.
b) Explain the manner in which the debt portion of this construction is determined for purposes of the deferral calculations.
c) State the interest rate used to calculate interest on this construction debt portion, and the manner in which it is derived.
d) Provide details of calculation to determine tax savings reduction, and state whether State taxes are increased to reflect the construction interest elimination.

A.22. The adjustment necessary to reflect the pro forma interest charges on measures of value for the test years is provided in Schedule D-17 of Exhibits Future 1 and Fully Projected Future 1.

Q.23. Under section 1552 of the Internal Revenue Code (26 U.S.C.A. § 1552) and 26 CFR 1.1552-1 (1983), if applicable, a parent company, in filing a consolidated income tax return for the group, must choose one of four options by which it must allocate total income tax liability of the group to the participating members to determine each member's tax liability to the Federal government (if this interrogatory is not applicable, so state):

a) State what option has been chosen by the group.
b) Provide, in summary form, the amount of tax liability that has been allocated to each of the participating members in the consolidated income tax return for the test year and the most recent 3 years for which data is available.
c) Provide a schedule, in summary form, of contributions, which were determined on the basis of separate tax return calculations, made by each of the participating members to the tax liability indicated in the consolidated group tax return. Provide total amounts of actual payments to the tax depository for the tax year, as computed on the basis of separate returns of members.
d) Provide the most recent annual income tax return for the group.
e) Provide details of the amount of the net operating losses of any member allocated to the income tax returns of each of the members of the consolidated group for the test year and the 3 most recent years for which data is available, together with a summary of the actual tax payments for those years.
f) Provide details of the amount of net negative income taxes, after all tax credits are accounted for, of any member allocated to the income tax return of each of the members of the consolidated group for the test year and the 3 most recent years for which data is available, together with a summary of the actual tax payments for those years.

A.23. a) PPL Electric Utilities Corporation is an affiliate of PPL Corporation (PPL). Internal Revenue Code Section 1552 provides for an allocation of consolidated income tax for "earnings and profits" purposes only. PPL elected option (a) (1), i.e., ratio of taxable income of each company having income to total consolidated taxable income as modified by Commissioner of Internal Revenue for consolidated income tax return purposes only. A copy of the IRS authorization is included as Attachment II-D-23a. PPL has chosen, for book purposes and all other purposes, to allocate consolidated Federal income tax among all companies based on net taxable income or loss and credits on a separate return basis. PPL Corporation became the common

parent of the affiliated group in 1995 and elected to continue this allocation methodology in its 1995 and subsequent Federal income tax returns.

b) Attachment II-D-23b details the annual tax liability allocated to each of the participating members per the 2022 and 2023 final consolidated federal income tax returns, per the 2024 consolidated federal income tax extension payment allocation, and per the 2025 second quarter estimated federal income tax payment allocation.

c) PPL Corporation is the parent company of the PPL consolidated group that includes PPL Electric and makes all necessary income tax payments to the Internal Revenue Service for the net tax liability that is due for the consolidated group. PPL Corporation bills companies with positive federal tax allocations and pays those companies with negative allocations. The amounts PPL Corporation receives from, or pays to, each member company are the same amounts as detailed in Attachment II-D-23b.

d) The most recent Federal income tax return filed by the consolidated group is tax year 2023; the complete tax return is voluminous. Attachment II-D-23c includes pages 1 through 6 of the Federal Form 1120 and a summary of taxable income by member company. Additional schedules will be furnished upon request.

e) Attachment II-D-23b includes details of the actual payments made to members of the consolidated group with net operating losses.

f) Attachment II-D-23b includes details of the actual payments made to members of the consolidated group with a net negative income tax allocation after credits.

U. S. TREASURY DEPARTMENT
WASHINGTON 25

OFFICE OF
COMMISSIONER OF INTERNAL REVENUE

ADDRESS REPLY TO
COMMISSIONER OF INTERNAL REVENUE
WASHINGTON 25, D. C.
REFER TO
T:R:C
TFG

OCT 13 1955

Pennsylvania Power & Light Co.
Ninth and Hamilton Streets
Allentown, Pennsylvania

Attention: F. H. Markley, Treasurer

Gentlemen:

This is in further reply to your letter dated September 6, 1955, in which you requested approval of a proposed method of allocating the tax liability of the group of which your company is the common parent.

You have proposed to allocate the consolidated tax of your affiliated group under the provisions of section 1552(a)(1) of the 1954 Code, but with the limitations provided under Securities and Exchange Commission Rule U-45(b)(6) as follows:

(1) That the tax allocated to each subsidiary company shall not exceed the amount of tax of such company based upon a separate return computed as if such company had always filed its tax returns on a separate return basis; and

(2) That any excess of liability over a separate return tax which would be allocated to a subsidiary company but for clause (1) above shall be apportioned among the other members of the group, including the holding company (or other parent company), in direct proportion to the reduction in tax liability to such members as measured by the difference between their tax liabilities computed on a separate return basis and their allocated portion of the consolidated tax liability.

Your proposed method was approved by telegram on September 13, 1955, subject to the condition that the limitation with respect to the tax allocated to your subsidiaries shall be based upon the tax of such members for the taxable year computed as if separate returns had been filed by each for such taxable year without regard to net operating losses sustained by such members in prior or subsequent taxable years.

2 - Pennsylvania Power & Light Co.

This letter and our telegram of September 13, 1955, are evidences of your authority for the adoption of such method.

Very truly yours,

O. Gordon Delk

Acting Commissioner.

10	**Total.** Add lines 9a through 9z			10	
11	**Total tax.** Add lines 7, 8, and 10. Enter here and on page 1, line 31			11	21,760,900.

Part II - Payments and Refundable Credits

12	Reserved for future use			12	
13	Preceding year's overpayment credited to the current year			13	
14	Current year's estimated tax payments			14	21,000,000.
15	Current year's refund applied for on Form 4466			15	( )
16	Combine lines 13, 14, and 15			16	21,000,000.
17	Tax deposited with Form 7004			17	
18	Withholding (see instructions)			18	
19	**Total payments.** Add lines 16, 17, and 18			19	21,000,000.
20	Refundable credits from:				
a	Form 2439	20a			
b	Form 4136	20b	539.		
c	Reserved for future use	20c			
z	Other (attach statement - see instructions)	20z			
21	**Total credits.** Add lines 20a through 20z			21	539.
22	Elective payment election amount from Form 3800			22	
23	**Total payments and credits.** Add lines 19, 21, and 22. Enter here and on page 1, line 33			23	21,000,539.

PPL Corporation and Subsidiaries 23-2758192

Schedule K Other Information (see instructions)

		Yes	No
1	Check accounting method: **a** ☐ Cash **b** ☒ Accrual **c** ☐ Other (specify)		
2	See the instructions and enter the:		
a	Business activity code no. 551112		
b	Business activity Holding Company		
c	Product or service		
3	Is the corporation a subsidiary in an affiliated group or a parent-subsidiary controlled group?		X
	If "Yes," enter name and EIN of the parent corporation		
4	At the end of the tax year:		
a	Did any foreign or domestic corporation, partnership (including any entity treated as a partnership), trust, or tax-exempt organization own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of the corporation's stock entitled to vote? If "Yes," complete Part I of Schedule G (Form 1120) (attach Schedule G)		X
b	Did any individual or estate own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of the corporation's stock entitled to vote? If "Yes," complete Part II of Schedule G (Form 1120) (attach Schedule G)		X
5	At the end of the tax year, did the corporation:		
a	Own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of stock entitled to vote of any foreign or domestic corporation not included on **Form 851,** Affiliations Schedule? For rules of constructive ownership, see instructions. If "Yes," complete (i) through (iv) below. See Statement 23	X	

(i) Name of Corporation	(ii) Employer Identification Number (if any)	(iii) Country of Incorporation	(iv) Percentage Owned in Voting Stock

b	Own directly an interest of 20% or more, or own, directly or indirectly, an interest of 50% or more in any foreign or domestic partnership (including an entity treated as a partnership) or in the beneficial interest of a trust? For rules of constructive ownership, see instructions If "Yes," complete (i) through (iv) below. See Statement 24	X		

(i) Name of Entity	(ii) Employer Identification Number (if any)	(iii) Country of Organization	(iv) Maximum Percentage Owned in Profit, Loss, or Capital

6	During this tax year, did the corporation pay dividends (other than stock dividends and distributions in exchange for stock) in excess of the corporation's current and accumulated earnings and profits? See sections 301 and 316		X
	If "Yes," file **Form 5452,** Corporate Report of Nondividend Distributions. See the instructions for Form 5452. If this is a consolidated return, answer here for the parent corporation and on Form 851 for each subsidiary.		
7	At any time during this tax year, did one foreign person own, directly or indirectly, at least 25% of the total voting power of all classes of the corporation's stock entitled to vote or at least 25% of the total value of all classes of the corporation's stock?		X
	For rules of attribution, see section 318. If "Yes," enter: **(a)** Percentage owned _____ and **(b)** Owner's country _____ **(c)** The corporation may have to file **Form 5472,** Information Return of a 25% Foreign-Owned U.S. Corporation or a Foreign Corporation Engaged in a U.S. Trade or Business. Enter the number of Forms 5472 attached _____		
8	Check this box if the corporation issued publicly offered debt instruments with original issue discount ☐ If checked, the corporation may have to file **Form 8281,** Information Return for Publicly Offered Original Issue Discount Instruments.		
9	Enter the amount of tax-exempt interest received or accrued during this tax year $ _____		
10	Enter the number of shareholders at the end of the tax year (if 100 or fewer) _____		
11	If the corporation has an NOL for the tax year and is electing to forego the carryback period, check here (see instructions) ☐ If the corporation is filing a consolidated return, the statement required by Regulations section 1.1502-21(b)(3) must be attached or the election will not be valid.		
12	Enter the available NOL carryover from prior tax years (do not reduce it by any deduction reported on page 1, line 29a) $		

PPL Corporation and Subsidiaries 23-2758192

Schedule K **Other Information** *(continued from page 4)*

		Yes	No
13	Are the corporation's total receipts (page 1, line 1a, plus lines 4 through 10) for the tax year **and** its total assets at the end of the tax year less than $250,000?		X
	If "Yes," the corporation is not required to complete Schedules L, M-1, and M-2. Instead, enter the total amount of cash distributions and the book value of property distributions (other than cash) made during the tax year $		
14	Is the corporation required to file Schedule UTP (Form 1120), Uncertain Tax Position Statement? See instructions	X	
	If "Yes," complete and attach Schedule UTP.		
15a	Did the corporation make any payments that would require it to file Form(s) 1099?	X	
b	If "Yes," did or will the corporation file required Form(s) 1099?	X	
16	During this tax year, did the corporation have an 80%-or-more change in ownership, including a change due to redemption of its own stock?		X
17	During or subsequent to this tax year, but before the filing of this return, did the corporation dispose of more than 65% (by value) of its assets in a taxable, non-taxable, or tax deferred transaction?		X
18	Did the corporation receive assets in a section 351 transfer in which any of the transferred assets had a fair market basis or fair market value of more than $1 million?		X
19	During the corporation's tax year, did the corporation make any payments that would require it to file Forms 1042 and 1042-S under chapter 3 (sections 1441 through 1464) or chapter 4 (sections 1471 through 1474) of the Code?	X	
20	Is the corporation operating on a cooperative basis?		X
21	During this tax year, did the corporation pay or accrue any interest or royalty for which the deduction is not allowed under section 267A? See instructions		X
	If "Yes," enter the total amount of the disallowed deductions $		
22	Does this corporation have gross receipts of at least $500 million in any of the 3 preceding tax years? (See sections 59A(e)(2) and (3).)	X	
	If "Yes," complete and attach Form 8991.		
23	Did the corporation have an election under section 163(j) for any real property trade or business or any farming business in effect during this tax year? See instructions		X
24	Does the corporation satisfy one or more of the following? If "Yes," complete and attach Form 8990. See instructions	X	
a	The corporation owns a pass-through entity with current, or prior year carryover, excess business interest expense.		
b	The corporation's aggregate average annual gross receipts (determined under section 448(c)) for the 3 tax years preceding the current tax year are more than $29 million and the corporation has business interest expense.		
c	The corporation is a tax shelter and the corporation has business interest expense.		
25	Is the corporation attaching Form 8996 to certify as a Qualified Opportunity Fund?		X
	If "Yes," enter amount from Form 8996, line 15 $		
26	Since December 22, 2017, did a foreign corporation directly or indirectly acquire substantially all of the properties held directly or indirectly by the corporation, and was the ownership percentage (by vote or value) for purposes of section 7874 greater than 50% (for example, the shareholders held more than 50% of the stock of the foreign corporation)? If "Yes," list the ownership percentage by vote and by value. See instructions		X
	Percentage: By Vote By Value		
27	At any time during this tax year, did the corporation (a) receive a digital asset (as a reward, award, or payment for property or services); or (b) sell, exchange, or otherwise dispose of a digital asset (or a financial interest in a digital asset)? See instructions		X
28	Is the corporation a member of a controlled group?		X
	If "Yes," attach Schedule O (Form 1120). See instructions.		
29	Corporate Alternative Minimum Tax:		
a	Was the corporation an applicable corporation under section 59(k)(1) in any prior tax year?		X
	If "Yes," go to question 29b. If "No," skip to question 29c.		
b	Is the corporation an applicable corporation under section 59(k)(1) in the current tax year because the corporation was an applicable corporation in the prior tax year?		
	If "Yes," complete and attach Form 4626. If "No," continue to question 29c.		
c	Does the corporation meet the requirements of the safe harbor method as provided under section 59(k)(3)(A) for the current tax year? See instructions		X
	If "No," complete and attach Form 4626. If "Yes," the corporation is not required to file Form 4626.		
30	Is the corporation required to file Form 7208 relating to the excise tax on repurchase of corporate stock (see instructions):		
a	Under the rules for stock repurchased by a covered corporation (or stock acquired by its specified affiliate)?	X	
b	Under the applicable foreign corporation rules?		X
c	Under the covered surrogate foreign corporation rules?		X
	If "Yes" to either (a), (b), or (c), complete Form 7208, Excise Tax on Repurchase of Corporate Stock. See the Instructions for Form 7208.		
31	Is this a consolidated return with gross receipts or sales of $1 billion or more and a subchapter K basis adjustment, as described in the instructions, of $10 million or more?		X
	If "Yes," attach a statement. See instructions.

Q.24. Provide detailed computations by vintage year showing State and Federal deferred income taxes resulting from the use of accelerated tax depreciation associated with post-1969 public utility property, ADR rates, and accelerated tax depreciation associated with post-1980 public utility property under the Accelerated Cost Recovery System (ACRS).

a) Reconcile and explain any differences in the base used to calculate State and Federal deferred income taxes.
b) State whether tax depreciation is based on all rate base items claimed as of the end of the test year, and whether it is the annual tax depreciation at the end of the test year.
c) Reconcile differences between the deferred tax balance, as shown as a reduction to rate base, and the deferred tax balance as shown on the balance sheet.

A.24. PPL Electric does not provide for deferred income taxes related to accelerated depreciation of assets acquired prior to January 1, 1981. However, through December 31, 1980, the Company did provide for deferred taxes related to the difference in tax depreciation resulting from using class lives under the ADR system of depreciation versus tax depreciation from the use of guideline lives in effect prior to the ADR system of depreciation. In accordance with the Commission's order adopted January 31, 1981, at Docket No. R-80031114, the Company terminated provisions for deferred taxes. The Company fully amortized the December 31, 1980 balance of deferred income taxes through December 31, 2005. The Company is deferring federal income taxes associated with the use of accelerated tax depreciation under the Accelerated Cost Recovery System (ACRS) of the Economic Recovery Tax Act of 1981 in compliance with the Commission's order adopted December 18, 1981, at Docket No. R-811636. See Attachments II-D-24a and II-D-24b for detailed computations by vintage year for twelve-month periods ending June 30, 2026 and June 30, 2027, respectively.

a) PPL Electric does not provide for any state deferred income taxes associated with the use of accelerated tax depreciation on distribution property and distribution related general property. PPL Electric does provide state and federal deferred income taxes associated with all basis differences on distribution property and distribution related general property.
b) Tax depreciation is not based on all rate base items claimed as of the end of the test year. Certain assets that are included in rate base are fully depreciated for tax purposes. Additionally, there are basis differences between book cost and tax cost for which tax depreciation is not calculated. Tax depreciation is an annual calculation based on

a calendar year. Since the twelve-month periods in Exhibit Future 1 and Exhibit Fully Projected Future 1 span two calendar years, tax depreciation is prorated within each calendar year that is represented in Exhibit Future 1 and Exhibit Fully Projected Future 1.

c) See Attachments II-D-24c and II-D-24d for the reconciliation of the deferred tax balance per the balance sheet as shown on Schedule B-1 of Exhibit Future 1 and Exhibit Fully Projected Future 1 to the balance as shown as a reduction to rate base in Schedule C-1 of Exhibit Future 1 and Exhibit Fully Projected Future 1.

8	Future Estimated Income Tax Rate Changes related to plant	(173,492)
9	Non-Utility Plant	(44)
10	Total deferred tax balances not included in rate base	(622,442)
11	Total plant related deferred tax balances included in rate base (Line 4 - Line 10) See Lines 12 thru 16 for details	2,704,898
	Plant Deferred Tax Balances per Filing Requirement II-D-18	
12	Account 190 - Contributions in Aid of Construction	(178,415)
13	Account 190 - Deficient Federal Net Operating Loss Deferred Taxes	(52,733)
14	Account 282 - Accelerated Cost Recovery System	937,823
15	Account 282 - Other Plant Basis Adjustments	480,773
16	Account 282 - Net Book/Net Tax Plant (Excluding CIAC) - Transmission	1,517,450
17	Total Plant Deferred Tax Balances	2,704,898
	Proforma Adjustments resulting from Depreciation Study	
18	July 2025 - June 2026 (Schedule D-15, Lines 21 thru 24, Column g)	563
19	July 2026 - June 2027 (Schedule D-15, Lines 21 thru 24, Column g)	4,405
20	Proration Adjustment (Schedule C-6, Page 2, Line 19)	(81,777)
21	Total Accumulated Deferred Taxes per Schedule C-6	$ 2,628,089

Q.25. Submit a schedule showing a breakdown of accumulated and unamortized investment tax credits, by vintage year and percentage rate, together with calculations supporting the amortized amount claimed as a reduction to pro forma income taxes. Provide details of methods used to write-off the unamortized balances.

A.25. Attachments II-D-25a and II-D-25b provide the requested detail. PPL Electric is amortizing investment tax credits over the historic weighted average book service life.

Q.26. Explain in detail by statement or exhibit the appropriateness of claiming any additional items, not otherwise specifically explained and supported in the statement of operating income.

A.26. An explanation of PPL Electric's claim for any additional operating income items is set forth in Section D of Exhibits Future 1 and Fully Projected Future 1.

Q.27. If the utility's operations include non-jurisdictional activities, provide a schedule which demonstrates the manner in which rate base and operating income date have been adjusted to develop the jurisdictional test year claim.

A.27. The Commission's Order, at Docket No. R-8003114, provided that future retail rate filings by PPL Electric should be on a PUC jurisdictional basis only. This filing has been prepared in compliance with that order. Total system rate base and components of operating income have been assigned and/or allocated between the FERC and PUC jurisdictions and the proposed revenue increase has been determined on a PUC jurisdictional basis only. See Exhibits BR-1 and BR-2.

Q.1. Supply a copy of any budget utilized as a basis for any test year claim and explain the utility’s budgeting process.

A.1. Attachment II-E-1a is a summary of the operating budget utilized as the basis for PPL Electric's future test year claim. Attachment II-E-1b is a summary of the operating budget utilized as the basis for PPL Electric's fully projected future test year claim. An explanation of the Company’s budgeting process is contained in PPL Electric Statement No. 2, the Direct Testimony of Dennis A. Urban.

Q.1. Provide a schedule showing the major components of claimed capitalization, and the derivation of the weighted costs of capital for the rate case claim. This schedule shall include a descriptive statement concerning the major elements of changes in claimed capitalization, cost rates and overall return from comparable historical data.

A.1. See Schedules B-6, B-7 and B-8 of Exhibits Future 1 and Fully Projected Future 1 for the major components of claimed capitalization and the derivation of the weighted cost of capital.

Q.2. Provide a schedule in the same format as Schedule 1, except for the omission of the descriptive statement, for the most immediate comparable annual historical period prior to the test year and the two calendar years most immediately preceding the rate of return claim period. Irrespective of whether the capitalization claimed on Schedule 1 includes short-term debt, Schedule 2 should reflect capital ratios with and without short-term debt.

A.2. Attachment III-A-2 provides the capitalization data for the years ending June 30, 2024, June 30, 2025, June 30, 2026, and June 30, 2027.

(a) Long-term debt includes amount due within one year and the unamortized loss on reacquired debt.

J. Nelson
J. Burgos

Q.1. Provide a schedule showing the calculation of embedded cost of long-term debt by issue, supporting the related rate case claim. The schedule shall contain the following information:

a) Date of issue.
b) Date of maturity.
c) Amount issued.
d) Amount outstanding.
e) Amount retired.
f) Amount reacquired.
g) Gain or loss on reacquisition.
h) Coupon rate.
i) Discount or premium at issuance.
j) Issuance expense.
k) Net proceeds.
l) Sinking fund requirements.
m) Effective cost rate.
n) Total average weighted effective cost rate.

Projected new issues, retirements and other major changes from the comparable historic data should be clearly noted.

A.1. Schedule B-6 of Exhibits Future 1 and Fully Projected Future 1 provides the requested information.

Q.2. In the event that a claim made for a true or economic cost of debt exceeds that shown in the preceding nominal cost schedule because of convertible features, sale with warrants or for any other reason, a full statement of the basis for such a claim should be provided.

A.2. No claim is being made for a true economic cost of debt that exceeds that shown in the preceding nominal cost schedule.

Q.3. Provide the following information concerning bank notes payable for test year and for latest comparable annual historical period prior to the test year:

a) Line of credit at each bank.
b) Average daily balances of notes to each bank, by name of bank.
c) Interest rate charged on each bank note (Prime rate, formula rate, or other).
d) Purpose of each bank note (for example, construction, fuel storage, working capital, debt retirement).
e) Prospective future need for this type of financing.

A.3. a) & b) The requested information is provided in Attachments III-B-3a, III-B-3b and III-B-3c.

c) The applicable interest rate charged on borrowings is either a Term Secured Overnight Financing Rate (SOFR) rate or base rate. The borrowing formulas, based on one rating lower than the then highest credit rating in effect for PPL Electric, are as follows:

SOFR borrowings: Term SOFR +1.125%
Base Rate borrowings: the higher of: (i) the Prime Rate, (ii) the Federal Funds Rate +0.50%, or 1 month Adjusted Term SOFR + 1.00%

d) PPL Electric has established its credit facility primarily to provide liquidity support for its unsecured commercial paper program, which is used to fund ongoing working capital needs and capital expenditures.

e) PPL Electric expects to continue to utilize the credit facility to support its unsecured commercial paper program, which is used to fund ongoing working capital needs and capital expenditures.

Q.4. Provide detailed information concerning all other short-term debt outstanding.

A.4. PPL Electric's primary source of short-term financing is commercial paper and credit facility bank loans. Schedules showing the month-end balances of commercial paper and weighted average interest rate for historic, future and fully projected future test years are shown on Attachments III-B-4a, III-B-4b and III-B-4c, respectively. The Company had no other short-term debt outstanding during the historic test year other than that identified in Question III-B-3 of Exhibit Regs. 53.53, Part III – Rate of Return.

(1) These bonds were reacquired in the open market and were used to satisfy sinking fund requirements of this issue.

(2) The unamortized debt expense and discount/premium associated with bonds that are reacquired at a loss were added to the premium paid to reacquire the bonds. In accordance with General Instruction 17 of the Uniform System of Accounts, the loss is amortized over the remaining life of the bonds, or, if the bonds were refinanced, the life of the new issuance.

(3) In June 1998, the generation portion of PPL Electric became deregulated. As a result, losses on reacquired debt attributable to the generation portion of PPL Electric's business are being expensed as incurred in accordance with SFAS 4 "Reporting Gains and Losses from Extinguishment of Debt."

Accounting for losses for income tax purposes:
Loss on reacquired debt set forth above was deducted as incurred for income tax purposes.

Proposed treatment of losses for ratemaking purposes:
The Company proposes that the current practice of adhering to General Instruction 17 of the Uniform System of Accounts be continued.

Q.1. Provide a schedule showing the calculation of the embedded cost of preferred stock equity by issue, supporting the related rate case claim. The schedule shall contain the following information:

a) Date of issue.
b) Date of maturity.
c) Amount issued.
d) Amount outstanding.
e) Amount retired.
f) Amount reacquired.
g) Gain or loss on reacquisitions.
h) Dividend rate.
i) Discount or premium at issuance.
j) Issuance expenses.
k) Net proceeds.
l) Sinking fund requirements.
m) Effective cost rate.
n) Total average weighted effective cost rate.
o) Projected new issues, retirement and other major changes from the comparable historical data should be clearly noted.

A.1. The Company has no preferred stock equity.

Q.1. Provide complete support for claimed common equity rate of return.

A.1. See PPL Electric Statement No. 10, the Direct Testimony of Jennifer Nelson.

Q.2. Provide a summary statement of all stock dividends, splits or par value changes during the 2 calendar year period preceding the rate case filing.

A.2. The Company had no stock dividends, splits, or par value changes during the 2 calendar year periods preceding the rate case filing.

The Company pays dividends to its Parent, PPL Corporation. Dividends paid to Parent in 2023 were $323 million and dividends paid to Parent in 2024 were $375 million.

Q.3. Provide a schedule of all issuances of common stock, whether or not underwriters are used, for the most immediately available annual historical period and the 2 calendar years most immediately proceeding the test year.

A.3. The Company has not issued common stock in the most immediate annual historical period and in the two calendar years most immediately proceeding the test year.

Q.4. Submit details on the utility and parent company stock offerings - past 5 years to present - as follows:

a) Date of prospectus.
b) Date of offering.
c) Record date.
d) Offering period - dates and numbers of days.
e) Amount and number of shares offered.
f) Offering ratio, if rights offering.
g) Percent subscribed.
h) Offering price.
i) Gross proceeds per share.
j) Expenses per share.
k) Net proceeds per share (i - j).
l) Market price per share.
    (1) At record date.
    (2) At offering date.
    (3) One month after close of offering.
m) Average market price during offering.
    (1) Price per share.
    (2) Rights per share - average value of rights.
n) Latest reported earnings per share at time of offering.
o) Latest reported dividends at time of offering.

A.4. **PPL Electric Utilities Corporation**

There were no common stock offerings by PPL Electric Utilities Corporation during the last five years.

PPL Corporation

PPL Corporation has issued common stock periodically during the last five years and may continue to issue under its Dividend Reinvestment Program, and under other stock-based compensations plans. The amount of equity issued under these plans is immaterial.

In February 2025, PPL entered into an equity distribution agreement, pursuant to which PPL may sell, from time to time, up to an aggregate of $2 billion of its common stock through an ATM Program, including an optional forward sales component. Each forward contract under the agreement must be settled within 24 months. The compensation paid to the selling agents by PPL may be up to 2% of the gross offering proceeds of the shares.

Since February 2025 through August 2025, PPL has entered into forward contracts under its ATM program for approximately $1.4 billion of shares of its common stock settling through August 2027, PPL may elect, at its discretion, to physically settle, net share settle or net cash settle the forward contracts. The forward contracts under the ATM program are classified as equity transactions.

Q.1. If a claim of the filing utility is based on utilization of the capital structure or capital costs of the parent company and system - consolidated - the reasons for this claim must be fully stated and supported.

A.1. PPL Electric's capital structure and capital costs claim in this filing are based on the Company’s operations only.

Q.2. Regardless of the claim made, provide the capitalization data requested at Item III.A.2. for the parent company and for the system - consolidated.

A.2. Attachment III-E-2 provides the capitalization data for the years 2023 and 2024 for PPL Corporation.

PPL CORPORATION

Louisville Gas and Electric Company	Yes	☐	No	☒
Kentucky Utilities Company	Yes	☐	No	☒

As of June 28, 2024, PPL Corporation had 737,762,262 shares of its $0.01 par value Common Stock outstanding. The aggregate market value of these common shares (based upon the closing price of these shares on the New York Stock Exchange on that date) held by non-affiliates was $20,399,126,544. As of January 31, 2025, PPL Corporation had 738,294,081 shares of its $0.01 par value Common Stock outstanding.

As of January 31, 2025, PPL Corporation held all 66,368,056 outstanding common shares, no par value, of PPL Electric Utilities Corporation.

As of January 31, 2025, LG&E and KU Energy LLC held all 21,294,223 outstanding common shares, no par value, of Louisville Gas and Electric Company.

As of January 31, 2025, LG&E and KU Energy LLC held all 37,817,878 outstanding common shares, no par value, of Kentucky Utilities Company.

PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company meet the conditions set forth in General Instructions (I)(1)(a) and (b) of Form 10-K and are therefore filing this form with the reduced disclosure format.

Documents incorporated by reference:

PPL Corporation has incorporated herein by reference certain sections of PPL Corporation's 2025 Notice of Annual Meeting and Proxy Statement, which will be filed with the Securities and Exchange Commission not later than 120 days after December 31, 2024 and which will provide the information required by Part III of this Report.

PPL CORPORATION
PPL ELECTRIC UTILITIES CORPORATION
LOUISVILLE GAS AND ELECTRIC COMPANY
KENTUCKY UTILITIES COMPANY

FORM 10-K ANNUAL REPORT TO
THE SECURITIES AND EXCHANGE COMMISSION
FOR THE YEAR ENDED DECEMBER 31, 2024

TABLE OF CONTENTS

This combined Form 10-K is separately filed by the following Registrants in their individual capacity: PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company. Information contained herein relating to any individual Registrant is filed by such Registrant solely on its own behalf and no Registrant makes any representation as to information relating to any other Registrant, except that information under "Forward-Looking Information" relating to subsidiaries of PPL Corporation is also attributed to PPL Corporation.

Unless otherwise specified, references in this Report, individually, to PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company are references to such entities directly or to one or more of their subsidiaries, as the case may be, the financial results of which subsidiaries are consolidated into such Registrants' financial statements in accordance with GAAP. This presentation has been applied where identification of particular subsidiaries is not material to the matter being disclosed, and to conform narrative disclosures to the presentation of financial information on a consolidated basis.

GLOSSARY OF TERMS AND ABBREVIATIONS

PPL Corporation and its subsidiaries

CEP Reserves - CEP Reserves, Inc., a cash management subsidiary of PPL that maintains cash reserves for the balance sheet management of PPL and certain subsidiaries.

KU - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky.

LG&E - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

LKE - LG&E and KU Energy LLC, a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries.

LKS - LG&E and KU Services Company, a subsidiary of LKE that provides administrative, management and support services primarily to LG&E and KU, as well as to LKE and its other subsidiaries.

Narragansett Electric - The Narragansett Electric Company, an entity that serves electric and natural gas customers in Rhode Island. On May 25, 2022, PPL and its subsidiary, PPL Rhode Island Holdings announced the completion of the acquisition of Narragansett Electric, which continues to provide services under the name Rhode Island Energy. Narragansett Electric is sometimes referred to as Rhode Island Energy or RIE.

PPL - PPL Corporation, the ultimate parent holding company of PPL Electric, PPL Energy Funding, PPL Capital Funding, LKE, RIE and other subsidiaries.

PPL Capital Funding - PPL Capital Funding, Inc., a financing subsidiary of PPL that provides financing for the operations of PPL and certain subsidiaries. Debt issued by PPL Capital Funding is fully and unconditionally guaranteed as to payment by PPL.

PPL Electric - PPL Electric Utilities Corporation, a public utility subsidiary of PPL engaged in the regulated transmission and distribution of electricity in its Pennsylvania service area and that provides electricity supply to its retail customers in this area as a PLR.

PPL Energy Funding - PPL Energy Funding Corporation, a subsidiary of PPL and the parent holding company of PPL Global and other subsidiaries.

PPL Energy Holdings - PPL Energy Holdings, LLC, a subsidiary of PPL and the parent holding company of PPL Energy Funding, LKE, PPL Electric, PPL Rhode Island Holdings, PPL Services and other subsidiaries.

PPL Global - PPL Global, LLC, a subsidiary of PPL Energy Funding that, prior to the sale of the U.K. utility business on June 14, 2021, primarily through its subsidiaries, owned and operated WPD, PPL's regulated electricity distribution businesses in the U.K. PPL Global was not included in the sale of the U.K. utility business on June 14, 2021.

PPL Rhode Island Holdings - PPL Rhode Island Holdings, LLC, a subsidiary of PPL Energy Holdings formed for the purpose of acquiring Narragansett Electric to which certain interests of PPL Energy Holdings in the Narragansett SPA were assigned.

PPL Services - PPL Services Corporation, a subsidiary of PPL that provides administrative, management and support services to PPL and its subsidiaries.

PPL WPD Limited - PPL WPD Limited, a U.K. subsidiary of PPL Global. Prior to the sale of the U.K. utility business on June 14, 2021, PPL WPD Limited was an indirect parent to WPD. PPL WPD Limited was not included in the sale of the U.K. utility business on June 14, 2021.

RIE - Rhode Island Energy, the name under which Narragansett Electric provides gas and electric services to customers in Rhode Island.

Other terms and abbreviations

£ - British pound sterling.

401(h) account(s) - a sub-account established within a qualified pension trust to provide for the payment of retiree medical costs.

2023 Form 10-K - Annual Report filed with the SEC on Form 10-K for the year ended December 31, 2023.

Act 11 - Act 11 of 2012 that became effective on April 16, 2012. The Pennsylvania legislation authorized the PAPUC to approve two specific ratemaking mechanisms: the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, a DSIC.

Act 129 - Act 129 of 2008 that became effective in October 2008. The law amended the Pennsylvania Public Utility Code and created an energy efficiency and conservation program and smart metering technology requirements, adopted new PLR electricity supply procurement rules, provided remedies for market misconduct and changed the Alternative Energy Portfolio Standard (AEPS).

AFUDC - allowance for funds used during construction. The cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

AOCI - accumulated other comprehensive income or loss.

ARO - asset retirement obligation.

Bcf - billion cubic feet. A unit of measure commonly used in quoting volumes of natural gas.

Cane Run Unit 7 - a NGCC generating unit in Kentucky, jointly owned by LG&E and KU.

CCR(s) - coal combustion residual(s). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes.

Clean Air Act - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

Clean Water Act - federal legislation enacted to address certain environmental issues relating to water quality including effluent discharges, cooling water intake, and dredge and fill activities.

COVID-19 - the disease caused by the coronavirus identified in 2019 that caused a global pandemic.

CPCN - Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of certain plant, equipment, property or facilities for furnishing of utility service to the public. A CPCN is required for any capital addition, subject to KPSC jurisdiction, in excess of $100 million.

Customer Choice Act - the Pennsylvania Electricity Generation Customer Choice and Competition Act, legislation enacted to restructure the state's electric utility industry to create retail access to a competitive market for generation of electricity.

DDCP - Directors Deferred Compensation Plan.

DER - Distributed Energy Resources.

DSIC - Distribution System Improvement Charge. Authorized under Act 11, which is an alternative ratemaking mechanism providing more-timely cost recovery of qualifying distribution system capital expenditures.

DSM - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM programs proposed by any utility under its jurisdiction. DSM programs consist of energy efficiency programs intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information regarding their energy usage and support energy efficiency.

Earnings from Ongoing Operations - a non-GAAP financial measure of earnings adjusted for the impact of special items and used in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" (MD&A).

EBPB - Employee Benefit Plan Board. The administrator of PPL's U.S. qualified retirement plans, which is charged with the fiduciary responsibility to oversee and manage those plans and the investments associated with those plans.

ECR - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements that apply to coal combustion wastes and byproducts from the production of energy from coal.

ELG(s) - Effluent Limitation Guidelines, regulations promulgated by the EPA.

Environmental Response Fund - Established in RIPUC Docket No. 2930. Created to satisfy remedial and clean-up obligations of RIE arising from the past ownership and/or operation of manufactured gas plants and sites associated with the operation and disposal activities of such gas plants.

EPA - Environmental Protection Agency, a U.S. government agency.

EPS - earnings per share.

FERC - Federal Energy Regulatory Commission, the U.S. federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

GAAP - Generally Accepted Accounting Principles in the U.S.

GHG(s) - greenhouse gas(es).

GLT - gas line tracker. The KPSC approved mechanism for LG&E's recovery of certain costs associated with gas transmission lines, gas service lines, gas risers, leak mitigation, and gas main replacements.

GWh - gigawatt-hour, one million kilowatt hours.

IBEW - International Brotherhood of Electrical Workers.

ICPKE - The PPL Incentive Compensation Plan for Key Employees. The ICPKE provides for incentive compensation to certain employees below the level of senior executive.

If-Converted Method - A method applied to calculate diluted EPS for a company with outstanding convertible debt. This method generally adds back the interest charges of the debt to net income and the convertible debt is assumed to have been converted to equity at the beginning of the period, and the resulting common shares are treated as outstanding shares for diluted EPS calculations.

IRA - Inflation Reduction Act, a U.S. federal law, which aims to curb inflation by possibly reducing the federal government budget deficit, lowering prescription drug prices, and investing in domestic energy production while promoting clean energy.

IRS - Internal Revenue Service, a U.S. government agency.

ISO - Independent System Operator.

ISR - Infrastructure, safety and reliability.

KPSC - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

KU 2010 Mortgage Indenture - KU's Indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as supplemented.

kVA - kilovolt ampere.

kWh - kilowatt hour, basic unit of electrical energy.

LCIDA - Lehigh County Industrial Development Authority.

LG&E 2010 Mortgage Indenture - LG&E's Indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as supplemented.

Mcf - one thousand cubic feet, a unit of measure for natural gas.

MMBtu - one million British Thermal Units.

Mill Creek Unit 5 - a combined cycle natural gas unit under construction in Kentucky, jointly owned by LG&E and KU, which is expected to provide additional generating capacity of 198 MW to LG&E and 442 MW to KU beginning in 2027.

Moody's - Moody's Investors Service, Inc., a credit rating agency.

MW - megawatt, one thousand kilowatts.

MWac - megawatt, alternating current. The measure of the power output from a solar installation.

NAAQS - National Ambient Air Quality Standards periodically adopted pursuant to the Clean Air Act.

National Grid USA - National Grid USA is a wholly-owned subsidiary of National Grid plc, a British multinational electricity and gas utility company headquartered in London, England.

NEP - New England Power Company, a National Grid U.S. affiliate.

NERC - North American Electric Reliability Corporation.

NGCC - Natural gas combined cycle.

NPNS - the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception may receive accrual accounting treatment.

OCI - other comprehensive income or loss.

OVEC - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LG&E owns a 5.63% interest and KU owns a 2.50% interest, which are recorded at cost. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined capacities of 2,120 MW.

PAPUC - Pennsylvania Public Utility Commission, the state agency that regulates certain ratemaking, services, accounting and operations of Pennsylvania utilities.

PEDFA - Pennsylvania Economic Development Financing Authority.

Performance unit - stock-based compensation award that represents a variable number of shares of PPL common stock that a recipient may receive based on PPL's attainment of (i) relative total shareowner return (TSR) as compared to companies in the PHLX Utility Sector Index; (ii) corporate return on equity (ROE); (iii) corporate earnings growth (EG); and (iv) corporate environmental, social and governance (ESG) metrics.

PHMSA - Pipeline and Hazardous Materials Safety Administration.

PJM - PJM Interconnection, L.L.C., operator of the electricity transmission network and electricity energy market in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia.

PLR - Provider of Last Resort, the role of PPL Electric in providing default electricity supply within its delivery area to retail customers who have not chosen to select an alternative electricity supplier under the Customer Choice Act.

PP&E - property, plant and equipment.

PPA(s) - power purchase agreement(s).

PPL EU Services - PPL EU Services Corporation, a former subsidiary of PPL that, prior to being merged into PPL Services on December 31, 2021, provided administrative, management and support services primarily to PPL Electric.

PPL WPD Investments Limited - PPL WPD Investments Limited, which was, prior to the sale of the U.K. utility business on June 14, 2021, a subsidiary of PPL WPD Limited and parent to WPD plc. PPL WPD Investments Limited was included in the sale of the U.K. utility business on June 14, 2021.

RAR – Retired Asset Recovery rider, established by KPSC orders in 2021 to provide for recovery of and return on the remaining investment in certain electric generating units upon their retirement over a ten-year period following retirement.

RCRA - Resource Conservation and Recovery Act of 1976.

Registrant(s) - refers to the Registrants named on the cover of this Report (each a "Registrant" and collectively, the "Registrants").

RIPUC - Rhode Island Public Utilities Commission, a three-member quasi-judicial tribunal with jurisdiction, powers, and duties to implement and enforce the standards of conduct under R.I. Gen. Laws § 39-1-27.6 and to hold investigations and hearings involving the rates, tariffs, tolls, and charges, and the sufficiency and reasonableness of facilities and accommodations of public utilities.

Rhode Island Division of Public Utilities and Carriers - the Rhode Island Division of Public Utilities and Carriers, which is headed by an Administrator who is not a Commissioner of the RIPUC, exercises the jurisdiction, supervision, power, and duties not specifically assigned to the RIPUC.

RTO - Regional Transmission Operator, an electric power transmission system operator that coordinates, controls and monitors a multi-state electric grid.

Safari Energy - Safari Energy, LLC, which was, prior to the sale of Safari Holdings on November 1, 2022, a subsidiary of Safari Holdings that provided solar energy solutions for commercial customers in the U.S.

Safari Holdings - Safari Holdings, LLC, which was, prior to its sale on November 1, 2022, a subsidiary of PPL and parent holding company of Safari Energy.

Sarbanes-Oxley - Sarbanes-Oxley Act of 2002, which sets requirements for management's assessment of internal controls for financial reporting. It also requires an independent auditor to make its own assessment.

Scrubber - an air pollution control device that can remove particulates and/or gases (primarily sulfur dioxide) from exhaust gases.

SEC - the U.S. Securities and Exchange Commission, a U.S. government agency primarily responsible to protect investors and maintain the integrity of the securities markets.

SIP - PPL Corporation's Amended and Restated 2012 Stock Incentive Plan.

Smart metering technology - technology that can measure, among other things, time of electricity consumption to permit offering rate incentives for usage during lower cost or demand intervals. The use of this technology also has the potential to strengthen network reliability.

SOFR - Secured Overnight Financing Rate, a broad measure of the cost of borrowing cash overnight collateralized by Treasury securities.

S&P - S&P Global Ratings, a credit rating agency.

Superfund - federal environmental statute that addresses remediation of contaminated sites; states also have similar statutes.

TCJA - Tax Cuts and Jobs Act. Comprehensive U.S. federal tax legislation enacted on December 22, 2017.

Total shareowner return - the change in market value of a share of the company's common stock plus the value of all dividends paid on a share of the common stock during the applicable performance period, divided by the price of the common stock as of the beginning of the performance period. The price used for purposes of this calculation is the average share price for the 20 trading days at the beginning and end of the applicable period.

Treasury Stock Method - a method applied to calculate diluted EPS that assumes any proceeds that could be obtained upon exercise of options and warrants (and their equivalents) would be used to purchase common stock at the average market price during the relevant period.

U.K. utility business - PPL WPD Investments Limited and its subsidiaries, including, notably, WPD plc and the four distribution network operators, which substantially represented PPL's U.K. Regulated segment. The U.K. utility business was sold on June 14, 2021.

UWUA - Utility Workers Union of America.

VEBA - Voluntary Employee Beneficiary Association. A tax-exempt trust under the Internal Revenue Code Section 501 (c)(9) used by employers to fund and pay eligible medical, life and similar benefits.

VSCC - Virginia State Corporation Commission, the state agency that has jurisdiction over the regulation of Virginia corporations, including utilities.

WPD - Prior to the sale of the U.K. utility business on June 14, 2021, refers to PPL WPD Investments Limited and its subsidiaries. WPD was included in the sale of the U.K. utility business on June 14, 2021.

WPD plc - Western Power Distribution plc, prior to the sale of the U.K utility business, a U.K. indirect subsidiary of PPL WPD Limited. Its principal indirectly owned subsidiaries are WPD (East Midlands), WPD (South Wales), WPD (South West) and WPD (West Midlands). WPD plc was included in the sale of the U.K. utility business on June 14, 2021.

(THIS PAGE LEFT BLANK INTENTIONALLY.)

Forward-looking Information

Statements contained in this Annual Report concerning expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements that are other than statements of historical fact are "forward-looking statements" within the meaning of the federal securities laws. Although the Registrants believe that the expectations and assumptions reflected in these statements are reasonable, there can be no assurance that these expectations will prove to be correct. Forward-looking statements are subject to many risks and uncertainties, and actual results may differ materially from the results discussed in forward-looking statements. In addition to the specific factors discussed in "Item 1A. Risk Factors" and in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Annual Report, the following are among the important factors that could cause actual results to differ materially and adversely from the forward-looking statements:

- weather and other conditions affecting generation, transmission and distribution operations, operating costs and customer energy use;
- strategic acquisitions, dispositions, or similar transactions and our ability to consummate these business transactions, integrate the acquired entities or realize expected benefits from them;
- pandemic health events or other catastrophic events such as wildfires, earthquakes, explosions, floods, droughts, tornadoes, hurricanes and other extreme weather-related events (including events potentially caused or exacerbated by climate change) and their impact on economic conditions, financial markets and supply chains;
- capital market conditions, including the availability of capital, credit or insurance, changes in interest rates and certain economic indices, and decisions regarding capital structure;
- volatility in or the impact of other changes in financial markets, commodity prices and economic conditions, including inflation;
- the outcome of rate cases or other cost recovery, revenue or regulatory proceedings;
- the direct or indirect effects on PPL or its subsidiaries or business systems of cyber-based intrusion or the threat of cyberattacks;
- development, adoption and use of artificial intelligence by us, our customers and our third-party vendors;
- significant changes in the demand for electricity;
- expansion of alternative and distributed sources of electricity generation and storage;
- the effectiveness of our risk management programs, including commodity and interest rate hedging;
- defaults by counterparties or suppliers for energy, capacity, coal, natural gas or key commodities, goods or services;
- a material decline in the market value of PPL's equity;
- significant decreases in the fair value of debt and equity securities and their impact on the value of assets in defined benefit plans, and the related cash funding requirements if the fair value of those assets decline;
- interest rates and their effect on pension and retiree medical liabilities, ARO liabilities, interest payable on certain debt securities, and the general economy;
- the potential impact of any unrecorded commitments and liabilities of the Registrants and their subsidiaries;
- new accounting requirements or new interpretations or applications of existing requirements;
- adverse changes in the corporate credit ratings or securities analyst rankings of the Registrants and their securities;
- any requirement to record impairment charges pursuant to GAAP with respect to any of our significant investments;
- laws or regulations to reduce emissions of GHGs or the physical effects of climate change;
- the availability of electricity and natural gas, and any consequences of a perceived or actual inability to serve demand reliably;
- continuing ability to access fuel supply for LG&E and KU, as well as the ability to recover fuel costs and environmental expenditures in a timely manner at LG&E and KU and natural gas supply costs at LG&E and RIE;
- war, armed conflicts, terrorist attacks, or similar disruptive events, including the ongoing conflicts in Ukraine and the Middle East;
- changes in political, regulatory or economic conditions in states or regions where the Registrants or their subsidiaries conduct business;
- the ability to obtain necessary governmental permits and approvals;
- changes in state or federal tax laws or regulations;
- establishment of new tariffs on imported goods;
- changes in state, federal or foreign legislation or regulatory developments;
- the impact of any state, federal or foreign investigations applicable to the Registrants, their subsidiaries or the energy industry;
- our ability to attract and retain qualified employees;
- the effect of changing expectations and demands of our customers, regulators, investors and stakeholders, including differing views on environmental, social and governance concerns;
- the effect of any business or industry restructuring;

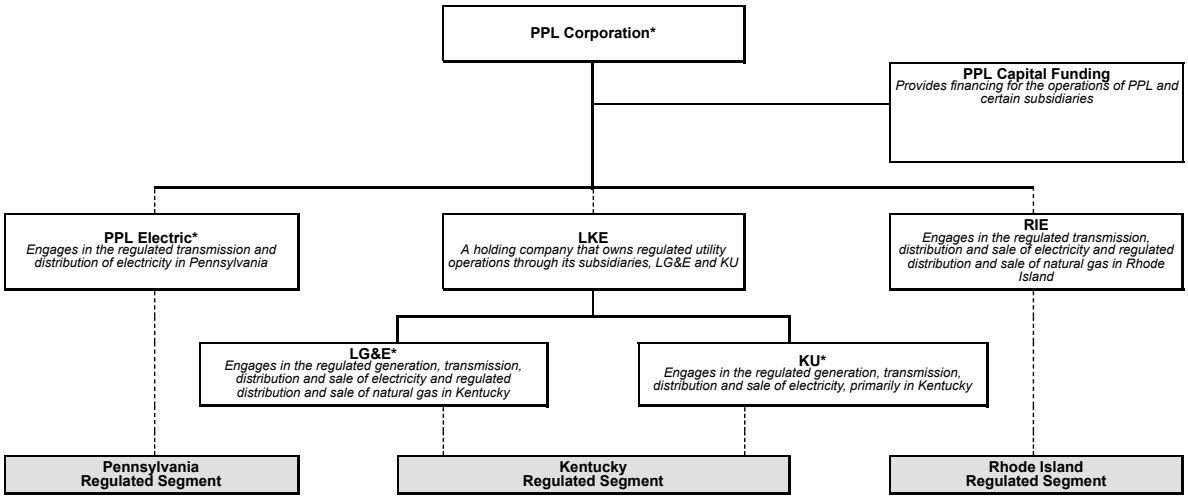
- development of new projects, markets and technologies;
- the ability to control costs and avoid cost and schedule overruns during the development, construction and operation of generation facilities or other projects;
- performance of new ventures;
- collective labor bargaining negotiations and labor costs;
- risks related to wildfires, including costs of potential regulatory penalties and other liabilities, and the cost and availability of insurance and damages in excess of insurance liability coverage; and
- the outcome of litigation involving the Registrants and their subsidiaries.

Any forward-looking statements should be considered in light of these important factors and in conjunction with other documents of the Registrants on file with the SEC.

New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time to time, and it is not possible for the Registrants to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking statement speaks only as of the date on which such statement is made, and the Registrants undertake no obligation to update the information contained in the statement to reflect subsequent developments or information.

Investors should note that PPL announces material financial information in SEC filings, press releases and public conference calls. In accordance with SEC guidelines, PPL also uses the Investors section of its website, www.pplweb.com, to communicate with investors. It is possible that the financial and other information posted there could be deemed to be material information. The information on PPL's website is not part of this document.

PART I



ITEM 1. BUSINESS

General

(All Registrants)

PPL, headquartered in Allentown, Pennsylvania, is a utility holding company, incorporated in 1994. PPL, through its regulated utility subsidiaries, delivers electricity to customers in Pennsylvania, Kentucky, Virginia, and Rhode Island; delivers natural gas to customers in Kentucky and Rhode Island; and generates electricity from power plants in Kentucky.

PPL's principal subsidiaries at December 31, 2024 are shown below (* denotes a Registrant).

In addition to PPL, the other Registrants included in this filing are as follows.

PPL Electric, headquartered in Allentown, Pennsylvania, is a wholly-owned subsidiary of PPL and a regulated public utility that is an electricity transmission and distribution service provider in eastern and central Pennsylvania. PPL Electric is subject to regulation as a public utility by the PAPUC, and certain of its transmission activities are subject to the jurisdiction of the FERC under the Federal Power Act. PPL Electric delivers electricity in its Pennsylvania service area and provides electricity supply to retail customers in that area as a PLR under the Customer Choice Act. PPL Electric was organized in 1920 as Pennsylvania Power & Light Company.

LG&E, headquartered in Louisville, Kentucky, is a wholly-owned subsidiary of LKE and a regulated utility engaged in the generation, transmission, distribution and sale of electricity and distribution and sale of natural gas in Kentucky. LG&E is subject to regulation as a public utility by the KPSC, and certain of its transmission activities are subject to the jurisdiction of the FERC under the Federal Power Act. LG&E was incorporated in 1913.

KU, headquartered in Lexington, Kentucky, is a wholly-owned subsidiary of LKE and a regulated utility engaged in the generation, transmission, distribution and sale of electricity in Kentucky and Virginia. KU is subject to regulation as a public utility by the KPSC and the VSCC, and certain of its transmission and wholesale power activities are subject to the jurisdiction

of the FERC under the Federal Power Act. KU serves its Kentucky customers under the KU name and its Virginia customers under the Old Dominion Power name. KU was incorporated in Kentucky in 1912 and in Virginia in 1991.

Segment Information

(PPL)

PPL is organized into three reportable segments as depicted in the chart above: Kentucky Regulated, which primarily represents the results of LG&E and KU, Pennsylvania Regulated, which primarily represents the results of PPL Electric, and Rhode Island Regulated, which primarily represents the results of RIE. "Corporate and Other" primarily includes corporate level financing costs, certain unallocated corporate costs, and certain non-recoverable costs incurred in conjunction with the acquisition of Rhode Island Energy and the financial results of Safari Energy, prior to its sale on November 1, 2022.

A comparison of PPL's Regulated segments is shown below.

	Kentucky Regulated	Pennsylvania Regulated	Rhode Island Regulated
For the year ended December 31, 2024:			
Operating Revenues (in billions)	$ 3.6	$ 2.9	$ 2.0
Net Income (in millions)	$ 620	$ 574	$ 109
Electricity delivered (GWh)	30,109	36,611	7,371
Natural gas delivered (Bcf)	42	—	37
At December 31, 2024:			
Regulatory Asset Base (in billions) (a)	$ 12.4	$ 10.2	$ 3.8
Service area (in square miles)	8,000	10,000	1,200
Customers (in millions)	1.4	1.5	0.8

(a) Represents capitalization for Kentucky Regulated and rate base for Pennsylvania Regulated and Rhode Island Regulated. The amount for Rhode Island Regulated excludes acquisition-related adjustments for non-earning assets.

See Note 2 to the Financial Statements for additional financial information by segment. See Note 3 to the Financial Statements for additional revenue information.

(PPL Electric, LG&E and KU)

PPL Electric has two operating segments, distribution and transmission, which are aggregated into a single reportable segment. Each of LG&E and KU operates as a single operating and reportable segment.

Kentucky Regulated Segment *(PPL)*

The Kentucky Regulated segment consists primarily of the regulated electricity generation, transmission and distribution operations conducted by LG&E and KU, as well as LG&E's regulated distribution and sale of natural gas.

(PPL, LG&E and KU)

LG&E and KU are engaged in the regulated generation, transmission, distribution and sale of electricity in Kentucky and, in KU's case, also Virginia. LG&E also engages in the distribution and sale of natural gas in Kentucky. LG&E provides electric service to approximately 440,000 customers in Louisville and adjacent areas in Kentucky, covering approximately 700 square miles in nine counties and provides natural gas service to approximately 336,000 customers in its electric service area and eight additional counties in Kentucky. KU provides electric service to approximately 549,000 customers in 77 counties in central, southeastern and western Kentucky and approximately 28,000 customers in five counties in southwestern Virginia, covering approximately 4,800 non-contiguous square miles. KU also sells wholesale electricity to two municipalities in Kentucky under load following contracts.

Franchises and Licenses

LG&E and KU provide electricity delivery service, and LG&E provides natural gas distribution service, in their respective service territories pursuant to certain franchises, licenses, statutory service areas, easements and other rights or permissions granted by state legislatures, cities or municipalities or other entities.

Competition

There are currently no other electric public utilities operating within the electric service areas of LG&E and KU. From time to time, bills are introduced into the Kentucky General Assembly which seek to authorize, promote or mandate increased distributed generation, customer choice or other developments. Neither the Kentucky General Assembly nor the KPSC has adopted or approved a plan or timetable for retail electric industry competition in Kentucky. The nature or timing of legislative or regulatory actions, if any, regarding industry restructuring and their impact on LG&E and KU, which may be significant, cannot currently be predicted. Virginia, formerly a deregulated jurisdiction, has enacted legislation that implemented a hybrid model of cost-based regulation. KU's operations in Virginia have been and remain regulated.

Alternative energy sources such as electricity, oil, propane and other fuels indirectly impact LG&E's natural gas revenues. Marketers may also compete to sell natural gas to certain large end-users. LG&E's natural gas tariffs include gas price pass-through mechanisms relating to its sale of natural gas as a commodity. Therefore, customer natural gas purchases from alternative suppliers do not generally impact LG&E's profitability. Some large industrial and commercial customers, however, may physically bypass LG&E's facilities and seek delivery service directly from interstate pipelines or other natural gas distribution systems.

Power Supply

At December 31, 2024, LG&E owned generating capacity of 2,466 MW and KU owned generating capacity of 4,798 MW. See "Item 2. Properties - Kentucky Regulated Segment" for a complete list of generating facilities.

The system capacity of LG&E's and KU's owned generation is based upon several factors, including the operating experience and physical condition of the units, and may be revised periodically to reflect changes in circumstances.

During 2024, LG&E's and KU's power plants generated the following amounts of electricity:

	GWh	
Fuel Source	**LG&E**	**KU**
Coal	10,046	14,276
Gas	1,586	4,483
Hydro	235	54
Solar	8	12
Total (a)	11,875	18,825

(a) This generation represents a decrease for LG&E of 1% and an increase for KU of 8% from 2023 output.

The majority of LG&E's and KU's generated electricity was used to supply their retail customer bases.

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their customers. When LG&E has excess generation capacity after serving its own customers and its generation cost is lower than that of KU, KU purchases electricity from LG&E and vice versa.

Due to environmental requirements and energy efficiency measures, as of December 31, 2024, LG&E and KU have retired approximately 1,500 MW of coal-fired generation plants since 2010, including the retirement of a 300 MW coal-fired unit in December 2024 at the Mill Creek plant.

LG&E and KU received approval from the KPSC to develop a 4 MW Solar Share facility to service a Solar Share program. The Solar Share program is a voluntary program that allows customers to subscribe capacity in the Solar Share facility. Construction commences, in 500-kilowatt phases, when subscription is complete. Construction of five 500-kilowatt phases was completed as of December 31, 2022. LG&E and KU continue to market the program and are accepting subscriptions for the sixth 500-kilowatt phase.

On November 6, 2023, the KPSC issued an order approving LG&E’s and KU’s December 15, 2022 CPCN requests (i) to construct a 640 MW net summer rating NGCC combustion turbine at LG&E's Mill Creek Generating Station in Jefferson County, Kentucky, (ii) to construct a 120 MWac solar photovoltaic electric generating facility in Mercer County, Kentucky, (iii) to acquire a 120 MWac solar facility to be built by a third-party solar developer in Marion County, Kentucky and (iv) to construct a 125 MW, 4-hour battery energy storage system facility at KU's E.W. Brown Generating Station. The order also authorized LG&E's and KU's entry into four potential solar PPAs, subject to certain conditions, but deferred for future proceedings specific decisions on cost recovery treatment or mechanisms. Agreements related to two of the four potential solar

PPAs have been terminated. One PPA agreement was terminated by the developer due to land control issues. The second agreement terminated contractually due to a PPA price increase that was not acceptable to LG&E and KU. Further, the order approved the new, adjusted or expanded energy efficiency programs contained in the requested 2024-2030 DSM plan.

The KPSC order included approval of the requested retirements of two existing coal-fired generation units at LG&E's Mill Creek Unit 1 (300 MW) in 2024, which occurred on December 31, 2024, and Mill Creek Unit 2 (297 MW) in 2027, subject to certain conditions, and three small gas-fired units. The order denied approval of the retirement of KU's E.W. Brown 3 Unit (412 MW) and Ghent Unit 2 (486 MW) in 2028 at this time, citing the need for additional clarity regarding environmental compliance regulations.

The new NGCC facility will be jointly owned by LG&E (31%) and KU (69%) and the solar units will be jointly owned by LG&E (37%) and KU (63%), the battery storage unit will be owned by LG&E, and the proposed PPA transactions and DSM programs will be entered into or conducted jointly by LG&E and KU, consistent with LG&E and KU's shared dispatch, cost allocation, tariff or other frameworks.

In February 2024, LG&E and KU entered into agreements to begin construction of Mill Creek Unit 5. Total project costs are estimated at approximately $1.0 billion, including AFUDC. Commercial operation of the facility is anticipated to begin in mid-2027.

Fuel Supply

Coal and natural gas are expected to be the predominant fuels used by LG&E and KU for generation for the foreseeable future. Natural gas used for generation is purchased using contractual arrangements separate from LG&E's natural gas distribution operations. Natural gas and oil are also used for intermediate and peaking capacity and flame stabilization in coal-fired boilers.

Fuel inventory is maintained at levels estimated to be necessary to avoid operational disruptions at coal-fired generating units. Reliability of coal deliveries can be affected from time to time by several factors including fluctuations in demand, coal mine production issues, high or low river level events, lock outages and other supplier or transporter operating or financial difficulties.

LG&E and KU have entered into coal supply agreements with various suppliers for coal deliveries through 2030 and augment their coal supply agreements with spot market purchases, as needed.

For their existing units, LG&E and KU expect, for the foreseeable future, to purchase most of their coal from western Kentucky, southern Indiana, southern Illinois, northern West Virginia and western Pennsylvania. LG&E and KU continue to purchase certain quantities of ultra-low sulfur content coal from Wyoming for blending at Trimble County Unit 2. Coal is delivered to the generating plants primarily by barge and rail.

To enhance the reliability of natural gas supply, LG&E and KU have secured firm long-term pipeline transport capacity services with contracts of various durations through 2056 on the interstate pipeline serving Cane Run Unit 7, six simple cycle combustion turbines at the Trimble County site, and the future Mill Creek Unit 5. This pipeline also serves the two simple cycle units at the Paddy's Run site. For the seven simple cycle combustion turbines at the E.W. Brown facility, no firm long-term pipeline transport capacity has been purchased due to the facility's connection to two interstate pipelines and some of the units having dual fuel capability.

LG&E and KU have firm contracts for a portion of the natural gas fuel for Cane Run Unit 7 through 2026. The bulk of the natural gas fuel is expected to be purchased on the spot market.

(PPL and LG&E)

Natural Gas Distribution Supply

Four underground natural gas storage fields in service, with a current working natural gas capacity of approximately 11 Bcf, are used to provide natural gas service to LG&E's firm sales customers. Natural gas is stored during the summer season for withdrawal during the following winter heating season. Without this storage capacity, LG&E would need to purchase additional natural gas and pipeline transportation services during winter months when customer demand increases, and the cost of natural gas supply and pipeline transportation services are expected to be higher. At December 31, 2024, LG&E had 9 Bcf of natural

gas stored underground with a carrying value of $29 million. In 2024, LG&E completed the multi-year project to retire a fifth underground natural gas storage field, which was no longer in service.

LG&E has a portfolio of supply arrangements of varying terms that provide competitively priced natural gas designed to meet its firm sales obligations. These natural gas supply arrangements include pricing provisions that are market-responsive. In tandem with pipeline transportation services, these natural gas supplies provide the reliability and flexibility necessary to serve LG&E's natural gas customers.

LG&E purchases natural gas supply transportation services from two pipelines. LG&E has a set of contracts with one pipeline that are subject to termination by LG&E between 2026 and 2030. Total winter season capacity under these contracts is 184,900 MMBtu/day and summer season capacity is 60,000 MMBtu/day. LG&E has two additional contracts with this same pipeline. One contract is for pipeline capacity through 2026 for 60,000 MMBtu/day during both the winter and summer seasons. The other contract is for pipeline capacity through 2028 for 30,000 MMBtu/day during the winter season. LG&E has a single contract with a second pipeline with a total capacity of 20,000 MMBtu/day during both the winter and summer seasons that expires in 2030.

LG&E expects to purchase natural gas supplies for its gas distribution operations from onshore producing regions in South Texas, East Texas, North Louisiana and Arkansas, as well as gas originating in the Marcellus and Utica production areas.

(PPL, LG&E and KU)

Transmission

LG&E and KU contract with the Tennessee Valley Authority to act as their transmission reliability coordinator and contract with TranServ International, Inc. to act as their independent transmission organization.

Rates

LG&E is subject to the jurisdiction of the KPSC and the FERC, and KU is subject to the jurisdiction of the KPSC, the VSCC and the FERC. LG&E and KU operate under a FERC-approved open access transmission tariff.

LG&E's and KU's Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and short-term debt) including adjustments for certain net investments and costs recovered separately through other means. As such, LG&E and KU generally earn a return on regulatory assets in Kentucky.

KU's Virginia base rates are calculated based on a return on rate base (net utility plant plus certain regulatory assets and working capital less accumulated deferred income taxes, certain regulatory liabilities and miscellaneous deductions) and include recovery of applicable operations and maintenance expenses.

KU's rates to two municipal customers for wholesale power requirements are calculated based on annual updates to a formula rate that utilizes a return on rate base (net utility plant plus certain regulatory assets and working capital less accumulated deferred income taxes, certain regulatory liabilities and miscellaneous deductions) and include recovery of applicable operations and maintenance expenses.

See "Financial and Operational Developments" in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" and Note 7 to the Financial Statements for additional information on current rate proceedings and rate mechanisms.

Pennsylvania Regulated Segment *(PPL)*

The Pennsylvania Regulated segment consists of PPL Electric, a regulated public utility engaged in the distribution and transmission of electricity.

(PPL and PPL Electric)

PPL Electric delivers electricity to approximately 1.5 million customers in a 10,000-square mile territory in 29 counties within eastern and central Pennsylvania. PPL Electric also provides electricity to retail customers in this territory as a PLR under the Customer Choice Act.

Franchises and Licenses

PPL Electric provides electricity delivery service in its service territory pursuant to certain franchises, licenses, statutory service areas, easements and other rights or permissions granted by the Pennsylvania state legislature, cities or municipalities or other entities.

Competition

Pursuant to authorizations from the Commonwealth of Pennsylvania and the PAPUC, PPL Electric operates a regulated distribution monopoly in its service area. Accordingly, PPL Electric does not face competition in its electricity distribution business. Pursuant to the Customer Choice Act, generation of electricity is a competitive business in Pennsylvania, and PPL Electric does not own or operate any generation facilities.

The PPL Electric transmission business, operating under a FERC-approved PJM Open Access Transmission Tariff, is subject to competition pursuant to FERC Order 1000 from entities that are not incumbent PJM transmission owners with respect to the construction and ownership of transmission facilities within PJM.

Rates and Regulation

Transmission

PPL Electric's transmission facilities are within PJM, which operates the electricity transmission network and electric energy market in the Mid-Atlantic and Midwest regions of the U.S.

PJM serves as a FERC-approved Regional Transmission Operator (RTO) to promote greater participation and competition in the region it serves. In addition to operating the electricity transmission network, PJM also administers regional markets for energy, capacity and ancillary services. A primary objective of any RTO is to separate the operation of, and access to, the transmission grid from market participants that buy or sell electricity in the same markets. Electric utilities continue to own the transmission assets and to receive their share of transmission revenues, but the RTO directs the control and operation of the transmission facilities. Certain types of transmission investments are subject to competitive processes outlined in the PJM tariff.

PPL Electric's transmission revenues are billed in accordance with a FERC-approved Open Access Transmission Tariff that utilizes a formula-based rate recovery mechanism. Under this formula, beginning in 2023, rates are put into effect on January 1st of each year based upon actual expenditures from the most recently filed FERC Form 1, forecasted capital additions, and other data based on PPL Electric’s books and records. 2023 was considered a transitional period as the calendar year rate approved by FERC became effective April 1, 2023. Rates are compared during the year to the estimated annual expenses and capital additions that will be filed in PPL Electric’s annual FERC Form 1, filed under the FERC's Uniform System of Accounts. Under the mechanism, any difference between the revenue requirement in effect and actual expenditures incurred for that year is recorded as a regulatory asset or regulatory liability, and the regulatory asset or regulatory liability is to be recovered from or returned to customers starting one year after the conclusion of the rate year.

As a PLR, PPL Electric also purchases transmission services from PJM. See "PLR" below.

See Note 7 to the Financial Statements for additional information on rate mechanisms and regulatory matters.

Distribution

PPL Electric's distribution base rates are calculated based on a return on rate base (net utility plant plus a cash working capital allowance less plant-related deferred taxes and other miscellaneous additions and deductions). All regulatory assets and liabilities, except accumulated deferred income taxes, are excluded from the return on rate base. Therefore, no return is earned on the related assets unless specifically provided for by the PAPUC. Currently, PPL Electric's Smart Meter rider and the DSIC are the only riders authorized to earn a return. Certain operating expenses are also included in PPL Electric's distribution base rates including wages and benefits, other operation and maintenance expenses, depreciation and taxes.

Pennsylvania's Alternative Energy Portfolio Standard (AEPS) requires electric distribution companies and electricity generation suppliers to obtain from alternative energy resources a portion of the electricity sold to retail customers in Pennsylvania. Under the default service procurement plans approved by the PAPUC, PPL Electric purchases all of the alternative energy generation supply it needs to comply with the AEPS.

Act 129 created an energy efficiency and conservation program, a demand side management program, smart metering technology requirements, new PLR generation supply procurement rules, remedies for market misconduct and changes to the existing AEPS.

Act 11 authorizes the PAPUC to approve two specific ratemaking mechanisms: the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, the use of a DSIC. Such alternative ratemaking procedures and mechanisms provide opportunity for accelerated cost-recovery and, therefore, are important to PPL Electric as it is in a period of significant capital investment to maintain and enhance the reliability of its delivery system, including the replacement of aging assets. PPL Electric utilized the fully projected future test year mechanism in its 2015 base rate proceeding. PPL has had the ability to utilize the DSIC recovery mechanism since July 2013.

See Note 7 to the Financial Statements for additional information on rate mechanisms and legislative and regulatory matters.

PLR

The Customer Choice Act requires electric distribution companies, including PPL Electric, or an alternative supplier approved by the PAPUC, to act as a PLR of electricity supply for customers who do not choose to shop for supply with a competitive supplier and provides that electricity supply costs will be recovered by the PLR pursuant to PAPUC regulations. In 2024, the following average percentages of PPL Electric's customer load were provided by competitive suppliers: 43% of residential, 82% of small commercial and industrial and 98% of large commercial and industrial customers.

PPL Electric’s electricity generation costs are established based upon the results of a competitive solicitation process. In December 2020, the PAPUC approved PPL Electric’s default service plan for the period June 1, 2021 through May 31, 2025, which included a total of eight solicitations for electricity supply held semiannually in April and October. Through December 31, 2024, all auctions of the plan were completed. This plan also included eight solicitations for alternative energy credits held semiannually in January and July. Through January 2025, all alternative energy credit solicitations have been completed.

On November 7, 2024, the PAPUC approved PPL Electric's default service plan for the period of June 1, 2025 through May 31, 2029, which includes a total of eight solicitations for electricity supply held semiannually in February and July. The new plan also includes solicitations for alternative energy credits held annually in July with the first solicitation in July 2025 and the final solicitation in July 2029.

Pursuant to the plans, PPL Electric contracts for all electricity supply for residential, commercial and industrial customers who elect to take default service from PPL Electric. These solicitations contain a mix of products including 10-year block energy contracts for residential customers, 12- and 24-month fixed-price load-following contracts for residential and small commercial and industrial customers, 12-month real-time pricing contracts for large commercial and industrial customers, and alternative energy credit contracts for residential, commercial and industrial customers. These contracts fulfill PPL Electric's obligation to provide customer electricity supply as a PLR.

Numerous alternative suppliers have offered to provide generation supply in PPL Electric's service area. As the cost of generation supply is a pass-through cost for PPL Electric, its financial results are not impacted if its customers purchase electricity supply from these alternative suppliers.

Rhode Island Regulated Segment *(PPL)*

The Rhode Island Regulated segment consists primarily of the regulated electricity transmission and distribution operations and regulated distribution and sale of natural gas conducted by RIE.

RIE is engaged in the regulated transmission, distribution and sale of electricity and regulated distribution and sale of natural gas in Rhode Island. RIE provides electric service to approximately 515,000 customers and natural gas service to approximately 280,000 customers. RIE's service area covers substantially all of Rhode Island.

Franchises and Licenses

RIE provides electricity delivery service and natural gas distribution service in its service territory pursuant to certain franchises, licenses, statutory service areas, easements and other rights or permissions granted by the Rhode Island state legislature, cities or municipalities or other entities.

Competition

There are currently no other electric or gas public utilities operating within the service area of RIE.

Alternative energy sources such as electricity, oil, propane and other fuels indirectly impact RIE's natural gas revenues. Marketers may also compete to sell natural gas to certain large end-users. RIE's natural gas tariffs include gas price pass-through mechanisms relating to its sale of natural gas as a commodity. Therefore, customer natural gas purchases from alternative suppliers do not generally impact RIE's profitability. Some large industrial and commercial customers, however, may physically bypass RIE's facilities and seek delivery service directly from interstate pipelines or other natural gas distribution systems.

Rates and Regulation

In general, RIE operates subject to the jurisdiction of the FERC, the RIPUC and the Rhode Island Division of Public Utilities and Carriers.

Distribution

RIE owns and maintains electric and natural gas distribution networks in Rhode Island. Distribution revenues are primarily from the sale of electricity, natural gas, and related services to retail customers. Distribution sales are regulated by the RIPUC, which is responsible for approving the rates and other terms of services as part of the rate making process. Natural gas and electric distribution revenues are derived from the regulated sale and distribution of electricity and natural gas to residential, commercial, and industrial customers within RIE's service territory under the tariff rates. The tariff rates approved by the RIPUC are designed to recover the costs incurred by RIE for products and services provided, along with a return on investment.

RIE's distribution base rates are calculated based on a return on rate base (net utility plant plus a cash working capital allowance less plant-related deferred taxes and other miscellaneous additions and deductions). All regulatory assets and liabilities, except accumulated deferred income taxes, are excluded from the return on rate base. Therefore, no return is earned on the related assets unless specifically provided for by the RIPUC. Currently, RIE's ISR and Renewable Energy Growth Program adjustment mechanisms are the only mechanisms authorized to earn a return. Certain operating expenses are also included in RIE's distribution base rates including wages and benefits, other operation and maintenance expenses, depreciation, and taxes.

Transmission

RIE owns an electric transmission system in Rhode Island. RIE's transmission services are regulated by the FERC and coordinated with ISO – New England.

Deferral Mechanisms

RIE records revenues in accordance with accounting principles for rate-regulated operations for arrangements between RIE and the applicable regulator. These include various deferral mechanisms such as capital trackers, energy efficiency programs, and other programs that qualify as Alternative Revenue Programs (ARPs). ARPs enable RIE to adjust rates in the future, in response to past activities or completed events. RIE's electric and gas distribution rates both have a revenue decoupling mechanism, which allows for annual adjustments to the RIE's delivery rates, as a result of the reconciliation between allowed revenue and billed revenue. RIE also has other ARPs related to the achievement of certain objectives, demand side management initiatives, and certain other rate making mechanisms. RIE recognizes ARPs with a corresponding offset to a regulatory asset or liability account when the regulatory specified events or conditions have been met, when the amounts are determinable, and are probable of recovery (or payment) through future rate adjustments.

Last Resort Service (LRS)

RIE is required by the RIPUC and by statute to provide LRS to all customers who have not elected to receive their electric supply from a non-regulated power producer or any customer who, for any reason, has stopped receiving generation service from a non-regulated power producer.

The charge for LRS is the sum of the applicable LRS charges in addition to all appropriate Retail Delivery charges as stated in the applicable tariff. The monthly charge for LRS also includes the costs incurred by RIE to comply with the Renewable Energy Standard, established in Rhode Island General Laws Section 39-26-1 and the costs to comply with the RIPUC's Rules Governing Energy Source Disclosure. The charge for LRS includes the administrative costs associated with the procurement of LRS, including an adjustment for uncollectible accounts as approved by the RIPUC.

Numerous alternative suppliers have offered to provide generation supply in RIE's service area. As the cost of generation supply is a pass-through cost for RIE, its financial results are not impacted if its customers purchase electricity supply from these alternative suppliers.

See Note 7 to the Financial Statements for additional information on rate mechanisms and regulatory matters.

Natural Gas Distribution Supply

To meet the projected annual gas supply requirements of approximately 37 Bcf, RIE has a portfolio of gas supply arrangements of varying contractual terms and durations to provide service to its customers. These natural gas supply arrangements include contracts with natural gas producers and marketers that reflect market price signals. RIE also has firm pipeline and underground storage capacity contracts to support the delivery of natural gas supplies to its customers. To manage the winter peak requirements for RIE customers, RIE contracts for liquified natural gas (LNG) service and owns and operates certain LNG storage facilities.

The RIE gas supply portfolio includes contracts for firm transportation service with eleven interstate pipeline companies and natural gas storage operators. These contracts have various termination dates with certain contracts being subject to evergreen renewal provisions providing RIE with flexibility in managing its upstream resource portfolio.

RIE has purchased and expects to continue to purchase natural gas supplies for its gas distribution operations from onshore producing regions accessed by its pipeline capacity portfolio in South Texas, East Texas, and Louisiana, as well as gas originating in the Marcellus and Utica production areas. RIE expects to purchase certain natural gas supplies that originate in Canada and from regional LNG import terminals.

Corporate and Other *(PPL)*

PPL Services provides PPL subsidiaries with administrative, management and support services. The costs of these services are charged directly to the respective recipients for the services provided or indirectly charged to applicable recipients based on an average of the recipients' relative invested capital, operation and maintenance expenses and number of employees or a ratio of overall direct and indirect costs.

PPL Capital Funding provides financing for the operations of PPL and certain subsidiaries. PPL's growth in rate-regulated businesses provides the organization with an enhanced corporate level financing alternative, through PPL Capital Funding, that enables PPL to cost effectively support targeted credit profiles across all of PPL's rated companies. As a result, PPL utilizes PPL Capital Funding as a source of capital in financings, in addition to continued direct financing by certain operating subsidiaries. Unlike those of PPL Services, PPL Capital Funding's costs are not generally charged to PPL subsidiaries. Costs are charged directly to PPL.

ENVIRONMENTAL MATTERS

(All Registrants)

The Registrants are subject to certain existing and developing federal, regional, state and local laws and regulations with respect to air and water quality, land use and other environmental matters, and may be subject to different and more stringent laws and regulations enacted in the future. The EPA and other federal agencies with jurisdiction over environmental matters have issued numerous environmental regulations relating to air, water and waste that directly affect the electric power industry. Due to these environmental issues, it may be necessary for the Registrants to modify or cease certain operations or operation of certain facilities to comply with statutes, regulations and other requirements of regulatory bodies or courts. In addition, legal challenges to environmental permits or rules add uncertainty to estimating future costs of complying with such permits and rules. The Registrants are monitoring executive orders and other ongoing actions by the new Presidential administration, but are unable to predict changes in regulations, regulatory guidance, legal interpretations, policy positions, and implementation actions that may result.

See “Legal Matters” in Note 12 to the Financial Statements for a discussion of environmental commitments and contingencies. See "Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash - Capital Expenditures" in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" for information on projected environmental capital expenditures for 2025 through 2027. See Note 18 to the Financial Statements for information related to the impacts of CCRs on AROs.

LG&E and KU are entitled to recover, through the ECR mechanism, certain costs of complying with the Clean Air Act, as amended, and other federal, state and local environmental requirements applicable to coal combustion wastes and by-products from coal-fired generating facilities upon KPSC review. Costs not covered by the ECR mechanism for LG&E and KU and all such costs for PPL Electric and RIE are subject to rate recovery at the discretion of the companies' respective state regulatory authorities, or the FERC, if applicable. Because PPL Electric and RIE do not own any generating plants, they have less exposure to related environmental compliance costs. The Registrants can provide no assurances as to the ultimate outcome of future proceedings before regulatory authorities.

Air

(PPL, LG&E and KU)

NAAQS

Applicable regulations require each state to identify areas within its boundaries that fail to meet the NAAQS, (known as nonattainment areas), and develop a state implementation plan to achieve and maintain compliance. States that are found to contribute significantly to another state's nonattainment with ozone standards are required to establish "good neighbor" state implementation plans. In addition, for attainment of ozone and fine particulates standards, certain states, including Kentucky, are subject to a regional EPA program known as the Cross-State Air Pollution Rule (CSAPR).

The Clean Air Act has a significant impact on the operation of fossil fuel generation plants. The Clean Air Act requires the EPA periodically to establish and review NAAQS for six pollutants including ozone (contributed to by nitrogen oxide emissions) and particulate matter, which are particularly relevant for fossil fuel generation plants. On February 2, 2024, the D.C. Circuit Court granted the EPA’s motion for voluntary remand, without vacatur, of the ozone rule, which was under legal challenge. The EPA will complete a new review to incorporate new studies and updated analyses to determine the adequacy of the existing ozone standard. On March 6, 2024, the EPA finalized revisions to the particulate matter standard that lowers the primary standard for fine particulates. Several states and trade groups challenged the EPA’s finalized revisions to the particulate matter standard in the D.C. Circuit Court. Nonattainment designations for counties in which LG&E and KU generation is located, including Jefferson County, Kentucky, could potentially require additional particulate matter and nitrogen oxide reductions from sources including LG&E’s Mill Creek Station, and more stringent requirements for new generation. PPL, LG&E, and KU are unable to predict future implementation actions or the outcome of future evaluations by the EPA and the states with respect to the NAAQS standards.

In March 2021, the EPA released final revisions to the Cross-State Air Pollution Rule (CSAPR), aimed at ensuring compliance with the 2008 ozone NAAQS and providing for reductions in ozone season nitrogen oxide emissions for 2021 and subsequent years. In March 2023, the EPA released a final Federal Implementation Plan under the Good Neighbor provisions of the Clean Air Act providing for significant additional nitrogen oxide emission reductions for compliance with the revised 2015 ozone NAAQS. The reductions in Kentucky state-wide nitrogen oxide budgets were scheduled to commence in 2023, with the largest reductions planned for 2026. The rules provide for reduced availability of nitrogen oxide allowances that have historically permitted operational flexibility for fossil units and could potentially result in constraints that may require implementation of additional emission controls or accelerate implementation of lower emission generation technologies. In June 2024, the U.S. Supreme Court issued a stay of the Good Neighbor Plan while the D.C. Circuit Court considers legal challenges to the rule. On December 10, 2024, EPA published in the Federal Register a supplement to the record. On December 6, 2024, the U.S. Court of Appeals for the Sixth Circuit vacated and remanded the EPA’s disapproval of Kentucky’s state implementation plan for the ozone NAAQS. PPL, LG&E, and KU are monitoring ongoing legal and regulatory developments.

PPL, LG&E, and KU are unable to predict the ultimate outcome of pending litigation or future emission reductions that may be required by future federal rules or state implementation actions. Compliance with the NAAQS, CSAPR, Good Neighbor Plan, and related requirements may require installation of additional pollution controls or other compliance actions, inclusive of retirements, the costs of which PPL, LG&E and KU believe would be subject to rate recovery.

Modification of Mercury and Air Toxics Standards

In 2012, the EPA issued the Mercury and Air Toxics Standards (MATS) rule requiring reductions in mercury and other hazardous air pollutants from fossil fuel-fired power plants. LG&E and KU installed significant controls to achieve compliance with MATS and other rules. On May 7, 2024, the EPA issued a final rule increasing the stringency of MATS and further reducing emissions of certain hazardous air pollutants to reflect perceived developments in control technologies. Legal challenges to the rule have been filed in the D.C. Circuit Court. PPL, LG&E, and KU have reviewed the final rule and do not expect significant operational changes or additional controls to be required.

Greenhouse Gas Standards

On May 9, 2024, the EPA issued a final rule under Section 111 of the Clean Air Act which establishes performance standards and emissions limits aimed at reducing GHG emissions from certain new, existing, and modified fossil fuel-fired electric generating units (EGUs). In the final rule, the EPA announced it would set performance standards for existing natural gas-fired turbines in a future rule. The standards require phased implementation of carbon mitigation technologies including state-of-the-art efficiency requirements, carbon capture and sequestration, and natural gas co-firing. New natural gas EGUs would be immediately subject to the stricter efficiency standard. Legal challenges to the rule have been filed in the D.C. Circuit Court. PPL, LG&E, and KU are unable to predict the impact of new GHG reduction requirements until completion of a comprehensive review and resolution of related legal and regulatory proceedings. While the impact of new GHG reduction requirements on operations and financial results of operations could potentially be substantial, the cost of complying with such requirements is expected to be subject to rate recovery.

Climate Change (All Registrants)

In recent years the federal government has undertaken various efforts aimed at addressing climate change, which could have far-reaching impacts on PPL's business operations, products, and services. In 2022, the U.S. Supreme Court ruled that provisions of the EPA's Clean Power Plan, premised on generation shifting from coal-fired plants to lower emitting natural gas-fired plants and renewables, exceeded the authority granted to the EPA under the Clean Air Act. While the EPA contends that the new GHG emissions rule discussed above is consistent with the provisions of the Clean Air Act, it is uncertain how a ruling from the D.C. Circuit Court or, if appealed, the U.S. Supreme Court may affect the new GHG emissions rule and any future EPA rulemaking on GHG emissions. The new Presidential administration has issued various executive orders regarding climate change initiatives and is expected to consider changes in regulations, regulatory guidance, legal interpretations, policy positions and implementation actions, but the Registrants are unable to predict any changes that may ultimately be adopted. All of these developments are preliminary or ongoing in nature and the Registrants cannot predict the final outcome or ultimate impact on operations.

PPL has adopted a goal of net-zero carbon emissions by 2050, which PPL expects will include continuing to retire coal-fired generation and investing in research and innovation that will help to achieve this goal, while maintaining reliable and affordable energy in our service territories. The net-zero goal relates to direct and indirect carbon emissions consistent with Greenhouse Gas Protocol guidance and referenced by the EPA Center for Corporate Climate Leadership. Through 2023, PPL reduced carbon emissions nearly 60% from 2010 levels and is targeting a 70% reduction from 2010 levels by 2035 and an 80% reduction by 2040.

PPL is also aware of the various risks associated with climate change, including increased frequency and severity of severe weather. To address these risks, PPL continues to work to advance grid modernization and improve the company's equipment to help mitigate the impacts of extreme weather events and improve reliability.

Water/Waste *(PPL, LG&E and KU)*

Clean Water Act

Regulations under the federal Clean Water Act dictate permitting and mitigation requirements for facilities and construction projects that impact "Waters of the United States". Many other requirements relate to power plant operations, including the treatment of pollutants in effluents prior to discharge, the temperature of effluent discharges and the location, design and construction of cooling water intake structures at generating facilities, and standards intended to protect aquatic organisms that become trapped at or pulled through cooling water intake structures at generating facilities. These requirements could impose significant costs for LG&E and KU, which are expected to be subject to rate recovery.

Clean Water Act Jurisdiction

Environmental groups and others have claimed that discharges to groundwater from leaking CCR impoundments at power plants are subject to Clean Water Act permitting. On April 12, 2019, the EPA released regulatory clarification finding that Clean Water Act jurisdiction does not cover such discharges to groundwater. On January 23, 2020, the EPA announced a final rule modifying the jurisdictional scope of the Clean Water Act. The announced rule revises the definition of the "Waters of the United States," including a revision to exclude groundwater from the definition. In April 2020, the U.S. Supreme Court issued a ruling that Clean Water Act jurisdiction may apply to certain discharges to groundwater that result in the functional equivalent of a direct discharge to navigable waters. PPL, LG&E, and KU are unaware of any unpermitted releases from their facilities that are subject to Clean Water Act jurisdiction, but future regulatory developments and judicial rulings could potentially subject certain releases from CCR impoundments and landfills to additional permitting and remediation requirements, which could impose substantial costs. Any associated costs are expected to be subject to rate recovery. PPL, LG&E and KU are unable to predict the outcome or financial impact of future regulatory proceedings and litigation.

Waters of the U.S.

PPL, LG&E, and KU are subject to permitting and mitigation requirements for certain construction activities that impact "Waters of the United States." On April 21, 2020, the EPA and U.S. Army Corps of Engineers published a final rule revising the definition of "Waters of the United States" to exclude jurisdiction over certain surface waters. On August 30, 2021, a U.S. District Court in Arizona vacated and remanded the rule. On December 7, 2021, the EPA and U.S. Army Corps of Engineers proposed to repeal the rule and restore the definition of "Waters of the United States" that was in place prior to 2015. On January 18, 2023, the EPA and U.S. Army Corps of Engineers published a final revision to the rule broadening the definition of Waters of the United States and reverting to the pre-2015 regulatory framework. Although the broader definition incorporates additional water bodies, any resulting permitting, construction, and operational expenses are expected to be immaterial and subject to rate recovery.

On May 25, 2023, the U.S. Supreme Court issued an opinion in Sackett v. EPA holding that the government’s jurisdiction to regulate wetlands under the Clean Water Act extends to wetlands with a continuous surface connection to bodies that are "Waters of the United States." On September 8, 2023, the EPA issued a conforming rule that incorporated the holding of *Sackett* into federal definitions of waters of the United States; some states and industry groups have challenged the conforming rule as well. By limiting water bodies that fall within the jurisdiction of the Clean Water Act, the U.S. Supreme Court's decision could reduce the number of projects or the scope of project activities subject to federal permitting for wetlands. PPL, LG&E and KU are unable to predict the outcome of current or future litigation or regulatory proceedings, but do not expect a material impact on operations.

Superfund and Other Remediation *(All Registrants)*

From time to time, PPL's subsidiaries undertake testing, monitoring or remedial action in response to spills or other releases at various on-site and off-site locations, negotiate with the EPA and state and local agencies regarding actions necessary to comply with applicable requirements, negotiate with property owners and other third parties alleging impacts from PPL's operations and undertake similar actions necessary to resolve environmental matters that arise in the course of normal operations. Based on analyses to date, resolution of these environmental matters is not expected to have a significant adverse impact on the operations of PPL, PPL Electric, LG&E, KU and RIE.

Future cleanup or remediation work at sites not yet identified may result in significant additional costs for the Registrants. Insurance policies maintained by LKE may be available to cover certain of the costs or other obligations related to these matters for LG&E or KU, but the amount of insurance coverage or reimbursement cannot be estimated or assured.

See “Legal Matters” in Note 12 to the Financial Statements for additional information.

(All Registrants)

SEASONALITY

The demand for and market prices of electricity and natural gas are affected by weather. As a result, the Registrants' operating results in the future may fluctuate substantially on a seasonal basis, especially when unpredictable weather conditions make such fluctuations more pronounced. The pattern of this fluctuation may change depending on the type and location of the facilities owned.

FINANCIAL CONDITION

See "Financial Condition" in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" for this information.

CAPITAL EXPENDITURE REQUIREMENTS

See "Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash - Capital Expenditures" in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" for information concerning projected capital expenditure requirements for 2025 through 2027. See "Item 1. Business - Environmental Matters" for additional information concerning the potential impact on capital expenditures from environmental matters.

HUMAN CAPITAL

PPL, together with its subsidiaries, is committed to fostering an exceptional workplace for employees. PPL pledges to enable the success of its current and future workforce by cultivating a supportive, empowering and collaborative culture, fostering professional development, encouraging employee engagement, and ensuring a safe and healthy work environment. Matters related to these priorities and corporate culture are overseen by PPL's senior management, which provides updates to the PPL Board of Directors (the Board). Pursuant to its charter, the People and Compensation Committee of the Board of Directors also periodically reviews and assesses the company's strategy for human capital management. PPL's investment in the success of its workforce is embodied in the following areas with dedicated leadership and Board oversight:

- Corporate culture - Foster a supportive, empowering and collaborative workplace culture in which employees with various backgrounds can thrive. Senior management reviews workforce metrics, culture related objectives and associated programs semi-annually. The Board also receives periodic updates from senior management on PPL's strategy and initiatives that drive corporate culture.
- Employee engagement - Create a workplace that fosters an engaged, high-quality workforce. PPL's operating companies regularly conduct assessments related to employee engagement, safety and culture. Senior management reviews employee engagement efforts with the Board at least annually.
- Professional development - Invest in the current and future workforce through training and development, succession planning and creation of a pipeline for internal advancement. Senior management reviews succession planning with the People and Compensation Committee of the Board on an annual basis.
- Comprehensive benefits - In addition to challenging careers and competitive salaries, PPL offers competitive benefits programs to attract and retain talent and support employees' well-being. PPL offers competitive vacation time, expanded leave for new parents, retirement programs, and internal and external development opportunities, including tuition reimbursement offerings for undergraduate and certain graduate degrees. Senior management conducts annual benchmarking of employee compensation and benefits.
- Safety and Compliance - PPL is committed to maintaining an ethical and safe workplace culture. Additional steps to ensure Board oversight in these areas include:

    - Safety – PPL implements programs focused on health and safety, including emergency preparedness, vehicle safety and accident prevention. Employees receive safety training and are encouraged to share, implement, and follow best practices. Senior management receives monthly safety data updates to determine whether additional safety measures should be implemented. The Board reviews the company's safety programs and results at least annually. The Board is also immediately engaged in the event of a fatality.
    - Compliance – The Corporate Compliance Committee, including senior executives, meets quarterly to discuss metrics and other matters related to the compliance and ethics culture. Among the items discussed are statistics regarding Ethics Helpline reports and employee concerns. This information is also reviewed with the Audit Committee of the Board quarterly and with the Board annually.

PPL will continue to engage with employees and to assess these priorities as we work to best position individuals and the company for future success. PPL had a turnover rate of 8.25% for the year ended December 31, 2024. Looking forward, PPL will maintain our strong focus on workforce planning to address future talent needs.

At December 31, 2024, the Registrants had the following full-time employees and employees represented by labor unions:

	Total Full-Time Employees	Number of Union Employees	Percentage of Total Workforce
PPL	6,653	2,431	37 %
PPL Electric	1,393	916	66 %
LG&E	906	581	64 %
KU	723	109	15 %

(PPL and KU)

In July 2024, KU and the IBEW local reached, and local members ratified, a new three-year labor agreement through July 2027. The agreement covers approximately 60 employees. The terms of the new labor agreement are not expected to have a significant impact on the financial results of KU or PPL.

(PPL)

In May 2024, PPL and the Rhode Island UWUA locals ratified a five-year labor agreement through May 2029. The agreement covers over 530 employees. The terms of the new labor agreement are not expected to have a significant impact on the financial results of PPL.

Contract negotiations with RIE USW Local 12431 are expected to commence in April 2025. The current contract covers over 300 employees and is scheduled to expire June 1, 2025.

AVAILABLE INFORMATION

PPL's Internet website is www.pplweb.com. Under the Investors heading of that website, PPL provides access to SEC filings of the Registrants (including annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports filed or furnished pursuant to Section 13(d) or 15(d)) free of charge, as soon as reasonably practicable after filing with the SEC. The information contained on, or available through, PPL's Internet website is not, and shall not be deemed to be, incorporated by reference into this report. Additionally, the Registrants' filings are available at the SEC's website (www.sec.gov).

ITEM 1A. RISK FACTORS

The Registrants face various risks associated with their businesses. Our businesses, financial condition, cash flows or results of operations could be materially adversely affected by any of these risks. In addition, this report also contains forward-looking and other statements about our businesses that are subject to numerous risks and uncertainties. See "Forward-Looking Information," "Item 1. Business," "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" and Note 12 to the Financial Statements for additional information concerning the risks described below and for other risks, uncertainties and factors that could affect our businesses and financial results.

As used in this Item 1A., the terms "we," "our" and "us" generally refer to PPL and its consolidated subsidiaries taken as a whole, or PPL Electric and its consolidated subsidiaries taken as a whole within the Pennsylvania Regulated segment discussion, LG&E, KU and their consolidated subsidiaries taken as a whole within the Kentucky Regulated segment discussion, and RIE within the Rhode Island Regulated segment discussion.

Order of Subsection Presentation

- **A. Risks Related to Registrant Holding Company**
- **B. Risks Related to Regulated Utility Operations**
- **C. Risks Specific to Kentucky Regulated Segment**
- **D. Risks Specific to Pennsylvania Regulated Segment**
- **E. Risks Specific to Rhode Island Regulated Segment**
- **F. Risks Related to All Segments**

(PPL)

A. Risk Related to Registrant Holding Company

PPL is a holding company and its cash flows and ability to meet its obligations with respect to indebtedness and under guarantees, and its ability to pay dividends, largely depends on the financial performance of its respective subsidiaries and, as a result, is effectively subordinated to all existing and future liabilities of those subsidiaries.

PPL is a holding company and conducts its operations primarily through subsidiaries. Substantially all of the consolidated assets of PPL are held by its subsidiaries. Accordingly, PPL's cash flows and ability to meet debt and guaranty obligations, as well as PPL's ability to pay dividends, are largely dependent upon the earnings of those subsidiaries and the distribution or other payment of such earnings in the form of dividends, distributions, loans, advances or repayment of loans and advances. The subsidiaries are separate legal entities and have no obligation to pay dividends or distributions to their parents or to make funds available for such a payment. The ability of PPL's subsidiaries to pay dividends or distributions in the future will depend on the subsidiaries' future earnings and cash flows and the needs of their businesses, and may be restricted by their obligations to holders of their outstanding debt and other creditors, as well as any contractual or legal restrictions in effect at such time, including the requirements of state corporate law applicable to payment of dividends and distributions, and regulatory requirements, including restrictions on the ability of PPL Electric, LG&E, KU, and RIE to pay dividends under Section 305(a) of the Federal Power Act.

Because PPL is a holding company, its debt and guaranty obligations are structurally subordinated to all existing and future liabilities of its subsidiaries. Although certain agreements to which certain subsidiaries are parties limit their ability to incur additional indebtedness, PPL and its subsidiaries retain the ability to incur substantial additional indebtedness and other liabilities. Therefore, PPL's rights and the rights of its creditors, including rights of debt holders, to participate in the assets of any of its subsidiaries, in the event that such a subsidiary is liquidated or reorganized, will be subject to the prior claims of such subsidiary's creditors.

PPL may not realize the anticipated benefits of the RIE acquisition, which could materially adversely affect PPL's business, financial condition and results of operations.

PPL may not realize the anticipated financial and operational benefits from the RIE acquisition. PPL has incurred significant costs in connection with the integration, and additional unanticipated costs may arise. No assurance can be given that the anticipated long-term benefits from the acquisition will be achieved or, if achieved, the timing of their achievement. These risks and their consequences could result in increased costs or decreases in the amount of expected revenues associated with the

Rhode Island Regulated segment and could have a material adverse effect on PPL's business, financial condition and results of operations.

(*All Registrants*)

B. Risks Related to Regulated Utility Operations

Our regulated utility businesses face many of the same risks, in addition to those risks that are unique to each of the Kentucky Regulated, Pennsylvania Regulated and Rhode Island Regulated segments. Set forth below are risk factors common to the regulated segments, followed by sections identifying separately the risks specific to each of these segments.

Our profitability is highly dependent on our ability to recover the costs of providing energy and utility services to our customers and earn an adequate return on our capital investments. Regulators may not approve the rates we request and existing rates may be challenged.

The rates we charge our utility customers must be approved by one or more federal or state regulatory commissions, including the FERC, KPSC, VSCC, PAPUC and RIPUC. Although rate regulation is generally premised on the recovery of prudently incurred costs and a reasonable rate of return on invested capital, there can be no assurance that regulatory authorities will consider all of our costs to have been prudently incurred or that the regulatory process by which rates are determined will always result in rates that achieve full or timely recovery of our costs or an adequate return on our capital investments. Federal or state agencies, intervenors and other permitted parties may challenge our current or future rate requests, structures or mechanisms, and ultimately reduce, alter or limit the rates we receive. The requests for rate increases and the frequency of rate cases could face resistance from customers and other stakeholders, especially in a rising cost environment. Although our rates are generally regulated based on an analysis of our costs incurred in a base year or on future projected costs, the rates we are allowed to charge may or may not match our costs at any given time. Our regulated utility businesses are subject to substantial capital expenditure requirements over the next several years, which may require rate increase requests to the regulators in the future. If our costs are not adequately recovered through rates, it could have an adverse effect on our business, results of operations, cash flows and financial condition.

Our utility businesses are subject to significant and complex governmental regulation.

In addition to regulating the rates we charge, various federal and state regulatory authorities regulate many aspects of our utility operations, including:

- the terms and conditions of our service and operations;
- financial and capital structure matters, and issuance of securities;
- siting, construction and operation of facilities;
- mandatory reliability and safety standards under the Energy Policy Act of 2005 and other standards of conduct;
- accounting, depreciation and cost allocation methodologies;
- tax matters;
- affiliate transactions;
- acquisition, retirement and disposal of utility assets; and
- various other matters, including energy efficiency.

Such regulations or changes thereto may subject us to higher operating costs or increased capital expenditures and failure to comply could result in sanctions or possible penalties which may not be recoverable from customers.

Our regulated businesses undertake significant capital projects and these activities are subject to unforeseen costs, delays or failures, as well as risk of inadequate recovery of resulting costs.

The regulated utility businesses are capital intensive and require significant investments in energy generation (in the case of LG&E and KU) and transmission, distribution and other infrastructure projects, such as projects for environmental compliance and system reliability. The completion of these projects without delays or cost overruns is subject to risks in many areas, including:

- approval, licensing and permitting;
- land acquisition and the availability of suitable land;
- skilled labor or equipment shortages;
- construction problems or delays, including disputes with third-party intervenors;

- increases in commodity prices or labor rates;
- potential supply chain disruptions or delays; and
- contractor performance.

Failure to complete our capital projects on schedule or on budget, or at all, could adversely affect our financial performance, operations and future growth if such expenditures are not granted rate recovery by our regulators.

We are or may be subject to costs of remediation of environmental contamination at facilities that are currently owned by us or that are owned or operated by our former subsidiaries.

We may be subject to liability for the costs of environmental remediation of property now or formerly owned by us with respect to substances that we may have generated regardless of whether the liabilities arose before, during or after the time we owned or operated the facilities. We also have current or previous ownership interests in sites associated with the production of manufactured gas for which we may be liable for additional costs related to investigation, remediation and monitoring of these sites. Remediation activities associated with our former manufactured gas plant operations are one source of such costs. Citizen groups or others may bring litigation regarding environmental issues including claims of various types, such as property damage, personal injury and citizen challenges to compliance decisions on the enforcement of environmental requirements, which could subject us to penalties, injunctive relief and the cost of litigation. We cannot predict the amount and timing of future expenditures (including the potential or magnitude of fines or penalties) related to such environmental matters, although they could be material.

C. Risks Specific to Kentucky Regulated Segment

(*PPL, LG&E and KU*)

We are subject to financial, operational, regulatory and other risks related to requirements, developments and uncertainties in environmental regulation, including those affecting coal-fired generation facilities.

Extensive federal, state and local environmental laws and regulations are applicable to LG&E's and KU's generation supply, including its air emissions, water discharges (ELGs) and the management of hazardous and solid wastes (CCRs), among other business-related activities, and the costs of compliance or alleged non-compliance cannot be predicted and could be material. In addition, our costs may increase significantly if the requirements or scope of environmental laws, regulations or similar rules are expanded or changed as the environmental standards governing LG&E's and KU's businesses, particularly as applicable to coal-fired generation and related activities, continue to be subject to uncertainties due to rulemaking and other regulatory developments, legislative activities and litigation, administrative and permit challenges. In recent years, the federal government has undertaken various efforts aimed at addressing climate change, some of which remain subject to legal challenge, that may affect these costs. The Registrants are unable to predict changes in regulations, regulatory guidance, legal interpretations, policy positions, and implementation actions that may result from the change in Presidential administrations. Depending on the extent, frequency and timing of such changes, LG&E and KU may face higher risks of unsuccessful implementation of environmental-related business plans, noncompliance with applicable environmental rules, delayed or incomplete rate recovery or increased costs of implementation. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or forfeitures, operational changes, permit limitations or other restrictions. At some of our older generating facilities it may be uneconomic for us to install necessary pollution control equipment, which could cause us to retire those units. Our ability to retire plants we believe are uneconomic is expected to be subject to receipt of regulatory approvals. Market prices for energy and capacity also affect this cost-effectiveness analysis. Many of these environmental law considerations are also applicable to the operations of our key suppliers or customers, such as coal producers, power producers and industrial power users, and may impact the costs of their products and demand for our services.

(*PPL and LG&E*)

We are subject to regulatory and other risks regarding natural gas supply infrastructure.

The PHMSA enforces regulations that govern the design, construction, operation and maintenance of pipeline facilities. Failure to comply with these regulations could result in the assessment of fines or penalties against LG&E. These regulations require, among other things, that pipeline operators take certain measures with respect to pipeline integrity. Depending on the results of integrity tests and other integrity program activities, we could incur significant and unexpected costs to perform remedial activities on our natural gas infrastructure to ensure our continued safe and reliable operation. Recent pipeline incidents in the U.S. have also led to the introduction of proposed rules and possible federal legislative actions which could impose restrictions on LG&E's operations or require more stringent testing to ensure pipeline integrity. Implementation of these regulations could increase our costs to comply with pipeline integrity and safety regulations.

D. Risks Specific to Pennsylvania Regulated Segment

(*PPL and PPL Electric*)

We face competition for transmission projects, which could adversely affect our rate base growth.

FERC Order 1000, issued in July 2011, establishes certain procedural and substantive requirements relating to participation, cost allocation and non-incumbent developer aspects of regional and inter-regional electricity transmission planning activities. The PPL Electric transmission business, operating under a FERC-approved PJM Open Access Transmission Tariff, is subject to competition pursuant to FERC Order 1000 from entities that are not incumbent PJM transmission owners with respect to the construction and ownership of transmission facilities within PJM. Increased competition can result in lower rate base growth.

We could be subject to higher costs and/or penalties related to Pennsylvania Conservation and Energy Efficiency Programs.

PPL Electric is subject to Act 129, which contains requirements for energy efficiency and conservation programs and for the use of smart metering technology, imposes PLR electricity supply procurement rules, provides remedies for market misconduct, and made changes to the existing Alternative Energy Portfolio Standard. The law also requires electric utilities to meet specified goals for reduction in customer electricity usage and peak demand. Utilities not meeting these Act 129 requirements are subject to significant penalties that cannot be recovered in rates. Numerous factors outside of our control could prevent compliance with these requirements and result in penalties to us.

E. Risks Specific to the Rhode Island Regulated Segment

(*PPL*)

We are subject to regulatory and other risks regarding natural gas supply infrastructure in Rhode Island.

The PHMSA enforces regulations that govern the design, construction, operation and maintenance of pipeline facilities. Failure to comply with these regulations could result in the assessment of fines or penalties against RIE. These regulations require, among other things, that pipeline operators take certain measures with respect to pipeline integrity. Depending on the results of integrity tests and other integrity program activities, we could incur significant and unexpected costs to perform remedial activities on our natural gas infrastructure to ensure our continued safe and reliable operation.

F. Risks Related to All Segments

(*All Registrants*)

Pandemic health events and their impact on business and economic conditions could negatively affect our business.

A pandemic health event and related remediation efforts could present challenges to businesses, communities, workforces, markets and supply chains. At this time, the Registrants cannot predict the ways in which and the extent to which these or other pandemic-related factors may affect their business, earnings or other financial results.

Our business operations are continually subject to cyber-based security and data integrity risks from vulnerabilities related to our IT systems, operational technology infrastructure and supply chain relationships.

Numerous functions affecting the efficient operation of our businesses are dependent on the secure and reliable storage, processing and communication of electronic data and the use of sophisticated computer hardware and software systems and network infrastructure. The operation of our transmission and distribution systems, including gas distribution systems, as well as our generation plants, are all reliant on cyber-based, complex and integrated technologies. Systemic issues could arise as a result of upgrades to particular software or human error. In addition, these complex systems are subject to the risk that they could be the target of disruptive actions by terrorists, nation state actors or criminals or otherwise be compromised. Attacks may come through ransomware, software updates or patches, use of opensource software, firmware that hackers can manipulate to include malicious codes for exploitation at a later date, or the compromising of hardware by bad actors, creating serious risks to our security, the security of our customers' information, and potentially to our ability to provide power. Attacks could also target our personnel or contractors through attempts to gain access or credentials that could be used to breach our systems. As a result, operations could be interrupted, property could be damaged and sensitive customer information lost or stolen, causing us to incur significant losses of revenues, other substantial liabilities and damages, costs to replace or repair damaged equipment

and damage to our reputation. Threats to our systems and operations continue to emerge as new ways to compromise components of our systems or networks are developed. Additionally, cybersecurity risks also threaten our supply chains, including aspects that are not under our control, such as the incorporation of opensource software in systems or software that we use, that despite our efforts do not meet our current security standards.

In addition, under the Energy Policy Act of 2005, users, owners and operators of the bulk power transmission system, including PPL Electric, LG&E, KU and RIE, are subject to mandatory reliability standards promulgated by NERC and enforced by the FERC. As an operator of natural gas distribution systems, LG&E is also subject to mandatory reliability standards of the U.S. Department of Transportation and is also subject to certain security directives related to cybersecurity issued by the Department of Homeland Security (DHS) Transportation Security Administration (TSA) in 2021. The TSA has determined that LG&E is critical, while RIE has not been notified of this distinction and is therefore not currently subject to the security directives. Failure to comply with these standards could result in the imposition of fines or civil penalties, and potential exposure to third party claims for alleged violations of the standards.

Artificial intelligence (AI) is an emerging area of technology that has the potential to impact various aspects of our business operations and customer interactions.

AI technologies are still in their early stages of development and deployment. Ineffective or inadequate AI development or deployment practices by PPL, its subsidiaries or third-party vendors could result in unintended consequences. While we seek contractual protections with our third-party vendors regarding the use of AI technology, we may not have full awareness of, or control or visibility over, the quality, performance, security or compliance of the products and services that incorporate AI-related technology used by such vendors. AI algorithms that we or our third-party vendors use may be flawed or may be based on datasets that are biased or insufficient. These limitations or failures, or inaccurate results generated as a result of our employees', contractors' or vendors' use or misuse of AI technologies could lead to operational interruptions or otherwise adversely affect our business, reputation or financial results. Developing, testing, and deploying resource-intensive AI systems may require additional investment and increase our costs. In addition, the rapidly evolving nature of AI technologies may cause new laws and regulations to be enacted which could dramatically affect business practices, including the costs to comply with such new laws and regulations. We cannot predict the future development of AI technologies and the nature of any related new laws and regulations, and their costs and consequences.

Natural disasters or operational accidents may adversely affect the Registrants' operating results.

Natural disasters or operational accidents (such as wildfires, earthquakes, hurricanes or natural gas transmission pipeline explosions) could have direct or indirect impacts on the Registrants or key contractors or suppliers. Further, the generation of electricity and the transportation and storage of natural gas involve inherent operating risks that may result in accidents involving serious injury or loss of life, environmental damage or property damage. Such events could affect the Registrants through civil or criminal legal proceedings or changes to policies, laws and regulations the compliance costs of which may have a significant impact on the Registrants' results of operations, financial position and cash flows. Existing insurance policies may not cover all of the potential exposures in connection with such incidents. Any losses not covered by insurance, or any increases in the cost of applicable insurance as a result of such incidents, could have a material adverse effect on the results of operations, financial position and cash flows of the Registrants.

We are subject to risks associated with federal and state tax laws and regulations.

Changes in tax law as well as the inherent difficulty in quantifying potential tax effects of business decisions could negatively impact our results of operations and cash flows. We are required to make judgments in order to estimate our obligations to taxing authorities. These tax obligations include income, property, gross receipts, franchise, sales and use, employment-related and other taxes. We also estimate our ability to utilize deferred tax assets and tax credits. Dependent upon the revenue needs of the jurisdictions in which our businesses operate, various tax and fee increases may be proposed or considered. We cannot predict changes in tax law or regulation or the effect of any such changes on our businesses. Any such changes could increase tax expense and could have a significant negative impact on our results of operations and cash flows. We continue to evaluate the application of relevant laws, including the TCJA and the IRA in calculating income tax expense.

Increases in electricity prices and/or a weak economy can lead to changes in legislative and regulatory policy, including the promotion of energy efficiency, conservation and distributed generation or self-generation, which may adversely impact our business.

Energy consumption is significantly impacted by overall levels of economic activity and costs of energy supplies. Economic downturns or periods of high energy supply costs can lead to changes in or the development of legislative and regulatory policy designed to promote reductions in energy consumption and increased energy efficiency, alternative and renewable energy

sources, and distributed or self-generation by customers. This focus on conservation, energy efficiency and self-generation may result in a decline in electricity demand, which could adversely affect our business.

We could be negatively affected by rising interest rates, downgrades to our credit ratings, adverse credit market conditions or other negative developments in our ability to access capital markets.

Our businesses are capital-intensive and, in the ordinary course of business, we are reliant upon adequate long-term and short-term financing to fund our significant capital expenditures, debt service and operating needs. As a result, we are sensitive to developments in interest rates, credit rating considerations, insurance, security or collateral requirements, market liquidity and credit availability and refinancing opportunities necessary or advisable to respond to credit market changes. Changes in these conditions could result in increased costs and decreased availability of credit. In addition, certain sources of debt and equity capital have expressed reservations about investing in companies that rely on fossil fuels. If sources of our capital are reduced, capital costs could increase materially.

A downgrade in our credit ratings could negatively affect our ability to access capital and increase the cost of maintaining our credit facilities and any new debt.

Credit ratings assigned by Moody's and S&P to our businesses and their financial obligations have a significant impact on the cost of capital incurred by our businesses. A ratings downgrade could increase our short-term borrowing costs and negatively affect our ability to fund liquidity needs and access new long-term debt at acceptable interest rates. See "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations - Financial Condition - Liquidity and Capital Resources - Ratings Triggers" for additional information on the financial impact of a downgrade in our credit ratings.

Our operating revenues could fluctuate on a seasonal basis, especially as a result of extreme weather conditions, including storms, or from changes in average temperatures for extended periods, which may be caused or exacerbated by climate change.

Our businesses are subject to seasonal demand cycles. For example, in some markets demand for, and market prices of, electricity peak during hot summer months, while in other markets such peaks occur in cold winter months. As a result, our overall operating results may fluctuate substantially on a seasonal basis if weather conditions diverge adversely from seasonal norms. Extreme weather and other significant disruptive events could significantly affect our profitability or operations by causing outages, damaging infrastructure and requiring significant repair costs. Storm outages and damage often directly decrease revenues and increase expenses, due to reduced usage and restoration costs. The effects of climate change may cause, contribute to or magnify fluctuations in our operating results.

Our businesses are subject to physical, market and economic risks relating to potential effects of climate change.

Climate change may produce changes in weather or other environmental conditions, including temperature or precipitation levels, and thus may impact consumer demand for electricity. In addition, the potential physical effects of climate change, such as increased frequency and severity of storms, floods, and other climatic events, could disrupt our operations and cause us to incur significant costs to prepare for or respond to these effects. Climate change may also contribute to heightened risk or severity of wildfires, which could disrupt our operations and cause us to incur significant costs, though the annual FEMA National Risk Index for wildfires in the jurisdictions in which we provide service is very low to relatively moderate. These or other meteorological changes could lead to increased operating costs, capital expenses or power purchase costs. Greenhouse gas regulation such as the EPA's May 2024 rule governing emissions from certain fossil fuel-fired electric generating units could increase the cost of electricity, and such increases could have a depressive effect on regional economies. Reduced economic and consumer activity in our service areas -- both generally and specific to certain industries and consumers accustomed to previously lower cost power -- could reduce demand for the power we generate, market and deliver. Also, demand for our energy-related services could be similarly lowered by consumers' preferences or market factors favoring energy efficiency, low-carbon power sources or reduced electricity usage. The Registrants' responses to such climate-related risks include compliance with evolving governmental policy and developing and implementing strategies designed to meet net zero carbon emissions goals, which may affect our financial condition, results of operations or cash flows.

We cannot predict the outcome of legal proceedings or investigations related to our businesses in which we are periodically involved. An unfavorable outcome or determination in any of these matters could have a material adverse effect on our financial condition, results of operations or cash flows.

We are involved in legal proceedings, claims and litigation and periodically are subject to state and federal investigations arising out of our business operations, the most significant of which are summarized in Item 1. Business and "Regulatory Matters" in Note 7 to the Financial Statements and in "Legal Matters" and "Regulatory Issues" in Note 12 to the Financial

Statements. We cannot predict the ultimate outcome of these matters, nor can we reasonably estimate the costs or liabilities that could potentially result from a negative outcome in each case.

Significant increases in our operation and maintenance expenses, including health care and pension costs, could adversely affect our future earnings and liquidity.

We continually focus on limiting and reducing our operation and maintenance expenses. However, we expect to continue to face increased cost pressures in our operations. Increased costs of materials and labor may result from general inflation, increased regulatory requirements (especially in respect of environmental regulations), the need for higher-cost expertise in the workforce or other factors. In addition, pursuant to collective bargaining agreements, we are contractually committed to provide specified levels of health care and pension benefits to certain current employees and retirees. These benefits give rise to significant expenses. Due to general inflation with respect to such costs, the aging demographics of our workforce and other factors, we have experienced significant health care cost inflation in recent years, and we expect our health care costs, including prescription drug coverage, to continue to increase despite measures that we have taken and expect to take to require employees and retirees to bear a higher portion of the costs of their health care benefits. In addition, we expect to continue to incur significant costs with respect to the defined benefit pension plans for our employees and retirees. The measurement of our expected future health care and pension obligations, costs and liabilities is highly dependent on a variety of assumptions, most of which relate to factors beyond our control. These assumptions include investment returns, interest rates, health care cost trends, inflation rates, benefit improvements, salary increases and the demographics of plan participants. If our assumptions prove to be inaccurate, our future costs and cash contribution requirements to fund these benefits could increase significantly.

We may incur liabilities in connection with divestitures.

In connection with various divestitures, and certain other transactions, we have indemnified or guaranteed parties against certain liabilities. These indemnities and guarantees relate, among other things, to liabilities which may arise with respect to the period during which we or our subsidiaries operated a divested business, and to certain ongoing contractual relationships and entitlements with respect to which we or our subsidiaries made commitments in connection with a divestiture. See "Guarantees and Other Assurances" in Note 12 to the Financial Statements.

We are subject to liability risks relating to our generation, transmission and distribution operations.

The conduct of our physical and commercial operations subjects us to many risks, including risks of potential physical injury, property damage or other financial liability, caused to or by employees, customers, contractors, vendors, contractual or financial counterparties and other third parties.

Our facilities may not operate as planned, which may increase our expenses and decrease our revenues and have an adverse effect on our financial performance.

Operation of power plants, transmission and distribution facilities, information technology systems and other assets and activities subjects us to a variety of risks, including the breakdown or failure of equipment, accidents, security breaches, viruses or outages affecting information technology systems, labor disputes, obsolescence, delivery/transportation problems and disruptions of fuel supply and performance below expected levels. These events may impact our ability to conduct our businesses efficiently and lead to increased costs, expenses or losses. Operation of our delivery systems below our expectations may result in lost revenue and increased expense, including higher maintenance costs, which may not be recoverable from customers. Planned and unplanned outages at our power plants may require us to purchase power at then-current market prices to satisfy our commitments or, in the alternative, pay penalties and damages for failure to satisfy them.

Although we maintain insurance coverage for certain of these risks, we do not carry insurance for all of these risks and no assurance can be given that such insurance coverage will be sufficient to compensate us in the event losses occur.

We are required to obtain, and to comply with, government permits and approvals.

We are required to obtain, and to comply with, numerous permits, approvals, licenses and certificates from governmental agencies. The process of obtaining and renewing necessary permits can be lengthy and complex and sometimes result in the establishment of permit conditions that make the project or activity for which a permit was sought unprofitable or otherwise unattractive. In addition, such permits or approvals may be subject to denial, revocation or modification under certain circumstances. Failure to obtain or comply with the conditions of permits or approvals, or failure to comply with any applicable laws or regulations, may result in delay or temporary suspension of our operations and electricity sales or the curtailment of our power delivery and may subject us to penalties and other sanctions. Although various regulators routinely renew existing licenses, renewal could be denied or jeopardized by various factors, including failure to provide adequate financial assurance for closure; failure to comply with environmental, health and safety laws and regulations or permit conditions; local community, political or other opposition; and executive, legislative or regulatory action.

Our cost or inability to obtain and comply with the permits and approvals required for our operations could have a material adverse effect on our operations and cash flows. In addition, new environmental legislation or regulations, if enacted, or changed interpretations of existing laws may elicit claims that historical routine modification activities at our facilities violated applicable laws and regulations. In addition to the possible imposition of fines in such cases, we may be required to undertake significant capital investments in pollution control technology and obtain additional operating permits or approvals, which could have an adverse impact on our business, results of operations, cash flows and financial condition.

War, other armed conflicts or terrorist attacks could have a material adverse effect on our business.

War, terrorist attacks and unrest have caused and may continue to cause instability in the world's financial and commercial markets. In addition, unrest could lead to acts of terrorism in the United States or elsewhere, and acts of terrorism could be directed against companies such as ours. Armed conflicts and terrorism and their effects on us or our markets may significantly affect our business and results of operations in the future. In addition, we may incur increased costs for security, including additional physical plant security and security personnel or increased capability following a terrorist incident.

We are subject to counterparty performance, credit or other risk in the provision of goods or services to us, which could adversely affect our ability to operate our facilities or conduct business activities.

We purchase from a variety of suppliers energy, capacity, fuel, natural gas, transmission service and certain commodities used in the physical operation of our businesses, as well as goods or services, including information technology rights and services, used in the administration of our businesses. Delivery of these goods and services is dependent on the continuing operational performance and financial viability of our contractual counterparties and also the markets, infrastructure or third parties they use to provide such goods and services to us. As a result, we are subject to risks of disruptions, curtailments or increased costs in the operation of our businesses if such goods or services are unavailable or become subject to price spikes or if a counterparty fails to perform. Such disruptions could adversely affect our ability to operate our facilities or deliver services and collect revenues, which could result in lower sales and/or higher costs and thereby adversely affect our results of operations. The performance of coal markets and producers may be the subject of increased counterparty risk to LG&E and KU currently due to weaknesses in such markets and suppliers. The coal industry is subject to increasing competitive pressures from natural gas markets, political pressures and new or more stringent environmental regulation, including regulation of combustion byproducts and water inputs or discharges.

We are subject to the risk that our workforce and its knowledge base may become depleted in coming years.

Our businesses depend upon our ability to employ and retain key officers and other skilled professional and technical employees. We experience attrition due primarily to retiring employees, with the risk that critical knowledge will be lost and that it may be difficult to replace departed personnel, and to attract and retain new personnel, with appropriate skills and experience.

ITEM 1B. UNRESOLVED STAFF COMMENTS

PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

None.

ITEM 1C. CYBERSECURITY *(All Registrants)*

Processes for Identifying, Assessing and Managing Material Risks from Cybersecurity Threats

PPL's Chief Security Officer (CSO) is responsible for establishing, implementing and executing PPL's cyber-risk management strategy for PPL and the other Registrants and reports to PPL's Executive Vice President and Chief Technology and Innovation Officer. The CSO has over 25 years of experience leading technology and security organizations, has a degree in computer science, and holds professional certifications in information security, IT auditing, and privacy. He is also a member of nationally and internationally recognized industry and security organizations, including the Information Systems Audit and Control Association, International Association of Privacy Professionals, and the Domestic Security Alliance Council. The teams managed by the CSO are comprised of seasoned experts in cyber and IT security and possess appropriate experience to safeguard the company's data, networks and systems, mitigate cyber risks and help prevent and combat cyber threats.

The Registrants manage cybersecurity risks through monitoring, defense and response tools, including independent third-party assessments, internal audit assessments of the program's effectiveness, intelligence reports, cybersecurity threat trends, implementation of governance models, industry collaboration and employee training and awareness. The Registrants are actively engaged in cybersecurity related industry forums, public-private partnerships with law enforcement, cross-industry peer groups, and other efforts to help improve the protection of the U.S. electric grid.

The Registrants utilize monitoring tools, including but not limited to, cybersecurity incident and event management, penetration testing, intrusion detection and prevention, vulnerability assessments and anti-virus systems to detect anomalous or suspicious system or network activity. The Registrants may also become aware of a potential cybersecurity event or incident through employee reports, notification by a third-party service provider or business partner with potential impact to the Registrants or their systems, customers or notification by a government agency. The Registrants' subject matter specialists from across the enterprise provide input and expertise into risk governance processes, including cybersecurity, information technology, legal, compliance, operations, and enterprise risk management.

In developing their cybersecurity programs, the Registrants are guided by various frameworks including the NIST Cybersecurity Framework, a voluntary framework that consists of standards, guidelines and best practices for managing cybersecurity risk, that is widely used by critical infrastructure industries to help determine and address the highest priority cybersecurity risks. The Registrants conduct regular internal cybersecurity audits and vulnerability assessments and regularly engage with third-party cybersecurity experts for external assessments of their cybersecurity controls, including technical, physical and social aspects, to better comprehend the scope and magnitude of active threats to the industry and nation and their potential impact on our systems.

The CSO chairs the Corporate Security Council, which holds regular meetings consisting of senior executive management and reviews and oversees cybersecurity risks. PPL and the other Registrants also maintain a process to review the cyber risks that arise from the use of third-party service providers as well as programs and procedures to mitigate such risks internally and to assess the extent to which such providers effectively manage their own cyber risks.

PPL has established an Executive Crisis Team comprised of PPL's executive leadership, including the Chief Executive Officer, Chief Technology and Innovation Officer, Chief Financial Officer, Chief Human Resources Officer, Chief Legal Officer, Chief Operating Officer, VP – Public Affairs and Sustainability, VP – Corporate Communications, Chief Security Officer and additional officers as circumstances may warrant, to allow the company to respond quickly to a crisis, including a cyber event. This team governs and manages corporate crisis preparedness across the business lines, operations, and functions. Material or potentially material risks are escalated to the Executive Crisis Team and other appropriate leadership for review and action.

Also, the Registrants' workforce undertakes mandatory role-based annual training on identifying, reporting, and escalating cyber and physical security concerns to further assist in the identification of risks as well as the acceptable use of corporate electronic resources. Additionally, all employees and contractors are required to participate in the Registrants' ethical cyber phishing campaign program.

In addition to these enterprise-wide initiatives, PPL's Kentucky, Pennsylvania and Rhode Island operations are subject to extensive and rigorous mandatory cybersecurity requirements that are developed and enforced by NERC and approved by the FERC to protect grid security and reliability. LG&E is also subject to certain security directives related to cybersecurity issued by the Department of Homeland Security's Transportation Security Administration in 2021. See Note 12 to the Financial Statements for additional information on these directives.

The Registrants have been subject to attempted cybersecurity threats and will likely continue to be subject to such attempts in the future. While PPL has not determined any cybersecurity incidents have materially affected the Registrants, including their business strategy, results of operations or financial condition, there can be no guarantee that the Registrants will not be the subject of future attacks, threats or incidents, the consequences of which may be material.

See “Risks Related to All Segments – Our business operations are continually subject to cyber-based security and data integrity risks from vulnerabilities related to our IT systems, operational technology infrastructure and supply chain relationships” in “Item 1A. Risk Factors” for a discussion of cybersecurity risks affecting the Registrants.

Oversight of Cybersecurity Risks by the Board of Directors and Management

PPL’s Board of Directors oversees the Registrants’ management of cybersecurity risk through various processes identified below.

The Board has direct oversight of the Registrants’ cybersecurity programs through periodic reports from the CSO, at least twice a year, regarding cybersecurity matters and risks as well as the adequacy and effectiveness of our cybersecurity risk management program. Through these reports, the Board monitors the Registrants’ programs, processes and procedures related to cybersecurity. The Board has directed the CEO and CSO to promptly inform the Board in the event of a material or potentially material cybersecurity event. Each member of the Board has access to management, including the CEO and CSO, to ask questions and engage on the company’s approach to prevent, detect, assess, and mitigate cybersecurity risk. PPL’s Board has several Board members with experience in cybersecurity, including one with a certificate in Cyber-Risk Oversight from the National Association of Corporate Directors.

A primary function of the Audit Committee is to assist the Board in the oversight of the identification, assessment and management of risk. Cybersecurity risks are included in PPL’s enterprise risk management process and are reported to the Audit Committee of the Board on a quarterly basis or more frequently, as needed.

ITEM 2. PROPERTIES

Kentucky Regulated Segment *(PPL, LG&E and KU)*

LG&E's and KU's properties consist primarily of regulated generation facilities, electricity transmission and distribution assets and natural gas transmission and distribution assets in Kentucky. The capacity of generation units is based on a number of factors, including the operating experience and physical condition of the units, and may be revised periodically to reflect changed circumstances. The electricity generating capacity at December 31, 2024 was:

		LG&E		KU	
Primary Fuel/Plant	Total MW Capacity Summer	% Ownership or Other Interest	Ownership or Other Interest in MW	% Ownership or Other Interest	Ownership or Other Interest in MW
Coal					
Ghent - Units 1- 4	1,919			100.00	1,919
Mill Creek - Units 2- 4	1,165	100.00	1,165		
E.W. Brown - Unit 3	412			100.00	412
Trimble County - Unit 1 (a)	493	75.00	370		
Trimble County - Unit 2 (a)	732	14.25	104	60.75	445
	4,721		1,639		2,776
Natural Gas/Oil					
E.W. Brown Unit 5 (b)	130	53.00	69	47.00	61
E.W. Brown Units 6 - 7	292	38.00	111	62.00	181
E.W. Brown Units 8 - 11 (b)	484			100.00	484
Trimble County Units 5 - 6	318	29.00	92	71.00	226
Trimble County Units 7 - 10	636	37.00	235	63.00	401
Paddy's Run Unit 12	23	100.00	23		
Paddy's Run Unit 13	147	53.00	78	47.00	69
Haefling - Units 1 - 2	24			100.00	24
Cane Run Unit 7	691	22.00	152	78.00	539
	2,745		760		1,985
Hydro					
Ohio Falls - Units 1-8	64	100.00	64		
Dix Dam - Units 1-3	32			100.00	32
	96		64		32

Primary Fuel/Plant	Total MW Capacity Summer	LG&E % Ownership or Other Interest	LG&E Ownership or Other Interest in MW	KU % Ownership or Other Interest	KU Ownership or Other Interest in MW
Solar					
E.W. Brown Solar (c)	8	39.00	3	61.00	5
Total	7,570		2,466		4,798

(a) Trimble County Unit 1 and Trimble County Unit 2 are jointly owned with Illinois Municipal Electric Agency and Indiana Municipal Power Agency. Each owner is entitled to its proportionate share of the units' total output and funds its proportionate share of capital, fuel and other operating costs. See Note 11 to the Financial Statements for additional information.
(b) There is an inlet air cooling system attributable to these units. This inlet air cooling system is not jointly owned; however, it is used to increase production on the units to which it relates, resulting in an additional 12 MW of capacity for LG&E and an additional 86 MW of capacity for KU.
(c) This unit is a 10 MW facility and achieves such production. The 8 MW solar facility summer capacity rating is reflective of an average expected output across the peak hours during the summer period based on average weather conditions at the solar facility.

For a description of LG&E's and KU's service areas, see "Item 1. Business - General - Segment Information - Kentucky Regulated Segment." At December 31, 2024, LG&E's and KU's electricity transmission and distribution systems and LG&E's natural gas transmission and distribution systems were:

	LG&E		KU	
	Distribution	Transmission	Distribution	Transmission
Electricity System				
Substations (a)	97	79	461	215
Capacity (in millions of kVA)	6	8	8	16
Overhead lines (circuit miles)	3,887	663	14,093	4,064
Underground lines (circuit miles)	2,876	6	2,840	4
Natural Gas System				
Distribution mains (miles)	4,463	—	—	—
Transmission pipeline (miles)	—	229	—	—
Transmission storage lines (miles)	—	83	—	—
Combustion turbine lines (miles)	—	19	—	11
Storage fields	—	4	—	—
Storage field capacity (Bcf)	—	11	—	—

(a) 195 substations (62 at LG&E and 133 at KU) are shared between the distribution and transmission systems.

Substantially all of LG&E's and KU's respective real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and, in the case of LG&E, the storage and distribution of natural gas, is subject to the lien of either the LG&E 2010 Mortgage Indenture or the KU 2010 Mortgage Indenture. See Note 8 to the Financial Statements for additional information.

LG&E and KU continuously reexamine development projects based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them or pursue other options. See Item 1. Business for a discussion related to LG&E's and KU's Solar Share program and 2022 CPCN filing.

Pennsylvania Regulated Segment *(PPL and PPL Electric)*

For a description of PPL Electric's service area, see "Item 1. Business - General - Segment Information - Pennsylvania Regulated Segment." PPL Electric has electric transmission and distribution lines in public streets and highways pursuant to franchises and rights-of-way secured from property owners. At December 31, 2024, PPL Electric's transmission system includes 52 substations with a total capacity of 32 million kVA and 5,286 circuit miles in service. PPL Electric's distribution system includes 355 substations with a total capacity of 15 million kVA, 36,628 circuit miles of overhead lines and 9,006 underground circuit miles. All of PPL Electric's facilities are located in Pennsylvania. Substantially all of PPL Electric's distribution properties and certain transmission properties are subject to the lien of the PPL Electric 2001 Mortgage Indenture. See Note 8 to the Financial Statements for additional information.

Rhode Island Regulated Segment *(PPL)*

For a description of RIE's service area, see "Item 1. Business - General - Segment Information - Rhode Island Regulated Segment." At December 31, 2024, RIE's electric transmission system includes 44 substations with capacity of 33 kVA or higher, 361 circuit miles of overhead lines and 49 underground circuit miles. RIE's electric distribution system includes 59 substations, 6,500 circuit miles of overhead lines and 1,229 underground circuit miles. RIE also has distribution mains for its natural gas system with mileage of 3,223 miles. All of RIE's facilities are located in Rhode Island.

ITEM 3. LEGAL PROCEEDINGS

See Notes 6, 7, 9 and 12 to the Financial Statements for information regarding legal, tax and regulatory matters and proceedings.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

See "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations - Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash" for information regarding certain restrictions on the ability to pay dividends for all Registrants.

PPL Corporation

Additional information for this item is set forth in the sections entitled "Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters" and "Shareowner and Investor Information" of this report. At January 31, 2025 there were 42,122 common stock shareowners of record.

There were no purchases by PPL of its common stock during the fourth quarter of 2024.

PPL Electric Utilities Corporation

There is no established public trading market for PPL Electric's common stock, as PPL owns 100% of the outstanding common shares. Dividends paid to PPL on those common shares are determined by PPL Electric's Board of Directors. PPL Electric paid common stock dividends to PPL of $375 million in 2024 and $323 million in 2023.

Louisville Gas and Electric Company

There is no established public trading market for LG&E's common stock, as LKE owns 100% of the outstanding common shares. Dividends paid to LKE on those common shares are determined by LG&E's Board of Directors. LG&E paid common stock dividends to LKE of $187 million in 2024 and $166 million in 2023.

Kentucky Utilities Company

There is no established public trading market for KU's common stock, as LKE owns 100% of the outstanding common shares. Dividends paid to LKE on those common shares are determined by KU's Board of Directors. KU paid common stock dividends to LKE of $232 million in 2024 and $190 million in 2023.

ITEM 6. SELECTED FINANCIAL AND OPERATING DATA

PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

[Reserved]

Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations

(All Registrants)

This "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" is separately filed by PPL, PPL Electric, LG&E and KU. Information contained herein relating to any individual Registrant is filed by such Registrant solely on its own behalf, and no Registrant makes any representation as to information relating to any other Registrant. The specific Registrant to which disclosures are applicable is identified in parenthetical headings in italics above the applicable disclosure or within the applicable disclosure for each Registrant's related activities and disclosures. Within combined disclosures, amounts are disclosed for individual Registrants when significant.

The following should be read in conjunction with the Registrants' Consolidated Financial Statements and the accompanying Notes. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, except per share data, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of each Registrant's business strategy and a discussion of important financial and operational developments.
- "Results of Operations" for all Registrants includes a "Statement of Income Analysis," which discusses significant changes in principal line items on the Statements of Income, comparing 2024 with 2023. For PPL, "Results of Operations" also includes "Segment Earnings," which provides a detailed analysis of earnings by reportable segment. These discussions include the non-GAAP financial measure "Earnings from Ongoing Operations" and provide an explanation of the non-GAAP financial measure and a reconciliation of the measure to the most comparable GAAP measure.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of the Registrants' liquidity positions and credit profiles. This section also includes a discussion of forecasted sources and uses of cash and rating agency actions.
- "Financial Condition - Risk Management" provides an explanation of the Registrants' risk management programs relating to market and credit risk.
- "Application of Critical Accounting Policies" provides an overview of the accounting policies that are particularly important to the results of operations and financial condition of the Registrants and that require their management to make significant estimates, assumptions and other judgments of inherently uncertain matters.

For comparison of the Registrants' results of operations and cash flows for the years ended December 31, 2023 to December 31, 2022, refer to "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" in the 2023 Form 10-K, filed with the SEC on February 16, 2024.

Overview

For a description of the Registrants and their businesses, see "Item 1. Business."

Business Strategy *(All Registrants)*

PPL operates four regulated utilities located in Pennsylvania, Kentucky and Rhode Island. Each of these jurisdictions has distinct regulatory structures and each of the utilities has distinct customer classes.

PPL's strategy, which is supported by the other Registrants and subsidiaries, is focused on creating the utilities of the future to drive greater value for our customers and shareowners. Key objectives in support of this strategy include:

- Strengthening the reliability and resilience of our electric and gas networks to improve service and protect against current and future weather and storms.
- Advancing a cleaner energy future affordably and reliably. This includes expanding and modernizing our generation with natural gas, renewables and battery storage, while supporting research and development of low-carbon solutions.
- Driving operational efficiencies to improve customer service and help keep energy affordable.

- Utilizing artificial intelligence and other advanced technologies to inform decision making, optimize asset planning and maintenance and better manage supply and demand on the grid.
- Empowering customers through expanded digital options and improved service.
- Engaging with key stakeholders to strengthen resource adequacy, power economic development, and support the growth and success of the regions we serve.

This strategy supports our mission to provide safe, affordable, reliable and sustainable energy to our customers and competitive, long-term returns to shareowners.

Financial and Operational Developments

(PPL)

RIE Transition Services Agreement Completion

In connection with the acquisition of RIE in 2022, National Grid USA Service Company, Inc., National Grid U.S. and Narragansett Electric entered into a transition services agreement (TSA), pursuant to which the National Grid entities agreed to provide certain transition services to Narragansett Electric to facilitate the transition of the operation of Narragansett Electric to PPL following the acquisition. The TSA was for an initial two-year term and was completed in the third quarter of 2024. TSA costs of $137 million, $228 million, and $123 million were incurred for the years ended December 31, 2024, 2023, and 2022.

Transfer of Certain Credits under the Inflation Reduction Act

The IRS released the final Internal Revenue Code Section 6418 regulations related to the transfer of certain credits under the Inflation Reduction Act. The regulations became effective on July 1, 2024 and did not and are not expected to have a material impact on the financial statements regarding prior or future credit transfers.

Regulatory Requirements

(All Registrants)

The Registrants cannot predict the impact that future regulatory requirements may have on their financial condition or results of operations.

(PPL, LG&E and KU)

Environmental Considerations for Coal-Fired Generation

The businesses of LG&E and KU are subject to extensive federal, state and local environmental laws, rules and regulations, including those pertaining to CCRs, GHG, and ELGs. See Notes 7, 12 and 18 to the Financial Statements for a discussion of these significant environmental matters. These and other environmental requirements led PPL, LG&E and KU to retire approximately 1,500 MW of coal-fired generating plants in Kentucky since 2010. As part of the long-term generation planning process, LG&E and KU evaluate a range of factors including the impact of potential stricter environmental regulations, fuel price scenarios, the cost of replacement generation, continued operations and major maintenance costs and the risk of major equipment failures in determining when to retire generation assets.

As a result of environmental requirements and aging infrastructure, LG&E has sought and obtained approval to retire two older coal-fired units at the Mill Creek Plant. Mill Creek Unit 1, with 300 MW of capacity, was retired in 2024. Mill Creek Unit 2, with 297 MW of capacity, is expected to be retired in 2027, subject to certain conditions.

On October 4, 2024, LG&E submitted an application related to the retirement of Mill Creek Unit 1, which occurred on December 31, 2024, requesting recovery of associated costs under the RAR rider. On October 28, 2024, the KPSC issued an order to establish a procedural schedule regarding its investigation of the reasonableness of the proposed tariff. The KPSC intends to rule on the matter by February 28, 2025. See Note 7 to the Financial Statements for additional information on the Mill Creek Unit 1 RAR rider application.

FERC Transmission Rate Filing

In 2018, LG&E and KU applied to the FERC requesting elimination of certain on-going waivers and credits to a sub-set of transmission customers relating to the 1998 merger of LG&E's and KU's parent entities and the 2006 withdrawal of LG&E and KU from the Midcontinent Independent System Operator, Inc. (MISO), a regional transmission operator and energy market. The application sought termination of LG&E's and KU's commitment to provide certain Kentucky municipalities mitigation for certain horizontal market power concerns arising out of the 1998 LG&E and KU merger and 2006 MISO withdrawal. The amounts at issue are generally waivers or credits granted to a limited number of Kentucky municipalities for either certain LG&E and KU or MISO transmission charges incurred for transmission service received. In 2019, the FERC granted LG&E's and KU's request to remove the ongoing credits, conditioned upon the implementation by LG&E and KU of a transition mechanism for certain existing power supply arrangements, which was subsequently filed, modified, and approved by the FERC in 2020 and 2021. In 2020, LG&E and KU and other parties filed appeals with the U.S. Court of Appeals - D.C. Circuit (D.C. Circuit Court of Appeals) regarding the FERC's orders on the elimination of the mitigation and required transition mechanism. In August 2022, the D.C. Circuit Court of Appeals issued an order remanding the proceedings back to the FERC. On May 18, 2023, the FERC issued an order on remand reversing its 2019 decision and requiring LG&E and KU to refund credits previously withheld, including under such transition mechanism. LG&E and KU filed a petition for review of the FERC's May 18, 2023 order with the D.C. Circuit Court of Appeals and provided refunds in accordance with the FERC order on December 1, 2023. The FERC issued an order on LG&E's and KU's compliance filing on November 16, 2023, and LG&E and KU filed a petition for review of this November 16, 2023 order on February 14, 2024. The FERC issued the substantive order on rehearing on March 21, 2024, reaffirming its prior decision. Oral argument before the D.C. Circuit Court of Appeals occurred on January 21, 2025. LG&E and KU cannot predict the ultimate outcome of the proceedings or any other post decision process but do not expect the annual impact to have a material effect on their operations or financial condition. LG&E and KU currently receive recovery of certain waivers and credits primarily through base rates increases, provided, however, that increases associated with the FERC's May 18, 2023 order are expected to be subject to future rate proceedings.

(PPL)

FY 2026 Gas ISR Plan

On December 31, 2024, RIE filed its FY 2026 Gas ISR Plan with the RIPUC with a budget that includes $187 million of capital investment spend and up to $15 million of additional contingency plan spend in connection with the PHMSA's potential enactment of regulations during FY 2026 that, if enacted, would significantly alter RIE's leak detection and repair obligations under federal regulations. The Plan also includes proposed spending on curb-to-curb paving of $22 million. A decision from the RIPUC on the Plan is expected by March 31, 2025. RIE cannot predict the outcome of this matter.

FY 2026 Electric ISR Plan

On December 23, 2024, RIE filed its FY 2026 Electric ISR Plan with the RIPUC with a budget that includes $160 million of capital investment spend, $14 million of vegetation operation and maintenance (O&M) expense spend and $1 million of Other O&M spend. In addition, the FY 2026 Electric ISR Plan includes $88 million of capital investment spend for Advanced Metering Functionality (AMF) which, together with the $160 million of capital investment spend, results in total capital investment spend of $248 million. A decision from the RIPUC is expected by March 31, 2025. RIE cannot predict the outcome of this matter.

Advanced Metering Functionality (AMF)

In 2021, RIE filed its Updated AMF Business Case and Grid Modernization Plan (GMP) with the RIPUC in accordance with the Amended Settlement Agreement (ASA) approved by the RIPUC in August 2018, and which among other things, sought approval to deploy smart meters throughout the service territory. After PPL completed the acquisition of RIE, RIE filed a new AMF Business Case with the RIPUC in 2022, consisting of a detailed proposal for full-scale deployment of AMF across its electric service territory.

On September 27, 2023, the RIPUC unanimously approved RIE to deploy an AMF-based metering system for the electric distribution business. RIE is authorized to seek recovery of the approved capital investment through the ISR process with an overall multi-year cap on recovery at approximately $153 million, subject to certain terms, conditions and limitations with respect to the potential offsets and recoverability of certain costs. RIE is required to continue spending even if above the recovery cap, until it achieves the functionalities outlined in the AMF Business Case. RIE filed with the RIPUC for approval of (i) an updated electric Service Quality Plan on December 27, 2023, (ii) additional compliance tariff provisions regarding recovery and updated cost schedules to reflect the RIPUC's decision on December 22, 2023, and (iii) electric and gas tariff advice filings for RIPUC Automatic Meter Reading/AMF meter opt-out tariff provision on September 19, 2024. The RIPUC

approved RIE's revised service quality metrics with certain modifications on August 1, 2024 and October 30, 2024. In addition, the RIPUC approved RIE's AMR/AMF opt-out tariff provisions for electric and natural gas with modifications on December 19, 2024 for effect January 1, 2025, and approved the proposed updated fees to be assessed at the start of the AMF roll-out. On January 7, 2025, RIE filed compliance tariffs to reflect the RIPUC's ruling, which they approved at their January 23, 2025 Open Meeting.

Rate Case Proceedings (KU)

On April 30, 2024, KU filed a request with the VSCC for an annual increase in Virginia base electricity rates of approximately $9 million. KU's request is based on an authorized 10.5% return on equity. Subject to regulatory review and approval, new rates would become effective February 1, 2025. On November 6, 2024, KU and VSCC Staff filed a stipulation to resolve the proceeding, with a proposed annual rate increase amount of $8 million and annual authorized returns on equity in a range from 9.5% to 10.5% for various tariff purposes, with no objection from the Office of the Attorney General. A public hearing on the matter was held on November 13, 2024. On December 10, 2024, the Hearing Examiner issued an alternative recommendation to approve the stipulation with a nonmaterial adjustment to the revenue requirement. All parties filed letters in support of the Hearing Examiner's alternative recommendation. On January 28, 2025, the VSCC issued an order approving the stipulation, including the adjustment recommended by the Hearing Examiner, and the resulting new rates went into effect on February 1, 2025.

DSIC Petition (PPL and PPL Electric)

On April 26, 2024, PPL Electric filed a Petition with the PAPUC requesting that the PAPUC waive PPL Electric's DSIC cap of 5% of billed revenues and increase the maximum allowable DSIC to 9% for bills rendered on or after January 1, 2025. On November 21, 2024, the Administrative Law Judge in the proceeding issued a Recommended Decision recommending the denial of PPL Electric's DSIC Cap Waiver Petition. PPL Electric filed exceptions to the Recommended Decision on December 11, 2024. Several of the other parties filed Reply Exceptions on December 23, 2024. The Administrative Law Judge's Recommended Decision and the Exceptions and Reply Exceptions are currently before the PAPUC for a final order. PPL Electric cannot predict the timing or outcome of that decision.

Long-Term Infrastructure Improvement Plan Petition (LTIIP) (PPL and PPL Electric)

On January 17, 2024, PPL Electric filed a petition with the PAPUC seeking to modify its LTIIP, which covers the period from 2023 through 2027, to increase the total projected capital spending for existing LTIIP programs and to add a new LTIIP program related to predictive failure technology. On July 11, 2024, the PAPUC approved the petition in part, allowing for an increase of $203 million for existing LTIIP programs. The proposed new LTIIP program was determined not to be eligible for recovery under the DSIC. However, investments in such programs are potentially recoverable through a base rate proceeding.

Artificial Intelligence (AI) Governance (All Registrants)

To leverage potential benefits of AI, PPL management has established an AI Governance committee, with oversight from the Chief Technology and Innovation Officer and the Chief Legal Officer, which assesses benefits and risks associated with AI. The governance committee is a cross-functional team with leadership representation from Technology, Security, Audit, Legal, Operations, Human Resources and Data and AI. The governance committee reviews potential AI solutions using an intake process which involves risk and benefit assessment, data security and privacy considerations, and ensures that all solutions are compliant with PPL technology and security standards.

Results of Operations

(PPL)

The "Statement of Income Analysis" discussion below describes significant changes in principal line items on the Statements of Income, comparing 2024 with 2023. The "Segment Earnings" discussions provide a review of results by reportable segment. These discussions include the non-GAAP financial measure "Earnings from Ongoing Operations" and provide an explanation of the non-GAAP financial measure and a reconciliation of the measure to the most comparable GAAP measure.

(PPL Electric, LG&E and KU)

A "Statement of Income Analysis" is presented separately for PPL Electric, LG&E and KU. The "Statement of Income Analysis" discussion below describes significant changes in principal line items on the Statements of Income, comparing 2024

with 2023. The results of operations section for PPL Electric, LG&E and KU is presented in a reduced disclosure format in accordance with General Instructions (I)(2)(a) of Form 10-K.

PPL: Statement of Income Analysis and Segment Earnings

Statement of Income Analysis

Net income for the years ended December 31 includes the following results:

	2024	2023	Change 2024 vs. 2023
Operating Revenues	$ 8,462	$ 8,312	$ 150
Operating Expenses			
Operation			
Fuel	783	733	50
Energy purchases	1,679	1,841	(162)
Other operation and maintenance	2,607	2,462	145
Depreciation	1,279	1,254	25
Taxes, other than income	374	392	(18)
Total Operating Expenses	6,722	6,682	40
Operating Income	1,740	1,630	110
Other Income (Expense) - net	114	(40)	154
Interest Expense	738	666	72
Income Before Income Taxes	1,116	924	192
Income Taxes	228	184	44
Net Income (Loss)	$ 888	$ 740	$ 148

Operating Revenues

The increase (decrease) in operating revenues was due to:

	2024 vs. 2023
PPL Electric distribution price (a)	$ 69
PPL Electric distribution volume (b)	39
PPL Electric PLR (c)	(291)
PPL Electric transmission formula rate (d)	48
LG&E volumes (b)	35
LG&E ECR mechanism (e)	(18)
KU volumes (b)	39
KU fuel and other energy purchases (f)	20
RIE energy purchases and other recoveries (g)	(24)
RIE net metering presentation (h)	175
RIE capital investment	29
Other	29
Total	$ 150

(a) The increase was primarily due to reconcilable cost recovery mechanisms approved by the PAPUC.
(b) The increases were primarily due to weather, along with other higher usage in 2024 at PPL Electric.
(c) The decrease was primarily the result of lower energy prices and fewer PLR customers, partially offset by higher customer volumes due to weather and other higher usage.
(d) The increase was primarily due to returns on additional transmission capital investments, returns of depreciation and operation and maintenance expenses and delayed implementation of moving to a calendar year rate in 2023, partially offset by the prior year point to point border rate settlement variance.
(e) The decrease was primarily due to lower ECR expenses.
(f) The increase was primarily due to higher recoveries of fuel expenses.
(g) The decrease was primarily due to lower recoveries of commodity costs and pension expenses, partially offset by higher recoveries of gas related maintenance expenses.
(h) In conjunction with the completion of the transition services agreement associated with the RIE acquisition, PPL conformed the presentation of RIE's net metering charges with the presentation of the other operating companies, resulting in an increase in Operating Revenues and a corresponding increase in Energy purchases. See Note 3 to the Financial Statements for additional information.

Fuel

Fuel expense increased $50 million in 2024 compared with 2023, primarily due to an increase of $22 million at LG&E primarily due to an increase in commodity costs and an increase in volumes due to weather of $37 million at KU, partially offset by a decrease in commodity costs of $8 million at KU.

Energy Purchases

The increase (decrease) in energy purchases was due to:

	2024 vs. 2023
PPL Electric PLR volumes	$ (13)
PPL Electric PLR prices	(259)
LG&E commodity costs	(17)
RIE commodity costs	(51)
RIE net metering presentation (a)	175
Other	3
Total	$ (162)

(a) In conjunction with the completion of the transition services agreement associated with the RIE acquisition, PPL conformed the presentation of RIE's net metering charges with the presentation of the other operating companies, resulting in an increase in Operating Revenues and a corresponding increase in Energy purchases. See Note 3 to the Financial Statements for additional information.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance was due to:

	2024 vs. 2023
PPL Electric storm expenses	$ 52
PPL Electric vegetation management expenses	20
PPL Electric Act 129	19
PPL Electric DER projects impairment (a)	21
LG&E ECR expenses	(17)
RIE gas maintenance expenses	46
RIE pension expenses	(24)
RIE bad debt expenses	18
Transition costs associated with RIE	45
Other	(35)
Total	$ 145

(a) Impairment of DER project costs associated with a pilot solar program for which PPL will not seek regulatory recovery.

Other Income (Expense) - net

The increase (decrease) in other income (expense) - net was due to:

	2024 vs. 2023
AFUDC - equity component	$ 17
Talen litigation (a)	122
Other	15
Total	$ 154

(a) PPL incurred legal expenses in 2023 related to litigation associated with its former affiliate, Talen Montana, LLC, and certain affiliated entities (collectively, Talen), which was settled in December 2023.

Interest Expense

The increase (decrease) in interest expense was due to:

	2024 vs. 2023
Long-term debt (a)	$ 78
Other	(6)
Total	$ 72

(a) The increase was primarily due to increased borrowings. See Note 8 to the Financial Statements for additional information.

Income Taxes

The increase (decrease) in income taxes was due to:

	2024 vs. 2023
Change in pre-tax income	$ 48
Valuation allowance adjustments	(10)
Income tax credits (a)	14
Utility rate-making tax adjustments (b)	(11)
Other	3
Total	$ 44

(a) In addition to credits internally generated, in 2023, PPL purchased approximately $300 million of renewable tax credits, as allowed by the IRA. PPL recorded a current tax benefit and a deferred tax expense for the utilization of approximately $250 million of the credits in 2023 and prior years, per the three-year carry-back rule.
(b) Primarily consists of tax impacts of AFUDC equity and related depreciation across PPL utilities and flow through tax impacts. Flow through occurs when the regulator excludes deferred tax expense or benefit from recoverable costs when determining income tax expense.

See Note 6 to the Financial Statements for additional information on income taxes.

Segment Earnings

PPL's Net Income (Loss) by reportable segments was as follows:

	2024	2023	Change 2024 vs. 2023
Kentucky Regulated	$ 620	$ 552	$ 68
Pennsylvania Regulated	574	519	55
Rhode Island Regulated	109	96	13
Corporate and Other (a)	(415)	(427)	12
Net Income (Loss)	$ 888	$ 740	$ 148

(a) Primarily represents financing and certain other costs incurred at the corporate level that have not been allocated or assigned to the segments, which are presented to reconcile segment information to PPL's consolidated results.

Earnings from Ongoing Operations

Management utilizes "Earnings from Ongoing Operations" as a non-GAAP financial measure that should not be considered as an alternative to net income, an indicator of operating performance determined in accordance with GAAP. PPL believes that Earnings from Ongoing Operations is useful and meaningful to investors because it provides management's view of PPL's earnings performance as another criterion in making investment decisions. In addition, PPL's management uses Earnings from Ongoing Operations in measuring achievement of certain corporate performance goals, including targets for certain executive incentive compensation. Other companies may use different measures to present financial performance.

Earnings from Ongoing Operations is adjusted for the impact of special items. Special items are presented in the financial tables on an after-tax basis with the related income taxes on special items separately disclosed. Income taxes on special items, when applicable, are calculated based on the statutory tax rate of the entity where the activity is recorded. Special items may include items such as:

- Gains and losses on sales of assets not in the ordinary course of business.

- Impairment charges.
- Significant workforce reduction and other restructuring effects.
- Acquisition and divestiture-related adjustments.
- Significant losses on early extinguishment of debt.
- Other charges or credits that are, in management's view, non-recurring or otherwise not reflective of the company's ongoing operations.

PPL's Earnings from Ongoing Operations by reportable segment were as follows:

	2024	2023	Change 2024 vs. 2023
Kentucky Regulated	$ 624	$ 564	$ 60
Pennsylvania Regulated	607	548	59
Rhode Island Regulated	155	152	3
Corporate and Other	(136)	(81)	(55)
Earnings from Ongoing Operations	$ 1,250	$ 1,183	$ 67

See "Reconciliation of Earnings from Ongoing Operations" below for a reconciliation of this non-GAAP financial measure to Net Income.

Kentucky Regulated Segment

The Kentucky Regulated segment consists primarily of LG&E's and KU's regulated electricity generation, transmission and distribution operations, as well as LG&E's regulated distribution and sale of natural gas.

Net Income and Earnings from Ongoing Operations include the following results:

	2024	2023	Change 2024 vs. 2023
Operating Revenues	$ 3,562	$ 3,452	$ 110
Fuel	783	733	50
Energy purchases	176	192	(16)
Other operation and maintenance	803	826	(23)
Depreciation	710	696	14
Taxes, other than income	99	93	6
Total Operating Expenses	2,571	2,540	31
Other Income (Expense) - net	29	12	17
Interest Expense	240	235	5
Income Taxes	160	137	23
Net Income	620	552	68
Less: Special Items	(4)	(12)	8
Earnings from Ongoing Operations	$ 624	$ 564	$ 60

The following after-tax gains (losses), which management considers special items, impacted the Kentucky Regulated segment's results and are excluded from Earnings from Ongoing Operations:

	Income Statement Line Item	2024	2023
Strategic corporate initiatives, net of tax of $0, $0 (a)	Other operation and maintenance	$ (1)	$ (1)
FERC transmission credit refund, net of tax of $2 (b)	Other operation and maintenance	—	(6)
FERC transmission credit refund, net of tax of $0 (b)	Operating Revenues	1	—
Unbilled revenue estimate adjustment, net of tax of $2 (c)	Operating Revenues	—	(5)
ECR beneficial reuse transition adjustment, net of tax of $2 (d)	Operating Revenues	(4)	—
Total		$ (4)	$ (12)

(a) Costs incurred related to PPL's corporate centralization efforts.
(b) Prior period impact related to a FERC refund order.
(c) Prior period impact of a methodology change in determining unbilled revenues.
(d) Prior period impact for an ECR mechanism revenue adjustment related to a KPSC order.

The changes in the components of the Kentucky Regulated segment's results between these periods were due to the factors set forth below, which exclude the items that management considers special.

	2024 vs. 2023
Operating Revenues	$ 107
Fuel	(50)
Energy purchases	16
Other operation and maintenance	16
Depreciation	(14)
Taxes, other than income	(6)
Other Income (Expense) - net	17
Interest Expense	(5)
Income Taxes	(21)
Earnings from Ongoing Operations	60
Special Items, after-tax	8
Net Income	$ 68

- Higher operating revenues in 2024 compared to 2023, primarily due to a $74 million increase in sales volumes due to weather and a $29 million increase in recoveries of fuel and energy purchases.

- Higher fuel expense in 2024 compared to 2023, primarily due to a $34 million increase in volumes primarily due to weather and a $16 million increase in commodity costs.

Pennsylvania Regulated Segment

The Pennsylvania Regulated segment includes the regulated electricity transmission and distribution operations of PPL Electric.

Net Income and Earnings from Ongoing Operations include the following results:

	2024	2023	Change 2024 vs. 2023
Operating Revenues	$ 2,876	$ 3,008	$ (132)
Energy purchases	721	992	(271)
Other operation and maintenance	705	605	100
Depreciation	401	397	4
Taxes, other than income	131	143	(12)
Total Operating Expenses	1,958	2,137	(179)
Other Income (Expense) - net	45	39	6
Interest Income from Affiliate	33	—	33
Interest Expense	246	223	23
Income Taxes	176	168	8
Net Income	574	519	55
Less: Special Items	(33)	(29)	(4)
Earnings from Ongoing Operations	$ 607	$ 548	$ 59

The following after-tax gains (losses), which management considers special items, impacted the Pennsylvania Regulated segment's results and are excluded from Earnings from Ongoing Operations:

	Income Statement Line Item	2024	2023
PPL Electric billing issue, net of tax of $5, $10 (a)	Other operation and maintenance	$ (13)	$ (23)
PPL Electric billing issue, net of tax of $0 (a)	Other Income (Expense) - net	—	(1)
Strategic corporate initiatives, net of tax of $2, $1 (b)	Other operation and maintenance	(5)	(2)
Other non-recurring charges, net of tax of $1 (c)	Other operation and maintenance	—	(3)
DER projects impairment, net of tax of $6 (d)	Other operation and maintenance	(15)	—
Total		$ (33)	$ (29)

(a) Certain expenses related to billing issues. See Note 7 to the Financial Statements for additional information.

(b) Costs incurred related to PPL's corporate centralization efforts.
(c) Certain expenses associated with a litigation settlement.
(d) Impairment of DER project costs associated with a pilot solar program for which PPL will not seek regulatory recovery.

The changes in the components of the Pennsylvania Regulated segment's results between these periods are due to the factors set forth below, which exclude the items that management considers special.

	2024 vs. 2023
Operating Revenues	$ (132)
Energy purchases	271
Other operation and maintenance	(96)
Depreciation	(4)
Taxes, other than income	12
Other Income (Expense) - net	5
Interest Income from Affiliate	33
Interest Expense	(23)
Income Taxes	(7)
Earnings from Ongoing Operations	59
Special Items, after-tax	(4)
Net Income	$ 55

- Lower operating revenues in 2024 compared to 2023, primarily due to $291 million of lower PLR, partially offset by a $69 million increase in distribution prices, a $48 million increase in transmission formula rate returns and a $39 million increase in distribution volumes primarily due to weather and higher usage.
- Lower energy purchases in 2024 compared to 2023, primarily due to $259 million of lower PLR prices and $13 million of lower PLR volumes.
- Higher operation and maintenance expense in 2024 compared to 2023, primarily due to a $52 million increase in storm expenses, a $20 million increase in vegetation management expenses and a $19 million increase in Act 129 related expenses.
- Higher interest income from affiliate in 2024 compared to 2023, primarily due to interest income on a short-term note receivable with an affiliated company.
- Higher interest expense in 2024 compared to 2023, primarily due to $43 million related to increased long-term debt borrowings, partially offset by $11 million related to the redemption of floating rate first mortgage bonds in March 2023.

Rhode Island Regulated Segment

The Rhode Island Regulated segment consists primarily of the regulated electricity transmission and distribution operations and regulated distribution and sale of natural gas conducted by RIE.

Net Income and Earnings from Ongoing Operations include the following results:

	2024	2023	Change 2024 vs. 2023
Operating Revenues	$ 2,024	$ 1,851	$ 173
Energy purchases	782	658	124
Other operation and maintenance	731	705	26
Depreciation	165	156	9
Taxes, other than income	144	156	(12)
Total Operating Expenses	1,822	1,675	147
Other Income (Expense) - net	24	19	5
Interest Expense	95	83	12
Income Taxes	22	16	6
Net Income	109	96	13
Less: Special Items	(46)	(56)	10
Earnings from Ongoing Operations	$ 155	$ 152	$ 3

The following after-tax gains (losses), which management considers special items, impacted the Rhode Island Regulated segment's results and are excluded from Earnings from Ongoing Operations:

	Income Statement Line Item	2024	2023
Acquisition integration, net of tax of $13, $17 (a)	Other operation and maintenance	$ (45)	$ (65)
Acquisition integration, net of tax of $0	Other Income (Expense) - net	(1)	—
Acquisition integration, net of tax of ($2) (b)	Operating Revenues	—	8
Acquisition integration, net of tax of ($1)	Depreciation	—	2
Acquisition integration, net of tax of $0	Interest Expense	—	(1)
Total		$ (46)	$ (56)

(a) Primarily includes certain transition services agreement costs for IT systems that will not be part of PPL's ongoing operations.
(b) Prior period impact of a methodology change for Infrastructure, Safety, and Reliability revenues.

The changes in the components of the Rhode Island Regulated segment's results between these periods are due to the factors set forth below, which exclude the items that management considers special.

	2024 vs. 2023
Operating Revenues	$ 183
Energy purchases	(124)
Other operation and maintenance	(50)
Depreciation	(7)
Taxes, other than income	12
Other Income (Expense) - net	6
Interest Expense	(13)
Income Taxes	(4)
Earnings from Ongoing Operations	3
Special Items, after-tax	10
Net Income	$ 13

- Higher operating revenues in 2024 compared to 2023, primarily due to a $175 million increase due to the effects of conforming the presentation of RIE's net metering charges to that of PPL's other operating utilities beginning in 2024, a $46 million increase in recovery of gas maintenance related expenses, a $29 million increase related to capital investments, a $12 million increase related to recovery of transmission expenses and a $15 million increase of other items that were not individually significant, partially offset by a $51 million decrease in recovery of commodity costs, a $24 million decrease in recovery of pension expenses, a $14 million decrease in recovery of gross earnings taxes and a $10 million decrease related to ISR adjustments.

- Higher energy purchases in 2024 compared to 2023, primarily due to a $175 million increase related to the effects of conforming the presentation of RIE's net metering charges to that of PPL's other operating utilities beginning in 2024, partially offset by a $51 million decrease in commodity costs.

- Higher operation and maintenance expense in 2024 compared to 2023, primarily due to a $46 million increase in gas maintenance related expenses, an $18 million increase in bad debt expenses and a $12 million increase in transmission expenses, partially offset by a $24 million decrease in pension expenses.

- Lower taxes, other than income in 2024 compared to 2023, primarily due to a decrease in gross earnings taxes.

- Higher interest expense in 2024 compared to 2023, primarily due to increased borrowings.

Reconciliation of Earnings from Ongoing Operations

The following tables contain after-tax gains (losses), in total, which management considers special items, that are excluded from Earnings from Ongoing Operations, and a reconciliation to PPL's "Net Income" for the years ended December 31.

	2024				
	KY Regulated	PA Regulated	RI Regulated	Corporate and Other	Total
Net Income (Loss)	$ 620	$ 574	$ 109	$ (415)	$ 888
Less: Special Items (expense) benefit:					
Talen litigation costs, net of tax of $1 (a)	—	—	—	(2)	(2)
Strategic corporate initiatives, net of tax of $0, $2, $2 (b)	(1)	(5)	—	(5)	(11)
Acquisition integration, net of tax of $13, $66 (c)	—	—	(46)	(250)	(296)
PPL Electric billing issue, net of tax of $5 (d)	—	(13)	—	—	(13)
FERC transmission credit refund, net of tax of $0 (e)	1	—	—	—	1
ECR beneficial reuse transition adjustment, net of tax of $2 (f)	(4)	—	—	—	(4)
DER projects impairment, net of tax of $6 (g)	—	(15)	—	—	(15)
IT transformation, net of tax of $5 (h)	—	—	—	(22)	(22)
Total Special Items	(4)	(33)	(46)	(279)	(362)
Earnings from Ongoing Operations	$ 624	$ 607	$ 155	$ (136)	$ 1,250

(a) PPL incurred legal expenses related to litigation associated with its former affiliate, Talen Montana, LLC and certain affiliated entities.
(b) Represents costs primarily related to PPL's centralization and other strategic efforts.
(c) Rhode Island Regulated primarily includes certain transition services agreement costs for IT systems that will not be part of PPL's ongoing operations. Corporate and Other primarily includes integration and related costs associated with the acquisition of RIE.
(d) Certain expenses related to billing issues. See Note 7 to the Financial Statements for additional information.
(e) Prior period impact related to a FERC refund order.
(f) Prior period impact for an ECR mechanism revenue adjustment related to a KPSC order.
(g) Impairment of DER project costs associated with a pilot solar program for which PPL will not seek regulatory recovery.
(h) Costs associated with PPL's restructuring and rebuilding of its IT infrastructure, organization and systems.

	2023				
	KY Regulated	PA Regulated	RI Regulated	Corporate and Other	Total
Net Income (Loss)	$ 552	$ 519	$ 96	$ (427)	$ 740
Less: Special Items (expense) benefit:					
Talen litigation costs, net of tax of $26 (a)	—	—	—	(99)	(99)
Strategic corporate initiatives, net of tax of $0, $1, $3 (b)	(1)	(2)	—	(10)	(13)
Acquisition integration, net of tax of $14, $58 (c)	—	—	(56)	(218)	(274)
Sale of Safari Holdings, net of tax of $0 (d)	—	—	—	(4)	(4)
PPL Electric billing issue, net of tax of $10 (e)	—	(24)	—	—	(24)
FERC transmission credit refund, net of tax of $2 (f)	(6)	—	—	—	(6)
Unbilled revenue estimate adjustment, net of tax of $2 (g)	(5)	—	—	—	(5)
Other non-recurring charges, net of tax of $1, $0 (h)	—	(3)	—	(15)	(18)
Total Special Items	(12)	(29)	(56)	(346)	(443)
Earnings from Ongoing Operations	$ 564	$ 548	$ 152	$ (81)	$ 1,183

(a) PPL incurred legal expenses related to litigation and settlement with its former affiliate, Talen Montana, LLC and certain affiliated entities.
(b) Costs incurred primarily in connection with corporate centralization efforts.
(c) Rhode Island Regulated includes costs incurred primarily related to certain transition services agreement costs for IT systems that will not be part of PPL's ongoing operations. Corporate and Other primarily includes integration and related costs associated with the acquisition of RIE.
(d) Primarily final closing and other related adjustments for the sale of Safari Holdings.
(e) Certain expenses related to billing issues. See Note 7 to the Financial Statements for additional information.
(f) Prior period impact related to a FERC refund order.
(g) Prior period impact of a methodology change in determining unbilled revenues.
(h) PA Regulated includes certain expenses related to a litigation settlement. Corporate and Other primarily includes certain expenses related to distributed energy investments.

PPL Electric: Statement of Income Analysis

Net income for the years ended December 31 includes the following results:

	2024	2023	Change 2024 vs. 2023
Operating Revenues	$ 2,876	$ 3,008	$ (132)
Operating Expenses			
Operation			
Energy purchases	721	992	(271)
Other operation and maintenance	705	605	100
Depreciation	401	397	4
Taxes, other than income	131	143	(12)
Total Operating Expenses	1,958	2,137	(179)
Operating Income	918	871	47
Other Income (Expense) - net	45	39	6
Interest Income from Affiliate	33	—	33
Interest Expense	246	223	23
Income Before Income Taxes	750	687	63
Income Taxes	176	168	8
Net Income	$ 574	$ 519	$ 55

Operating Revenues

The increase (decrease) in operating revenues was due to:

	2024 vs. 2023
Distribution price (a)	$ 69
Distribution volume (b)	39
PLR (c)	(291)
Transmission formula rate (d)	48
Other	3
Total	$ (132)

(a) The increase was primarily due to reconcilable cost recovery mechanisms approved by the PAPUC.
(b) The increase was primarily due to weather, along with other higher usage in 2024.
(c) The decrease was primarily the result of lower energy prices and fewer PLR customers, partially offset by higher customer volumes due to weather and other higher usage.
(d) The increase was primarily due to returns on additional transmission capital investments, returns of depreciation and operation and maintenance expenses and delayed implementation of moving to a calendar year rate in 2023, partially offset by the prior year point to point border rate settlement variance.

Energy Purchases

Energy purchases decreased $271 million in 2024 compared with 2023, primarily due to lower PLR prices of $259 million and lower PLR volumes of $13 million.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance was due to:

	2024 vs. 2023
Vegetation management expenses	$ 20
Storm expenses	52
Act 129	19
DER projects impairment (a)	21
Other	(12)
Total	$ 100

(a) Impairment of DER project costs associated with a pilot solar program for which PPL will not seek regulatory recovery.

Interest Income from Affiliate

Interest income from affiliate increased $33 million in 2024 compared with 2023, primarily due to interest income on a short-term note receivable with an affiliated company.

Interest Expense

Interest expense increased $23 million in 2024 compared with 2023, primarily due to $43 million related to increased long-term debt borrowings, partially offset by $11 million related to the redemption of floating rate first mortgage bonds in March 2023.

LG&E: Statement of Income Analysis

Net income for the years ended December 31 includes the following results:

	2024	2023	Change 2024 vs. 2023
Operating Revenues			
Retail and wholesale	$ 1,617	$ 1,580	$ 37
Electric revenue from affiliate	31	33	(2)
Total Operating Revenues	1,648	1,613	35
Operating Expenses			
Operation			
Fuel	308	286	22
Energy purchases	151	168	(17)
Energy purchases from affiliates	20	12	8
Other operation and maintenance	349	364	(15)
Depreciation	305	302	3
Taxes, other than income	49	48	1
Total Operating Expenses	1,182	1,180	2
Operating Income	466	433	33
Other Income (Expense) - net	12	3	9
Interest Income from Affiliates	1	1	—
Interest Expense	105	102	3
Income Before Income Taxes	374	335	39
Income Taxes	77	69	8
Net Income	$ 297	$ 266	$ 31

Operating Revenues

The increase (decrease) in operating revenues was due to:

	2024 vs. 2023
Fuel and other energy purchases (a)	$ 7
Volumes (b)	35
ECR (c)	(18)
Other	11
Total	$ 35

(a) The increase was primarily due to higher recoveries of fuel expenses, partially offset by lower recoveries of energy purchases.
(b) The increase was primarily due to weather.
(c) The decrease was primarily due to lower ECR expenses.

Fuel

Fuel expense increased $22 million in 2024 compared with 2023, primarily due to an increase in commodity costs.

Energy Purchases

Energy purchases decreased $17 million in 2024 compared with 2023, primarily due to a decrease in commodity costs.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance was due to:

	2024 vs. 2023
ECR expenses	$ (17)
Other	2
Total	$ (15)

KU: Statement of Income Analysis

Net income for the years ended December 31 includes the following results:

	2024	2023	Change 2024 vs. 2023
Operating Revenues			
Retail and wholesale	$ 1,944	$ 1,872	$ 72
Electric revenue from affiliate	20	12	8
Total Operating Revenues	1,964	1,884	80
Operating Expenses			
Operation			
Fuel	476	447	29
Energy purchases	25	24	1
Energy purchases from affiliates	31	33	(2)
Other operation and maintenance	413	427	(14)
Depreciation	403	392	11
Taxes, other than income	49	45	4
Total Operating Expenses	1,397	1,368	29
Operating Income	567	516	51
Other Income (Expense) - net	15	8	7
Interest Expense	137	134	3
Interest Expense from Affiliate	—	1	(1)
Income Before Income Taxes	445	389	56
Income Taxes	89	77	12
Net Income	$ 356	$ 312	$ 44

Operating Revenues

The increase (decrease) in operating revenues was due to:

	2024 vs. 2023
Fuel and other energy purchases (a)	$ 28
Volumes (b)	39
ECR	(8)
Demand	8
Other	13
Total	$ 80

(a) The increase was primarily due to higher recoveries of fuel expenses.
(b) The increase was primarily due to weather.

Fuel

Fuel expense increased $29 million in 2024 compared with 2023, primarily due to a $37 million increase in volumes due to weather, partially offset by an $8 million decrease in commodity costs.

Financial Condition

The remainder of this Item 7 in this Form 10-K is presented on a combined basis, providing information, as applicable, for all Registrants.

Liquidity and Capital Resources

(All Registrants)

The Registrants' cash flows from operations and access to cost-effective bank and capital markets are subject to risks and uncertainties. See "Item 1A. Risk Factors" for a discussion of risks and uncertainties that could affect the Registrants' cash flows.

The Registrants had the following at:

	PPL	PPL Electric	LG&E	KU
December 31, 2024				
Cash and cash equivalents	$ 306	$ 24	$ 8	$ 13
Short-term debt	303	—	25	140
Long-term debt due within one year	551	—	300	250
Notes payable with affiliates		—	43	73
December 31, 2023				
Cash and cash equivalents	$ 331	$ 51	$ 18	$ 14
Short-term debt	992	509	—	93
Long-term debt due within one year	1	—	—	—
Notes payable with affiliates		—	—	—

(PPL)

The Statements of Cash Flows separately report the cash flows of discontinued operations. The "Operating Activities," "Investing Activities" and "Financing Activities" sections below include only the cash flows of continuing operations.

(All Registrants)

Net cash provided by (used in) operating, investing and financing activities for the years ended December 31 and the changes between periods were as follows:

	PPL	PPL Electric	LG&E	KU
2024				
Operating activities	$ 2,340	$ 1,042	$ 554	$ 723
Investing activities	(2,818)	(1,455)	(444)	(643)
Financing activities	435	386	(130)	(89)
2023				
Operating activities	$ 1,758	$ 912	$ 609	$ 647
Investing activities	(2,383)	(958)	(378)	(566)
Financing activities	650	72	(280)	(64)
2024 vs. 2023 Change				
Operating activities	$ 582	$ 130	$ (55)	$ 76
Investing activities	(435)	(497)	(66)	(77)
Financing activities	(215)	314	150	(25)

Operating Activities

The components of the change in cash provided by (used in) operating activities were as follows:

	PPL	PPL Electric	LG&E	KU
2024 vs. 2023				
Change - Cash Provided (Used):				
Net income	$ 148	$ 55	$ 31	$ 44
Non-cash components	(78)	119	26	5
Working capital	132	(22)	(103)	20
Defined benefit plan funding	3	5	(1)	—
Other operating activities	377	(27)	(8)	7
Total	$ 582	$ 130	$ (55)	$ 76

(PPL)

PPL cash provided by operating activities in 2024 increased $582 million compared with 2023.

- Net income increased $148 million and included a decrease in net non-cash charges of $78 million. The decrease in non-cash components was primarily due to an increase in deferred income taxes and investment tax credits (primarily due to book versus tax plant timing differences).

- The $132 million increase in cash from changes in working capital was primarily due to a decrease in accounts receivable (primarily due to timing of payments), partially offset by an increase in unbilled revenues (primarily due to weather) and an increase in other current liabilities.

- The $377 million increase in cash provided by other operating activities was driven by an increase in non-current liabilities (primarily related to the purchase of renewable tax credits in the prior year).

(PPL Electric)

PPL Electric's cash provided by operating activities in 2024 increased $130 million compared with 2023.

- Net income increased $55 million and included an increase in non-cash components of $119 million. The increase in non-cash components was primarily due to an increase in deferred income taxes and investment tax credits (primarily due to book versus tax plant timing differences).

- The $22 million decrease in cash from changes in working capital was primarily due to an increase in unbilled revenues (primarily due to weather), an increase in prepayments (primarily due to timing of payments), an increase in net regulatory assets (primarily due to the timing of rate recovery mechanisms) and a decrease in taxes payable (primarily due to timing of payments), partially offset by a decrease in accounts receivable (primarily due to timing of payments) and an increase in accounts payable (primarily due to timing of payments).

- The $27 million decrease in cash provided by other operating activities was driven primarily by an increase in noncurrent regulatory assets (primarily related to deferred storm costs recorded as noncurrent regulatory assets).

(LG&E)

LG&E's cash provided by operating activities in 2024 decreased $55 million compared with 2023.

- Net income increased $31 million and included an increase in non-cash components of $26 million. The increase in non-cash components was primarily due to a decrease in deferred income taxes and investment tax credits (primarily due to book versus tax plant timing differences).

- The $103 million decrease in cash from changes in working capital was primarily due to increases in accounts receivable and unbilled revenues (primarily due to weather), an increase in fuel, materials and supplies (primarily due to lower commodity costs in the prior year), an increase in accounts receivable from affiliates (primarily due to timing of payments) and an increase in net regulatory assets (primarily due to the timing of rate recovery mechanisms), partially offset by increases in accounts payable and accounts payable to affiliates (primarily due to timing of payments).

(KU)

KU's cash provided by operating activities in 2024 increased $76 million compared with 2023.

- Net income increased $44 million and included an increase in non-cash components of $5 million. The increase in non-cash components was primarily due to an increase in depreciation expense (primarily due to additional assets placed into service, net of retirements), partially offset by a decrease in deferred income taxes and investment tax credits (primarily due to book versus tax plant timing differences).

- The $20 million increase in cash from changes in working capital was primarily due to an increase in accounts payable to affiliates (primarily due to timing of payments) and a decrease in fuel, materials and supplies (primarily due to weather), partially offset by increases in accounts receivable and unbilled revenues (primarily due to weather).

Investing Activities

(All Registrants)

The components of the change in cash provided by (used in) investing activities were as follows:

	PPL	PPL Electric	LG&E	KU
2024 vs. 2023 Change - Cash Provided (Used):				
Expenditures for PP&E	$ (415)	$ (273)	$ (66)	$ (71)
Notes receivable from affiliate	—	(222)	—	—
Other investing activities	(20)	(2)	—	(6)
Total	$ (435)	$ (497)	$ (66)	$ (77)

For PPL, the increase in expenditures for PP&E was primarily due to an increase in project expenditures at PPL Electric, LG&E and KU. The increase in expenditures at PPL Electric was primarily due to increases in transmission and distribution projects. The increase in expenditures at LG&E and KU was primarily due to Mill Creek Unit 5 and increases in the Advanced Metering Infrastructure initiative.

See "Forecasted Uses of Cash" for detail regarding projected capital expenditures for the years 2025 through 2027.

For PPL Electric, the changes in "Notes receivable from affiliate" activity resulted from payments received on the short-term note between affiliates in 2022, issued to support general corporate purposes. See Note 13 to the Financial Statements for further discussion of intercompany borrowings.

Financing Activities

(All Registrants)

The components of the change in cash provided by (used in) financing activities were as follows:

	PPL	PPL Electric	LG&E	KU
2024 vs. 2023				
Change - Cash Provided (Used):				
Long-term debt issuance/retirement, net	$ 496	$ 560	$ (164)	$ (146)
Dividends	(43)	(52)	(21)	(42)
Capital contributions/distributions, net	—	672	83	31
Changes in net short-term debt	(696)	(873)	204	55
Note payable with affiliate	—	—	43	73
Other financing activities	28	7	5	4
Total	$ (215)	$ 314	$ 150	$ (25)

(All Registrants)

See Note 8 to the Financial Statements in this Form 10-K for information on 2024 activity.

See "Long-term Debt and Equity Securities" below for additional information on current year activity. See "Forecasted Sources of Cash" for a discussion of the Registrants' plans to issue debt and equity securities, as well as a discussion of credit facility capacity available to the Registrants. Also see "Forecasted Uses of Cash" for a discussion of PPL's plans to pay dividends on common securities in the future, as well as the Registrants' maturities of long-term debt.

Long-term Debt and Equity Securities

Long-term debt and equity securities activity for 2024 included:

	Debt		Stock	
	Issuances (a)	Retirements	Issuances (b)	Repurchases
Cash Flow Impact:				
PPL	$ 1,894	$ —	$ 9	$ —
PPL Electric	649	—	—	—
LG&E	—	—	—	—
KU	—	—	—	—

(a) Issuances are net of pricing discounts, where applicable, and exclude the impact of debt issuance costs. Includes debt issuances with affiliates.
(b) Includes issuances of common stock and treasury stock, which are included in "Other financing activities" on the Statements of Cash Flows.

See Note 8 to the Financial Statements for additional long-term debt information.

Forecasted Sources of Cash

(All Registrants)

The Registrants expect to continue to have adequate liquidity available from operating cash flows, cash and cash equivalents, credit facilities, commercial paper issuances and debt, hybrid, and equity issuances to meet their requirements with respect to their contractual obligations and anticipated capital expenditures. Equity capital for PPL can be provided from any combination of issuances from at the market stock plans, private placements, or public offerings. Additionally, subject to market conditions, the Registrants and their subsidiaries may access the capital markets, and PPL Electric, LG&E and KU anticipate receiving equity contributions from their parent or member in 2025, which are expected to be used to fund capital expenditures and for other general corporate purposes.

PPL Electric, LG&E and KU plan to obtain the funds to meet their future capital needs from sources similar to those they used in the past, which were primarily from operating cash flows, external securities issuances, borrowings from financial institutions, and equity contributions from PPL. Operating cash flows provide a substantial portion of these subsidiary Registrants' cash needs.

The amount, type, and timing of any financings in 2025, as well as in subsequent years, will be contingent on investment opportunities and the Registrants' capital requirements and will depend upon prevailing market conditions, regulatory approvals as applicable for the subsidiary Registrants, and other factors.

Credit Facilities

The Registrants maintain credit facilities to enhance liquidity, provide credit support and provide a backstop to commercial paper programs. Amounts borrowed under these credit facilities are reflected in "Short-term debt" on the Balance Sheets. At December 31, 2024, the total committed borrowing capacity under credit facilities and the borrowings under these facilities were:

External

	Committed Capacity	Borrowed	Letters of Credit and Commercial Paper Issued (f)	Unused Capacity
PPL Capital Funding Credit Facilities (a)	$ 1,350	$ —	$ 138	$ 1,212
PPL Electric Credit Facilities (b)	650	—	1	649
LG&E Credit Facilities (c)	500	—	25	475
KU Credit Facilities (c)	400	—	140	260
Total Credit Facilities (d) (e)	$ 2,900	$ —	$ 304	$ 2,596

(a) Includes a $1.25 billion syndicated credit facility with a $250 million borrowing sublimit for RIE and a $1 billion sublimit for PPL Capital Funding at December 31, 2024. RIE's borrowing sublimit is adjustable, at the borrowers' option, from $0 to $600 million, with the remaining balance of the $1.25 billion available under the facility allocated to PPL Capital Funding. At December 31, 2024, PPL Capital Funding had $138 million of commercial paper outstanding and RIE had no commercial paper outstanding. On January 2, 2025, the capacity of the PPL Capital Funding syndicated credit facility was increased to $1.5 billion, with the RIE sublimit remaining $250 million and the PPL Capital Funding sublimit increasing to $1.25 billion. See Note 8 to the Financial Statements for additional information.
(b) On January 2, 2025, the capacity of the PPL Electric credit facility increased to $750 million. See Note 8 to the Financial Statements for additional information.
(c) On January 2, 2025, the capacity of the LG&E and KU credit facilities were each increased to $600 million. See Note 8 to the Financial Statements for additional information.
(d) The syndicated credit facilities and PPL Capital Funding's bilateral facility, each contain a financial covenant requiring debt to total capitalization not to exceed 70% for PPL Capital Funding, RIE, PPL Electric, LG&E and KU, as calculated in accordance with the facility, and other customary covenants.
The commitments under the credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than the following percentages of the total committed capacity: PPL - 9%, PPL Electric - 7%, LG&E - 7% and KU - 7%.
(e) Each company pays customary fees under its respective syndicated credit facility. Borrowings generally bear interest at applicable SOFR, plus an applicable margin.
(f) Commercial paper issued reflects the undiscounted face value of the issuance.

In addition to the financial covenants noted in the table above, the credit agreements governing the above credit facilities contain various other covenants. Failure to comply with the covenants after applicable grace periods could result in acceleration of repayment of borrowings and/or termination of the agreements. The Registrants monitor compliance with the covenants on a regular basis. At December 31, 2024, the Registrants were in compliance with these covenants. As of December 31, 2024, the Registrants believe that these covenants and other borrowing conditions will not limit access to these funding sources.

See Note 8 to the Financial Statements for further discussion of the Registrants' credit facilities.

Intercompany (LG&E and KU)

	Committed Capacity	Borrowed	Commercial Paper Issued	Unused Capacity
LG&E Money Pool (a)	$ 750	$ 43	$ 25	$ 682
KU Money Pool (a)	650	73	140	437

(a) LG&E and KU participate in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E, and LKE and/or LG&E make available to KU funds up to the difference between LG&E's and KU's FERC borrowing limit and LG&E's and KU's commercial paper capacity limit, at an interest rate based on the lower of a market index of commercial paper issues and two additional rate options based on the lower of a market index of commercial paper issues and two additional rate options based on SOFR.

See Note 13 to the Financial Statements for further discussion of intercompany credit facilities.

Commercial Paper (All Registrants)

The Registrants, PPL Capital Funding and RIE maintain commercial paper programs to provide an additional financing source to fund short-term liquidity needs, as necessary. Commercial paper issuances, included in "Short-term debt" on the Balance Sheets, are supported by the respective Registrant's credit facilities. The following commercial paper programs were in place at:

	December 31, 2024		
	Capacity	Commercial Paper Issuances (b)	Unused Capacity
PPL Capital Funding (a)	$ 1,350	$ 138	$ 1,212
Rhode Island Energy (a)	250	—	250
PPL Electric	650	—	650
LG&E	500	25	475
KU	400	140	260
Total PPL	$ 3,150	$ 303	$ 2,847

(a) Issuances under the PPL Capital Funding and RIE commercial paper programs are supported by the PPL Capital Funding syndicated credit facility, which at December 31, 2024, had a total capacity of $1.25 billion, with a $250 million borrowing sublimit for RIE and a $1 billion sublimit for PPL Capital Funding at December 31, 2024. RIE's borrowing sublimit is adjustable, at the borrowers' option, from $0 to $600 million, with the remaining balance of the $1.25 billion available under the facility allocated to PPL Capital Funding. On January 2, 2025, the capacity of the PPL Capital Funding syndicated credit facility was increased to $1.5 billion, with the RIE sublimit remaining $250 million and the PPL Capital Funding sublimit increasing to $1.25 billion.

(b) Commercial paper issued reflects the undiscounted face value of the issuance.

Forecasted Uses of Cash

(All Registrants)

In addition to expenditures required for normal operating activities, such as purchased power, payroll, fuel and taxes, the Registrants currently expect to incur future cash outflows for capital expenditures, various contractual obligations, payment of dividends on its common stock, and possibly the purchase or redemption of a portion of debt securities.

Capital Expenditures

The table below shows the Registrants' current capital expenditure projections for the years 2025 through 2027. Expenditures for the regulated utilities are expected to be recovered through rates, pending regulatory approval.

		Projected		
	Total	2025 (a)	2026	2027
PPL				
Generating facilities	$ 3,875	$ 975	$ 1,200	$ 1,700
Electric distribution facilities	4,925	1,400	1,825	1,700
Gas distribution facilities	1,125	400	350	375
Transmission facilities	4,475	1,300	1,600	1,575
Other	600	250	225	125
Total Capital Expenditures	$ 15,000	$ 4,325	$ 5,200	$ 5,475
PPL Electric				
Electric distribution facilities	$ 2,525	$ 650	$ 975	$ 900
Transmission facilities	2,550	850	875	825
Total Capital Expenditures	$ 5,075	$ 1,500	$ 1,850	$ 1,725

	Total	Projected 2025 (a)	2026	2027
LG&E				
Generating facilities	$ 2,275	$ 475	$ 625	$ 1,175
Electric distribution facilities	600	175	200	225
Gas distribution facilities	400	175	100	125
Transmission facilities	275	75	75	125
Other	300	125	125	50
Total Capital Expenditures	$ 3,850	$ 1,025	$ 1,125	$ 1,700
KU				
Generating facilities	$ 1,600	$ 500	$ 575	$ 525
Electric distribution facilities	750	225	275	250
Transmission facilities	875	175	350	350
Other	300	125	100	75
Total Capital Expenditures	$ 3,525	$ 1,025	$ 1,300	$ 1,200

(a) The 2025 total excludes amounts included in accounts payable as of December 31, 2024.

Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions.

Contractual Obligations

The Registrants have assumed various financial obligations and commitments in the ordinary course of conducting business. At December 31, 2024, estimated contractual cash obligations were as follows:

	Total	2025	2026-2027	2028-2029	After 2029
PPL					
Long-term Debt (a)	$ 16,674	$ 551	$ 1,332	$ 1,466	$ 13,325
Interest on Long-term Debt (b)	11,001	729	1,375	1,288	7,609
Operating Leases	102	24	30	17	31
Purchase Obligations (c)	4,872	1,479	1,958	702	733
Total Contractual Cash Obligations	$ 32,649	$ 2,783	$ 4,695	$ 3,473	$ 21,698
PPL Electric					
Long-term Debt (a)	$ 5,299	$ —	$ 108	$ 116	$ 5,075
Interest on Long-term Debt (b)	4,378	246	491	486	3,155
Unconditional Power Purchase Obligations	49	29	20	—	—
Total Contractual Cash Obligations	$ 9,726	$ 275	$ 619	$ 602	$ 8,230
LG&E					
Long-term Debt (a)	$ 2,489	$ 300	$ 350	$ —	$ 1,839
Interest on Long-term Debt (b)	1,380	100	178	167	935
Operating Leases	17	6	7	3	1
Coal and Natural Gas Purchase Obligations (d)	1,098	327	463	242	66
Unconditional Power Purchase Obligations (e)	306	25	54	50	177
Construction Obligations (f)	251	108	140	2	1
Other Obligations	95	30	58	4	3
Total Contractual Cash Obligations	$ 5,636	$ 896	$ 1,250	$ 468	$ 3,022

	Total	2025	2026-2027	2028-2029	After 2029
KU					
Long-term Debt (a)	$ 3,089	$ 250	$ 224	$ —	$ 2,615
Interest on Long-term Debt (b)	1,999	130	239	233	1,397
Operating Leases	27	10	11	5	1
Coal and Natural Gas Purchase Obligations (d)	1,076	352	471	211	42
Unconditional Power Purchase Obligations (e)	136	11	24	22	79
Construction Obligations (f)	532	221	307	2	2
Other Obligations	117	46	59	8	4
Total Contractual Cash Obligations	$ 6,976	$ 1,020	$ 1,335	$ 481	$ 4,140

(a) Reflects principal maturities based on stated maturity, sinking fund payments, or earlier put dates. See Note 8 to the Financial Statements for a discussion of variable-rate remarketable bonds issued on behalf of LG&E and KU. The Registrants do not have any significant finance lease obligations.
(b) Assumes interest payments through stated maturity or earlier put dates. The payments herein are subject to change, as payments for debt that is or becomes variable-rate debt have been estimated.
(c) The amounts include agreements to purchase goods or services that are enforceable and legally binding and specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Primarily includes, as applicable, the purchase obligations of electricity, coal, natural gas and limestone, as well as certain construction expenditures, which are also included in the Capital Expenditures discussion above.
(d) Represents contracts to purchase coal, natural gas and natural gas transportation. See Note 12 to the Financial Statements for additional information.
(e) Represents future minimum payments under OVEC power purchase agreements through June 2040. See Note 12 to the Financial Statements for additional information.
(f) Represents construction commitments, which are also reflected in the Capital Expenditures table presented above.

Dividends/Distributions

(PPL)

PPL views dividends as an integral component of shareowner return and expects to continue to pay dividends in amounts intended to maintain a capitalization structure that supports investment grade credit ratings. In November 2024, PPL declared its quarterly common stock dividend, payable January 2, 2024, at 25.75 cents per share (equivalent to $1.03 per annum). On February 13, 2025, PPL announced a quarterly common stock dividend of 27.25 cents per share, payable April 1, 2025, to shareowners of record as of March 10, 2025. Future dividends will be declared at the discretion of the Board of Directors and will depend upon future earnings, cash flows, financial and legal requirements and other factors.

Subject to certain exceptions, PPL may not declare or pay any cash dividend or distribution on its capital stock during any period in which PPL Capital Funding defers interest payments on its 2007 Series A Junior Subordinated Notes due 2067. At December 31, 2024, no interest payments were deferred.

(PPL Electric, LG&E and KU)

From time to time, as determined by their respective Board of Directors, the Registrants pay dividends, distributions or return capital, as applicable, to their respective shareholders or members. Certain of the credit facilities of PPL Electric, LG&E and KU include minimum debt covenant ratios that could effectively restrict the payment of dividends or distributions.

(All Registrants)

See Note 8 to the Financial Statements for these and other restrictions related to distributions on capital interests for the Registrants and their subsidiaries.

Purchase or Redemption of Debt Securities

The Registrants will continue to evaluate outstanding debt securities and may decide to purchase or redeem these securities in open market or privately negotiated transactions, in exchange transactions or otherwise, depending upon prevailing market conditions, available cash and other factors, and may be commenced or suspended at any time. The amounts involved may be material.

Rating Agency Actions

Moody's and S&P periodically review the credit ratings of the debt of the Registrants and their subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of the Registrants and their subsidiaries are based on information provided by the Registrants and other sources. The ratings of Moody's and S&P are not a recommendation to buy, sell or hold any securities of the Registrants or their subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities.

The credit ratings of the Registrants and their subsidiaries affect their liquidity, access to capital markets and cost of borrowing under their credit facilities. A downgrade in the Registrants' or their subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets. The Registrants and their subsidiaries have no credit rating triggers that would result in the reduction of access to capital markets or the acceleration of maturity dates of outstanding debt.

The following table sets forth the Registrants' and their subsidiaries' credit ratings for outstanding debt securities or commercial paper programs as of December 31, 2024.

	Senior Unsecured		Senior Secured		Commercial Paper	
Issuer	Moody's	S&P	Moody's	S&P	Moody's	S&P
PPL						
PPL Capital Funding	Baa1	BBB+			P-2	A-2
Rhode Island Energy	A3	A-			P-2	A-2
PPL and PPL Electric						
PPL Electric			A1	A+	P-2	A-1
PPL, LG&E and KU						
LG&E			A1	A	P-2	A-2
KU			A1	A	P-2	A-2

Since June 2023, the rating agencies have not taken rating actions related to the Registrants and their subsidiaries.

Ratings Triggers *(PPL, LG&E and KU)*

Various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, and interest rate instruments, contain provisions that require the posting of additional collateral or permit the counterparty to terminate the contract, if PPL's, LG&E's or KU's or their subsidiaries' credit rating, as applicable, were to fall below investment grade. See Note 16 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral requirements for derivative contracts in a net liability position at December 31, 2024.

Guarantees for Subsidiaries *(PPL)*

PPL guarantees certain consolidated affiliate financing arrangements. Some of the guarantees contain financial and other covenants that, if not met, would limit or restrict the consolidated affiliates' access to funds under these financing arrangements, accelerate maturity of such arrangements or limit the consolidated affiliates' ability to enter into certain transactions. At this time, PPL believes that these covenants will not limit access to relevant funding sources. See Note 12 to the Financial Statements for additional information about guarantees.

Other Contingent Obligations *(All Registrants)*

The Registrants have entered into certain agreements that may contingently require payment to a guaranteed or indemnified party. See Note 12 to the Financial Statements for a discussion of these agreements.

Risk Management

Market Risk

(All Registrants)

See Notes 1, 15 and 16 to the Financial Statements for information about the Registrants' risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These are not precise indicators of expected future losses, but are rather only indicators of possible losses under normal market conditions at a given confidence level.

Interest Rate Risk

PPL and its subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. A variety of financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in their debt portfolios, adjust the duration of the debt portfolios and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under PPL's risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates. In addition, the interest rate risk of certain subsidiaries is potentially mitigated as a result of the existing regulatory framework or the timing of rate cases.

The following interest rate hedges were outstanding at December 31:

	2024				2023		
	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates (b)	Maturities Ranging Through	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates (b)
PPL and LG&E							
Economic hedges							
Interest rate swaps (c)	$ 64	$ (3)	$ (1)	2033	$ 64	$ (7)	$ (1)

(a) Includes accrued interest, if applicable.
(b) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability. Sensitivities represent a 10% adverse movement in interest rates.
(c) Realized changes in the fair value of such economic hedges are recoverable through regulated rates and any subsequent changes in the fair value of these derivatives are included in regulatory assets or regulatory liabilities.

The Registrants are exposed to a potential increase in interest expense and to changes in the fair value of their debt portfolios. The estimated impact of a 10% adverse movement in interest rates on interest expense at December 31, 2024 and 2023 was insignificant for PPL, PPL Electric, LG&E, and KU. The estimated impact of a 10% adverse movement in interest rates on the fair value of debt at December 31 is shown below.

	10% Adverse Movement in Rates on Fair Value of Debt	
	2024	2023
PPL	$ 622	$ 593
PPL Electric	262	250
LG&E	89	95
KU	131	137

Commodity Price Risk

PPL is exposed to commodity price risk through its subsidiaries as described below.

- PPL Electric is required to purchase electricity to fulfill its obligation as a PLR. Potential commodity price risk is mitigated through its PAPUC-approved cost recovery mechanism and full-requirement supply agreements to serve its PLR customers which transfer the risk to energy suppliers.

- LG&E's and KU's rates include certain mechanisms for fuel, fuel-related expenses and energy purchases. In addition, LG&E's rates include a mechanism for natural gas supply costs. These mechanisms generally provide for timely recovery of market price fluctuations associated with these costs.
- RIE utilizes derivative instruments pursuant to its RIPUC-approved plan to manage commodity price risk associated with its natural gas purchases. RIE's commodity price risk management strategy is to reduce fluctuations in firm gas sales prices to its customers. RIE's costs associated with derivatives instruments are recoverable through its RIPUC- approved cost recovery mechanisms. RIE is also required to purchase electricity to fulfill its obligation to provide Last Resort Service (LRS). Potential commodity price risk is mitigated through its RIPUC-approved cost recovery mechanisms and full requirements service agreements to serve LRS customers, which transfer the risk to energy suppliers. Additionally, RIE is required to contract through long-term agreements for clean energy supply under the Rhode Island Renewable Energy Growth program and Long-term Clean Energy Standard. Potential commodity price risk is mitigated through its RIPUC-approved cost recovery mechanisms, which true-up cost differences between contract prices and market prices.

Volumetric Risk

Volumetric risk is the risk related to the changes in volume of retail sales due to weather, economic conditions or other factors. PPL is exposed to volumetric risk through its subsidiaries as described below.

- PPL Electric, LG&E and KU are exposed to volumetric risk on retail sales, mainly due to weather and other economic conditions for which there is limited mitigation between rate cases.
- RIE is exposed to volumetric risk, which is significantly mitigated by regulatory mechanisms. RIE's electric and gas distribution rates both have a revenue decoupling mechanism, which allows for annual adjustments to RIE's delivery rates.

Inflation and Supply Chain Related Risk

PPL and its subsidiaries continue to monitor the impact of inflation and supply chain disruptions. PPL and its subsidiaries monitor the cost of fuel, construction, regulatory and environmental compliance costs and other costs, including as a result of tariffs. Mechanisms are in place to mitigate the risk of inflationary effects and supply chain disruptions, to the extent possible, but increased costs and supply chain disruptions may directly or indirectly affect our ongoing operations. These mechanisms include pricing strategies, productivity improvements and cost reductions in order to ensure that the Registrants are able to procure the necessary materials and other resources needed to maintain services in a safe and reliable manner, and to grow infrastructure consistent with the capital expenditure plan. For additional information see "Forward-looking Information" at the beginning of this report and "Item 1A. Risk Factors" of the Registrant.

Defined Benefit Plans - Equity Securities Price Risk

See "Application of Critical Accounting Policies - Defined Benefits" for additional information regarding the effect of equity securities price risk on plan assets.

Credit Risk

(All Registrants)

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

PPL is exposed to credit risk from "in-the-money" transactions with counterparties, as well as additional credit risk through certain of its subsidiaries, as discussed below.

In the event a supplier of PPL, PPL Electric, LG&E or KU defaults on its contractual obligation, those Registrants would be required to seek replacement power or replacement fuel in the market. In general, subject to regulatory review or other processes, appropriate incremental costs incurred by these entities would be recoverable from customers through applicable rate mechanisms, thereby mitigating the financial risk for these entities.

PPL and its subsidiaries have credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. PPL and its subsidiaries may request additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below

investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit.

(All Registrants)

Related Party Transactions

The Registrants are not aware of any material ownership interests or operating responsibility by senior management in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with the Registrants. See Note 13 to the Financial Statements for additional information on related party transactions for PPL Electric, LG&E and KU.

Acquisitions, Development and Divestitures

The Registrants from time to time evaluate opportunities for potential acquisitions, divestitures, and development projects. See Note 9 to the Financial Statements for additional information on acquisition and divestiture activity. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with, modify or terminate the projects. Any resulting transactions may impact future financial results.

Environmental Matters

Extensive federal, state and local environmental laws and regulations are applicable to the Registrants' air emissions, water discharges and the management of hazardous and solid waste, as well as other aspects of the Registrants' businesses. The costs of compliance or alleged non-compliance cannot be predicted with certainty but could be significant. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers and industrial power users, and may impact the costs for their products or their demand for the Registrants' services. Increased capital and operating costs are expected to be subject to rate recovery. The Registrants can provide no assurances as to the ultimate outcome of future environmental or rate proceedings before regulatory authorities.

See "Legal Matters" in Note 12 to the Financial Statements for a discussion of the more significant environmental claims. See "Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash - Capital Expenditures" in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" for information on projected environmental capital expenditures for 2025 through 2027. See Note 18 to the Financial Statements for information related to the impacts of CCRs on AROs. See "Item 1. Business - Environmental Matters" for additional information.

Sustainability

Increasing attention has been focused on a broad range of corporate activities under the heading of “sustainability”, which has resulted in a significant increase in the number of requests from interested parties for information on sustainability topics. These parties range from investor groups focused on environmental, social, governance and other matters to non-investors concerned with a variety of public policy matters. Often the scope of the information sought is very broad and not necessarily relevant to an issuer’s business or industry. As a result, a number of private groups have proposed to standardize the subject matter constituting sustainability, either generally or by industry. Those efforts remain ongoing. In addition, certain of these private groups have advocated that the SEC promulgate regulations requiring specific sustainability reporting under the Securities Exchange Act of 1934, as amended (the ’34 Act), or that issuers voluntarily include certain sustainability disclosure in their ’34 Act reports. In March 2024, the SEC finalized climate disclosure rules for public companies. The rules require public companies to disclose, among other things, direct and indirect GHG emissions and information related to climate-related targets or goals that are material to the company’s business, results of operations or financial condition. As of April 2024, the SEC issued a “stay” on its climate-related disclosure rules, temporarily pausing implementation pending judicial review. PPL cannot predict the final legal requirements or when the requirements will be effective.

As has been PPL’s practice, to the extent sustainability issues have or may have a material impact on the Registrants’ financial condition or results of operation, PPL discloses such matters in accordance with applicable securities law and SEC regulations. With respect to other sustainability topics that PPL deems relevant to investors but that are not required to be reported under applicable securities law and SEC regulation, PPL will continue each spring to publish its annual sustainability report including tracking reductions related to the company's goal to reduce carbon emissions and post that report on its corporate website at

www.pplweb.com and on www.pplsustainability.com. Neither the information in such annual sustainability report nor the information at such websites is incorporated in this Form 10-K by reference, and it should not be considered a part of this Form 10-K. In preparing its sustainability report, PPL is guided by the framework established by the Global Reporting Initiative, which identifies environmental, social, governance and other subject matter categories. PPL also participates in efforts by the Edison Electric Institute and American Gas Association to provide the appropriate subset of sustainability information that can be applied consistently across the electric and gas utility industries. Additionally, PPL consults widely used reporting frameworks for discrete sustainability topics, including corporate political contributions and climate-related issues. PPL also responds to the climate survey of CDP, a not-for-profit organization based in the United Kingdom formerly known as the Carbon Disclosure Project, that runs the global disclosure system that enables investors, companies, cities, states and regions to measure and manage their environmental impacts.

Cybersecurity

See “Item 1A. Risk Factors” and “Item 1C. Cybersecurity” for a discussion of cybersecurity risks affecting the Registrants and the related strategies for managing these risks.

Competition

See "Competition" under each of PPL's reportable segments in "Item 1. Business - General - Segment Information" and "Item 1A. Risk Factors" for a discussion of competitive factors affecting the Registrants.

New Accounting Guidance

See Note 1 and Note 20 for a discussion of significant new accounting guidance adopted and pending adoption as of December 31, 2024.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to an understanding of the reported financial condition or results of operations and require management to make estimates or other judgments of matters that are inherently uncertain. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the information presented in the Financial Statements (these accounting policies are also discussed in Note 1 to the Financial Statements). Senior management has reviewed with PPL's Audit Committee these critical accounting policies, the following disclosures regarding their application, and the estimates and assumptions regarding them.

Defined Benefits *(All Registrants)*

Certain of the Registrants and/or their subsidiaries sponsor or participate in certain qualified funded and non-qualified unfunded defined benefit pension plans and both funded and unfunded other postretirement benefit plans. See Notes 1, 7 and 10 to the Financial Statements for additional information about the plans and the accounting for defined benefits.

A summary of plan sponsors by Registrant and whether a Registrant or its subsidiaries sponsor (S) or participate in and receives allocations (P) from those plans is shown in the table below.

Plan Sponsor	PPL	PPL Electric	LG&E	KU
PPL Services	S	P		
LKE			P	P

Management makes certain assumptions regarding the valuation of benefit obligations and the performance of plan assets. As such, annual net periodic defined benefit costs are recorded in current earnings or regulatory assets and liabilities based on estimated results. Any differences between actual and estimated results are recorded in AOCI or, in the case of PPL Electric, LG&E and KU, regulatory assets and liabilities for amounts that are expected to be recovered through regulated customer rates. These amounts in AOCI or regulatory assets and liabilities are amortized to income over future periods. The significant assumptions are:

- Discount Rate - In selecting the discount rates for defined benefit plans, the plan sponsors start with a cash flow analysis of the expected benefit payment stream for their plans. The plan-specific cash flows are matched against the coupons and

expected maturity values of Aa-rated non-callable (or callable with make-whole provisions) bonds that could be purchased for a hypothetical settlement portfolio. The plan sponsors then use the single discount rate derived from matching the discounted benefit payment stream to the market value of the selected bond portfolio.

- Expected Return on Plan Assets - The expected long-term rates of return for pension and other postretirement benefits are based on management's projections using a best-estimate of expected returns, volatilities and correlations for each asset class. Each plan's specific current and expected asset allocations are also considered in developing a reasonable return assumption.

- Rate of Compensation Increase - Management projects employees' annual pay increases, which are used to project employees' pension benefits at retirement. In selecting a rate of compensation increase, plan sponsors consider past experience, the potential impact of movements in inflation rates and expectations of ongoing compensation practices.

See Note 10 to the Financial Statements for details of the assumptions selected for pension and other postretirement benefits. A variance in the assumptions could significantly impact accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and AOCI or regulatory assets and liabilities.

The following tables reflect changes in certain assumptions based on the Registrants' primary qualified defined benefit pension and other postretirement benefit plans. The inverse of this change would have the opposite impact on accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and AOCI or regulatory assets and liabilities. The sensitivities below reflect an evaluation of the change based solely on a change in that assumption.

Actuarial assumption	Increase (Decrease)
Discount Rate	(0.25 %)
Expected Return on Plan Assets	(0.25 %)
Rate of Compensation Increase	0.25 %

Actuarial assumption	Increase (Decrease) Defined Benefit Asset	(Increase) Decrease Defined Benefit Liabilities	(Increase) Decrease AOCI (pre-tax)	Increase (Decrease) Net Regulatory Assets	Increase (Decrease) Defined Benefit Costs
PPL

Rate of compensation increase	(1)	—	n/a	1	—

Income Taxes *(All Registrants)*

Significant management judgment is required in developing the Registrants' provision for income taxes, primarily due to valuation allowances on deferred tax assets.

The need for valuation allowances to reduce deferred tax assets requires significant management judgment. Valuation allowances are initially recorded and reevaluated each reporting period by assessing the likelihood of the ultimate realization of a deferred tax asset. Management considers numerous factors in assessing the expected realization of a deferred tax asset, including the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies. Any tax planning strategy considered in this assessment must meet the recognition and measurement criteria for the valuation of a deferred tax asset. When evaluating the need for valuation allowances, the uncertainty posed by potential or expected legislative change on such factors is also considered by management. The amount of deferred tax assets ultimately realized may differ materially from the estimates utilized in the computation of valuation allowances and may materially impact the financial statements in the future.

See Note 6 to the Financial Statements for income tax disclosures.

Regulatory Assets and Liabilities *(All Registrants)*

PPL Electric, LG&E, KU and RIE are subject to cost-based rate regulation. As a result, the effects of regulatory actions are required to be reflected in the financial statements. Assets and liabilities are recorded that result from the regulated ratemaking process that may not be recorded under GAAP for non-regulated entities. Regulatory assets generally represent incurred costs that have been deferred because such costs are probable of future recovery in regulated customer rates. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose.

Management continually assesses whether the regulatory assets are probable of future recovery by considering factors such as changes in the applicable regulatory and political environments, the ability to recover costs through regulated rates, recent rate orders to the Registrants and other regulated entities, and the status of any pending or potential deregulation legislation. Based on this continual assessment, management believes the existing regulatory assets are probable of recovery. This assessment reflects the current political and regulatory climate at the state and federal levels and is subject to change in the future. If future recovery of costs ceases to be probable, the regulatory asset would be written-off. Additionally, the regulatory agencies can provide flexibility in the manner and timing of recovery of regulatory assets.

See Note 7 to the Financial Statements for regulatory assets and regulatory liabilities recorded at December 31, 2024 and 2023, as well as additional information on those regulatory assets and liabilities. All regulatory assets are either currently being recovered under specific rate orders, represent amounts that are expected to be recovered in future rates or benefit future periods based upon established regulatory practices.

Price Risk Management *(PPL)*

See "Financial Condition - Risk Management" above.

Goodwill Impairment *(PPL, LG&E and KU)*

Goodwill is tested for impairment at the reporting unit level. The reporting units of PPL include the Kentucky Regulated reporting unit, the Pennsylvania Regulated reporting unit, and the Rhode Island Regulated reporting unit. LG&E and KU are each single reporting units. A goodwill impairment test is performed annually or more frequently if events or changes in circumstances indicate that the carrying amount of the reporting unit may be greater than the reporting unit's fair value.

The fair value of a reporting unit is compared with the carrying value and an impairment charge is recognized if the carrying amount exceeds the fair value of the reporting unit.

PPL, for its reporting units, and individually, LG&E and KU, may elect either to initially make a qualitative evaluation about the likelihood of an impairment of goodwill or to bypass the qualitative evaluation and test goodwill for impairment using a quantitative test.

As of October 1, 2024, PPL, for its reporting units, and individually, LG&E and KU, elected to perform the qualitative step zero evaluation of goodwill. These evaluations considered the excess of fair value over the carrying value of each reporting unit that was calculated during step one of the quantitative impairment tests performed in the fourth quarter of 2022, and the relevant events and circumstances that occurred since those tests were performed including:

- current year financial performance versus the prior year,
- changes in planned capital expenditures,
- the consistency of forecasted free cash flows,
- earnings quality and sustainability,
- changes in market participant discount rates,
- changes in long-term growth rates,
- changes in PPL's market capitalization, and
- the overall economic and regulatory environments in which these regulated entities operate.

Based on these evaluations, management concluded it was not more likely than not that the fair value of these reporting units was less than their carrying value. As such, the step one quantitative impairment test was not performed and no impairment was recognized.

See "Long-Lived and Intangible Assets - Asset Impairment (Excluding Investments)" in Note 1 to the Financial Statements for further discussion of goodwill impairment tests. See Note 17 to the Financial Statements for information on goodwill balances by reportable segment at December 31, 2024.

Asset Retirement Obligations *(LG&E and KU)*

ARO liabilities are required to be recognized for legal obligations associated with the retirement of long-lived assets. Initial obligations are measured at estimated fair value. An ARO must be recognized when incurred if the fair value of the ARO can be reasonably estimated. An equivalent amount is recorded as an increase in the value of the capitalized asset and amortized to expense, regulatory assets or regulatory liabilities over the asset's useful life.

In determining AROs, management must make significant judgments and estimates to calculate fair value. Fair value is developed using an expected present value technique based on assumptions of market participants that consider estimated retirement costs in current period dollars, inflated to the anticipated retirement date and discounted back to the date the ARO was incurred. Changes in assumptions and estimates included within the calculations of the fair value of AROs could result in significantly different results than those identified and recorded in the financial statements. Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the ARO estimate. Any change to the capitalized asset is generally amortized over the remaining life of the associated long-lived asset.

See "Long-Lived and Intangible Assets - Asset Retirement Obligations" in Note 1, Note 7 and Note 18 to the Financial Statements for additional information on AROs.

At December 31, 2024, the total recorded balances and information on the most significant recorded AROs were as follows.

		Most Significant AROs		
	Total ARO Recorded	Amount Recorded	% of Total	Description
LG&E	$ 84	$ 63	75	Ponds, landfills and natural gas mains
KU	64	35	55	Ponds and landfills

The most significant assumptions surrounding AROs are the forecasted retirement costs (including settlement dates and the timing of cash flows), discount and inflation rates. At December 31, 2024, a 10% increase to retirement cost would increase these ARO liabilities by $8 million at LG&E and $8 million at KU. A 0.25% decrease in the discount rate would increase these ARO liabilities by $5 million at LG&E and $1 million at KU and a 0.25% increase in the inflation rate would increase these ARO liabilities by $4 million at LG&E. There would be no significant change to the annual depreciation expense of the ARO asset or the annual accretion expense of the ARO liability as a result of these changes in assumptions.

Revenue Recognition - Unbilled Revenues *(PPL, LG&E and KU)*

For RIE, LG&E and KU, revenues related to the sale of energy are recorded when service is rendered or when energy is delivered to customers. Because customers are billed on cycles which vary based on the timing of actual meter reads taken throughout the month, estimates are recorded for unbilled revenues at the end of each reporting period. Such unbilled revenue amounts reflect estimates of deliveries to customers since the date of the last reading of their meters. The unbilled revenue

estimates reflect consideration of factors including daily load models, estimated usage for each customer class, the effect of current and different rate schedules, the meter read schedule, the billing schedule, actual weather data, and, where applicable, the impact of weather normalization or other regulatory provisions of rate structures.

Other Information *(All Registrants)*

PPL's Audit Committee has approved the independent auditor to provide audit and audit-related services, tax services and other services permitted by Sarbanes-Oxley and SEC rules. The audit and audit-related services include services in connection with statutory and regulatory filings, reviews of offering documents and registration statements, and internal control reviews.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

Reference is made to "Risk Management" for the Registrants in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations."

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareowners and the Board of Directors of PPL Corporation

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of PPL Corporation and subsidiaries (the "Company") as of December 31, 2024 and 2023, the related consolidated statements of income, comprehensive income, equity, and cash flows, for each of the three years in the period ended December 31, 2024, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 13, 2025, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Regulatory Assets and Liabilities– Impact of Rate-Regulation on Regulatory Assets and Liabilities and Related Disclosures – Refer to Notes 1 and 7 to the financial statements

Critical Audit Matter Description

As discussed in Note 1 to the financial statements, the Company owns and operates four cost-based rate-regulated utilities for which rates are set by regulatory commissions to enable the regulated utility to recover the costs of providing electric or gas service, as applicable, and to provide a reasonable return to shareholders. As a result, the financial statements are subject to the accounting for certain types of regulation as prescribed by generally accepted accounting principles and reflect the effects of regulatory actions.

Regulatory assets are recognized for the effect of transactions or events where future recovery of underlying costs is probable in regulated customer rates. The effect of such accounting is to defer certain or qualifying costs that would otherwise currently be charged to expense. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. The accounting for regulatory assets and regulatory liabilities is based on specific rate orders or, in certain

cases, regulatory commission precedent for transactions or events. While the Company has indicated that it expects to recover costs from customers through regulated rates, there is a risk that the regulatory commissions will not approve full recovery of and return on such costs or approve recovery on a timely basis in future regulatory decisions.

We identified the impact of rate regulation as a critical audit matter due to the significant judgments made by management in continually assessing whether the regulatory assets and liabilities are probable of future recovery or refund by considering factors such as changes in the applicable regulatory environments, the ability to recover costs through regulated rates, and recent rate orders. Auditing these judgments required specialized knowledge of accounting for rate regulation due to its inherent complexities.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the uncertainty of future decisions by regulatory commissions included the following, among others:

- We tested the effectiveness of management's internal controls over evaluating the likelihood of recovery or refund in future rates of costs deferred as regulatory assets and liabilities. We tested the effectiveness of management's internal controls over the recognition of amounts as regulatory assets or liabilities and the monitoring and evaluation of regulatory developments that may affect the likelihood of recovering costs in future rates or of a future reduction in rates.

- We obtained and read relevant regulatory orders issued by the regulatory commissions for the Company and other publicly available information to assess the likelihood of recovery in future rates or of a future reduction in rates based on precedents of the treatment of similar costs under similar circumstances.

- We evaluated the Company's disclosures related to the impacts of rate-regulation, including the balances recorded and regulatory developments.

1. Summary of Significant Accounting Policies

(All Registrants)

General

Capitalized terms and abbreviations appearing in the combined notes to financial statements are defined in the glossary. Dollars are in millions, except per share data, unless otherwise noted. The specific Registrant to which disclosures are applicable is identified in parenthetical headings in italics above the applicable disclosure or within the applicable disclosure for each Registrants' related activities and disclosures. Within combined disclosures, amounts are disclosed for any Registrant when significant.

Business and Consolidation

(PPL)

PPL is a utility holding company that, through its regulated subsidiaries, is primarily engaged in: 1) the generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas, primarily in Kentucky; 2) the transmission, distribution and sale of electricity in Pennsylvania; and 3) the transmission, distribution and sale of electricity and the distribution and sale of natural gas in Rhode Island. Headquartered in Allentown, PA, PPL's principal subsidiaries are LG&E, KU, RIE and PPL Electric. PPL's corporate level financing subsidiary is PPL Capital Funding.

On March 17, 2021, PPL WPD Limited entered into a share purchase agreement to sell PPL's U.K. utility business, which prior to its sale substantially represented PPL's U.K. Regulated segment, to a subsidiary of National Grid plc. The sale was completed on June 14, 2021. The results of operations of the U.K. utility business are classified as Discontinued Operations on PPL's Statements of Income for 2022. PPL has elected to separately report the cash flows of continuing and discontinued operations on the Statements of Cash Flows for 2022. Unless otherwise noted, the notes to these financial statements exclude amounts related to discontinued operations. See Note 9 for additional information.

On May 25, 2022, PPL Rhode Island Holdings, a wholly-owned subsidiary of PPL, acquired 100% of the outstanding shares of common stock of Narragansett Electric from National Grid U.S., a subsidiary of National Grid plc. Narragansett Electric, whose service area covers substantially all of Rhode Island, is primarily engaged in the transmission, distribution and sale of electricity and the distribution and sale of natural gas. The results of Narragansett Electric are included in the consolidated results of PPL from the date of the acquisition. Following the closing of the acquisition, Narragansett Electric provides services doing business under the name Rhode Island Energy (RIE). See Note 9 for additional information.

(PPL and PPL Electric)

PPL Electric's principal business is the transmission and distribution of electricity to serve retail customers in its franchised territory in eastern and central Pennsylvania and the regulated supply of electricity to retail customers in that territory as a PLR.

(PPL, LG&E and KU)

LG&E and KU are engaged in the generation, transmission, distribution and sale of electricity. LG&E also engages in the distribution and sale of natural gas. LG&E and KU maintain their separate identities and serve customers in Kentucky under their respective names. KU also serves customers in Virginia under the Old Dominion Power name.

(All Registrants)

The financial statements of the Registrants include each company's own accounts as well as the accounts of all entities in which the company has a controlling financial interest. Entities for which a controlling financial interest is not demonstrated through voting interests are evaluated based on accounting guidance for Variable Interest Entities (VIEs). The Registrants consolidate a VIE when they are determined to have a controlling interest in the VIE and, as a result, are the primary beneficiary of the entity. Amounts consolidated under the VIE guidance are not material to the Registrants.

All significant intercompany transactions have been eliminated.

The financial statements of PPL, LG&E and KU include their share of any undivided interests in jointly owned facilities, as well as their share of the related operating costs of those facilities. See Note 11 for additional information.

Regulation

(All Registrants)

PPL Electric, RIE, LG&E and KU are cost-based rate-regulated utilities for which rates are set by regulators to enable PPL Electric, RIE, LG&E and KU to recover the costs of providing electric or gas service, as applicable, and to provide a reasonable return to shareholders. Base rates are generally established based on a future test period. As a result, the financial statements are subject to the accounting for certain types of regulation as prescribed by GAAP and reflect the effects of regulatory actions. Regulatory assets are recognized for the effect of transactions or events where future recovery of underlying costs is probable in regulated customer rates. The effect of such accounting is to defer certain or qualifying costs that would otherwise currently be charged to expense. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover expected future costs, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and regulatory liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC or the applicable state regulatory commissions. See Note 7 for additional details regarding regulatory matters.

Accounting Records

The system of accounts for regulated entities is maintained in accordance with the Uniform System of Accounts prescribed by the FERC and adopted by the applicable state regulatory commissions.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Loss Accruals

Potential losses are accrued when (1) information is available that indicates it is "probable" that a loss has been incurred, given the likelihood of uncertain future events and (2) the amount of loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." The Registrants continuously assess potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events. Loss accruals for environmental remediation are discounted when appropriate.

The accrual of contingencies that might result in gains is not recorded, unless realization is assured.

Earnings Per Share *(PPL)*

EPS is computed using the two-class method, which is an earnings allocation method for computing EPS that treats a participating security as having rights to earnings that would otherwise have been available to common shareowners. Share-based payment awards that provide recipients a non-forfeitable right to dividends or dividend equivalents are considered participating securities.

Price Risk Management

(All Registrants)

Interest rate contracts are used to hedge exposure to changes in the fair value of debt instruments and to hedge exposure to variability in expected cash flows associated with existing floating-rate debt instruments or forecasted fixed-rate issuances of debt. Derivative instruments pursuant to regulator approved plans to manage commodity price risk associated with natural gas purchases to reduce fluctuations in natural gas prices and costs associated with these derivatives instruments are generally recoverable through approved cost recovery mechanism. Similar derivatives may receive different accounting treatment, depending on management's intended use and documentation.

Certain contracts may not meet the definition of a derivative because they lack a notional amount or a net settlement provision. In cases where there is no net settlement provision, markets are periodically assessed to determine whether market mechanisms have evolved to facilitate net settlement. Certain derivative contracts may be excluded from the requirements of derivative accounting treatment because NPNS has been elected. These contracts are accounted for using accrual accounting. Contracts that have been classified as derivative contracts are reflected on the balance sheets at fair value.

Cash inflows and outflows related to derivative instruments are included as a component of operating, investing or financing activities on the Statements of Cash Flows, depending on the classification of the hedged items.

PPL and its subsidiaries have elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

Derivative transactions may be marked to fair value through regulatory assets/liabilities at PPL Electric, RIE, LG&E and KU, if approved by the appropriate regulatory body. These transactions generally include the effect of interest rate swaps or commodity gas contracts that are included in customer rates.

See Notes 15 and 16 for additional information on derivatives.

(PPL and PPL Electric)

To meet their obligations as last resort providers of electricity supply to their customers, PPL Electric and RIE have entered into certain contracts that meet the definition of a derivative. However, NPNS has been elected for these contracts.

Revenue *(All Registrants)*

Operating revenues are primarily recorded based on energy deliveries through the end of each calendar month. Unbilled retail revenues result because customers' bills are rendered throughout the month, rather than at the end of the month. For RIE, LG&E and KU, unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh or Mcf by the estimated average price per kWh or Mcf. Any difference between estimated and actual revenues is adjusted the following month when the previous unbilled estimate is reversed and actual billings occur. For PPL Electric, unbilled revenues for a month are calculated by multiplying the actual unbilled volumes by the applicable tariff price.

PPL Electric's, RIE's, LG&E's and KU's base rates are determined based on cost of service. Some regulators have also authorized the use of additional alternative revenue programs, which enable PPL Electric, RIE, LG&E and KU to adjust future rates based on past activities or completed events. Revenues from alternative revenue programs are recognized when the specific events permitting future billings have occurred. Revenues from alternative revenue programs are required to be presented separately from revenues from contracts with customers. These amounts are, however, presented as revenues from contracts with customers, with an offsetting adjustment to alternative revenue program revenue, when they are billed to customers in future periods. See Note 3 for additional information.

Financing and Other Receivables

(All Registrants)

Accounts receivable are reported on the Balance Sheets at the gross outstanding amount adjusted for an allowance for doubtful accounts. Financing receivables include accounts receivable, with the exception of those items within accounts receivable that are not subject to the current expected credit loss model.

Financing receivable collectability is evaluated using a current expected credit loss model, consisting of a combination of factors, including past due status based on contractual terms, trends in write-offs and the age of the receivable. Specific events, such as bankruptcies, are also considered when applicable. The Registrants also evaluate the impact of observable external factors on the collectability of the financing receivables to determine if adjustments to the allowance for doubtful accounts should be made based on current conditions or reasonable and supportable forecasts. Adjustments to the allowance for doubtful accounts are made based on the results of these analyses. Accounts receivable are written off in the period in which the receivable is deemed uncollectible.

PPL Electric, RIE, LG&E and KU have identified one class of financing receivables, “accounts receivable - customer”, which includes financing receivables for all billed and unbilled sales with customers. All other financing receivables are classified as other.

The changes in the allowance for doubtful accounts are included in the following table. Amounts relate to financing receivables, except as noted.

	Balance at Beginning of Period	Additions Charged to Income	Deductions (a)	Balance at End of Period	
PPL					
2024	$ 130	$ 109	$ 85	$ 154	(c)
2023	95	87	52	130	(c)
2022	69	78	52	95	(c)
PPL Electric					
2024	$ 50	$ 56	$ 65	$ 41	(b)
2023	33	52	35	50	(b)
2022	35	27	29	33	(b)
LG&E					
2024	$ 6	$ 4	$ 7	$ 3	
2023	4	4	2	6	
2022	3	6	5	4	

	Balance at Beginning of Period	Additions Charged to Income	Deductions (a)	Balance at End of Period
KU				
2024	$ 2	$ 4	$ 4	$ 2
2023	3	3	4	2
2022	3	6	6	3

(a) Primarily related to uncollectible accounts written off.
(b) Includes $2 million, $3 million and $3 million related to other accounts receivable at December 31, 2024, 2023 and 2022.
(c) Includes $39 million, $41 million and $36 million related to other accounts receivable at December 31, 2024, 2023 and 2022.

Cash

(All Registrants)

Cash Equivalents

All highly liquid investments with original maturities of three months or less are considered to be cash equivalents.

(PPL, LG&E and KU)

Restricted Cash and Cash Equivalents

Bank deposits and other cash equivalents that are restricted by agreement or that have been clearly designated for a specific purpose are classified as restricted cash and cash equivalents. On the Balance Sheets, the current portion of restricted cash and cash equivalents is included in "Other current assets," while the noncurrent portion is included in "Other noncurrent assets." See Note 15 for a reconciliation of Cash, Cash Equivalents and Restricted Cash reported within the Balance Sheets to the amounts shown on the Statements of Cash Flows.

(All Registrants)

Fair Value Measurements

The Registrants value certain financial and nonfinancial assets and liabilities at fair value. Generally, the most significant fair value measurements relate to price risk management assets and liabilities, investments in securities in defined benefit plans, and cash and cash equivalents. PPL and its subsidiaries use, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models) and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

The Registrants classify fair value measurements within one of three levels in the fair value hierarchy. The level assigned to a fair value measurement is based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are as follows:

- **Level 1** - quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date. Active markets are those in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- **Level 2** - inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for substantially the full term of the asset or liability.
- **Level 3** - unobservable inputs that management believes are predicated on the assumptions market participants would use to measure the asset or liability at fair value.

Assessing the significance of a particular input requires judgment that considers factors specific to the asset or liability. As such, the Registrants' assessment of the significance of a particular input may affect how the assets and liabilities are classified within the fair value hierarchy.

Investments

Generally, the original maturity date of an investment and management's intent and ability to sell an investment prior to its original maturity determine the classification of investments as either short-term or long-term. Investments that would otherwise be classified as short-term, but are restricted as to withdrawal or use for other than current operations or are clearly designated for expenditure in the acquisition or construction of noncurrent assets or for the liquidation of long-term debts, are classified as long-term.

Investments in entities in which a company has the ability to exercise significant influence but does not have a controlling financial interest are accounted for under the equity method. All other investments are carried at cost or fair value. These investments are included in "Other noncurrent assets" on the Balance Sheets. Earnings from these investments are recorded in "Other Income (Expense) - net" on the Statements of Income.

Short-term investments generally include certain deposits as well as securities that are considered highly liquid or provide for periodic reset of interest rates. Investments with original maturities greater than three months and less than a year, as well as investments with original maturities of greater than a year that management has the ability and intent to sell within a year, are included in "Other current assets" on the Balance Sheets.

Long-Lived and Intangible Assets

Property, Plant and Equipment

PP&E is recorded at original cost, unless impaired. If impaired, the asset is written down to fair value at that time, which becomes the new cost basis of the asset. PP&E acquired in business combinations is recorded at fair value at the time of acquisition. Original cost for constructed assets includes material, labor, contractor costs, certain overheads and financing costs, where applicable. Included in PP&E are capitalized costs of software projects that were developed or obtained for internal use. The cost of repairs and minor replacements are charged to expense as incurred. The Registrants record costs associated with planned major maintenance projects in the period in which work is performed and costs are incurred.

AFUDC is capitalized at PPL Electric and RIE as part of the construction costs for cost-based rate-regulated projects for which a return on such costs is recovered after the project is placed in service. AFUDC is capitalized at LG&E and KU for certain projects as part of the construction cost of approved projects. LG&E and KU are generally provided a return on construction work in progress for other projects. The debt component of AFUDC is credited to "Interest Expense" and the equity component is credited to "Other Income (Expense) - net" on the Statements of Income.

The Registrants capitalize interest costs as part of construction costs. Capitalized interest, including the debt component of AFUDC, for the years ended December 31 is as follows:

	2024	2023	2022
PPL	$ 20	$ 12	$ 7
PPL Electric	9	7	5
LG&E	3	1	—
KU	4	1	—

Depreciation

Depreciation is recorded over the estimated useful lives of property using various methods including the straight-line, composite and group methods. When a component of PP&E that was depreciated under the composite or group method is retired, the original cost is charged to accumulated depreciation. When all or a significant portion of an operating unit that was depreciated under the composite or group method is retired or sold, the property and the related accumulated depreciation account is reduced and any gain or loss is included in income, unless otherwise required by regulators. RIE, LG&E and KU accrue costs of removal net of estimated salvage value through depreciation, which is included in the calculation of customer rates over the assets' depreciable lives in accordance with regulatory practices. Cost of removal amounts accrued through depreciation rates are accumulated as a regulatory liability until the removal costs are incurred. For LG&E and KU, all ARO depreciation expenses are reclassified to a regulatory asset or regulatory liability. See "Asset Retirement Obligations" below

and Note 7 for additional information. PPL Electric records net costs of removal when incurred as a regulatory asset. The regulatory asset is subsequently amortized through depreciation over a five-year period, which is recoverable in customer rates in accordance with regulatory practices.

Following are the weighted-average annual rates of depreciation, for regulated utility plant, for the years ended December 31:

	2024	2023	2022
PPL	3.20 %	3.26 %	3.21 %
PPL Electric	2.52 %	2.62 %	2.75 %
LG&E	4.02 %	4.00 %	4.16 %
KU	3.86 %	3.95 %	4.01 %

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price paid over the fair value of the identifiable net assets acquired in a business combination.

Other acquired intangible assets are initially measured based on their fair value. Intangibles that have finite useful lives are amortized over their useful lives based upon the pattern in which the economic benefits of the intangible assets are consumed or otherwise used. Costs incurred to obtain, renew or extend terms of an intangible asset are capitalized.

When determining the useful life of an intangible asset, including intangible assets that are renewed or extended, PPL and its subsidiaries consider:

- the expected use of the asset;
- the expected useful life of other assets to which the useful life of the intangible asset may relate;
- legal, regulatory, or contractual provisions that may limit the useful life;
- the company's historical experience as evidence of its ability to support renewal or extension;
- the effects of obsolescence, demand, competition, and other economic factors; and,
- the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

Asset Impairment (Excluding Investments)

The Registrants review long-lived assets that are subject to depreciation or amortization, including finite-lived intangibles, for impairment when events or circumstances indicate carrying amounts may not be recoverable.

A long-lived asset classified as held and used is impaired when the carrying amount of the asset exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If impaired, the asset's carrying value is written down to its fair value.

A long-lived asset classified as held for sale is impaired when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If impaired, the asset's (disposal group's) carrying value is written down to its fair value less cost to sell.

PPL, LG&E and KU review goodwill for impairment at the reporting unit level annually or more frequently when events or circumstances indicate that the carrying amount of a reporting unit may be greater than the unit's fair value. Additionally, goodwill must be tested for impairment in circumstances when a portion of goodwill has been allocated to a business to be disposed. PPL's, LG&E's and KU's reporting units are primarily at the operating segment level.

Goodwill recognized upon the acquisition of Narragansett Electric was assigned for impairment testing by PPL to its reporting units expected to benefit from the acquisition, which were the Rhode Island Regulated reporting unit, the Pennsylvania Regulated reporting unit and the Kentucky Regulated reporting unit. See Note 9 for additional information regarding the acquisition.

PPL, for its reporting units, and individually, LG&E and KU, may elect either to initially make a qualitative evaluation about the likelihood of an impairment of goodwill or to bypass the qualitative evaluation and test goodwill for impairment using a quantitative test. If the qualitative evaluation (referred to as step zero) is elected and the assessment results in a determination that it is not more likely than not that the fair value of a reporting unit is less than the carrying amount, the quantitative impairment test is not necessary. However, the quantitative impairment test is required if management concludes it is more likely than not that the fair value of a reporting unit is less than the carrying amount based on the step zero assessment. If the

carrying amount of the reporting unit, including goodwill, exceeds its fair value, an impairment loss is recognized in an amount equal to that excess, limited to the total amount of goodwill allocated to that reporting unit.

As of October 1, 2024, PPL, for its reporting units, and individually, LG&E and KU, elected to perform the qualitative step zero evaluation of goodwill. These evaluations considered the excess of fair value over the carrying value of each reporting unit that was calculated during step one of the quantitative impairment tests performed in the fourth quarter of 2022, and the relevant events and circumstances that occurred since those tests were performed including:

- current year financial performance versus the prior year,
- changes in planned capital expenditures,
- the consistency of forecasted free cash flows,
- earnings quality and sustainability,
- changes in market participant discount rates,
- changes in long-term growth rates,
- changes in PPL's market capitalization, and
- the overall economic and regulatory environments in which these regulated entities operate.

Based on these evaluations, management concluded it was not more likely than not that the fair value of these reporting units was less than their carrying value. As such, the step one quantitative impairment test was not performed and no impairment was recognized.

(*PPL, LG&E and KU*)

Asset Retirement Obligations

PPL and its subsidiaries record liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with an increase in the value of the capitalized asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased through the recognition of accretion expense classified within "Other operation and maintenance" on the Statements of Income to reflect changes in the obligation due to the passage of time. For LG&E and KU, all ARO accretion and depreciation expenses are reclassified as a regulatory asset or regulatory liability. ARO regulatory assets associated with certain CCR projects are amortized to expense in accordance with regulatory approvals. For other AROs, deferred accretion and depreciation expense is recovered through cost of removal.

Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is generally amortized over the remaining life of the associated long-lived asset. See Note 7 and Note 18 for additional information on AROs.

Compensation and Benefits

Defined Benefits *(All Registrants)*

Certain PPL subsidiaries sponsor various defined benefit pension and other postretirement plans. An asset or liability is recorded to recognize the funded status of all defined benefit plans with an offsetting entry to AOCI or, for LG&E, KU, RIE and PPL Electric, to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets.

The expected return on plan assets is determined based on a market-related value of plan assets, which is calculated by rolling forward the prior year market-related value with contributions, disbursements and long-term expected return on investments. One-fifth of the difference between the actual value and the expected value is added (or subtracted if negative) to the expected value to determine the new market-related value.

PPL and its subsidiaries, excluding RIE, use an accelerated amortization method for the recognition of gains and losses for its defined benefit pension plans. Under the accelerated method, actuarial gains and losses in excess of 30% of the plan's projected benefit obligation are amortized on a straight-line basis over one-half of the required amortization period. Actuarial gains and losses in excess of 10% of the greater of the plan's projected benefit obligation or the market-related value of plan assets and less than 30% of the plan's projected benefit obligation are amortized on a straight-line basis over the full required amortization

period. RIE uses the standard amortization method under GAAP for recognition of gains and losses for its defined benefit pension plan.

See Note 7 for a discussion of the regulatory treatment of defined benefit costs and Note 10 for a discussion of defined benefits.

Stock-Based Compensation *(PPL)*

PPL has several stock-based compensation plans for purposes of granting stock options, restricted stock, restricted stock units and performance units to certain employees as well as stock units and restricted stock units to directors. PPL grants most stock-based compensation awards in the first quarter of each year. PPL recognizes compensation expense for stock-based compensation awards based on the fair value method. Forfeitures of awards are recognized when they occur. All awards are recorded as equity or a liability on the Balance Sheets. Stock-based compensation expense is primarily included in "Other operation and maintenance" on the Statements of Income.

Taxes

Income Taxes

(All Registrants)

PPL and its domestic subsidiaries file a consolidated U.S. federal income tax return.

Significant management judgment is required in developing the Registrants' provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken on tax returns and valuation allowances on deferred tax assets.

The Registrants use a two-step process to evaluate uncertain tax positions. The first step requires an entity to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires an entity to recognize in its financial statements the amount of the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization upon settlement that exceeds 50%. Unrecognized tax benefits are classified as current to the extent management expects to settle the uncertain tax position by payment or receipt of cash within one year of the reporting date. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements of the Registrants in future periods. At December 31, 2024, no significant changes in unrecognized tax benefits were projected over the next 12 months.

Deferred income taxes reflect the net future tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes, as well as the tax effects of net operating losses and tax credit carryforwards.

The Registrants record valuation allowances to reduce deferred income tax assets to the amounts that are more-likely-than-not to be realized. The need for valuation allowances requires significant management judgment. If the Registrants determine that they are able to realize deferred tax assets in the future in excess of recorded net deferred tax assets, adjustments to the valuation allowances increase income by reducing tax expense in the period that such determination is made. Likewise, if the Registrants determine that they are not able to realize all or part of net deferred tax assets in the future, adjustments to the valuation allowances would decrease income by increasing tax expense in the period that such determination is made. The amount of deferred tax assets ultimately realized may differ materially from the estimates utilized in the computation of valuation allowances and may materially impact the financial statements in the future.

The Registrants defer investment tax credits when the credits are generated and amortize the deferred amounts over the average lives of the related assets. With respect to acquired renewable tax credits, pursuant to the IRA, any benefit is recognized in the period the credits can be utilized.

The Registrants recognize tax-related interest and penalties in "Income Taxes" on their Statements of Income.

The Registrants use the portfolio approach method of accounting for deferred taxes related to pre-tax OCI transactions. The portfolio approach involves a strict period-by-period cumulative incremental allocation of income taxes to the change in income and losses reflected in OCI. Under this approach, the net cumulative tax effect is ignored. The net change in unrealized gains

and losses recorded in AOCI under this approach would be eliminated only on the date the investment portfolio is classified as held for sale or is liquidated.

See Note 6 to the Financial Statements for income tax disclosures.

The provision for the Registrants' deferred income taxes related to regulatory assets and liabilities is based upon the ratemaking principles reflected in rates established by relevant regulators. The difference in the provision for deferred income taxes for regulatory assets and liabilities and the amount that otherwise would be recorded under GAAP is deferred and included on the Balance Sheets in noncurrent "Regulatory assets" or "Regulatory liabilities."

(PPL Electric, LG&E and KU)

The income tax provision for PPL Electric, LG&E and KU is calculated in accordance with an intercompany tax sharing agreement, which provides that taxable income be calculated as if PPL Electric, LG&E, KU and any domestic subsidiaries each filed a separate return. Tax benefits are not shared between companies. The entity that generates a tax benefit is the entity that is entitled to the tax benefit. The effect of PPL filing a consolidated tax return is taken into account in the settlement of current taxes and the recognition of deferred taxes.

At December 31, the following intercompany tax receivables (payables) were recorded:

	2024	2023
PPL Electric	$ (2)	$ (21)
LG&E	(2)	(5)
KU	(5)	(3)

Taxes, Other Than Income *(All Registrants)*

The Registrants present sales taxes in "Other current liabilities" on the Balance Sheets. These taxes are not reflected on the Statements of Income. See Note 6 for details of taxes included in "Taxes, other than income" on the Statements of Income.

Other

(All Registrants)

Fuel, Materials and Supplies

Fuel, natural gas stored underground and materials and supplies are valued using the average cost method. Fuel costs for electricity generation are charged to expense as used. For RIE, natural gas supply costs are charged to expense when delivered to customers. For LG&E, natural gas supply costs are charged to expense as delivered to the distribution system. See Note 7 for further discussion of the fuel adjustment clauses and gas supply clause.

"Fuel, materials and supplies" on the Balance Sheets consisted of the following at December 31:

	2024			
	PPL	PPL Electric	LG&E	KU
Fuel	$ 153	$ —	$ 64	$ 89
Natural gas stored underground	49	—	29	—
Materials and supplies	309	104	64	84
Total	$ 511	$ 104	$ 157	$ 173

	2023			
	PPL	PPL Electric	LG&E	KU
Fuel	$ 144	$ —	$ 50	$ 94
Natural gas stored underground	58	—	34	—
Materials and supplies	303	99	59	91
Total	$ 505	$ 99	$ 143	$ 185

(PPL and PPL Electric)

Renewable Energy Standard Obligation

Purchased Renewable Energy Certificates (RECs) are stated at cost and are used to measure compliance with state renewable energy standards. RECs support new renewable generation standards and are held primarily to be utilized in fulfillment of RIE's and PPL Electric's compliance obligations.

(All Registrants)

Guarantees

Generally, the initial measurement of a guarantee liability is the fair value of the guarantee at its inception. However, there are certain guarantees excluded from the scope of accounting guidance and other guarantees that are not subject to the initial recognition and measurement provisions of accounting guidance that only require disclosure. See Note 12 for further discussion of guarantees.

New Accounting Guidance Adopted *(All Registrants)*

Improvements to Reportable Segment Disclosures

Effective December 31, 2024, the Registrants retrospectively adopted accounting guidance to improve segment disclosures. The guidance requires enhanced disclosures about significant segment expenses. The standard also requires public entities to disclose the title and position of the Chief Operating Decision Maker (CODM) and explain how the CODM uses the reported measure(s) of segment profit or loss in assessing segment performance and deciding how to allocate resources. Certain segment-related disclosures that previously were required only on an annual basis will be required to be disclosed in interim periods. In addition, public entities that have a single reportable segment are now required to provide segment disclosures.

The adoption of this guidance resulted in the Registrants including the required additional disclosures within the notes to the financial statements. See Note 2 for additional information.

2. Segment and Related Information

(PPL)

PPL is organized into three segments, broken down by geographic location: Kentucky Regulated, Pennsylvania Regulated, and Rhode Island Regulated.

The Kentucky Regulated segment consists primarily of the regulated electricity generation, transmission and distribution operations conducted by LG&E and KU, as well as LG&E's regulated transmission, distribution and sale of natural gas.

The Pennsylvania Regulated segment includes the regulated electricity transmission and distribution operations of PPL Electric.

The Rhode Island Regulated segment includes the regulated electricity transmission and distribution and natural gas distribution operations of RIE, which was acquired in May of 2022.

"Corporate and Other" primarily includes corporate level financing costs, certain unallocated corporate costs, and certain non-recoverable costs incurred in conjunction with the acquisition of Rhode Island Energy and the financial results of Safari Energy, prior to its sale on November 1, 2022. "Corporate and Other" is presented to reconcile segment information to PPL's consolidated results and is not a reportable segment.

PPL's CODM is the Corporate Leadership Council (CLC), which is a management committee that is comprised of the Chief Executive Officer, Chief Financial Officer, Chief Operating Officer, Chief Technology Officer, Chief Human Resources Officer and Chief Legal Officer.

The CLC uses financial metrics including segment net income, earnings from ongoing operations, earnings per share and return on equity, as well as various operational metrics to assess segment performance and make investment and resource decisions. Segment net income is the measure of segment profit or loss that most closely aligns with GAAP and is being presented for disclosure purposes.

The tables below provide information about PPL's segments and include the reconciliation to consolidated net income for the year ended December 31, 2024:

	Kentucky Regulated	Pennsylvania Regulated	Rhode Island Regulated	Total
Operating Revenues from external customers (a)	$ 3,562	$ 2,876	$ 2,024	$ 8,462
Reconciliation of revenue				
Corporate and other revenues				—
Total consolidated revenues				$ 8,462
Less:				
Fuel	783	—	—	783
Energy Purchases	176	721	782	1,679
Operation and maintenance	803	705	731	2,239
Depreciation	710	401	165	1,276
Taxes, other than income	99	131	144	374
Other (income) expense - net	(29)	(78)	(24)	(131)
Interest expense	240	246	95	581
Income taxes	160	176	22	358
Segment net income	$ 620	$ 574	$ 109	$ 1,303
Reconciliation of segment profit or loss to consolidated net income				
Corporate and other net loss				(415)
Net Income				$ 888

(a) See Note 1 and Note 3 for additional information on Operating Revenues.

Other information for the segments and reconciliation to PPL's Consolidated results for the year ended December 31, 2024 are as follows:

	Kentucky Regulated	Pennsylvania Regulated	Rhode Island Regulated	Total Segments	Corporate and Other	Consolidated Total
Other Segment Disclosures						
Amortization (a)	$ 24	$ 45	$ 1	$ 70	$ 8	$ 78
Deferred income taxes and investment tax credits (b)	2	129	38	169	27	196
Expenditures for long lived assets	1,088	1,229	495	2,812	(7)	2,805

(a) Represents non-cash expense items that include amortization of operating lease right-of-use assets, regulatory assets and liabilities, debt discounts and premiums and debt issuance costs.
(b) Represents a non-cash expense item that is also included in "Income Taxes."

The tables below provide information about PPL's segments and include the reconciliation to consolidated net income for the year ended December 31, 2023:

	Kentucky Regulated	Pennsylvania Regulated	Rhode Island Regulated	Total
Operating Revenues from external customers (a)	$ 3,452	$ 3,008	$ 1,851	$ 8,311
Reconciliation of revenue				
Corporate and other revenues				1
Total consolidated revenues				$ 8,312

Other information for the segments and reconciliation to PPL's Consolidated results for the year ended December 31, 2022 are as follows:

	Kentucky Regulated	Pennsylvania Regulated	Rhode Island Regulated	Total Segments	Corporate and Other	Consolidated Total
Other Segment Disclosures						
Amortization (a)	$ 23	$ 22	$ 2	$ 47	$ 5	$ 52
Deferred income taxes and investment tax credits (b)	6	91	39	136	43	179
Expenditures for long lived assets	917	889	268	2,074	84	2,158

(a) Represents non-cash expense items that include amortization of operating lease right-of-use assets, regulatory assets and liabilities, debt discounts and premiums and debt issuance costs.
(b) Represents a non-cash expense item that is also included in "Income Taxes."

The following provides Balance Sheet data for the segments and reconciliation to PPL's consolidated results as of:

	As of December 31,	
	2024	2023
Total Assets		
Kentucky Regulated	$ 17,626	$ 17,029
Pennsylvania Regulated	15,475	14,294
Rhode Island Regulated	7,055	6,515
Corporate and Other (a)	913	1,398
Total	$ 41,069	$ 39,236

(a) Primarily consists of unallocated items, including cash, PP&E, goodwill, and the elimination of inter-segment transactions.

(PPL Electric)

PPL Electric has two operating segments, distribution and transmission, which are aggregated into a single reportable segment. PPL Electric's CODM is the President of PPL Electric.

The President uses financial metrics including segment net income, earnings from ongoing operations, earnings per share and return on equity, as well as various operational metrics to assess segment performance and make investment and resource decisions.

The significant segment expenses of and measure of profit and loss for PPL Electric regularly provided to the President are included on the face of PPL Electric's Statements of Income.

The measure of segment assets is reported on PPL Electric's Balance Sheets as total consolidated assets. The measures of significant non-cash segment expenses as well as expenditures for long lived assets are reported on PPL Electric's Statements of Cash Flows.

(LG&E and KU)

Each of LG&E and KU operates as a single operating and reportable segment, and the CODM for each of LG&E and KU is its President.

The President manages LG&E and KU as a single consolidated entity. Financial metrics including net income, earnings from ongoing operations, earnings per share and return on equity, as well as various operational metrics are used to assess segment performance and make investment and resource decisions.

The significant segment expenses of and measure of profit and loss for each of LG&E and KU regularly provided to its President are included on the face of the Statements of Income of LG&E and KU.

The measures of segment assets are reported on the Balance Sheets of LG&E and KU as total assets. The measures of significant non-cash segment expenses as well as expenditures for long lived assets are reported on the Statements of Cash Flows of LG&E and KU.

3. Revenue from Contracts with Customers

(All Registrants)

The following is a description of the principal activities from which the Registrants and PPL's segments generate their revenues.

(PPL and PPL Electric)

Pennsylvania Regulated Segment Revenue

The Pennsylvania Regulated segment generates substantially all of its revenues from contracts with customers from PPL Electric's tariff-based distribution and transmission of electricity.

Distribution Revenue

PPL Electric provides distribution services to residential, commercial, industrial, municipal and governmental end users of energy. PPL Electric satisfies its performance obligation to its distribution customers and revenue is recognized over time as electricity is delivered and simultaneously consumed by the customer. The amount of revenue recognized is the volume of electricity delivered during the period multiplied by the price per tariff, plus a monthly fixed charge. This method of recognition fairly presents PPL Electric's transfer of electric service to the customer as the calculation is based on volumes delivered, and the price per tariff and the monthly fixed charge are set by the PAPUC. Customers are typically billed monthly and outstanding amounts are normally due within 21 days of the date of the bill.

Distribution customers are "at will" customers of PPL Electric with no term contract and no minimum purchase commitment. Performance obligations are limited to the service requested and received to date. Accordingly, there is no unsatisfied performance obligation associated with PPL Electric's retail account contracts.

Certain customers have the option to obtain electricity from other suppliers where PPL Electric facilitates the delivery. In those circumstances, revenue is only recognized for providing delivery of the commodity to the customer.

Transmission Revenue

PPL Electric generates transmission revenues from a FERC-approved PJM Open Access Transmission Tariff. An annual revenue requirement for PPL Electric to provide transmission services is calculated using a formula-based rate. This revenue requirement is converted into a daily rate (dollars per day). PPL Electric satisfies its performance obligation to provide transmission services and revenue is recognized over time as transmission services are provided and consumed. This method of recognition fairly presents PPL Electric's transfer of transmission services as the daily rate is set by a FERC approved formula-based rate. PJM remits payment on a weekly basis.

PPL Electric's agreement to provide transmission services contains no minimum purchase commitment. The performance obligation is limited to the service requested and received to date. Accordingly, PPL Electric has no unsatisfied performance obligations.

(PPL)

Rhode Island Regulated Segment Revenues

The Rhode Island Regulated segment generates substantially all of its revenues from contracts with customers from RIE's regulated tariff-based transmission and distribution of electricity and regulated tariff-based distribution of natural gas.

Distribution Revenue

Distribution revenues are primarily from the sale of electricity, natural gas, and related services to retail customers. Distribution sales are regulated by the RIPUC, which is responsible for approving the rates and other terms of services as part of the rate making process. Natural gas and electric distribution revenues are derived from the regulated sale and distribution of electricity and natural gas to residential, commercial, and industrial customers within RIE's service territory under the tariff rates. The performance obligation related to distribution sales is to provide electricity and natural gas to customers on demand. The

performance obligation is satisfied over time because the customer simultaneously receives and consumes the electricity or natural gas as services are provided. RIE records revenues related to the distribution sales based upon the approved tariff rate and the volume delivered to the customers, which corresponds with the amount RIE has the right to invoice. Customers are typically billed monthly and outstanding amounts are normally due within 21 days of date of the bill.

Distribution revenue also includes estimated unbilled amounts, which represent the estimated amounts due from retail customers as a result of customer's bills rendered throughout the month, rather than bills being rendered at the end of the month. Unbilled revenues are determined based on estimated unbilled sales volumes and then applying tariff rates to those volumes. Any difference between estimated and actual revenues is adjusted the following month when the previous unbilled estimate is reversed and actual billings occur. This method of recognition fairly presents RIE's transfer of electricity and natural gas to the customer as the amount recognized is based on actual and estimated volumes delivered and the tariff rate per unit of energy and any applicable fixed charges or regulatory mechanisms as approved by the respective regulatory body.

Distribution customers are "at will" customers of RIE with no term contract and no minimum purchase commitment. Performance obligations are limited to the service requested and received to date. Accordingly, there is no unsatisfied performance obligation associated with RIE's retail account contracts.

Certain customers have the option to obtain electricity or natural gas from other suppliers where RIE facilitates the delivery. In those circumstances, revenue is only recognized for providing delivery of the commodity to the customer.

Transmission Revenue

RIE’s transmission services are regulated by the FERC and coordinated with ISO – New England (ISO-NE). As of January 1, 2023, RIE is a transmission operator. These revenues arise under tariff/rate agreements and are collected primarily from RIE’s distribution customers. The revenue is recognized over time as transmission services are provided and consumed. This method of recognition fairly presents RIE’s transfer of transmission services as the daily rate is set by a FERC-approved formula-based rate.

RIE's agreement to provide transmission services contains no minimum purchase commitment. The performance obligation is limited to the service requested and received to date. Accordingly, RIE has no unsatisfied performance obligations.

(PPL, LG&E and KU)

Kentucky Regulated Segment Revenue

The Kentucky Regulated Segment generates substantially all of its revenues from contracts with customers from LG&E's and KU's regulated tariff-based sales of electricity and LG&E's regulated tariff-based sales of natural gas.

LG&E and KU are engaged in the generation, transmission, distribution and sale of electricity in Kentucky and, in KU's case, Virginia. LG&E also engages in the distribution and sale of natural gas in Kentucky. Revenue from these activities is generated from tariffs approved by applicable regulatory authorities including the FERC, KPSC and VSCC. LG&E and KU satisfy their performance obligations upon LG&E's and KU's delivery of electricity and LG&E's delivery of natural gas to customers. This revenue is recognized over time as the customer simultaneously receives and consumes the benefits provided by LG&E and KU. The amount of revenue recognized is the billed volume of electricity or natural gas delivered multiplied by a tariff rate per-unit of energy, plus any applicable fixed charges or additional regulatory mechanisms. Customers are billed monthly and outstanding amounts are typically due within 22 days of the date of the bill. Additionally, unbilled revenues are recognized as a result of customers' bills rendered throughout the month, rather than bills being rendered at the end of the month. Unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh or Mcf delivered but not yet billed by the estimated average cents per kWh or Mcf. Any difference between estimated and actual revenues is adjusted the following month when the previous unbilled estimate is reversed and actual billings occur. This method of recognition fairly presents LG&E's and KU's transfer of electricity and LG&E's transfer of natural gas to the customer as the amount recognized is based on actual and estimated volumes delivered and the tariff rate per-unit of energy and any applicable fixed charges or regulatory mechanisms as set by the respective regulatory body.

LG&E's and KU's customers generally have no minimum purchase commitment. Performance obligations are limited to the service requested and received to date. Accordingly, there is no unsatisfied performance obligation associated with these customers.

(All Registrants)

The following table reconciles "Operating Revenues" included in each Registrant's Statement of Income with revenues generated from contracts with customers for the years ended December 31:

	2024			
	PPL	PPL Electric	LG&E	KU
Operating Revenues (a)(b)	$ 8,462	$ 2,876	$ 1,648	$ 1,964
Revenues derived from:				
Alternative revenue programs (c)	5	(19)	13	16
Other (d)	(23)	(15)	(4)	(4)
Revenues from Contracts with Customers	$ 8,444	$ 2,842	$ 1,657	$ 1,976

	2023			
	PPL	PPL Electric	LG&E	KU
Operating Revenues (a)(b)	$ 8,312	$ 3,008	$ 1,613	$ 1,884
Revenues derived from:				
Alternative revenue programs (c)	1	5	(1)	(5)
Other (d)	(23)	(15)	(4)	(4)
Revenues from Contracts with Customers	$ 8,290	$ 2,998	$ 1,608	$ 1,875

	2022			
	PPL	PPL Electric	LG&E	KU
Operating Revenues (a)(b)	$ 7,902	$ 3,030	$ 1,798	$ 2,074
Revenues derived from:				
Alternative revenue programs (c)	(92)	(56)	9	5
Other (d)	(24)	(14)	(6)	(4)
Revenues from Contracts with Customers	$ 7,786	$ 2,960	$ 1,801	$ 2,075

(a) PPL includes $2,024 million, $1,851 million and $1,038 million for the twelve months ended December 31, 2024, 2023, and 2022 of revenues from external customers reported by the Rhode Island Regulated segment. PPL Electric represents revenues from external customers reported by the Pennsylvania Regulated segment and LG&E and KU, net of intercompany power sales and transmission revenues, represent revenues from external customers reported by the Kentucky Regulated segment. See Note 2 for additional information.

(b) PPL's transition services agreement associated with the RIE acquisition ended in the third quarter of 2024. In conjunction with the completion of the agreement, PPL conformed the presentation of RIE's and the Rhode Island Regulated segment's net metering charges with the presentation of the other segments, resulting in an increase in Operating Revenues and a corresponding increase in Energy purchases beginning on January 1, 2024. For the year ended December 31, 2024, net metering of $175 million was included in Energy purchases on PPL's Statement of Income. For the years ended December 31, 2023 and 2022, $146 million and $79 million of net metering was presented as a reduction of Operating Revenues on PPL's Statement of Income.

(c) This line item shows the over/under collection of rate mechanisms deemed alternative revenue programs with over-collections of revenue shown as positive amounts in the table above and under collections as negative amounts.

(d) Represents additional revenues outside the scope of revenues from contracts with customers such as leases and other miscellaneous revenues.

The following table shows revenues from contracts with customers disaggregated by customer class for the years ended December 31:

	Residential	Commercial	Industrial	Other (a)	Wholesale - municipality	Wholesale - other (b)	Transmission	Revenues from Contracts with Customers
PPL								
2024								
PA Regulated	$ 1,502	$ 418	$ 47	$ 57	$ —	$ —	$ 818	$ 2,842
RI Regulated (c)	1,150	593	91	10	—	—	176	2,020
KY Regulated	1,510	1,028	635	323	23	63	—	3,582
Total PPL	$ 4,162	$ 2,039	$ 773	$ 390	$ 23	$ 63	$ 994	$ 8,444

	Residential	Commercial	Industrial	Other (a)	Wholesale - municipality	Wholesale - other (b)	Transmission	Revenues from Contracts with Customers
2023								
PA Regulated	$ 1,649	$ 444	$ 55	$ 54	$ —	$ —	$ 796	$ 2,998
RI Regulated	640	228	20	793	—	—	170	1,851
KY Regulated	1,458	1,001	637	272	22	50	—	3,440
Corp and Other	—	—	—	1	—	—	—	1
Total PPL	$ 3,747	$ 1,673	$ 712	$ 1,120	$ 22	$ 50	$ 966	$ 8,290
2022								
PA Regulated	$ 1,647	$ 491	$ 85	$ 54	$ —	$ —	$ 683	$ 2,960
RI Regulated	299	101	9	478	—	—	101	988
KY Regulated	1,637	1,068	662	323	28	97	—	3,815
Corp and Other	—	—	—	23	—	—	—	23
Total PPL	$ 3,583	$ 1,660	$ 756	$ 878	$ 28	$ 97	$ 784	$ 7,786
PPL Electric								
2024	$ 1,502	$ 418	$ 47	$ 57	$ —	$ —	$ 818	$ 2,842
2023	$ 1,649	$ 444	$ 55	$ 54	$ —	$ —	$ 796	$ 2,998
2022	$ 1,647	$ 491	$ 85	$ 54	$ —	$ —	$ 683	$ 2,960
LG&E								
2024	$ 754	$ 518	$ 188	$ 147	$ —	$ 50	$ —	$ 1,657
2023	$ 751	$ 517	$ 189	$ 104	$ —	$ 47	$ —	$ 1,608
2022	$ 835	$ 551	$ 199	$ 141	$ —	$ 75	$ —	$ 1,801
KU								
2024	$ 756	$ 510	$ 447	$ 176	$ 23	$ 64	$ —	$ 1,976
2023	$ 707	$ 484	$ 448	$ 168	$ 22	$ 46	$ —	$ 1,875
2022	$ 802	$ 517	$ 463	$ 182	$ 28	$ 83	$ —	$ 2,075

(a) Primarily includes revenues from pole attachments, street lighting, other public authorities and other non-core businesses. For the years ended December 31, 2023 and 2022, the Rhode Island Regulated segment primarily includes open access tariff revenues, which are calculated on combined customer classes.

(b) Includes wholesale power and transmission revenues. LG&E and KU amounts include intercompany power sales and transmission revenues, which are eliminated upon consolidation at PPL.

(c) PPL's transition services agreement associated with the RIE acquisition ended in the third quarter of 2024. In conjunction with the completion of the agreement, PPL disaggregated the 2024 revenues of the Rhode Island Regulated segment in a manner consistent with that of its other segments. This resulted in certain customer revenues for the Rhode Island Regulated segment, which were previously presented in the "Other" category, being presented in the "Residential", "Commercial" or "Industrial" customer classes beginning on January 1, 2024. Applying the previous methodology to 2024 revenues would result in $469 million of Residential, $372 million of Commercial and $88 million of Industrial for the Rhode Island Regulated segment being presented as "Other" for the year ended December 31, 2024.

As discussed in Note 2, PPL segments its business by geographic location. Revenues from external customers for each segment/geographic location are reconciled to revenues from contracts with customers in the footnotes to the tables above. PPL Electric's revenues from contracts with customers are further disaggregated by distribution and transmission as indicated in the above tables.

Contract receivables from customers are primarily included in "Accounts receivable - Customer" and "Unbilled revenues" on the Balance Sheets.

The following table shows the accounts receivable and unbilled revenues balances that were impaired for the year ended December 31:

	2024	2023	2022
PPL(a)	$ 103	$ 79	$ 70
PPL Electric	52	47	21
LG&E	4	4	6
KU	4	2	6

(a) Includes $23 million for the twelve months ended December 31, 2022 related to the commitment to forgive customer arrearages for low-income and protected residential customers at RIE. See Note 9 for additional information.

The following table shows the balances and certain activity of contract liabilities resulting from contracts with customers:

	PPL	PPL Electric	LG&E	KU
Contract liabilities as of December 31, 2024	$ 39	$ 28	$ 5	$ 6
Contract liabilities as of December 31, 2023	43	29	6	7
Revenue recognized during the year ended December 31, 2024 that was included in the contract liability balance at December 31, 2023	26	12	6	7
Contract liabilities as of December 31, 2023	$ 43	$ 29	$ 6	$ 7
Contract liabilities as of December 31, 2022	34	23	5	6
Revenue recognized during the year ended December 31, 2023 that was included in the contract liability balance at December 31, 2022	21	10	5	6
Contract liabilities as of December 31, 2022	$ 34	$ 23	$ 5	$ 6
Contract liabilities as of December 31, 2021	42	25	6	6
Revenue recognized during the year ended December 31, 2022 that was included in the contract liability balance at December 31, 2021	25	12	6	6

Contract liabilities result from recording contractual billings in advance for customer attachments to the Registrants' infrastructure and payments received in excess of revenues earned to date. Advanced billings for customer attachments are recognized as revenue ratably over the billing period. Payments received in excess of revenues earned to date are recognized as revenue as services are delivered in subsequent periods.

4. Preferred Securities

(PPL)

PPL is authorized to issue up to 10 million shares of preferred stock. No PPL preferred stock was issued or outstanding in 2024, 2023 or 2022.

(PPL Electric)

PPL Electric is authorized to issue up to 20,629,936 shares of preferred stock. No PPL Electric preferred stock was issued or outstanding in 2024, 2023 or 2022.

(LG&E)

LG&E is authorized to issue up to 1,720,000 shares of preferred stock at a $25 par value and 6,750,000 shares of preferred stock without par value. LG&E had no preferred stock issued or outstanding in 2024, 2023 or 2022.

(KU)

KU is authorized to issue up to 5,300,000 shares of preferred stock and 2,000,000 shares of preference stock without par value. KU had no preferred or preference stock issued or outstanding in 2024, 2023 or 2022.

5. Earnings Per Share

(PPL)

Basic EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of common shares outstanding during the applicable period. Diluted EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of common shares outstanding, increased by the number of incremental shares that would be outstanding if potentially dilutive share-based payment awards were converted to common shares as calculated using the Two-Class Method or Treasury Stock Method. Incremental non-participating securities that have a dilutive impact are detailed in the table below.

Reconciliations of the amounts of income and shares of PPL common stock (in thousands) for the periods ended December 31, used in the EPS calculation are:

	2024	2023	2022
Income (Numerator)			
Income from continuing operations after income taxes	$ 888	$ 740	$ 714
Less amounts allocated to participating securities	2	1	1
Income from continuing operations after income taxes available to PPL common shareowners - Basic and Diluted	$ 886	$ 739	$ 713
Income from discontinued operations (net of income taxes) available to PPL common shareowners - Basic and Diluted	$ —	$ —	$ 42
Net income attributable to PPL	$ 888	$ 740	756
Less amounts allocated to participating securities	2	1	1
Net income available to PPL common shareowners - Basic and Diluted	$ 886	$ 739	$ 755
Shares of Common Stock (Denominator)			
Weighted-average shares - Basic EPS	737,756	737,036	736,027
Add: Dilutive share-based payment awards (a)	2,097	1,130	875
Weighted-average shares - Diluted EPS	739,853	738,166	736,902
Basic EPS			
Available to PPL common shareowners:			
Income from continuing operations after income taxes	$ 1.20	$ 1.00	$ 0.97
Income from discontinued operations (net of income taxes)	—	—	0.06
Net Income available to PPL common shareowners	$ 1.20	$ 1.00	$ 1.03
Diluted EPS			
Available to PPL common shareowners:			
Income from continuing operations after income taxes	$ 1.20	$ 1.00	$ 0.96
Income from discontinued operations (net of income taxes)	—	—	0.06
Net Income available to PPL common shareowners	$ 1.20	$ 1.00	$ 1.02

(a) The Treasury Stock Method was applied to non-participating share-based payment awards.

For the years ended December 31, PPL issued common stock related to stock-based compensation plans as follows (in thousands):

	2024	2023
DRIP	202	—

For the years ended December 31, the following shares (in thousands) were excluded from the computations of diluted EPS because the effect would have been antidilutive:

	2024	2023	2022
Stock-based compensation awards	—	243	93

6. Income and Other Taxes

(PPL)

"Income from Continuing Operations Before Income Taxes" is from domestic operations.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes and the tax effects of net operating loss and tax credit carryforwards. The provision for PPL's deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles of the applicable jurisdiction. See Notes 1 and 7 for additional information.

Net deferred tax assets have been recognized based on management's estimates of future taxable income.

Significant components of PPL's deferred income tax assets and liabilities were as follows:

	2024	2023
Deferred Tax Assets		
Deferred investment tax credits	28	28
Regulatory liabilities	133	123
Income taxes due to customers	418	436
Accrued pension and postretirement costs	112	101
State loss carryforwards	224	253
Federal and state tax credit carryforwards	24	67
Internal Revenue Code Section 197 intangibles	72	78
Contributions in aid of construction	163	149
Bad debt	37	28
Other	114	111
Valuation allowances	(224)	(245)
Total deferred tax assets	1,101	1,129
Deferred Tax Liabilities		
Plant - net	3,898	3,749
Regulatory assets	432	376
Prepayments	39	47
Goodwill	38	22
Other	38	30
Total deferred tax liabilities	4,445	4,224
Net deferred tax liability	$ 3,344	$ 3,095

State deferred taxes are determined by entity and by jurisdiction. As a result, $12 million and $9 million of net deferred tax assets are shown as "Other noncurrent assets" on the Balance Sheets for 2024 and 2023.

At December 31, 2024, PPL had the following loss and tax credit carryforwards, related deferred tax assets and valuation allowances recorded against the deferred tax assets:

	Gross	Deferred Tax Asset	Valuation Allowance	Expiration
Loss and other carryforwards				
State net operating losses	$ 5,011	$ 224	$ (221)	2025-2044
State charitable contributions	10	1	(1)	2025-2029
Foreign capital loss	8	2	(2)	Indefinite

	Gross	Deferred Tax Asset	Valuation Allowance	Expiration
Credit carryforwards				
Federal - other		14	—	2044
State recycling credit		8	—	2028
State - other		2	—	Indefinite

Valuation allowances have been established for the amount that, more likely than not, will not be realized. The changes in deferred tax valuation allowances were as follows:

	Balance at Beginning of Period	Additions: Charged to Income	Additions: Charged to Other Accounts	Deductions	Balance at End of Period
2024	$ 245	$ 3	$ 1	$ 25 (a)	$ 224
2023	213	54 (b)	—	22 (c)	245
2022	462	10	—	259 (d)	213

(a) In 2024, PPL recorded a $23 million decrease in a valuation allowance on a 2004 state net operating loss carryforward that expired in 2024.
(b) PPL has a Pennsylvania net operating loss fully offset by a valuation allowance. In 2023, PPL adjusted the net operating loss and related valuation allowance to be recorded at the current estimate of the applicable rate at which each portion of the net operating loss that will expire and be written off as the rate is reduced annually by one half a percentage point until the rate reaches to 4.99% in 2031.
(c) In 2023, PPL recorded a $22 million decrease in a valuation allowance on a 2003 state net operating loss carryforward that expired in 2023.
(d) In 2022, PPL recorded a $36 million decrease in a valuation allowance on a 2002 state net operating loss carryforward that expired in 2022 and a $213 million decrease in the valuation allowance due to the Pennsylvania rate change. See reconciliation of income tax table below.

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" were as follows:

	2024	2023	2022
Income Tax Expense (Benefit)			
Current - Federal (a)	$ 23	$ (175)	$ (2)
Current - State	9	37	24
Total Current Expense (Benefit)	32	(138)	22
Deferred - Federal (a)	137	286	122
Deferred - State	64	48	68
Total Deferred Expense (Benefit), excluding operating loss carryforwards	201	334	190
Amortization of investment tax credit	(3)	(3)	(3)
Tax expense (benefit) of operating loss carryforwards			
Deferred - Federal	1	3	2
Deferred - State	(3)	(12)	(10)
Total Tax Expense (Benefit) of Operating Loss Carryforwards	(2)	(9)	(8)
Total income tax expense (benefit)	$ 228	$ 184	$ 201
Total income tax expense (benefit) - Federal	$ 158	$ 111	$ 119
Total income tax expense (benefit) - State	70	73	82
Total income tax expense (benefit)	$ 228	$ 184	$ 201

(a) In 2023, PPL purchased approximately $300 million of renewable tax credits and recorded a current tax benefit and a deferred tax expense for utilization of approximately $250 million of the credits in 2023 and prior years, per the three-year carry-back rule.

In the table above, the following income tax expense (benefit) are excluded from income taxes:

	2024	2023	2022
Discontinued operations	$ —	$ —	$ (42)
Other comprehensive income	(8)	(14)	11
Valuation allowance recorded to other comprehensive income	—	(1)	—
Total	$ (8)	$ (15)	$ (31)

	2024	2023	2022
Reconciliation of Income Tax Expense (Benefit)			
Federal income tax on Income Before Income Taxes at statutory tax rate - 21%	$ 234	$ 194	$ 192
State income taxes, net of federal income tax benefit	65	58	68
Valuation allowance adjustments (a)	2	12	9
Income tax credits (b)	(8)	(22)	(3)
Utility rate-making tax adjustments (c)	(21)	(10)	(8)
Amortization of excess deferred federal and state income taxes	(45)	(48)	(54)
Other	1	—	(3)
Total increase (decrease)	(6)	(10)	9
Total income tax expense (benefit)	$ 228	$ 184	$ 201
Effective income tax rate	20.4%	19.9%	22.0%

(a) In 2024, 2023, and 2022, PPL recorded deferred income tax expense of $3 million, $11 million and $5 million for valuation allowances primarily related to increased Pennsylvania net operating loss carryforwards expected to be unutilized.
(b) In 2023, PPL purchased approximately $300 million of renewable tax credits and recorded a current tax benefit and a deferred tax expense for utilization of approximately $250 million of the credits in 2023 and prior years, per the three-year carry-back rule.
(c) Primarily consists of tax impacts of AFUDC equity and related depreciation across PPL utilities and flow through tax impacts. Flow through occurs when the regulator excludes deferred tax expense or benefit from recoverable costs when determining income tax expense.

	2024	2023	2022
Taxes, other than income			
State gross earnings and state gross receipts	$ 167	$ 195	$ 175
Property and other	207	197	157
Total	$ 374	$ 392	$ 332

(PPL Electric)

The provision for PPL Electric's deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles reflected in rates established by the PAPUC and the FERC. The difference in the provision for deferred income taxes for regulated assets and liabilities and the amount that otherwise would be recorded under GAAP is deferred and included in "Regulatory assets" or "Regulatory liabilities" on the Balance Sheets.

Significant components of PPL Electric's deferred income tax assets and liabilities were as follows:

	2024	2023
Deferred Tax Assets		
Accrued pension and postretirement costs	$ 36	$ 30
Contributions in aid of construction	120	105
Regulatory liabilities	40	43
Income taxes due to customers	184	191
Other	22	27
Total deferred tax assets	402	396
Deferred Tax Liabilities		
Electric utility plant - net	1,934	1,810
Regulatory assets	160	119
Prepayments	30	36
Other	4	4
Total deferred tax liabilities	2,128	1,969
Net deferred tax liability	$ 1,726	$ 1,573

PPL Electric expects to have adequate levels of taxable income to realize its recorded deferred income tax assets.

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" were as follows:

	2024	2023	2022
Income Tax Expense (Benefit)			
Current - Federal	$ 44	$ 91	$ 63
Current - State	4	31	20
Total Current Expense (Benefit)	48	122	83
Deferred - Federal	86	28	60
Deferred - State	42	18	31
Total Deferred Expense (Benefit), excluding operating loss carryforwards	128	46	91
Total income tax expense (benefit)	$ 176	$ 168	$ 174
Total income tax expense (benefit) - Federal	$ 130	$ 119	$ 123
Total income tax expense (benefit) - State	46	49	51
Total income tax expense (benefit)	$ 176	$ 168	$ 174

	2024	2023	2022
Reconciliation of Income Tax Expense (Benefit)			
Federal income tax on Income Before Income Taxes at statutory tax rate - 21%	$ 158	$ 144	$ 147
Increase (decrease) due to:			
State income taxes, net of federal income tax benefit	47	49	54
Utility rate-making tax adjustments (a)	(16)	(9)	(7)
Amortization of excess deferred federal income taxes (b)	(10)	(11)	(12)
State income tax rate change (c)	—	—	(9)
Other	(3)	(5)	1
Total increase (decrease)	18	24	27
Total income tax expense (benefit)	$ 176	$ 168	$ 174
Effective income tax rate	23.5%	24.5%	24.9%

(a) Primarily consists of tax impacts of AFUDC equity and related depreciation across PPL utilities and flow through tax impacts. Flow through occurs when the regulator excludes deferred tax expense or benefit from recoverable costs when determining income tax expense.

(b) In 2024, 2023, and 2022, PPL Electric recorded lower income tax expense for the amortization of excess deferred taxes that primarily resulted from the U.S. federal corporate income tax rate reduction from 35% to 21% enacted by the TCJA. This amortization represents each year's refund amount, prior to a tax gross-up, to be paid to customers for previously collected deferred taxes at higher income tax rates.

(c) 2022 includes a deferred tax benefit of $9 million due to the corporate net income tax rate reduction.

	2024	2023	2022
Taxes, other than income			
State gross receipts	$ 122	$ 136	$ 142
Property and other	9	7	7
Total	$ 131	$ 143	$ 149

(LG&E)

The provision for LG&E's deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles reflected in rates established by the KPSC and the FERC. The difference in the provision for deferred income taxes for regulated assets and liabilities and the amount that otherwise would be recorded under GAAP is deferred and included in "Regulatory assets" or "Regulatory liabilities" on the Balance Sheets.

Significant components of LG&E's deferred income tax assets and liabilities were as follows:

	2024	2023
Deferred Tax Assets		
Contributions in aid of construction	$ 18	$ 18
Regulatory liabilities	18	19
Accrued pension and postretirement costs	4	3
Deferred investment tax credits	7	8
Income taxes due to customers	110	115
State tax credit carryforwards	6	8
Lease liabilities	4	4
Valuation allowances	(6)	(8)
Other	6	8
Total deferred tax assets	167	175
Deferred Tax Liabilities		
Plant - net	875	877
Regulatory assets	88	67
Lease right-of-use assets	4	3
Other	3	4
Total deferred tax liabilities	970	951
Net deferred tax liability	$ 803	$ 776

At December 31, 2024, LG&E had $6 million of state credit carryforwards that expire in 2028 and a $6 million valuation allowance related to state credit carryforwards due to insufficient projected Kentucky taxable income.

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" were:

	2024	2023	2022
Income Tax Expense (Benefit)			
Current - Federal	$ 60	$ 70	$ 60
Current - State	11	13	9
Total Current Expense (Benefit)	71	83	69
Deferred - Federal	1	(15)	(10)
Deferred - State	6	2	5
Total Deferred Expense (Benefit)	7	(13)	(5)
Amortization of investment tax credit - Federal	(1)	(1)	(1)
Total income tax expense (benefit)	$ 77	$ 69	$ 63
Total income tax expense (benefit) - Federal	$ 60	$ 54	$ 49
Total income tax expense (benefit) - State	17	15	14
Total income tax expense (benefit)	$ 77	$ 69	$ 63

	2024	2023	2022
Reconciliation of Income Tax Expense (Benefit)			
Federal income tax on Income Before Income Taxes at statutory tax rate - 21%	$ 79	$ 70	$ 70
Increase (decrease) due to:			
State income taxes, net of federal income tax benefit	14	13	13
Amortization of excess deferred federal and state income taxes	(13)	(13)	(18)
Other	(3)	(1)	(2)
Total increase (decrease)	(2)	(1)	(7)
Total income tax expense (benefit)	$ 77	$ 69	$ 63
Effective income tax rate	20.6%	20.6%	18.8%

	2024	2023	2022
Taxes, other than income			
Property and other	$ 49	$ 48	$ 48
Total	$ 49	$ 48	$ 48

(KU)

The provision for KU's deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles reflected in rates established by the KPSC, the VSCC and the FERC. The difference in the provision for deferred income taxes for regulated assets and liabilities and the amount that otherwise would be recorded under GAAP is deferred and included in "Regulatory assets" or "Regulatory liabilities" on the Balance Sheets.

Significant components of KU's deferred income tax assets and liabilities were as follows:

	2024	2023
Deferred Tax Assets		
Contributions in aid of construction	$ 12	$ 10
Regulatory liabilities	29	23
Deferred investment tax credits	20	21
Income taxes due to customers	124	131
State tax credit carryforwards	4	4
Lease liabilities	6	5
Valuation allowances	(2)	(2)
Other	4	5
Total deferred tax assets	197	197
Deferred Tax Liabilities		
Plant - net	1,053	1,045
Regulatory assets	55	50
Pension and postretirement costs	6	7
Lease right-of-use assets	6	5
Other	1	2
Total deferred tax liabilities	1,121	1,109
Net deferred tax liability	$ 924	$ 912

At December 31, 2024, KU had $4 million of state credit carryforwards of which $2 million will expire in 2028 and $2 million that has an indefinite carryforward period. At December 31, 2024, KU had a $2 million valuation allowance related to state credit carryforwards due to insufficient projected Kentucky taxable income.

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" were:

	2024	2023	2022
Income Tax Expense (Benefit)			
Current - Federal	$ 87	$ 73	$ 63
Current - State	17	13	11
Total Current Expense (Benefit)	104	86	74
Deferred - Federal	(15)	(11)	(3)
Deferred - State	2	4	7
Total Deferred Expense (Benefit)	(13)	(7)	4
Amortization of investment tax credit - Federal	(2)	(2)	(2)
Total income tax expense (benefit)	$ 89	$ 77	$ 76
Total income tax expense (benefit) - Federal	$ 70	$ 60	$ 58
Total income tax expense (benefit) - State	19	17	18
Total income tax expense (benefit)	$ 89	$ 77	$ 76

	2024	2023	2022
Reconciliation of Income Tax Expense (Benefit)			
Federal income tax on Income Before Income Taxes at statutory tax rate - 21%	$ 93	$ 82	$ 84
Increase (decrease) due to:

Taxes, other than income			
Property and other	$ 49	$ 45	$ 45
Total	$ 49	$ 45	$ 45

(All Registrants)

Unrecognized Tax Benefits

PPL or its subsidiaries file tax returns in four major tax jurisdictions. The income tax provisions for PPL Electric, LG&E and KU are calculated in accordance with an intercompany tax sharing agreement, which provides that taxable income be calculated as if each domestic subsidiary filed a separate consolidated return. PPL Electric or its subsidiaries indirectly or directly file tax returns in three major tax jurisdictions, and LG&E and KU indirectly or directly file tax returns in two major tax jurisdictions. With few exceptions, at December 31, 2024, these jurisdictions, as well as the tax years that are no longer subject to examination, were as follows.

	PPL	PPL Electric	LG&E	KU
U.S. (federal)	2020 and prior	2020 and prior	2020 and prior	2020 and prior
Pennsylvania (state)	2020 and prior	2020 and prior		
Kentucky (state)	2019 and prior	2019 and prior	2019 and prior	2019 and prior

Other

Transfer of Certain Credits under the Inflation Reduction Act (PPL)

The IRS released the final Internal Revenue Code Section 6418 regulations related to the transfer of certain credits under the Inflation Reduction Act. The regulations became effective on July 1, 2024 and did not and are not expected to have a material impact on the financial statements regarding prior or future credit transfers.

IRS Revenue Procedure 2023-15 (PPL and LG&E)

On April 14, 2023, the IRS issued Revenue Procedure 2023-15, which provides a safe harbor method of accounting that taxpayers may use to determine whether expenses to repair, maintain, replace, or improve natural gas transmission and distribution property must be capitalized for tax purposes. PPL and LG&E are currently reviewing the revenue procedure to determine what impact the guidance may have on their financial statements.

7. Utility Rate Regulation

Regulatory Assets and Liabilities

(All Registrants)

PPL, PPL Electric, LG&E and KU reflect the effects of regulatory actions in the financial statements for their rate-regulated utility operations. Regulatory assets and liabilities are classified as current if, upon initial recognition, the entire amount related to an item will be recovered or refunded within a year of the balance sheet date.

(PPL)

RIE is subject to the jurisdiction of the RIPUC, the Rhode Island Division of Public Utilities and Carriers, and the FERC. RIE operates under a FERC-approved open access transmission tariff. RIE's base distribution rates are calculated based on recovery of costs as well as a return on rate base. Certain other recovery mechanisms exist to recover expenses and capital investments with a return on rate base separate from the base distribution rate case process.

(PPL, LG&E and KU)

LG&E is subject to the jurisdiction of the KPSC and the FERC, and KU is subject to the jurisdiction of the KPSC, the VSCC and the FERC.

LG&E's and KU's Kentucky base rates are calculated based on recovery of costs as well as a return on capitalization (common equity, long-term debt and short-term debt) including adjustments for certain net investments and costs recovered separately through other means. As such, LG&E and KU generally earn a return on regulatory assets.

(PPL and KU)

KU's Virginia base rates are calculated based on recovery of costs as well as a return on rate base (net utility plant plus working capital less accumulated deferred income taxes and miscellaneous deductions). As all regulatory assets and liabilities, except for regulatory assets and liabilities related to the levelized fuel factor, accumulated deferred income taxes, pension and postretirement benefits, and AROs related to certain CCR impoundments, are excluded from the return on rate base utilized in the calculation of Virginia base rates, no return is earned on the related assets.

KU's rates to municipal customers for wholesale power requirements are calculated based on annual updates to a formula rate that utilizes a return on rate base (net utility plant plus working capital less accumulated deferred income taxes and miscellaneous deductions). As all regulatory assets and liabilities, except accumulated deferred income taxes, are excluded from the return on rate base utilized in the development of municipal rates, no return is earned on the related assets.

(PPL and PPL Electric)

PPL Electric is subject to the jurisdiction of the PAPUC and the FERC. PPL Electric's distribution base rates are calculated based on recovery of costs as well as a return on distribution rate base (net utility plant plus a working capital allowance less plant-related deferred taxes and other miscellaneous additions and deductions). PPL Electric's transmission revenues are billed in accordance with a FERC tariff that allows for recovery of transmission costs incurred, a return on transmission-related rate base (net utility plant plus a working capital allowance less plant-related deferred taxes and other miscellaneous additions and deductions) and an automatic annual update. See "Transmission Formula Rate" below for additional information on this tariff. All regulatory assets and liabilities are excluded from distribution and transmission return on investment calculations; therefore, generally no return is earned on PPL Electric's regulatory assets.

(All Registrants)

The following table provides information about the regulatory assets and liabilities of cost-based rate-regulated utility operations at December 31:

	PPL		PPL Electric		LG&E		KU

Following is an overview of selected regulatory assets and liabilities detailed in the preceding tables. Specific developments with respect to certain of these regulatory assets and liabilities are discussed in "Regulatory Matters."

Defined Benefit Plans

(All Registrants)

Defined benefit plan regulatory assets and liabilities represent prior service cost and net actuarial gains and losses that will be recovered in defined benefit plans expense through future base rates based upon established regulatory practices and, generally, are amortized over the average remaining service lives of plan participants. These regulatory assets and liabilities are adjusted at least annually or whenever the funded status of defined benefit plans is remeasured.

(PPL, LG&E and KU)

As a result of previous rate case settlements and orders, the difference between pension cost calculated in accordance with LG&E's and KU's pension accounting policy and pension cost calculated using a 15-year amortization period for actuarial gains and losses and settlements are recorded as a regulatory asset. As of December 31, 2024, the balances were $79 million for PPL, $44 million for LG&E and $35 million for KU. As of December 31, 2023, the balances were $86 million for PPL, $46 million for LG&E and $40 million for KU.

(PPL)

RIE is subject to a pension rate adjustment mechanism whereby the difference in amounts allowed to be recovered in rates versus actual costs of RIE’s pension and other postretirement benefit plans that are to be recovered from or passed back to customers in future periods, are also recorded as regulatory assets and liabilities.

(All Registrants)

Storm Costs

PPL Electric, LG&E and KU have the ability to request from the PAPUC, the KPSC and the VSCC, as applicable, the authority to treat expenses related to specific extraordinary storms as a regulatory asset and defer such costs for regulatory accounting and reporting purposes. Once such authority is granted, LG&E and KU can request recovery of those expenses in a base rate case and begin amortizing the costs when recovery starts. PPL Electric can recover qualifying expenses caused by major storm events, as defined in its retail tariff, over three years through the Storm Damage Expense Rider commencing in the application year after the storm occurred. LG&E's and KU's regulatory assets for storm costs approved for base rate recovery are being amortized through various dates ending in 2031.

As provided in the Amended Settlement Agreement (ASA), RIE has the authority from the RIPUC to treat certain incremental O&M expenses related to specific extraordinary storms as a regulatory asset and defer such costs for regulatory accounting and reporting purposes. Once all expenses for the extraordinary storm have been finalized, RIE files a final accounting of those storm expenses with the RIPUC that is subject to review by the RIPUC and the Rhode Island Division of Public Utilities and Carriers.

Unamortized Loss on Debt

Unamortized loss on reacquired debt represents losses on long-term debt refinanced, reacquired or redeemed that have been deferred and will be amortized and recovered over either the original life of the extinguished debt or the life of the replacement debt (in the case of refinancing). Such costs are being amortized through 2053 for PPL Electric, through 2042 for KU, and through 2044 for LG&E.

Accumulated Cost of Removal of Utility Plant

RIE, LG&E and KU charge costs of removal through depreciation expense with an offsetting credit to a regulatory liability. The regulatory liability is relieved as costs are incurred.

PPL Electric does not accrue for costs of removal. When costs of removal are incurred, PPL Electric records the costs as a regulatory asset. Such deferral is included in rates and amortized over the subsequent five-year period.

Net Deferred Taxes

Regulatory liabilities associated with net deferred taxes represent the future revenue impact from the adjustment of deferred income taxes required primarily for excess deferred taxes and unamortized investment tax credits, largely a result of the TCJA.

(PPL and PPL Electric)

Distribution System Improvement Charge (DSIC)

The DSIC is authorized under Act 11 and is considered an alternative ratemaking mechanism providing more timely cost recovery of qualifying distribution system capital improvements. DSIC is charged to all customers taking distribution service as a percentage of total distribution revenue (excluding State Tax Adjustment Surcharge). DSIC is capped at 5% of the total amount billed to all customers for distribution service (including reconcilable riders) which provides a safeguard for customers. PPL Electric is permitted to utilize the DSIC mechanism so long as the rolling 12-month ROE for the applicable period does not exceed the PAPUC ROE in the company's PAPUC quarterly financial report filing. The DSIC contains a reconciliation mechanism whereby any over- or under-recovery from customers is either refunded to, or recovered from, customers through the adjustment factor determined for the subsequent year.

Generation Supply Charge (GSC)

The GSC is a cost recovery mechanism that permits PPL Electric to recover costs incurred to provide generation supply to PLR customers who receive basic generation supply service. The recovery includes charges for generation supply, as well as administration of the acquisition process. In addition, the GSC contains a reconciliation mechanism whereby any over- or under-recovery from prior periods is refunded to, or recovered from, customers through the adjustment factor determined for the subsequent rate filing period.

Transmission Service Charge (TSC)

PPL Electric is charged by PJM for transmission service-related costs applicable to its PLR customers. PPL Electric passes these costs on to customers, who receive basic generation supply service through the PAPUC-approved TSC cost recovery mechanism. The TSC contains a reconciliation mechanism whereby any over- or under-recovery from customers is either refunded to, or recovered from, customers through the adjustment factor determined for the subsequent year.

RIE arranges transmission service on behalf of its customers and bills the costs of those services to customers, pursuant to its Transmission Service Cost Adjustment Provision. The TSC contains a reconciliation mechanism whereby any over- or under-recovery from customers is either refunded to, or recovered from, customers through the adjustment factor determined for the subsequent year.

Transmission Formula Rate

PPL Electric's transmission revenues are billed in accordance with a FERC-approved Open Access Transmission Tariff that utilizes a formula-based rate recovery mechanism. Under this formula, beginning in 2023, rates are put into effect on January 1st of each year based upon actual expenditures from the most recently filed FERC Form 1, forecasted capital additions, and other data based on PPL Electric's books and records. 2023 was considered a transitional period as the calendar year rate

approved by FERC became effective April 1, 2023. Rates are compared during the year to the estimated annual expenses and capital additions that will be filed in PPL Electric's annual FERC Form 1, filed under the FERC's Uniform System of Accounts. Under the mechanism, any difference between the revenue requirement in effect and actual expenditures incurred for that year is recorded as a regulatory asset or regulatory liability, and the regulatory asset or regulatory liability is to be recovered from or returned to customers starting one year after the conclusion of the rate year.

Storm Damage Expense Rider (SDER)

The SDER is a reconcilable automatic adjustment clause under which PPL Electric annually will compare actual storm costs to storm costs allowed in base rates and refund or recover any differences from customers. In the 2015 rate case settlement approved by the PAPUC in November 2015, it was determined that reportable storm damage expenses to be recovered annually through base rates will be set at $20 million. The SDER will recover from or refund to customers the applicable expenses from reportable storms as compared to the $20 million recovered annually through base rates.

Act 129 Compliance Rider

In compliance with Pennsylvania's Act 129 of 2008 and implementing regulations, PPL Electric is currently in Phase IV of the energy efficiency and conservation plan which was approved in March 2021. Phase IV allows PPL Electric to recover the maximum $313 million over the five-year period, June 1, 2021 through May 31, 2026. The plan includes programs intended to reduce electricity consumption. The recoverable costs include direct and indirect charges, including design and development costs, general and administrative costs and applicable state evaluator costs. The rates are applied to customers who receive distribution service through the Act 129 Compliance Rider. The actual Phase IV program costs are reconcilable after each 12-month period, and any over- or under-recovery from customers will be refunded or recovered over the next rate filing period.

Smart Meter Rider (SMR)

Act 129 requires each electric distribution company (EDC) with more than 100,000 customers to have a PAPUC approved Smart Meter Technology Procurement and Installation Plan (SMP). As of December 31, 2019, PPL Electric replaced substantially all of its old meters with meters that meet the Act 129 requirements under its SMP. In accordance with Act 129, EDCs are able to recover the costs and earn a return on capital of providing smart metering technology. PPL Electric uses the SMR to recover the costs to implement its SMP. The SMR is a reconciliation mechanism whereby any over- or under-recovery from prior years is refunded to, or recovered from, customers through the adjustment factor determined for the subsequent quarters.

Universal Service Rider (USR)

The USR provides for recovery of costs associated with universal service programs, OnTrack and Winter Relief Assistance Program (WRAP), provided by PPL Electric to residential customers. OnTrack is a special payment program for low-income households and WRAP provides low-income customers a means to reduce electric bills through energy saving methods. The USR rate is applied to residential customers who receive distribution service. The actual program costs are reconcilable, and any over- or under-recovery from customers will be refunded or recovered annually in the subsequent year.

TCJA Customer Refund and Recovery

As a result of the reduced U.S federal corporate income tax rate as enacted by the TCJA, the PAPUC ruled that these tax benefits should be refunded to customers. Timing differences between the recognition of these tax benefits and the refund of the benefit to the customer creates a regulatory liability. PPL Electric's liability is being credited back to distribution customers through a temporary negative surcharge and remains in place until PPL Electric files and the PAPUC approves new base rates. The TCJA is reconcilable, and any over- or under-recovery from customers will be refunded or recovered annually in the subsequent year.

(PPL, LG&E and KU)

Fuel Adjustment Clauses

LG&E's and KU's retail electric rates contain a fuel adjustment clause, whereby variances in power purchases and the cost of fuel to generate electricity, including transportation costs, from the costs embedded in base rates are adjusted in LG&E's and KU's rates. The KPSC requires formal reviews at six-month intervals to examine past fuel adjustments and at two-year intervals to review past operations of the fuel adjustment clause and, to the extent appropriate, may conduct public hearings and

reestablish the fuel charge included in base rates. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to timing or adjustments to the mechanism and are typically recovered within 12 months.

KU also employs a levelized fuel factor mechanism for Virginia customers using an average fuel cost factor based primarily on projected fuel costs and load for the fuel year (12 months ending March 31). The Virginia levelized fuel factor allows fuel recovery based on projected fuel costs for the fuel year plus an adjustment for any under- or over-recovery of fuel expenses from the prior fuel year. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to timing or adjustments to the mechanism and are typically recovered or refunded within 12 months.

AROs

As discussed in Note 1, for LG&E and KU, all ARO accretion and depreciation expenses are reclassified as a regulatory asset or regulatory liability. ARO regulatory assets associated with certain CCR projects are amortized to expense in accordance with regulatory approvals. For other AROs, deferred accretion and depreciation expense is recovered through cost of removal.

Power Purchase Agreement - OVEC

As a result of purchase accounting associated with PPL's acquisition of LG&E and KU, the fair values of the OVEC power purchase agreement were recorded on the balance sheets of LG&E and KU with offsets to regulatory liabilities. The regulatory liabilities are being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition. LG&E's and KU's customer rates continue to reflect the original contracts. See Notes 12 and 17 for additional discussion of the power purchase agreement.

Interest Rate Swaps

LG&E's unrealized gains and losses are recorded as regulatory assets or regulatory liabilities until they are realized as interest expense. Interest expense from existing swaps is realized and recovered over the terms of the associated debt, which matures in 2033.

Terminated Interest Rate Swaps

Net realized gains and losses on all interest rate swaps are recovered through regulated rates. As such, any gains and losses on these derivatives are included in regulatory assets or liabilities and are primarily recognized in "Interest Expense" on the Statements of Income over the life of the associated debt.

Plant Outage Costs

From July 1, 2017 through June 30, 2021, plant outage costs were normalized for ratemaking purposes based on an average level of expenses. Plant outage expenses that were greater or less than the average will be collected from or returned to customers, through future base rates. Effective July 1, 2021, under-recovered plant outage costs are being amortized through 2029 for LG&E and KU.

Advanced Metering Infrastructure

In 2021 orders from the KPSC, LG&E and KU received approval to record regulatory assets comprised of the operating expenses associated with implementation of the AMI project and the incremental difference between AFUDC accrued at LG&E’s and KU’s weighted average cost of capital and that calculated using the methodology approved by the FERC. Recovery of these costs will be determined in the base rate case proceeding following the completion of the AMI implementation project.

(PPL)

Derivative Instruments

Derivative instruments that qualify for recovery from, or refund to, customers through future rates are recorded at fair value, with changes in fair value recorded as regulatory assets or regulatory liabilities in the period in which the change occurs. The balance is reconcilable, and any over- or under-recovery from customers will be refunded or recovered annually in the subsequent year.

Energy Efficiency

The energy efficiency mechanism is designed to collect the estimated costs of RIE's energy efficiency plan for the upcoming calendar year. Any differences between revenue billed to customers through RIE's energy efficiency charge and the costs of RIE's energy efficiency programs, as approved by the RIPUC, are recorded as regulatory assets or regulatory liabilities. The final annual over or under collection is reconciled in the next year's energy efficiency plan filing, as part of the reconciliation factor calculation. RIE may file to change the energy efficiency plan charge at any time should significant over-or under-recoveries occur.

Net Metering

The net metering mechanism provides for recovery of costs associated with customer-installed on-site generation facilities, including the costs of renewable generation credits. Net metering is reconcilable annually, and any over- or under-recovery from customers will be refunded to, or recovered from, customers through the adjustment factor determined for the subsequent year.

Rate Adjustment Mechanisms

In addition to commodity costs, RIE is subject to a number of additional rate adjustment mechanisms whereby a regulatory asset or regulatory liability is recognized resulting from differences between actual revenues and the underlying cost being recovered or differences between actual revenues and targeted amounts as approved by the RIPUC. The rate adjustment mechanisms are reconcilable, and any over- or under-recovery from customers are to be refunded or recovered annually in the subsequent year.

Renewable Energy Certificates

The Renewable Energy Certificates regulatory asset represents deferred costs associated with RIE's compliance obligation with the Rhode Island Renewable Portfolio Standard (RPS). The RPS is legislation established to foster the development of new renewable energy sources. The regulatory asset will be recovered over the next year.

Taxes Recoverable through Future Rates

Taxes recoverable through future rates represent the portion of future income taxes that are anticipated to be recovered through future rates based upon established regulatory practices. Accordingly, this regulatory asset is recognized when the offsetting deferred tax liability is recognized. For general-purpose financial reporting, this regulatory asset and the deferred tax liability are not offset; rather, each is displayed separately. This regulatory asset is expected to be recovered over the period that the underlying book-tax timing differences reverse and the actual cash taxes are incurred.

(PPL, LG&E and KU)

Environmental Cost Recovery

Kentucky law permits LG&E and KU to recover the costs, including a return of operating expenses and a return of and on capital invested, of complying with the Clean Air Act and those federal, state or local environmental requirements, which apply to coal combustion wastes and by-products from coal-fired electricity generating facilities. The KPSC requires reviews of the past operations of the environmental surcharge for six-month and two-year billing periods to evaluate the related charges, credits and rates of return, as well as to provide for the roll-in of ECR amounts to base rates each two-year period. The KPSC has authorized return on equity of 9.35% for existing approved ECR projects. The ECR regulatory asset or liability represents the amount that has been under- or over-recovered due to timing or adjustments to the mechanism and is typically recovered or refunded within 12 months.

RIE's rate plans provide for specific rate allowances for RIE's share of the estimated costs to investigate and perform certain remediation activities at sites with which it may be associated, with variances deferred for future recovery from, or return to, customers. RIE believes future costs, beyond the expiration of current rate plans, will continue to be recovered through rates. The regulatory asset represents the excess of amounts incurred for RIE's actual site investigation and remediation costs versus amounts received in rates.

(PPL and LG&E)

Gas Supply Clause

LG&E's natural gas rates contain a gas supply clause, whereby the expected cost of natural gas supply and variances between actual and expected costs and customer usage from prior periods are adjusted quarterly in LG&E's rates, subject to approval by the KPSC. The gas supply clause previously included a separate natural gas procurement incentive mechanism, which allowed LG&E's rates to be adjusted annually to share savings between the actual cost of gas purchases and market indices, with the shareholders and the customers during each performance-based rate year (12 months ending October 31). The operation of this incentive mechanism expired on October 31, 2024, but savings achieved through October 31, 2024 will be included in LG&E's rates through October 31, 2026. The regulatory assets or liabilities represent the total amounts that have been under- or over-recovered due to timing or adjustments to the mechanisms and are typically recovered or refunded within 18 months.

Retired Asset Recovery (RAR) Rider

The RAR rider was established by KPSC orders in 2021 to provide recovery of and return on the remaining investment in certain electric generating units, including the remaining net book value of each unit, materials and supplies that cannot be used at other plants and any associated removal costs, upon their retirement over a ten-year period following retirement. Costs included as of December 31, 2024 represent the remaining net book value and materials and supplies that cannot be used as a result of the retirement of Mill Creek Unit 1. The associated removal costs will be added to the RAR rider regulatory asset or regulatory liability as costs are incurred.

Regulatory Matters

Rhode Island Activities *(PPL)*

Advanced Metering Functionality (AMF)

In 2021, RIE filed its Updated AMF Business Case and Grid Modernization Plan (GMP) with the RIPUC in accordance with the Amended Settlement Agreement (ASA) approved by the RIPUC in August 2018, and which among other things, sought approval to deploy smart meters throughout the service territory. After PPL completed the acquisition of RIE, RIE filed a new AMF Business Case with the RIPUC in 2022, consisting of a detailed proposal for full-scale deployment of AMF across its electric service territory.

On September 27, 2023, the RIPUC unanimously approved RIE to deploy an AMF-based metering system for the electric distribution business. RIE is authorized to seek recovery of the approved capital investment through the ISR process with an overall multi-year cap on recovery at approximately $153 million, subject to certain terms, conditions and limitations with respect to the potential offsets and recoverability of certain costs. RIE is required to continue spending even if above the recovery cap, until it achieves the functionalities outlined in the AMF Business Case. RIE filed with the RIPUC for approval of (i) an updated electric Service Quality Plan on December 27, 2023, (ii) additional compliance tariff provisions regarding recovery and updated cost schedules to reflect the RIPUC's decision on December 22, 2023, and (iii) electric and gas tariff advice filings for RIPUC Automatic Meter Reading/AMF meter opt-out tariff provision on September 19, 2024. The RIPUC approved RIE's revised service quality metrics with certain modifications on August 1, 2024 and October 30, 2024. In addition, the RIPUC approved RIE's AMR/AMF opt-out tariff provisions for electric and natural gas with modifications on December 19, 2024 for effect January 1, 2025, and approved the proposed updated fees to be assessed at the start of the AMF roll-out. On January 7, 2025, RIE filed compliance tariffs to reflect the RIPUC's ruling, which they approved at their January 23, 2025 Open Meeting.

Grid Modernization Plan (GMP)

RIE filed a new GMP with the RIPUC on December 30, 2022. The new GMP filing consists of a holistic suite of grid modernization investments that will provide RIE with the tools and capability to manage the electric distribution system more granularly considering a range of distributed energy resources adoption levels, accelerated by Rhode Island's climate mandates, while at the same time maintaining a safe and reliable electric distribution system. The GMP is an informational guidance document that supports the grid modernization investments to be proposed in future electric ISR plans. Consequently, RIE did not request approval from the RIPUC for any specific investments or seek cost recovery as part of the GMP; rather, RIE requested the RIPUC issues an order affirming RIE's compliance with its obligation to file a GMP that meets the requirements of the ASA. At an Open Meeting on November 21, 2024, the RIPUC unanimously ruled that RIE satisfied the requirement to file a GMP. This decision does not represent a ruling on the GMP and the docket will remain open, though RIE does not expect further action on this docket.

FY 2025 Gas ISR Plan

On December 22, 2023, RIE filed its FY 2025 Gas ISR Plan with the RIPUC with a budget that includes $185 million of capital investment spend plus up to an additional $11 million of contingency plan spending in connection with the PHMSA's potential enactment of regulations during FY 2025 that, if enacted would significantly alter RIE's leak detection and repair obligations under federal regulations. RIE also filed its proposed gas ISR plan budgetary and reconciliation framework, addressing issues raised in connection with its FY submission, with its FY 2025 ISR Plan. The RIPUC held hearings in March 2024, and on March 26, 2024, approved, the plan, including the proposed budgetary and reconciliation framework, with a total approved FY 2025 Gas ISR Plan of $180 million of which $168 million is for capital investment spend and $12 million spend for paving costs as operations and maintenance (O&M), plus the potential additional $11 million available if the above-mentioned regulations are implemented by the PHMSA. On March 28, 2024, the RIPUC approved RIE's compliance filing for rates effective April 1, 2024.

FY 2026 Gas ISR Plan

On December 31, 2024, RIE filed its FY 2026 Gas ISR Plan with the RIPUC with a budget that includes $187 million of capital investment spend and up to $15 million of additional contingency plan spend in connection with the PHMSA's potential enactment of regulations during FY 2026 that, if enacted, would significantly alter RIE's leak detection and repair obligations under federal regulations. The Plan also includes proposed spending on curb-to-curb paving of $22 million. A decision from the RIPUC on the Plan is expected by March 31, 2025. RIE cannot predict the outcome of this matter.

FY 2025 Electric ISR Plan

On December 21, 2023, RIE filed its FY 2025 Electric ISR Plan with the RIPUC with a budget that includes $141 million of capital investment spend, $13 million of vegetation management O&M spend and $1 million of Other O&M spend. RIE also filed its proposed electric ISR plan budgetary and reconciliation framework addressing issues raised in connection with its FY 2024 submission, with its FY 2025 ISR Plan. The RIPUC held hearings in March 2024, and on March 26, 2024, approved the plan, including the proposed budgetary and reconciliation framework, with modifications to the proposed capital investment spend, resulting in a total approved FY 2025 Electric ISR Plan of $132 million for capital investment spend, $13 million for vegetation management O&M spend, and $1 million for Other O&M spend. On March 28, 2024, the RIPUC approved RIE's compliance filing for rates effective April 1, 2024.

FY 2026 Electric ISR Plan

On December 23, 2024, RIE filed its FY 2026 Electric ISR Plan with the RIPUC with a budget that includes $160 million of capital investment spend, $14 million of vegetation O&M spend and $1 million of Other O&M spend. In addition, the FY 2026 Electric ISR Plan includes $88 million of capital investment spend for Advanced Metering Functionality (AMF) which, together with the $160 million of capital investment spend, results in total capital investment spend of $248 million. A decision from the RIPUC is expected by March 31, 2025. RIE cannot predict the outcome of this matter.

Kentucky Activities *(PPL, LG&E and KU)*

Kentucky January 2025 Storm

In January 2025, LG&E and KU experienced snow, ice, sleet and freezing rain in their service territories, resulting in substantial damage to certain of LG&E's and KU's assets. On January 31, 2025, LG&E and KU submitted a filing with the KPSC requesting regulatory asset treatment of the extraordinary operations and maintenance expenses portion of the costs incurred related to the storm. These are estimated to be $2 million for LG&E and $8 million for KU. LG&E and KU cannot predict the outcome of this matter.

Kentucky September 2024 Storm

In September 2024, LG&E and KU experienced significant winds and rain activity in their service territories, resulting in substantial damage to certain of LG&E's and KU's assets. On October 15, 2024, LG&E and KU submitted a filing with the KPSC requesting regulatory asset treatment of the extraordinary operations and maintenance expenses portion of the costs incurred related to the storm. On December 4, 2024, the KPSC issued an order approving LG&E's and KU's request for regulatory asset accounting treatment, with recovery amounts and amortization thereof to be determined in subsequent base rate

proceedings. LG&E and KU cannot predict the outcome of this matter. As of December 31, 2024, LG&E and KU recorded regulatory assets related to the storm of $2 million and $11 million.

Kentucky May 2024 Storm

In May 2024, LG&E and KU experienced significant windstorm activity in their service territories, resulting in substantial damage to certain of LG&E's and KU's assets. On June 13, 2024, LG&E and KU submitted a filing with the KPSC requesting regulatory asset treatment of the extraordinary operations and maintenance expenses portion of the costs incurred related to the storm. On July 2, 2024, the KPSC issued an order provisionally approving the request for accounting purposes, noting that the decision on approval of recovery would be determined in the future. On November 21, 2024, the KPSC issued an order confirming the approval of LG&E's and KU's request for regulatory asset accounting treatment, with recovery amounts and amortization thereof to be determined in subsequent base rate proceedings. LG&E and KU cannot predict the outcome of this matter. As of December 31, 2024, LG&E and KU recorded regulatory assets related to the storm of $4 million and $5 million.

KPSC Investigation Related to Winter Storm Elliott

On December 22, 2023, the KPSC initiated an investigation into the practices of LG&E and KU regarding the provision of electric service from December 23, 2022 through December 25, 2022, during a period of extreme temperatures during Winter Storm Elliott. The investigation was the result of LG&E's and KU's need to implement brief service interruptions to approximately 55,000 customers during this period. The purpose of the investigation was to supplement discovery and examination already completed through LG&E's and KU's CPCN proceedings, a legislative hearing completed in February 2023 and reports completed by the NERC and the FERC related to the issue. Additionally, the investigation was to evaluate LG&E's and KU's actions taken, or planned to be taken, since Winter Storm Elliott that affect their ability to provide service during periods of variable weather and power system stress. LG&E and KU believe actions taken during the period under question were necessary and appropriate. A hearing on the matter occurred on May 23, 2024. On January 7, 2025, the KPSC issued an Order finding that LG&E and KU did not willfully violate a regulation, statute or KPSC Order associated with the Winter Storm Elliot event. The case is now closed and removed from the KPSC's docket.

Mill Creek Unit 1 and Unit 2 Retired Asset Recovery (RAR) (PPL and LG&E)

In November 2023, the KPSC issued an order approving, among other items, the requested retirement of Mill Creek Units 1 and 2.

On October 4, 2024, LG&E submitted an application related to the retirement of Mill Creek Unit 1, which occurred on December 31, 2024, requesting recovery of associated costs under the RAR rider. LG&E expects these costs to be approximately $125 million and proposes to begin application of the RAR rider with bills issued in May 2025. On October 28, 2024, the KPSC issued an order to establish a procedural schedule regarding its investigation of the reasonableness of the proposed tariff. The KPSC intends to rule on the matter by February 28, 2025. LG&E cannot predict the outcome of this proceeding.

Mill Creek Unit 2 is expected to be retired in 2027. LG&E anticipates the recovery of associated costs, including the remaining net book value, for Mill Creek Unit 2 through the RAR rider. The remaining net book value of Mill Creek Unit 2 was approximately $221 million at December 31, 2024 and LG&E is continuing to depreciate using the current approved rates through its retirement date in 2027. LG&E expects to reclassify the net book value remaining at retirement, which is expected to total approximately $161 million, to a regulatory asset to be amortized over a period of ten years in accordance with the RAR.

Pennsylvania Activities *(PPL and PPL Electric)*

PAPUC investigation into billing issues

On January 31, 2023, the PAPUC initiated an investigation focused on billing issues related to estimated, irregular bills and customer service concerns following customer complaints, which for many customers were driven by increased prices for electricity supply. Certain bills issued during the time period of December 20, 2022 through January 9, 2023 were estimated due to a technical issue that prevented PPL Electric from providing actual collected meter data to customer facing and other internal systems. Customers also reported difficulties accessing PPL Electric's website and contacting the customer service call center. The PAPUC's Bureau of Investigation & Enforcement (I&E) has directed PPL Electric to respond to certain inquiries and document requests. PPL Electric submitted its responses to the information request and cooperated fully with the investigation. PPL Electric reached a Settlement Agreement with I&E on November 21, 2023. In the settlement, PPL Electric agreed to pay a civil penalty of $1 million, make certain remedial improvements to its billing systems and processes, and agreed to not seek recovery for extraordinary costs incurred in responding to or resulting from the billing event. On November 21, 2023, PPL Electric and I&E submitted a Joint Petition for Approval of Settlement to the PAPUC. On January 18, 2024, the PAPUC issued an Order requesting public comment prior to the PAPUC entering a Final Order on the petition. Comments were due on February 28, 2024, and comments were filed by the Office of Consumer Advocate, CAUSE-PA (low-income advocate), and individual customers. On March 19, 2024, PPL Electric filed reply comments. On April 25, 2024, the PAPUC announced at its public meeting that it would be issuing an order approving the Settlement Agreement with modifications. The modifications included converting the $1 million civil penalty to a $1 million donation to PPL Electric's hardship fund, Operation HELP, and requiring PPL Electric to make various progress reports on efforts to remediate the billing issue. PPL Electric and I&E had 20 business days from the issuance of the PAPUC order to accept or reject the proposed modifications to the Settlement Agreement. The time period to withdraw from the Settlement Agreement expired on June 14, 2024, without PPL Electric or I&E withdrawing from the Settlement Agreement, and the terms of the Settlement Agreement, as modified by the PAPUC's order, are now final. PPL Electric is in the process of complying with the terms of the Settlement Agreement, and made the required contribution to Operation HELP on June 24, 2024.

PPL Electric incurred expenses, primarily related to billing write-offs, of $18 million and $34 million for the years ended December 31, 2024 and 2023 related to the billing issue. PPL Electric will not seek regulatory recovery of these costs.

DSIC Petition

On April 26, 2024, PPL Electric filed a Petition with the PAPUC requesting that the PAPUC waive PPL Electric's DSIC cap of 5% of billed revenues and increase the maximum allowable DSIC to 9% for bills rendered on or after January 1, 2025. On November 21, 2024, the Administrative Law Judge in the proceeding issued a Recommended Decision recommending the denial of PPL Electric's DSIC Cap Waiver Petition. PPL Electric filed exceptions to the Recommended Decision on December 11, 2024. Several of the other parties filed Reply Exceptions on December 23, 2024. The Administrative Law Judge's Recommended Decision and the Exceptions and Reply Exceptions are currently before the PAPUC for a final order. PPL Electric cannot predict the timing or outcome of that decision.

Act 129

The Pennsylvania Public Utility Code requires EDCs to meet, by specified dates, specified goals for reduction in customer electricity usage and peak demand. EDCs not meeting the requirements of Act 129 are subject to significant penalties. PPL Electric filed with the PAPUC its Act 129 Phase IV Energy Efficiency and Conservation Plan on November 30, 2020, for the five-year period starting June 1, 2021 and ending on May 31, 2026. PPL Electric's Phase IV Act 129 Plan was approved by the PAPUC at its March 25, 2021, public meeting.

The Pennsylvania Public Utility Code also requires EDCs to act as a default service provider (DSP), which provides electricity generation supply service to customers pursuant to a PAPUC-approved default service procurement plan. A DSP is able to recover the costs associated with its default service procurement plan.

In March 2024, PPL Electric filed a Petition for Approval of a new default service program and procurement plan with the PAPUC for the period June 1, 2025 through May 31, 2029. In August 2024, PPL Electric submitted a Joint Petition for Settlement in the proceeding. In September 2024, the Administrative Law Judge issued an Interim Order approving the proposed settlement without modification. The PAPUC adopted the Interim Order on November 7, 2024, without modification which finalized the settlement.

Federal Matters

FERC Transmission Rate Filing (PPL, LG&E and KU)

In 2018, LG&E and KU applied to the FERC requesting elimination of certain on-going waivers and credits to a sub-set of transmission customers relating to the 1998 merger of LG&E's and KU's parent entities and the 2006 withdrawal of LG&E and KU from the Midcontinent Independent System Operator, Inc. (MISO), a regional transmission operator and energy market. The application sought termination of LG&E's and KU's commitment to provide certain Kentucky municipalities mitigation for certain horizontal market power concerns arising out of the 1998 LG&E and KU merger and 2006 MISO withdrawal. The amounts at issue are generally waivers or credits granted to a limited number of Kentucky municipalities for either certain LG&E and KU or MISO transmission charges incurred for transmission service received. In 2019, the FERC granted LG&E's and KU's request to remove the ongoing credits, conditioned upon the implementation by LG&E and KU of a transition mechanism for certain existing power supply arrangements, which was subsequently filed, modified, and approved by the FERC in 2020 and 2021. In 2020, LG&E and KU and other parties filed appeals with the U.S. Court of Appeals - D.C. Circuit (D.C. Circuit Court of Appeals) regarding the FERC's orders on the elimination of the mitigation and required transition mechanism. In August 2022, the D.C. Circuit Court of Appeals issued an order remanding the proceedings back to the FERC. On May 18, 2023, the FERC issued an order on remand reversing its 2019 decision and requiring LG&E and KU to refund credits previously withheld, including under such transition mechanism. LG&E and KU filed a petition for review of the FERC's May 18, 2023 order with the D.C. Circuit Court of Appeals and provided refunds in accordance with the FERC order on December 1, 2023. The FERC issued an order on LG&E's and KU's compliance filing on November 16, 2023, and LG&E and KU filed a petition for review of this November 16, 2023 order on February 14, 2024. The FERC issued the substantive order on rehearing on March 21, 2024, reaffirming its prior decision. Oral argument before the D.C. Circuit Court of Appeals occurred on January 21, 2025. LG&E and KU cannot predict the ultimate outcome of the proceedings or any other post decision process but do not expect the annual impact to have a material effect on their operations or financial condition. LG&E and KU currently receive recovery of certain waivers and credits primarily through base rates increases, provided, however, that increases associated with the FERC's May 18, 2023 order are expected to be subject to future rate proceedings.

Recovery of Transmission Costs (PPL)

Until December 2022, RIE's transmission facilities were operated in combination with the transmission facilities of National Grid's New England affiliates, Massachusetts Electric Company (MECO) and New England Power (NEP), as a single integrated system with NEP designated as the combined operator. As of January 1, 2023, RIE operates its own transmission facilities. ISO-NE allocates RIE's costs among transmission customers in New England, in accordance with the ISO Open Access Transmission Tariff (ISO-NE OATT). According to the FERC orders, RIE is compensated for its actual monthly transmission costs, with its authorized maximum Return on Equity (ROE) of 11.74% on its transmission assets.

The ROE for transmission rates under the ISO-NE OATT is the subject of four complaints that are pending before the FERC. On October 16, 2014, the FERC issued an order on the first complaint, Opinion No. 531-A, resetting the base ROE applicable to transmission assets under the ISO-NE OATT from 11.14% to 10.57% effective as of October 16, 2014 and establishing a maximum ROE of 11.74%. On April 14, 2017, this order was vacated and remanded by the D. C. Circuit Court of Appeals (Court of Appeals). After the remand, the FERC issued an order on October 16, 2018 applicable to all four pending cases where it proposed a new base ROE methodology that, with subsequent input and support from the New England Transmission Owners (NETO), yielded a base ROE of 10.41%. Subsequent to the FERC's October 2018 order in the New England Transmission Owners cases, the FERC further refined its ROE methodology in another proceeding and has applied that refined methodology to transmission owners' ROEs in other jurisdictions, and the NETOs filed further information in the New England matters to distinguish their case. Those determinations in other jurisdictions have recently been vacated and remanded back to the FERC for further proceedings by the D.C. Circuit Court of Appeals. The proceeding and the final base rate ROE determination in the New England matters remain open, pending a final order from the FERC. PPL cannot predict the outcome of this matter, and an estimate of the impact cannot be determined.

Other

Purchase of Receivables Program

(PPL and PPL Electric)

In accordance with a PAPUC-approved purchase of accounts receivable program, PPL Electric purchases certain accounts receivable from alternative electricity suppliers at a discount, which reflects a provision for uncollectible accounts. The alternative electricity suppliers have no continuing involvement or interest in the purchased accounts receivable. Accounts receivable that are acquired are initially recorded at fair value on the date of acquisition. During 2024, 2023 and 2022, PPL Electric purchased $1.5 billion, $1.5 billion and $1.3 billion of accounts receivable from alternative suppliers.

(PPL)

In 2021 and 2022, the RIPUC approved various components of a Purchase of Receivables Program (POR) in Rhode Island for effect on April 1, 2022. Municipal aggregators and non-regulated power producers (collectively, Competitive Suppliers) are eligible to participate in accordance with RIE's approved electric tariffs for municipal aggregation and non-regulated power producers. Under the POR program, RIE will purchase the Competitive Suppliers' accounts receivables, including existing receivables, at discounted rates, regardless of whether RIE has collected the owed monies from customers. The program is intended to make RIE whole through the implementation of a discount rate or Standard Complete Bill Percentage (SCBP) paid by Competitive Suppliers. RIE calculates the SCBP for each customer class and files the calculations with the RIPUC for review and approval by February 15 of each year. At an Open Meeting on March 26, 2024, the RIPUC approved the SCBP for effect beginning on April 1, 2024, for a one-year period.

8. Financing Activities

Credit Arrangements and Short-term Debt

(All Registrants)

The Registrants maintain credit facilities to enhance liquidity, provide credit support and provide a backstop to commercial paper programs. For reporting purposes, on a consolidated basis, the credit facilities and commercial paper programs of PPL Electric, LG&E and KU also apply to PPL. The amounts listed in the borrowed column below are recorded as "Short-term debt" on the Balance Sheets. The following credit facilities were in place at:

		December 31, 2024				December 31, 2023	
	Expiration Date	Capacity	Borrowed	Letters of Credit and Commercial Paper Issued (d)	Unused Capacity	Borrowed	Letters of Credit and Commercial Paper Issued (d)
PPL							
PPL Capital Funding							
Syndicated Credit Facility (a) (b) (c)	Dec 2028	$ 1,250	$ —	$ 138	$ 1,112	$ —	$ 390
Bilateral Credit Facility (a) (b)	Feb 2025	100	—	—	100	—	—
Bilateral Credit Facility (a) (b)	Feb 2025	100	—	15	85	—	13
Total PPL Capital Funding Credit Facilities		$ 1,450	$ —	$ 153	$ 1,297	$ —	$ 403

Syndicated Credit Facility (a) (b)	Dec 2028	400	—	140	260	—	93
Total KU Credit Facilities		$ 400	$ —	$ 140	$ 260	$ —	$ 93

(a) Each company pays customary fees under its respective facility and borrowings generally bear interest at applicable secured overnight financing rates or base rates, plus an applicable margin.
(b) The facilities contain a financial covenant requiring debt to total capitalization not to exceed 70% for PPL Capital Funding, RIE, PPL Electric, LG&E and KU, as calculated in accordance with the facilities and other customary covenants. Additionally, subject to certain conditions, PPL Capital Funding may request that the capacity of one of its bilateral credit facilities expiring in February 2025 be increased by up to $30 million and that the capacity of its syndicated credit facility be increased by up to $400 million. PPL Electric, LG&E and KU may each request up to a $250 million increase in its syndicated credit facility's capacity, subject to regulatory approval of the increased capacity. Participation in any such increase is at the sole discretion of each lender.
(c) Includes a $250 million borrowing sublimit for RIE and a $1 billion sublimit for PPL Capital Funding at December 31, 2024 and 2023. At December 31, 2024, PPL Capital Funding had $138 million of commercial paper outstanding and RIE had no commercial paper outstanding. At December 31, 2023, PPL Capital Funding had $365 million of commercial paper outstanding and RIE had $25 million of commercial paper outstanding. RIE's obligations under the facility are not guaranteed by PPL.
(d) Commercial paper issued reflects the undiscounted face value of the issuance.

(PPL)

In January 2025, PPL Capital Funding amended and restated its existing $1.25 billion syndicated credit facility to extend the termination date from December 6, 2028 to December 6, 2029 and to increase the borrowing capacity under the facility to $1.5 billion.

(PPL and PPL Electric)

In January 2025, PPL Electric amended and restated its existing $650 million syndicated credit facility to extend the termination date from December 6, 2028 to December 6, 2029 and to increase the borrowing capacity under the facility to $750 million.

(PPL and LG&E)

In January 2025, LG&E amended and restated its existing $500 million syndicated credit facility to extend the termination date from December 6, 2028 to December 6, 2029 and to increase the borrowing capacity under the facility to $600 million.

(PPL and KU)

In January 2025, KU amended and restated its existing $400 million syndicated credit facility to extend the termination date from December 6, 2028 to December 6, 2029 and to increase the borrowing capacity under the facility to $600 million.

(All Registrants)

The Registrants maintain commercial paper programs to provide an additional financing source to fund short-term liquidity needs. Commercial paper issuances, included in "Short-term debt" on the Balance Sheets, are supported by the respective Registrant's credit facilities. The following commercial paper programs were in place at:

	December 31, 2024				December 31, 2023	
	Weighted - Average Interest Rate	Capacity	Commercial Paper Issuances (c)	Unused Capacity	Weighted - Average Interest Rate	Commercial Paper Issuances (c)
PPL Capital Funding (a)	4.76%	$ 1,350	$ 138	$ 1,212	5.66%	$ 365
RIE (b)		250	—	250	5.72%	25
PPL Electric		650	—	650	5.67%	510
LG&E	4.72%	500	25	475		—
KU	4.71%	400	140	260	5.64%	93
Total		$ 3,150	$ 303	$ 2,847		$ 993

(a) PPL Capital Funding's obligations are fully and unconditionally guaranteed by PPL.
(b) Issuances under the PPL Capital Funding and RIE commercial paper programs are supported by the PPL Capital Funding syndicated credit facility, which, at December 31, 2024, had a total capacity of $1.25 billion and under which they are both borrowers. PPL Capital Funding's Commercial paper program is also backed by a separate bilateral credit facility for $100 million. The PPL Capital Funding syndicated credit facility includes a borrowing sublimit for RIE, which at December 31, 2024 was set at $250 million with the remaining $1 billion allocated to PPL Capital Funding. RIE's obligations under the facility are not guaranteed by PPL. The sublimits of each borrower may be decreased or increased at the borrowers' option up to a prescribed amount such that all borrowings under the syndicated credit facility cannot exceed the size of the credit facility of $1.25 billion.
(c) Commercial paper issued reflects the undiscounted face value of the issuance.

(PPL Electric, LG&E and KU)

See Note 13 for a discussion of intercompany borrowings.

(a) Includes PPL Electric's senior secured and first mortgage bonds that are secured by the lien of PPL Electric's 2001 Mortgage Indenture, which covers substantially all of PPL Electric's tangible distribution properties and certain of its tangible transmission properties located in Pennsylvania, subject to certain exceptions and exclusions. The carrying value of PPL Electric's property, plant and equipment was approximately $13.3 billion and $12.4 billion at December 31, 2024 and 2023.

Includes LG&E's first mortgage bonds that are secured by the lien of the LG&E 2010 Mortgage Indenture which creates a lien, subject to certain exceptions and exclusions, on substantially all of LG&E's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage and distribution of natural gas. The aggregate carrying value of the property subject to the lien was $6.0 billion and $5.9 billion at December 31, 2024 and 2023.

Includes KU's first mortgage bonds that are secured by the lien of the KU 2010 Mortgage Indenture which creates a lien, subject to certain exceptions and exclusions, on substantially all of KU's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity. The aggregate carrying value of the property subject to the lien was $7.5 billion and $7.3 billion at December 31, 2024 and 2023.

(b) Includes PPL Electric's series of senior secured bonds that secure its obligations to make payments with respect to each series of Pollution Control Bonds that were issued by the LCIDA on behalf of PPL Electric. These senior secured bonds were issued in the same principal amount, contain payment and redemption provisions that correspond to and bear the same interest rate as such Pollution Control Bonds. These senior secured bonds were issued under PPL Electric's 2001 Mortgage Indenture and are secured as noted in (a) above. The tax-exempt revenue bonds are subject to mandatory redemption upon determination that the interest rate on the bonds would be included in the holders' gross income for federal tax purposes.

(c) Includes LG&E's and KU's series of first mortgage bonds that were issued to the respective trustees of tax-exempt revenue bonds to secure its respective obligations to make payments with respect to each series of bonds. The first mortgage bonds were issued in the same principal amounts, contain payment and redemption provisions that correspond to and bear the same interest rate as such tax-exempt revenue bonds. These first mortgage bonds were issued under the LG&E 2010 Mortgage Indenture and the KU 2010 Mortgage Indenture and are secured as noted in (a) above. The related tax-exempt revenue bonds were issued by various governmental entities, principally counties in Kentucky, on behalf of LG&E and KU. The related revenue bond documents allow LG&E and KU to convert the interest rate mode on the bonds from time to time to a commercial paper rate, daily rate, weekly rate, term rate of at least one year or, in some cases, an auction rate or a SOFR index rate. At December 31, 2024, the aggregate tax-exempt revenue bonds issued on behalf of LG&E and KU that were in a term rate mode totaled $894 million for PPL, comprised of $538 million and $356 million for LG&E and KU. At December 31, 2024, the aggregate tax-exempt revenue bonds issued on behalf of LG&E and KU that were in a variable rate mode totaled $66 million and $33 million for LG&E and KU. These variable rate tax-exempt revenue bonds are subject to tender for purchase by LG&E and KU at the option of the holder and to mandatory tender for purchase by LG&E and KU upon the occurrence of certain events.

(d) The table reflects principal maturities only, based on stated maturities, sinking fund requirements, or earlier put dates, and the weighted-average rates as of December 31, 2024.

The aggregate maturities of long-term debt, based on sinking fund requirements, stated maturities or earlier put dates, for the periods 2025 through 2029 and thereafter are as follows:

	PPL	PPL Electric	LG&E	KU
2025	$ 551	$ —	$ 300	$ 250
2026	904	—	90	164
2027	428	108	260	60
2028	1,350	—	—	—
2029	116	116	—	—
Thereafter	13,325	5,075	1,839	2,615
Total	$ 16,674	$ 5,299	$ 2,489	$ 3,089

(PPL)

In March 2024, RIE issued $500 million of 5.35% Senior Notes due 2034. RIE received proceeds of $496 million, net of discounts and underwriting fees, to be used to repay short-term debt and for other general corporate purposes.

In August 2024, PPL Capital Funding issued $750 million of 5.25% Senior Notes due 2034. PPL Capital Funding received proceeds of $741 million, net of discounts and underwriting fees, to be used to repay short-term debt and for other general corporate purposes.

(PPL and PPL Electric)

In January 2024, PPL Electric issued $650 million of 4.85% First Mortgage Bonds due 2034. PPL Electric received proceeds of $644 million, net of discounts and underwriting fees, to be used to repay short-term debt and for other general corporate purposes.

(PPL Electric, LG&E and KU)

See Note 13 for additional information related to intercompany borrowings.

Legal Separateness *(All Registrants)*

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, other than PPL's guarantee of PPL Capital Funding's obligations, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay the creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of PPL Electric are each separate legal entities. These subsidiaries are not liable for the debts of PPL Electric. Accordingly, creditors of PPL Electric may not satisfy its debts from the assets of its subsidiaries absent a specific contractual undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, PPL Electric is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of these subsidiaries may not satisfy their debts from the assets of PPL Electric (or its other subsidiaries) absent a specific contractual undertaking by PPL Electric or any such other subsidiary to pay such creditors or as required by applicable law or regulation.

(PPL)

Distributions and Related Restrictions

In November 2024, PPL declared its quarterly common stock dividend, payable January 2, 2025, at 25.75 cents per share (equivalent to $1.03 per annum). On February 13, 2025, PPL announced a quarterly common stock dividend of 27.25 cents per share, payable April 1, 2025, to shareowners of record as of March 10, 2025. Future dividends will be declared at the discretion of the Board of Directors and will depend upon future earnings, cash flows, financial and legal requirements and other factors.

Neither PPL Capital Funding nor PPL may declare or pay any cash dividend or distribution on its capital stock during any period in which PPL Capital Funding defers interest payments on its 2007 Series A Junior Subordinated Notes due 2067. At December 31, 2024, no interest payments were deferred.

(All Registrants)

PPL relies on dividends or loans from its subsidiaries to fund PPL's dividends to its common shareholders. The net assets of certain PPL subsidiaries are subject to legal restrictions. LG&E, KU, PPL Electric and RIE are subject to Section 305(a) of the Federal Power Act, which makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in capital account." The meaning of this limitation has never been clarified under the Federal Power Act. LG&E, KU, PPL Electric and RIE believe, however, that this statutory restriction, as applied to their circumstances, would not be construed or applied by the FERC to prohibit the payment from retained earnings of dividends that are not excessive and are for lawful and legitimate business purposes. In February 2012, LG&E and KU petitioned the FERC requesting authorization to pay dividends in the future based on retained earnings balances calculated without giving effect to the impact of purchase accounting adjustments for PPL's 2010 acquisition of LG&E and KU. In May 2012, the FERC approved the petitions with the further condition that each utility may not pay dividends if such payment would cause its adjusted equity ratio to fall below 30% of total capitalization. Accordingly, at December 31, 2024, net assets of $1.5 billion for LG&E and $2.0 billion for KU were restricted for purposes of paying dividends to LKE, and net assets of $1.8 billion for LG&E and $2.3 billion for KU were available for payment of dividends to LKE. LG&E and KU believe they will not be required to change their current dividend practices as a result of the foregoing requirement. In addition, under Virginia law, KU is prohibited from making loans to affiliates without the prior approval of the VSCC. There are no comparable statutes under Kentucky law applicable to LG&E and KU, or under Pennsylvania law applicable to PPL Electric. However, orders from the KPSC require LG&E and KU to obtain prior consent or approval before lending amounts to PPL.

9. Acquisitions, Development and Divestitures

(PPL)

Acquisitions

Acquisition of Narragansett Electric

On May 25, 2022, PPL Rhode Island Holdings acquired 100% of the outstanding shares of common stock of Narragansett Electric from National Grid U.S., a subsidiary of National Grid plc (the Acquisition). Narragansett Electric, whose service area covers substantially all of Rhode Island, is primarily engaged in the transmission and distribution of electricity and distribution of natural gas. The Acquisition expands PPL's portfolio of regulated natural gas and electricity transmission and distribution assets, has improved PPL's credit metrics and is expected to enhance long term earnings growth. Following the closing of the Acquisition, Narragansett Electric provides services doing business under the name Rhode Island Energy (RIE).

The consideration for the Acquisition consisted of approximately $3.8 billion in cash and approximately $1.5 billion of long-term debt assumed through the transaction. The fair value of the consideration paid for Narragansett Electric was as follows (in billions):

Aggregate enterprise consideration	$	5.3
Less: fair value of assumed long-term debt outstanding		1.5
Total cash consideration	$	3.8

The $3.8 billion total cash consideration paid was funded with proceeds from PPL's 2021 sale of its U.K. utility business.

In connection with the Acquisition, National Grid USA Service Company, Inc., National Grid U.S. and Narragansett Electric entered into a transition services agreement (TSA), pursuant to which the National Grid entities agreed to provide certain transition services to Narragansett Electric to facilitate the transition of the operation of Narragansett Electric to PPL following the Acquisition, as agreed upon in the Narragansett share purchase agreement. The TSA was for an initial two-year term and was completed in the third quarter of 2024. TSA costs of $137 million, $228 million, and $123 million were incurred for the years ended December 31, 2024, 2023, and 2022.

Commitments to the Rhode Island Division of Public Utilities and Carriers and the Attorney General of the State of Rhode Island

As a condition to the Acquisition, PPL made certain commitments to the Rhode Island Division of Public Utilities and Carriers and the Attorney General of the State of Rhode Island. As a result:

- RIE provided a credit to all its electric and natural gas distribution customers in the total amount of $50 million ($40 million net of tax benefit). Based on the relative number of electric distribution customers and natural gas distribution customers as of November 1, 2022, RIE refunded, in the form of a bill credit, $33 million to electric customers and $17 million to natural gas customers of amounts collected from customers since the Acquisition date. Each electric customer received the same credit, and each natural gas customer received the same credit. A reduction of revenue and a regulatory liability of $50 million for the amounts refunded were recorded during the quarter ended September 30, 2022. These credits were issued during the fourth quarter of 2022. The amounts refunded did not impact RIE's earnings sharing regulatory mechanism.
- RIE forgave approximately $44 million ($21 million net of allowance for doubtful accounts) in arrearages for low-income and protected residential customers, which represents 100% of the arrearages over 90 days for those customers as of March 31, 2022. PPL deemed these accounts uncollectible and fully reserved for them as of September 30, 2022, resulting in an increase to "Other operations and maintenance expense" on the Statement of Income of $23 million for the year ended December 31, 2022.
- RIE will not file a base rate case seeking an increase in base distribution rates for natural gas and/or electric service sooner than three years from the Acquisition date, and RIE will not submit a request for a change in base rates unless and until there is at least twelve months of operating experience under PPL's exclusive leadership and after the TSA with National Grid terminates.
- RIE will forgo potential recovery of any and all transition costs, which includes (1) the installation of certain information technology systems; (2) modification and enhancements to physical facilities in Rhode Island; and (3) incurring costs related to severance payments, communications and branding changes, and other transition related costs. These costs, which are being expensed as incurred, were $307 million, $262 million, and $181 million for the years ended December 31, 2024, 2023, and 2022.
- RIE will not seek to recover any transaction costs related to the Acquisition, which were $28 million through December 31, 2024, including an immaterial amount for the years ended December 31, 2024 and 2023, and $18 million for the year ended December 31, 2022. These amounts were recorded in "Other operations and maintenance" on the Statement of Income.
- RIE will not seek to recover in rates any markup charged by National Grid U.S. and/or its affiliates under the TSA which were $10 million, $7 million, and $3 million for the years ended December 31, 2024, 2023, and 2022.
- In June 2022, RIE expensed $20 million of regulatory assets as of the Acquisition date for the Gas Business Enablement (GBE) project and for certain Cybersecurity/IT investments related to GBE. The expense was recorded to "Other operations and maintenance" on the Statements of Income for the year ended December 31, 2022. RIE will not seek to recover these regulatory assets from customers in any future proceedings.
- RIE will exclude all goodwill from the ratemaking capital structure.
- RIE will hold harmless Rhode Island customers from any changes to Accumulated Deferred Income Taxes (ADIT) as a result of the Acquisition. RIE reserves the right to seek rate adjustments based on future changes to ADIT that are not related to the Acquisition.
- RIE will not increase its revenue requirement to a level higher than what would exist in the absence of the Acquisition as a result of any restatement of pension and other post-retirement benefits plan assets and liabilities to fair value after the close of the Acquisition.
- Rhode Island Holdings contributed $2.5 million to the Rhode Island Commerce Corporation's Renewable Energy Fund and will not use any of the $2.5 million to meet its pre-existing renewable energy credit goals in Rhode Island or any other state. This contribution was made during the year ended December 31, 2022 and was recorded in "Other Income (Expense)" on the Statement of Income.
- RIE will make available up to $2.5 million for the Rhode Island Attorney General to utilize as needed in evaluating PPL's report on RIE's specific decarbonization goals to support Rhode Island's 2021 Act on Climate or to assess the future of the gas distribution business in Rhode Island. This amount was accrued during the year ended December 31, 2022 and was recorded in "Other Income (Expense) - net" on the Statement of Income.
- Various other operational and reporting commitments have been established.

Purchase Price Allocation

The operations of Narragansett Electric are subject to the accounting for certain types of regulation as prescribed by GAAP. The carrying value of Narragansett Electric’s assets and liabilities subject to rate-setting and cost recovery provisions provide revenues derived from costs, including a return on investment of net assets and liabilities included in rate base. Therefore, the fair values of these assets and liabilities equal their carrying values. Accordingly, neither the assets acquired nor liabilities assumed reflect any adjustments related to these amounts.

Total goodwill resulting from the acquisition was $1,585 million. PPL has elected to not reflect the effects of purchase accounting in the separate financial statements of RIE or PPL's Rhode Island Regulated segment. Accordingly, the Rhode

Island Regulated segment includes $725 million of acquired legacy goodwill. The remaining excess purchase price of $860 million is included in PPL's Corporate and Other category for segment reporting purposes. The goodwill reflects the value paid for the expected continued growth of a rate-regulated business located in a defined service area with a constructive regulatory environment, the ability of PPL to leverage its assembled workforce to take advantage of those growth opportunities and the attractiveness of stable, growing cash flows. The tax goodwill is deductible for income tax purposes over a 15 year period, and as such, deferred taxes will be recorded as the tax deductions are taken.

The table below shows the allocation of the purchase price to the assets acquired and liabilities assumed that were recorded in PPL's Consolidated Balance Sheet as of the Acquisition date. The allocation was subject to change during the one-year measurement period as additional information was obtained about the facts and circumstances that existed at closing. Adjustments to certain assets acquired and liabilities assumed during the year ended December 31, 2023 resulted in a decrease in goodwill of $1 million since the purchase price allocation as of December 31, 2022.

	Final Purchase Price Allocation
Assets	
Current Assets	
Cash and Cash Equivalents	$ 154

(a) Amounts represent fair value as of May 25, 2022. The gross contractual amount is $255 million. Cash flows not expected to be collected as of May 25, 2022 were $60 million.

Pro Forma Financial Information

The actual RIE Operating Revenues and Net income attributable to PPL included in PPL's Statement of Income for the period ended December 31, 2022, and PPL's unaudited pro forma 2022 Operating Revenues and Net Income (Loss) attributable to PPL, including RIE, as if the Acquisition had occurred prior to January 1, 2022 are as follows.

	Operating Revenues	Net Income (Loss)
Actual RIE results included from May 25, 2022 - December 31, 2022 (a)	$ 1,038	$ (44)
PPL Pro Forma for the year ended 2022	8,667	790

(a) Net Income (Loss) includes expenses of $98 million (pre-tax) related to commitments made as a condition of the Acquisition.

The pro forma financial information presented above has been derived from the historical consolidated financial statements of PPL and Narragansett Electric. Non-recurring items included in the 2022 pro forma financial information include: (a) $18 million (pre-tax) of transaction costs related to the Acquisition, primarily for advisory, accounting and legal fees incurred, (b) $223 million (pre-tax) of Acquisition integration costs, (c) a $50 million reduction of revenue (pre-tax), write-offs of $43 million (pre-tax) of certain accounts receivable and regulatory assets of RIE and $5 million (pre-tax) of expenses accrued in support of Rhode Island's decarbonization goals, all of which were conditions of the Acquisition, and (d) the income tax effect of these items, which was tax effected at the statutory federal income tax rate of 21%.

Developments *(PPL, LG&E and KU)*

Mill Creek Unit 5 Construction

In December 2022, LG&E and KU filed a CPCN with the KPSC requesting approval to construct a 640 MW net summer rating Natural Gas Combined Cycle (NGCC) combustion turbine at LG&E's Mill Creek Generating Station. In November 2023, the KPSC issued an order approving the request as well as the requested AFUDC accounting treatment for associated financing costs relating to the NGCC. The new NGCC facility will be jointly owned by LG&E (31%) and KU (69%). In February 2024, LG&E and KU entered into agreements to begin construction of Mill Creek Unit 5. Total project costs are estimated at approximately $1.0 billion, including AFUDC. Commercial operation of the facility is anticipated to begin in mid-2027.

See Note 7 for additional information on the CPCN filing.

Divestitures *(PPL)*

Sale of Safari Holdings

On September 29, 2022, PPL signed a definitive agreement to sell all of Safari Holdings membership interests to Aspen Power Services, LLC (Aspen Power). On November 1, 2022, PPL completed the sale (the Transaction).

Final closing adjustments were completed during the year ended December 31, 2023, resulting in an increase to the loss on sale of $6 million ($5 million net of tax), which was recorded in "Other operation and maintenance" on the Statements of Income for the year ended December 31, 2023. A loss on sale of $60 million ($46 million net of tax benefit) was recorded in "Other operation and maintenance" on the Statements of Income for the year ended December 31, 2022.

In connection with the closing of the Transaction, PPL provided certain guarantees and other assurances. Certain of these guarantees and other assurances have been terminated as of January 8, 2024. See Note 12 to the Financial Statements for additional information.

Discontinued Operations

Summarized Results of Discontinued Operations

On June 14, 2021, PPL WPD Limited completed the sale of PPL's U.K. utility business to National Grid Holdings One plc (National Grid U.K.), a subsidiary of National Grid plc. For the year ended December 31, 2022, the operations of the U.K. utility business are included in "Income from Discontinued Operations (net of income taxes)" on the Statements of Income, with the only component being an income tax benefit of $42 million. There were no discontinued operations activities for the years ended December 31, 2024 or 2023.

10. Retirement and Postemployment Benefits

(All Registrants)

Defined Benefits

Certain employees of PPL's subsidiaries are eligible for pension benefits under non-contributory defined benefit pension plans with benefits based on length of service and final average pay, as defined by the plans.

Effective January 1, 2012, PPL's primary defined benefit pension plan was closed to all newly hired salaried employees. Effective July 1, 2014, PPL's primary defined benefit pension plan was closed to all newly hired bargaining unit employees. Newly hired employees are eligible to participate in the PPL Retirement Savings Plan, a 401(k) savings plan with enhanced employer contributions.

The defined benefit pension plans of LKE and its subsidiaries were closed to new salaried and bargaining unit employees hired after December 31, 2005. Employees hired after December 31, 2005 receive additional company contributions above the standard matching contributions to their savings plans. The pension plans sponsored by LKE and LG&E were merged effective January 1, 2020 into the LG&E and KU Pension Plan. The merged plan is sponsored by LKE. LG&E and KU participate in this plan.

The RIE defined benefit plans provide most union employees, as well as non-union employees hired before January 1, 2011, with a retirement benefit. Supplemental non-qualified, non-contributory executive retirement programs provide additional defined pension benefits for certain executives.

PPL and certain of its subsidiaries also provide supplemental retirement benefits to executives and other key management employees through unfunded nonqualified retirement plans.

Certain employees of PPL's subsidiaries are eligible for certain health care and life insurance benefits upon retirement through contributory plans. Effective January 1, 2014, the PPL Postretirement Medical Plan was closed to all newly hired salaried employees. Effective July 1, 2014, the PPL Postretirement Medical Plan was closed to all newly hired bargaining unit employees. Effective January 1, 2024, newly hired salaried employees and certain bargaining unit employees of LKE will no longer be eligible for postretirement medical benefits under the LKE Postretirement Plan. Postretirement health benefits may be paid from 401(h) accounts established as part of the PPL Retirement Plan and the LG&E and KU Pension Plan within the PPL Services Corporation Master Trust, funded VEBA trusts and company funds.

The Rhode Island postretirement benefit plans provide health care and life insurance coverage to eligible retired employees. Eligibility is based on age and length of service requirements and, in most cases, retirees must contribute to the cost of their coverage.

(PPL)

The following table provides the components of net periodic defined benefit costs (credits) for PPL's pension and other postretirement benefit plans for the years ended December 31.

	Pension Benefits			Other Postretirement Benefits		
	2024	2023	2022	2024	2023	2022
Net periodic defined benefit costs (credits):						
Service cost	$ 35	$ 34	$ 51	$ 6	$ 6	$ 7
Interest cost	183	188	144	29	30	20
Expected return on plan assets	(299)	(309)	(276)	(30)	(30)	(28)
Amortization of:						
Prior service cost (credit)	3	6	8	1	1	1
Actuarial (gain) loss	10	2	51	(5)	(5)	(5)
Net periodic defined benefit costs (credits) prior to settlements and termination benefits	(68)	(79)	(22)	1	2	(5)
Settlements (a)	—	—	23	—	—	—
Net periodic defined benefit costs (credits)	$ (68)	$ (79)	$ 1	$ 1	$ 2	$ (5)
Other Changes in Plan Assets and Benefit Obligations Recognized in OCI and Regulatory Assets/Liabilities - Gross:						
Net (loss)/gain allocated at acquisition	$ —	$ —	$ 33	$ —	$ —	$ (49)
Settlement	—	—	(23)	—	—	—
Net (gain) loss	134	193	242	1	(6)	—
Prior service cost (credit)	(13)	2	—	—	—	—
Amortization of:						
Prior service (cost) credit	(3)	(6)	(8)	(1)	(1)	(1)
Actuarial gain (loss)	(10)	(2)	(51)	5	5	5
Total recognized in OCI and regulatory assets/liabilities	108	187	193	5	(2)	(45)
Total recognized in net periodic defined benefit costs, OCI and regulatory assets/liabilities	$ 40	$ 108	$ 194	$ 6	$ —	$ (50)

(a) Settlement charges incurred as a result of the amount of lump sum payment distributions, primarily from the LKE qualified pension plan. In accordance with existing regulatory accounting treatment, LG&E and KU have primarily maintained the settlement charge in regulatory assets to be amortized in accordance with existing regulatory practice. The portion of the settlement attributed to LKE's operations outside of the jurisdiction of the KPSC has been charged to expense.

For PPL's pension and postretirement benefits, the amounts recognized in OCI and regulatory assets/liabilities for the years ended December 31 were as follows:

	Pension Benefits			Other Postretirement Benefits		
	2024	2023	2022	2024	2023	2022
OCI	$ 25	$ 52	$ 142	$ 2	$ —	$ 13
Regulatory assets/liabilities	83	135	51	3	(2)	(58)
Total recognized in OCI and regulatory assets/liabilities	$ 108	$ 187	$ 193	$ 5	$ (2)	$ (45)

(PPL)

PPL uses base mortality tables issued by the Society of Actuaries for all defined benefit pension and other postretirement benefit plans. The Pri-2012 base table and the MP-2020 projection scale with varying adjustment factors based on the underlying demographic and geographic differences and experience of the plan participants was used for all periods.

The following weighted-average assumptions were used in the valuation of the benefit obligations at December 31.

	Pension Benefits		Other Postretirement Benefits	
	2024	2023	2024	2023
PPL				
Discount rate	5.93 %	5.52 %	5.91 %	5.54 %
Rate of compensation increase	3.43 %	3.43 %	3.44 %	3.43 %

The following weighted-average assumptions were used to determine the net periodic defined benefit costs for the years ended December 31.

	Pension Benefits			Other Postretirement Benefits		
	2024	2023	2022	2024	2023	2022
PPL						
Discount rate	5.52 %	5.52 %	3.35 %	5.54 %	5.54 %	3.54 %
Rate of compensation increase	3.43 %	3.43 %	3.74 %	3.43 %	3.43 %	2.84 %
Expected return on plan assets	8.25 %	8.25 %	7.25 %	7.28 %	7.38 %	6.52 %

(a) The expected long-term rates of return for pension and other postretirement benefits are based on management's projections using a best-estimate of expected returns, volatilities and correlations for each asset class. Each plan's specific current and expected asset allocations are also considered in developing a reasonable return assumption.

The following table provides the assumed health care cost trend rates for the years ended December 31:

	2024	2023	2022
PPL			
Health care cost trend rate assumed for next year			
– obligations	7.00 %	6.25 %	6.50 %
– cost	6.25 %	6.50 %	6.25 %
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)			
– obligations	5.00 %	5.00 %	5.00 %
– cost	5.00 %	5.00 %	5.00 %
Year that the rate reaches the ultimate trend rate			
– obligations	2033	2029	2029
– cost	2029	2029	2027

The funded status of PPL's plans at December 31 was as follows:

	Pension Benefits		Other Postretirement Benefits	
	2024	2023	2024	2023
Change in Benefit Obligation				
Benefit Obligation, beginning of period	$ 3,454	$ 3,333	$ 538	$ 534
Service cost	35	34	6	6
Interest cost	183	188	29	30
Participant contributions	—	—	8	9
Plan amendments	(13)	3	—	—
Actuarial (gain) loss	(131)	179	(4)	18
Settlements	—	(3)	—	—
Gross benefits paid	(284)	(280)	(56)	(59)
Federal subsidy	—	—	2	—
Benefit Obligation, end of period	3,244	3,454	523	538
Change in Plan Assets				
Plan assets at fair value, beginning of period	3,176	3,149	438	417
Actual return on plan assets	34	297	25	54
Employer contributions	10	13	14	16
Participant contributions	—	—	7	7
Transfer out (a)	—	—	(13)	—
Settlements	—	(3)	—	—
Gross benefits paid	(284)	(280)	(54)	(56)
Plan assets at fair value, end of period	2,936	3,176	417	438
Funded Status, end of period	$ (308)	$ (278)	$ (106)	$ (100)
Amounts recognized in the Balance Sheets consist of:				
Noncurrent asset	$ 19	$ 7	$ 8	$ 10
Current liability	(10)	(10)	(13)	(14)
Noncurrent liability	(317)	(275)	(101)	(96)
Net amount recognized, end of period	$ (308)	$ (278)	$ (106)	$ (100)
Amounts recognized in AOCI and regulatory assets/liabilities (pre-tax) consist of:				
Prior service cost (credit)	$ (6)	$ 11	$ 9	$ 10
Net actuarial (gain) loss	1,164	1,017	(90)	(96)
Total	$ 1,158	$ 1,028	$ (81)	$ (86)
Total accumulated benefit obligation for defined benefit pension plans	$ 3,116	$ 3,312		

(a) Transfer of excess funds from the PPL Bargaining Unit Retiree Health Plan VEBA to be used to pay medical claims of active bargaining unit employees.

For PPL's pension and other postretirement benefit plans, the amounts recognized in AOCI and regulatory assets/liabilities at December 31 were as follows:

	Pension Benefits		Other Postretirement Benefits	
	2024	2023	2024	2023
AOCI	$ 283	$ 235	$ 16	$ 14
Regulatory assets/liabilities	875	793	(97)	(100)
Total	$ 1,158	$ 1,028	$ (81)	$ (86)

The actuarial gain for pension plans in 2024 was primarily related to a change in the discount rate used to measure the benefit obligations of those plans. The actuarial loss for pension plans in 2023 was related to a change in the discount rate used to measure the benefit obligations of those plans.

The following tables provide information on pension plans where the projected benefit obligation (PBO) or accumulated benefit obligation (ABO) exceed the fair value of plan assets:

	PBO in excess of plan assets	
	2024	2023
Projected benefit obligation	$ 2,719	$ 2,891
Fair value of plan assets	2,392	2,606

	ABO in excess of plan assets	
	2024	2023
Accumulated benefit obligation	$ 2,618	$ 1,773
Fair value of plan assets	2,392	1,594

(PPL Electric)

Although PPL Electric does not directly sponsor any defined benefit plans, it is allocated a portion of the funded status and costs of plans sponsored by PPL Services based on its participation in those plans, which management believes are reasonable. The actuarially determined obligations of current active employees and retirees are used as a basis to allocate total plan activity, including active and retiree costs and obligations. Allocations to PPL Electric resulted in assets/(liabilities) at December 31 as follows:

	2024	2023
Pension	$ (83)	$ (65)
Other postretirement benefits	(60)	(55)

(LG&E)

Although LG&E does not directly sponsor any defined benefit plans, it is allocated a portion of the funded status and costs of plans sponsored by LKE. LG&E is also allocated costs of defined benefits plans from LKS for defined benefit plans sponsored by LKE. See Note 13 for additional information on costs allocated to LG&E from LKS. These allocations are based on LG&E's participation in those plans, which management believes are reasonable. The actuarially determined obligations of current active employees and retired employees of LG&E are used as a basis to allocate total plan activity, including active and retiree costs and obligations. Allocations to LG&E resulted in assets/(liabilities) at December 31 as follows:

	2024	2023
Pension	$ 29	$ 34
Other postretirement benefits	(44)	(44)

(KU)

Although KU does not directly sponsor any defined benefit plans, it is allocated a portion of the funded status and costs of plans sponsored by LKE. KU is also allocated costs of defined benefit plans from LKS for defined benefit plans sponsored by LKE. See Note 13 for additional information on costs allocated to KU from LKS. These allocations are based on KU's participation in those plans, which management believes are reasonable. The actuarially determined obligations of current active employees and retired employees of KU are used as a basis to allocate total plan activity, including active and retiree costs and obligations. Allocations to KU resulted in assets/(liabilities) at December 31 as follows.

	2024	2023
Pension	$ 46	$ 51
Other postretirement benefits	(8)	(9)

Plan Assets - Pension Plans

(PPL)

All of PPL's qualified pension plans are invested in the PPL Services Corporation Master Trust (the Master Trust) that also includes 401(h) accounts that are restricted for certain other postretirement benefit obligations of PPL, RIE and LKE. The investment strategy for the Master Trust is to achieve a risk-adjusted return on a mix of assets that, in combination with PPL's funding policy, will ensure that sufficient assets are available to provide long-term growth and liquidity for benefit payments,

while also managing the duration of the assets to complement the duration of the liabilities. The Master Trust benefits from a wide diversification of asset types, investment fund strategies and external investment fund managers, and therefore has no significant concentration of risk.

The investment policy of the Master Trust outlines investment objectives and defines the responsibilities of the EBPB, external investment managers, investment advisor and trustee and custodian. The investment policy is reviewed annually by PPL's Board of Directors.

The EBPB created a risk management framework around the trust assets and pension liabilities. This framework considers the trust assets as being composed of three sub-portfolios: growth, immunizing and liquidity portfolios. The growth portfolio is comprised of investments that generate a return at a reasonable risk, including equity securities, certain debt securities and alternative investments. The immunizing portfolio consists of debt securities, generally with long durations, and derivative positions. The immunizing portfolio is designed to offset a portion of the change in the pension liabilities due to changes in interest rates. The liquidity portfolio consists primarily of cash and cash equivalents.

Target allocation ranges have been developed for each portfolio based on input from external consultants with a goal of limiting funded status volatility. The EBPB monitors the investments in each portfolio and seeks to obtain a target portfolio that emphasizes reduction of risk of loss from market volatility. In pursuing that goal, the EBPB establishes revised guidelines from time to time. EBPB investment guidelines as of the end of 2024 are presented below.

The asset allocation for the trust and the target allocation by portfolio at December 31 are as follows:

	Percentage of trust assets		2024
	2024	2023	Target Asset Allocation
Growth Portfolio	**55 %**	**54 %**	**55 %**
Equity securities	30 %	31 %	
Debt securities (a)	13 %	12 %	
Alternative investments	12 %	11 %	
Immunizing Portfolio	**43 %**	**43 %**	**43 %**
Debt securities (a)	35 %	36 %	
Derivatives (b)	8 %	7 %	
Liquidity Portfolio	**2 %**	**3 %**	**2 %**
Total	100 %	100 %	100 %

(a) Includes commingled debt funds, which PPL treats as debt securities for asset allocation purposes.
(b) Includes posted collateral to support derivative instruments subject to counterparty risk.

(PPL)

The fair value of net assets in the Master Trust by asset class and level within the fair value hierarchy was:

	December 31, 2024				December 31, 2023			
	Fair Value Measurements Using				Fair Value Measurements Using			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3

PPL Services Corporation Master Trust assets, at fair value	2,948	$ 424	$ 824	$ 19	3,315	$ 421	$ 1,012	$ 10
Receivables and payables, net (b)	102				(16)			
401(h) accounts restricted for other postretirement benefit obligations	(114)				(124)			
Total PPL Services Corporation Master Trust pension assets	$ 2,936				$ 3,175			

(a) In accordance with accounting guidance, certain investments that are measured at fair value using the net asset value per share (NAV), or its equivalent, have not been classified in the fair value hierarchy. The fair value amounts presented in the table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position.

(b) Receivables and payables, net represents amounts for investments sold/purchased but not yet settled along with interest and dividends earned but not yet received.

A reconciliation of the Master Trust assets classified as Level 3 at December 31, 2024 is as follows:

	Corporate debt
Balance at beginning of period	$ 10
Actual return on plan assets:	
Relating to assets still held at the reporting date	(2)
Relating to assets sold during the period	7
Purchases, sales and settlements	4
Balance at end of period	$ 19

A reconciliation of the Master Trust assets classified as Level 3 at December 31, 2023 is as follows:

	Corporate debt
Balance at beginning of period	$ 16
Actual return on plan assets:	
Relating to assets still held at the reporting date	(2)
Relating to assets sold during the period	4
Purchases, sales and settlements	(8)
Balance at end of period	$ 10

Cash and cash equivalents include deposits in banks, collateral accounts with brokers, and short-term investment funds, for which the carrying amounts disclosed approximate fair value based on their short-term nature.

The market approach is used to measure fair value of equity securities. The fair value measurements of equity securities (excluding commingled funds), which are generally classified as Level 1, are based on quoted prices in active markets. These securities represent actively and passively managed investments that are managed against various equity indices.

Investments in commingled equity and debt funds are categorized as equity securities. Investments in commingled equity funds include funds that invest in U.S. and international equity securities. Investments in commingled debt funds include funds that invest in a diversified portfolio of emerging market debt obligations, as well as funds that invest in investment grade long-duration fixed-income securities.

The fair value measurements of debt securities are generally based on evaluations that reflect observable market information, such as actual trade information for identical securities or for similar securities, adjusted for observable differences. The fair value of debt securities is generally measured using a market approach, including the use of pricing models, which incorporate observable inputs. Common inputs include benchmark yields, relevant trade data, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as payment data, future predicted cash flows, collateral performance and new issue data. For the Master Trust, these securities represent investments in securities issued by U.S. Treasury and U.S. government sponsored agencies; investments securitized by residential mortgages, auto loans, credit cards and other pooled loans; investments in investment grade and non-investment grade bonds issued by U.S. companies across several industries; investments in debt securities issued by foreign governments and corporations.

Investments in real estate represent an investment in a partnership whose purpose is to manage investments in U.S. real estate properties diversified geographically and across major property types (e.g., office, industrial, retail, etc.). The partnership has limitations on the amounts that may be redeemed based on available cash to fund redemptions. Additionally, the general partner may decline to accept redemptions when necessary to avoid adverse consequences for the partnership, including legal and tax implications, among others. The fair value of the investment is based upon a partnership unit value.

Investments in private equity represent interests in partnerships in multiple early-stage venture capital funds and private equity fund of funds that use a number of diverse investment strategies. The partnerships have limited lives of at least 10 years, after which liquidating distributions will be received. Prior to the end of each partnership's life, the investment cannot be redeemed with the partnership; however, the interest may be sold to other parties, subject to the general partner's approval. Fair value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

Investments in private credit represent pools of actively managed loans that span capital structure and borrower type. Strategies carry different types and levels of risk. Returns from those strategies will vary in terms of yield, fees generated, loan loss rates and the pace of principal repayment. Investments have limited lives of approximately 2-8 years. The investment cannot be redeemed with the general partner; however, the interest may be sold to other parties, subject to the general partner’s approval. Fair value is based on an ownership interest in partners’ capital to which a proportionate share of net assets is attributed.

At December 31, 2024, the Master Trust had unfunded commitments of $59 million that may be required during the lives of the real estate, private equity and private credit partnerships.
Investments in hedge funds represent investments in a fund of hedge funds. Hedge funds seek a return utilizing a number of diverse investment strategies. The strategies, when combined, aim to reduce volatility and risk while attempting to deliver positive returns under most market conditions. Major investment strategies for the fund of hedge funds include long/short equity, tactical trading, event driven, and relative value. Shares may be redeemed with 45 days prior written notice. The fund is subject to short term lockups and other restrictions. The fair value for the fund has been estimated using the net asset value per share.

The fair value measurements of derivative instruments utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these instruments may be valued using models, including standard option valuation models and standard industry models. These securities primarily represent investments in treasury futures, total return swaps, interest rate swaps and swaptions (the option to enter into an interest rate swap), which are valued based on quoted prices, changes in the value of the underlying exposure or on the swap details, such as swap curves, notional amount, index and term of index, reset frequency, volatility and payer/receiver credit ratings.

Plan Assets - Other Postretirement Benefit Plans

The investment strategy with respect to other postretirement benefit obligations is to fund VEBA trusts and/or 401(h) accounts with voluntary contributions and to invest in a tax efficient manner. Excluding the 401(h) accounts included in the Master Trust, other postretirement benefit plans are invested in a mix of assets for long-term growth with an objective of earning returns that provide liquidity as required for benefit payments. These plans benefit from diversification of asset types, investment fund strategies and investment fund managers and, therefore, have no significant concentration of risk. Equity securities include investments in a large-cap commingled fund and a global equity exchange-traded fund. Ownership interests in commingled funds that invest entirely in debt securities are classified as equity securities, but treated as debt securities for asset allocation and target allocation purposes. Ownership interests in money market funds are treated as cash and cash equivalents for asset allocation and target allocation purposes. The asset allocation for the PPL VEBA trusts and the target allocation, by asset class, at December 31 are detailed below.

	Percentage of plan assets		Target Asset Allocation
	2024	2023	2024
Asset Class			
Equity securities	45 %	46 %	45 %
Debt securities (a)	49 %	48 %	49 %
Cash and cash equivalents (b)	6 %	6 %	6 %
Total	100 %	100 %	100 %

(a) Includes commingled debt funds and debt securities.
(b) Includes money market funds.

The fair value of assets in the other postretirement benefit plans by asset class and level within the fair value hierarchy was:

	December 31, 2024				December 31, 2023			
	Fair Value Measurement Using				Fair Value Measurement Using			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Money market funds	$ 19	$ 19	$ —	$ —	$ 20	$ 20	$ —	$ —
Equity securities:								
Large-cap equity fund measure at NAV (a)	71	—	—	—	76	—	—	—
Commingled debt fund measured at NAV (a)	78	—	—	—	84	—	—	—
Global equity exchange-traded fund	70	70	—	—	72	72	—	—
Long-term bond exchange-traded fund	74	74	—	—	74	74	—	—
Total VEBA trust assets, at fair value	312	$ 163	$ —	$ —	326	$ 166	$ —	$ —
Receivables and payables, net (b)	(9)				(12)			
401(h) account assets	114				124			
Total other postretirement benefit plan assets	$ 417				$ 438			

(a) In accordance with accounting guidance certain investments that are measured at fair value using the net asset value per share (NAV), or its equivalent, have not been classified in the fair value hierarchy. The fair value amounts presented in the table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position.
(b) Receivables and payables represent amounts for investments sold/purchased but not yet settled along with interest and dividends earned but not yet received.

Investments in money market funds represent investments in funds that invest primarily in a diversified portfolio of investment grade money market instruments, including, but not limited to, commercial paper, notes, repurchase agreements and other evidences of indebtedness with a maturity not exceeding 13 months from the date of purchase. The primary objective of the fund is a level of current income consistent with stability of principal and liquidity. Redemptions can be made daily on this fund.

Investments in large-cap equity securities represent investments in a passively managed equity index fund that invests in securities and a combination of other collective funds. Fair value measurements are not obtained from a quoted price in an active market but are based on firm quotes of net asset values per share as provided by the trustee of the fund. Redemptions can be made daily on this fund.

Investments in commingled debt securities represent investments in a fund that invests in a diversified portfolio of investment grade long-duration fixed income securities. Redemptions can be made daily on these funds.

Investments in global equity exchange-traded fund represents a passively-managed pooled investment vehicle that invests in developed market equities and is designed to track the performance of the MSCI World Index. Fair value measurements can be obtained from a quoted price on the exchange. Redemptions can be made daily on this fund.

Investments in long-term bond exchange-traded fund represents a passively-managed pooled investment vehicle that is designed to track the performance of the Bloomberg U.S. Long Government/Credit Float Adjusted Index, which includes all medium and larger issues of U.S. Government, investment-grade corporate and investment-grade international dollar-denominated bonds that have maturities of greater than 10 years. Fair value measurements can be obtained from a quoted price on the exchange. Redemptions can be made daily on this fund.

Expected Cash Flows - Defined Benefit Plans *(PPL)*

PPL does not plan to contribute to its pension plans in 2025, as PPL's defined benefit pension plans have the option to utilize available prior year credit balances to meet current and future contribution requirements.

PPL sponsors various non-qualified supplemental pension plans for which no assets are segregated from corporate assets. PPL expects to make approximately $10 million of benefit payments under these plans in 2025.

PPL is not required to make contributions to its other postretirement benefit plans that are funded through VEBA trusts and 401(h) accounts. However, postretirement benefits for certain non-union employees are not funded in such trusts. PPL pays for these benefits from its general assets and expects to make $13 million of postretirement benefit plan payments for these employees in 2025.

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid by the plans and the following federal subsidy payments are expected to be received by PPL.

		Other Postretirement	
	Pension	Benefit Payment	Expected Federal Subsidy
2025	$ 304	$ 50	$ —
2026	297	49	—
2027	288	49	—
2028	282	48	—
2029	276	47	—
2030-2034	1,298	218	—

Savings Plans *(All Registrants)*

Substantially, all employees of PPL's subsidiaries are eligible to participate in deferred savings plans (401(k)s). Employer contributions to the plans were:

	2024	2023	2022
PPL	$ 53	$ 48	$ 36
PPL Electric	9	8	6
LG&E	8	8	7
KU	6	6	5

11. Jointly Owned Facilities

(PPL, LG&E and KU)

At December 31, 2024 and 2023, the Balance Sheets reflect the owned interests in the generating plants listed below.

	Ownership Interest	Electric Plant	Accumulated Depreciation	Construction Work in Progress
PPL				
December 31, 2024				
Trimble County Unit 1	75.00 %	$ 462	$ 124	$ 1
Trimble County Unit 2	75.00 %	1,549	323	10
December 31, 2023				
Trimble County Unit 1	75.00 %	$ 464	$ 110	$ —
Trimble County Unit 2	75.00 %	1,490	300	49
LG&E				
December 31, 2024				
E.W. Brown Units 6-7	38.00 %	$ 53	$ 29	$ —
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00 %	52	30	—
Trimble County Unit 1	75.00 %	462	124	1

Mercer Solar	63.00 %	12	—	1
Mill Creek 5	69.00 %	—	—	3
Brown Wind	64.00 %	1	—	—

Each subsidiary owning these interests provides its own funding for its share of the facility. Each receives a portion of the total output of the generating plants equal to its percentage ownership. The share of fuel and other operating costs associated with the plants is included in the corresponding operating expenses on the Statements of Income.

12. Commitments and Contingencies

Energy Purchase Commitments

(PPL, LG&E and KU)

LG&E and KU enter into purchase contracts to supply the coal and natural gas requirements for generation facilities and LG&E's retail natural gas supply operations. These contracts include the following commitments:

Contract Type	Maximum Maturity Date
Natural Gas Fuel	2026
Natural Gas Retail Supply	2025
Coal	2030
Coal Transportation and Fleeting Services	2033
Natural Gas Transportation	2055

LG&E and KU have a PPA with OVEC expiring in June 2040. See footnote (d) to the table in "Guarantees and Other Assurances" below for information on the OVEC power purchase contract. Future obligations for power purchases from OVEC are demand payments, comprised of debt-service payments and contractually-required reimbursements of plant operating, maintenance and other expenses, and are projected as follows:

	LG&E	KU	Total
2025	$ 25	$ 11	$ 36
2026	27	12	39
2027	27	12	39
2028	25	11	36
2029	25	11	36
Thereafter	177	79	256
Total	$ 306	$ 136	$ 442

LG&E and KU had total energy purchases under the OVEC PPA for the years ended December 31 as follows:

	2024	2023	2022
LG&E	$ 21	$ 20	$ 21
KU	9	9	9
Total	$ 30	$ 29	$ 30

(PPL)

RIE enters into purchase contracts to supply electricity for electricity distribution operations and for the delivery, storage and supply of natural gas for RIE's retail natural gas operations.

These contracts include the following commitments:

Contract Type	Maximum Maturity Date
Electric power	2027
Gas-related	Beyond 2030

RIE's commitments under these long-term contracts subsequent to December 31, 2024 are summarized in the table below.

	Total	2025	2026-2027	2028-2029	Thereafter
Energy Purchase Obligations	$ 936	$ 274	$ 240	$ 122	$ 300

Long-term Contracts for Renewable Energy *(PPL)*

Several of the obligations included in the table above relate to certain long-term contracts for renewable energy, including:

- the Deepwater Wind PPA, involving a proposal for a small-scale renewable energy generation project of up to eight offshore wind turbines with an aggregate nameplate capacity of up to 30 MW to benefit the Town of New Shoreham and an underwater cable to Block Island, which entered into service in October 2016;
- the Three-State Procurement, involving six clean energy long-term contracts pursuant to the Rhode Island Long-Term Contracting Standard (LTCS) of which 36.427 MW is currently operational and with respect to which RIE collects 2.75% remunerations in the annual payments pursuant to the LTCS; and
- the Offshore Wind Energy Procurement, pursuant to a 20-year PPA with Deep Water Wind Rev I, LLC (Revolution Wind), with an expected nameplate capacity of 408 MW expected to be operational in 2026; this contract was approved without remuneration but allows RIE to seek costs incurred under the agreement.

In addition, RIE is obligated under the LTCS (as amended in 2014) to annually solicit for renewable projects until 90 MW of renewable contracting capacity has been secured. The RIPUC-approved solicitations currently in service include: (i) a 15-year PPA with Orbit Energy Rhode Island, LLC for a 3.2 MW nameplate anaerobic digester biogas project located in Johnston, Rhode Island, placed in service in 2017, (ii) a 15-year PPA with Black Bear Development Holdings, LLC for a 3.9 MW nameplate run-of-river hydroelectric plant located in Orono, Maine, placed in service in 2013, (iii) a 15-year PPA with Copenhagen Wind Farm, LLC for an 80 MW nameplate land-based wind project located in Denmark, New York, placed in

service in 2018, and (iv) a 15-year PPA with Rhode Island LFG Genco, LLC for a 32.1 MW nameplate combined cycle combustion turbine generating facility fueled by a landfill gas project located in Johnston, Rhode Island, placed in service in 2013. On October 7, 2024, RIE issued an RFP soliciting 20 MW through 150 MW of nameplate capacity of renewable contracting capacity; this solicitation is driven by a terminated PPA and is required in order to fulfill the 90 MW under LTCS.

In addition to the LTCS, RIE has conditionally awarded 200 MW under the 2023 Rhode Island Offshore Wind RFP for newly developed offshore wind energy projects, under the Affordable Clean Energy Security Act (ACES), as amended in 2022. RIE is currently in the contract negotiation period. RIE must negotiate in good faith to achieve a commercially reasonable contract and may file such contract with the RIPUC for approval once negotiations are complete, which is tentatively scheduled for March 2025.

As approved by the RIPUC, RIE is allowed to pass through commodity-related/purchased power costs to customers and collect remuneration equal to 2.75% for long-term contracts approved prior to January 1, 2022, pursuant to LTCS as amended in 2022, and that have achieved commercial operation. For long-term contracts approved pursuant to LTCS or ACES, both as amended, on or after January 1, 2022, RIE is entitled to financial remuneration equal to 1.0% through December 31, 2026, for those projects that are commercially operating. For long-term contracts approved pursuant to LTCS or ACES on or after January 1, 2027, RIE is not entitled to any financial remuneration, unless otherwise granted by the RIPUC. Also, the 2022 amendments to LTCS and ACES added a provision, which provides that for any calendar year in which RIE's actual return on equity exceeds the return on equity allowed by the RIPUC in the last general rate case, the RIPUC may adjust any or all remuneration to assure that such remuneration does not result in or contribute toward RIE earning above its allowed return for such calendar year.

Legal Matters

(All Registrants)

PPL and its subsidiaries are involved in legal proceedings, claims and litigation in the ordinary course of business. PPL and its subsidiaries cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

Narragansett Electric Litigation *(PPL)*

Energy Efficiency Programs Investigation

Narragansett Electric, while under the ownership of National Grid, performed an internal investigation into conduct associated with its energy efficiency programs. On June 27, 2022, the RIPUC opened a new docket (RIPUC Docket No. 22-05-EE) to investigate RIE's actions and the actions of employees of National Grid USA and affiliates during the time RIE was a National Grid USA affiliate being provided services by National Grid USA Service Company, Inc. relating to the manipulation of the reporting of invoices affecting the calculation of past energy efficiency shareholder incentives and the resulting impact on customers. The Rhode Island Attorney General and National Grid USA intervened in the docket and the Rhode Island Division of Public Utilities and Carriers (the Division) is an automatic party in the docket.

On January 19, 2023, the Division filed a motion to dismiss RIPUC Docket No. 22-05-EE without prejudice. As grounds for its motion, the Division stated that sufficient evidence exists in the docket to warrant an independent summary investigation by the Division. If the Division finds sufficient grounds, the Division may proceed to a formal hearing regarding the matters under investigation. Upon the conclusion of its investigation, the Division will provide the RIPUC with a report outlining the Division's findings and final decision. On January 30, 2023, the Rhode Island Attorney General filed an objection to the Division's motion to dismiss; RIE and National Grid USA each filed responses with the RIPUC requesting that any additional action taken by the RIPUC or the Division be considered after National Grid USA completes its internal investigation report, which National Grid USA filed with the RIPUC on March 10, 2023. On February 24, 2023, the Division initiated the independent summary investigation that it had referenced in its motion to dismiss. The RIPUC held a hearing on March 28, 2023 to hear oral arguments regarding the Division's motion to dismiss and subsequently denied the motion. On November 27, 2023, the Division filed testimony recommending the RIPUC disallow a portion of the performance incentive awarded from 2012 through 2021. On January 19, 2024, the Division and the Rhode Island Attorney General filed their respective briefs recommending that the RIPUC assess financial penalties on the company. The Division also recommended that the RIPUC consider further regulatory investigations and analysis within each of the energy efficiency dockets from 2012 through 2020, to confirm the accuracy of claimed savings and to document all conduct and actions that would trigger penalties. On April 2, 2024, the RIPUC issued an amended order that expressly expands the scope of the proceeding to address issues of accountability and the question of whether statutory penalties should be assessed against RIE relating to the manipulation of the

reporting of invoices affecting the recovery of past shareholder incentives and the resulting impact on RIE's customers. This RIPUC proceeding remains open and, in parallel, the Division's summary investigation remains ongoing. In the RIPUC proceeding, RIE and National Grid USA filed testimony on June 14, 2024, supporting their position that the appropriate amount to be refunded to the energy efficiency program is less than $1 million. The Division's current position is that $11 million is the appropriate amount to be refunded to the energy efficiency program. This testimony does not address potential statutory penalties and the Division's testimony on potential statutory penalties is due February 28, 2025. The Division's testimony on accountability and potential statutory penalties is currently due February 21, 2025, and RIE's and National Grid's reply testimony will occur at the evidentiary hearings scheduled for March 2025. At this time, it is not possible to predict the final outcome, or determine the total amount of any additional liabilities that may be incurred by RIE in connection with this matter or the Division's summary investigation. RIE does not expect this matter will have a material adverse effect on its results of operations, financial position or cash flows.

E.W. Brown Environmental Assessment *(PPL and KU)*

KU is undertaking extensive remedial measures at the E.W. Brown plant including closure of the former ash pond, implementation of a groundwater remedial action plan and performance of a corrective action plan including aquatic study of adjacent surface waters and risk assessment. The aquatic study and risk assessment are being undertaken pursuant to a 2017 agreed Order with the Kentucky Energy and Environment Cabinet (KEEC). KU conducted sampling of Herrington Lake in 2017 and 2018. In June 2019, KU submitted to the KEEC the required aquatic study and risk assessment, conducted by an independent third-party consultant, finding that discharges from the E.W. Brown plant have not had any significant impact on Herrington Lake and that the water in the lake is safe for recreational use and meets safe drinking water standards. On May 31, 2021, the KEEC approved the report and released a response to public comments. On August 6, 2021, KU submitted a *Supplemental Remedial Alternatives Analysis* report to the KEEC that outlines proposed additional fish, water, and sediment testing. On February 18, 2022, the KEEC provided approval to KU to proceed with the proposed sampling, which commenced in the spring of 2022. On November 17, 2022, KU submitted a *Supplemental Performance Monitoring Report* to the KEEC finding that there are no significant unaddressed risks to human health or the environment at the plant. KU revised the *Supplemental Performance Monitoring Report* on June 8, 2023, in response to KEEC comments from April 24, 2023. On September 1, 2023, the KEEC requested KU to propose additional monitoring or remedial measures. KU submitted a revised *Supplemental Performance Monitoring and Corrective Action Completion* on December 28, 2023. In August 2024, KU submitted a proposed environmental covenant to the KEEC specifying certain site restrictions. Discussions between KU and the KEEC are ongoing.

Water/Waste *(PPL, LG&E and KU)*

ELGs

In 2015, the EPA finalized ELGs for wastewater discharge permits for new and existing steam electricity generating facilities. These guidelines require deployment of additional control technologies providing physical, chemical and biological treatment and mandate operational changes including "zero discharge" requirements for certain wastewaters. The implementation date for individual generating stations was to be determined by the states on a case-by-case basis according to criteria provided by the EPA. In September 2017, the EPA issued a rule to postpone the compliance date for certain requirements. In October 2020, the EPA issued revisions to its best available technology standards for certain wastewaters and potential extensions to compliance dates (the Reconsideration Rule). On May 9, 2024, the EPA issued a final rule modifying the 2020 ELG revisions. The rule increases the stringency of previous control technology and zero discharge requirements, revises certain exemptions for generating units planned for retirement, and requires case-by-case limitations for legacy wastewaters based on the best professional judgment of the state regulators. Legal challenges to the final rule have been consolidated before the U.S. Court of Appeals for the Eighth Circuit. The final rule is currently under evaluation by PPL, LG&E, and KU, but could potentially result in significant operational changes and additional controls for LG&E and KU plants. The ELGs are expected to be implemented by the states or applicable permitting authorities in the course of their normal permitting activities. Certain costs are included in the Registrants' capital plans and expected to be recovered from customers through rate recovery mechanisms, but additional costs and recovery will depend on further regulatory developments at the state level.

CCRs

In 2015, the EPA issued a final rule governing management of CCRs which include fly ash, bottom ash and sulfur dioxide scrubber wastes (2015 CCR Rule). The 2015 CCR Rule imposed extensive new requirements for certain CCR impoundments and landfills, including public notifications, location restrictions, design and operating standards, groundwater monitoring and corrective action requirements, and closure and post-closure care requirements, and specifies restrictions relating to the beneficial use of CCRs. In January 2022, the EPA issued several proposed regulatory determinations, facility notifications, and public announcements which indicate increased scrutiny by the EPA to determine the adequacy of measures taken by facility

owners and operators to achieve closure of CCR surface impoundments and landfills. In particular, the agency indicated that it will focus on certain practices which it views as posing a threat of continuing groundwater contamination. On May 8, 2024, the EPA issued a final rule (2024 CCR Rule) establishing regulatory requirements for inactive surface impoundments at inactive electricity generation facilities (legacy impoundments). The 2024 CCR Rule also establishes identification, groundwater monitoring, corrective action, closure, and post-closure care requirements for all CCR management units, as defined in the rule, at regulated CCR facilities regardless of how or when the CCR was placed. The rule also requires LG&E and KU to complete applicability determinations, implement site security measures, initiate weekly inspections and monthly monitoring of the impoundment, create a website, and complete hazard assessments and reports for its legacy impoundments. Additionally, the rule could potentially subject CCR management units that have previously completed remedial action and closure and certain beneficial use projects to additional federal regulatory requirements. Legal challenges to the rule have been filed in the D.C. Circuit Court, and oral argument is expected in the second half of 2025.

In connection with the 2015 CCR Rule, LG&E and KU recorded adjustments to existing AROs beginning in 2015. In connection with the 2024 CCR Rule, in the second quarter of 2024, LG&E and KU recognized ARO obligations related to preliminary risk assessments, facility evaluations, feasibility studies and sampling. See Note 18 for additional information. The results of those evaluations, as well as future guidance, regulatory determinations, rulemakings, implementation determinations and other developments could potentially require revisions to current LG&E and KU compliance plans including additional monitoring and remediation at surface impoundments and landfills, the cost of which could be material. PPL, LG&E and KU are unable to predict the outcome of the ongoing litigation, rulemaking, and regulatory determinations or potential impacts on current LG&E and KU compliance plans. PPL, LG&E and KU are currently finalizing or revising closure plans and schedules in accordance with applicable regulations and further material changes to AROs, current capital plans or operating costs may be required as estimates are refined based on closure developments, groundwater monitoring results, and regulatory or legal proceedings. Costs relating to this rule are expected to be subject to rate recovery.

LG&E and KU received KPSC approval for a compliance plan associated with the 2015 CCR Rule providing for the closure of impoundments at the Mill Creek, Trimble County, E.W. Brown, and Ghent stations, and construction of process water management facilities at those plants. In addition to the foregoing measures required for compliance with the federal CCR Rule, KU also received KPSC approval for its plans to close impoundments at the retired Green River, Pineville and Tyrone plants to comply with applicable state law. LG&E and KU have completed planned closure measures at most of the subject impoundments and have commenced post closure groundwater monitoring as required at those facilities. LG&E and KU generally expect to complete all impoundment closures within five years of commencement, although a longer period may be required to complete closure of some facilities. Associated costs are expected to be subject to rate recovery.

Superfund and Other Remediation

(All Registrants)

The Registrants are potentially responsible for investigating and remediating contamination under the federal Superfund program and similar state programs. Actions are under way at certain sites including former manufactured gas plants in Pennsylvania, Rhode Island and Kentucky previously owned or operated by, or currently owned by predecessors or affiliates of, PPL subsidiaries.

Depending on the outcome of investigations at identified sites where investigations have not begun or been completed, or developments at sites for which information is incomplete, additional costs of remediation could be incurred. PPL, PPL Electric, LG&E and KU lack sufficient information about such additional sites to estimate any potential liability or range of reasonably possible losses, if any, related to these sites. Such costs, however, are not currently expected to be significant.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of manufactured gas plant operations. As a result, individual states may establish stricter standards for water quality and soil cleanup, that could require several PPL subsidiaries to take more extensive assessment and remedial actions at former manufactured gas plants. The Registrants cannot reasonably estimate a range of possible losses, if any, related to these matters.

(PPL and PPL Electric)

PPL Electric is a potentially responsible party for a share of clean-up costs at certain sites. Cleanup actions have been or are being undertaken at these sites as requested by governmental agencies, the costs of which have not been and are not expected to be significant to PPL Electric.

At December 31, 2024 and December 31, 2023, PPL Electric had a recorded liability of $8 million and $8 million, representing its best estimate of the probable loss incurred to remediate these sites.

(PPL)

RIE is a potentially responsible party for a share of clean-up costs at certain sites including former manufactured gas plant facilities formerly owned by the Blackstone Valley Gas and Electric Company and the Rhode Island gas distribution assets of the New England Gas division of Southern Union Company and electric operations at certain RIE facilities. RIE is currently investigating and remediating, as necessary, those sites and certain other properties under agreements with governmental agencies, the costs of which have not been and are not expected to be significant to PPL.

At December 31, 2024 and December 31, 2023, RIE had a recorded liability of $98 million and $99 million, representing its best estimate of the remaining costs of environmental remediation activities. These undiscounted costs are expected to be incurred over approximately 30 years and to be subject to rate recovery. However, remediation costs for each site may be materially higher than estimated, depending on changing technologies and regulatory standards, selected end uses for each site, and actual environmental conditions encountered. RIE has recovered amounts from certain insurers and potentially responsible parties, and, where appropriate, may seek additional recovery from other insurers and potentially responsible parties, but it is uncertain whether, and to what extent, such efforts will be successful.

The RIPUC has approved two settlement agreements that provide for rate recovery of qualified remediation costs of certain contaminated sites located in Rhode Island and Massachusetts. Rate-recoverable contributions for electric operations of approximately $3 million are added annually to RIE's Environmental Response Fund, established with RIPUC approval in March 2000 to address such costs, along with interest and any recoveries from insurance carriers and other third-parties. In addition, RIE recovers approximately $1 million annually for gas operations under a distribution adjustment charge in which the qualified remediation costs are amortized over 10 years. See Note 7 for additional information on RIE's recorded environmental regulatory assets and liabilities.

Regulatory Issues

See Note 7 for information on regulatory matters related to utility rate regulation.

Electricity - Reliability Standards

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk electric system in North America. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk electric system, including electric utility companies, generators and marketers. Under the Federal Power Act, the FERC may assess civil penalties for certain violations.

PPL Electric, LG&E, KU and RIE monitor their compliance with the Reliability Standards and self-report or self-log potential violations of applicable reliability requirements whenever identified, and submit accompanying mitigation plans, as required. The resolution of a small number of potential violations is pending. Penalties incurred to date have not been significant. Any Regional Reliability Entity determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC.

In the course of implementing their programs to ensure compliance with the Reliability Standards by those PPL affiliates subject to the standards, certain other instances of potential non-compliance may be identified from time to time. The Registrants cannot predict the outcome of these matters, and an estimate or range of possible losses cannot be determined.

Gas - Security Directives *(PPL and LG&E)*

In May and July of 2021, the Department of Homeland Security’s (DHS) Transportation Security Administration released two security directives applicable to certain notified owners and operators of natural gas pipeline facilities (including local distribution companies) that the Transportation Security Administration has determined to be critical. The Transportation Security Administration has determined that LG&E is within the scope of the directive, while RIE has not been notified of this distinction. The first security directive required notified owners/operators to implement cybersecurity incident reporting to the DHS, designate a cybersecurity coordinator, and perform a gap assessment of current entity cybersecurity practices against

certain voluntary Transportation Security Administration security guidelines and report relevant results and proposed mitigation to applicable DHS agencies. The second security directive, revised in July of 2024, requires refinement of the cybersecurity implementation plan and the cybersecurity assessment plan. LG&E does not believe the security directives have had or will have a significant impact on LG&E's operations or financial condition.

Other

Guarantees and Other Assurances

(All Registrants)

In the normal course of business, the Registrants enter into agreements that provide financial performance assurance to third parties on behalf of certain subsidiaries. Examples of such agreements include guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries engage.

(PPL)

PPL fully and unconditionally guarantees all of the debt obligations of PPL Capital Funding.

(All Registrants)

The table below details guarantees provided as of December 31, 2024. "Exposure" represents the estimated maximum potential amount of future payments that could be required to be made under the guarantee. The Registrants believe the probability of expected payment/performance under each of these guarantees is remote, except for the guarantees and indemnifications related to the sale of Safari Holdings, which PPL believes are reasonably possible but not probable of occurring. For reporting purposes, on a consolidated basis, the guarantees of PPL include the guarantees of its subsidiary Registrants.

	Exposure at December 31, 2024		Expiration Date
PPL			
Indemnifications related to certain tax liabilities related to the sale of the U.K. utility business	£ 50	(a)	2028
PPL guarantee of Safari payment obligations under certain sale/leaseback financing transactions related to the sale of Safari Holdings	$ 100	(b)	2028
Indemnifications for losses suffered related to items not covered by Aspen Power's representation and warranty insurance associated with the sale of Safari Holdings	140	(c)	Various
LG&E and KU			
LG&E and KU obligation of shortfall related to OVEC		(d)	

(a) PPL WPD Limited entered into a Tax Deed dated June 9, 2021 in which it agreed to a tax indemnity regarding certain potential tax liabilities of the entities sold with respect to periods prior to the completion of the sale, subject to customary exclusions and limitations. Because National Grid Holdings One plc, the buyer, agreed to purchase indemnity insurance, the amount of the cap on the indemnity for these liabilities is £1, except with respect to certain surrenders of tax losses, for which the amount of the cap on the indemnity is £50 million.

(b) PPL guaranteed the payment obligations of Safari under certain sale/leaseback financing transactions executed by Safari. These guarantees will remain in place until Safari exercises its option to buy-out the projects under the sale/leaseback financings by the year 2028. Safari will indemnify PPL for any payments made by PPL or claims against PPL under the sale/leaseback transaction guarantees up to $25 million.

(c) Aspen Power has obtained representation and warranty insurance, therefore, PPL generally has no liability for its representations and warranties under the agreement except for losses suffered related to items not covered. Expiration of these indemnifications range from 18 months to 6 years from the date of the closing of the transaction, and PPL's aggregate liability for these claims will not exceed $140 million subject to certain adjustments plus the support obligations provided by PPL under sale-leaseback financings and PPAs that will be replaced by Aspen Power. PPL's support obligations related to the PPAs were replaced by Aspen Power and terminated on January 8, 2024.

(d) Pursuant to the OVEC power purchase contract, LG&E and KU are obligated to pay for their share of OVEC's excess debt service, post-retirement and decommissioning costs, as well as any shortfall from amounts included within a demand charge designed and expected to cover these costs over the term of the contract. PPL's proportionate share of OVEC's outstanding debt was $81 million at December 31, 2024, consisting of LG&E's share of $56 million and KU's share of $25 million. The maximum exposure and the expiration date of these potential obligations are not presently determinable. See "Energy Purchase Commitments" above for additional information on the OVEC power purchase contract.

The Registrants provide other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage provides maximum aggregate coverage of $231 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

13. Related Party Transactions

Wholesale Sales and Purchases *(LG&E and KU)*

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail customers. When LG&E has excess generation capacity after serving its own retail customers and its generation cost is lower than that of KU, KU purchases electricity from LG&E and vice versa. These transactions are reflected in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded at a price equal to the seller's fuel cost plus any split savings. Savings realized from such intercompany transactions are shared equally between both companies. The volume of energy each company has to sell to the other is dependent on its retail customers' needs and its available generation.

Support Costs *(PPL Electric, LG&E and KU)*

PPL Services and LKS provide the Registrants, their respective subsidiaries and each other with administrative, management and support services. For all services companies, the costs of directly assignable and attributable services are charged to the respective recipients as direct support costs. General costs that cannot be directly attributed to a specific entity are allocated and charged to the respective recipients as indirect support costs. PPL Services and LKS use a three-factor methodology that includes the applicable recipients' invested capital, operation and maintenance expenses and number of employees to allocate indirect costs. PPL Services may also use a ratio of overall direct and indirect costs or a weighted average cost ratio. PPL Services and LKS charged the following amounts for the years ended December 31, including amounts applied to accounts that are further distributed between capital and expense on the books of the recipients, based on methods that are believed to be reasonable.

	2024	2023	2022
PPL Electric from PPL Services	$ 227	$ 222	$ 241
LG&E from LKS	105	115	153
LG&E from PPL Services	66	42	13
KU from LKS	130	150	171
KU from PPL Services	65	48	14

In addition to the charges for services noted above, LKS makes payments on behalf of LG&E and KU for fuel purchases and other costs for products or services provided by third parties. LG&E and KU also provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between PPL and LG&E and KU are reimbursed through LKS.

Intercompany Borrowings

(PPL Electric)

CEP Reserves maintains a $800 million revolving line of credit with a PPL Electric subsidiary. At December 31, 2024, CEP Reserves had $222 million of borrowings outstanding. At December 31, 2023, CEP Reserves had no borrowings outstanding. The interest rates on borrowings are equal to one-month SOFR plus a spread. Interest income is reflected in "Interest Income from Affiliate" on the Income Statements.

(LG&E and KU)

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to the difference between LG&E's FERC borrowing limit and LG&E's commercial paper limit at an interest rate based on the lower of a market index of commercial paper issues and two additional rate options based on SOFR. At December 31, 2024, LG&E's money pool unused capacity was $682 million. At December 31, 2024 LG&E had borrowings outstanding of $43 million from KU and/or LKE. At December 31, 2023, LG&E's borrowings outstanding from KU and/or LKE were not significant.

KU participates in an intercompany money pool agreement whereby LKE and/or LG&E make available to KU funds up to the difference between KU's FERC borrowing limit and KU's commercial paper limit at an interest rate based on the lower of a market index of commercial paper issues and two additional rate options based on SOFR. At December 31, 2024, KU's money pool unused capacity was $437 million. At December 31, 2024 KU had borrowings outstanding of $73 million from LG&E and/or LKE. At December 31, 2023, KU's borrowings outstanding from LG&E and/or LKE were not significant.

VEBA Funds Receivable

(PPL Electric)

In 2018, PPL received a favorable private letter ruling from the IRS permitting a transfer of excess funds from the PPL Bargaining Unit Retiree Health Plan VEBA to a new subaccount within the VEBA, to be used to pay medical claims of active bargaining unit employees. In October 2024, additional excess funds were removed from the PPL Bargaining Unit Retiree Health Plan VEBA and deposited into the existing subaccount within the VEBA to be used to pay medical claims of active bargaining unit employees. Based on PPL Electric's participation in PPL's Other Postretirement Benefit plan, PPL Electric was allocated a portion of the excess funds from PPL Services. These funds have been recorded as an intercompany receivable on PPL Electric's balance sheets. The receivable balance decreases as PPL Electric pays incurred medical claims and is reimbursed by PPL Services. The intercompany receivable balance associated with these funds was $7 million at December 31, 2024, of which $4 million was reflected in "Accounts receivable from affiliates" and $3 million was reflected in "Other noncurrent assets" on PPL Electric's balance sheets. There was no intercompany receivable balance associated with these funds at December 31, 2023, as the initial allocation from the 2018 private letter ruling was depleted.

Other *(PPL Electric, LG&E and KU)*

See Note 1 for discussions regarding the intercompany tax sharing agreement (for PPL Electric, LG&E and KU) and intercompany allocations of stock-based compensation expense (for PPL Electric). For PPL Electric, LG&E and KU, see Note 10 for discussions regarding intercompany allocations associated with defined benefits.

14. Other Income (Expense) - net

(PPL)

The components of "Other Income (Expense) - net" for the years ended December 31, were:

	2024	2023	2022
Defined benefit plans - non-service credits (Note 10)	$ 42	$ 40	$ 47
Interest income	33	32	4
AFUDC - equity component	47	30	22
Charitable contributions	(5)	(5)	(14)
Talen litigation (a)	(2)	(124)	1
Miscellaneous	(1)	(13)	(6)
Other Income (Expense) - net	$ 114	$ (40)	$ 54

(a) PPL incurred legal expenses related to litigation associated with its former affiliate, Talen Montana, LLC, and certain affiliated entities (collectively, Talen), which was settled in December 2023.

(PPL Electric)

The components of "Other Income (Expense) - net" for the years ended December 31, were:

	2024	2023	2022
Defined benefit plans - non-service credits (Note 10)	$ 17	$ 20	$ 15
Interest income	8	8	3
AFUDC - equity component	23	16	16
Charitable contributions	(4)	(3)	(3)
Miscellaneous	1	(2)	(1)
Other Income (Expense) - net	$ 45	$ 39	$ 30

(LG&E)

The components of "Other Income (Expense) - net" for the years ended December 31, were:

	2024	2023	2022
Defined benefit plans - non-service credits (Note 10)	$ 3	$ —	$ 3
AFUDC - equity component	8	3	1
Charitable contributions	(1)	(1)	(1)
Miscellaneous	2	1	1
Other Income (Expense) - net	$ 12	$ 3	$ 4

(KU)

The components of "Other Income (Expense) - net" for the years ended December 31, were:

	2024	2023	2022
Defined benefit plans - non-service credits (Note 10)	$ 8	$ 6	$ 9
AFUDC - equity component	9	3	1
Charitable contributions	(1)	(1)	—
Miscellaneous	(1)	—	(2)
Other Income (Expense) - net	$ 15	$ 8	$ 8

15. Fair Value Measurements

(All Registrants)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. See Note 1 for information on the levels in the fair value hierarchy.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

	December 31, 2024				December 31, 2023			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
PPL								
Assets								
Cash and cash equivalents	$ 306	$ 306	$ —	$ —	$ 331	$ 331	$ —	$ —
Restricted cash and cash equivalents (a)	33	33	—	—	51	51	—	—
Total Cash, Cash Equivalents and Restricted Cash (b)	339	339	—	—	382	382	—	—
Special use funds (a):								
Money market fund	1	1	—	—	1	1	—	—
Commingled debt fund measured at NAV (c)	10	—	—	—	9	—	—	—
Commingled equity fund measured at NAV (c)	8	—	—	—	8	—	—	—
Total special use funds	19	1	—	—	18	1	—	—

	December 31, 2024				December 31, 2023			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Price risk management assets (d):								
Gas contracts	9	—	4	5	1	—	1	—
Total assets	$ 367	$ 340	$ 4	$ 5	$ 401	$ 383	$ 1	$ —

Total Cash, Cash Equivalents and Restricted Cash (b)	24	24	—	—	44	44	—	—
Total assets	$ 24	$ 24	$ —	$ —	$ 44	$ 44	$ —	$ —
Liabilities								
Price risk management liabilities:								
Interest rate swaps	$ 3	$ —	$ 3	$ —	$ 7	$ —	$ 7	$ —
Total price risk management liabilities	$ 3	$ —	$ 3	$ —	$ 7	$ —	$ 7	$ —
KU								
Assets								
Cash and cash equivalents	$ 13	$ 13	$ —	$ —	$ 14	$ 14	$ —	$ —
Restricted cash and cash equivalents (a)	16	16	—	—	24	24	—	—
Total Cash, Cash Equivalents and Restricted Cash (b)	29	29	—	—	38	38	—	—
Total assets	$ 29	$ 29	$ —	$ —	$ 38	$ 38	$ —	$ —

(a) Current portion is included in "Other current assets" and noncurrent portion is included in "Other noncurrent assets" on the Balance Sheets.
(b) Total Cash, Cash Equivalents and Restricted Cash provides a reconciliation of these items reported within the Balance Sheets to the sum shown on the Statements of Cash Flows.
(c) In accordance with accounting guidance, certain investments that are measured at fair value using net asset value per share (NAV), or its equivalent, have not been classified in the fair value hierarchy. The fair value amounts presented in the table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position.
(d) Current portion is included in "Other current assets" and "Other current liabilities" and noncurrent portion is included in "Other noncurrent assets" "Other deferred credits and noncurrent liabilities" on the Balance Sheets.

A reconciliation of net assets classified as Level 3 for the year ended December 31 is as follows:

	Gas Contracts
2024	
Balance at beginning of period	$ (19)
Total unrealized gains (losses) recognized as Regulatory Assets/Regulatory Liabilities	2
Settlements	19
Balance at end of period	$ 2

Special Use Funds *(PPL)*

The special use funds are investments restricted for paying active union employee medical costs. In 2018, PPL received a favorable private letter ruling from the IRS permitting a transfer of excess funds from the PPL Bargaining Unit Retiree Health Plan VEBA to a new subaccount within the VEBA to be used to pay medical claims of active bargaining unit employees. In 2024, additional excess funds were removed from the PPL Bargaining Unit Retiree Health Plan VEBA and deposited in the

existing subaccount within the VEBA to be used to pay medical claims of active bargaining unit employees. The funds are invested primarily in commingled debt and equity funds measured at NAV and are classified as investments in equity securities. Changes in the fair value of the funds are recorded to the Statements of Income.

Price Risk Management Assets/Liabilities

Interest Rate Swaps (PPL, LG&E and KU)

To manage interest rate risk, PPL, LG&E and KU use interest rate contracts such as forward-starting swaps, floating-to-fixed swaps and fixed-to-floating swaps. An income approach is used to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., SOFR and government security rates), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon. These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3.

Gas Contracts (PPL)

To manage gas commodity price risk associated with natural gas purchases, RIE utilizes over-the-counter (OTC) gas swaps contracts with pricing inputs obtained from the New York Mercantile Exchange (NYMEX) and the Intercontinental Exchange (ICE), except in cases where the ICE publishes seasonal averages or where there were no transactions within the last seven days. RIE may utilize discounting based on quoted interest rate curves, including consideration of non-performance risk, and may include a liquidity reserve calculated based on bid/ask spread. Substantially all of these price curves are observable in the marketplace throughout at least 95% of the remaining contractual quantity, or they could be constructed from market observable curves with correlation coefficients of 95% or higher. These contracts are classified as Level 2.

RIE also utilizes gas option and purchase and capacity transactions, which are valued based on internally developed models. Industry-standard valuation techniques, such as the Black-Scholes pricing model, are used for valuing such instruments. For valuations that include both observable and unobservable inputs, if the unobservable input is determined to be significant to the overall inputs, the entire valuation is classified as Level 3. This includes derivative instruments valued using indicative price quotations whose contract tenure extends into unobservable periods. In instances where observable data is unavailable, consideration is given to the assumptions that market participants would use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility, and contract duration. Such instruments are classified as in Level 3 as the model inputs generally are not observable. RIE considers non-performance risk and liquidity risk in the valuation of derivative instruments classified as Level 2 and Level 3.

The significant unobservable inputs used in the fair value measurement of the gas derivative instruments are implied volatility and gas forward curves. A relative change in commodity price at various locations underlying the open positions can result in significantly different fair value estimates.

Financial Instruments Not Recorded at Fair Value *(All Registrants)*

The carrying amounts of long-term debt on the Balance Sheets and their estimated fair values are set forth below. Long-term debt is classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement.

	December 31, 2024		December 31, 2023	
	Carrying Amount (a)	Fair Value	Carrying Amount (a)	Fair Value
PPL	$ 16,503	$ 15,562	$ 14,612	$ 14,031
PPL Electric	5,214	4,862	4,567	4,475
LG&E	2,471	2,295	2,469	2,369
KU	3,066	2,750	3,064	2,861

(a) Amounts are net of debt issuance costs.

The carrying amounts of other current financial instruments (except for long-term debt due within one year) approximate their fair values because of their short-term nature.

16. Derivative Instruments and Hedging Activities

Risk Management Objectives

(All Registrants)

PPL has a risk management policy approved by the Board of Directors to manage market risk associated with commodities, interest rates on debt issuances (including price, liquidity and volumetric risk) and credit risk (including non-performance risk and payment default risk). The Risk Management Committee, comprised of senior management and chaired by the Vice President-Financial Strategy and Chief Risk Officer, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions, verification of risk and transaction limits, value-at-risk analyses (VaR, a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level) and the coordination and reporting of the Enterprise Risk Management program.

Market Risk

Market risk includes the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument as well as market liquidity and volumetric risks. Forward contracts, futures contracts, options, swaps and structured transactions are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices and interest rates. Many of these contracts meet the definition of a derivative. All derivatives are recognized on the Balance Sheets at their fair value, unless NPNS is elected.

The following summarizes the market risks that affect PPL and its subsidiaries.

Interest Rate Risk

- PPL and its subsidiaries are exposed to interest rate risk associated with forecasted fixed-rate and existing floating-rate debt issuances. PPL and LG&E utilize over-the-counter interest rate swaps to limit exposure to market fluctuations on floating-rate debt. PPL, LG&E and KU utilize forward starting interest rate swaps to hedge changes in benchmark interest rates, when appropriate, in connection with future debt issuance.
- PPL and its subsidiaries are exposed to interest rate risk associated with debt securities and derivatives held by defined benefit plans. This risk is significantly mitigated to the extent that the plans are sponsored at, or sponsored on behalf of, the regulated utilities due to the recovery methods in place.

Commodity Price Risk

PPL is exposed to commodity price risk through its subsidiaries as described below.

- PPL Electric is required to purchase electricity to fulfill its obligation as a PLR. Potential commodity price risk is mitigated through its PAPUC-approved cost recovery mechanism and full-requirement supply agreements to serve its PLR customers which transfer the risk to energy suppliers.
- LG&E's and KU's rates include certain mechanisms for fuel, fuel-related expenses and energy purchases. In addition, LG&E's rates include a mechanism for natural gas supply costs. These mechanisms generally provide for timely recovery of market price fluctuations associated with these costs.
- RIE utilizes derivative instruments pursuant to its RIPUC-approved plan to manage commodity price risk associated with its natural gas purchases. RIE's commodity price risk management strategy is to reduce fluctuations in firm gas sales prices to its customers. RIE's costs associated with derivatives instruments are recoverable through its RIPUC- approved cost recovery mechanisms. RIE is also required to purchase electricity to fulfill its obligation to provide Last Resort Service (LRS). Potential commodity price risk is mitigated through its RIPUC-approved cost recovery mechanisms and full requirements service agreements to serve LRS customers, which transfer the risk to energy suppliers. Additionally, RIE is required to contract through long-term agreements for clean energy supply under the Rhode Island Renewable Energy Growth program and Long-term Clean Energy Standard. Potential commodity price risk is mitigated through its RIPUC-approved cost recovery mechanisms, which true-up cost differences between contract prices and market prices.

Volumetric Risk

Volumetric risk is the risk related to the changes in volume of retail sales due to weather, economic conditions or other factors. PPL is exposed to volumetric risk through its subsidiaries as described below:

- PPL Electric, LG&E and KU are exposed to volumetric risk on retail sales, mainly due to weather and other economic conditions for which there is limited mitigation between rate cases.
- RIE is exposed to volumetric risk, which is significantly mitigated by regulatory mechanisms. RIE's electric and gas distribution rates both have a revenue decoupling mechanism, which allows for annual adjustments to RIE's delivery rates.

Equity Securities Price Risk

- PPL and its subsidiaries are exposed to equity securities price risk associated with the fair value of the defined benefit plans' assets. This risk is significantly mitigated due to the recovery methods in place.
- PPL is exposed to equity securities price risk from future stock sales and/or purchases.

Credit Risk

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

PPL is exposed to credit risk from "in-the-money" transactions with counterparties, as well as additional credit risk through certain of its subsidiaries, as discussed below.

In the event a supplier of PPL, PPL Electric, LG&E or KU defaults on its contractual obligation, those Registrants would be required to seek replacement power or replacement fuel in the market. In general, subject to regulatory review or other processes, appropriate incremental costs incurred by these entities would be recoverable from customers through applicable rate mechanisms, thereby mitigating the financial risk for these entities.

PPL and its subsidiaries have credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. PPL and its subsidiaries may request additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit.

Master Netting Arrangements *(PPL, LG&E and KU)*

Net derivative positions on the balance sheets are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

PPL, LG&E and KU had no cash collateral posted or obligation to return cash collateral under master netting arrangements at December 31, 2024 and 2023.

See "Offsetting Derivative Instruments" below for a summary of derivative positions presented in the balance sheets where a right of setoff exists under these arrangements.

Interest Rate Risk

(All Registrants)

PPL and its subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. A variety of financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in their debt portfolios, adjust the duration of the debt portfolios and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under PPL's risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates. In addition, the interest rate risk of certain subsidiaries is potentially mitigated as a result of the existing regulatory framework or the timing of rate cases.

Cash Flow Hedges *(PPL)*

Interest rate risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financings. Financial interest rate swap contracts that qualify as cash flow hedges may be entered into to hedge floating interest rate risk associated with both existing and anticipated debt issuances. PPL had no such contracts at December 31, 2024.

Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time period and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedged transaction is not probable of occurring.

For 2024, 2023 and 2022, PPL had no cash flow hedges reclassified into earnings associated with discontinued cash flow hedges.

At December 31, 2024, the amount of accumulated net unrecognized after-tax gains (losses) on qualifying derivatives expected to be reclassified into earnings during the next 12 months is insignificant. Amounts are reclassified as the hedged interest expense is recorded.

Economic Activity *(PPL and LG&E)*

LG&E enters into interest rate swap contracts that economically hedge interest payments. Because realized gains and losses from the swaps, including terminated swap contracts, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statements of Income at the time the underlying hedged interest expense is recorded. At December 31, 2024, LG&E held contracts with a notional amount of $64 million that mature in 2033.

Commodity Price Risk *(PPL)*

Economic Activity

RIE enters into derivative contracts that economically hedge natural gas purchases. Realized gains and losses from the derivatives are recoverable through regulated rates, therefore subsequent changes in fair value are included in regulatory assets or liabilities until they are realized as purchased gas. Realized gains and losses are recognized in "Energy Purchases" on the Statements of Income upon settlement of the contracts. See Note 7 for amounts recorded in regulatory assets and regulatory liabilities at December 31, 2024. At December 31, 2024, RIE held contracts with notional volumes of 49 Bcf that range in maturity from 2025 through 2029.

Accounting and Reporting

(All Registrants)

All derivative instruments are recorded at fair value on the Balance Sheet as an asset or liability unless the NPNS is elected. NPNS contracts include certain full-requirement purchase contracts and other physical purchase contracts. Changes in the fair value of derivatives not designated as NPNS are recognized in earnings unless specific hedge accounting criteria are met and designated as such, except for the changes in fair values of LG&E's interest rate swaps that are recognized as regulatory assets or regulatory liabilities. See Note 7 for amounts recorded in regulatory assets and regulatory liabilities at December 31, 2024 and 2023.

See Note 1 for additional information on accounting policies related to derivative instruments.

(PPL)

The following table presents the fair value and location of derivative instruments recorded on the Balance Sheets:

	December 31, 2024				December 31, 2023			
	Derivatives designated as hedging instruments		Derivatives not designated as hedging instruments		Derivatives designated as hedging instruments		Derivatives not designated as hedging instruments	
	Assets	Liabilities	Assets	Liabilities	Assets	Liabilities	Assets	Liabilities
Current:								
Price Risk Management Assets/Liabilities (a):								
Interest rate swaps (b)	$ —	$ —	$ —	$ —	$ —	$ —	$ —	$ 1
Gas contracts	—	—	7	10	—	—	1	51
Total current	—	—	7	10	—	—	1	52
Noncurrent:								
Price Risk Management Assets/Liabilities (a):								
Interest rate swaps (b)	—	—	—	3	—	—	—	6
Gas contracts	—	—	2	3	—	—	—	9
Total noncurrent	—	—	2	6	—	—	—	15
Total derivatives	$ —	$ —	$ 9	$ 16	$ —	$ —	$ 1	$ 67

(a) Current portion is included in "Other current assets" and "Other current liabilities" and noncurrent portion is included in "Other noncurrent assets" and "Other deferred credits and noncurrent liabilities" on the Balance Sheets.
(b) Excludes accrued interest, if applicable.

The following tables present the pre-tax effect of derivative instruments recognized in income, OCI or regulatory assets and regulatory liabilities:

Derivative Relationships	Derivative Gain (Loss) Recognized in OCI	Location of Gain (Loss) Recognized in Income on Derivative	Gain (Loss) Reclassified from AOCI into Income
2024			
Cash Flow Hedges:

Interest rate swaps	Regulatory assets - noncurrent	$ 4	$ —	$ 11

(PPL, LG&E and KU)

Offsetting Derivative Instruments

PPL, LG&E and KU or certain of their subsidiaries have master netting arrangements in place and also enter into agreements pursuant to which they purchase or sell certain energy and other products. Under the agreements, upon termination of the agreement as a result of a default or other termination event, the non-defaulting party typically would have a right to set off amounts owed under the agreement against any other obligations arising between the two parties (whether under the agreement or not), whether matured or contingent and irrespective of the currency, place of payment or place of booking of the obligation.

PPL, LG&E and KU have elected not to offset derivative assets and liabilities and not to offset net derivative positions against the right to reclaim cash collateral pledged (an asset) or the obligation to return cash collateral received (a liability) under derivatives agreements. The table below summarizes the derivative positions presented in the balance sheets where a right of setoff exists under these arrangements and related cash collateral received or pledged.

	Assets				Liabilities			
		Eligible for Offset				Eligible for Offset		
	Gross	Derivative Instruments	Cash Collateral Received	Net	Gross	Derivative Instruments	Cash Collateral Pledged	Net
December 31, 2024								
Derivatives								
PPL	$ 9	$ 5	$ —	$ 4	$ 16	$ 5	$ —	$ 11
LG&E	—	—	—	—	3	—	—	3
December 31, 2023								
Derivatives								
PPL	$ 1	$ —	$ —	$ 1	$ 67	$ —	$ —	$ 67
LG&E	—	—	—	—	7	—	—	7

Credit Risk-Related Contingent Features

Certain derivative contracts contain credit risk-related contingent features which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in the credit ratings of PPL, LG&E and KU or certain of their subsidiaries. Most of these features would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these features also would allow the counterparty to require additional collateral upon each downgrade in credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade, and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent features require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent features that require adequate assurance of performance be provided if the other party has reasonable concerns regarding the performance of PPL's, LG&E's and KU's obligations under the contracts. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below would represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" features.

(PPL)

At December 31, 2024, derivative contracts in a net liability position that contain credit risk-related contingent features was $3 million. The aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade was $4 million.

17. Goodwill and Other Intangible Assets

Goodwill

(PPL)

The changes in the carrying amount of goodwill by segment were:

	Kentucky Regulated		Rhode Island Regulated		Corporate and Other		Total	
	2024	2023	2024	2023	2024	2023	2024	2023
Balance at beginning of period (a)	$ 662	$ 662	$ 725	$ 725	$ 860	$ 861	$ 2,247	$ 2,248
Goodwill recognized during the period (b)	—	—	—	—	—	(1)	—	(1)
Total	$ 662	$ 662	$ 725	$ 725	$ 860	$ 860	$ 2,247	$ 2,247

(a) There were no accumulated impairment losses related to goodwill.
(b) Recognized as a result of purchase price allocation adjustments related to the acquisition of RIE. See Note 9 for additional information.

Other Intangible Assets

(PPL)

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2024		December 31, 2023	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Contracts (a)	$ 125	$ 116	$ 125	$ 107
Renewable Energy Credits	20	—	15	—
Land rights and easements	432	147	411	143
Licenses and other	2	—	2	—
Total subject to amortization	579	263	553	250
Not subject to amortization due to indefinite life:				
Land rights and easements	18	—	18	—
Total not subject to amortization due to indefinite life	18	—	18	—
Total	$ 597	$ 263	$ 571	$ 250

(a) Gross carrying amount in 2024 and 2023 includes the fair value at the acquisition date of the OVEC power purchase contract with terms favorable to market recognized as a result of the 2010 acquisition of LKE by PPL.

Current intangible assets are included in "Other current assets" and long-term intangible assets are included in "Other intangibles" on the Balance Sheets.

Amortization expense was as follows:

	2024	2023	2022
Intangible assets with no regulatory offset	$ 5	$ 5	$ 5
Intangible assets with regulatory offset	8	9	9
Total	$ 13	$ 14	$ 14

Amortization expense for each of the next five years is estimated to be:

	2025	2026	2027	2028	2029
Intangible assets with no regulatory offset	$ 4	$ 4	$ 4	$ 4	$ 4
Intangible assets with regulatory offset	8	2	—	—	—
Total	$ 12	$ 6	$ 4	$ 4	$ 4

(PPL Electric)

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2024		December 31, 2023	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Land rights and easements	$ 396	$ 141	$ 389	$ 138
Licenses and other	2	1	2	1
Total subject to amortization	398	142	391	139
Not subject to amortization due to indefinite life:				
Land rights and easements	18	—	17	—
Total	$ 416	$ 142	$ 408	$ 139

Intangible assets are shown as "Intangibles" on the Balance Sheets.

Amortization expense was as follows:

	2024	2023	2022
Intangible assets with no regulatory offset	$ 4	$ 4	$ 4

Amortization expense for each of the next five years is estimated to be:

	2025	2026	2027	2028	2029
Intangible assets with no regulatory offset	$ 4	$ 4	$ 4	$ 4	$ 4

(LG&E)

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2024		December 31, 2023	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Land rights and easements	$ 7	$ 2	$ 7	$ 2
OVEC power purchase agreement (a)	86	79	86	73
Total subject to amortization	$ 93	$ 81	$ 93	$ 75

(a) Gross carrying amount represents the fair value at the acquisition date of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to this contract, which is being amortized over the same period as the intangible asset, eliminating any income statement impact. See Note 7 for additional information.

Long-term intangible assets are presented as "Other intangibles" on the Balance Sheets.

Amortization expense was as follows:

	2024	2023	2022
Intangible assets with regulatory offset	$ 6	$ 6	$ 6

Amortization expense for each of the next five years is estimated to be:

	2025	2026	2027	2028	2029
Intangible assets with regulatory offset	$ 6	$ 1	$ —	$ —	$ —

(KU)

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2024		December 31, 2023	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Land rights and easements	$ 29	$ 4	$ 17	$ 4
OVEC power purchase agreement (a)	39	36	39	33
Total subject to amortization	$ 68	$ 40	$ 56	$ 37

(a) Gross carrying amount represents the fair value at the acquisition date of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to this contract, which is being amortized over the same period as the intangible asset, eliminating any income statement impact. See Note 7 for additional information.

Long-term intangible assets are presented as "Other intangibles" on the Balance Sheets.

Amortization expense was as follows:

	2024	2023	2022
Intangible assets with regulatory offset	2	3	3

Amortization expense for each of the next five years is estimated to be:

	2025	2026	2027	2028	2029
Intangible assets with regulatory offset	$ 2	$ 1	$ —	$ —	$ —

18. Asset Retirement Obligations

(PPL and PPL Electric)

PPL Electric has identified legal retirement obligations for the retirement of certain transmission assets that could not be reasonably estimated due to indeterminable settlement dates. These assets are located on rights-of-way that allow the grantor to require PPL Electric to relocate or remove the assets. Since this option is at the discretion of the grantor of the right-of-way, PPL Electric is unable to determine when these events may occur.

(PPL, LG&E and KU)

PPL's, LG&E's and KU's ARO liabilities are primarily related to CCR closure costs. See Note 12 for information on the CCR rule. LG&E and RIE also have AROs related to natural gas mains and wells. LG&E's and KU's transmission and distribution lines largely operate under perpetual property easement agreements, which do not generally require restoration upon removal of the property. Therefore, no material AROs are recorded for transmission and distribution assets. For LG&E, KU, and RIE , all ARO accretion and depreciation expenses are reclassified as a regulatory asset or regulatory liability. ARO regulatory assets associated with certain CCR projects are amortized to expense in accordance with regulatory approvals. For other AROs, deferred accretion and depreciation expense is recovered through cost of removal.

The changes in the carrying amounts of AROs were as follows:

	PPL		LG&E		KU	
	2024	2023	2024	2023	2024	2023
ARO at beginning of period	$ 158	$ 177	$ 85	$ 86	$ 66	$ 82
Accretion	8	9	4	4	4	5
Obligations incurred	9	2	3	1	6	1
Changes in estimated timing or cost	4	15	3	11	1	6
Obligations settled	(24)	(39)	(11)	(11)	(13)	(28)
Other	2	(6)	—	(6)		—
ARO at end of period	$ 157	$ 158	$ 84	$ 85	$ 64	$ 66

19. Accumulated Other Comprehensive Income (Loss)

(PPL)

The after-tax changes in AOCI by component for the years ended December 31 were as follows:

	Foreign currency translation adjustments	Unrealized gains (losses) on qualifying derivatives	Equity investees' AOCI	Defined benefit plans		Total
				Prior service costs	Actuarial gain (loss)	
PPL						
December 31, 2021	$ —	$ 1	$ —	$ (6)	$ (152)	$ (157)
Amounts arising during the year	—	—	2	(1)	11	12
Reclassifications from AOCI	—	2	—	2	17	21
Net OCI during the year	—	2	2	1	28	33
December 31, 2022	$ —	$ 3	$ 2	$ (5)	$ (124)	$ (124)
Amounts arising during the year	—	—	1	—	(41)	(40)
Reclassifications from AOCI	—	3	—	1	(3)	1
Net OCI during the year	—	3	1	1	(44)	(39)
December 31, 2023	$ —	$ 6	$ 3	$ (4)	$ (168)	$ (163)
Amounts arising during the year	—	—	1	—	(22)	(21)
Reclassifications from AOCI	—	3	—	1	(4)	—
Net OCI during the year	—	3	1	1	(26)	(21)
December 31, 2024	$ —	$ 9	$ 4	$ (3)	$ (194)	$ (184)

The following table presents PPL's gains (losses) and related income taxes for reclassifications from AOCI for the years ended December 31, 2024, 2023 and 2022. The defined benefit plan components of AOCI are not reflected in their entirety in the statement of income; rather, they are included in the computation of net periodic defined benefit costs (credits) and subject to capitalization. See Note 10 for additional information.

Details about AOCI	PPL 2024	PPL 2023	PPL 2022	Affected Line Item on the Statements of Income
Qualifying derivatives				
Interest rate swaps	$ (3)	$ (3)	$ (3)	Interest Expense
Total Pre-tax	(3)	(3)	(3)	
Income Taxes	—	—	1	
Total After-tax	(3)	(3)	(2)	
Defined benefit plans				
Prior service costs	(1)	(2)	(3)	
Net actuarial loss	4	3	(24)	
Total Pre-tax	3	1	(27)	
Income Taxes	—	1	8	
Total After-tax	3	2	(19)	
Total reclassifications during the year	$ —	$ (1)	$ (21)	

20. New Accounting Guidance Pending Adoption

(All Registrants)

Improvements to Income Tax Disclosures

In December 2023, the FASB issued guidance which requires public business entities to provide additional income tax disclosures including a disaggregated rate reconciliation as well as information on income taxes paid.

For public business entities, this guidance will be applied on a prospective basis. Retrospective application is permitted. This guidance will be effective for annual periods beginning after December 15, 2024. Early adoption is permitted for annual financial statements that have not yet been issued or made available for issuance.

The Registrants are currently assessing the impact of adopting this guidance.

Disaggregation of Income Statement Expenses

In November 2024, the FASB issued guidance which requires public business entities to provide in the notes to financial statements specified information about certain costs and expenses. This includes the disclosure of amounts of (a) purchases of inventory, (b) employee compensation, (c) depreciation, (d) intangible asset amortization, and (e) depreciation, depletion, and amortization recognized as part of oil and gas-producing activities (DD&A) included in each relevant income statement expense caption. A relevant expense caption is an expense caption included on the face of the income statement within continuing operations that contains any of the specified expense categories (a)-(e). A qualitative description of the amounts remaining in relevant expense captions that are not separately disaggregated must also be disclosed. Additionally, public business entities must disclose the total amount of selling expenses and, in annual reporting periods, the entity's definition of selling expenses.

For public business entities, this guidance will be applied on a prospective basis. Retrospective application is permitted. This guidance will be effective for annual periods beginning after December 15, 2026, and interim periods reporting periods beginning after December 15, 2027. Early adoption is permitted.

The Registrants are currently assessing the impact of adopting this guidance.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

The Registrants' principal executive officers and principal financial officers, based on their evaluation of the Registrants' disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934) have concluded that, as of December 31, 2024, the Registrants' disclosure controls and procedures are effective to ensure that material information relating to the Registrants and their consolidated subsidiaries is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, particularly during the period for which this annual report has been prepared. The aforementioned principal officers have concluded that the disclosure controls and procedures are also effective to ensure that information required to be disclosed in reports filed under the Exchange Act is accumulated and communicated to management, including the principal executive officers and principal financial officers, to allow for timely decisions regarding required disclosure.

(b) Changes in internal control over financial reporting.

PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company, and Kentucky Utilities Company

The Registrants' principal executive officers and principal financial officers have concluded that there were no changes in the Registrants' internal control over financial reporting during the Registrants' fourth fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrants' internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

PPL Corporation

PPL's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f) or 15d-15(f). PPL's internal control over financial reporting is a process designed to provide reasonable assurance to PPL's management and Board of Directors regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in "Internal Control - Integrated Framework" (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in "Internal Control - Integrated Framework" (2013), our management concluded that our internal control over financial reporting was effective as of December 31, 2024. The effectiveness of our internal control over financial reporting has been audited by Deloitte & Touche LLP, an independent registered public accounting firm.

PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

Management of PPL's non-accelerated filer companies, PPL Electric, LG&E and KU, are responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f) or 15d-15(f). Each of the aforementioned companies' internal control over financial reporting is a process designed to provide reasonable assurance to management and Board of Directors of these companies regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Under the supervision and with the participation of our management, including the principal executive officers and principal financial officers of the companies listed above, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in "Internal Control - Integrated Framework" (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in "Internal Control - Integrated Framework" (2013), management of these companies concluded that our internal control over financial reporting was effective as of December 31, 2024. This annual report does not include an attestation report of Deloitte & Touche LLP, the companies' independent registered public accounting firm regarding internal control over financial reporting for these non-accelerated filer companies. The effectiveness of internal control over financial reporting for the aforementioned companies was not subject to attestation by the companies' registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit these companies to provide only management's report in this annual report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareowners and the Board of Directors of PPL Corporation

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of PPL Corporation and subsidiaries (the "Company") as of December 31, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2024, of the Company and our report dated February 13, 2025, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ITEM 9B. OTHER INFORMATION

PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

(a) None.

(b) *Securities Trading Plans of Directors and Executive Officers*

On November 26, 2024, Ms. Christine M. Martin, President of PPL Electric, adopted a trading arrangement for the sale of shares of PPL's common stock (a Rule 10b5-1 Trading Plan) that is intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) under the Securities Exchange Act of 1934. Ms. Martin's Rule 10b5-1 Trading Plan, which terminates on the earlier of (i) June 30, 2025 and (ii) the date all trades specified under the plan have been executed or all orders under the plan have expired, provides for the sale of up to 2,160 shares of common stock of PPL, plus dividends on such shares prior to sale, pursuant to the terms of the plan.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

PPL Corporation

Additional information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement in the sections entitled: "Proposal 1: Election of Directors," "Governance of the Company – Board of Directors," "Governance of the Company – Board Committees," "Delinquent Section 16(a) Reports," and "Governance Policies Underpinning Our Compensation Framework - Insider Trading Policy." The proxy statement will be filed within 120 days after December 31, 2024; accordingly, we have omitted the information from this Item pursuant to General Instruction G(3) of Form 10-K.

PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

Item 10 is omitted as PPL Electric, LG&E and KU meet the conditions set forth in General Instruction (I)(1)(a) and (b) of Form 10-K.

EXECUTIVE OFFICERS OF THE REGISTRANTS

Officers of the Registrants are elected annually by their Boards of Directors to serve at the pleasure of the respective Boards. There are no family relationships among any of the executive officers, nor is there any arrangement or understanding between any executive officer and any other person pursuant to which the officer was selected.

There have been no events under any bankruptcy act, no criminal proceedings and no judgments or injunctions material to the evaluation of the ability and integrity of any executive officer during the past five years.

Listed below are the executive officers at December 31, 2024.

PPL Corporation

Name	Age	Positions Held During the Past Five Years	Dates
Vincent Sorgi	53	President and Chief Executive Officer	June 2020 - present
		President and Chief Operating Officer	July 2019 - May 2020
Joseph P. Bergstein, Jr.	54	Executive Vice President and Chief Financial Officer	April 2021 - present
		Senior Vice President and Chief Financial Officer	July 2019 - April 2021
Dean A. Del Vecchio	58	Executive Vice President and Chief Technology & Innovation Officer	February 2024 - present

(a) Designated an executive officer of PPL by virtue of their respective positions at a PPL subsidiary.

ITEM 11. EXECUTIVE COMPENSATION

PPL Corporation

The information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement in the sections entitled: "Governance of the Company – Compensation of Directors," "Executive Compensation – People and Compensation Committee Report," "Executive Compensation – Compensation Discussion and Analysis," "Executive Compensation - Executive Compensation Tables," and "Executive Compensation – CEO Pay Ratio." The proxy statement will be filed within 120 days after December 31, 2024; accordingly, we have omitted the information from this Item pursuant to General Instruction G(3) of Form 10-K.

PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

Item 11 is omitted as PPL Electric, LG&E and KU meet the conditions set forth in General Instructions (I)(1)(a) and (b) of Form 10-K.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

PPL Corporation

Additional information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement in the section entitled: "Stock Ownership." The proxy statement will be filed within 120 days after December 31, 2024; accordingly, we have omitted the information from this Item pursuant to General Instruction G(3) of Form 10-K. In addition, provided below in tabular format is information as of December 31, 2024, with respect to compensation plans (including individual compensation arrangements) under which equity securities of PPL are authorized for issuance.

Equity Compensation Plan Information

	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans **(3) (4)**
Equity compensation plans approved by security holders **(1)**			1,092,065 – DDCP 6,806,285 – SIP 425,338 – ICPKE 8,323,688 – Total
Equity compensation plans not approved by security holders **(2)**			

(1) Includes (a) the ICPKE, under which restricted stock, restricted stock units, performance units, dividend equivalents and other stock-based compensation awards may be awarded to non-executive key employees of PPL and its subsidiaries; (b) the SIP approved by shareowners in 2017 under which restricted stock, restricted stock units, performance units, dividend equivalents and other stock-based compensation awards may be awarded to executive officers of PPL and its subsidiaries; and (c) the DDCP, under which stock units may be awarded to directors of PPL.

(2) All of PPL's current compensation plans under which equity securities of PPL are authorized for issuance have been approved by PPL's shareowners.

(3) As of December 31, 2024, there were 4,197,595 stock awards outstanding under the plans. The following stock awards are outstanding under the SIP, ICPKE and DDCP: 1,183,738 restricted stock units, 844,985 TSR performance awards, 446,503 EG performance awards and 446,503 ESG performance awards under the SIP; 335,998 restricted stock units 87,024 TSR performance awards, 3,581 ROE performance awards, 50,386 EG performance awards and 50,386 ESG performance awards under the ICPKE; and 748,491 stock units under the DDCP.

(4) Based upon the following aggregate award limitations under the SIP, ICPKE and DDCP: (a) under the SIP, 15,000,000 awards; (b) under the ICPKE, 16,573,608 awards (i.e., 5% of the total PPL common stock outstanding as of January 1, 2003) granted after April 25, 2003, reduced by outstanding awards for which common stock was not yet issued as of such date of 2,373,812 resulting in a limit of 14,199,796; and (c) under the DDCP, the number of stock units available for issuance was reduced to 2,000,000 stock units in March 2012. In addition, the ICPKE includes an annual award limitation of 2% of total PPL common stock outstanding as of January 1 of each year.

PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

Item 12 is omitted as PPL Electric, LG&E and KU meet the conditions set forth in General Instructions (I)(1)(a) and (b) of Form 10-K.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

PPL Corporation

The information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement in the sections entitled: “Governance of the Company – Board of Directors” and “Transactions with Related Persons.” The proxy statement will be filed within 120 days after December 31, 2024; accordingly, we have omitted the information from this Item pursuant to General Instruction G(3) of Form 10-K.

PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

Item 13 is omitted as PPL Electric, LG&E and KU meet the conditions set forth in General Instructions (I)(1)(a) and (b) of Form 10-K.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

PPL Corporation

The information required by this Item is incorporated by reference to, and will be contained in, our definitive proxy statement in the section entitled: "Proposal 3: Ratification of the Appointment of Independent Registered Public Accounting Firm -- Fees to Independent Auditor for 2024 and 2023." The proxy statement will be filed within 120 days after December 31, 2024; accordingly, we have omitted the information from this Item pursuant to General Instruction G(3) of Form 10-K.

PPL Electric Utilities Corporation

For the fiscal years ended 2024 and 2023, Deloitte & Touche LLP (Deloitte) served as PPL Electric's independent auditor. The following table presents an allocation of fees billed, including expenses, by the independent auditor to PPL Electric, for professional services rendered for the audits of PPL Electric's annual financial statements and for fees billed for other services rendered by Deloitte.

	2024	2023
	(in thousands)	
Audit fees (a)	$ 1,302	$ 1,390
Audit-related fees (b)	21	17

(a) Includes estimated fees for audit of annual financial statements and review of financial statements included in PPL Electric's Quarterly Reports on Form 10-Q and for services in connection with statutory and regulatory filings or engagements, including comfort letters and consents for financings and filings made with the SEC.
(b) Fees for agreed-upon procedures related to annual EPA filings.

Louisville Gas and Electric Company

For the fiscal years ended 2024 and 2023, Deloitte served as LG&E's independent auditor. The following table presents an allocation of fees billed, including expenses, by the independent auditor to LG&E, for professional services rendered for the audits of LG&E's annual financial statements and for fees billed for other services rendered by Deloitte.

	2024	2023
	(in thousands)	
Audit fees (a)	$ 903	$ 1,189

(a) Includes estimated fees for audit of annual financial statements and review of financial statements included in LG&E's Quarterly Reports on Form 10-Q and for services in connection with statutory and regulatory filings or engagements, including comfort letters and consents for financings and filings made with the SEC.

Kentucky Utilities Company

For the fiscal years ended 2024 and 2023, Deloitte served as KU's independent auditor. The following table presents an allocation of fees billed, including expenses, by the independent auditor to KU, for professional services rendered for the audits of KU's annual financial statements and for fees billed for other services rendered by Deloitte.

	2024	2023
	(in thousands)	
Audit fees (a)	$ 1,053	$ 1,175

(a) Includes estimated fees for audit of annual financial statements and review of financial statements included in KU's Quarterly Reports on Form 10-Q and for services in connection with statutory and regulatory filings or engagements, including comfort letters and consents for financings and filings made with the SEC.

PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

Approval of Fees. The Audit Committee of PPL has procedures for pre-approving audit and non-audit services to be provided by the independent auditor. These procedures are designed to ensure the continued independence of the independent auditor. More specifically, the use of the independent auditor to perform either audit or non-audit services is prohibited unless specifically approved in advance by the Audit Committee of PPL. As a result of this approval process, the Audit Committee of PPL has pre-approved specific categories of services and authorization levels. All services outside of the specified categories and all amounts exceeding the authorization levels are approved by the Chair of the Audit Committee of PPL, who serves as the Committee designee to review and approve audit and non-audit related services during the year. A listing of the approved audit and non-audit services is reviewed with the full Audit Committee of PPL no later than its next meeting.

The Audit Committee of PPL approved 100% of the 2024 and 2023 services provided by Deloitte.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company

(a) The following documents are filed as part of this report:

1. Financial Statements - Refer to the "Table of Contents" for an index of the financial statements included in this report.

2. Supplementary Data and Supplemental Financial Statement Schedule - included in response to Item 8.

   All other schedules are omitted because of the absence of the conditions under which they are required or because the required information is included in the financial statements or notes thereto.

3. Exhibits

   See Exhibit Index immediately following "Shareowner and Investor Information."

SHAREOWNER AND INVESTOR INFORMATION

Annual Meeting: The 2025 annual meeting of shareowners of PPL will be held on Friday, May 16, 2025 in a virtual meeting format.

Proxy Statement Material: A proxy statement and notice of PPL's annual meeting will be provided to all shareowners who are holders of record as of March 4, 2025. The latest proxy statement can be accessed at www.pplweb.com/PPLCorpProxy.

PPL Annual Report: The report will be published in the beginning of April and will be provided to all shareowners who are holders of record as of March 4, 2025. The latest annual report can be accessed at www.pplweb.com/PPLCorpProxy.

Dividends: Subject to the declaration of dividends on PPL common stock by the PPL Board of Directors or its Executive Committee, dividends are paid on the first business day of April, July, October and January. The 2025 record dates for dividends are expected to be March 10, June 10, September 10 and December 10.

PPL's Website (www.pplweb.com): Shareowners can access PPL publications such as annual and quarterly reports to the Securities and Exchange Commission (SEC Forms 10-K and 10-Q), other PPL filings, corporate governance materials, news releases, stock quotes and historical performance. Visitors to our website can subscribe to receive automated email alerts for SEC filings, earnings releases, daily stock prices or other financial news.

Financial reports which are available at www.pplweb.com will be mailed without charge upon request.

Other Policies discussed

CP100 – Standards of Integrity
CP411 – Social Media Policy
GP702 – Responsible Behavior Program

Purpose and Background

This Policy is instituted to help employees of PPL Corporation and its affiliates (collectively, the "Company") comply with applicable securities laws regarding trading of the Company's or other companies' securities based on Material Nonpublic Information (as discussed below) and prevent sharing of Material Nonpublic Information to others who may trade in such securities. In other words, it is to help prevent insider trading. In addition to setting forth general restrictions applicable to all directors, officers and employees, this Policy also sets forth additional procedures for certain personnel and board members who routinely have access to Material Nonpublic Information, to help these individuals trade securities of the Company appropriately and in compliance with applicable law.

All directors, officers and employees of the Company (as well as their family members and any other entity over which they make or influence investment decisions, as described below) are expected to fully comply with this Insider Trading Policy.

What is Insider Trading

The Company and its "**insiders**," including any director, officer or employee of the Company or any Company subsidiary (including, for example, PPL Electric Utilities Corporation, Louisville Gas and Electric Company, Kentucky Utilities Company, Rhode Island Energy and PPL Services Corporation), are each subject to the securities laws of the United States and all applicable jurisdictions. Those laws prohibit insiders from buying or selling, or otherwise

acquiring or disposing of, Securities of the Company based on Material Nonpublic Information about the Company. Such conduct is often described as "insider trading". Insider trading also includes insiders passing Material Nonpublic Information to someone else, including family members, who may buy or sell the Company's Securities. Such conduct is known as "tipping". Finally, insider trading also includes buying or selling, or otherwise acquiring or disposing of the securities of, or tipping information concerning, any other company at a time that you have any Material Nonpublic Information about that company as a result of your employment with the Company.

For purposes of this Policy, **"Securities"** include common and preferred stock, stock options, warrants, bonds, notes, debentures, convertible instruments, put or call options (i.e., exchange-traded options) or other similar financial instruments. "**Material Nonpublic Information"** is information that is both material and nonpublic. **Material information** is generally information that might affect a person's decision to buy or sell a security or, stated another way, information that if public, could reasonably be expected to affect the publicly traded price of that company's stock. Material information might include:

- dividend increases or decreases,
- earnings results and estimates (including changes of previously announced estimates),
- planned repurchases or issuances of equity or debt,
- a change or curtailment of operations of significant facilities,
- a significant increase or decline in business or revenue,
- a significant merger or acquisition proposal or agreement,
- actions by regulatory bodies,
- significant management changes,
- the initiation of or a significant development in major litigation,
- purchases or sales of substantial assets, or
- a major cybersecurity breach.

The foregoing list is not exhaustive; the determination of materiality is highly fact-sensitive and must be viewed in the context of the relevant circumstances. **Nonpublic information** is information that is not available to the general public. Information is considered nonpublic until the information has been (a) widely disseminated, (b) through an official announcement (the announcement generally has come from the Company), and (c) a reasonable amount of time, usually at least 24 hours, a portion of which the New York Stock Exchange is open, has passed to allow the market to react to the information. You should assume information is nonpublic unless it has been distributed on a national news service or expressly included in a Company filing with the U.S. Securities and Exchange Commission ("SEC").

Who is at risk

The securities laws provide that liability regarding insider trading, including potentially civil and criminal penalties, can apply to the individual insider and to the Company and its directors and officers, and can even extend to managerial and supervisory personnel. It is the intent of this Policy to avoid both individual insider liability and broader enterprise liability for insider trading.

General Policy Applicable to all Insiders

As an insider, you may not do any of the following:

- Trade, including purchase, sell or otherwise acquire or dispose of Company Securities, including via gifts, at any time when you have Material Nonpublic Information concerning the Company. If you have any questions about whether you are in possession of Material Nonpublic Information, please contact the Office of General Counsel.

- Trade Securities of any other company (including Securities issued by any of our customers or suppliers) at any time when you have Material Nonpublic Information about that company that you obtained as a result of your employment with or relationship to the Company.

- "Tip" anyone (including family members), even inadvertently (take care not to have such information overheard). "Tipping" is disclosing any Material Nonpublic Information to anyone that does not have a business need to know such information. If you disclose Material Nonpublic Information to a third party or become aware that such information has been disclosed to a third party by an insider in violation of this Policy, immediately contact the Office of General Counsel.

- Make buy or sell recommendations about the Company's securities.

When you leave the Company, whether voluntarily or involuntarily, as a precaution you should generally not trade in the Securities of the Company until the opening of the first open trading window (as described below) following the termination of your employment, or as otherwise indicated at the time of your departure. Section 16 Persons and Permanent Restricted Persons, as defined below, should plan to wait six months after leaving the company before trading any Company Securities.

Limited Exceptions to Trading Prohibitions Under the General Policy

The restrictions above generally do not apply in the following circumstances:

- You transfer shares to an inter vivos trust or similar entity that does not change the beneficial ownership of the shares;
- You transfer shares as a bona fide gift, including in connection with charitable giving, though you should contact OGC to discuss the circumstances and timing prior to making such transfers;
- You exercise an option to acquire stock granted under the Company's incentive compensation plans without any sale, (however, sales of the underlying stock after exercise, or in connection with any cashless exercise, would be covered by this Policy);
- You elect to have the Company withhold shares to satisfy tax withholding requirements (such as net share settlement of stock options) without effecting any sale;
- You execute transactions pursuant to a trading plan that complies with SEC Rule 10b5-1 under the Securities and Exchange Act of 1934 (commonly known as "10b5-1 Plans") and which has been approved by the Company; or
- You purchase stock through regular payroll deductions under the Company's Dividend Reinvestment and Direct Stock Purchase Plan; provided, however, the sale of any such stock, and any change in instructions regarding the level of contributions used to purchase stock, is subject to this policy.

These exceptions are fact specific. You should contact the Office of General Counsel to discuss your particular circumstances whenever you are in doubt about any trade of Securities or before attempting to rely on any of the above exceptions.

Special Procedures – Section 16 Persons, Permanent and Other Restricted Persons

Enhanced trading restrictions and procedures apply to (i) **Section 16 Persons**, which include members of the PPL Corporation Board of Directors and certain officers of the Company as defined by SEC Rule 16a-1(f) (together with any such persons' immediate family members, and any trusts, corporations or other entities controlled by any such persons), (ii) **Permanent Restricted Persons**, which includes Tier 1 and Tier 2 executives who are not Section 16 Persons and certain others as determined by the Office of General Counsel, and (iii) **Other Restricted Persons**, which includes those who have been notified by the Office of General Counsel that they must follow the requirements this Policy because they have access to Nonpublic Information in the normal course of their duties. Prior to buying or selling, or otherwise acquiring or disposing of any shares of PPL stock, Section 16 Persons, Permanent Restricted Persons and Other Restricted Persons must contact the Office of General Counsel. Additional restrictions, set for the below, are generally based on "trading windows."

Trading Windows

"Open trading windows" generally occur four times a year, typically running from the day after quarterly/annual earnings announcements to the fifteenth day of the third month in each fiscal quarter (March, June, September, and December). A "closed trading window" occurs when the Company is aware that many insiders who are subject to enhanced trading restrictions are likely aware of Material Nonpublic Information, generally in connection with the preparation of quarterly financial reports. Closed trading windows typically run from the fifteenth of the month in the third month of a fiscal quarter until the day following the announcement of earnings for that quarter, when the next open trading window begins. In certain circumstances, trading windows may not open as normal, or may close earlier than expected, based on Material Nonpublic Information that is generally known inside the Company. Even during an open trading window, certain insiders may be prohibited from trading PPL stock, because they may be aware of specific Material Nonpublic Information. For example, when a significant transaction is being contemplated, some but not all insiders may be aware of the details of the proposed transaction, and therefore restricted from trading, even in an open trading window.

The Office of General Counsel will announce via email the opening and closing of trading windows to all insiders who are subject to enhanced trading restrictions, and in certain circumstances, may notify specific insiders that they should not trade, even if the trading window is open for others. Insiders should not share with anyone whether they are restricted from trading. Trading windows are designed to add an additional layer of protection with respect to insider trading, both for the Company and the individual insider, but all insiders remain subject to the general policy discussed above. **Even if the trading window is open, you may not trade, or establish, modify or terminate a 10b5-1 Plan, as discussed below, without prior approval from the Office of General Counsel or if you are aware of Material Nonpublic Information.**

Actions permitted and restricted during open and closed trading windows, and other applicable restrictions on certain insiders, are discussed further below.

General Restrictions – Section 16 Persons, Permanent and Other Restricted Persons

All Section 16 Persons and Permanent Restricted Persons must hold all of the Company's Securities that they own in a brokerage account at Fidelity Investments (or any successor as the stock plan administrator). Such accounts are subject to restriction by the Office of General Counsel. Section 16 Persons and Permanently Restricted Persons must conduct all trading in Company Securities using 10b5-1 Plans that permit Insiders to schedule future trades of Company Securities, as described below. 10b5-1 Plans must be reviewed and approved by the Office of General Counsel before execution.

Section 16 Persons, Permanently Restricted Persons and Other Restricted Persons may not (i) trade in options, warrants, puts and calls or similar instruments related to the Company's Securities or sell such Securities "short" (i.e., sell stock they do not own and borrow the shares to make delivery), because this may put their personal gain in conflict with the best interests of the Company or otherwise appear improper, or (ii) pledge the Company's Securities as collateral for any other securities you wish to purchase or for a loan.

Other Restricted Persons who wish to trade during an open trading window may contact the Office of General Counsel, and they will be asked to confirm that they are not in possession of any Material Nonpublic Information. If they are not in possession of Material Nonpublic Information, the Office of General Counsel generally will permit the trade and, if the shares are held in a Fidelity account, the trade restriction on the account will be lifted for 24-48 hours, or longer as needed, to allow the Section 16 Persons, Permanently Restricted Persons or Other Restricted Persons to complete the trade. Other Restricted Persons are permitted but not required to use 10b5-1 Plans.

Exceptions for Approved 10b5-1 Plans

10b5-1 Plans may be entered into only during open trading windows when the insider is not in possession of Material Nonpublic Information. A 10b5-1 Plan is a binding, written contract between you and your broker (i.e., Fidelity Investments, or any successor as the Company's stock plan administrator) that specifies the price, amount and date of trades to be executed in your account in the future, or provides a formula or mechanism that your broker will follow to execute a desired transaction. While a 10b5-1 Plan can only be established, modified or terminated during an open trading window when you do not possess Material Nonpublic Information, trades made pursuant to a properly established 10b5-1 Plan may be executed at any time, even during a closed trading window.

As part of the 10b5-1 Plan document, you must provide a written representation that, at the time of entering into (or modifying) the 10b5-1 Plan, you are not then in possession of any material nonpublic information and that you are acting in good faith and not as part of a plan to evade the prohibitions of SEC Rule 10b5-1. Once the 10b5-1 Plan is adopted, you must not exercise any influence over execution of transactions under the plan, such as the number or value of securities to be traded, the price at which they are to be traded or the date of the trade. Any such modification would be considered entering into a new plan and would be subject to the restrictions of entering into a new plan.

10b5-1 Plans may cover a period up to two years and trades under a 10b5-1 Plan may commence no sooner than 30 days after execution for Permanent Restricted Persons and any other person electing to use a 10b5-1 Plan, except Section 16 Persons. For Section 16 Persons, trades pursuant to a 10b5-1 Plan may commence after the longer of (i) 90 days after the adoption or modification of a plan, or (ii) two business days following the filing of 10-Q or 10-K for the fiscal period in which the plan was adopted or modified, up to a maximum of 120 days.

10b5-1 Plans, and any modifications, are drafted with the assistance of Fidelity Investments, and are reviewed by the Office of General Counsel prior to execution. 10b5-1 Plans must comply with all other applicable legal requirements and SEC Rule 10b5-1, including without limitation, the SEC Rule 10b5-1 limitations on multiple overlapping plans and single-trade plans. If you have any questions regarding 10b5-1 Plans, please contact the Office of General Counsel. Notwithstanding any pre-clearance of a 10b5-1 Plan, the Company assumes no liability for the consequences of any transaction made pursuant to a purported 10b5-1 Plan.

The requirement to trade via a 10b5-1 Plan does not apply to (i) the receipt and disposition of credits received by members of the PPL Corporation Board of Directors pursuant to the Directors Deferred Compensation Plan, which credits are reportable under Section 16 of the Securities Exchange Act of 1934 and for which separate procedures are administered by the Office of General Counsel and (ii) the purchase of PPL stock by employees through regular payroll deductions under the Company's Dividend Reinvestment and Direct Stock Purchase Plan; provided, however, the sale of any such stock, and any change in instructions regarding the level of contributions used to purchase stock, must be made in an open trading window when the insider is not in possession of Material Nonpublic Information.

Confidentiality

You must not disclose any Material Nonpublic Information to anyone outside of the Company (including to family members), except when such disclosure is needed to carry out the Company's business and then only when you have no reason to believe that the recipient will misuse the information. When such information is disclosed, the recipient must be told that such information may be used only for the business purpose related to its disclosure and that the information must be held in confidence. You should disclose Material Nonpublic Information to others in the Company only in the ordinary course of business, for legitimate business purposes.

You may not respond to questions or comment publicly to anyone outside the Company on stock price movements or rumors about other material corporate developments (including discussions in Internet "chat rooms" or through "social media") unless it is part of your job (such as Investor Relations) or you have been specifically authorized to do so by the Chief Executive Officer or Chief Financial Officer in each instance (see Standards of Integrity, CP100 and Social Media Policy, CP411 for additional information). If you receive requests for information from the financial community, such as securities analysts, brokers or institutional investors, they should be directed to the Vice President-Investor Relations. Requests for information from the SEC or other regulators should be directed to the Office of General Counsel. Requests for information from individual shareowners should be directed to the Company's transfer agent, Equiniti Trust Company, at 1-800-345-3085 or via email to invserv@pplweb.com. If you inadvertently comment on stock price movements or rumors of other material corporate developments, you must immediately contact the Office of General Counsel.

Compliance Procedures

For purposes of ensuring that this Policy is disseminated to and followed by all covered persons:

- The current version of this Policy will at all times be posted on the Company's intranet as CP 121 under the "Company's Policies" heading. You may also request a copy of the current version of this Policy from the Office of the General Counsel.
- The Company provides training on this Policy and the insider trading rules to all Company personnel in connection with of PPL's Standards of Integrity, and provides additional information to personnel upon becoming a Section 16 Person, Permanent Restricted Person or Other Restricted Person under the Policy. The Company also provides periodic training refreshers to groups of Company personnel, including Section 16 Persons and Permanently Restricted Persons, from time to time.
- All Company personnel are required to annually certify that they have read, understand and agree to comply with the PPL Standards of Integrity, which requires a commitment to comply fully with the letter and spirit of all applicable laws, rules and regulations, and to abide by all applicable policies, procedures and guidelines, including this policy.

Violations, Exceptions and Questions

All persons subject to this Policy have an ethical and legal obligation to maintain the confidentiality of information and to refrain from engaging in transactions in Company Securities, or the securities of any other company, while in possession of Material Nonpublic Information. Each individual is responsible for making sure that they (and their family members or other entities over which they make or influence investment decisions) comply with this Policy. This means that each individual is responsible for the transactions of their family members and should make their family members aware of the need to confer with them before they trade in Company Securities, and each individual should treat all such transactions for the purposes of this Policy and applicable securities laws as if the transactions were for their own account.

In all cases, you are responsible for determining whether you are in possession of Material Nonpublic Information, and any action on the part of the Company, the Office of the General Counsel or any other employee or director pursuant to this Policy (or otherwise) does not in any way constitute legal advice or insulate you from liability under applicable securities laws.

Violations of this Insider Trading Policy may result in violations of federal securities laws and could subject both you and the Company (and potentially its directors and officers) to civil and criminal penalties. Failure to follow this Policy may result in disciplinary action, up to and including termination of employment, regardless of whether the employee's failure to comply results in a violation of law. A violation of this Policy also constitutes a violation of PPL's Standards of Integrity (CP100) and will be handled in accordance with the Responsible Behavior Program (GP702) or your employer's equivalent discipline policy. Any violation or perceived violation should be reported immediately to the Office of General Counsel. The

Company will cooperate with any investigation into trading that is conducted by a stock exchange or regulatory body.

The prohibitions and procedures set forth in this Policy are not intended to replace your responsibility to understand and comply with the legal prohibition against insider trading. Appropriate judgment should be exercised in connection with all securities trading, and insiders should exercise judgment so as to avoid even the appearance of impropriety.

Any exceptions to the above requirements need written approval from the Office of General Counsel. Anyone with questions concerning this Policy should contact the Office of General Counsel.

CERTIFICATION

I, VINCENT SORGI, certify that:

1. I have reviewed this annual report on Form 10-K of PPL Corporation (the "registrant") for the year ended December 31, 2024;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 31(d)

CERTIFICATION

I, MARLENE C. BEERS, certify that:

1. I have reviewed this annual report on Form 10-K of PPL Electric Utilities Corporation (the "registrant") for the year ended December 31, 2024;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

KENTUCKY UTILITIES COMPANY

FORM 10-Q
FOR THE QUARTER ENDED JUNE 30, 2025

Table of Contents

This combined Form 10-Q is separately filed by the following Registrants in their individual capacity: PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company. Information contained herein relating to any individual Registrant is filed by such Registrant solely on its own behalf, and no Registrant makes any representation as to information relating to any other Registrant, except that information under "Forward-Looking Information" relating to subsidiaries of PPL Corporation is also attributed to PPL Corporation.

Unless otherwise specified, references in this Form 10-Q, individually, to PPL Corporation, PPL Electric Utilities Corporation, Louisville Gas and Electric Company and Kentucky Utilities Company are references to such entities directly or to one or more of their subsidiaries, as the case may be, the financial results of which subsidiaries are consolidated into such Registrants' financial statements in accordance with GAAP. This presentation has been applied where identification of particular subsidiaries is not material to the matter being disclosed, and to conform narrative disclosures to the presentation of financial information on a consolidated basis.

GLOSSARY OF TERMS AND ABBREVIATIONS

PPL Corporation and its subsidiaries

CEP Reserves - CEP Reserves Inc., a cash management subsidiary of PPL that maintains cash reserves for the balance sheet management of PPL and certain subsidiaries.

KU - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky.

LG&E - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

LKE - LG&E and KU Energy LLC, a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries.

LKS - LG&E and KU Services Company, a subsidiary of LKE that provides administrative, management and support services primarily to LG&E and KU, as well as to LKE and its other subsidiaries.

Narragansett Electric - The Narragansett Electric Company, an entity that serves electric and natural gas customers in Rhode Island. On May 25, 2022, PPL and its subsidiary, PPL Rhode Island Holdings announced the completion of the acquisition of Narragansett Electric, which continues to provide services under the name Rhode Island Energy. Narragansett Electric is sometimes referred to as Rhode Island Energy or RIE.

PPL - PPL Corporation, the ultimate parent holding company of PPL Electric, PPL Energy Funding, PPL Capital Funding, LKE, RIE and other subsidiaries.

PPL Capital Funding - PPL Capital Funding, Inc., a financing subsidiary of PPL that provides financing for the operations of PPL and certain subsidiaries. Debt issued by PPL Capital Funding is fully and unconditionally guaranteed as to payment by PPL.

PPL Electric - PPL Electric Utilities Corporation, a public utility subsidiary of PPL engaged in the regulated transmission and distribution of electricity in its Pennsylvania service area and that provides electricity supply to its retail customers in this area as a PLR.

PPL Energy Funding - PPL Energy Funding Corporation, a subsidiary of PPL and the parent holding company of PPL Global and other subsidiaries.

PPL Energy Holdings - PPL Energy Holdings, LLC, a subsidiary of PPL and the parent holding company of PPL Energy Funding, LKE, PPL Electric, PPL Rhode Island Holdings, PPL Services and other subsidiaries.

PPL Global - PPL Global, LLC, a subsidiary of PPL Energy Funding that, prior to the sale of the U.K. utility business on June 14, 2021, primarily through its subsidiaries, owned and operated WPD, PPL's regulated electricity distribution businesses in the U.K. PPL Global was not included in the sale of the U.K. utility business on June 14, 2021.

PPL Rhode Island Holdings - PPL Rhode Island Holdings, LLC, a subsidiary of PPL Energy Holdings formed for the purpose of acquiring Narragansett Electric to which certain interests of PPL Energy Holdings in the Narragansett Stock Purchase Agreement were assigned.

PPL Services - PPL Services Corporation, a subsidiary of PPL that provides administrative, management and support services to PPL and its subsidiaries.

PPL WPD Limited - PPL WPD Limited, a U.K. subsidiary of PPL Global. Prior to the sale of the U.K. utility business on June 14, 2021, PPL WPD Limited was an indirect parent to WPD. PPL WPD Limited was not included in the sale of the U.K. utility business on June 14, 2021.

RIE - Rhode Island Energy, the name under which Narragansett Electric provides gas and electric services to customers in Rhode Island.

Other terms and abbreviations

£ - British pound sterling.

2024 Form 10-K - Annual Report to the SEC on Form 10-K for the year ended December 31, 2024.

Act 11 - Act 11 of 2012 that became effective on April 16, 2012. The Pennsylvania legislation authorized the PAPUC to approve two specific ratemaking mechanisms: the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, a DSIC.

AFUDC - allowance for funds used during construction. The cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

AOCI - accumulated other comprehensive income or loss.

ARO - asset retirement obligation.

ATM Program - at-the-market stock offering program.

Bcf - billion cubic feet. A unit of measure commonly used in quoting volumes of natural gas.

CCR(s) - coal combustion residual(s). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes.

Clean Air Act - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

CPCN - Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of certain plant, equipment, property or facilities for furnishing of utility service to the public. A CPCN is required for any capital addition, subject to KPSC jurisdiction, in excess of $100 million.

Customer Choice Act - the Pennsylvania Electricity Generation Customer Choice and Competition Act, legislation enacted to restructure the state's electric utility industry to create retail access to a competitive market for generation of electricity.

DSIC - Distribution System Improvement Charge. Authorized under Act 11, which is an alternative ratemaking mechanism providing more-timely cost recovery of qualifying distribution system capital expenditures.

DSM - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM programs proposed by any utility under its jurisdiction. DSM programs consist of energy efficiency programs intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information regarding their energy usage and support energy efficiency.

Earnings from Ongoing Operations - a non-GAAP financial measure of earnings adjusted for the impact of special items and used in "Item 2. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" (MD&A).

ECR - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements that apply to coal combustion wastes and byproducts from the production of energy from coal.

ELG(s) - Effluent Limitation Guidelines, regulations promulgated by the EPA.

Environmental Response Fund - Established in RIPUC Docket No. 2930. Created to satisfy remedial and clean-up obligations of RIE arising from the past ownership and/or operation of manufactured gas plants and sites associated with the operation and disposal activities of such gas plants.

EPA - Environmental Protection Agency, a U.S. government agency.

EPS - earnings per share.

FERC - Federal Energy Regulatory Commission, the U.S. federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

FY - fiscal year.

GAAP - Generally Accepted Accounting Principles in the U.S.

GHG(s) - greenhouse gas(es).

If-Converted Method - A method applied to calculate diluted EPS for a company with outstanding convertible debt. This method generally adds back the interest charges, net of tax, of the debt to net income and the convertible debt is assumed to have been converted to equity at the beginning of the period, and the resulting common shares are treated as outstanding shares for diluted EPS calculations.

IRA - Inflation Reduction Act, a U.S. federal law, which aims to curb inflation by possibly reducing the federal government budget deficit, lowering prescription drug prices, and investing in domestic energy production while promoting clean energy.

IRS - Internal Revenue Service, a U.S. government agency.

ISO - Independent System Operator.

ISR - Infrastructure, safety and reliability.

KPSC - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

Mill Creek Unit 5 - a combined cycle natural gas unit under construction in Kentucky, jointly owned by LG&E and KU, which is expected to provide additional generating capacity of 200 MW and 445 MW to LG&E and KU beginning in 2027.

Moody's - Moody's Investors Service, Inc., a credit rating agency.

MW - megawatt, one thousand kilowatts.

NAAQS - National Ambient Air Quality Standards periodically adopted pursuant to the Clean Air Act.

National Grid USA - National Grid USA is a wholly-owned subsidiary of National Grid plc, a British multinational electricity and gas utility company headquartered in London, England.

NERC - North American Electric Reliability Corporation.

NGCC - Natural gas combined cycle.

NPNS - the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception may receive accrual accounting treatment.

OCI - other comprehensive income or loss.

OVEC - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LG&E owns a 5.63% interest and KU owns a 2.50% interest, which are recorded at cost. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined capacities of 2,120 MW.

PAPUC - Pennsylvania Public Utility Commission, the state agency that regulates certain ratemaking, services, accounting and operations of Pennsylvania utilities.

PHMSA - Pipeline and Hazardous Materials Safety Administration.

PLR - Provider of Last Resort, the role of PPL Electric in providing default electricity supply within its delivery area to retail customers who have not chosen to select an alternative electricity supplier under the Customer Choice Act.

PP&E - property, plant and equipment.

RAR - Retired Asset Recovery rider, established by KPSC orders in 2021 to provide for recovery of and return on the remaining investment in certain electric generating units upon their retirement over a ten-year period following retirement.

Registrant(s) - refers to the Registrants named on the cover of this Form 10-Q (each a "Registrant" and collectively, the "Registrants").

Regulation S-X - SEC regulation governing the form and content of and requirements for financial statements required to be filed pursuant to the federal securities laws.

RIPUC - Rhode Island Public Utilities Commission, a three-member quasi-judicial tribunal with jurisdiction, powers, and duties to implement and enforce the standards of conduct under R.I. Gen. Laws § 39-1-27.6 and to hold investigations and hearings involving the rates, tariffs, tolls, and charges, and the sufficiency and reasonableness of facilities and accommodations of public utilities.

Rhode Island Division of Public Utilities and Carriers - the Rhode Island Division of Public Utilities and Carriers, which is headed by an Administrator who is not a Commissioner of the RIPUC, exercises the jurisdiction, supervision, power, and duties not specifically assigned to the RIPUC.

Safari Energy - Safari Energy, LLC, which was, prior to the sale of Safari Holdings on November 1, 2022, a subsidiary of Safari Holdings that provided solar energy solutions for commercial customers in the U.S.

Safari Holdings - Safari Holdings, LLC, which was, prior to its sale on November 1, 2022, a subsidiary of PPL and parent holding company of Safari Energy.

Sarbanes-Oxley - Sarbanes-Oxley Act of 2002, which sets requirements for management's assessment of internal controls for financial reporting. It also requires an independent auditor to make its own assessment.

Scrubber - an air pollution control device that can remove particulates and/or gases (primarily sulfur dioxide) from exhaust gases.

SEC - the U.S. Securities and Exchange Commission, a U.S. government agency primarily responsible to protect investors and maintain the integrity of the securities markets.

SOFR - Secured Overnight Financing Rate, a broad measure of the cost of borrowing cash overnight collateralized by Treasury securities.

S&P - S&P Global Ratings, a credit rating agency.

Superfund - federal environmental statute that addresses remediation of contaminated sites; states also have similar statutes.

TCJA - Tax Cuts and Jobs Act. Comprehensive U.S. federal tax legislation enacted on December 22, 2017.

Treasury Stock Method - a method applied to calculate diluted EPS that assumes any proceeds that could be obtained upon exercise of options and warrants (and their equivalents) would be used to purchase common stock at the average market price during the relevant period.

U.K. utility business - PPL WPD Investments Limited and its subsidiaries, including, notably, WPD plc and the four distribution network operators, which substantially represented PPL's U.K. Regulated segment. The U.K. utility business was sold on June 14, 2021.

VEBA - Voluntary Employee Beneficiary Association, a tax-exempt trust under the Internal Revenue Code Section 501(c)(9) used by employers to fund and pay eligible medical, life and similar benefits.

VSCC - Virginia State Corporation Commission, the state agency that has jurisdiction over the regulation of Virginia corporations, including utilities.

WPD - Prior to the sale of the U.K. utility business on June 14, 2021, refers to PPL WPD Investments Limited and its subsidiaries. WPD was included in the sale of the U.K. utility business on June 14, 2021.

WPD plc - Western Power Distribution plc, prior to the sale of the U.K utility business, a U.K. indirect subsidiary of PPL WPD Limited. Its principal indirectly owned subsidiaries are WPD (East Midlands), WPD (South Wales), WPD (South West) and WPD (West Midlands). WPD plc was included in the sale of the U.K. utility business on June 14, 2021.

Forward-looking Information

Statements contained in this Form 10-Q concerning expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements that are other than statements of historical fact are "forward-looking statements" within the meaning of the federal securities laws. Although the Registrants believe that the expectations and assumptions reflected in these statements are reasonable, there can be no assurance that these expectations will prove to be correct. Forward-looking statements are subject to many risks and uncertainties, and actual results may differ materially from the results discussed in forward-looking statements. In addition to the specific factors discussed in each Registrant's 2024 Form 10-K and in "Item 2. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Form 10-Q, the following are among the important factors that could cause actual results to differ materially and adversely from the forward-looking statements:

- weather and other conditions affecting generation, transmission and distribution operations, operating costs and customer energy use;
- strategic acquisitions, dispositions, joint-ventures or similar transactions and our ability to consummate these business transactions, integrate the acquired entities or realize expected benefits from them;
- pandemic health events or other catastrophic events such as wildfires, earthquakes, explosions, floods, droughts, tornadoes, hurricanes and other extreme weather-related events (including events potentially caused or exacerbated by climate change) and their impact on economic conditions, financial markets and supply chains;
- capital market conditions, including the availability of capital, credit or insurance, changes in interest rates and certain economic indices, and decisions regarding capital structure;
- volatility in or the impact of other changes in financial markets, commodity prices and economic conditions, including inflation;
- the outcome of rate cases or other cost recovery, revenue or regulatory proceedings;
- the direct or indirect effects on PPL or its subsidiaries or business systems of cyber-based intrusion or the threat of cyberattacks;
- development, adoption and use of artificial intelligence by us, our customers and our third-party vendors;
- the effect of recently established tariffs, the establishment of additional tariffs, or subsequent changes to tariffs once announced or implemented, on the cost or availability of imported goods;
- significant changes in the demand for electricity;
- expansion of alternative and distributed sources of electricity generation and storage;
- the effectiveness of our risk management programs, including commodity and interest rate hedging;
- defaults by counterparties or suppliers for energy, capacity, coal, natural gas or key commodities, goods or services;
- a material decline in the market value of PPL's equity;
- significant decreases in the fair value of debt and equity securities and their impact on the value of assets in defined benefit plans, and the related cash funding requirements if the fair value of those assets decline;
- interest rates and their effect on pension and retiree medical liabilities, ARO liabilities, interest payable on certain debt securities, and the general economy;
- the potential impact of any unrecorded commitments and liabilities of the Registrants and their subsidiaries;
- new accounting requirements or new interpretations or applications of existing requirements;
- adverse changes in the corporate credit ratings or securities analyst rankings of the Registrants and their securities;
- any requirement to record impairment charges pursuant to GAAP with respect to any of our significant investments;
- laws or regulations to reduce emissions of GHGs or the physical effects of climate change;
- the availability of electricity and natural gas, and any consequences of a perceived or actual inability to serve demand reliably;
- continuing ability to access fuel supply for LG&E and KU, as well as the ability to recover fuel costs and environmental expenditures in a timely manner at LG&E and KU and natural gas supply costs at LG&E and RIE;
- war, armed conflicts, terrorist attacks, or similar disruptive events, including the ongoing conflicts in Ukraine and the Middle East;
- changes in political, regulatory or economic conditions in states or regions where the Registrants or their subsidiaries conduct business;
- the ability to obtain necessary governmental permits and approvals;
- changes in state or federal tax laws or regulations;
- changes in state, federal or foreign legislation or regulatory developments;
- the impact of any state, federal or foreign investigations applicable to the Registrants, their subsidiaries or the energy industry;
- our ability to attract and retain qualified employees;

- the effect of changing expectations and demands of our customers, regulators, investors and stakeholders, including differing views on environmental, social and governance concerns;
- the effect of any business or industry restructuring;
- the ability to control costs and avoid cost and schedule overruns during the development, construction and operation of generation facilities or other projects;
- development of new projects, markets and technologies;
- performance of new ventures;
- collective labor bargaining negotiations and labor costs;
- risks related to wildfires, including costs of potential regulatory penalties and other liabilities, and the cost and availability of insurance and damages in excess of insurance liability coverage; and
- the outcome of litigation involving the Registrants and their subsidiaries.

Any forward-looking statements should be considered in light of these important factors and in conjunction with other documents of the Registrants on file with the SEC.

New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time to time, and it is not possible for the Registrants to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking statement speaks only as of the date on which such statement is made, and the Registrants undertake no obligation to update the information contained in the statement to reflect subsequent developments or information.

Investors should note that PPL announces material financial information in SEC filings, press releases and public conference calls. In accordance with SEC guidelines, PPL also uses the Investors section of its website, www.pplweb.com, to communicate with investors. It is possible that the financial and other information posted there could be deemed to be material information. The information on PPL's website is not part of this document.

17. New Accounting Guidance Pending Adoption	x	x	x	x

1. Interim Financial Statements

(All Registrants)

Capitalized terms and abbreviations appearing in the unaudited combined notes to condensed financial statements are defined in the glossary. Dollars are in millions, except per share data, unless otherwise noted. The specific Registrant to which disclosures are applicable is identified in parenthetical headings in italics above the applicable disclosure or within the applicable disclosure for each Registrant's related activities and disclosures. Within combined disclosures, amounts are disclosed for any Registrant when significant.

The accompanying unaudited condensed financial statements have been prepared in accordance with GAAP for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X and, therefore, do not include all of the information and footnote disclosures required by GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation in accordance with GAAP are reflected in the condensed financial statements. All adjustments are of a normal recurring nature, except as otherwise disclosed. Each Registrant's Balance Sheet at December 31, 2024 is derived from that Registrant's 2024 audited Balance Sheet. The financial statements and notes thereto should be read in conjunction with the financial statements and notes contained in each Registrant's 2024 Form 10-K. The results of operations for the three and six months ended June 30, 2025 are not necessarily indicative of the results to be expected for the full year ending December 31, 2025 or other future periods, because results for interim periods can be disproportionately influenced by various factors, developments and seasonal variations.

2. Segment and Related Information

(PPL)

PPL is organized into three segments, broken down by geographic location: Kentucky Regulated, Pennsylvania Regulated and Rhode Island Regulated.

The Kentucky Regulated segment primarily consists of the regulated electricity generation, transmission and distribution operations conducted by LG&E and KU, as well as LG&E's regulated transmission, distribution and sale of natural gas.

The Pennsylvania Regulated segment consists of the regulated electricity transmission and distribution operations of PPL Electric.

The Rhode Island Regulated segment consists of the regulated electricity transmission and distribution and natural gas distribution operations of RIE.

"Corporate and Other" primarily consists of corporate level financing costs, certain unallocated costs and certain non-recoverable costs incurred in conjunction with the acquisition of RIE. "Corporate and Other" is presented to reconcile segment information to PPL's consolidated results and is not a reportable segment.

The table below provides information about PPL's segments and includes the reconciliation to consolidated net income for the three months ended June 30, 2025:

	Kentucky Regulated	Pennsylvania Regulated	Rhode Island Regulated	Total
Operating Revenues from external customers (a)	$ 837	$ 693	$ 494	$ 2,024
Reconciliation of revenue				
Corporate and Other revenues				1
Total consolidated revenues				$ 2,025
Less:

Reconciliation of segment profit or loss to consolidated net income				
Corporate and Other net loss				(202)
Net Income				$ 497

(a) See Note 3 for additional information on Operating Revenues.

Other information for the segments and reconciliation to PPL's Consolidated results for the six months ended June 30, 2024 are as follows:

	Kentucky Regulated	Pennsylvania Regulated	Rhode Island Regulated	Total Segments	Corporate and Other	Consolidated Total
Other Segment Disclosures						
Amortization (a)	$ 18	$ 25	$ —	$ 43	$ 4	$ 47
Deferred income taxes and investment tax credits (b)	1	60	36	97	17	114
Expenditures for long lived assets	506	519	241	1,266	—	1,266

(a) Represents non-cash expense items that include amortization of operating lease right-of-use assets, regulatory assets and liabilities, debt discounts and premiums and debt issuance costs.
(b) Represents a non-cash expense item that is also included in "Income Taxes."

The following provides Balance Sheet data for the segments and reconciliation to PPL's consolidated Balance Sheets as of:

	June 30, 2025	December 31, 2024
Total Assets		
Kentucky Regulated	$ 18,076	$ 17,626
Pennsylvania Regulated	15,892	15,475
Rhode Island Regulated	7,125	7,055
Corporate and Other (a)	1,270	913
Total	$ 42,363	$ 41,069

(a) Primarily consists of unallocated items, including cash, PP&E, goodwill and the elimination of inter-segment transactions.

(PPL Electric)

PPL Electric has two operating segments, distribution and transmission, which are aggregated into a single reportable segment.

The measure of segment assets is reported on PPL Electric's Balance Sheets as total consolidated assets. The measures of significant segment expenses are reported on PPL Electric's Statements of Income. The measures of significant non-cash segment expenses as well as expenditures for long lived assets are reported on PPL Electric's Statements of Cash Flows.

(LG&E and KU)

Each of LG&E and KU operates as a single operating and reportable segment.

The measures of segment assets are reported on the Balance Sheets of LG&E and KU as total assets. The measures of significant segment expenses are reported on the Statements of Income of LG&E and KU. The measures of significant non-cash segment expenses as well as expenditures for long lived assets are reported on the Statements of Cash Flows of LG&E and KU.

3. Revenue from Contracts with Customers

(All Registrants)

See Note 3 in the Registrants' 2024 Form 10-K for a discussion of the principal activities from which PPL Electric, LG&E and KU and PPL's Pennsylvania Regulated, Rhode Island Regulated, and Kentucky Regulated segments generate their revenues. The following tables reconcile "Operating Revenues" included in each Registrant's Statement of Income with revenues generated from contracts with customers for the periods ended June 30.

	2025 Three Months			
	PPL	PPL Electric	LG&E	KU
Operating Revenues (a)(b)	$ 2,025	$ 693	$ 378	$ 472
Revenues derived from:				
Alternative revenue programs (c)	20	11	(1)	(3)
Other (d)	(5)	(4)	(1)	—
Revenues from Contracts with Customers	$ 2,040	$ 700	$ 376	$ 469

	2024 Three Months			
	PPL	PPL Electric	LG&E	KU
Operating Revenues (a)(b)	$ 1,881	$ 673	$ 366	$ 464
Revenues derived from:				
Alternative revenue programs (c)	(3)	(8)	2	1
Other (d)	(4)	(3)	(1)	(1)
Revenues from Contracts with Customers	$ 1,874	$ 662	$ 367	$ 464

	2025 Six Months			
	PPL	PPL Electric	LG&E	KU
Operating Revenues (a)(b)	$ 4,529	$ 1,512	$ 883	$ 1,036
Revenues derived from:				
Alternative revenue programs (c)	70	9	1	1
Other (d)	(13)	(9)	(2)	(2)
Revenues from Contracts with Customers	$ 4,586	$ 1,512	$ 882	$ 1,035

	2024 Six Months			
	PPL	PPL Electric	LG&E	KU
Operating Revenues (a)(b)	$ 4,185	$ 1,443	$ 842	$ 989
Revenues derived from:				
Alternative revenue programs (c)	5	(11)	4	6
Other (d)	(12)	(8)	(2)	(2)
Revenues from Contracts with Customers	$ 4,178	$ 1,424	$ 844	$ 993

(a) PPL includes $494 million and $1,120 million for the three and six months ended June 30, 2025 and $389 million and $938 million for the three and six months ended June 30, 2024 of revenues from external customers reported by the Rhode Island Regulated segment. PPL Electric represents revenues from external customers reported by the Pennsylvania Regulated segment and LG&E and KU, net of intercompany power sales and transmission revenues, represent revenues from external customers reported by the Kentucky Regulated segment. See Note 2 for additional information.

(b) PPL's transition services agreement associated with the RIE acquisition ended in the third quarter of 2024. In conjunction with the completion of the agreement, PPL conformed the presentation of RIE's and the Rhode Island Regulated segment's net metering charges with the presentation of the other segments, resulting in an increase in Operating Revenues and a corresponding increase in Energy purchases beginning in the fourth quarter of 2024. For the three and six months ended June 30, 2025, net metering of $55 million and $96 million was included in Energy purchases on PPL's Statement of Income. For the three and six months ended June 30, 2024, $53 million and $85 million of net metering was presented as a reduction of Operating Revenues on PPL's Statement of Income.

(c) This line item shows the over/under collection of rate mechanisms deemed alternative revenue programs with over-collections of revenue shown as positive amounts in the table above and under-collections shown as negative amounts.

(d) Represents additional revenues outside the scope of revenues from contracts with customers, such as lease and other miscellaneous revenues.

The following tables show revenues from contracts with customers disaggregated by customer class for the periods ended June 30.

	Three Months							
	Residential	Commercial	Industrial	Other (a)	Wholesale - municipality	Wholesale - other (b)	Transmission	Revenues from Contracts with Customers

2024	$ 388	$ 253	$ 225	$ 89	$ 11	$ 27	$ —	$ 993

(a) Primarily includes revenues from pole attachments, street lighting, other public authorities and other non-core businesses, and for the Rhode Island Regulated Segment certain regulatory deferral mechanisms which could result in a reduction in revenues from over collections. For the periods ended June 30, 2024, the Rhode Island Regulated segment primarily includes open access tariff revenues, which are calculated on combined customer classes.

(b) Includes wholesale power and transmission revenues. LG&E and KU amounts include intercompany power sales and transmission revenues, which are eliminated upon consolidation at the Kentucky Regulated segment.

(c) PPL's transition services agreement associated with the RIE acquisition ended in the third quarter of 2024. In conjunction with the completion of the agreement, PPL disaggregated the 2024 revenues of the Rhode Island Regulated segment in a manner consistent with that of its other segments. This resulted in certain customer revenues for the Rhode Island Regulated segment, which were previously presented in the "Other" category, being presented in the "Residential", "Commercial" or "Industrial" customer classes beginning in the fourth quarter of 2024. Applying the previous methodology to 2025 revenues would result in $113 million of Residential, $104 million of Commercial and $20 million of Industrial for the three months ended June 30, 2025 and $268 million of Residential, $193 million of Commercial and $38 million of Industrial for the six months ended June 30, 2025 for the Rhode Island Regulated segment being presented as "Other".

As discussed in Note 2, PPL segments its business by geographic location. Revenues from external customers for each segment are reconciled to revenues from contracts with customers in the footnotes to the tables above.

Contract receivables from customers are primarily included in "Accounts receivable - Customer", "Unbilled revenues", and "Other noncurrent assets" on the Balance Sheets.

The following table shows the accounts receivable and unbilled revenues balances that were impaired for the periods ended June 30.

	Three Months		Six Months	
	2025	2024	2025	2024
PPL (a)	$ 14	$ 2	$ 42	$ 43
PPL Electric (a)	2	(4)	9	24
LG&E	—	—	2	1
KU	1	—	2	1

(a) 2024 includes amounts impaired related to PPL Electric's billing issues. See Note 6 in PPL's 2024 Form 10-K for additional information.

Contract liabilities result from recording contractual billings in advance for customer attachments to the Registrants' infrastructure and payments received in excess of revenues earned to date. Advanced billings for customer attachments are generally recognized as revenue ratably over the quarterly billing period. Payments received in excess of revenues earned to date are recognized as revenue as services are delivered in subsequent periods. The Registrants' contract liabilities are not material at June 30, 2025 and 2024.

4. Earnings Per Share

(PPL)

Basic EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of common shares outstanding during the applicable period. Diluted EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of common shares outstanding, increased by the number of incremental shares that would be outstanding if potentially dilutive share-based payment awards were converted to common shares as calculated using the Two-Class Method or Treasury Stock Method. The If-Converted Method is applied to the Exchangeable Senior Notes due 2028 (Exchangeable Notes) issued in February 2023.

Incremental non-participating securities that have a dilutive impact are detailed in the table below. In 2025, these securities include forward sales of PPL common stock issued through an ATM Program and the number of shares needed to settle the conversion premium on the Exchangeable Notes. The forward sale agreements are dilutive under the Treasury Stock Method to the extent the average stock price of PPL's common shares exceeds the forward sale price prescribed in the agreements. See Note 7 for additional information on the ATM Program and Note 8 in PPL's 2023 Form 10-K for additional information on the Exchangeable Notes.

Reconciliations of the amounts of income and shares of PPL common stock (in thousands) for the periods ended June 30 used in the EPS calculation are:

	Three Months		Six Months	
	2025	2024	2025	2024
Income (Numerator)				
Net income attributable to PPL	$ 183	$ 190	$ 597	$ 497
Less amounts allocated to participating securities	—	1	1	1
Net income available to PPL common shareowners - Basic and Diluted	$ 183	$ 189	$ 596	$ 496
Shares of Common Stock (Denominator)				
Weighted-average shares - Basic EPS	739,276	737,748	738,986	737,630
Add: Dilutive share-based payment awards (a)	2,504	1,815	2,606	1,561
Add: Forward sale agreements	23	—	11	—
Add: Exchangeable Notes	738	—	369	—
Weighted-average shares - Diluted EPS	742,541	739,563	741,972	739,191
Basic EPS				
Net Income available to PPL common shareowners	$ 0.25	$ 0.26	$ 0.81	$ 0.67
Diluted EPS				
Net Income available to PPL common shareowners	$ 0.25	$ 0.26	$ 0.80	$ 0.67

(a) The Treasury Stock Method was applied to non-participating share-based payment awards.

For the periods ended June 30, PPL issued common stock related to stock-based compensation plans as follows (in thousands):

	Three Months		Six Months	
	2025	2024	2025	2024
DRIP	186	—	386	—

For the periods ended June 30, the following shares (in thousands) were excluded from the computations of diluted EPS because the effect would have been antidilutive.

	Three Months		Six Months	
	2025	2024	2025	2024
Stock-based compensation awards	196	—	186	—
Forward sale agreements	5,648	—	3,841	—

5. Income Taxes

Reconciliations of income tax expense (benefit) for the periods ended June 30 are as follows.

(PPL)

	Three Months		Six Months	
	2025	2024	2025	2024
Federal income tax on Income Before Income Taxes at statutory tax rate - 21%	$ 48	$ 50	$ 157	$ 132
Increase (decrease) due to:				
State income taxes, net of federal income tax benefit	8	11	28	28
Valuation allowance adjustments	2	2	6	5
Amortization of investment tax credit including deferred taxes on basis adjustment	(1)	—	(4)	(2)
Utility rate-making tax adjustments (a)	(5)	(5)	(14)	(10)
Amortization of excess deferred federal and state income taxes	(6)	(7)	(21)	(20)
Other	1	(1)	(3)	(2)
Total increase (decrease)	(1)	—	(8)	(1)
Total income tax expense (benefit)	$ 47	$ 50	$ 149	$ 131

(a) Primarily consists of tax impacts of AFUDC equity and related depreciation across PPL's regulated utility subsidiaries and flow through tax impacts of Pennsylvania utility ratemaking. Flow through occurs when the regulator excludes deferred tax expense or benefit from recoverable costs when determining income tax expense.

(PPL Electric)

	Three Months		Six Months	
	2025	2024	2025	2024
Federal income tax on Income Before Income Taxes at statutory tax rate - 21%	$ 38	$ 41	$ 88	$ 83
Increase (decrease) due to:				
State income taxes, net of federal income tax benefit	11	13	27	26
Utility rate-making tax adjustments (a)	(6)	(6)	(12)	(10)
Amortization of excess deferred federal and state income taxes	(2)	(3)	(5)	(5)
Other	2	1	(1)	—
Total increase (decrease)	5	5	9	11
Total income tax expense (benefit)	$ 43	$ 46	$ 97	$ 94

(a) Primarily consists of tax impacts of AFUDC equity and related depreciation and flow through tax impacts of Pennsylvania utility ratemaking. Flow through occurs when the regulator excludes deferred tax expense or benefit from recoverable costs when determining income tax expense.

(LG&E)

Other

IRS Revenue Procedure 2023-15 *(PPL and LG&E)*

On April 14, 2023, the IRS issued Revenue Procedure 2023-15, which provides a safe harbor method of accounting that taxpayers may use to determine whether expenses to repair, maintain, replace, or improve natural gas transmission and distribution property must be capitalized for tax purposes. PPL and LG&E reviewed the revenue procedure and determined that there are no material impacts to their financial statements.

One Big Beautiful Bill Act *(All Registrants)*

On July 4, 2025, President Trump signed into law the One Big Beautiful Bill Act. The Registrants are currently reviewing the law to assess any material impacts to the financial statements.

Additionally, on July 7, 2025, President Trump issued an Executive Order directing the Treasury to take action to strictly enforce the termination of clean electricity tax credits under IRC Sections 45Y and 48E for wind and solar. This may include stricter regulations or other measures concerning what qualifies as having "commenced construction". The date that a wind or solar project commences construction is critical in the determination of whether such project will be eligible for the currently available tax credits. PPL is actively monitoring Treasury guidance and expects to take all commercially reasonable measures to preserve the eligibility of the Kentucky projects for the existing tax credits provided for under the IRA.

6. Utility Rate Regulation

(All Registrants)

The following table provides information about the regulatory assets and liabilities of cost-based rate-regulated utility operations.

	PPL		PPL Electric		LG&E		KU

Regulatory Matters

Rhode Island Activities *(PPL)*

FY 2026 Gas ISR Plan

On December 31, 2024, RIE filed its FY 2026 Gas ISR Plan with the RIPUC with a budget that included $187 million of capital investment spend and up to $15 million of additional contingency plan spend in connection with the PHMSA's potential enactment of regulations during FY 2026 that, if enacted, would significantly alter RIE's leak detection and repair obligations under federal regulations. The plan also included proposed spending on curb-to-curb paving of $22 million. On March 28, 2025, the RIPUC approved a FY 2026 Gas ISR Plan of $165 million of which $147 million is for capital investment spend and $18 million is spend for paving costs as operations and maintenance (O&M), plus a potential additional $15 million is available if the above-mentioned regulations are implemented by the PHMSA. On March 31, 2025, the RIPUC approved RIE's compliance filing for rates effective April 1, 2025.

FY 2026 Electric ISR Plan

On December 23, 2024, RIE filed its FY 2026 Electric ISR Plan with the RIPUC with a budget that included $248 million of capital investment spend (including $88 million for Advanced Metering Functionality (AMF)), $14 million of vegetation operation and maintenance (O&M) spend and $1 million of Other O&M spend. On March 28, 2025, the RIPUC approved a FY 2026 Electric ISR Plan of $219 million for capital investment spend (including $88 million for AMF), $14 million for vegetation management O&M spend, and $1 million for Other O&M spend. On March 31, 2025, the RIPUC approved RIE's compliance filing for rates effective April 1, 2025.

Hold Harmless Implementation Agreement

As a condition to the Acquisition (as defined in Note 8) of RIE in May 2022, PPL made a commitment to the Rhode Island Division of Public Utilities and Carriers to hold harmless Rhode Island customers from the impact of future rate increases resulting from changes in Accumulated Deferred Income Taxes as a result of the Acquisition (the Hold Harmless Commitment). On June 13, 2025, an agreement was entered into by and among RIE, PPL, PPL Rhode Island Holdings and the Rhode Island Division of Public Utilities and Carriers Advocacy Section to satisfy RIE's obligations under the Hold Harmless Commitment, approximately $155 million, and proposes to resolve that amount through bill credits issued to customers, with approximately $74 million to be issued throughout the first quarter of 2026 and approximately $81 million to be issued throughout the first quarter of 2027. The bill credits would be recorded as a reduction to revenue in the periods in which the credits are applied to customers' bills. An evidentiary hearing was held on July 18, 2025. The Hearing Officer granted the Attorney General of Rhode Island's request for a continuance of the hearing until August 8, 2025 to allow for review and consideration of the calculations of the net present value of the obligation and bill credits. PPL cannot predict the outcome of these proceedings.

Kentucky Activities

(PPL, LG&E and KU)

Rate Case Proceedings

On May 30, 2025, LG&E and KU filed requests with the KPSC for an increase in annual electricity and gas revenues of approximately $391 million ($105 million and $226 million in electricity revenues at LG&E and KU and $60 million in gas revenues at LG&E) and approval of certain regulatory and accounting treatments. The revenue increases would be an increase of 8.3% and 11.5% in electricity revenues at LG&E and KU, and an increase of 14.0% in gas revenues at LG&E.

The applications are based on a forecasted test year of January 1, 2026 through December 31, 2026 and request an authorized return on equity of 10.95%. Subject to KPSC approval, the requested rates are expected to become effective on January 1, 2026. Certain counterparties have intervened in the proceedings. Data discovery and the filing of written testimony will continue through the third quarter of 2025 and a hearing in the matter has been scheduled for November 3, 2025. A ruling from the KPSC is expected during the fourth quarter of 2025. PPL, LG&E and KU cannot predict the outcome of these proceedings.

2025 CPCN

On February 28, 2025, LG&E and KU filed an application with the KPSC regarding certain future plans for new generation and generation-related construction matters. The proposals included in the application are intended to serve anticipated load growth, including from potential data center demand in LG&E's or KU’s service territory. The proposals do not include retirements of coal or other fossil-fueled plants, which would require additional KPSC approval procedures under Kentucky legislation enacted in 2023 and 2024.

LG&E and KU submitted a joint application to the KPSC for approval of certain certificates of public convenience and necessity, site compatibility certificates, and accounting treatment, where applicable, relating to a number of generation-related plans or projects that generally are expected to become operational or established within the next six years. The aggregate projected capital expenditures associated with these proposals are currently expected to be $3.7 billion over the 2025 to 2031 period. The application includes proposals:

- to build a 645 MW natural gas combined cycle (NGCC) generation unit at KU's E.W. Brown station,
- to build a 645 MW NGCC generation unit at LG&E's Mill Creek station,
- to build a four-hour 400 MW (1,600 MWh total) battery energy storage system (BESS) at LG&E's Cane Run station, and
- to build a selective catalytic reduction (SCR) environmental facility at KU’s Ghent station Unit 2.

The new NGCC units are anticipated to be wholly owned by LG&E and the BESS unit jointly owned by LG&E (32%) and KU (68%), with actual project costs allocated consistent with LG&E's and KU's ultimate ownership shares and existing shared dispatch, cost allocation, tariff or other frameworks. The proposed Mill Creek NGCC unit is in addition to a new NGCC unit currently under construction at that location.

The filing also notes projected in service dates for the projects, including the E.W. Brown NGCC unit in 2030, the Mill Creek NGCC unit in 2031, the Cane Run BESS in 2028 and the Ghent SCR facility in 2028.

On July 29, 2025, LG&E and KU filed with the KPSC a stipulation and recommendation regarding a proposed resolution of issues with several of the intervenors in the CPCN proceeding. The stipulation recommends to the KPSC the approval of the large majority of LG&E's and KU's requested generation-related projects and associated accounting matters, subject to certain changes. Under the stipulation, the parties agree the KPSC should issue an order granting a CPCN for: (a) a 645 MW NGCC generation unit at KU's E.W. Brown station; (b) a 645 MW NGCC at LG&E's Mill Creek station; and (c) a SCR environmental facility at KU's Ghent station Unit 2. In addition, the proposal to build the $775 million Cane Run BESS would be withdrawn without prejudice, the relevant costs regarding the proposed $1.4 billion Mill Creek NGCC would be recovered through a new rate tracker mechanism, and the retirement date for the existing Mill Creek Unit 2 would be extended from 2027 to the operational date of the proposed Mill Creek NGCC or afterwards, subject to relevant future economic analysis, regulatory or environmental authorizations. The stipulation also contains provisions relating to regulatory asset accounting, proposed data center tariffs, future renewable power requests-for-proposals and other matters. LG&E and KU would retain the right to seek approval of the potentially withdrawn Cane Run BESS or similar substitute project in future regulatory proceedings.

A hearing in the matter has been scheduled to begin on August 4, 2025. LG&E and KU anticipate a ruling from the KPSC during the fourth quarter of 2025. PPL, LG&E and KU cannot predict the outcome of the proceedings.

Kentucky January 2025 Storm

In January 2025, LG&E and KU experienced snow, ice, sleet and freezing rain in their service territories, resulting in substantial damage to certain of LG&E's and KU's assets. On January 31, 2025, LG&E and KU submitted a filing with the KPSC requesting regulatory asset treatment of the extraordinary operations and maintenance (O&M) expenses portion of the costs incurred related to the storm. On March 19, 2025, the KPSC issued an order authorizing LG&E and KU to establish, for accounting purposes only, regulatory assets based on the jurisdictional incremental costs of extraordinary O&M expense incurred by LG&E and KU as a result of the 2025 winter storm, with recovery amounts and amortization thereof to be determined in subsequent base rate proceedings. LG&E and KU cannot predict the outcome of these matters. As of June 30, 2025, LG&E and KU recorded regulatory assets related to the storm of $2 million and $7 million.

Mill Creek Unit 1 and Unit 2 RAR Application (PPL and LG&E)

In 2023, the KPSC issued an order approving, among other items, the requested retirement of Mill Creek Units 1 and 2.

On October 4, 2024, LG&E submitted an application related to the retirement of Mill Creek Unit 1, which occurred on December 31, 2024, requesting recovery of associated costs under the RAR. LG&E expects these costs to be approximately $125 million and proposed to begin application of the RAR with bills issued in May 2025. On February 24, 2025, the KPSC issued an order approving LG&E's cost recovery for Mill Creek Unit 1 under the RAR and related amounts were included in bills beginning in May 2025.

Mill Creek Unit 2 is currently expected to be retired in 2027. LG&E anticipates the recovery of associated costs, including the remaining net book value, for Mill Creek Unit 2 through the RAR. The remaining net book value of Mill Creek Unit 2 was approximately $208 million at June 30, 2025 and LG&E is continuing to depreciate using the current approved rates through its anticipated retirement date in 2027. LG&E expects to reclassify the net book value remaining at retirement, which is expected to total approximately $161 million, to a regulatory asset to be amortized over a period of ten years in accordance with the RAR. There can be no assurance that these costs will be recovered in the amounts or over the time periods that LG&E expects. See the "2025 CPCN" discussion above for information regarding potential changes in the retirement date of Mill Creek Unit 2.

Pennsylvania Activities *(PPL and PPL Electric)*

DSIC Petition

On April 26, 2024, PPL Electric filed a Petition with the PAPUC requesting that the PAPUC waive PPL Electric's DSIC cap of 5% of billed revenues and increase the maximum allowable DSIC to 9% for bills rendered on or after January 1, 2025. On February 28, 2025, the PAPUC issued its written order permitting PPL Electric to increase its DSIC cap from 5% to 7.5% for bills rendered on or after March 13, 2025 until the effective date of rates established in PPL Electric's next base rate case or the end of the PPL Electric's 2023-2027 Long-term Infrastructure Improvement Plan, whichever occurs first, at which time it will return to 5%.

Federal Matters

FERC Transmission Rate Filing (PPL, LG&E and KU)

In 2018, LG&E and KU applied to the FERC requesting elimination of certain on-going waivers and credits to a sub-set of transmission customers relating to the 1998 merger of LG&E's and KU's parent entities and the 2006 withdrawal of LG&E and KU from the Midcontinent Independent System Operator, Inc. (MISO), a regional transmission operator and energy market. The application sought termination of LG&E's and KU's commitment to provide certain Kentucky municipalities mitigation for certain horizontal market power concerns arising out of the 1998 LG&E and KU merger and 2006 MISO withdrawal. The amounts at issue are generally waivers or credits granted to a limited number of Kentucky municipalities for either certain LG&E and KU or MISO transmission charges incurred for transmission service received. In 2019, the FERC granted LG&E's and KU's request to remove the ongoing credits, conditioned upon the implementation by LG&E and KU of a transition mechanism for certain existing power supply arrangements, which was subsequently filed, modified, and approved by the FERC in 2020 and 2021. In 2020, LG&E and KU and other parties filed appeals with the U.S. Court of Appeals - D.C. Circuit (D.C. Circuit Court of Appeals) regarding the FERC's orders on the elimination of the mitigation and required transition mechanism. In August 2022, the D.C. Circuit Court of Appeals issued an order remanding the proceedings back to the FERC. On May 18, 2023, the FERC issued an order on remand reversing its 2019 decision and requiring LG&E and KU to refund credits previously withheld, including under such transition mechanism. LG&E and KU filed a petition for review of the FERC's May 18, 2023 order with the D.C. Circuit Court of Appeals and provided refunds in accordance with the FERC order on December 1, 2023. The FERC issued an order on LG&E's and KU's compliance filing on November 16, 2023, and LG&E and KU filed a petition for review of this November 16, 2023 order on February 14, 2024. The FERC issued the substantive order on rehearing on March 21, 2024, reaffirming its prior decision. Oral argument before the D.C. Circuit Court of Appeals occurred on January 21, 2025. LG&E and KU cannot predict the ultimate outcome of the proceedings or any other post decision process but do not expect the annual impact to have a material effect on their operations or financial condition. LG&E and KU currently receive recovery of certain waivers and credits primarily through base rates increases, provided, however, that increases associated with the FERC's May 18, 2023 order are expected to be subject to future rate proceedings.

Recovery of Transmission Costs (PPL)

Until December 2022, RIE's transmission facilities were operated in combination with the transmission facilities of National Grid USA's New England affiliates, Massachusetts Electric Company (MECO) and New England Power (NEP), a National Grid USA affiliate, as a single integrated system with NEP designated as the combined operator. As of January 1, 2023, RIE operates its own transmission facilities. NE-ISO allocates RIE's costs among transmission customers in New England, in accordance with the ISO Open Access Transmission Tariff (ISO-NE OATT). According to the FERC orders, RIE is compensated for its actual monthly transmission costs, with its authorized maximum return on equity (ROE) of 11.74% on its transmission assets.

The ROE for transmission rates under the ISO-NE OATT is the subject of four complaints that are pending before the FERC. On October 16, 2014, the FERC issued an order on the first complaint, Opinion No. 531-A, resetting the base ROE applicable to transmission assets under the ISO-NE OATT from 11.14% to 10.57% effective as of October 16, 2014 and establishing a maximum ROE of 11.74%. On April 14, 2017, this order was vacated and remanded by the D. C. Circuit Court of Appeals (Court of Appeals). After the remand, the FERC issued an order on October 16, 2018 applicable to all four pending cases where it proposed a new base ROE methodology that, with subsequent input and support from the New England Transmission Owners (NETO), yielded a base ROE of 10.41%. Subsequent to the FERC's October 2018 order in the New England Transmission Owners cases, the FERC further refined its ROE methodology in another proceeding and has applied that refined methodology to transmission owners' ROEs in other jurisdictions, and the NETOs filed further information in the New England matters to distinguish their case. Those determinations in other jurisdictions have been vacated and remanded back to the FERC for further proceedings by the D.C. Circuit Court of Appeals. The proceeding and the final base rate ROE determination in the New England matters remain open, pending a final order from the FERC. PPL cannot predict the outcome of this matter, and an estimate of the impact cannot be determined.

Other

Purchase of Receivables Program

(PPL and PPL Electric)

In accordance with RIPUC-approved and PAPUC-approved purchase of accounts receivable programs, RIE and PPL Electric purchase certain accounts receivable from alternative electricity suppliers at a discount, which reflects a provision for uncollectible accounts. The alternative electricity suppliers have no continuing involvement or interest in the purchased accounts receivable. Accounts receivable that are acquired are initially recorded at fair value on the date of acquisition.

During the three and six months ended June 30, 2025, RIE purchased $68 million and $155 million of accounts receivable from alternative suppliers. During the three and six months ended June 30, 2024, RIE purchased $44 million and $95 million of accounts receivable from alternative suppliers.

During the three and six months ended June 30, 2025, PPL Electric purchased $345 million and $811 million of accounts receivable from alternative suppliers. During the three and six months ended June 30, 2024, PPL Electric purchased $348 million and $767 million of accounts receivable from alternative suppliers.

7. Financing Activities

Credit Arrangements and Short-term Debt

(All Registrants)

The Registrants maintain credit facilities to enhance liquidity, provide credit support and provide a backstop to commercial paper programs. For reporting purposes, on a consolidated basis, the credit facilities and commercial paper programs of PPL Electric, LG&E and KU are attributable to PPL. The amounts listed in the borrowed column below are recorded as "Short-term debt" on the Balance Sheets. The following credit facilities were in place at:

		June 30, 2025				December 31, 2024	
	Expiration Date	Capacity	Borrowed	Letters of Credit and Commercial Paper Issued (c)	Unused Capacity	Borrowed	Letters of Credit and Commercial Paper Issued (c)
PPL							
PPL Capital Funding (a)							
Syndicated Credit Facility (b)	Dec. 2029	$ 1,500	$ —	$ 470	$ 1,030	$ —	$ 138
Bilateral Credit Facility	Feb. 2026	100	—	—	100	—	—
Bilateral Credit Facility	Feb. 2026	100	—	20	80	—	15
Total PPL Capital Funding Credit Facilities		$ 1,700	$ —	$ 490	$ 1,210	$ —	$ 153
PPL Electric							
Syndicated Credit Facility	Dec. 2029	$ 750	$ —	$ 386	$ 364	$ —	$ 1
Total PPL Electric Credit Facilities		$ 750	$ —	$ 386	$ 364	$ —	$ 1
LG&E							
Syndicated Credit Facility	Dec. 2029	$ 600	$ —	$ 158	$ 442	$ —	$ 25
Total LG&E Credit Facilities		$ 600	$ —	$ 158	$ 442	$ —	$ 25
KU							
Syndicated Credit Facility	Dec. 2029	$ 600	$ —	$ 275	$ 325	$ —	$ 140
Total KU Credit Facilities		$ 600	$ —	$ 275	$ 325	$ —	$ 140

(a) PPL Capital Funding's obligations are fully and unconditionally guaranteed by PPL.

(b) In January 2025, PPL Capital Funding increased the borrowing capacity of this facility from $1.25 billion to $1.50 billion. At June 30, 2025, the facility included a $250 million borrowing sublimit for RIE and a $1.25 billion sublimit for PPL Capital Funding. At December 31, 2024, the facility included a $250 million borrowing sublimit for RIE and a $1 billion borrowing sublimit for PPL Capital Funding. RIE's borrowing sublimit is adjustable, at the borrowers' option, from $0 to $600 million, with the remaining balance available under the facility allocated to PPL Capital Funding. At June 30, 2025, PPL Capital Funding had $470 million of commercial paper outstanding and RIE had no commercial paper outstanding. At December 31, 2024, PPL Capital Funding had $138 million of commercial paper outstanding and RIE had no commercial paper outstanding. RIE's obligations under the facility are not guaranteed by PPL.
(c) Commercial paper issued reflects the undiscounted face value of the issuance.

(PPL)

In January 2025, PPL Capital Funding amended its existing $1.25 billion syndicated credit facility to extend the termination date from December 6, 2028 to December 6, 2029 and to increase the borrowing capacity under the facility to $1.50 billion.

(PPL and PPL Electric)

In January 2025, PPL Electric amended its existing $650 million syndicated credit facility to extend the termination date from December 6, 2028 to December 6, 2029 and to increase the borrowing capacity under the facility to $750 million.

(PPL and LG&E)

In January 2025, LG&E amended its existing $500 million syndicated credit facility to extend the termination date from December 6, 2028 to December 6, 2029 and to increase the borrowing capacity under the facility to $600 million.

(PPL and KU)

In January 2025, KU amended its existing $400 million syndicated credit facility to extend the termination date from December 6, 2028 to December 6, 2029 and to increase the borrowing capacity under the facility to $600 million.

(All Registrants)

The Registrants maintain commercial paper programs to provide an additional financing source to fund short-term liquidity needs. Commercial paper issuances, included in "Short-term debt" on the Balance Sheets, are supported by the respective Registrant's credit facilities. The following commercial paper programs were in place at:

	June 30, 2025				December 31, 2024	
	Weighted - Average Interest Rate	Capacity (c)	Commercial Paper Issuances (d)	Unused Capacity	Weighted - Average Interest Rate	Commercial Paper Issuances (d)
PPL Capital Funding (a)(b)	4.66%	$ 1,350	$ 470	$ 880	4.76%	$ 138
RIE (b)		250	—	250		—
PPL Electric	4.63%	650	385	265		—
LG&E	4.66%	500	158	342	4.72%	25
KU	4.66%	400	275	125	4.71%	140
Total		$ 3,150	$ 1,288	$ 1,862		$ 303

(a) PPL Capital Funding's obligations are fully and unconditionally guaranteed by PPL.
(b) Issuances under the PPL Capital Funding and RIE commercial paper programs are supported by the PPL Capital Funding syndicated credit facility. At June 30, 2025, the borrowing sublimits were $250 million for RIE and $1.25 billion for PPL Capital Funding. At December 31, 2024, the borrowing sublimits were $250 million for RIE and $1 billion for PPL Capital Funding. PPL Capital Funding's commercial paper program is also backed by a separate bilateral credit facility for $100 million.
(c) On July 14, 2025, the capacity of the commercial paper programs were increased to $1,600 million for PPL Capital Funding, $750 million for PPL Electric, $600 million for LG&E and $600 million for KU, bringing the capacity of each program into alignment with the increased capacity of the supporting syndicated credit facilities for each entity, as amended in January 2025.
(d) Commercial paper issued reflects the undiscounted face value of the issuance.

(PPL Electric, LG&E, and KU)

See Note 11 for discussion of intercompany borrowings.

(PPL)

Equity Securities

ATM Program

In February 2025, PPL entered into an equity distribution agreement, pursuant to which PPL may sell, from time to time, up to an aggregate of $2 billion of its common stock through an ATM Program, which may utilize an optional forward sales component. Each forward contract under the agreement must be settled within 24 months. The compensation paid to the selling agents by PPL may be up to 2% of the gross offering proceeds of the shares. During the six months ended June 30, 2025, PPL entered into forwards contracts to sell approximately 9.9 million shares of its common stock at a blended initial forward price of approximately $34.77 per share. The forward sale price may be adjusted based on changes in daily interest rates, for certain stock loan fees as determined by a third-party agent, and will be subject to predetermined reductions based on expected dividends. Each outstanding forward contract must be settled on or before December 30, 2025. PPL may elect, at its discretion, to physically settle, net share settle or net cash settle the forward contracts. At June 30, 2025, PPL could have settled the forward sale contracts with physical delivery of approximately 9.9 million shares of common stock for proceeds of approximately $344 million. The forward contracts under the ATM program are classified as equity transactions.

Dividends

In May 2025, PPL declared a quarterly cash dividend on its common stock, payable July 1, 2025, of 27.25 cents per share (equivalent to $1.09 per annum).

8. Acquisitions, Developments and Divestitures

Acquisitions *(PPL)*

Acquisition of Narragansett Electric

On May 25, 2022, PPL Rhode Island Holdings acquired 100% of the outstanding shares of common stock of Narragansett Electric from National Grid USA, a subsidiary of National Grid plc (the Acquisition). Following the closing of the Acquisition, Narragansett Electric provides services doing business under the name Rhode Island Energy (RIE). Please see Note 9 in PPL's 2024 Form 10-K for additional information concerning the Acquisition.

In connection with the Acquisition, National Grid USA Service Company, Inc., National Grid USA and Narragansett Electric entered into a transition services agreement (TSA), pursuant to which the National Grid entities agreed to provide certain transition services to Narragansett Electric to facilitate the transition of the operation of Narragansett Electric to PPL following the Acquisition, as agreed upon in the Narragansett share purchase agreement. The TSA was for an initial two-year term and was completed in the third quarter of 2024. TSA costs were $49 million and $97 million during the three and six months ended June 30, 2024.

As a condition to the Acquisition, PPL made certain commitments to the Rhode Island Division of Public Utilities and Carriers and the Attorney General of the State of Rhode Island. See Note 9 in PPL's 2024 Form 10-K for a complete listing of those commitments. The following represents an update to the remaining commitments:

- RIE will hold harmless Rhode Island customers from any changes to Accumulated Deferred Income Taxes (ADIT) as a result of the Acquisition. RIE reserves the right to seek rate adjustments based on future changes to ADIT that are not related to the Acquisition. See Note 6 for additional details on RIE's obligation to hold harmless Rhode Island customers.
- RIE will forgo potential recovery of any and all transition costs, which includes (1) the installation of certain information technology systems; (2) modification and enhancements to physical facilities in Rhode Island; and (3) costs related to severance payments, communications and branding changes, and other transition related costs. These costs, which are being expensed as incurred, were $17 million and $34 million for the three and six months ended June 30, 2025 and $83 million and $165 million for the three and six months ended June 30, 2024.

9. Defined Benefits

(PPL)

Certain net periodic defined benefit costs are applied to accounts that are further distributed among capital, expense, regulatory assets and regulatory liabilities, including certain costs allocated to applicable subsidiaries for plans sponsored by PPL Services and LKE. Following are the net periodic defined benefit costs (credits) of the plans sponsored by PPL and its subsidiaries for the periods ended June 30:

	Pension Benefits			
	Three Months		Six Months	
	2025	2024	2025	2024
PPL				
Service cost	$ 8	$ 8	$ 15	$ 17
Interest cost	47	46	92	92
Expected return on plan assets	(72)	(75)	(143)	(150)
Amortization of:				
Prior service cost	—	—	—	1
Actuarial loss	4	3	9	5
Net periodic defined benefit costs (credits)	$ (13)	$ (18)	$ (27)	$ (35)

	Other Postretirement Benefits			
	Three Months		Six Months	
	2025	2024	2025	2024
PPL				
Service cost	$ 2	$ 2	$ 3	$ 3
Interest cost	8	7	15	14
Expected return on plan assets	(8)	(8)	(15)	(15)
Amortization of:				
Prior service cost	—	1	—	1
Actuarial loss	(1)	(2)	(2)	(3)
Net periodic defined benefit costs (credits)	$ 1	$ —	$ 1	$ —

(All Registrants)

The non-service cost components of net periodic defined benefit costs (credits) (interest cost, expected return on plan assets, amortization of prior service cost and amortization of actuarial gain and loss) are presented in "Other Income (Expense) - net" on the Statements of Income. See Note 12 for additional information.

10. Commitments and Contingencies

Legal Matters

(All Registrants)

PPL and its subsidiaries are involved in legal proceedings, claims and litigation in the ordinary course of business. PPL and its subsidiaries cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

Narragansett Electric Litigation *(PPL)*

Energy Efficiency Programs Investigation

Narragansett Electric, while under the ownership of National Grid, performed an internal investigation into conduct associated with its energy efficiency programs. On June 27, 2022, the RIPUC opened a new docket (RIPUC Docket No. 22-05-EE) to investigate RIE's actions and the actions of employees of National Grid USA and affiliates during the time RIE was a National Grid USA affiliate being provided services by National Grid USA Service Company, Inc. relating to the manipulation of the reporting of invoices affecting the calculation of past energy efficiency shareholder incentives and the resulting impact on customers. The Rhode Island Attorney General and National Grid USA intervened in the docket and the Rhode Island Division of Public Utilities and Carriers (the Division) is an automatic party in the docket.

On February 21, 2025, the Division filed testimony confirming its initial testimony that $12 million is the appropriate amount to be refunded to the energy efficiency program. On March 4, 2025, a Settlement Agreement between RIE, the Division, and the Rhode Island Attorney General was filed with the RIPUC requiring refunds of $10 million. Of this amount, $2 million has already been refunded through the energy efficiency mechanism with the remaining $8 million to reduce the storm cost regulatory asset recorded on PPL's balance sheet. The settlement also included reimbursement of minor consulting fees and various other compliance actions. On March 5, 2025, the RIPUC approved the Settlement Agreement.

E.W. Brown Environmental Assessment *(PPL and KU)*

KU is undertaking extensive remedial measures at the E.W. Brown plant including closure of the former ash pond, implementation of a groundwater remedial action plan and performance of a corrective action plan including aquatic study of adjacent surface waters and risk assessment. The aquatic study and risk assessment are being undertaken pursuant to a 2017 Agreed Order with the Kentucky Energy and Environment Cabinet (KEEC). KU conducted sampling of Herrington Lake in 2017 and 2018. In June 2019, KU submitted to the KEEC the required aquatic study and risk assessment, conducted by an independent third-party consultant, finding that discharges from the E.W. Brown plant have not had any significant impact on Herrington Lake and that the water in the lake is safe for recreational use and meets safe drinking water standards. On May 31, 2021, the KEEC approved the report and released a response to public comments. On August 6, 2021, KU submitted a *Supplemental Remedial Alternatives Analysis* report to the KEEC that outlines proposed additional fish, water, and sediment testing. On February 18, 2022, the KEEC provided approval to KU to proceed with the proposed sampling, which commenced in the spring of 2022. On November 17, 2022, KU submitted a *Supplemental Performance Monitoring Report* to the KEEC finding that there are no significant unaddressed risks to human health or the environment at the plant. KU revised the *Supplemental Performance Monitoring Report* on June 8, 2023, in response to KEEC comments from April 24, 2023. On September 1, 2023, the KEEC requested KU to propose additional monitoring or remedial measures. KU submitted a revised *Supplemental Performance Monitoring and Corrective Action Completion* on December 28, 2023. In August 2024, KU submitted a proposed environmental covenant to the KEEC specifying certain site restrictions. Discussions between KU and the KEEC are ongoing, but KU cannot predict the outcome of this matter.

(PPL, LG&E and KU)

EPA Deregulatory Initiative

On March 12, 2025, the EPA announced a plan to reconsider 31 environmental rules including the Section 111 performance standards and emissions limits for greenhouse gases, the endangerment finding for greenhouse gases, the Good Neighbor Plan, the Mercury and Air Toxics Standards, revisions to the fine particulate matter standard, the ELGs, and the CCRs Rule. Supplementing previous Executive Orders directing various regulatory changes, on April 9, 2025, President Trump issued an Executive Order and Presidential Memorandum directing review of existing rules, repeal of unlawful rules, and initiation of a zero-based budgeting process by which certain rules would automatically expire unless extended. While the administration may seek to implement some regulatory changes outside of the rulemaking process, changes to existing rules are generally expected to require formal rulemaking proceedings. Any final EPA actions repealing or revising current rules will likely result in legal challenges. PPL, LG&E, and KU are unable to predict future regulatory changes, if any, that may result from the EPA's deregulatory plan or the outcome of any associated legal challenges. PPL, LG&E, and KU will closely monitor the ongoing EPA initiative and any related litigation for the impact to our business including planned capital expenditures to comply with the EPA rules.

Water/Waste

ELGs

In 2015, the EPA finalized ELGs for wastewater discharge permits for new and existing steam electricity generating facilities. These guidelines require deployment of additional control technologies providing physical, chemical and biological treatment and mandate operational changes including "zero discharge" requirements for certain wastewaters. The implementation date for individual generating stations was to be determined by the states on a case-by-case basis according to criteria provided by the EPA. In September 2017, the EPA issued a rule to postpone the compliance date for certain requirements. In October 2020, the EPA issued revisions to its best available technology standards for certain wastewaters and potential extensions to compliance dates (the Reconsideration Rule). On May 9, 2024, the EPA issued a final rule modifying the 2020 ELG revisions. The rule increases the stringency of previous control technology and zero discharge requirements, revises certain exemptions for generating units planned for retirement, and requires case-by-case limitations for legacy wastewaters based on the best professional judgment of the state regulators. Legal challenges to the final rule have been consolidated before the U.S. Court of Appeals for the Eighth Circuit. The final rule could potentially result in significant operational changes and additional controls for LG&E and KU plants, but in March 2025 the EPA announced its plan to reconsider the rule. The ELGs are expected to be implemented by the states or applicable permitting authorities in the course of their normal permitting activities. Certain costs are included in the Registrants' capital plans and expected to be recovered from customers through rate recovery mechanisms, but additional costs and recovery will depend on further regulatory developments at the state level. On June 30, 2025, the EPA announced that it intends to extend certain regulatory compliance and submittal deadlines.

CCRs

In 2015, the EPA issued a final rule governing management of CCRs, which include fly ash, bottom ash and sulfur dioxide scrubber wastes (2015 CCR Rule). The 2015 CCR Rule imposed extensive new requirements for certain CCR impoundments and landfills, including public notifications, location restrictions, design and operating standards, groundwater monitoring and corrective action requirements, and closure and post-closure care requirements, and specifies restrictions relating to the beneficial use of CCRs. In January 2022, the EPA issued several proposed regulatory determinations, facility notifications, and public announcements which indicate increased scrutiny by the EPA to determine the adequacy of measures taken by facility owners and operators to achieve closure of CCR surface impoundments and landfills. In particular, the agency indicated that it will focus on certain practices which it views as posing a threat of continuing groundwater contamination. On May 8, 2024, the EPA issued a final rule (2024 CCR Rule) establishing regulatory requirements for inactive surface impoundments at inactive electricity generation facilities (legacy impoundments). The 2024 CCR Rule also establishes identification, groundwater monitoring, corrective action, closure, and post-closure care requirements for all CCR management units, as defined in the rule, at regulated CCR facilities regardless of how or when the CCR was placed. The rule also requires LG&E and KU to complete applicability determinations, implement site security measures, initiate weekly inspections and monthly monitoring of the impoundment, create a website, and complete hazard assessments and reports for its legacy impoundments. Additionally, the rule could potentially subject CCR management units that have previously completed remedial action and closure and certain beneficial use projects to additional federal regulatory requirements. Legal challenges to the rule have been filed in the D.C. Circuit Court. In March 2025, the EPA announced its plan to update the rule.

In connection with the 2015 CCR Rule, LG&E and KU recorded adjustments to existing AROs beginning in 2015. In connection with the 2024 CCR Rule, in the second quarter of 2024, LG&E and KU recognized ARO obligations related to preliminary risk assessments, facility evaluations, feasibility studies and sampling. See Note 15 for additional information. The results of those evaluations, as well as future guidance, regulatory determinations, rulemakings, implementation determinations and other developments could potentially require revisions to current LG&E and KU compliance plans including additional monitoring and remediation at surface impoundments and landfills, the cost of which could be material. PPL, LG&E and KU are unable to predict the outcome of the ongoing litigation, rulemaking, and regulatory determinations or potential impacts on current LG&E and KU compliance plans. PPL, LG&E and KU are currently finalizing or revising closure plans and schedules in accordance with applicable regulations and further material changes to AROs, current capital plans or operating costs may be required as estimates are refined based on closure developments, groundwater monitoring results, and regulatory or legal proceedings. Costs relating to this rule are expected to be subject to rate recovery.

LG&E and KU received KPSC approval for a compliance plan associated with the 2015 CCR Rule providing for the closure of impoundments at the Mill Creek, Trimble County, E.W. Brown, and Ghent stations, and construction of process water management facilities at those plants. In addition to the foregoing measures required for compliance with the federal CCR Rule, KU also received KPSC approval for its plans to close impoundments at the retired Green River, Pineville and Tyrone plants to comply with applicable state law. LG&E and KU have completed planned closure measures at most of the subject impoundments and have commenced post closure groundwater monitoring as required at those facilities. LG&E and KU generally expect to complete all impoundment closures within five years of commencement, although a longer period may be required to complete closure of some facilities. Associated costs are expected to be subject to rate recovery.

Superfund and Other Remediation

(All Registrants)

The Registrants are potentially responsible for investigating and remediating contamination under the federal Superfund program and similar state programs. Actions are under way at certain sites including former manufactured gas plants in Pennsylvania, Rhode Island and Kentucky previously owned or operated by, or currently owned by predecessors or affiliates of, PPL subsidiaries.

Depending on the outcome of investigations at identified sites where investigations have not begun or been completed, or developments at sites for which information is incomplete, additional costs of remediation could be incurred. PPL, PPL Electric, LG&E and KU lack sufficient information about such additional sites to estimate any potential liability or range of reasonably possible losses, if any, related to these sites. Such costs, however, are not currently expected to be significant.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of manufactured gas plant operations. As a result, individual states may establish stricter standards for water quality and soil cleanup, that could require several PPL subsidiaries to take more extensive assessment and remedial actions at former manufactured gas plants. The Registrants cannot reasonably estimate a range of possible losses, if any, related to these matters.

(PPL and PPL Electric)

PPL Electric is a potentially responsible party for a share of clean-up costs at certain sites. Cleanup actions have been or are being undertaken at these sites as requested by governmental agencies, the costs of which have not been and are not expected to be significant to PPL Electric. As of June 30, 2025 and December 31, 2024, PPL Electric had a recorded liability of $8 million, representing its best estimate of the probable loss incurred to remediate these sites.

(PPL)

RIE is a potentially responsible party for a share of clean-up costs at certain sites including former manufactured gas plant facilities formerly owned by the Blackstone Valley Gas and Electric Company and the Rhode Island gas distribution assets of the New England Gas division of Southern Union Company and electric operations at certain RIE facilities. RIE is currently investigating and remediating, as necessary, those sites and certain other properties under agreements with governmental agencies, the costs of which have not been and are not expected to be significant to PPL.

As of June 30, 2025 and December 31, 2024, RIE had a recorded liability of $98 million, representing its best estimate of the remaining costs of RIE's environmental remediation activities. These undiscounted costs are expected to be incurred over approximately 30 years and generally to be subject to rate recovery. However, remediation costs for each site may be materially higher than estimated, depending on changing technologies and regulatory standards, selected end uses for each site, and actual environmental conditions encountered. RIE has recovered amounts from certain insurers and potentially responsible parties, and, where appropriate, may seek additional recovery from other insurers and potentially responsible parties, but it is uncertain whether, and to what extent, such efforts will be successful.

The RIPUC has approved two settlement agreements that provide for rate recovery of qualified remediation costs of certain contaminated sites located in Rhode Island and Massachusetts. Rate-recoverable contributions for electric operations of approximately $3 million are added annually to RIE's Environmental Response Fund, established with RIPUC approval in March 2000 to address such costs, along with interest and any recoveries from insurance carriers and other third parties. In addition, RIE recovers approximately $1 million annually for gas operations under a distribution adjustment charge in which the qualified remediation costs are amortized over 10 years. See Note 6 for additional information on RIE's recorded environmental regulatory assets and liabilities.

Regulatory Issues

(*All Registrants)*

See Note 6 for information on regulatory matters related to utility rate regulation.

Electricity - Reliability Standards

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk electric system in North America. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk electric system, including electric utility companies, generators and marketers. Under the Federal Power Act, the FERC may assess civil penalties for certain violations.

PPL Electric, LG&E, KU and RIE monitor their compliance with the Reliability Standards and self-report or self-log potential violations of applicable reliability requirements whenever identified, and submit accompanying mitigation plans, as required. The resolution of a small number of potential violations is pending. Penalties incurred to date have not been significant. Any Regional Reliability Entity determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC.

In the course of implementing their programs to ensure compliance with the Reliability Standards by those PPL affiliates subject to the standards, certain other instances of potential non-compliance may be identified from time to time. The Registrants cannot predict the outcome of these matters, and an estimate or range of possible losses cannot be determined.

Gas - Security Directives *(PPL and LG&E)*

In May and July of 2021, the Department of Homeland Security's (DHS) Transportation Security Administration released two security directives applicable to certain notified owners and operators of natural gas pipeline facilities (including local distribution companies) that the Transportation Security Administration has determined to be critical. The Transportation Security Administration has determined that LG&E is within the scope of the directive, while RIE has not been notified of this distinction. The first security directive required notified owners/operators to implement cybersecurity incident reporting to the DHS, designate a cybersecurity coordinator, and perform a gap assessment of current entity cybersecurity practices against certain voluntary Transportation Security Administration security guidelines and report relevant results and proposed mitigation to applicable DHS agencies. The second security directive, revised in July of 2024, requires refinement of the cybersecurity implementation plan and the cybersecurity assessment plan. LG&E does not believe the security directives have had or will have a significant impact on LG&E's operations or financial condition.

Other

Guarantees and Other Assurances

(All Registrants)

In the normal course of business, the Registrants enter into agreements that provide financial performance assurance to third parties on behalf of certain subsidiaries. Examples of such agreements include: guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries engage.

(PPL)

PPL fully and unconditionally guarantees all of the debt securities and loan obligations of PPL Capital Funding.

(All Registrants)

The table below details guarantees provided as of June 30, 2025. "Exposure" represents the estimated maximum potential amount of future payments that could be required to be made under the guarantee. The Registrants believe the probability of expected payment/performance under each of these guarantees is remote, except for the guarantees and indemnifications related to the sale of Safari Holdings, which PPL believes are reasonably possible but not probable of occurring. For reporting purposes, on a consolidated basis, the guarantees of PPL include the guarantees of its subsidiary Registrants.

	Exposure at June 30, 2025		Expiration Date
PPL			
Indemnifications related to certain tax liabilities related to the sale of the U.K. utility business	£ 50	(a)	2028
PPL guarantee of Safari payment obligations under certain sale/leaseback financing transactions related to the sale of Safari Holdings	$ 88	(b)	2028
Indemnifications for losses suffered related to items not covered by Aspen Power's representation and warranty insurance associated with the sale of Safari Holdings	140	(c)	2028
LG&E and KU			
LG&E and KU obligation of shortfall related to OVEC		(d)	

(a) PPL WPD Limited entered into a Tax Deed dated June 9, 2021, in which it agreed to a tax indemnity regarding certain potential tax liabilities of the entities sold with respect to periods prior to the completion of the sale, subject to customary exclusions and limitations. Because National Grid Holdings One plc, the buyer, agreed to purchase indemnity insurance, the amount of the cap on the indemnity for these liabilities is £1, except with respect to certain surrenders of tax losses, for which the amount of the cap on the indemnity is £50 million. In June 2025, the indemnifications were novated to PPL Energy Holdings.

(b) PPL guaranteed the payment obligations of Safari under certain sale/leaseback financing transactions executed by Safari. These guarantees will remain in place until Safari exercises its option to buy-out the projects under the sale/leaseback financings by the year 2028. Safari will indemnify PPL for any payments made by PPL or claims against PPL under the sale/leaseback transaction guarantees up to $25 million.

(c) Aspen Power has obtained representation and warranty insurance, therefore, PPL generally has no liability for its representations and warranties under the agreement except for losses suffered related to items not covered. Expiration of these indemnifications range from 18 months to 6 years from the date of the closing of the transaction, and PPL's aggregate liability for these claims will not exceed $140 million, subject to certain adjustments.

(d) Pursuant to the OVEC power purchase contract, LG&E and KU are obligated to pay for their share of OVEC's excess debt service, post-retirement, and decommissioning costs, as well as any shortfall from amounts included within a demand charge designed and expected to cover these costs over the term of the contract. PPL's proportionate share of OVEC's outstanding debt was $73 million at June 30, 2025, consisting of LG&E's share of $51 million and KU's share of $22 million. The maximum exposure and the expiration date of these potential obligations are not presently determinable. See "Energy Purchase Commitments" in Note 12 in PPL's, LG&E's and KU's 2024 Form 10-K for additional information on the OVEC power purchase contract.

The Registrants provide other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is generally remote.

PPL, on behalf of itself and certain of its subsidiaries, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The insurance provides maximum aggregate coverage of $231 million for non-wildfire liability losses and maximum aggregate coverage of $181 million for wildfire liability losses. This insurance may be applicable to obligations under certain of these contractual arrangements.

11. Related Party Transactions

Support Costs *(PPL Electric, LG&E and KU)*

PPL Services and LKS provide the Registrants, their respective subsidiaries and each other with administrative, management and support services. For all services companies, the costs of directly assignable and attributable services are charged to the respective recipients as direct support costs. General costs that cannot be directly attributed to a specific entity are allocated and charged to the respective recipients as indirect support costs. PPL Services and LKS use a three-factor methodology that includes the applicable recipients' invested capital, operation and maintenance expenses and number of employees to allocate indirect costs. PPL Services and LKS charged the following amounts for the periods ended June 30, including amounts applied to accounts that are further distributed between capital and expense on the books of the recipients, based on methods that are believed to be reasonable.

	Three Months		Six Months	
	2025	2024	2025	2024
PPL Electric from PPL Services	$ 67	$ 53	$ 131	$ 109
LG&E from LKS	18	28	48	57
LG&E from PPL Services	42	20	62	31
KU from LKS	22	30	60	68
KU from PPL Services	42	19	61	30

In addition to the charges for services noted above, LKS makes payments on behalf of LG&E and KU for fuel purchases and other costs for products or services provided by third parties. LG&E and KU also provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between PPL and LG&E and KU are reimbursed through LKS.

Intercompany Borrowings

(PPL Electric)

CEP Reserves maintains a $800 million revolving line of credit with a PPL Electric subsidiary. At June 30, 2025, CEP Reserves had no borrowings outstanding. At December 31, 2024, CEP Reserves had borrowings outstanding of $222 million. The interest rates on borrowings are equal to an adjusted one-month SOFR plus a spread. Interest income is reflected in "Interest Income from Affiliate" on the PPL Electric Income Statements.

(LG&E and KU)

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to the difference between LG&E's FERC borrowing limit and LG&E's commercial paper issued at an interest rate based on the lower of a market index of commercial paper issues and two additional rate options based on SOFR. At June 30, 2025, LG&E's money pool unused capacity was $592 million. At June 30, 2025, LG&E had no borrowings outstanding from KU and/or LKE. At December 31, 2024, LG&E had borrowings outstanding of $43 million from KU and/or LKE. These balances are reflected in "Notes payable to affiliates" on the LG&E Balance Sheets.

KU participates in an intercompany money pool agreement whereby LKE and/or LG&E make available to KU funds up to the difference between KU's FERC borrowing limit and KU's commercial paper issued at an interest rate based on the lower of a market index of commercial paper issues and two additional rate options based on SOFR. At June 30, 2025, KU's money pool unused capacity was $329 million. At June 30, 2025, KU had borrowings outstanding from LG&E and/or LKE of $46 million. At December 31, 2024, KU had borrowings outstanding of $73 million from LG&E and/or LKE. These balances are reflected in "Notes payable to affiliates" on the KU Balance Sheets.

VEBA Funds Receivable *(PPL Electric)*

In 2018, PPL received a favorable private letter ruling from the IRS permitting a transfer of excess funds from the PPL Bargaining Unit Retiree Health Plan VEBA to a new subaccount within the VEBA, to be used to pay medical claims of active bargaining unit employees. In 2024, additional excess funds were removed from the PPL Bargaining Unit Retiree Health Plan VEBA and deposited into the existing subaccount within the VEBA to be used to pay medical claims of active bargaining unit employees. Based on PPL Electric's participation in PPL's Other Postretirement Benefit plan, PPL Electric was allocated a portion of the excess funds from PPL Services. These funds have been recorded as an intercompany receivable on PPL Electric's Balance Sheets. The receivable balance decreases as PPL Electric pays incurred medical claims and is reimbursed by PPL Services. The intercompany receivable balance associated with these funds was $1 million at June 30, 2025, which was reflected in "Accounts receivable from affiliates" on PPL Electric's Balance Sheets. The intercompany receivable balance associated with these funds was $7 million at December 31, 2024, of which $4 million was reflected in "Accounts receivable from affiliates" and $3 million was reflected in "Other noncurrent assets" on PPL Electric's Balance Sheets.

12. Other Income (Expense) - net

(PPL)

The details of "Other Income (Expense) - net" for the periods ended June 30, were:

	Three Months		Six Months	
	2025	2024	2025	2024
Defined benefit plans - non-service credits (Note 9)	$ 7	$ 15	$ 15	$ 23
Interest income	2	6	8	15
AFUDC - equity component	20	12	35	21
Miscellaneous	(6)	(1)	(7)	(5)
Other Income (Expense) - net	$ 23	$ 32	$ 51	$ 54

(PPL Electric)

The details of "Other Income (Expense) - net" for the periods ended June 30, were:

	Three Months		Six Months	
	2025	2024	2025	2024
Defined benefit plans - non-service credits (Note 9)	$ 4	$ 4	$ 7	$ 9
AFUDC - equity component	8	7	15	11
Miscellaneous	(1)	—	—	—
Other Income (Expense) - net	$ 11	$ 11	$ 22	$ 20

(LG&E)

The details of "Other Income (Expense) - net" for the periods ended June 30, were:

	Three Months		Six Months	
	2025	2024	2025	2024
Defined benefit plans - non-service credits (Note 9)	$ 1	$ 2	$ 1	$ 2
AFUDC - equity component	4	2	7	3
Miscellaneous	—	—	—	1
Other Income (Expense) - net	$ 5	$ 4	$ 8	$ 6

(KU)

The details of "Other Income (Expense) - net" for the periods ended June 30, were:

	Three Months		Six Months	
	2025	2024	2025	2024
Defined benefit plans - non-service credits (Note 9)	$ 2	$ 3	$ 3	$ 4
AFUDC - equity component	5	2	8	3
Miscellaneous	(2)	(1)	(1)	(1)
Other Income (Expense) - net	$ 5	$ 4	$ 10	$ 6

13. Fair Value Measurements

(All Registrants)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option pricing models) and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. See Note 1 in each Registrant's 2024 Form 10-K for information on the levels in the fair value hierarchy.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

	June 30, 2025				December 31, 2024			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
PPL								
Assets								
Cash and cash equivalents	$ 294	$ 294	$ —	$ —	$ 306	$ 306	$ —	$ —
Restricted cash and cash equivalents (a)	24	24	—	—	33	33	—	—
Total Cash, Cash Equivalents and Restricted Cash (b)	318	318	—	—	339	339	—	—
Special use funds (a):								
Money market fund	1	1	—	—	1	1	—	—
Commingled debt fund measured at NAV (c)	7	—	—	—	10	—	—	—
Commingled equity fund measured at NAV (c)	6	—	—	—	8	—	—	—
Total special use funds	14	1	—	—	19	1	—	—
Price risk management assets (d):								
Interest rate derivatives	2	—	2	—	—	—	—	—
Gas contracts	10	—	10	—	9	—	4	5
Total assets	$ 344	$ 319	$ 12	$ —	$ 367	$ 340	$ 4	$ 5
Liabilities								
Price risk management liabilities (d):								
Interest rate derivatives	$ 5	$ —	$ 5	$ —	$ 3	$ —	$ 3	$ —
Gas contracts	8	—	3	5	13	—	10	3
Total price risk management liabilities	$ 13	$ —	$ 8	$ 5	$ 16	$ —	$ 13	$ 3
PPL Electric								
Assets								
Cash and cash equivalents	$ 15	$ 15	$ —	$ —	$ 24	$ 24	$ —	$ —
Total assets	$ 15	$ 15	$ —	$ —	$ 24	$ 24	$ —	$ —
LG&E								
Assets								
Cash and cash equivalents	$ 10	$ 10	$ —	$ —	$ 8	$ 8	$ —	$ —
Restricted cash and cash equivalents (a)	11	11	—	—	16	16	—	—
Total Cash, Cash Equivalents and Restricted Cash (b)	21	21	—	—	24	24	—	—
Total assets	$ 21	$ 21	$ —	$ —	$ 24	$ 24	$ —	$ —
Liabilities								
Price risk management liabilities:								
Interest rate derivatives	$ 5	$ —	$ 5	$ —	$ 3	$ —	$ 3	$ —
Total price risk management liabilities	$ 5	$ —	$ 5	$ —	$ 3	$ —	$ 3	$ —
KU								
Assets								
Cash and cash equivalents	$ 11	$ 11	$ —	$ —	$ 13	$ 13	$ —	$ —
Restricted cash and cash equivalents (a)	11	11	—	—	16	16	—	—
Total Cash, Cash Equivalents and Restricted Cash (b)	22	22	—	—	29	29	—	—
Total assets	$ 22	$ 22	$ —	$ —	$ 29	$ 29	$ —	$ —

(a) Current portion is included in "Other current assets" and noncurrent portion is included in "Other noncurrent assets" on the Balance Sheets.
(b) Total Cash, Cash Equivalents and Restricted Cash provides a reconciliation of these items reported within the Balance Sheets to the sum shown on the Statements of Cash Flows.

(c) In accordance with accounting guidance, certain investments that are measured at fair value using net asset value per share (NAV), or its equivalent, have not been classified in the fair value hierarchy. The fair value amounts presented in the table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the Balance Sheets.
(d) Current portion is included in "Other current assets" and "Other current liabilities" and noncurrent portion is included in "Other noncurrent assets" and "Other deferred credits and noncurrent liabilities" on the Balance Sheets.

A reconciliation of net assets (liabilities) classified as Level 3 for the six months ended June 30 is as follows:

	Gas Contracts
2025	
Balance at beginning of period	$ 2
Total unrealized gains (losses) recognized as Regulatory Assets/Regulatory Liabilities:	(7)
Balance at end of period	$ (5)

Special Use Funds *(PPL)*

The special use funds are investments restricted for paying active union employee medical costs. In 2018, PPL received a favorable private letter ruling from the IRS permitting a transfer of excess funds from the PPL Bargaining Unit Retiree Health Plan VEBA to a new subaccount within the VEBA to be used to pay medical claims of active bargaining unit employees. In 2024, additional excess funds were removed from the PPL Bargaining Unit Retiree Health Plan VEBA and deposited in the existing subaccount within the VEBA to be used to pay medical claims of active bargaining unit employees. The funds are invested primarily in commingled debt and equity funds measured at NAV and are classified as investments in equity securities. Changes in the fair value of the funds are recorded to the Statements of Income.

Price Risk Management Assets/Liabilities

Interest Rate Derivatives (PPL, LG&E and KU)

To manage interest rate risk, PPL, LG&E and KU use interest rate derivatives such as treasury locks, forward-starting swaps, floating-to-fixed swaps and fixed-to-floating swaps. An income approach is used to measure the fair value of these derivatives, utilizing readily observable inputs, such as forward interest rates (e.g., SOFR and government security rates), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon. These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3.

Gas Contracts (PPL)

To manage gas commodity price risk associated with natural gas purchases, RIE utilizes over-the-counter (OTC) gas swaps contracts with pricing inputs obtained from the New York Mercantile Exchange (NYMEX) and the Intercontinental Exchange (ICE), except in cases where the ICE publishes seasonal averages or where there were no transactions within the last seven days. RIE may utilize discounting based on quoted interest rate curves, including consideration of non-performance risk, and may include a liquidity reserve calculated based on bid/ask spread. Substantially all of these price curves are observable in the marketplace throughout at least 95% of the remaining contractual quantity, or they could be constructed from market observable curves with correlation coefficients of 95% or higher. These contracts are classified as Level 2.

RIE also utilizes gas option and purchase and capacity transactions, which are valued based on internally developed models. Industry-standard valuation techniques, such as the Black-Scholes pricing model, are used for valuing such instruments. For valuations that include both observable and unobservable inputs, if the unobservable input is determined to be significant to the overall inputs, the entire valuation is classified as Level 3. This includes derivative instruments valued using indicative price quotations whose contract tenure extends into unobservable periods. In instances where observable data is unavailable, consideration is given to the assumptions that market participants would use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility, and contract duration. Such instruments are classified as Level 3 as the model inputs generally are not observable. RIE considers non-performance risk and liquidity risk in the valuation of derivative instruments classified as Level 2 and Level 3.

The significant unobservable inputs used in the fair value measurement of the gas derivative instruments are implied volatility and gas forward curves. A relative change in commodity price at various locations underlying the open positions can result in significantly different fair value estimates.

Financial Instruments Not Recorded at Fair Value *(All Registrants)*

Long-term debt is classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement. The carrying amounts of long-term debt on the Balance Sheets and their estimated fair values are set forth below.

	June 30, 2025		December 31, 2024	
	Carrying Amount (a)	Fair Value	Carrying Amount (a)	Fair Value
PPL	$ 16,511	$ 15,750	$ 16,503	$ 15,562
PPL Electric	5,215	4,901	5,214	4,862
LG&E	2,472	2,316	2,471	2,295
KU	3,067	2,771	3,066	2,750

(a) Amounts are net of debt issuance costs.

The carrying amounts of other current financial instruments (except for long-term debt due within one year) approximate their fair values because of their short-term nature.

14. Derivative Instruments and Hedging Activities

(All Registrants)

Risk Management Objectives

PPL has a risk management policy approved by the Board of Directors to manage market risk associated with commodities, interest rates on debt issuances (including price, liquidity and volumetric risk) and credit risk (including non-performance risk and payment default risk). The Risk Management Committee, comprised of senior management and chaired by the Vice President-Financial Strategy and Chief Risk Officer, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions, verification of risk and transaction limits, value-at-risk analyses (VaR, a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level) and the coordination and reporting of the Enterprise Risk Management program.

Market Risk

Market risk includes the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument as well as market liquidity and volumetric risks. Forward contracts, futures contracts, options, swaps and structured transactions are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices and interest rates. Many of these contracts meet the definition of a derivative. All derivatives are recognized on the Balance Sheets at their fair value, unless NPNS is elected.

The following summarizes the market risks that affect PPL and its subsidiaries.

Interest Rate Risk

- PPL and its subsidiaries are exposed to interest rate risk associated with forecasted fixed-rate and existing floating-rate debt issuances. PPL and LG&E utilize over-the-counter interest rate swaps to limit exposure to market fluctuations on floating-rate debt. PPL, LG&E and KU utilize hedging instruments to limit exposure to fluctuations in benchmark interest rates, when appropriate, in connection with future debt issuance.
- PPL and its subsidiaries are exposed to interest rate risk associated with debt securities and derivatives held by defined benefit plans. This risk is significantly mitigated to the extent that the plans are sponsored at, or sponsored on behalf of, the regulated utilities due to the recovery methods in place.

Commodity Price Risk

PPL is exposed to commodity price risk through its subsidiaries as described below.

- PPL Electric is required to purchase electricity to fulfill its obligation as a PLR. Potential commodity price risk is mitigated through its PAPUC-approved cost recovery mechanism and full-requirement supply agreements to serve its PLR customers which transfer the risk to energy suppliers.
- LG&E's and KU's rates include certain mechanisms for fuel, fuel-related expenses and energy purchases. In addition, LG&E's rates include a mechanism for natural gas supply costs. These mechanisms generally provide for timely recovery of market price fluctuations associated with these costs.
- RIE utilizes derivative instruments pursuant to its RIPUC-approved plan to manage commodity price risk associated with its natural gas purchases. RIE's commodity price risk management strategy is to reduce fluctuations in firm gas sales prices to its customers. RIE's costs associated with derivatives instruments are recoverable through its RIPUC-approved cost recovery mechanisms. RIE is also required to purchase electricity to fulfill its obligation to provide Last Resort Service (LRS). Potential commodity price risk is mitigated through its RIPUC-approved cost recovery mechanisms and full requirements service agreements to serve LRS customers, which transfer the risk to energy suppliers. Additionally, RIE is required to contract through long-term agreements for clean energy supply under the Rhode Island Renewable Energy Growth program and Long-term Clean Energy Standard. Potential commodity price risk is mitigated through its RIPUC-approved cost recovery mechanisms, which true-up cost differences between contract prices and market prices.

Volumetric Risk

Volumetric risk is the risk related to the changes in volume of retail sales due to weather, economic conditions or other factors. PPL is exposed to volumetric risk through its subsidiaries as described below:

- PPL Electric, LG&E and KU are exposed to volumetric risk on retail sales, mainly due to weather and other economic conditions for which there is limited mitigation between rate cases.
- RIE is exposed to volumetric risk, which is significantly mitigated by regulatory mechanisms. RIE's electric and gas distribution rates both have a revenue decoupling mechanism, which allows for annual adjustments to RIE's delivery rates.

Equity Securities Price Risk

- PPL and its subsidiaries are exposed to equity securities price risk associated with the fair value of the defined benefit plans' assets. This risk is significantly mitigated due to the recovery methods in place.
- PPL is exposed to equity securities price risk from future stock sales and/or purchases.

Credit Risk

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

PPL is exposed to credit risk from "in-the-money" transactions with counterparties as well as additional credit risk through certain of its subsidiaries, as discussed below.

In the event a supplier of PPL, PPL Electric, LG&E or KU defaults on its contractual obligation, those Registrants would be required to seek replacement power or replacement fuel in the market. In general, subject to regulatory review or other processes, appropriate incremental costs incurred by these entities would be recoverable from customers through applicable rate mechanisms, thereby mitigating the financial risk for these entities.

PPL and its subsidiaries have credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. PPL and its subsidiaries may request additional credit assurance, in certain circumstances, if the counterparties' credit ratings fall below investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit.

Master Netting Arrangements *(PPL, LG&E and KU)*

Net derivative positions on the balance sheets are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

PPL, LG&E and KU had no obligation to return or post cash collateral under master netting arrangements at June 30, 2025 and December 31, 2024.

See "Offsetting Derivative Instruments" below for a summary of derivative positions presented in the balance sheets where a right of setoff exists under these arrangements.

Interest Rate Risk

(All Registrants)

PPL and its subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. A variety of financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in their debt portfolios, adjust the duration of the debt portfolios and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under PPL's risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates. In addition, the interest rate risk of certain subsidiaries is potentially mitigated as a result of the existing regulatory framework or the timing of rate cases.

Cash Flow Hedges *(PPL)*

Interest rate risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financings. Financial interest rate derivatives that qualify as cash flow hedges may be entered into to hedge floating interest rate risk associated with both existing and anticipated debt issuances. At June 30, 2025, PPL held an aggregate notional value in interest rate derivatives of $85 million that mature on January 2, 2026.

Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time period and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedged transaction is not probable of occurring.

For the three and six months ended June 30, 2025 and 2024, PPL had no cash flow hedges reclassified into earnings associated with discontinued cash flow hedges.

At June 30, 2025, the amount of accumulated net unrecognized after-tax gains (losses) on qualifying derivatives expected to be reclassified into earnings during the next 12 months is insignificant. Amounts are reclassified as the hedged interest expense is recorded.

Economic Activity *(PPL and LG&E)*

LG&E enters into interest rate swap contracts that economically hedge interest payments. Because realized gains and losses from the swaps, including terminated swap contracts, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statements of Income at the time the underlying hedged interest expense is recorded. At June 30, 2025, LG&E held contracts with a notional amount of $64 million that mature in 2033.

Commodity Price Risk *(PPL)*

Economic Activity

RIE enters into derivative contracts that economically hedge natural gas purchases. Realized gains and losses from the derivatives are recoverable through regulated rates, therefore subsequent changes in fair value are included in regulatory assets or liabilities until they are realized as purchased gas. Realized gains and losses are recognized in "Energy Purchases" on the Statements of Income upon settlement of the contracts. At June 30, 2025, RIE held contracts with notional volumes of 45 Bcf that range in maturity from 2025 through 2029.

Accounting and Reporting

(All Registrants)

All derivative instruments are recorded at fair value on the Balance Sheet as an asset or liability unless the NPNS is elected. NPNS contracts include certain full requirement purchase contracts and other physical purchase contracts. Changes in the fair value of derivatives not designated as NPNS are recognized in earnings unless specific hedge accounting criteria are met and designated as such, except for the changes in fair values of LG&E's interest rate swaps that are recognized as regulatory assets or

regulatory liabilities. See Note 6 for amounts recorded in regulatory assets and regulatory liabilities at June 30, 2025 and December 31, 2024.

See Note 1 in each Registrant's 2024 Form 10-K for additional information on accounting policies related to derivative instruments.

(PPL)

The following table presents the fair value and the location of derivative instruments on the Balance Sheets:

	June 30, 2025				December 31, 2024			
	Derivatives designated as hedging instruments		Derivatives not designated as hedging instruments		Derivatives designated as hedging instruments		Derivatives not designated as hedging instruments	
	Assets	Liabilities	Assets	Liabilities	Assets	Liabilities	Assets	Liabilities
Current:								
Price Risk Management Assets/Liabilities (a):								
Interest rate derivatives (b)	$ 2	$ —	$ —	$ —	$ —	$ —	$ —	$ —
Gas contracts	—	—	6	3	—	—	7	10

Interest rate derivatives	Interest expense	$ —	$ —

Derivative Instruments	Location of Gain (Loss) Recognized in Regulatory Assets	Three Months	Six Months
Interest rate derivatives	Regulatory assets - noncurrent	$ 1	$ 2

(PPL, LG&E and KU)

Offsetting Derivative Instruments

PPL, LG&E and KU or certain of their subsidiaries have master netting arrangements in place and also enter into agreements pursuant to which they purchase or sell certain energy and other products. Under the agreements, upon termination of the agreement as a result of a default or other termination event, the non-defaulting party typically would have a right to set off amounts owed under the agreement against any other obligations arising between the two parties (whether under the agreement or not), whether matured or contingent and irrespective of the currency, place of payment or place of booking of the obligation.

PPL, LG&E and KU have elected not to offset derivative assets and liabilities and not to offset net derivative positions against the right to reclaim cash collateral pledged (an asset) or the obligation to return cash collateral received (a liability) under derivatives agreements. The table below summarizes the derivative positions presented in the balance sheets where a right of setoff exists under these arrangements and related cash collateral received or pledged.

	Assets				Liabilities			
		Eligible for Offset				Eligible for Offset		
	Gross	Derivative Instruments	Cash Collateral Received	Net	Gross	Derivative Instruments	Cash Collateral Pledged	Net
June 30, 2025								
Derivatives								
PPL	$ 12	$ 3	$ —	$ 9	$ 13	$ 3	$ —	$ 10
LG&E	—	—	—	—	5	—	—	5

	Assets				Liabilities			
		Eligible for Offset				Eligible for Offset

December 31, 2024								
Derivatives								
PPL	$ 9	$ 5	$ —	$ 4	$ 16	$ 5	$ —	$ 11
LG&E	—	—	—	—	3	—	—	3

Credit Risk-Related Contingent Features

Certain derivative contracts contain credit risk-related contingent features which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in the credit ratings of PPL, LG&E and KU or certain of their subsidiaries. Most of these features would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these features also would allow the counterparty to require additional collateral upon each downgrade in credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade, and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent features require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent features that require adequate assurance of performance be provided if the other party has reasonable concerns regarding the performance of PPL's, LG&E's and KU's obligations under the contracts. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" features.

(PPL)

At June 30, 2025, there were no derivative contracts in a net liability position that contain credit risk-related contingent features. At June 30, 2025, there were no additional collateral requirements in the event of a credit downgrade below investment grade.

15. Asset Retirement Obligations

(PPL, LG&E and KU)

PPL's, LG&E's and KU's ARO liabilities are primarily related to CCR closure costs. See Note 10 for information on the CCR rule. LG&E and RIE also have AROs related to natural gas mains and wells. LG&E's and KU's transmission and distribution lines largely operate under perpetual property easement agreements, which do not generally require restoration upon removal of the property. Therefore, no material AROs are recorded for transmission and distribution assets. For LG&E, KU and RIE, all ARO accretion and depreciation expenses are reclassified as a regulatory asset or regulatory liability. ARO regulatory assets associated with certain CCR projects are amortized to expense in accordance with regulatory approvals. For other AROs, deferred accretion and depreciation expense is recovered through cost of removal.

The changes in the carrying amounts of AROs were as follows.

	PPL	LG&E	KU
Balance at December 31, 2024	$ 157	$ 84	$ 64
Accretion	4	2	2
Obligations settled	(8)	(4)	(4)
Balance at June 30, 2025	$ 153	$ 82	$ 62

16. Accumulated Other Comprehensive Income (Loss)

(PPL)

The after-tax changes in AOCI by component for the periods ended June 30 were as follows.

	Unrealized gains (losses) on qualifying derivatives	Equity investees' AOCI	Defined benefit plans		Total
			Prior service costs	Actuarial gain (loss)	
PPL					
March 31, 2025	$ 10	$ 4	$ (3)	$ (195)	$ (184)
Amounts arising during the period	1	—	—	(8)	(7)
Reclassifications from AOCI	—	—	—	1	1
Net OCI during the period	1	—	—	(7)	(6)

	Unrealized gains (losses) on qualifying derivatives	Equity investees' AOCI	Defined benefit plans: Prior service costs	Defined benefit plans: Actuarial gain (loss)	Total
June 30, 2025	$ 11	$ 4	$ (3)	$ (202)	$ (190)
December 31, 2024	$ 9	$ 4	$ (3)	$ (194)	$ (184)
Amounts arising during the period	1	—	—	(8)	(7)
Reclassifications from AOCI	1	—	—	—	1
Net OCI during the period	2	—	—	(8)	(6)
June 30, 2025	$ 11	$ 4	$ (3)	$ (202)	$ (190)
March 31, 2024	$ 7	$ 4	$ (4)	$ (168)	$ (161)
Amounts arising during the period	—	—	—	2	2
Reclassifications from AOCI	—	—	—	(1)	(1)
Net OCI during the period	—	—	—	1	1
June 30, 2024	$ 7	$ 4	$ (4)	$ (167)	$ (160)
December 31, 2023	$ 6	$ 3	$ (4)	$ (168)	$ (163)
Amounts arising during the period	—	1	—	2	3
Reclassifications from AOCI	1	—	—	(1)	—
Net OCI during the period	1	1	—	1	3
June 30, 2024	$ 7	$ 4	$ (4)	$ (167)	$ (160)

The following table presents PPL's gains (losses) and related income taxes for reclassifications from AOCI for the periods ended June 30.

Details about AOCI	Three Months 2025	Three Months 2024	Six Months 2025	Six Months 2024	Affected Line Item on the Statements of Income
Qualifying derivatives					
Interest rate derivatives	$ (1)	$ (1)	$ (2)	$ (2)	Interest Expense
Total Pre-tax	(1)	(1)	(2)	(2)	
Income Taxes	1	1	1	1	
Total After-tax	—	—	(1)	(1)	
Defined benefit plans					
Net actuarial loss (a)	(1)	2	—	2	
Total Pre-tax	(1)	2	—	2	
Income Taxes	—	(1)	—	(1)	
Total After-tax	(1)	1	—	1	
Total reclassifications during the period	$ (1)	$ 1	$ (1)	$ —	

(a) These AOCI components are included in the computation of net periodic defined benefit cost. See Note 9 for additional information.

17. New Accounting Guidance Pending Adoption

(All Registrants)

Improvements to Income Tax Disclosures

In December 2023, the FASB issued guidance which requires public business entities to provide additional income tax disclosures, including a disaggregated rate reconciliation as well as information on income taxes paid.

For public business entities, this guidance will be applied on a prospective basis. Retrospective application is permitted. This guidance will be effective for annual periods beginning after December 15, 2024. Early adoption is permitted for annual financial statements that have not yet been issued or made available for issuance.

Adoption of this guidance will result in including additional required disclosures. The Registrants plan to adopt the standard retrospectively effective for the year ending December 31, 2025.

Disaggregation of Income Statement Expenses

In November 2024, the FASB issued guidance which requires public business entities to provide in the notes to financial statements specified information about certain costs and expenses. This includes the disclosure of amounts of (a) purchases of inventory, (b) employee compensation, (c) depreciation, (d) intangible asset amortization, and (e) depreciation, depletion, and amortization recognized as part of oil and gas-producing activities included in each relevant income statement expense caption. A relevant expense caption is an expense caption included on the face of the income statement within continuing operations that contains any of the specified expense categories (a)-(e). A qualitative description of the amounts remaining in relevant expense captions that are not separately disaggregated must also be disclosed. Additionally, public business entities must disclose the total amount of selling expenses and, in annual reporting periods, the entity’s definition of selling expenses.

For public business entities, this guidance will be applied on a prospective basis. Retrospective application is permitted. This guidance will be effective for annual periods beginning after December 15, 2026, and interim periods beginning after December 15, 2027. Early adoption is permitted.

The Registrants are currently assessing the impact of adopting this guidance.

Item 2. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations

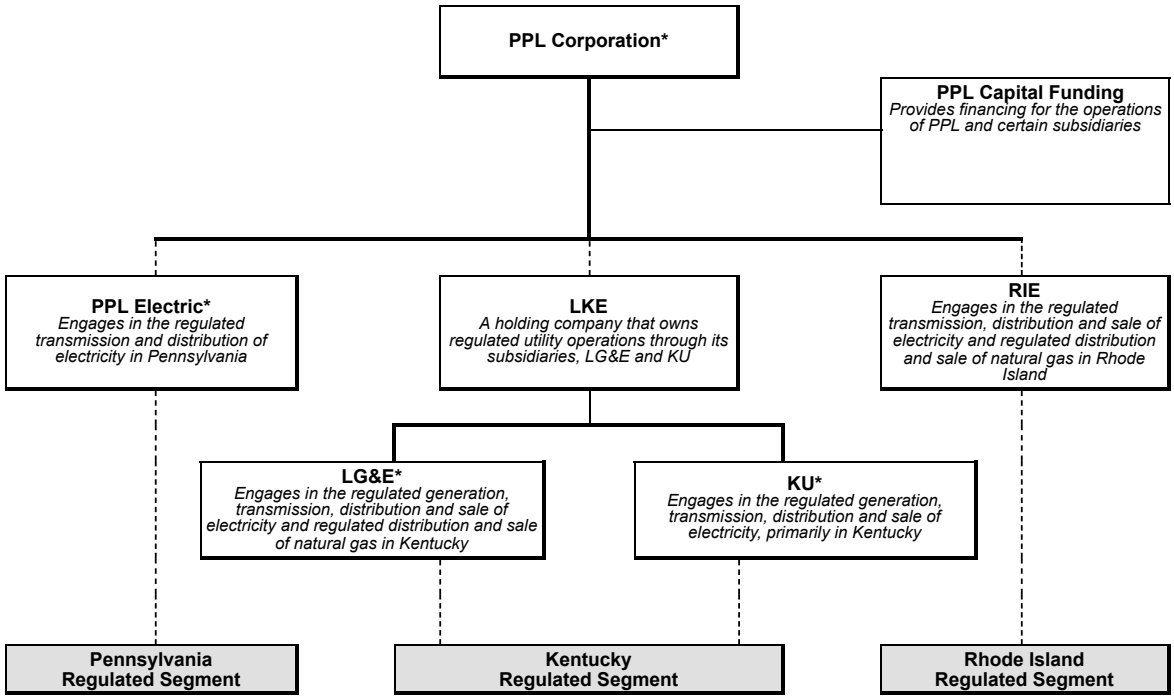
(All Registrants)

This "Item 2. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" is separately filed by PPL, PPL Electric, LG&E and KU. Information contained herein relating to any individual Registrant is filed by such Registrant solely on its own behalf, and no Registrant makes any representation as to information relating to any other Registrant. The specific Registrant to which disclosures are applicable is identified in parenthetical headings in italics above the applicable disclosure or within the applicable disclosure for each Registrant's related activities and disclosures. Within combined disclosures, amounts are disclosed for individual Registrants when significant.

The following should be read in conjunction with the Registrants' Condensed Consolidated Financial Statements and the accompanying Notes and with the Registrants' 2024 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, except per share data, unless otherwise noted.

"Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of each Registrant's business strategy and a discussion of important financial and operational developments.
- "Results of Operations" for all Registrants includes a "Statement of Income Analysis," which discusses significant changes in principal line items on the Statements of Income, comparing the three and six months ended June 30, 2025 with the same periods in 2024. The PPL "Results of Operations" also includes "Segment Earnings," which provides a detailed analysis of earnings by reportable segment. These discussions include the non-GAAP financial measure "Earnings from Ongoing Operations" and provide an explanation of the non-GAAP financial measure and a reconciliation of the measure to the most comparable GAAP measure.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of the Registrants' liquidity positions and credit profiles. This section also includes a discussion of rating agency actions.
- "Financial Condition - Risk Management" provides an explanation of the Registrants' risk management programs relating to market and credit risk.



Overview

Introduction

(PPL)

PPL, headquartered in Allentown, Pennsylvania, is a utility holding company. PPL, through its regulated utility subsidiaries, delivers electricity to customers in Pennsylvania, Kentucky, Virginia, and Rhode Island; delivers natural gas to customers in Kentucky and Rhode Island; and generates electricity from power plants in Kentucky.

PPL's principal subsidiaries are shown below (* denotes a Registrant).

In addition to PPL, the other Registrants included in this filing are as follows.

(PPL Electric)

PPL Electric, headquartered in Allentown, Pennsylvania, is a wholly-owned subsidiary of PPL and a regulated public utility that is an electricity transmission and distribution service provider in eastern and central Pennsylvania. PPL Electric is subject to regulation as a public utility by the PAPUC, and certain of its transmission activities are subject to the jurisdiction of the FERC under the Federal Power Act. PPL Electric delivers electricity in its Pennsylvania service area and provides electricity supply to retail customers in that area as a PLR under the Customer Choice Act. PPL Electric was organized in 1920 as Pennsylvania Power & Light Company.

(LG&E)

LG&E, headquartered in Louisville, Kentucky, is a wholly-owned subsidiary of LKE and a regulated utility engaged in the generation, transmission, distribution and sale of electricity and distribution and sale of natural gas in Kentucky. LG&E is subject to regulation as a public utility by the KPSC, and certain of its transmission activities are subject to the jurisdiction of the FERC under the Federal Power Act.

(KU)

KU, headquartered in Lexington, Kentucky, is a wholly-owned subsidiary of LKE and a regulated utility engaged in the generation, transmission, distribution and sale of electricity in Kentucky and Virginia. KU is subject to regulation as a public utility by the KPSC and the VSCC, and certain of its transmission and wholesale power activities are subject to the jurisdiction of the FERC under the Federal Power Act. KU serves its Kentucky customers under the KU name and its Virginia customers under the Old Dominion Power name.

Segment Information *(PPL)*

PPL is organized into three reportable segments as depicted in the chart above: Kentucky Regulated, which primarily represents the results of LG&E and KU, Pennsylvania Regulated, which primarily represents the results of PPL Electric, and Rhode Island Regulated, which primarily represents the results of RIE. "Corporate and Other" primarily consists of corporate level financing costs, certain unallocated costs and certain non-recoverable costs incurred in conjunction with the acquisition of RIE.

Business Strategy

(All Registrants)

PPL operates four regulated utilities located in Pennsylvania, Kentucky and Rhode Island. Each of these jurisdictions has distinct regulatory structures and each of the utilities has distinct customer classes.

PPL's strategy, which is supported by the other Registrants and subsidiaries, is focused on creating the utilities of the future to drive greater value for our customers and shareowners. Key objectives in support of this strategy include:

- Strengthening the reliability and resilience of our electric and gas networks to improve service and protect against current and future weather and storms.
- Advancing a cleaner energy future affordably and reliably. This includes expanding and modernizing our generation with natural gas, renewables and battery storage, while supporting research and development of low-carbon solutions.
- Driving operational efficiencies to improve customer service and help keep energy affordable.
- Utilizing artificial intelligence and other advanced technologies to inform decision making, optimize asset planning and maintenance and better manage supply and demand on the grid.
- Empowering customers through expanded digital options and improved service.
- Engaging with key stakeholders to strengthen resource adequacy, power economic development, and support the growth and success of the regions we serve.

This strategy supports our mission to provide safe, affordable, reliable and sustainable energy to our customers and competitive, long-term returns to shareowners.

Financial and Operational Developments

Joint Venture Agreement with Blackstone Infrastructure (PPL)

On July 15, 2025, at the Pennsylvania Energy and Innovation Summit, PPL and Blackstone Infrastructure announced the creation of a joint venture to build, own and operate new electricity generation stations to power data centers in Pennsylvania under long-term energy services agreements (ESAs) to address underlying resource adequacy concerns in the PJM Interconnection. Construction of new generation stations will require the successful execution of ESAs with hyperscalers. PPL will own 51% of the joint venture interest and Blackstone Infrastructure will own 49%. The joint venture is actively engaged with hyperscalers, landowners, natural gas pipeline companies and turbine manufacturers, and has secured multiple land parcels to enable this new generation buildout; however, no ESAs with hyperscalers have been signed as of July 31, 2025.

Regulatory Requirements

(All Registrants)

The Registrants cannot predict the impact that future regulatory requirements may have on their financial condition or results of operations.

(PPL, LG&E and KU)

Environmental Considerations for Coal-Fired Generation

The businesses of LG&E and KU are subject to extensive federal, state and local environmental laws, rules and regulations, including those pertaining to CCRs, GHG, and ELGs. See Notes 6, 10 and 15 to the Financial Statements for a discussion of these significant environmental matters. These and other environmental requirements led PPL, LG&E and KU to retire approximately 1,500 MW of coal-fired generating plants in Kentucky since 2010. As part of the long-term generation planning process, LG&E and KU evaluate a range of factors including the impact of potential stricter environmental regulations, fuel price scenarios, the cost of replacement generation, continued operations and major maintenance costs and the risk of major equipment failures in determining when to retire generation assets.

As a result of environmental requirements and aging infrastructure, LG&E has sought and obtained approval to retire two older coal-fired units at the Mill Creek Plant. Mill Creek Unit 1, with 300 MW of capacity, was retired in 2024. Mill Creek Unit 2, with 297 MW of capacity, is expected to be retired in 2027, subject to certain conditions.

On October 4, 2024, LG&E submitted an application related to the retirement of Mill Creek Unit 1, which occurred on December 31, 2024, requesting recovery of associated costs under the RAR. On February 24, 2025, the KPSC issued an order approving LG&E's cost recovery for Mill Creek Unit 1 under the RAR and related amounts were included in bills beginning in May 2025. See Note 6 to the Financial Statements for additional information on the Mill Creek Unit 1 RAR.

2025 CPCN

On February 28, 2025, LG&E and KU filed an application with the KPSC regarding certain future plans for new generation and generation-related construction matters. The proposals included in the application are intended to serve anticipated load growth, including from potential data center demand in LG&E's or KU's service territory. The proposals do not include retirements of coal or other fossil-fueled plants, which would require additional KPSC approval procedures under Kentucky legislation enacted in 2023 and 2024.

LG&E and KU submitted a joint application to the KPSC for approval of certain certificates of public convenience and necessity, site compatibility certificates, and accounting treatment, where applicable, relating to a number of generation-related plans or projects that generally are expected to become operational or established within the next six years. The aggregate projected capital expenditures associated with these proposals are currently expected to be $3.7 billion over the 2025 to 2031 period. Projected capital expenditures related to these proposals for the years 2025 through 2027 were included in PPL's, LG&E's and KU's projections in "Management Discussion and Analysis – Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash – Capital Expenditures" in the 2024 Form 10-K. The application includes proposals:

- to build a 645 MW natural gas combined cycle (NGCC) generation unit at KU's E.W. Brown station,
- to build a 645 MW NGCC generation unit at LG&E's Mill Creek station,
- to build a four-hour 400 MW (1,600 MWh total) battery energy storage system (BESS) at LG&E's Cane Run station, and
- to build a selective catalytic reduction (SCR) environmental facility at KU's Ghent station Unit 2.

The new NGCC units are anticipated to be wholly owned by LG&E and the BESS unit jointly owned by LG&E (32%) and KU (68%), with actual project costs allocated consistent with LG&E's and KU's ultimate ownership shares and existing shared dispatch, cost allocation, tariff or other frameworks. The proposed Mill Creek NGCC unit is in addition to a new NGCC unit currently under construction at that location.

The filing also notes projected in service dates for the projects, including the E.W. Brown NGCC unit in 2030, the Mill Creek NGCC unit in 2031, the Cane Run BESS in 2028 and the Ghent SCR facility in 2028.

On July 29, 2025, LG&E and KU filed with the KPSC a stipulation and recommendation regarding a proposed resolution of issues with several of the intervenors in the CPCN proceeding. The stipulation recommends to the KPSC the approval of the large majority of LG&E's and KU's requested generation-related projects and associated accounting matters, subject to certain changes. Under the stipulation, the parties agree the KPSC should issue an order granting a CPCN for: (a) a 645 MW NGCC generation unit at KU's E.W. Brown station; (b) a 645 MW NGCC at LG&E's Mill Creek station; and (c) a SCR environmental facility at KU's Ghent station Unit 2. In addition, the proposal to build the $775 million Cane Run BESS would be withdrawn without prejudice, the relevant costs regarding the proposed $1.4 billion Mill Creek NGCC would be recovered through a new rate tracker mechanism, and the retirement date for the existing Mill Creek Unit 2 would be extended from 2027 to the operational date of the proposed Mill Creek NGCC or afterwards, subject to relevant future economic analysis, regulatory or environmental authorizations. The stipulation also contains provisions relating to regulatory asset accounting, proposed data center tariffs, future renewable power requests-for-proposals and other matters. LG&E and KU would retain the right to seek approval of the potentially withdrawn Cane Run BESS or similar substitute project in future regulatory proceedings.

A hearing in the matter has been scheduled to begin on August 4, 2025. LG&E and KU anticipate a ruling from the KPSC during the fourth quarter of 2025. PPL, LG&E and KU cannot predict the outcome of the proceedings.

2025 Kentucky Rate Case Proceedings

On May 30, 2025, LG&E and KU filed requests with the KPSC for an increase in annual electricity and gas revenues of approximately $391 million ($105 million and $226 million in electricity revenues at LG&E and KU and $60 million in gas revenues at LG&E) and approval of certain regulatory and accounting treatments. The revenue increases would be an increase of 8.3% and 11.5% in electricity revenues at LG&E and KU, and an increase of 14.0% in gas revenues at LG&E.

The applications are based on a forecasted test year of January 1, 2026 through December 31, 2026 and request an authorized return on equity of 10.95%. Subject to KPSC approval, the requested rates are expected to become effective on January 1, 2026. Certain counterparties have intervened in the proceedings. Data discovery and the filing of written testimony will continue through the third quarter of 2025 and a hearing in the matter has been scheduled for November 3, 2025. A ruling from the KPSC is expected during the fourth quarter of 2025. PPL, LG&E and KU cannot predict the outcome of these proceedings.

In addition, pursuant to prior orders of the KPSC, LG&E and KU included an assessment of a potential legal merger of LG&E and KU and concluded a legal merger may be appropriate. LG&E and KU have requested the KPSC to determine whether LG&E and KU have requested a reasonable plan for merger. If the KPSC determines that a legal merger is appropriate, approval for a merger would be required from the KPSC, VSCC and FERC. There is no assurance that LG&E and KU would receive regulatory approval for a potential merger.

FERC Transmission Rate Filing

In 2018, LG&E and KU applied to the FERC requesting elimination of certain on-going waivers and credits to a sub-set of transmission customers relating to the 1998 merger of LG&E's and KU's parent entities and the 2006 withdrawal of LG&E and KU from the Midcontinent Independent System Operator, Inc. (MISO), a regional transmission operator and energy market. The application sought termination of LG&E's and KU's commitment to provide certain Kentucky municipalities mitigation for certain horizontal market power concerns arising out of the 1998 LG&E and KU merger and 2006 MISO withdrawal. The amounts at issue are generally waivers or credits granted to a limited number of Kentucky municipalities for either certain LG&E and KU or MISO transmission charges incurred for transmission service received. In 2019, the FERC granted LG&E's and KU's request to remove the ongoing credits, conditioned upon the implementation by LG&E and KU of a transition mechanism for certain existing power supply arrangements, which was subsequently filed, modified, and approved by the FERC in 2020 and 2021. In 2020, LG&E and KU and other parties filed appeals with the U.S. Court of Appeals - D.C. Circuit (D.C. Circuit Court of Appeals) regarding the FERC's orders on the elimination of the mitigation and required transition mechanism. In August 2022, the D.C. Circuit Court of Appeals issued an order remanding the proceedings back to the FERC. On May 18, 2023, the FERC issued an order on remand reversing its 2019 decision and requiring LG&E and KU to refund credits previously withheld, including under such transition mechanism. LG&E and KU filed a petition for review of the FERC's May 18, 2023 order with the D.C. Circuit Court of Appeals and provided refunds in accordance with the FERC order on December 1, 2023. The FERC issued an order on LG&E's and KU's compliance filing on November 16, 2023, and LG&E and KU filed a petition for review of this November 16, 2023 order on February 14, 2024. The FERC issued the substantive order on rehearing on March 21, 2024, reaffirming its prior decision. Oral argument before the D.C. Circuit Court of Appeals occurred on January 21, 2025. LG&E and KU cannot predict the ultimate outcome of the proceedings or any other post decision process but do not expect the annual impact to have a material effect on their operations or financial condition. LG&E and KU currently receive recovery of certain waivers and credits primarily through base rates increases, provided, however, that increases associated with the FERC's May 18, 2023 order are expected to be subject to future rate proceedings.

(PPL)

FY 2026 Gas ISR Plan

On December 31, 2024, RIE filed its FY 2026 Gas ISR Plan with the RIPUC with a budget that included $187 million of capital investment spend and up to $15 million of additional contingency plan spend in connection with the PHMSA's potential enactment of regulations during FY 2026 that, if enacted, would significantly alter RIE's leak detection and repair obligations under federal regulations. The plan also included proposed spending on curb-to-curb paving of $22 million. On March 28, 2025, the RIPUC approved a FY 2026 Gas ISR Plan of $165 million of which $147 million is for capital investment spend and $18 million is spend for paving costs as operations and maintenance (O&M), plus a potential additional $15 million is available if the above-mentioned regulations are implemented by the PHMSA. On March 31, 2025, the RIPUC approved RIE's compliance filing for rates effective April 1, 2025.

FY 2026 Electric ISR Plan

On December 23, 2024, RIE filed its FY 2026 Electric ISR Plan with the RIPUC with a budget that included $248 million of capital investment spend (including $88 million for Advanced Metering Functionality (AMF)), $14 million of vegetation operation and maintenance (O&M) spend and $1 million of Other O&M spend. On March 28, 2025, the RIPUC approved a FY 2026 Electric ISR Plan of $219 million for capital investment spend (including $88 million for AMF), $14 million for vegetation management O&M spend, and $1 million for Other O&M spend. On March 31, 2025, the RIPUC approved RIE's compliance filing for rates effective April 1, 2025.

DSIC Petition (PPL and PPL Electric)

On April 26, 2024, PPL Electric filed a Petition with the PAPUC requesting that the PAPUC waive PPL Electric's DSIC cap of 5% of billed revenues and increase the maximum allowable DSIC to 9% for bills rendered on or after January 1, 2025. On February 28, 2025, the PAPUC issued its written order permitting PPL Electric to increase its DSIC cap from 5% to 7.5% for bills rendered on or after March 13, 2025 until the effective date of rates established in PPL Electric's next base rate case or the end of the PPL Electric's 2023-2027 Long-term Infrastructure Improvement Plan, whichever occurs first, at which time it will return to 5%.

Results of Operations

(PPL)

The "Statement of Income Analysis" discussion below describes significant changes in principal line items on the Statements of Income, comparing the three and six months ended June 30, 2025 with the same periods in 2024. The "Segment Earnings" discussion provides a review of results by reportable segment. These discussions include the non-GAAP financial measure "Earnings from Ongoing Operations" and provide an explanation of the non-GAAP financial measure and a reconciliation of the measure to the most comparable GAAP measure.

(PPL Electric, LG&E and KU)

A "Statement of Income Analysis" is presented separately for PPL Electric, LG&E and KU. The "Statement of Income Analysis" discussion below describes significant changes in principal line items on the Statements of Income, comparing the three and six months ended June 30, 2025 with the same periods in 2024.

(All Registrants)

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

PPL: Statement of Income Analysis and Segment Earnings

Statement of Income Analysis

Net income for the periods ended June 30 includes the following results:

	Three Months			Six Months		
	2025	2024	$ Change	2025	2024	$ Change
Operating Revenues	$ 2,025	$ 1,881	$ 144	$ 4,529	$ 4,185	$ 344
Operating Expenses						
Operation						
Fuel	192	181	11	426	390	36
Energy purchases	388	275	113	947	795	152
Other operation and maintenance	614	623	(9)	1,212	1,249	(37)
Depreciation	324	319	5	646	635	11
Taxes, other than income	101	93	8	214	181	33
Total Operating Expenses	1,619	1,491	128	3,445	3,250	195
Operating Income	406	390	16	1,084	935	149
Other Income (Expense) - net	23	32	(9)	51	54	(3)
Interest Expense	199	182	17	389	361	28
Income Before Income Taxes	230	240	(10)	746	628	118
Income Taxes	47	50	(3)	149	131	18
Net Income	$ 183	$ 190	$ (7)	$ 597	$ 497	$ 100

Operating Revenues

The increase (decrease) in operating revenues was due to:

	Three Months	Six Months
PPL Electric distribution volumes (a)	$ (4)	$ 18
PPL Electric PLR (b)	18	36
PPL Electric transmission formula rate (c)	2	17
LG&E volumes (a)	(3)	7
LG&E fuel and other energy purchases (d)	12	24
LG&E off-system sales (e)	3	11
KU volumes (a)	(1)	17
KU fuel and other energy purchases (f)	1	13
KU off-system sales (e)	5	14
RIE energy purchases and other recoveries (g)	59	93
RIE net metering presentation (h)	53	85
RIE net metering	1	11
RIE capital investments	6	15
Other	(8)	(17)
Total	$ 144	$ 344

(a) The increases for the six months ended June 30, 2025 were primarily due to weather, along with other higher usage at PPL Electric.
(b) The increase for the three months ended June 30, 2025 was primarily the result of more PLR customers and higher prices, partially offset by lower customer volumes, due to unfavorable weather and other lower usage. The increase for the six months ended June 30, 2025 was primarily due to higher customer volumes, due to favorable weather and other higher usage, and more PLR customers, partially offset by lower prices.
(c) The increase for the six months ended June 30, 2025 was primarily due to returns on additional transmission capital investments.
(d) The increase for the three months ended June 30, 2025 was primarily due to higher recoveries of energy purchases. The increase for the six months ended June 30, 2025 was primarily due to higher recoveries of energy purchases, partially offset by lower revenues from affiliates due to timing of plant outages and retirements.
(e) The increases were primarily due to higher volumes.
(f) The increase for the six months ended June 30, 2025 was primarily due to higher recoveries of fuel expenses.
(g) The increases were primarily due to higher recoveries of energy purchases, transmission costs, gas maintenance expenses and gross earnings taxes.
(h) In conjunction with the completion of the transition services agreement associated with the RIE acquisition, PPL conformed the presentation of RIE's net metering charges beginning in the fourth quarter of 2024 with the presentation of the other operating companies, resulting in an increase in Operating Revenues and a corresponding increase in Energy purchases. See Note 3 to the Financial Statements for additional information.

Fuel

Fuel increased $11 million for the three months ended June 30, 2025 compared with 2024, primarily due to an increase in commodity costs.

Fuel increased $36 million for the six months ended June 30, 2025 compared with 2024, primarily due to a $27 million increase in volumes due to weather and an $18 million increase in commodity costs, partially offset by a $9 million decrease in generation volumes related to the retirement of Mill Creek Unit 1.

Energy Purchases

The increase (decrease) in energy purchases was due to:

	Three Months	Six Months
PPL Electric PLR volumes	$ 2	$ 27
PPL Electric PLR prices	6	(9)
PPL Electric alternative energy credit volumes	2	10
LG&E volumes	—	15
LG&E commodity costs	8	10
RIE commodity costs	29	(6)
RIE net metering presentation (a)	53	85
RIE net metering	1	11
RIE borderline sales	7	7
Other	5	2
Total	$ 113	$ 152

(a) In conjunction with the completion of the transition services agreement associated with the RIE acquisition, PPL conformed the presentation of RIE's net metering charges beginning in the fourth quarter of 2024 with the presentation of the other operating companies, resulting in an increase in Operating Revenues and a corresponding increase in Energy purchases. See Note 3 to the Financial Statements for additional information.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance was due to:

	Three Months	Six Months
RIE gas maintenance expenses	$ 6	$ 21
RIE transmission expenses	18	42
IT costs (a)	30	52
Transition costs associated with RIE (b)	(66)	(131)
Other	3	(21)
Total	$ (9)	$ (37)

(a) Primarily costs associated with PPL's restructuring and rebuilding of its IT infrastructure, organization and systems.
(b) See Note 8 to the Financial Statements for additional information.

Taxes, Other Than Income

The increase (decrease) in taxes, other than income was due to:

	Three Months	Six Months
State gross earnings and gross receipts tax (a)	$ 8	$ 34
Property tax expense	—	(1)
Total	$ 8	$ 33

(a) The increase for the six months ended June 30, 2025 was primarily due to the RIE Gross Earnings Tax Holiday Credit that took place in 2024.

Other Income (Expense) - net

The increase (decrease) in other income (expense) was due to:

	Three Months	Six Months
Defined benefit plans - non-service credits (Note 9)	$ (8)	$ (8)
Interest income	(4)	(7)
AFUDC - equity component	8	14
Other	(5)	(2)
Total	$ (9)	$ (3)

Interest Expense

The increase (decrease) in interest expense was due to:

	Three Months	Six Months
Long-term debt (a)	$ 8	$ 24
Short-term debt	4	1
Other	5	3
Total	$ 17	$ 28

(a) The increases were primarily due to increased borrowings.

Income Taxes

The increase (decrease) in income taxes was due to:

	Three Months	Six Months
Change in pre-tax income	$ (5)	$ 25
Utility rate-making tax adjustments (a)	—	(4)
Other	2	(3)
Total	$ (3)	$ 18

(a) Primarily consists of tax impacts of AFUDC equity and related depreciation across PPL's regulated utility subsidiaries and flow through tax impacts of Pennsylvania utility ratemaking. Flow through occurs when the regulator excludes deferred tax expense or benefit from recoverable costs when determining income tax expense.

See Note 5 to the Financial Statements for additional information on income taxes.

Segment Earnings

PPL's Net Income (Loss) by reportable segment for the periods ended June 30 were as follows:

	Three Months			Six Months		
	2025	2024	$ Change	2025	2024	$ Change
Kentucky Regulated	$ 126	$ 134	$ (8)	$ 349	$ 324	$ 25
Pennsylvania Regulated	139	150	(11)	323	299	24
Rhode Island Regulated	(17)	12	(29)	53	76	(23)
Corporate and Other (a)	(65)	(106)	41	(128)	(202)	74
Net Income (Loss)	$ 183	$ 190	$ (7)	$ 597	$ 497	$ 100

(a) Primarily represents financing and certain other costs incurred at the corporate level that have not been allocated or assigned to the segments, which are presented to reconcile segment information to PPL's consolidated results.

Earnings from Ongoing Operations

Management utilizes "Earnings from Ongoing Operations" as a non-GAAP financial measure that should not be considered as an alternative to net income, an indicator of operating performance determined in accordance with GAAP. PPL believes that Earnings from Ongoing Operations is useful and meaningful to investors because it provides management's view of PPL's earnings performance as another criterion in making investment decisions. In addition, PPL's management uses Earnings from Ongoing Operations in measuring achievement of certain corporate performance goals, including targets for certain executive incentive compensation. Other companies may use different measures to present financial performance.

Earnings from Ongoing Operations is adjusted for the impact of special items. Special items are presented in the financial tables on an after-tax basis with the related income taxes on special items separately disclosed. Income taxes on special items, when applicable, are calculated based on the statutory tax rate of the entity where the activity is recorded. Special items may include items such as:

• Gains and losses on sales of assets not in the ordinary course of business.
• Impairment charges.
• Significant workforce reduction and other restructuring effects.
• Acquisition and divestiture-related adjustments.
• Significant losses on early extinguishment of debt.
• Other charges or credits that are, in management's view, non-recurring or otherwise not reflective of the company's ongoing operations.

PPL's Earnings from Ongoing Operations by reportable segment for the periods ended June 30 were as follows:

	Three Months			Six Months		
	2025	2024	$ Change	2025	2024	$ Change
Kentucky Regulated	$ 132	$ 134	$ (2)	$ 357	$ 325	$ 32
Pennsylvania Regulated	140	155	(15)	325	316	9
Rhode Island Regulated	8	28	(20)	80	106	(26)
Corporate and Other	(40)	(35)	(5)	(78)	(63)	(15)
Earnings from Ongoing Operations	$ 240	$ 282	$ (42)	$ 684	$ 684	$ —

See "Reconciliation of Earnings from Ongoing Operations" below for a reconciliation of this non-GAAP financial measure to Net Income.

Kentucky Regulated Segment

The Kentucky Regulated segment primarily consists of the regulated electricity generation, transmission and distribution operations conducted by LG&E and KU, as well as LG&E's regulated transmission, distribution and sale of natural gas.

Net Income and Earnings from Ongoing Operations for the periods ended June 30 include the following results:

	Three Months			Six Months		
	2025	2024	$ Change	2025	2024	$ Change
Operating Revenues	$ 837	$ 819	$ 18	$ 1,896	$ 1,803	$ 93
Fuel	192	181	11	426	390	36
Energy purchases	30	22	8	126	99	27
Other operation and maintenance	200	195	5	400	397	3
Depreciation	179	177	2	355	353	2
Taxes, other than income	26	24	2	51	49	2
Total Operating Expenses	627	599	28	1,358	1,288	70
Other Income (Expense) - net	10	9	1	18	12	6
Interest Expense	62	61	1	122	121	1
Income Taxes	32	34	(2)	85	82	3
Net Income	126	134	(8)	349	324	25
Less: Special Items	(6)	—	(6)	(8)	(1)	(7)
Earnings from Ongoing Operations	$ 132	$ 134	$ (2)	$ 357	$ 325	$ 32

The following after-tax gains (losses), which management considers special items, impacted the Kentucky Regulated segment's results and are excluded from Earnings from Ongoing Operations during the periods ended June 30.

		Three Months		Six Months	
	Income Statement Line Item	2025	2024	2025	2024
Strategic corporate initiatives, net of tax of $0 (a)	Other operation and maintenance	$ —	$ —	$ —	$ (1)
IT transformation, net of tax of $2, $2 (b)	Other operation and maintenance	(5)	—	(6)	—
Office relocation and related costs, net of tax of $0, $0 (c)	Other operation and maintenance	(1)	—	(2)	—
Total Special Items		$ (6)	$ —	$ (8)	$ (1)

(a) Costs incurred related to PPL's corporate centralization efforts.
(b) Costs associated with PPL's restructuring and rebuilding of its IT infrastructure, organization and systems.
(c) Certain costs related to the relocation of corporate offices.

The changes in the components of the Kentucky Regulated segment's results between these periods are due to the factors set forth below, which exclude the items that management considers special.

	Three Months	Six Months
Operating Revenues	$ 18	$ 93
Fuel	(11)	(36)
Energy purchases	(8)	(27)
Other operation and maintenance	2	6
Depreciation	(2)	(2)
Taxes, other than income	(2)	(2)
Other Income (Expense) - net	1	6
Interest Expense	(1)	(1)
Income Taxes	1	(5)
Earnings from Ongoing Operations	(2)	32
Special Items, after-tax	(6)	(7)
Net Income	$ (8)	$ 25

- Higher operating revenues for the three month period primarily due to an increase in recoveries of fuel and energy purchases.
- Higher operating revenues for the six month period primarily due to a $47 million increase in recoveries of fuel and energy purchases, a $24 million increase in sales volumes due to weather, and a $20 million increase in off-system sales.
- Higher fuel expense for the three month period primarily due to an increase in commodity costs.
- Higher fuel expense for the six month period primarily due to a $27 million increase in volumes due to weather and higher off-system sales and an $18 million increase in commodity costs, partially offset by a $9 million decrease in generation volumes related to the retirement of Mill Creek Unit 1.
- Higher energy purchases for the three month period primarily due to an increase in commodity costs.

- Higher energy purchases for the six month period primarily due to a $15 million increase in volumes primarily due to weather and a $12 million increase in commodity costs.

Pennsylvania Regulated Segment

The Pennsylvania Regulated segment consists of the regulated electricity transmission and distribution operations of PPL Electric.

Net Income and Earnings from Ongoing Operations for the periods ended June 30 include the following results:

	Three Months			Six Months		
	2025	2024	$ Change	2025	2024	$ Change
Operating Revenues	$ 693	$ 673	$ 20	$ 1,512	$ 1,443	$ 69
Energy purchases	169	153	16	398	367	31
Other operation and maintenance	159	154	5	321	335	(14)
Depreciation	100	100	—	202	199	3
Taxes, other than income	32	30	2	73	66	7
Total Operating Expenses	460	437	23	994	967	27
Other Income (Expense) - net	11	11	—	22	20	2
Interest Income from Affiliate	—	10	(10)	2	20	(18)
Interest Expense	62	61	1	122	123	(1)
Income Taxes	43	46	(3)	97	94	3
Net Income	139	150	(11)	323	299	24
Less: Special Items	(1)	(5)	4	(2)	(17)	15
Earnings from Ongoing Operations	$ 140	$ 155	$ (15)	$ 325	$ 316	$ 9

The following after-tax gains (losses), which management considers special items, impacted the Pennsylvania Regulated segment's results and are excluded from Earnings from Ongoing Operations during the periods ended June 30.

		Three Months		Six Months	
	Income Statement Line Item	2025	2024	2025	2024
PPL Electric billing issue, net of tax of $1, $5 (a)	Other operation and maintenance	$ —	$ (2)	$ —	$ (13)
Strategic corporate initiatives, net of tax of $1, $1 (b)	Other operation and maintenance	—	(3)	—	(4)
Office relocation and related costs, net of tax of $0, $0 (c)	Other operation and maintenance	(1)	—	(2)	—
Total Special Items		$ (1)	$ (5)	$ (2)	$ (17)

(a) Certain expenses related to billing issues.
(b) Costs incurred related to PPL's corporate centralization and other strategic efforts.
(c) Certain costs related to the relocation of corporate offices.

The changes in the components of the Pennsylvania Regulated segment's results between these periods are due to the factors set forth below, which exclude the items that management considers special.

	Three Months	Six Months
Operating Revenues	$ 20	$ 69
Energy purchases	(16)	(31)
Other operation and maintenance	(11)	(7)
Depreciation	—	(3)
Taxes, other than income	(3)	(8)
Other Income (Expense) - net	—	2
Interest Income from Affiliate	(10)	(18)
Interest Expense	—	2
Income Taxes	5	3
Earnings from Ongoing Operations	(15)	9
Special Items, after-tax	4	15
Net Income	$ (11)	$ 24

- Higher operating revenues for the three month period primarily due to an increase in PLR.

- Higher operating revenues for the six month period primarily due to an $18 million increase in distribution volumes primarily due to weather, a $36 million increase in PLR and a $17 million increase in transmission formula rate returns.

- Higher energy purchases for the three month period primarily due to higher PLR prices of $6 million, higher PLR volumes of $2 million and higher alternative energy credit volumes of $2 million.

- Higher energy purchases for the six month period primarily due to higher PLR volumes of $27 million and higher alternative energy credit volumes of $10 million, partially offset by lower PLR prices of $9 million.

- Higher other operation and maintenance for the three month period primarily due to an increase in bad debt expenses.

- Lower interest income from affiliate for the three and six month periods primarily due to repayment on a short-term note receivable with an affiliated company.

Rhode Island Regulated Segment

The Rhode Island Regulated segment consists of the regulated electricity transmission and distribution and natural gas distribution operations of RIE.

Net Income and Earnings from Ongoing Operations for the periods ended June 30 include the following results:

	Three Months			Six Months		
	2025	2024	$ Change	2025	2024	$ Change
Operating Revenues	$ 494	$ 389	$ 105	$ 1,120	$ 938	$ 182

Less: Special Items	(25)	(16)	(9)	(27)	(30)	3
Earnings from Ongoing Operations	$ 8	$ 28	$ (20)	$ 80	$ 106	$ (26)

The following after-tax gains (losses), which management considers special items, impacted the Rhode Island Regulated segment's results and are excluded from Earnings from Ongoing Operations during the periods ended June 30.

		Three Months		Six Months	
	Income Statement Line Item	2025	2024	2025	2024
Acquisition integration, net of tax of $0, $4, ($2), $8 (a)	Other operation and maintenance	$ —	$ (16)	$ 7	$ (30)
IT transformation, net of tax of $1, $1 (b)	Other operation and maintenance	(3)	—	(4)	—
Energy efficiency programs settlement, net of tax of $2 (c)	Other Income (Expense) - net	—	—	(6)	—
Energy efficiency programs settlement (c)	Income Taxes	2	—	—	—
Post TSA adjustments, net of tax of $4, $4 (d)	Operating Revenues	(16)	—	(16)	—
Post TSA adjustments, net of tax of $1, $1 (d)	Other operation and maintenance	(3)	—	(3)	—
Post TSA adjustments, net of tax of $2, $2 (d)	Other Income (Expense) - net	(5)	—	(5)	—
Total Special Items		$ (25)	$ (16)	$ (27)	$ (30)

(a) 2025 costs are related to distributed generation projects that PPL will not seek regulatory recovery of. 2024 primarily includes certain transition services agreement costs for IT systems that will not be part of PPL's ongoing operations.
(b) Costs associated with PPL's restructuring and rebuilding of its IT infrastructure, organization and systems.
(c) See Note 10 to the Financial Statements for additional information.
(d) Adjustments related to account reconciliations and process alignment subsequent to the end of the transition services agreement associated with the acquisition of RIE.

The changes in the components of the Rhode Island Regulated segment's results between these periods are due to the factors set forth below, which exclude the items that management considers special.

	Three Months	Six Months
Operating Revenues	$ 125	$ 202
Energy purchases	(90)	(96)
Other operation and maintenance	(48)	(109)
Depreciation	(4)	(5)
Taxes, other than income	(3)	(23)
Other Income (Expense) - net	(3)	(4)
Interest Income from Affiliate	1	3
Interest Expense	(4)	(3)
Income Taxes	6	9
Earnings from Ongoing Operations	(20)	(26)
Special Items, after-tax	(9)	3
Net Income	$ (29)	$ (23)

- Higher operating revenues for the three month period primarily due to a $53 million increase related to the effects of conforming the presentation of RIE's net metering charges to that of PPL's other operating utilities beginning in the fourth quarter of 2024, a $59 million increase in recovery of energy purchases, transmission expenses, gross earnings taxes and gas maintenance expenses, and a $6 million increase related to capital investments.

- Higher operating revenues for the six month period primarily due to an $85 million increase related to the effects of conforming the presentation of RIE's net metering charges to that of PPL's other operating utilities beginning in the fourth quarter of 2024, a $93 million increase in recovery of energy purchases, transmission expenses, gross earnings taxes and gas maintenance expenses, a $15 million increase related to capital investments and an $11 million increase in net metering.

- Higher energy purchases for the three month period primarily due to a $53 million increase due to the effects of conforming the presentation of RIE's net metering charges to that of PPL's other operating utilities beginning in the fourth quarter of 2024, a $29 million increase in commodity costs and a $7 million increase related to borderline sales.

- Higher energy purchases for the six month period primarily due to an $85 million increase due to the effects of conforming the presentation of RIE's net metering charges to that of PPL's other operating utilities beginning in the fourth quarter of 2024, an $11 million increase in net metering and a $7 million increase related to borderline sales, partially offset by a $6 million decrease in commodity costs.

- Higher operation and maintenance expense for the three month period primarily due to an $18 million increase in transmission expenses, an $8 million increase in IT costs, a $6 million increase in gas maintenance expenses, a $6 million increase in bad debt expenses and a $10 million increase of other items that were not individually significant.

- Higher operation and maintenance expense for the six month period primarily due to a $42 million increase in transmission expenses, a $21 million increase in gas maintenance expenses, a $12 million increase in bad debt expenses, a $16 million increase in IT costs and an $18 million increase of other items that were not individually significant.

- Higher depreciation for the three and six month periods primarily due to an increase in PP&E additions, net of retirements.

- Higher taxes, other than income for the three and six month periods primarily due to an increase in gross earnings taxes.

- Lower other income (expense) - net for the three month period primarily due to lower interest income.

- Higher interest expense for the three month period primarily due to increased borrowings.

- Lower income taxes for the three and six month periods primarily due to lower pre-tax income.

Reconciliation of Earnings from Ongoing Operations

The following tables contain after-tax gains (losses), in total, which management considers special items, that are excluded from Earnings from Ongoing Operations and a reconciliation to PPL's "Net Income" for the periods ended June 30.

	2025 Three Months				
	KY Regulated	PA Regulated	RI Regulated	Corporate and Other	Total
Net Income (Loss)	$ 126	$ 139	$ (17)	$ (65)	$ 183
Less: Special Items (expense) benefit:					
Talen litigation costs, net of tax of ($1) (a)	—	—	—	4	4
Acquisition integration, net of tax of $4 (b)	—	—	—	(13)	(13)
IT transformation, net of tax of $2, $1, $4 (c)	(5)	—	(3)	(16)	(24)
Energy efficiency programs settlement (d)	—	—	2	—	2
Office relocation and related costs, net of tax of $0, $0 (e)	(1)	(1)	—	—	(2)
Post TSA adjustments, net of tax of $7 (f)	—	—	(24)	—	(24)
Total Special Items	(6)	(1)	(25)	(25)	(57)
Earnings from Ongoing Operations	$ 132	$ 140	$ 8	$ (40)	$ 240

(a) PPL incurred legal expenses and received insurance reimbursement related to litigation associated with its former affiliate, Talen Montana, LLC and certain affiliated entities.
(b) Primarily includes integration and related costs associated with the acquisition of RIE.
(c) Costs associated with PPL's restructuring and rebuilding of its IT infrastructure, organization and systems.
(d) See Note 10 to the Financial Statements for additional information.
(e) Certain costs related to the relocation of corporate offices.
(f) Adjustments related to account reconciliations and process alignment subsequent to the end of the transition services agreement associated with the acquisition of RIE.

	2024 Three Months				
	KY Regulated	PA Regulated	RI Regulated	Corporate and Other	Total
Net Income (Loss)	$ 134	$ 150	$ 12	$ (106)	$ 190
Less: Special Items (expense) benefit:					
Strategic corporate initiatives, net of tax of $1, $1 (a)	—	(3)	—	(2)	(5)
Acquisition integration, net of tax of $4, $19 (b)	—	—	(16)	(69)	(85)
PPL Electric billing issue, net of tax of $1 (c)	—	(2)	—	—	(2)
Total Special Items	—	(5)	(16)	(71)	(92)
Earnings from Ongoing Operations	$ 134	$ 155	$ 28	$ (35)	$ 282

(a) Represents costs primarily related to PPL's centralization efforts and other strategic efforts.
(b) Rhode Island Regulated primarily includes certain transition services agreement costs for IT systems that will not be part of PPL's ongoing operations. Corporate and Other primarily includes integration and related costs associated with the acquisition of RIE. See Note 8 to the Financial Statements for additional information.
(c) Certain expenses related to billing issues.

	2025 Six Months				
	KY Regulated	PA Regulated	RI Regulated	Corporate and Other	Total
Net Income (Loss)	$ 349	$ 323	$ 53	$ (128)	$ 597
Less: Special Items (expense) benefit:					
Talen litigation costs, net of tax of $1 (a)	—	—	—	3	3
Acquisition integration, net of tax of ($2), $7 (b)	—	—	7	(27)	(20)
IT transformation, net of tax of $2, $1, $7 (c)	(6)	—	(4)	(26)	(36)
Energy efficiency programs settlement, net of tax of $2 (d)	—	—	(6)	—	(6)
Office relocation and related costs, net of tax of $0, $0 (e)	(2)	(2)	—	—	(4)
Post TSA adjustments, net of tax of $7 (f)	—	—	(24)	—	(24)
Total Special Items	(8)	(2)	(27)	(50)	(87)
Earnings from Ongoing Operations	$ 357	$ 325	$ 80	$ (78)	$ 684

(a) PPL incurred legal expenses and received insurance reimbursement related to litigation associated with its former affiliate, Talen Montana, LLC and certain affiliated entities.
(b) Rhode Island Regulated primarily includes a final transition services agreement settlement. Corporate and Other primarily includes integration and related costs associated with the acquisition of RIE.
(c) Costs associated with PPL's restructuring and rebuilding of its IT infrastructure, organization and systems.
(d) See Note 10 to the Financial Statements for additional information.
(e) Certain costs related to the relocation of corporate offices.
(f) Adjustments related to account reconciliations and process alignment subsequent to the end of the transition services agreement associated with the acquisition of RIE.

	2024 Six Months				
	KY Regulated	PA Regulated	RI Regulated	Corporate and Other	Total
Net Income (Loss)	$ 324	$ 299	$ 76	$ (202)	$ 497
Less: Special Items (expense) benefit:					
Strategic corporate initiatives, net of tax of $0, $1, $1 (a)	(1)	(4)	—	(4)	(9)
Acquisition integration, net of tax of $8, $36 (b)	—	—	(30)	(135)	(165)
PPL Electric billing issue, net of tax of $5 (c)	—	(13)	—	—	(13)
Total Special Items	(1)	(17)	(30)	(139)	(187)
Earnings from Ongoing Operations	$ 325	$ 316	$ 106	$ (63)	$ 684

(a) Represents costs primarily related to PPL's centralization efforts and other strategic efforts.
(b) Rhode Island Regulated primarily includes certain transition services agreement costs for IT systems that will not be part of PPL's ongoing operations. Corporate and Other primarily includes integration and related costs associated with the acquisition of RIE. See Note 8 to the Financial Statements for additional information.
(c) Certain expenses related to billing issues.

PPL Electric: Statement of Income Analysis

Net income for the periods ended June 30 includes the following results:

	Three Months			Six Months		
	2025	2024	$ Change	2025	2024	$ Change
Operating Revenues	$ 693	$ 673	$ 20	$ 1,512	$ 1,443	$ 69
Operating Expenses						
Operation						
Energy purchases	169	153	16	398	367	31
Other operation and maintenance	159	154	5	321	335	(14)
Depreciation	100	100	—	202	199	3
Taxes, other than income	32	30	2	73	66	7
Total Operating Expenses	460	437	23	994	967	27
Operating Income	233	236	(3)	518	476	42
Other Income (Expense) - net	11	11	—	22	20	2
Interest Income from Affiliate	—	10	(10)	2	20	(18)
Interest Expense	62	61	1	122	123	(1)
Income Before Income Taxes	182	196	(14)	420	393	27
Income Taxes	43	46	(3)	97	94	3
Net Income	$ 139	$ 150	$ (11)	$ 323	$ 299	$ 24

Operating Revenues

The increase (decrease) in operating revenues was due to:

	Three Months	Six Months
Distribution price	$ 4	$ (2)
Distribution volume (a)	(4)	18
PLR (b)	18	36
Transmission formula rate (c)	2	17
Total	$ 20	$ 69

(a) The increase for the six months ended June 30, 2025 was primarily due to weather, along with other higher usage.
(b) The increase for the three months ended June 30, 2025 was primarily the result of more PLR customers and higher prices, partially offset by lower customer volumes, due to unfavorable weather and other lower usage. The increase for the six months ended June 30, 2025 was primarily due to higher customer volumes, due to favorable weather and other higher usage, and more PLR customers, partially offset by lower prices.
(c) The increase for the six months ended June 30, 2025 was primarily due to returns on additional transmission capital investments.

Energy Purchases

Energy purchases increased $16 million for the three months ended June 30, 2025 compared with 2024, primarily due to higher PLR prices of $6 million, higher PLR volumes of $2 million and higher alternative energy credit volumes of $2 million.

Energy purchases increased $31 million for the six months ended June 30, 2025 compared with 2024, primarily due to higher PLR volumes of $27 million and higher alternative energy credit volumes of $10 million, partially offset by lower PLR prices of $9 million.

Interest Income from Affiliate

Interest Income from Affiliate decreased $10 million and $18 million for the three and six months ended June 30, 2025 compared with 2024, primarily due to repayment on a short-term note receivable with an affiliated company.

LG&E: Statement of Income Analysis

Net income for the periods ended June 30 includes the following results:

	Three Months			Six Months		
	2025	2024	$ Change	2025	2024	$ Change
Operating Revenues						
Retail and wholesale	$ 373	$ 363	$ 10	$ 873	$ 823	$ 50
Electric revenue from affiliate	5	3	2	10	19	(9)
Total Operating Revenues	378	366	12	883	842	41
Operating Expenses						
Operation						
Fuel	75	67	8	157	153	4
Energy purchases	23	15	8	111	86	25
Energy purchases from affiliate	7	7	—	12	8	4
Other operation and maintenance	91	87	4	180	175	5
Depreciation	77	77	—	151	153	(2)
Taxes, other than income	13	12	1	26	25	1
Total Operating Expenses	286	265	21	637	600	37
Operating Income	92	101	(9)	246	242	4
Other Income (Expense) - net	5	4	1	8	6	2
Interest Expense	27	26	1	53	52	1
Income Before Income Taxes	70	79	(9)	201	196	5
Income Taxes	14	17	(3)	40	41	(1)
Net Income	$ 56	$ 62	$ (6)	$ 161	$ 155	$ 6

Operating Revenues

The increase (decrease) in operating revenues was due to:

	Three Months	Six Months
Fuel and other energy purchases (a)	$ 12	$ 24
Volumes (b)	(3)	7
Off-system sales (c)	3	11
Other	—	(1)
Total	$ 12	$ 41

(a) The increase for the three months ended June 30, 2025 was primarily due to higher recoveries of energy purchases. The increase for the six months ended June 30, 2025 was primarily due to higher recoveries of energy purchases, partially offset by lower revenues from affiliates due to timing of plant outages and retirements.
(b) The increase for the six months ended June 30, 2025 was primarily due to weather.
(c) The increases were primarily due to higher volumes.

Fuel

Fuel expense increased $8 million for the three months ended June 30, 2025 compared with 2024, primarily due to an increase in commodity costs.

Fuel expense increased $4 million for the six months ended June 30, 2025 compared with 2024, primarily due to a $13 million increase in commodity costs, partially offset by a $9 million decrease in generation volumes related to the retirement of Mill Creek Unit 1.

Energy Purchases

Energy purchases increased $8 million for the three months ended June 30, 2025 compared with 2024, primarily due to an increase in commodity costs.

Energy purchases increased $25 million for the six months ended June 30, 2025 compared with 2024, primarily due to a $15 million increase in volumes due to weather and a $10 million increase in commodity costs.

Other Operation and Maintenance

Other operation and maintenance increased $4 million for the three months ended June 30, 2025 compared with 2024, primarily due to higher IT costs.

Income Taxes

Income taxes decreased $3 million for the three months ended June 30, 2025 compared with 2024, primarily due to a decrease in pre-tax income.

KU: Statement of Income Analysis

Net income for the periods ended June 30 includes the following results:

	Three Months			Six Months		
	2025	2024	$ Change	2025	2024	$ Change
Operating Revenues						
Retail and wholesale	$ 465	$ 457	$ 8	$ 1,024	$ 981	$ 43
Electric revenue from affiliate	7	7	—	12	8	4
Total Operating Revenues	472	464	8	1,036	989	47
Operating Expenses						
Operation						
Fuel	117	115	2	269	238	31
Energy purchases	7	6	1	14	12	2
Energy purchases from affiliate	5	3	2	10	19	(9)
Other operation and maintenance	102	101	1	202	203	(1)
Depreciation	101	101	—	203	200	3
Taxes, other than income	13	12	1	25	24	1
Total Operating Expenses	345	338	7	723	696	27
Operating Income	127	126	1	313	293	20
Other Income (Expense) - net	5	4	1	10	6	4
Interest Expense	35	33	2	70	67	3
Interest Expense with Affiliate	—	1	(1)	—	1	(1)
Income Before Income Taxes	97	96	1	253	231	22
Income Taxes	19	19	—	50	46	4
Net Income	$ 78	$ 77	$ 1	$ 203	$ 185	$ 18

Operating Revenues

The increase (decrease) in operating revenues was due to:

	Three Months	Six Months
Fuel and other energy purchases (a)	$ 1	$ 13
Volumes (b)	(1)	17
Off-system sales (c)	5	14
Other	3	3
Total	$ 8	$ 47

(a) The increase for the six months ended June 30, 2025 was primarily due to higher recoveries of fuel expenses.
(b) The increase for the six months ended June 30, 2025 was primarily due to weather.
(c) The increases were primarily due to higher volumes.

Fuel

Fuel expense increased $2 million for the three months ended June 30, 2025 compared with 2024, primarily due to a $4 million increase in commodity costs.

Fuel expense increased $31 million for the six months ended June 30, 2025 compared with 2024, primarily due to an increase in volumes due to weather and higher off-system sales.

Financial Condition

The remainder of this Item 2 in this Form 10-Q is presented on a combined basis, providing information for each of the Registrants as applicable.

Liquidity and Capital Resources

(All Registrants)

The Registrants had the following at:

	PPL	PPL Electric	LG&E	KU
June 30, 2025				
Cash and cash equivalents	$ 294	$ 15	$ 10	$ 11
Short-term debt	1,286	384	158	275
Long-term debt due within one year	1,219	—	300	268
Notes payable to affiliates		—	—	46
December 31, 2024				
Cash and cash equivalents	$ 306	$ 24	$ 8	$ 13
Short-term debt	303	—	25	140
Long-term debt due within one year	551	—	300	250
Notes payable to affiliates		—	43	73

(All Registrants)

Net cash provided by (used in) operating, investing and financing activities for the six month periods ended June 30, and the changes between periods, were as follows.

	PPL	PPL Electric	LG&E	KU
2025				
Operating activities	$ 1,115	$ 382	$ 279	$ 351
Investing activities	(1,713)	(467)	(306)	(391)
Financing activities	577	76	24	33
2024				
Operating activities	$ 1,048	$ 353	$ 273	$ 352
Investing activities	(1,261)	(1,020)	(207)	(296)
Financing activities	155	629	(82)	(63)
Change - Cash Provided (Used)				
Operating activities	$ 67	$ 29	$ 6	$ (1)
Investing activities	(452)	553	(99)	(95)
Financing activities	422	(553)	106	96

Operating Activities

The components of the change in cash provided by (used in) operating activities for the six months ended June 30, 2025 compared with 2024 were as follows.

	PPL	PPL Electric	LG&E	KU
Change - Cash Provided (Used)				
Net income	$ 100	$ 24	$ 6	$ 18
Non-cash components	1	(13)	(1)	13
Working capital	(26)	26	34	(22)
Other operating activities	(8)	(8)	(33)	(10)
Total	$ 67	$ 29	$ 6	$ (1)

(PPL)

PPL's cash provided by operating activities in 2025 increased $67 million compared with 2024.

- Net income increased $100 million between the periods and included an increase in non-cash components of $1 million.

- The $26 million decrease in cash from changes in working capital was primarily due to an increase in accounts receivable (primarily due to timing of payments) and a decrease in accrued interest (primarily due to timing of payments), partially offset by increases in taxes payable (primarily due to timing of payments), a decrease in net regulatory assets (primarily due to the timing of rate recovery mechanisms) and a decrease in prepayments (primarily due to the timing of payments).

- The $8 million decrease in cash provided by other operating activities was driven primarily by an increase in other assets (primarily related to preliminary survey costs for new generation projects).

(PPL Electric)

PPL Electric's cash provided by operating activities in 2025 increased $29 million compared with 2024.

- Net income increased $24 million between the periods and included a decrease in non-cash components of $13 million. The decrease in non-cash components was primarily due to a decrease in deferred income taxes and investment tax credits.

- The $26 million increase in cash from changes in working capital was primarily due to increases in taxes payable (primarily due to timing of payments), a decrease in net regulatory assets (primarily due to the timing of rate recovery mechanisms) and a decrease in prepayments (primarily due to the timing of payments), partially offset by an increase in accounts receivable and a decrease in accounts payable (primarily due to the timing of payments).

- The $8 million decrease in cash provided by other operating activities was driven primarily by an increase in noncurrent regulatory assets (primarily related to an increase in storm costs).

(LG&E)

LG&E's cash provided by operating activities in 2025 increased $6 million compared with 2024.

- Net income increased $6 million between the periods and included a decrease in non-cash components of $1 million.
- The $34 million increase in cash from changes in working capital was primarily due to a decrease in accounts receivable (primarily due to weather) and a decrease in accounts receivable from affiliates (primarily due to timing of payments), partially offset by a decrease in accounts payable (primarily due to timing of payments).
- The $33 million decrease in cash provided by other operating activities was driven by an increase in noncurrent assets (primarily related to preliminary survey costs for new generation projects).

(KU)

KU's cash provided by operating activities in 2025 decreased $1 million compared with 2024.

- Net income increased $18 million between the periods and included an increase in non-cash components of $13 million, primarily due to an increase in deferred income taxes and investment tax credits (primarily due to book versus plant timing differences).
- The $22 million decrease in cash from changes in working capital was primarily due to a decrease in accounts payable to affiliates (primarily due to timing of payments), an increase in fuel, materials and supplies (primarily due to an increase in coal volume) and a decrease in current regulatory liabilities (primarily due to changes in fuel costs), partially offset by a decrease in accounts receivable (primarily due to weather) and an increase in accounts payable (primarily due to timing of payments).
- The $10 million decrease in cash provided by other operating activities was driven by an increase in noncurrent assets (primarily related to higher deferred storm costs recorded as noncurrent regulatory assets).

Investing Activities

(All Registrants)

The components of the change in cash provided by (used in) investing activities for the six months ended June 30, 2025 compared with 2024 were as follows.

	PPL	PPL Electric	LG&E	KU
Change - Cash Provided (Used)				
Expenditures for PP&E	$ (457)	$ (178)	$ (89)	$ (95)
Notes receivable from affiliate	—	724	(10)	—
Other investing activities	5	7	—	—
Total	$ (452)	$ 553	$ (99)	$ (95)

For PPL, the increase in expenditures for PP&E was due to an increase in project expenditures at PPL Electric, RIE, LG&E and KU. The increase in expenditures at PPL Electric was primarily due to increases in transmission and distribution projects. The increase in expenditures at LG&E and KU was primarily due to Mill Creek Unit 5 and the E.W. Brown battery storage project.

For PPL Electric, the change in "Notes receivable from affiliate" activity resulted from payments received of $724 million from an affiliate. See Note 11 to the Financial Statements for further discussion of intercompany borrowings.

Financing Activities

(All Registrants)

The components of the change in cash provided by (used in) financing activities for the six months ended June 30, 2025 compared with 2024 were as follows.

	PPL	PPL Electric	LG&E	KU
Change - Cash Provided (Used)				
Debt issuance/retirement, net	$ (1,148)	$ (649)	$ —	$ —
Dividends	(25)	(23)	(14)	(11)
Capital contributions/distributions, net	—	(780)	60	20
Change in short-term debt, net	1,586	893	123	128
Net increase (decrease) in notes payable with affiliate	—	—	(62)	(40)
Other financing activities	9	6	(1)	(1)
Total	$ 422	$ (553)	$ 106	$ 96

See Note 7 to the Financial Statements in this Form 10-Q for information on 2025 short-term and long-term debt activity, equity transactions and PPL dividends. See Note 8 to the Financial Statements in the Registrants' 2024 Form 10-K for information on 2024 activity.

Credit Facilities

The Registrants maintain credit facilities to enhance liquidity, provide credit support and provide a backstop to commercial paper programs. Amounts borrowed under these credit facilities are reflected in "Short-term debt" on the Balance Sheets. At June 30, 2025, the total committed borrowing capacity under credit facilities and the borrowings under these facilities were:

External

	Committed Capacity	Borrowed	Letters of Credit and Commercial Paper Issued (c)	Unused Capacity
PPL Capital Funding Credit Facilities (a)	$ 1,600	$ —	$ 470	$ 1,130
PPL Electric Credit Facility	750	—	386	364
LG&E Credit Facility	600	—	158	442
KU Credit Facility	600	—	275	325
Total Credit Facilities (b)	$ 3,550	$ —	$ 1,289	$ 2,261

(a) Includes a $1.5 billion syndicated credit facility with a $250 million borrowing sublimit for RIE and a $1.25 billion sublimit for PPL Capital Funding. RIE's borrowing sublimit is adjustable, at the borrowers' option, from $0 to $600 million, with the remaining balance of the $1.5 billion available under the facility allocated to PPL Capital Funding. At June 30, 2025, PPL Capital Funding had $470 million of commercial paper outstanding and RIE had no commercial paper outstanding. RIE's obligations under the facility are not guaranteed by PPL.
(b) The commitments under the credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than the following percentages of the total committed capacity: PPL - 8%, PPL Electric - 7%, LG&E - 7% and KU - 7%.
(c) Commercial paper issued reflects the undiscounted face value of the issuance.

See Note 7 to the Financial Statements for further discussion of the Registrants' credit facilities.

Intercompany (LG&E and KU)

	Committed Capacity	Borrowed	Commercial Paper Issued	Unused Capacity
LG&E Money Pool (a)	$ 750	$ —	$ 158	$ 592
KU Money Pool (a)	650	46	275	329

(a) LG&E and KU participate in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E, and LKE and/or LG&E make available to KU funds up to the difference between LG&E's and KU's FERC borrowing limit and LG&E's and KU's commercial paper issued, at an interest rate based on the lower of a market index of commercial paper issues and two additional rate options based on SOFR.

See Note 11 to the Financial Statements for further discussion of intercompany credit facilities.

Commercial Paper *(All Registrants)*

The Registrants, and PPL Capital Funding and RIE, maintain commercial paper programs to provide an additional financing source to fund short-term liquidity needs, as necessary. Commercial paper issuances, included in "Short-term debt" on the

Balance Sheets, are supported by the respective Registrant's credit facility, with PPL Capital Funding and RIE's issuances supported by PPL Capital Funding's syndicated credit facility. The following commercial paper programs were in place at June 30, 2025:

	Capacity (b)	Commercial Paper Issuances (c)	Unused Capacity
PPL Capital Funding (a)	$ 1,350	$ 470	$ 880
RIE (a)	250	—	250
PPL Electric	650	385	265
LG&E	500	158	342
KU	400	275	125
Total PPL	$ 3,150	$ 1,288	$ 1,862

(a) Issuances under the PPL Capital Funding and RIE commercial paper programs are supported by the PPL Capital Funding syndicated credit facility, which has a total capacity of $1.5 billion, currently with a $250 million borrowing sublimit for RIE and a $1.25 billion sublimit for PPL Capital Funding. PPL Capital Funding's Commercial paper program is also backed by a separate bilateral credit facility for $100 million.

(b) On July 14, 2025, the capacity of the commercial paper programs were increased to $1,600 million for PPL Capital Funding, $750 million for PPL Electric, $600 million for LG&E and $600 million for KU, bringing the capacity of each program into alignment with the increased capacity of the supporting syndicated credit facilities for each entity, as amended January 2025.

(c) Commercial paper issued reflects the undiscounted face value of the issuance.

Long-term Debt *(All Registrants)*

See Note 7 to the Financial Statements for information regarding the Registrants' long-term debt activities.

(PPL)

Equity Security Activities

ATM Program

In February 2025, PPL entered into an equity distribution agreement, pursuant to which PPL may sell, from time to time, up to an aggregate of $2 billion of its common stock through an ATM Program, which may utilize an optional forward sales component. Each forward contract under the agreement must be settled within 24 months. The compensation paid to the selling agents by PPL may be up to 2% of the gross offering proceeds of the shares. During the six months ended June 30, 2025, PPL entered into forwards contracts to sell approximately 9.9 million shares of its common stock at a blended initial forward price of approximately $34.77 per share. The forward sale price may be adjusted based on changes in daily interest rates, for certain stock loan fees as determined by a third-party agent, and will be subject to predetermined reductions based on expected dividends. Each outstanding forward contract must be settled on or before December 30, 2025. PPL may elect, at its discretion, to physically settle, net share settle or net cash settle the forward contracts. At June 30, 2025, PPL could have settled the forward sale contracts with physical delivery of approximately 9.9 million shares of common stock for proceeds of approximately $344 million. The forward contracts under the ATM program are classified as equity transactions.

Common Stock Dividends

In May 2025, PPL declared a quarterly common stock dividend, payable July 1, 2025, of 27.25 cents per share. Future dividends, declared at the discretion of the Board of Directors, will depend upon future earnings, cash flows, financial and legal requirements and other factors.

Rating Agency Actions

(All Registrants)

Moody's and S&P periodically review the credit ratings of the debt of the Registrants and their subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of the Registrants and their subsidiaries are based on information provided by the Registrants and other sources. The ratings of Moody's and S&P are not a recommendation to buy, sell or hold any securities of the

Registrants or their subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities.

The credit ratings of the Registrants and their subsidiaries affect their liquidity, access to capital markets and cost of borrowing under their credit facilities. A downgrade in the Registrants' or their subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets. The Registrants and their subsidiaries have no credit rating triggers that would result in the reduction of access to capital markets or the acceleration of maturity dates of outstanding debt.

Since June 2023, the rating agencies have taken no ratings actions related to the Registrants and their subsidiaries.

Ratings Triggers

(PPL, LG&E and KU)

Various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, and interest rate instruments, contain provisions that require the posting of additional collateral or permit the counterparty to terminate the contract, if PPL's, LG&E's or KU's or their subsidiaries' credit rating, as applicable, were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral requirements for PPL for derivative contracts in a net liability position at June 30, 2025.

(All Registrants)

For additional information on the Registrants' liquidity and capital resources, see "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Registrants' 2024 Form 10-K.

Risk Management *(All Registrants)*

Market Risk

See Notes 13 and 14 to the Financial Statements for information about the Registrants' risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These are not precise indicators of expected future losses, but are rather only indicators of possible losses under normal market conditions at a given confidence level.

Interest Rate Risk

PPL and its subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. A variety of financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in their debt portfolios, adjust the duration of the debt portfolios and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under PPL's risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates. In addition, the interest rate risk of certain subsidiaries is potentially mitigated as a result of the existing regulatory framework or the timing of rate cases.

The following interest rate hedges were outstanding at June 30, 2025.

	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates (b)	Maturities Ranging Through
PPL and LG&E				
Cash flow hedges				
Interest rate derivatives	$ 85	$ 2	$ (3)	2026
Economic hedges				
Interest rate derivatives (c)	$ 64	$ (5)	$ (1)	2033

(a) Includes accrued interest, if applicable.
(b) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability. Sensitivities represent a 10% adverse movement in interest rates.
(c) Realized changes in the fair value of such economic hedges are recoverable through regulated rates and any subsequent changes in the fair value of these derivatives are included in regulatory assets or regulatory liabilities.

The Registrants are exposed to a potential increase in interest expense and to changes in the fair value of their debt portfolios. The estimated impact of a 10% adverse movement in interest rates on the fair value of debt at June 30, 2025 is shown below.

	10% Adverse Movement in Rates on Fair Value of Debt
PPL	$ 587
PPL Electric	253
LG&E	85
KU	126

Commodity Price Risk

PPL is exposed to commodity price risk through its subsidiaries as described below.

- PPL Electric is required to purchase electricity to fulfill its obligation as a PLR. Potential commodity price risk is mitigated through its PAPUC-approved cost recovery mechanism and full-requirement supply agreements to serve its PLR customers which transfer the risk to energy suppliers.
- LG&E's and KU's rates include certain mechanisms for fuel, fuel-related expenses and energy purchases. In addition, LG&E's rates include a mechanism for natural gas supply costs. These mechanisms generally provide for timely recovery of market price fluctuations associated with these costs.
- RIE utilizes derivative instruments pursuant to its RIPUC-approved plan to manage commodity price risk associated with its natural gas purchases. RIE's commodity price risk management strategy is to reduce fluctuations in firm gas sales prices to its customers. RIE's costs associated with derivatives instruments are recoverable through its RIPUC-approved cost recovery mechanisms. RIE is also required to purchase electricity to fulfill its obligation to provide Last Resort Service (LRS). Potential commodity price risk is mitigated through its RIPUC-approved cost recovery mechanisms and full requirements service agreements to serve LRS customers, which transfer the risk to energy suppliers. Additionally, RIE is required to contract through long-term agreements for clean energy supply under the Rhode Island Renewable Energy Growth program and Long-term Clean Energy Standard. Potential commodity price risk is mitigated through its RIPUC-approved cost recovery mechanisms, which true-up cost differences between contract prices and market prices.

Volumetric Risk

Volumetric risk is the risk related to the changes in volume of retail sales due to weather, economic conditions or other factors. PPL is exposed to volumetric risk through its subsidiaries as described below:

- PPL Electric, LG&E and KU are exposed to volumetric risk on retail sales, mainly due to weather and other economic conditions for which there is limited mitigation between rate cases.
- RIE is exposed to volumetric risk, which is significantly mitigated by regulatory mechanisms. RIE's electric and gas distribution rates both have a revenue decoupling mechanism, which allows for annual adjustments to RIE's delivery rates.

Inflation and Supply Chain Related Risk

PPL and its subsidiaries continue to monitor the impact of inflation and supply chain disruptions. PPL and its subsidiaries monitor the cost of fuel, construction, regulatory and environmental compliance costs and other costs, including as a result of tariffs. Mechanisms are in place to mitigate the risk of inflationary effects and supply chain disruptions, to the extent possible, but increased costs and supply chain disruptions may directly or indirectly affect our ongoing operations. These mechanisms include pricing strategies, productivity improvements and cost reductions in order to ensure that the Registrants are able to procure the necessary materials and other resources needed to maintain services in a safe and reliable manner, and to invest in infrastructure consistent with the capital expenditure plan. For additional information see "Forward-looking Information" at the beginning of this report and “Item 1A. Risk Factors" of the Registrants' 2024 Form 10-K.

Credit Risk

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations - Financial Condition - Risk Management - Credit Risk" in the Registrants' 2024 Form 10-K for additional information.

Related Party Transactions *(All Registrants)*

The Registrants are not aware of any material ownership interests or operating responsibility by senior management in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with the Registrants. See Note 11 to the Financial Statements for additional information on related party transactions for PPL Electric, LG&E and KU.

Acquisitions, Development and Divestitures *(All Registrants)*

The Registrants from time to time evaluate opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with, modify or terminate the projects. Any resulting transactions may impact future financial results. See Note 8 to the Financial Statements for additional information on acquisition, development, and divestiture activity.

Environmental Matters *(All Registrants)*

Extensive federal, state and local environmental laws and regulations are applicable to the Registrants' air emissions, water discharges and the management of hazardous and solid waste, as well as other aspects of the Registrants' businesses. The costs of compliance or alleged non-compliance cannot be predicted with certainty but could be significant. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers and industrial power users, and may impact the costs for their products or their demand for the Registrants' services. Increased capital and operating costs are expected to be subject to rate recovery. The Registrants can provide no assurances as to the ultimate outcome of future environmental or rate proceedings before regulatory authorities.

See "Environmental Matters" in Item 1. "Business" in the Registrants' 2024 Form 10-K for information about environmental laws and regulations affecting the Registrants' business. See "Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash - Capital Expenditures" in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Registrants' 2024 Form 10-K for information on projected environmental capital expenditures for 2025 through 2027. See "Legal Matters" in Note 10 to the Financial Statements for a discussion of the more significant environmental claims. See Note 15 to the Financial Statements for information related to the impacts of CCRs on AROs.

The information below represents an update to “Item 1. Business – Environmental Matters” in the Registrants' 2024 Form 10-K.

(PPL, LG&E and KU)

EPA Deregulatory Initiative

On March 12, 2025, the EPA announced a plan to reconsider 31 environmental rules including the Section 111 performance standards and emissions limits for greenhouse gases, the endangerment finding for greenhouse gases, the Good Neighbor Plan, the Mercury and Air Toxics Standards, revisions to the fine particulate matter standard, the ELGs, and the CCRs Rule. Supplementing previous Executive Orders directing various regulatory changes, on April 9, 2025, President Trump issued an Executive Order and Presidential Memorandum directing review of existing rules, repeal of unlawful rules, and initiation of a zero-based budgeting process by which certain rules would automatically expire unless extended. While the administration may seek to implement some regulatory changes outside of the rulemaking process, changes to existing rules are generally expected to require formal rulemaking proceedings. Any final EPA actions repealing or revising current rules will likely result in legal challenges. PPL, LG&E, and KU are unable to predict future regulatory changes, if any, that may result from the EPA’s deregulatory plan or the outcome of any associated legal challenges. PPL, LG&E, and KU will closely monitor the ongoing EPA initiative and any related litigation for the impact to our business including planned capital expenditures to comply with the EPA rules.

Air

NAAQS

The Clean Air Act has a significant impact on the operation of fossil fuel generation plants. The Clean Air Act requires the EPA periodically to establish and review NAAQS for six pollutants including ozone (contributed to by nitrogen oxide emissions) and particulate matter, which are particularly relevant for fossil fuel generation plants. On February 2, 2024, the D.C. Circuit Court granted the EPA's motion for voluntary remand, without vacatur, of the ozone rule, which was under legal challenge. The EPA will complete a new review to incorporate new studies and updated analyses to determine the adequacy of the existing ozone standard. On March 6, 2024, the EPA finalized revisions to the particulate matter standard that lowers the primary standard for fine particulates. Several states and trade groups challenged the EPA's finalized revisions to the particulate matter standard in the D.C. Circuit Court. In March 2025, the EPA announced that it would reconsider the revised fine particulate standard. Nonattainment designations for counties in which LG&E and KU generation is located, including Jefferson County, Kentucky, could potentially require additional particulate matter and nitrogen oxide reductions from sources including LG&E's Mill Creek Station, and more stringent requirements for new generation. PPL, LG&E, and KU are unable to predict future implementation actions or the outcome of future evaluations by the EPA and the states with respect to the NAAQS standards.

In March 2021, the EPA released final revisions to the Cross-State Air Pollution Rule (CSAPR), aimed at ensuring compliance with the 2008 ozone NAAQS and providing for reductions in ozone season nitrogen oxide emissions for 2021 and subsequent years. In March 2023, the EPA released a final Federal Implementation Plan under the Good Neighbor provisions of the Clean Air Act providing for significant additional nitrogen oxide emission reductions for compliance with the revised 2015 ozone NAAQS. The reductions in Kentucky state-wide nitrogen oxide budgets were scheduled to commence in 2023, with the largest reductions planned for 2026. The rules provide for reduced availability of nitrogen oxide allowances that have historically permitted operational flexibility for fossil units and could potentially result in constraints that may require implementation of additional emission controls or accelerate implementation of lower emission generation technologies. In June 2024, the U.S. Supreme Court issued a stay of the Good Neighbor Plan while the D.C. Circuit Court considers legal challenges to the rule. On December 10, 2024, EPA published in the Federal Register a supplement to the record. On December 6, 2024, the U.S. Court of Appeals for the Sixth Circuit vacated and remanded the EPA's disapproval of Kentucky's state implementation plan for the ozone NAAQS. In March 2025, the EPA announced that it would reconsider the Good Neighbor Plan. PPL, LG&E, and KU are monitoring ongoing legal and regulatory developments.

PPL, LG&E, and KU are unable to predict the ultimate outcome of pending litigation or future emission reductions that may be required by future federal rules or state implementation actions. Compliance with the NAAQS, CSAPR, Good Neighbor Plan, and related requirements may require installation of additional pollution controls or other compliance actions, inclusive of retirements, the costs of which PPL, LG&E and KU believe would be subject to rate recovery.

Modification of Mercury and Air Toxics Standards

In 2012, the EPA issued the Mercury and Air Toxics Standards (MATS) rule requiring reductions in mercury and other hazardous air pollutants from fossil fuel-fired power plants. LG&E and KU installed significant controls to achieve compliance with MATS and other rules. On May 7, 2024, the EPA issued a final rule increasing the stringency of MATS and further reducing emissions of certain hazardous air pollutants to reflect perceived developments in control technologies. Legal challenges to the rule have been filed in the D.C. Circuit Court. PPL, LG&E, and KU have reviewed the final rule and do not expect significant operational changes or additional controls to be required. On June 17, 2025, the EPA proposed in the Federal Register to repeal the 2024 MATS revisions except for the Particulate Matter Continuous Emission Monitoring System testing criteria. The EPA intends to finalize the rule revisions by the end of the 2025 calendar year.

Greenhouse Gas Standards

On May 9, 2024, the EPA issued a final rule under Section 111 of the Clean Air Act, which establishes performance standards and emissions limits aimed at reducing GHG emissions from certain new, existing, and modified fossil fuel-fired electric generating units (EGUs). In the final rule, the EPA announced it would set performance standards for existing natural gas-fired turbines in a future rule. The standards require phased implementation of carbon mitigation technologies including state-of-the-art efficiency requirements, carbon capture and sequestration, and natural gas co-firing. New natural gas EGUs would be immediately subject to the stricter efficiency standard. Legal challenges to the rule have been filed in the D.C. Circuit Court. PPL, LG&E, and KU are unable to predict the impact of new GHG reduction requirements until completion of a comprehensive review and resolution of related legal and regulatory proceedings. While the impact of new GHG reduction requirements on operations and financial results of operations could potentially be substantial, the cost of complying with such requirements is expected to be subject to rate recovery. On June 17, 2025, the EPA proposed in the Federal Register two options for repeal of the 2024 standard. In the first proposal, the EPA would determine that EGU emissions of greenhouse gases do not pose an endangerment to the health and welfare of the public and repeal the 2024 and 2015 standards for EGUs. Under an alternate proposal, the EPA would repeal the 2024 standards for existing coal, natural-gas and oil-fired steam generating units along with most standards for new combustion turbines. On July 29, 2025, the EPA proposed revocation of the 2009 endangerment finding which provides the basis for regulating GHG emissions. This proposal would leave in place efficiency standards for new combustion turbines. The EPA intends to finalize the rule changes by the end of the 2025 calendar year.

New Accounting Guidance *(All Registrants)*

There has been no new accounting guidance adopted in 2025. See Note 17 to the Financial Statements for discussion of significant accounting guidance pending adoption as of June 30, 2025.

Application of Critical Accounting Policies *(All Registrants)*

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following table summarizes the accounting policies by Registrant that are particularly important to an understanding of the reported financial condition or results of operations and require management to make estimates or other judgments of matters that are inherently uncertain. See "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Registrants' 2024 Form 10-K for a discussion of each critical accounting policy.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to "Risk Management" in "Item 2. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations."

Item 4. Controls and Procedures

(a) Evaluation of disclosure controls and procedures.

The Registrants' principal executive officers and principal financial officers, based on their evaluation of the Registrants' disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)) have concluded that, as of June 30, 2025, the Registrants' disclosure controls and procedures are effective to ensure that material information relating to the Registrants and their consolidated subsidiaries is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, particularly during the period for which this quarterly report has been prepared. The principal officers have concluded that the disclosure controls and procedures are also effective to ensure that information required to be disclosed in reports filed under the Exchange Act is accumulated and communicated to management, including the principal executive and principal financial officers, to allow for timely decisions regarding required disclosure.

(b) Change in internal controls over financial reporting.

The Registrants' principal executive officers and principal financial officers have concluded that there were no changes in the Registrants' internal controls over financial reporting during the Registrants' second fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrants' internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

For information regarding legal, tax, regulatory, environmental or other administrative proceedings that became reportable events or were pending in the second quarter of 2025 see:

- "Item 3. Legal Proceedings" in each Registrant's 2024 Form 10-K; and
- Notes 5, 6, 8 and 10 to the Financial Statements.

Item 1A. Risk Factors

There have been no material changes in the Registrants' risk factors from those disclosed in "Item 1A. Risk Factors" of the Registrants' 2024 Form 10-K.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

Securities Trading Plans of Directors and Executive Officers

On May 29, 2025, Mr. John R. Crockett III, President of LG&E and KU Energy LLC, adopted a trading arrangement for the sale of shares of PPL's common stock (a Rule 10b5-1 Trading Plan) that is intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) under the Securities Exchange Act of 1934. Mr. Crockett's Rule 10b5-1 Trading Plan, which terminates on the earlier of (i) December 31, 2025 and (ii) the date all trades specified under the plan have been executed or all orders under the plan have expired, provides for the sale of up to 15,791 shares of common stock of PPL, plus dividends on such shares prior to sale, pursuant to the terms of the plan.

Item 6. Exhibits

The following Exhibits indicated by an asterisk preceding the Exhibit number are filed herewith. The balance of the Exhibits has heretofore been filed with the SEC and pursuant to Rule 12(b)-23 are incorporated herein by reference. Exhibits indicated by a [_] are filed or listed pursuant to Item 601(b)(10)(iii) of Regulation S-K.

Certifications pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, for the quarterly period ended June 30, 2025, filed by the following officers for the following companies:

*31(a)	- PPL Corporation's principal executive officer
*31(b)	- PPL Corporation's principal financial officer
*31(c)	- PPL Electric Utilities Corporation's principal executive officer
*31(d)	- PPL Electric Utilities Corporation's principal financial officer
*31(e)	- Louisville Gas and Electric Company's principal executive officer
*31(f)	- Louisville Gas and Electric Company's principal financial officer
*31(g)	- Kentucky Utilities Company's principal executive officer
*31(h)	- Kentucky Utilities Company's principal financial officer

Certifications pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, for the quarterly period ended June 30, 2025, furnished by the following officers for the following companies:

*32(a)	- PPL Corporation's principal executive officer and principal financial officer
*32(b)	- PPL Electric Utilities Corporation's principal executive officer and principal financial officer
*32(c)	- Louisville Gas and Electric Company's principal executive officer and principal financial officer

CERTIFICATION

I, VINCENT SORGI, certify that:

1. I have reviewed this quarterly report on Form 10-Q of PPL Corporation (the "registrant");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

I, JOSEPH P. BERGSTEIN, JR., certify that:

1. I have reviewed this quarterly report on Form 10-Q of PPL Corporation (the "registrant");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

PROSPECTUS SUPPLEMENT
(To Prospectus dated February 16, 2024)

$500,000,000

PPL Electric Utilities

PPL Electric Utilities Corporation

5.55% First Mortgage Bonds due 2055

PPL Electric Utilities Corporation is offering $500,000,000 in aggregate principal amount of its First Mortgage Bonds, 5.55% Series due 2055 (the "Bonds"). Interest on the Bonds will be payable on February 15 and August 15 of each year, commencing February 15, 2026, and at maturity, as further described in this prospectus supplement. The Bonds will mature on August 15, 2055, unless redeemed on an earlier date. We may, at our option, redeem the Bonds, in whole at any time or in part from time to time, at the applicable redemption price described herein. See "Description of the Bonds—Redemption."

The Bonds will be secured by a lien on substantially all of our electricity distribution properties and certain of our electricity transmission properties, subject to certain exceptions and exclusions, as described in this prospectus supplement and in the accompanying prospectus. See "Description of the Bonds—Security; Lien of the Mortgage."

Investing in the Bonds involves certain risks. See "Risk Factors" on page S-5 of this prospectus supplement, on page 2 of the accompanying prospectus and beginning on page 17 of our Annual Report on Form 10-K for the year ended December 31, 2024.

These securities have not been approved or disapproved by the Securities and Exchange Commission or any state securities commission, nor has the Securities and Exchange Commission or any state securities commission determined that this prospectus supplement or the accompanying prospectus is accurate or complete. Any representation to the contrary is a criminal offense.

	Price to Public(1)	Underwriting Discount	Proceeds, Before Expenses, to Us(1)
Per Bond	99.133%	0.875%	98.258%
Total	$495,665,000	$ 4,375,000	$ 491,290,000

(1) Plus accrued interest, if any, from August 11, 2025.

The underwriters expect to deliver the Bonds to the purchasers in book-entry form through the facilities of The Depository Trust Company and for the accounts of its participants, including Clearstream Banking S.A., and Euroclear SA/NV, as operator of the Euroclear System, on or about August 11, 2025.

ABOUT THIS PROSPECTUS SUPPLEMENT

This prospectus supplement is part of a registration statement that PPL Electric has filed with the Securities and Exchange Commission, or SEC, utilizing the "shelf" registration process. Under the shelf process, we are offering to sell the Bonds by means of this prospectus supplement and the accompanying prospectus. This prospectus supplement describes the specific terms of this offering. The accompanying prospectus and the information incorporated by reference therein describe our business and give more general information, some of which may not apply to this offering. Generally, when we refer only to the "prospectus," we are referring to both parts combined. You should read this prospectus supplement together with the accompanying prospectus before making a decision to invest in the Bonds. If the information in this prospectus supplement or the information incorporated by reference in this prospectus supplement is inconsistent with the accompanying prospectus, the information in this prospectus supplement or the information incorporated by reference in this prospectus supplement will apply and supersede the information in the accompanying prospectus.

Certain affiliates of PPL Electric, including PPL Corporation and certain of its other subsidiaries, have also registered their securities on the "shelf" registration statement referred to above. However, the Bonds are solely obligations of PPL Electric, and not of PPL Corporation or any of PPL Corporation's other subsidiaries. None of PPL Corporation, or its other subsidiaries, or any of PPL Electric's subsidiaries or other affiliates will guarantee or provide any credit support for the Bonds.

WHERE YOU CAN FIND MORE INFORMATION

Available Information

PPL Electric files reports and other information with the SEC. You may obtain copies of this information at the SEC's Web site (www.sec.gov).

PPL Electric's Internet Web site is at www.pplelectric.com. Our parent, PPL Corporation, maintains an Internet Web site at www.pplweb.com. On the Investors page of that Web site, PPL Corporation provides access to SEC filings of PPL Electric free of charge, as soon as reasonably practicable after filing with the SEC. Neither the information at PPL Electric's Web site nor the information at PPL Corporation's Web site is incorporated in this prospectus supplement by reference, and you should not consider it a part of this prospectus supplement.

PPL Electric's corporate offices are at 827 Hausman Road, Allentown, Pennsylvania 18104-9392. Reports and other information concerning PPL Electric also can be inspected at the offices of PPL Services Corporation at 645 Hamilton Street, Allentown, Pennsylvania 18101.

Incorporation by Reference

PPL Electric will "incorporate by reference" information into this prospectus supplement by disclosing important information to you by referring you to other documents that it files separately with the SEC. The information incorporated by reference is deemed to be part of this prospectus supplement, and later information that we file with the SEC will automatically update and supersede that information. This prospectus supplement incorporates by reference the document set forth below that have been previously filed with the SEC. These documents contain important information about PPL Electric.

SEC Filings	Period/Date
Annual Report on Form 10-K	Year ended December 31, 2024
Quarterly Reports on Form 10-Q	Quarters ended March 31, 2025 and June 30, 2025
Current Report on Form 8-K	January 2, 2025

Table of Contents

Additional documents that PPL Electric files with the SEC pursuant to Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), between the date of this prospectus supplement and the termination of the offering of the Bonds are also incorporated herein by reference.

PPL Electric will provide without charge to each person, including any beneficial owner, to whom a copy of this prospectus supplement has been delivered, a copy of any and all of its filings with the SEC. You may request a copy of these filings by writing or telephoning PPL Electric at: PPL Electric Utilities Corporation, c/o PPL Services Corporation, 645 Hamilton Street, Allentown, Pennsylvania 18101, Attention: Treasury Department, Telephone: (610) 774-5151.

Table of Contents

SUMMARY

The following summary contains information about the offering by PPL Electric of its Bonds. It does not contain all of the information that may be important to you in making a decision to purchase the Bonds. For a more complete understanding of PPL Electric and the offering of the Bonds, we urge you to read carefully this entire prospectus supplement, the accompanying prospectus and the documents incorporated by reference herein, including the "Risk Factors" sections and our financial statements and the notes to those statements.

PPL Electric Utilities Corporation

PPL Electric, headquartered in Allentown, Pennsylvania, is a wholly-owned subsidiary of PPL Corporation and a regulated public utility that is an electricity transmission and distribution service provider in eastern and central Pennsylvania. PPL Electric is subject to regulation as a public utility by the Pennsylvania Public Utility Commission, and certain of its transmission activities are subject to the jurisdiction of the Federal Energy Regulatory Commission under the Federal Power Act. PPL Electric delivers electricity in its Pennsylvania service area and provides electricity supply to retail customers in that area as a provider of last resort under the Pennsylvania Electricity Generation Customer Choice and Competition Act.

The Offering

Issuer	PPL Electric Utilities Corporation
Securities Offered	$500,000,000 aggregate principal amount of PPL Electric's First Mortgage Bonds, 5.55% Series due 2055 ("Bonds")
Stated Maturity Date	August 15, 2055
Interest Payment Dates	Interest on the Bonds will be payable semi-annually in arrears on February 15 and August 15 of each year, commencing on February 15, 2026
Interest Rate	5.55% per annum
Redemption	The Bonds may be redeemed at our option, in whole at any time or in part from time to time, at the applicable redemption prices set forth in this prospectus supplement. The Bonds will not be entitled to the benefit of any sinking fund or other mandatory redemption and will not be repayable at the option of the Holder of a Bond prior to the Stated Maturity Date. See "Description of the Bonds—Redemption."
Ranking; Security	The Bonds will be secured by a lien on substantially all of our electricity distribution properties and certain of our electricity transmission properties, subject to certain exceptions and exclusions, as described in this prospectus supplement. See "Description of the Bonds—General" and "Description of the Bonds—Security; Lien of the Mortgage."
Listing	We do not intend to apply to list the Bonds on any securities exchange.

Table of Contents

Form and Denomination	The Bonds will initially be issued in the form of one or more global securities, without coupons, in minimum denominations of $2,000 and integral multiples of $1,000 in excess thereof, and deposited with the Trustee (as hereinafter defined) on behalf of The Depository Trust Company ("DTC"), as depository, and registered in the name of DTC or its nominee. See "Description of the Bonds—General" and "Description of the Bonds—Book-Entry Only Issuance—The Depository Trust Company."
Use of Proceeds	We intend to use the net proceeds of this offering to repay debt and for general corporate purposes. See "Use of Proceeds."
Conflicts of Interest	Certain of the underwriters or their affiliates may hold a portion of the debt that we intend to repay using the net proceeds of this offering. In such event, it is possible that one or more of the underwriters or their affiliates could receive more than 5% of the net proceeds of the offering, and in that case such underwriter could be deemed to have a conflict of interest under FINRA Rule 5121. In the event of any such conflict of interest, such underwriter would be required to conduct the distribution of Bonds in accordance with FINRA Rule 5121. If the distribution is conducted in accordance with FINRA Rule 5121, such underwriter would not be permitted to confirm a sale to an account over which it exercises discretionary authority without first receiving specific written approval from the account holder. See "Underwriting (Conflicts of Interest)—Conflicts of Interest" herein.
Reopening of the Series	We may, without the consent of the Holders of the Bonds, increase the principal amount of the series of Bonds and issue additional bonds of such series having the same ranking, interest rate, maturity and other terms as the Bonds, other than the date of initial issuance, the price to public, and, in some circumstances, the initial interest accrual date and the initial interest payment date. Any such additional bonds may, together with the Bonds, constitute a single series of securities under the Mortgage (as hereinafter defined). See "Description of the Bonds—General."
Governing Law	The Bonds and the Mortgage are governed by the laws of the State of New York, except to the extent the Trust Indenture Act of 1939, as amended (the "Trust Indenture Act"), is applicable and except where otherwise required by law. The effectiveness of the lien of the Mortgage, and the perfection and priority thereof, will be governed by Pennsylvania law.

Table of Contents

RISK FACTORS

Before making a decision to invest in the Bonds, you should carefully consider the risk factors described below, the risk factors described on page 2 of the accompanying prospectus, and the risk factors set forth in our Annual Report on Form 10-K for the year ended December 31, 2024, beginning on page 17, as well as the other information included in this prospectus supplement, the accompanying prospectus and the documents incorporated by reference in this prospectus supplement and the accompanying prospectus.

Risks Relating to the Bonds

Our credit ratings and ratings on the Bonds may not reflect all risks of your investment in the Bonds.

Our credit ratings are an assessment by rating agencies of our ability to pay our debts when due. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of the Bonds. These credit ratings may not reflect the potential impact of risks relating to the terms or market for the Bonds. Agency ratings are not a recommendation to buy, sell or hold any security, and may be revised or withdrawn at any time by the issuing organization. Each agency's rating should be evaluated independently of any other agency's rating.

An active trading market for the Bonds may not develop.

The Bonds are a new issue of securities with no established trading market and we do not intend to apply for listing of the Bonds on any securities exchange. We cannot assure that an active trading market for the Bonds will develop. There can be no assurances as to the liquidity of any market that may develop for the Bonds, the ability of Holders to sell their Bonds or the price at which the Holders will be able to sell their Bonds. Future trading prices of the Bonds will depend on many factors including, among other things, prevailing interest rates, our operating results and the market for similar securities.

Table of Contents

USE OF PROCEEDS

We intend to use the net proceeds of this offering to repay short-term debt, which was incurred primarily for capital expenditures, and for general corporate purposes. At June 30, 2025, we had $385 million of outstanding short-term debt, including commercial paper borrowings, bearing interest at a weighted average interest rate of 4.63%.

CAPITALIZATION

The following table sets forth our consolidated capitalization as of June 30, 2025 on an actual basis, and on an as adjusted basis to give effect to the issuance of the Bonds in this offering. This table should be read in conjunction with our consolidated financial statements, the notes related thereto and the financial and operating data incorporated by reference into this prospectus supplement and the accompanying prospectus.

	As of June 30, 2025	
	Actual	As Adjusted
	(In millions)	
Long-term debt (including current portion)	$ 5,215	$ 5,215
Bonds offered hereby	—	500
Total long-term debt (including current portion)	5,215	5,715
Total equity	6,746	6,746
Total capitalization	$11,961	$ 12,461

Table of Contents

DESCRIPTION OF THE BONDS

The following summary description sets forth certain terms and provisions of the Bonds that we are offering by this prospectus supplement. Because this description is a summary, it does not describe every aspect of the Bonds or the Mortgage under which the Bonds will be issued, as described below. The Mortgage is filed as an exhibit to the registration statement of which the accompanying prospectus is a part. The Mortgage and its associated documents contain the full legal text of the matters described in this section. This summary is subject to and qualified in its entirety by reference to all of the provisions of the Bonds and the Mortgage, including definitions of certain terms used in the Mortgage. We also include references in parentheses to certain sections of the Mortgage. Whenever we refer to particular sections or defined terms of the Mortgage in this prospectus supplement, such sections or defined terms are incorporated by reference herein. The Mortgage has been qualified under the Trust Indenture Act, and you should refer to the Trust Indenture Act for provisions that apply to the Bonds.

General

We will issue the Bonds as a series of debt securities under our Indenture, dated as of August 1, 2001 (as such indenture has been and may be amended and supplemented from time to time, the "Mortgage"), with The Bank of New York Mellon, as successor trustee (the "Trustee"). The Mortgage does not limit the aggregate principal amount of bonds or other debt securities that may be issued thereunder, subject to meeting certain conditions to issuance, including those described below under "—Issuance of Additional Mortgage Securities." The Bonds and all other debt securities issued previously or hereafter under the Mortgage are collectively referred to herein as "Mortgage Securities." The Mortgage constitutes a first mortgage lien, subject to Permitted Liens and exceptions and exclusions as described below and in the accompanying prospectus, on substantially all of our tangible electricity distribution properties and certain of our electricity transmission properties located in Pennsylvania. (See "—Security; Lien of the Mortgage —Class A Bonds" below.) As of the date of this prospectus supplement, approximately $5.3 billion of bonds are issued and outstanding under the Mortgage.

The Bonds will be issued in fully registered form only, without coupons. The Bonds initially will be represented by one or more fully registered global securities (the "Global Securities") deposited with the Trustee, as custodian for DTC, as depository, and registered in the name of DTC or DTC's nominee. A beneficial interest in a Global Security will be shown on, and transfers or exchanges thereof will be effected only through, records maintained by DTC and its participants, as described below under "—Book-Entry Only Issuance—The Depository Trust Company." The authorized denominations of the Bonds will be $2,000 and any larger amount that is an integral multiple of $1,000. Except in limited circumstances described below, the Bonds will not be exchangeable for Bonds in definitive certificated form.

The Bonds are initially being offered in one series in the principal amount of $500,000,000. We may, without the consent of the Holders of the Bonds, increase the principal amount of the series of Bonds and issue additional bonds of such series having the same ranking, interest rate, maturity and other terms (other than the date of initial issuance, the price to public and, in some circumstances, the initial interest accrual date and initial interest payment date) as the Bonds, but we will not reopen a series unless the additional bonds are fungible with previously issued bonds for U.S. federal income tax purposes or such additional bonds are issued with a separate CUSIP number. Any such additional bonds may, together with the Bonds, constitute a single series of securities under the Mortgage and may be treated as a single class for all purposes under the Mortgage, including, without limitation, voting waivers and amendments.

Maturity; Interest

The Bonds will mature on August 15, 2055 (the "Stated Maturity Date") and will bear interest from August 11, 2025 at a rate of 5.55% per annum. Interest on the Bonds will be payable semi-annually in arrears on February 15 and August 15 of each year (each, an "Interest Payment Date"), commencing on February 15, 2026, and at maturity (whether at the Stated Maturity Date, upon redemption, or otherwise, "Maturity").

Table of Contents

Subject to certain exceptions, the Mortgage provides for the payment of interest on an Interest Payment Date only to persons in whose names the Bonds are registered at the close of business on the Regular Record Date, which will be (a) the February 1 or August 1 (whether or not a Business Day), as the case may be, immediately preceding the applicable Interest Payment Date, or (b) so long as the Bonds are global bonds in book-entry form as described below, on the Business Day immediately preceding such Interest Payment Date; except that interest payable at Maturity will be paid to the person to whom principal is paid.

Interest on the Bonds will be calculated on the basis of a 360-day year consisting of twelve 30-day months, and with respect to any period less than a full calendar month, on the basis of the actual number of days elapsed during the period.

Payment

So long as the Bonds are registered in the name of DTC, as depository for the Bonds as described herein under "—Book-Entry Only Issuance—The Depository Trust Company" or DTC's nominee, payments on the Bonds will be made as described therein.

If we default in paying interest on a Bond, we will pay such defaulted interest either:

- to Holders as of a special record date between 10 and 15 days before the proposed payment; or
- in any other lawful manner of payment that is consistent with the requirements of any securities exchange on which the Bonds may be listed for trading. (See Section 307.)

We will pay principal of and interest and premium, if any, on the Bonds at Maturity upon presentation of the Bonds at the corporate trust office of The Bank of New York Mellon in New York, New York, as our Paying Agent. In our discretion, we may change the place of payment on the Bonds, and we may remove any Paying Agent and may appoint one or more additional Paying Agents (including us or any of our affiliates). (See Section 702.)

If any Interest Payment Date, Redemption Date (as defined below) or Maturity of a Bond falls on a day that is not a Business Day, the required payment of principal, premium, if any, and/or interest will be made on the next succeeding Business Day as if made on the date such payment was due, and no interest will accrue on such payment for the period from and after such Interest Payment Date, Redemption Date or Maturity, as the case may be, to the date of such payment on the next succeeding Business Day.

"Business Day" means any day, other than a Saturday or Sunday, that is not a day on which banking institutions or trust companies in The City of New York, New York, or other city in which a paying agent for such Bond is located, are generally authorized or required by law, regulation or executive order to remain closed. (See Section 116.)

"Redemption Date", when used with respect to a Bond to be redeemed, means the date fixed for such redemption by or pursuant to the Mortgage. (See Section 101.)

Form; Transfers; Exchanges

You may have your Bonds divided into Bonds of smaller denominations (of at least $2,000 and any larger amount that is an integral multiple of $1,000) or combined into Bonds of larger denominations, as long as the total principal amount is not changed. This is called an "exchange." (See Section 305.)

So long as the Bonds are registered in the name of DTC, as depository for the Bonds as described herein under "—Book-Entry Only Issuance—The Depository Trust Company," or DTC's nominee, transfers and exchanges of beneficial interest in the Bonds will be made as described therein. In the event that the book-entry

Table of Contents

only system is discontinued and the Bonds are issued in certificated form, you may exchange or transfer Bonds at the corporate trust office of the Trustee. The Trustee acts as our agent for registering Bonds in the names of Holders and transferring debt securities. We may appoint another agent (including one of our affiliates) or act as our own agent for this purpose. The entity performing the role of maintaining the list of registered Holders is called the "Security Registrar." It will also perform transfers. In our discretion, we may change the place for registration of transfer of the Bonds and may designate a different entity as the Security Registrar, including us or one of our affiliates. (See Sections 305 and 702.)

There will be no service charge for any transfer or exchange of the Bonds, but you may be required to pay a sum sufficient to cover any tax or other governmental charge payable in connection therewith. We may block the transfer or exchange of (1) Bonds during a period of 15 days prior to giving any notice of redemption or (2) any Bond selected for redemption in whole or in part, except the unredeemed portion of any Bond being redeemed in part. (See Section 305.)

Redemption

We may, at our option, redeem the Bonds, in whole at any time or in part from time to time. If we redeem the Bonds before the Par Call Date (as defined below), the Bonds will be redeemed by us at a redemption price (expressed as a percentage of principal amount and rounded to three decimal places) equal to the greater of:

- (a) the sum of the present values of the remaining scheduled payments of principal and interest thereon discounted to the Redemption Date (assuming the Bonds matured on the Par Call Date) on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 12.5 basis points less (b) interest accrued to the date of redemption, and
- 100% of the principal amount of the Bonds to be redeemed,

plus, in either case, accrued and unpaid interest on the principal amount of Bonds to be so redeemed to the Redemption Date.

If we redeem the Bonds on or after the Par Call Date, the Bonds will be redeemed by us at a redemption price equal to 100% of the principal amount of the Bonds to be so redeemed, plus accrued and unpaid interest on the principal amount of the Bonds to be so redeemed to the Redemption Date.

"*Par Call Date*" means February 15, 2055 (the date that is six months prior to the Stated Maturity Date).

"Treasury Rate" means, with respect to any Redemption Date, the yield determined by the Company in accordance with the following two paragraphs.

The Treasury Rate will be determined by the Company after 4:15 p.m., New York City time (or after such time as yields on U.S. government securities are posted daily by the Board of Governors of the Federal Reserve System), on the third business day preceding the Redemption Date based upon the yield or yields for the most recent day that appear after such time on such day in the most recent statistical release published by the Board of Governors of the Federal Reserve System designated as "Selected Interest Rates (Daily) — H.15" (or any successor designation or publication) ("H.15") under the caption "U.S. government securities–Treasury constant maturities–Nominal" (or any successor caption or heading) ("H.15 TCM"). In determining the Treasury Rate, the Company shall select, as applicable:

(1) the yield for the Treasury constant maturity on H.15 exactly equal to the period from the Redemption Date to the Par Call Date (the "Remaining Life"); or

(2) if there is no such Treasury constant maturity on H.15 exactly equal to the Remaining Life, the two yields — one yield corresponding to the Treasury constant maturity on H.15 immediately shorter than and one yield corresponding to the Treasury constant maturity on H.15 immediately longer than the

Table of Contents

Remaining Life — and shall interpolate to the Par Call Date on a straight-line basis (using the actual number of days) using such yields and rounding the result to three decimal places; or

(3) if there is no such Treasury constant maturity on H.15 shorter than or longer than the Remaining Life, the yield for the single Treasury constant maturity on H.15 closest to the Remaining Life.

For purposes of this paragraph, the applicable Treasury constant maturity or maturities on H.15 shall be deemed to have a maturity date equal to the relevant number of months or years, as applicable, of such Treasury constant maturity from the Redemption Date.

If on the third business day preceding the Redemption Date H.15 TCM is no longer published, the Company shall calculate the Treasury Rate based on the rate per annum equal to the semi-annual equivalent yield to maturity at 11:00 a.m., New York City time, on the second business day preceding such Redemption Date of the United States Treasury security maturing on, or with a maturity that is closest to, the Par Call Date, as applicable. If there is no United States Treasury security maturing on the Par Call Date but there are two or more United States Treasury securities with a maturity date equally distant from the Par Call Date, one with a maturity date preceding the Par Call Date and one with a maturity date following the Par Call Date, the Company shall select the United States Treasury security with a maturity date preceding the Par Call Date. If there are two or more United States Treasury securities maturing on the Par Call Date or two or more United States Treasury securities meeting the criteria of the preceding sentence, the Company shall select from among these two or more United States Treasury securities the United States Treasury security that is trading closest to par based upon the average of the bid and asked prices for such United States Treasury securities at 11:00 a.m., New York City time. In determining the Treasury Rate in accordance with the terms of this paragraph, the semi-annual yield to maturity of the applicable United States Treasury security shall be based upon the average of the bid and asked prices (expressed as a percentage of principal amount) at 11:00 a.m., New York City time, of such United States Treasury security, and rounded to three decimal places.

The Company's actions and determinations in determining the redemption price shall be conclusive and binding for all purposes, absent manifest error. The Trustee shall not be responsible to determine, calculate or verify the redemption price or any component thereof.

The Bonds will not be subject to a sinking fund or other mandatory redemption provisions and will not be repayable at the option of the Holder prior to the Stated Maturity Date.

The Bonds will be redeemable upon notice by mail between 10 days and 60 days prior to the Redemption Date.

If less than all of the Bonds are to be redeemed, in the case of certificated Bonds, the Trustee will select the Bonds, or portions thereof, to be redeemed, and in the case of global Bonds, DTC will select the Bonds or portions thereof to be redeemed in accordance with its customary policies and procedures. In the absence of any provision for selection, the Trustee will choose a method of random selection that it deems fair and appropriate. (See Sections 503 and 504.)

Bonds called for redemption will cease to bear interest on the Redemption Date. We will pay the redemption price and any accrued interest once you surrender the Bond for redemption. (See Section 505.) If only part of a Bond is redeemed, the Trustee will deliver to you a new Bond of the same series for the remaining portion without charge. (See Section 506.)

We may make any redemption at our option conditional upon the receipt by the Paying Agent, on or prior to the date fixed for redemption, of money sufficient to pay the redemption price. If the Paying Agent has not received such money by the date fixed for redemption, we will not be required to redeem such Bonds. (See Section 504.)

Table of Contents

Security; Lien of the Mortgage

Except as described below under this heading and under "—Issuance of Additional Mortgage Securities," and subject to the exceptions described under "—Satisfaction and Discharge," all Mortgage Securities, including the Bonds, will be secured, equally and ratably, by:

- the lien of the Mortgage, which constitutes, subject to Permitted Liens and certain exceptions and exclusions, a first mortgage lien on substantially all of our tangible electricity distribution properties and certain of our electricity transmission properties located in Pennsylvania. We sometimes refer to our property that is subject to the lien of the Mortgage as "Mortgaged Property;" and
- any Class A Bonds, as described below, delivered to the Trustee.

The Mortgage creates a lien on substantially all tangible properties of PPL Electric in Pennsylvania used in the distribution and transmission of electricity, other than property duly released from the lien thereof in accordance with the provisions of the Mortgage and certain other excepted property, and subject to certain Permitted Liens and excepted encumbrances, as described below. We sometimes refer to PPL Electric's distribution and transmission properties of the type subject to the lien of the Mortgage, exclusive of the Excepted Property described below, as "Electric Utility Property."

We may obtain the release of property from the lien of the Mortgage from time to time, upon the bases provided for such release in the Mortgage. See "—Release of Property."

Federal regulatory initiatives have from time to time encouraged separate ownership of transmission assets and provided economic incentives for divestiture of transmission assets. As a result, we have from time to time released certain portions of our transmission properties from the lien of the Mortgage upon the permitted bases as provided in the Mortgage. Since 2003, we have obtained the release from the lien of the Mortgage of transmission property having an aggregate fair value (at or near the time of release) of approximately $500 million.

Permitted Liens. The lien of the Mortgage is subject to Permitted Liens described in the Mortgage. Such Permitted Liens include liens existing at the execution date of the Mortgage; liens on property at the time we acquire such property; tax liens and other governmental charges which are not delinquent or which are being contested in good faith; mechanics', construction and materialmen's liens; certain judgment liens; easements, reservations and rights of others (including governmental entities) in our property and defects, irregularities, exceptions and limitations of title in our property; certain leases and leasehold interests; liens to secure public obligations; rights of others to take minerals, timber, electric energy or capacity, gas, water, steam or other products produced or otherwise acquired by us or by others on our property; rights and interests of Persons other than us arising out of agreements relating to the common ownership or joint use of property, and liens on the interests of such Persons in such property; liens which have been bonded or for which other security arrangements have been made; liens created in connection with the issuance of tax-exempt debt securities, Purchase Money Liens and liens related to the construction or acquisition of property, or the development or expansion of property; liens which secure specified Mortgage Securities equally and ratably with other obligations, and additional liens on any of our property (other than Excepted Property, as described below) to secure debt for borrowed money in an aggregate principal amount not exceeding 10% of the total assets of PPL Electric and its consolidated subsidiaries, as shown on the latest audited balance sheet of PPL Electric and such subsidiaries. (See Granting Clauses and Sections 101 and 707.)

The Mortgage also provides that the Trustee will have a lien, prior to the lien on behalf of the Holders of the Mortgage Securities, upon the Mortgaged Property as security for our payment of its reasonable compensation and expenses and for indemnity against certain liabilities. (See Section 1007.) Any such lien would be a Permitted Lien under the Mortgage.

Excepted Property. The lien of the Mortgage does not cover, among other things, the following types of property: property located outside of Pennsylvania; property not used by us in our electricity transmission and

Table of Contents

distribution business; cash and securities not paid, deposited or held under the Mortgage; contracts, leases and other agreements of all kinds; contract rights, bills, notes and other instruments, revenues, accounts receivable, claims, demands and judgments; governmental and other licenses, permits, franchises, consents and allowances; intellectual property rights and other general intangibles; vehicles, movable equipment, aircraft and vessels; all goods, stock in trade, wares, merchandise and inventory held for the purpose of sale or lease in the ordinary course of business; materials, supplies, inventory and other personal property consumable in the operation of the Mortgaged Property; fuel; hand and other portable tools and equipment; furniture and furnishings; computers and data processing, telecommunications and other facilities used primarily for administrative or clerical purposes or otherwise not necessary in connection with the operation or maintenance of electricity transmission and distribution facilities; coal, ore, gas, oil and other minerals and timber rights; electric energy and capacity, gas, steam, water and other products generated, produced, manufactured, purchased or otherwise acquired by us; real property and facilities used primarily for the production or gathering of natural gas; property which has been released from the lien of the Mortgage; and leasehold interests. We sometimes refer to property of PPL Electric not covered by the lien of the Mortgage as "Excepted Property." (See Granting Clauses.) Properties held by any of our subsidiaries, as well as properties leased from others, are not subject to the lien of the Mortgage.

We may enter into supplemental indentures with the Trustee, without the consent of the Holders, in order to subject additional property (including property that would otherwise be excepted from such lien) to the lien of the Mortgage. (See Section 1301.) This property would constitute Property Additions and would be available as a basis for the issuance of Mortgage Securities. See "—Issuance of Additional Mortgage Securities."

The Mortgage provides that after-acquired Electric Utility Property (other than Excepted Property) will be subject to the lien of the Mortgage. (See Granting Clause Second.) However, in the case of consolidation or merger (whether or not we are the surviving company) or transfer of the Mortgaged Property as or substantially as an entirety, the Mortgage will not be required to be a lien upon any of the properties either owned or subsequently acquired by the successor company except properties acquired from us in or as a result of such transfer, as well as improvements, extensions and additions (as defined in the Mortgage) to such properties and renewals, replacements and substitutions of or for any part or parts thereof. See Section 1203 and "—Consolidation, Merger and Conveyance of Assets as an Entirety."

Class A Bonds

As discussed below under "—Consolidation, Merger and Conveyance of Assets as an Entirety," we will be permitted to merge or consolidate with another company upon meeting specified requirements. Following merger or consolidation of another company into us, we could deliver to the Trustee bonds issued under an existing mortgage on the properties of such other company as the basis for issuing new Mortgage Securities. The term "Class A Mortgage" means a mortgage or deed of trust or similar indenture (i) entered into by another corporation with which we are so merged or consolidated or (ii) which constitutes a lien on property conveyed or otherwise transferred to us and the obligations have been assumed by us and, in the case of either (i) or (ii) above, is designated a "Class A Mortgage" in accordance with the Mortgage. The term "Class A Bonds" means bonds or other obligations now or hereafter issued and outstanding under any Class A Mortgage. In such event, the Mortgage Securities would be secured, additionally, by such Class A Bonds and by the lien of the Mortgage on the properties of such other company, which would be junior to the liens of such existing Class A Mortgages. (See Section 1706.)

Class A Bonds to be made the basis for the authentication and delivery of Mortgage Securities (a) will be delivered to, and registered in the name of, the Trustee or its nominee and will be owned and held by such trustee, subject to the provisions of the Mortgage, for the benefit of the Holders of all Mortgage Securities outstanding from time to time; (b) will mature or be subject to mandatory redemption on the same dates and in the same principal amounts, as such Mortgage Securities; and (c)(i) may, but need not, bear interest and (ii) may, but need not, contain provisions for redemption at our option, any such redemption to be made at a redemption price or prices not less than the principal amount of such Class A Bonds. (See Sections 1602 and 1701.) To the

Table of Contents

extent that Class A Bonds do not bear interest, Holders of Mortgage Securities will not have the benefit of the lien of a Class A Mortgage in respect of an amount equal to accrued interest, if any, on the Mortgage Securities; however, such Holders will nevertheless have the benefit of the lien of the Mortgage in respect of the amount of accrued interest.

Any payment by us of principal of or premium or interest on the Class A Bonds delivered to and held by the Trustee will be applied by the Trustee to the payment of any principal, premium or interest, as the case may be, in respect of the Mortgage Securities which is then due, and our obligation under the Mortgage to make such payment in respect of the Mortgage Securities will be deemed satisfied and discharged to the extent of such payment. If, at the time of any such payment of principal of Class A Bonds, there is no principal then due in respect of the Mortgage Securities, the proceeds of the payment will constitute Funded Cash and will be held by the Trustee as part of the Mortgaged Property, to be withdrawn, used or applied as provided in the Mortgage. If, at the time of any such payment of premium or interest on Class A Bonds, there is no premium or interest then due on the Mortgage Securities, the payment will be remitted to us at our request; provided, however, that if any Event of Default, as described below, has occurred and is continuing, the payment will be held as part of the Mortgaged Property until the Event of Default has been cured or waived. See Section 1702 and "—Withdrawal of Cash" below.

Any payment by us of principal of or interest or premium, if any, on Mortgage Securities authenticated and delivered on the basis of the delivery to the Trustee of Class A Bonds (other than by application of the proceeds of a payment in respect of such Class A Bonds) will, to the extent thereof, be deemed to satisfy and discharge our obligations, if any, to make a corresponding payment, in respect of such Class A Bonds which is then due. (See Section 1702.)

The Trustee may not sell, assign or otherwise transfer any Class A Bonds except to a successor trustee under the Mortgage. (See Section 1704.) At the time any Mortgage Securities which have been authenticated and delivered upon the basis of Class A Bonds cease to be outstanding (other than as a result of the application of the proceeds of the payment or redemption of such Class A Bonds), the Trustee will surrender to us, or upon our order, an equal principal amount of such Class A Bonds. (See Section 1703.)

When no Class A Bonds are outstanding under a Class A Mortgage except for Class A Bonds delivered to and held by the Trustee, then, at our request and subject to satisfaction of certain conditions, the Trustee will surrender such Class A Bonds for cancellation, the related Class A Mortgage will be satisfied and discharged, the lien of such Class A Mortgage on our property subject thereto will cease to exist and the priority of the lien of the Mortgage, as to such property, will be increased accordingly. (See Sections 1703 and 1707.) If no Class A Mortgages are in effect, the Mortgage will constitute a direct, first mortgage lien on the Company's Electric Utility Property, subject to certain Permitted Liens and certain other exclusions and exceptions as described above.

At the date of this prospectus supplement, there is no Class A Mortgage on any of our property and no Class A Bonds are held by the Trustee to secure Mortgage Securities.

Issuance of Additional Mortgage Securities

Subject to the issuance restrictions described below, the maximum principal amount of Mortgage Securities that may be authenticated and delivered under the Mortgage is unlimited. (See Section 301.) Mortgage Securities of any series may be issued from time to time on the basis of, and in an aggregate principal amount not exceeding:

- the aggregate principal amount of Class A Bonds delivered to the Trustee;
- $66^{2}/_{3}$% of the Cost or Fair Value to PPL Electric (whichever is less) of Property Additions (as described below) which do not constitute Funded Property (generally, Property Additions which have

Table of Contents

been made the basis of the authentication and delivery of Mortgage Securities, the release of Funded Property or the withdrawal of cash, which have been substituted for retired Funded Property or which have been used for other specified purposes) after certain deductions and additions, primarily including adjustments to offset property retirements;

- the aggregate principal amount of Retired Securities (as described below), but if Class A Bonds had been made the basis for the authentication and delivery of such Retired Securities, only after the discharge of the related Class A Mortgage; or
- an amount of cash deposited with the Trustee. (See Article Sixteen.)

Property Additions generally include any property which is owned by PPL Electric and is subject to the lien of the Mortgage. (See Section 104.)

Retired Securities means, generally, Mortgage Securities which are no longer outstanding under the Mortgage, have not been retired by the application of Funded Cash and have not been used as the basis for the authentication and delivery of Mortgage Securities, the release of property or the withdrawal of cash. (See Section 101.)

Bonds Issuable. We intend to issue the Bonds on the basis of Property Additions. At June 30, 2025, approximately $3.0 billion of Property Additions were available to be used as the basis for the authentication and delivery of Mortgage Securities; and, at that date, approximately $637 million of Retired Securities were available to be so used. (See Article Sixteen.)

Release of Property

Unless an Event of Default has occurred and is continuing, we may obtain the release from the lien of the Mortgage of any Mortgaged Property, except for Funded Cash held by the Trustee, upon delivery to the Trustee of an amount in cash equal to the amount, if any, by which $66^{2}/_{3}$% of the Cost of the property to be released (or, if less, the Fair Value to us of such property at the time it became Funded Property) exceeds the aggregate of:

- an amount equal to $66^{2}/_{3}$% of the aggregate principal amount of obligations secured by Purchase Money Liens upon the property to be released and delivered to the Trustee;
- an amount equal to $66^{2}/_{3}$% of the Cost or Fair Value to us (whichever is less) of certified Property Additions not constituting Funded Property after certain deductions and additions, primarily including adjustments to offset property retirements (except that such adjustments need not be made if such Property Additions were acquired or made within the 90-day period preceding the release);
- the aggregate principal amount of Mortgage Securities we would be entitled to issue on the basis of Retired Securities (with such entitlement being waived by operation of such release);
- the aggregate principal amount of Mortgage Securities delivered to the Trustee (with such Mortgage Securities to be canceled by the Trustee);
- any amount of cash and/or an amount equal to $66^{2}/_{3}$% of the aggregate principal amount of obligations secured by Purchase Money Liens upon the property released that is delivered to the trustee or other holder of a lien prior to the lien of the Mortgage, subject to certain limitations described in the Mortgage; and
- any taxes and expenses incidental to any sale, exchange, dedication or other disposition of the property to be released.

(See Section 1803.)

Property which is not Funded Property may generally be released from the lien of the Mortgage without depositing any cash or property with the Trustee as long as (a) the aggregate amount of Cost or Fair Value to us

Table of Contents

(whichever is less) of all Property Additions which do not constitute Funded Property (excluding the property to be released) after certain deductions and additions, primarily including adjustments to offset property retirements, is not less than zero or (b) the Cost or Fair Value (whichever is less) of property to be released does not exceed the aggregate amount of the Cost or Fair Value to us (whichever is less) of Property Additions acquired or made within the 90-day period preceding the release. (See Section 1804.)

The Mortgage provides simplified procedures for the release of property which has been released from the lien of a Class A Mortgage, minor properties and property taken by eminent domain, and provides for dispositions of certain obsolete property and grants or surrender of certain rights without any release or consent by the Trustee. (See Sections 1802, 1805, 1807 and 1808.)

If we retain any interest in any property released from the lien of the Mortgage, the Mortgage will not become a lien on such property or such interest therein or any improvements, extensions or additions to such property or renewals, replacements or substitutions of or for such property or any part or parts thereof. (See Section 1810.)

Withdrawal of Cash

Unless an Event of Default has occurred and is continuing, and subject to certain limitations, cash held by the Trustee may, generally, (1) be withdrawn by us (a) to the extent of $66^{2}/_{3}$% of the Cost or Fair Value to us (whichever is less) of Property Additions not constituting Funded Property, after certain deductions and additions, primarily including adjustments to offset retirements (except that such adjustments need not be made if such Property Additions were acquired or made within the 90-day period preceding the withdrawal) or (b) in an amount equal to the aggregate principal amount of Mortgage Securities that we would be entitled to issue on the basis of Retired Securities (with the entitlement to such issuance being waived by operation of such withdrawal) or (c) in an amount equal to the aggregate principal amount of any outstanding Mortgage Securities delivered to the Trustee; or (2) upon our request, be applied to (a) the purchase of Mortgage Securities in a manner and at a price approved by us or (b) the payment (or provision for payment) at stated maturity of any Mortgage Securities or the redemption (or provision for payment) of any Mortgage Securities which are redeemable (see Section 1806); provided, however, that cash deposited with the Trustee as the basis for the authentication and delivery of Mortgage Securities, as well as cash representing a payment of principal of Class A Bonds, may, in addition, be withdrawn in an amount not exceeding the aggregate principal amount of cash or Class A Bonds delivered to the Trustee, as the case may be, for such purpose. (See Sections 1605 and 1702.)

Events of Default

An “Event of Default” occurs under the Mortgage if:

- we do not pay any interest on a Mortgage Security within 30 days of the due date;
- we do not pay principal or premium, if any, on a Mortgage Security on its due date;
- we remain in breach of any other covenant under the Mortgage (excluding covenants specifically dealt with elsewhere in this section) for 90 days after we receive a written notice of such default from the Trustee or Holders of at least 25% in aggregate principal amount of outstanding Mortgage Securities stating we are in breach and requiring remedy of the breach; provided that the Trustee or such Holders can agree to extend the 90-day period and such an agreement to extend will be deemed to occur if we are diligently pursuing action to correct the default;
- we file for bankruptcy or certain other events in bankruptcy, insolvency, receivership or reorganization occur; or
- for so long as the Trustee holds any outstanding Class A Bonds that were delivered as the basis for the authentication and delivery of outstanding Mortgage Securities, the occurrence of a matured event of

Table of Contents

default under the related Class A Mortgage (other than any such matured event of default which (i) is not a failure to make payments on Class A Bonds and is not of similar kind or character to the Event of Default described in the immediately preceding bullet point above and (ii) has not resulted in the acceleration of the outstanding Class A Bonds outstanding under such Class A Mortgage); provided, however, that the waiver or cure of such event of default under the Class A Mortgage will constitute a waiver and cure of the corresponding Event of Default under the Mortgage, and the rescission and annulment of the consequences thereof will also constitute a rescission and annulment of the corresponding consequences under the Mortgage.

(See Section 901.)

Remedies

Acceleration

If an Event of Default occurs and is continuing, then either the Trustee or the Holders of not less than 25% in principal amount of the outstanding Mortgage Securities may declare the principal amount of all of the Mortgage Securities to be immediately due and payable. (See Section 902.)

Rescission of Acceleration

After the declaration of acceleration has been made but before any sale of any of the Mortgaged Property has been made and before the Trustee has obtained a judgment or decree for payment of the money due, such declaration and its consequences will be rescinded and annulled, if:

- we pay or deposit with the Trustee a sum sufficient to pay:
  - all overdue interest;
  - the principal of and premium, if any, which have become due otherwise than by such declaration of acceleration and interest thereon;
  - interest on overdue interest to the extent lawful; and
  - all amounts due to the Trustee under the Mortgage; and
- all Events of Default, other than the nonpayment of the principal which has become due solely by such declaration of acceleration, have been cured or waived as provided in the Mortgage.

(See Section 902.)

For more information as to waiver of defaults, see "—Waiver of Default and of Compliance" below.

Appointment of Receiver and Other Remedies

Subject to the Mortgage, under certain circumstances and to the extent permitted by law, if an Event of Default occurs and is continuing, the Trustee has the power to appoint a receiver of the Mortgaged Property, and is entitled to all other remedies available to mortgagees and secured parties under the Uniform Commercial Code or any other applicable law. (See Section 917.)

In addition to every other right and remedy provided in the Mortgage, the Trustee may exercise any right or remedy available to the Trustee in its capacity as owner and holder of Class A Bonds which arises as a result of a default or matured event of default under any Class A Mortgage, whether or not an Event of Default under the Mortgage has occurred and is continuing. (See Section 916.)

Table of Contents

Control by Holders; Limitations

Subject to the Mortgage, if an Event of Default occurs and is continuing, the Holders of a majority in principal amount of the outstanding Mortgage Securities will have the right to:

- direct the time, method and place of conducting any proceeding for any remedy available to the Trustee, or
- exercise any trust or power conferred on the Trustee with respect to the Mortgage Securities.

The rights of Holders to make direction are subject to the following limitations:

- the Holders' directions may not conflict with any law or the Mortgage; and
- the Holders' directions may not involve the Trustee in personal liability where the Trustee believes indemnity is not adequate.

The Trustee may also take any other action it deems proper which is not inconsistent with the Holders' direction. (See Sections 912 and 1003.)

In addition, the Mortgage provides that no Holder of any Mortgage Security will have any right to institute any proceeding, judicial or otherwise, with respect to the Mortgage, or for the appointment of a receiver or for any other remedy thereunder unless:

- that Holder has previously given the Trustee written notice of a continuing Event of Default;
- the Holders of 25% in aggregate principal amount of the outstanding Mortgage Securities have made written request to the Trustee to institute proceedings in respect of that Event of Default and have offered the Trustee reasonable indemnity against costs, expenses and liabilities incurred in complying with such request; and
- for 60 days after receipt of such notice, request and offer of indemnity, the Trustee has failed to institute any such proceeding and no direction inconsistent with such request has been given to the Trustee during such 60-day period by the Holders of a majority in aggregate principal amount of outstanding Mortgage Securities.

Furthermore, no Holder will be entitled to institute any such action if and to the extent that such action would disturb or prejudice the rights of other Holders. (See Sections 907 and 1003.)

However, each Holder has an absolute and unconditional right to receive payment when due and to bring a suit to enforce that right. (See Section 908.)

Notice of Default

The Trustee is required to give the Holders of the Mortgage Securities notice of any default under the Mortgage to the extent required by the Trust Indenture Act, unless such default has been cured or waived; except that in the case of an Event of Default of the character specified in the third bullet point under "—Events of Default" (regarding a breach of certain covenants continuing for 90 days after the receipt of a written notice of default), no such notice shall be given to such Holders until at least 60 days after the occurrence thereof. (See Section 1002.) The Trust Indenture Act currently permits the Trustee to withhold notices of default (except for certain payment defaults) if the Trustee in good faith determines the withholding of such notice is in the interests of the Holders.

We will furnish the Trustee with an annual statement as to our compliance with the conditions and covenants in the Mortgage. (See Section 705.)

Table of Contents

Waiver of Default and of Compliance

The Holders of a majority in aggregate principal amount of the outstanding Mortgage Securities may waive, on behalf of the Holders of all outstanding Mortgage Securities, any past default under the Mortgage, except a default in the payment of principal, premium, if any, or interest, or with respect to compliance with certain provisions of the Mortgage that cannot be amended without the consent of the Holder of each outstanding Mortgage Security affected. (See Section 913.)

Compliance with certain covenants in the Mortgage or otherwise provided with respect to Mortgage Securities may be waived by the Holders of a majority in aggregate principal amount of the affected Mortgage Securities, considered as one class. (See Section 706.)

Consolidation, Merger and Conveyance of Assets as an Entirety

Subject to the provisions described below, we have agreed to preserve our corporate existence. (See Section 704.)

We have agreed not to consolidate with or merge with or into any other entity or convey, transfer or lease our Electric Utility Property as or substantially as an entirety to any entity unless:

- the entity formed by such consolidation or into which we merge, or the entity which acquires or leases our Electric Utility Property substantially as an entirety, is an entity organized and existing under the laws of the United States of America or any State thereof or the District of Columbia, and
  - expressly assumes, by supplemental indenture, the due and punctual payment of the principal of, and premium, if any, and interest on, all the outstanding Mortgage Securities and the performance of all of our covenants under the Mortgage, and
  - confirms the lien of the Mortgage on the Mortgaged Property;
- in the case of a lease, such lease is made expressly subject to termination by (i) us or by the Trustee, and (ii) the purchaser of the property so leased at any sale thereof, at any time during the continuance of an Event of Default; and
- immediately after giving effect to such transaction, no Event of Default, and no event which after notice or lapse of time or both would become an Event of Default, will have occurred and be continuing.

(See Section 1201.)

In the case of the conveyance or other transfer of the Electric Utility Property as or substantially as an entirety to any other person, upon the satisfaction of all the conditions described above we would be released and discharged from all obligations under the Mortgage and on the Mortgage Securities then outstanding unless we elect to waive such release and discharge. (See Section 1204.)

The Mortgage does not prevent or restrict:

- any consolidation or merger after the consummation of which we would be the surviving or resulting entity;
- any conveyance or other transfer, or lease, of any part of our Electric Utility Property which does not constitute the entirety or substantially the entirety thereof; or
- any conveyance or transfer where we retain Electric Utility Property with a fair value in excess of the aggregate principal amount of all outstanding Mortgage Securities. This fair value will be determined within 90 days of the conveyance or transfer by an independent expert that we select and that is approved by the Trustee.

Table of Contents

(See Sections 1205 and 1206.)

Modification of Mortgage

Without Holder Consent. Without the consent of any Holders of Mortgage Securities, we and the Trustee may enter into one or more supplemental indentures for any of the following purposes:

- to evidence the succession of another entity to us;
- to add one or more covenants or other provisions for the benefit of the Holders of all or any series or tranche of Mortgage Securities, or to surrender any right or power conferred upon us;
- to add any additional Events of Default with respect to all or any series of Mortgage Securities;
- to change or eliminate any provision of the Mortgage or to add any new provision to the Mortgage that does not adversely affect the interests of the Holders in any material respect;
- to provide additional security for any Mortgage Securities;
- to establish the form or terms of any series or tranche of Mortgage Securities;
- to provide for the issuance of bearer securities;
- to evidence and provide for the acceptance of appointment of a separate or successor Trustee;
- to provide for the procedures required to permit the utilization of a noncertificated system of registration for any series or tranche of Mortgage Securities;
- to change any place or places where:
  - we may pay principal, premium, if any, and interest on Mortgage Securities of any or all series,
  - Mortgage Securities may be surrendered for transfer or exchange, and
  - notices and demands to or upon us may be served;
- to amend and restate the Mortgage as originally executed, and as amended from time to time, with such additions, deletions and other changes that do not adversely affect the interest of the Holders in any material respect; or
- to cure any ambiguity, defect or inconsistency or to make any other changes that do not materially adversely affect the interests of the Holders in any material respect.

In addition, if the Trust Indenture Act is amended after the date of the Mortgage so as to require changes to the Mortgage or so as to permit changes to, or the elimination of, provisions which, at the date of the Mortgage or at any time thereafter, were required by the Trust Indenture Act to be contained in the Mortgage, the Mortgage will be deemed to have been amended so as to conform to such amendment or to effect such changes or elimination, and we and the Trustee may, without the consent of any Holders, enter into one or more supplemental indentures to effect or evidence such amendment.

(See Section 1301.)

With Holder Consent. Except as provided above, the consent of the Holders of at least a majority in aggregate principal amount of the Mortgage Securities of all outstanding series, considered as one class, is generally required to add to, change or eliminate any of the provisions of, the Mortgage pursuant to a supplemental indenture.

However, if less than all of the series of outstanding Mortgage Securities are directly affected by a proposed supplemental indenture, then such proposal only requires the consent of the Holders of a majority in aggregate principal amount of the outstanding Mortgage Securities of all directly affected series, considered as one class.

Table of Contents

Moreover, if the Mortgage Securities of any series have been issued in more than one tranche and if the proposed supplemental indenture directly affects the rights of the Holders of Mortgage Securities of one or more, but less than all, of such tranches, then such proposal requires the consent of only the Holders of a majority in aggregate principal amount of the outstanding Mortgage Securities of all directly affected tranches, considered as one class.

However, no amendment or modification may, without the consent of the Holder of each outstanding Mortgage Security directly affected thereby,

- change the stated maturity of the principal or interest on any Mortgage Security (other than pursuant to the terms thereof), or reduce the principal amount, interest or premium payable or change the currency in which any Mortgage Security is payable, or impair the right to bring suit to enforce any payment;
- create any lien ranking prior to the lien of the Mortgage with respect to all or substantially all of the Mortgaged Property, or terminate the lien of the Mortgage on all or substantially all of the Mortgaged Property (other than in accordance with the terms of the Mortgage), or deprive any Holder of the benefits of the security of the lien of the Mortgage; or
- reduce the percentages of Holders whose consent is required for any supplemental indenture or waiver of compliance with any provision of the Mortgage or of any default thereunder and its consequences, or reduce the requirements for quorum and voting under the Mortgage.

A supplemental indenture which changes, modifies or eliminates any provision of the Mortgage expressly included solely for the benefit of Holders of Mortgage Securities of one or more particular series or tranches will be deemed not to affect the rights under the Mortgage of the Holders of Mortgage Securities of any other series or tranche.

(See Section 1302.)

Miscellaneous Provisions

The Mortgage provides that certain Mortgage Securities, including those for which payment or redemption money has been deposited or set aside in trust as described under "—Satisfaction and Discharge" below, will not be deemed to be "outstanding" in determining whether the Holders of the requisite principal amount of the outstanding Mortgage Securities have given or taken any demand, direction, consent or other action under the Mortgage as of any date, or are present at a meeting of Holders for quorum purposes. (See Section 101.)

We will be entitled to set any day as a record date for the purpose of determining the Holders of outstanding Mortgage Securities of any series entitled to give or take any demand, direction, consent or other action under the Mortgage, in the manner and subject to the limitations provided in the Mortgage. In certain circumstances, the Trustee also will be entitled to set a record date for action by Holders. If such a record date is set for any action to be taken by Holders of particular Mortgage Securities, such action may be taken only by persons who are Holders of such Mortgage Securities on the record date. (See Section 107.)

Satisfaction and Discharge

Any Mortgage Securities or any portion of the principal amount thereof will be deemed to have been paid and no longer outstanding for purposes of the Mortgage and, at our election, our entire indebtedness with respect to those securities will be satisfied and discharged, if there shall have been irrevocably deposited with the Trustee or any Paying Agent (other than PPL Electric), in trust:

- money sufficient, or
- in the case of a deposit made prior to the maturity of such Mortgage Securities, non-redeemable Eligible Obligations (as defined in the Mortgage) sufficient, or

Table of Contents

- a combination of the items listed in the preceding two bullet points, which in total are sufficient,

to pay when due the principal of, and any premium, and interest due and to become due on such Mortgage Securities or portions of such Mortgage Securities on and prior to their maturity.

(See Section 801.)

The Mortgage will be deemed satisfied and discharged when no Mortgage Securities remain outstanding and when we have paid all other sums payable by us under the Mortgage. (See Section 802.)

All moneys we pay to the Trustee or any Paying Agent on Bonds that remain unclaimed at the end of two years after payments have become due may be paid to us upon our request. Thereafter, the Holder of any such Bond may look only to us for payment. (See Section 703.)

Voting of Class A Bonds

The Mortgage provides that the Trustee will, as holder of Class A Bonds delivered as the basis for the issuance of Mortgage Securities, attend such meetings of bondholders under the related Class A Mortgages, or deliver its proxy in connection therewith, as related to matters with respect to which it, as such holder, is entitled to vote or consent. The Mortgage provides that, so long as no Event of Default has occurred and is continuing at the time of such meeting or required consent, the Trustee will, as holder of such Class A Bonds,

- vote or consent (without any consent or other action by the holders of the Mortgage Securities, except as described in the proviso of the last bullet below) in favor of amendments or modifications to the Class A Mortgage of substantially the same tenor and effect as follows:
  - to delete any provisions in any Class A Mortgage limiting the payment of dividends or distributions on our common stock or purchases of common stock;
  - to delete any provisions in any Class A Mortgage that require a sale, exchange or other disposition, or an agreement to sell, exchange or dispose, of property to be released from the lien of a Class A Mortgage;
  - to modify any provisions in any Class A Mortgage that require insurance proceeds or other payments to be paid to the trustee under such Class A Mortgage in case of any loss so that such proceeds or payments need not be paid to such trustee with respect to any loss less than the greater of (A) $10,000,000 and (B) 3% of the sum of (1) the principal amount of Mortgage Securities outstanding on the date of such particular loss and (2) the principal amount of the Class A Bonds outstanding on the date of such particular loss, other than Class A Bonds delivered to and held by the Trustee under the Mortgage;
  - to modify certain net earnings test requirements of any Class A Mortgage to facilitate issuances of variable rate debt by providing for calculations of annual interest requirements to be based on average annual rates or the initial interest rate;
  - to delete any requirement in any Class A Mortgage of a net earnings test or net earnings certificate as a condition precedent to the issuance or authentication of Class A Bonds under such Class A Mortgage;
    - to modify any Class A Mortgage to provide that the term “corporation” as used in such Class A Mortgage shall mean “corporation, limited liability company, partnership, or trust or other legal entity” and to provide that any provision requiring us to maintain our “corporate existence” shall not be interpreted to prevent us from changing from a corporation, limited liability company, partnership, trust or other legal entity to a corporation, limited liability company, partnership, trust or other legal entity; and

Table of Contents

- to conform any provision of a Class A Mortgage in all material respects to the correlative provision of the Mortgage, to add to a Class A Mortgage any provision not otherwise contained therein which conforms in all material respects to a provision contained in the Mortgage, to delete from a Class A Mortgage any provision to which the Mortgage contains no correlative provision, and any combination of the foregoing; and

- with respect to any amendments or modifications to any Class A Mortgage other than those amendments or modifications referred to in each of the bullet points above, vote all such Class A Bonds delivered under such Class A Mortgage, or consent with respect thereto, proportionately with the vote or consent of the holders of all other Class A Bonds outstanding under such Class A Mortgage the holders of which are eligible to vote or consent, as evidenced by a certificate delivered by the trustee under such Class A Mortgage; provided, however, that the Trustee will not vote in favor of, or consent to, any amendment or modification of a Class A Mortgage which, if it were an amendment to or modification of the Mortgage, would require the consent of Holders of Mortgage Securities as described under "Modification of Mortgage—With Holder Consent" above, without the prior consent of Holders of Mortgage Securities which would be required for such an amendment or modification of the Mortgage. (See Section 1705.)

Resignation and Removal of the Trustee; Deemed Resignation

The Trustee may resign at any time by giving written notice to us.

The Trustee may also be removed by act of the Holders of a majority in principal amount of the then outstanding Mortgage Securities of any series.

No resignation or removal of the Trustee and no appointment of a successor trustee will become effective until the acceptance of appointment by a successor trustee in accordance with the requirements of the Mortgage.

Under certain circumstances, we may appoint a successor trustee and if the successor accepts, the Trustee will be deemed to have resigned.

(See Section 1010.)

Regarding the Trustee

In addition to acting as Trustee under the Mortgage, The Bank of New York Mellon and certain of its affiliates maintain banking and trust relationships with us and some of our affiliates. The Trust Indenture Act contains limitations on the rights of trustees under indentures and could require the Trustee, if it acquires any conflicting interests within the meaning of that Act, either to eliminate such conflicts upon the occurrence of an Event of Default under the Mortgage or resign.

Governing Law

The Mortgage and the Mortgage Securities provide that they are to be governed by and construed in accordance with the laws of the State of New York except where the Trust Indenture Act is applicable or where otherwise required by law. (See Section 115.) The effectiveness of the lien of the Mortgage, and the perfection and priority thereof, will be governed by Pennsylvania law.

Book-Entry Only Issuance—The Depository Trust Company

DTC will act as the initial securities depository for the Bonds. The Bonds will be issued as fully registered securities registered in the name of Cede & Co. (DTC's partnership nominee) or such other name as may be requested by an authorized representative of DTC. The global bonds will be deposited with the Trustee as custodian for DTC.

Table of Contents

DTC is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds securities for its participants ("Direct Participants") and also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts, thereby eliminating the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. DTC is a wholly owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants"). The rules that apply to DTC and those using its system are on file with the SEC. More information about DTC can be found at www.dtcc.com and www.dtc.org.

Purchases of the Bonds under the DTC system must be made by or through Direct Participants, which will receive a credit for the Bonds on DTC's records. The ownership interest of each actual purchaser ("Beneficial Owner") is in turn to be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchases, but Beneficial Owners should receive written confirmations providing details of the transactions, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which they purchased Bonds. Transfers of ownership interests on the Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in Bonds, except in the event that use of the book-entry system for the Bonds is discontinued.

To facilitate subsequent transfers, all Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co., or such other name as may be requested by an authorized representative of DTC. The deposit of the Bonds with DTC and their registration in the name of Cede & Co. or such other nominee do not effect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts the Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners, will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time. Notices will be sent to DTC.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the Bonds unless authorized by a Direct Participant in accordance with DTC's procedures. Under its usual procedures, DTC mails an omnibus proxy to us as soon as possible after the record date. The omnibus proxy assigns the voting or consenting rights of Cede & Co. to those Direct Participants to whose accounts the Bonds are credited on the record date. We believe that these arrangements will enable the beneficial owners to exercise rights equivalent in substance to the rights that can be directly exercised by a registered Holder of the Bonds.

Payments of principal and interest on the Bonds will be made to Cede & Co. (or such other nominee of DTC). DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from us or the Trustee, on the payable date in accordance with their respective holdings shown on DTC's records. Payments by participants to Beneficial Owners will be governed by standing instructions and customary practices and will be the responsibility of such participant and not of DTC, the Trustee or us, subject

Table of Contents

to any statutory or regulatory requirements as may be in effect from time to time. Payment of the Purchase Price, principal and interest to Cede & Co. (or such other nominee of DTC) is the responsibility of us or the Trustee.

Disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners is the responsibility of Direct and Indirect Participants.

Secondary market trading between Clearstream Banking, S.A. ("Clearstream") participants and/or Euroclear Bank SA/NV, as operator of the Euroclear System ("Euroclear") participants will occur in the ordinary way in accordance with the applicable rules and operating procedures of Clearstream and Euroclear, as applicable.

Cross-market transfers between participants in DTC, on the one hand, and participants in Euroclear or Clearstream, on the other hand, will be effected through DTC in accordance with the DTC's rules on behalf of Euroclear or Clearstream, as the case may be, by their respective U.S. depositaries; however, such cross-market transactions will require delivery of instructions to Euroclear or Clearstream, as the case may be, by the counterparty in such system in accordance with the rules and procedures and within the established deadlines (European time) of such system. Euroclear or Clearstream, as the case may be, will, if the transaction meets its settlement requirements, deliver instructions to its U.S. depository to take action to effect final settlement on its behalf by delivering or receiving interests in the global securities through DTC, and making or receiving payment in accordance with normal procedures for same-day fund settlement. Participants in Euroclear or Clearstream may not deliver instructions directly to their respective U.S. depositaries.

Due to time zone differences, the securities accounts of a participant in Euroclear or Clearstream purchasing an interest in a global security from a direct participant in DTC will be credited, and any such crediting will be reported to the relevant participant in Euroclear or Clearstream, during the securities settlement processing day (which must be a business day for Euroclear or Clearstream) immediately following the settlement date of DTC. Cash received in Euroclear or Clearstream as a result of sales of interests in a global security by or through a participant in Euroclear or Clearstream to a direct participant in DTC will be received with value on the settlement date of DTC but will be available in the relevant Euroclear or Clearstream cash account only as of the business day for Euroclear or Clearstream following DTC's settlement date.

A beneficial owner will not be entitled to receive physical delivery of the Bonds. Accordingly, each beneficial owner must rely on the procedures of DTC to exercise any rights under the Bonds.

DTC may discontinue providing its services as securities depository with respect to the Bonds at any time by giving us or the Trustee reasonable notice. In the event no successor securities depository is obtained, certificates for the Bonds will be printed and delivered.

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that we believe to be reliable, but neither we nor the underwriters take any responsibility for the accuracy of this information.

Table of Contents

MATERIAL U.S. FEDERAL INCOME TAX CONSEQUENCES

The following discussion is a general summary of the material U.S. federal income tax consequences of the purchase, ownership and disposition of Bonds sold pursuant to this offering. This summary is based on the Internal Revenue Code of 1986, as amended (the "Code"), Treasury regulations promulgated thereunder, administrative positions of the Internal Revenue Service ("IRS") and judicial decisions now in effect, all of which are subject to change (possibly with retroactive effect) or to different interpretations. Additionally, this summary only addresses beneficial owners of Bonds that purchase the Bonds on original issuance in this offering at their "issue price" (i.e., the first price at which a substantial portion of the Bonds is sold for cash to persons other than bond houses, brokers or similar persons or organizations acting in the capacity of underwriters, placement agents or wholesalers), and that holds the Bonds as a "capital asset" within the meaning of Section 1221 of the Code (generally property held for investment).

This summary does not describe all of the U.S. federal income considerations that may be relevant to holders based on their particular circumstances (such as the potential application of the Medicare contribution tax on "net investment income" or the alternative minimum tax). This summary also does not address the U.S. federal income tax consequences to investors subject to special treatment under the U.S. federal income tax laws, including, for example, brokers and dealers in securities or foreign currency, traders who elect to mark the Bonds to market, partnerships (including entities or arrangements treated as partnerships for U.S. federal income tax purposes) or other pass-through entities, tax-exempt entities, banks and other financial institutions, insurance companies, regulated investment companies, real estate investment trusts, "controlled foreign corporations," "passive foreign investment companies," persons holding a Bond as part of a "straddle," "hedge," "conversion transaction" or other risk reduction transaction, persons subject to special rules applicable to former citizens and residents of the United States, persons subject to special tax accounting rules as a result of any item of gross income with respect to the Bonds being taken into account in an applicable financial statement or U.S. Holders (as defined below) that have a functional currency that is not the U.S. dollar or who hold Bonds through a non-U.S. broker or other non-U.S. intermediary. Finally, this summary does not address the application of state, local or foreign tax laws, or any aspect of U.S. federal tax law other than those pertaining to income taxation.

For purposes of this discussion, a "U.S. Holder" is a beneficial owner of a Bond that, for U.S. federal income tax purposes, is (i) a citizen or resident (as defined in Section 7701(b) of the Code) of the United States, (ii) a corporation (or an entity treated as a corporation) created or organized in the United States, any state therein or the District of Columbia, (iii) an estate the income of which is subject to U.S. federal income taxation regardless of source or (iv) a trust if a U.S. court is able to exercise primary supervision over the administration of the trust and one or more "United States persons" (within the meaning of Section 7701(a)(30) of the Code) have the authority to control all substantial decisions of the trust, or certain trusts which have a valid election in effect under applicable Treasury regulations to be treated as a United States person. Furthermore, a "Non-U.S. Holder" is a beneficial owner (other than a partnership or other entity or arrangement treated as a partnership for U.S. federal income tax purposes) of a Bond other than a U.S. Holder. If a partnership (or other entity or arrangement treated as a partnership for U.S. federal income tax purposes) holds our Bonds, the tax treatment of a partner in the partnership will generally depend upon the status of the partner and the activities of the partnership. Partnerships holding our Bonds and partners in such partnerships should consult their tax advisors.

We have not sought a ruling from the IRS with respect to the U.S. federal income tax consequences of the purchase, ownership or disposition of Bonds. There can be no assurance that the IRS will not challenge one or more of the conclusions described in this prospectus supplement. Prospective purchasers of the Bonds are advised to consult their tax advisors regarding the U.S. federal, state, local and foreign income and other tax consequences of the purchase, ownership and disposition of the Bonds.

Table of Contents

Effect of Certain Contingencies

In the circumstances described under "Description of the Bonds—Redemption" we may make payments on the Bonds in excess of stated interest and principal. This contingency implicates the provisions of the Treasury regulations relating to contingent payment debt instruments. Because the contingency is within our control, we intend to take the position that the possibility that any such payments will be made is remote and therefore the Bonds should not be treated as contingent payment debt instruments because of the possibility that these additional payments may be made. Our determination that these contingencies are remote is binding on a holder, unless the holder explicitly discloses a contrary treatment in the manner that is required by applicable Treasury regulations. Our determination is not, however, binding on the IRS. It is possible that the IRS might take and sustain a different position from that described above, in which case the timing, character and amount of taxable income in respect of the Bonds may be different from that described herein. Prospective holders are urged to consult their own tax advisors regarding the potential application to the Bonds of the contingent payment debt instrument rules and the consequences thereof. The remainder of this discussion assumes that the Bonds are not treated as contingent payment debt instruments.

U.S. Federal Income Tax Consequences for U.S. Holders

Interest

Generally, payments of stated interest on a Bond will be includible in a U.S. Holder's gross income and taxable as ordinary income for U.S. federal income tax purposes at the time such interest is received or accrued in accordance with the U.S. Holder's regular method of tax accounting. It is expected, and therefore this discussion assumes, that the Bonds will be issued with no more than a *de minimis* amount of original issue discount for U.S. federal income tax purposes.

Sale, Exchange, Retirement or Other Taxable Disposition of the Bonds

Upon a sale, exchange, retirement or other taxable disposition of a Bond, a U.S. Holder generally will recognize gain or loss equal to the difference between (i) the amount realized from such sale, exchange, retirement or other taxable disposition (less an amount equal to any accrued but unpaid interest, which will be taxable as interest income to the extent not previously included in gross income), and (ii) the U.S. Holder's tax basis in the Bond. A U.S. Holder's tax basis in a Bond generally will be the amount paid for such Bond. Any such gain or loss recognized by a U.S. Holder generally will be capital gain or loss and will be long term capital gain or loss if the Bond is held for more than one year. Long term capital gains of certain non-corporate U.S. Holders may be eligible for preferential tax rates. The deductibility of capital losses is subject to limitations under the Code. U.S. Holders are advised to consult their tax advisors regarding deductibility of capital losses in their particular situations.

Information Reporting and Backup Withholding

In general, information reporting requirements may apply to payments on a Bond and to the proceeds of the sale or other disposition of the Bond, unless the U.S. Holder is an exempt recipient and, if requested, establishes its status as an exempt recipient. Additionally, backup withholding, currently at a rate of 24%, may apply to such payments if a U.S. Holder (i) fails to provide a taxpayer identification number ("TIN") certified under penalties of perjury, (ii) furnishes an incorrect TIN, (iii) fails to properly report the receipt of interest or dividends or (iv) fails to certify that it is not subject to backup withholding. A U.S. Holder that does not provide us with its correct TIN also may be subject to penalties imposed by the IRS.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against a U.S. Holder's U.S. federal income tax liability provided the required information is timely furnished to the IRS.

Table of Contents

U.S. Federal Income Tax Consequences for Non-U.S. Holders

Interest

Subject to the discussions below under "—Information Reporting and Backup Withholding" and "—FATCA," payments of interest on the Bonds to a Non-U.S. Holder generally will not be subject to U.S. federal income or withholding tax under the "portfolio interest exemption," provided that:

- such interest is not effectively connected with such Non-U.S. Holder's conduct of a trade or business within the United States;
- the Non-U.S. Holder does not actually or constructively own 10% or more of the total combined voting power of all classes of our stock entitled to vote;
- the Non-U.S. Holder is not a "controlled foreign corporation" with respect to which we are a "related person" within the meaning of the Code;
- the Non-U.S. Holder is not a bank for U.S. federal income tax purposes whose receipt of interest is described in Section 881(c)(3)(A) of the Code; and
- the beneficial owner of the Bonds provides a properly completed and executed IRS Form W-8BEN or IRS Form W-8BEN-E, as applicable, (or successor form) certifying, under penalties of perjury, that it is not a United States person (within the meaning of Section 7701(a)(30) of the Code) and providing its name and address; or the Non-U.S. Holder holds the Bonds through certain foreign intermediaries and satisfies the certification requirements of applicable Treasury regulations.

For purposes of the discussion below, interest and gain on the sale, exchange, retirement or other disposition of the Bonds will be considered to be "U.S. trade or business income" if such income or gain is effectively connected with the conduct of a U.S. trade or business (and, if required by an applicable income tax treaty, attributable to a permanent establishment or fixed base within the United States). A Non-U.S. Holder that receives interest that is U.S. trade or business income generally will be taxed on a net income basis at regular graduated rates, in substantially the same manner as a U.S. Holder, but will be exempt from U.S. federal withholding tax as long as the Non-U.S. Holder provides us or another relevant withholding agent with the appropriate documentation (typically, a properly executed IRS Form W-8ECI (or applicable successor form)). In the case of a Non-U.S. Holder that is classified as a corporation, such U.S. trade or business income also may be subject to a branch profits tax of 30% (subject to reduction or elimination under an applicable income tax treaty).

The gross amount of payments of interest that do not qualify for the portfolio interest exemption, and that are not U.S. trade or business income, generally will be subject to U.S. federal withholding tax at a rate of 30% unless a tax treaty applies to reduce or eliminate withholding. To claim the benefits of a tax treaty, a Non-U.S. Holder must provide a properly executed IRS Form W-8BEN or IRS Form W-8BEN-E (or applicable successor form). A Non-U.S. Holder claiming the benefits of a tax treaty may be required to obtain a U.S. TIN and to provide certain documentary evidence issued by foreign governmental authorities to prove residence in the foreign country. Also, under Treasury regulations, special procedures are provided for payments through qualified intermediaries.

Sale, Exchange, Retirement or Other Taxable Disposition of the Bonds

Subject to the discussions below under "—Information Reporting and Backup Withholding" and "—FATCA," a Non-U.S. Holder generally will not be subject to U.S. federal income or withholding tax in respect of gain recognized on a sale, exchange, retirement or other taxable disposition of the Bonds (other than amounts attributable to accrued but unpaid interest, which will be treated in the manner described above under "—Non-U.S. Holders —Interest") unless:

- the gain is U.S. trade or business income (as defined above), in which case the Non-U.S. Holder generally will be subject to U.S. federal income tax on such gain on a net income basis at regular graduated rates, in substantially the same manner as a U.S. Holder (and a branch profits tax also may apply to a corporate Non-U.S. Holder); or

Table of Contents

- the Non-U.S. Holder is an individual who is present in the United States for 183 days or more in the taxable year of the disposition and meets certain other requirements (unless an applicable income tax treaty provides otherwise), in which case the gain generally will be taxable at a flat 30% rate (or a lower tax treaty rate, if available), subject to offset by certain U.S.-source capital losses.

Information Reporting and Backup Withholding

Information returns will be filed annually with the IRS in connection with payments that we make on the Bonds. Copies of these information returns also may be made available under the provisions of a specific tax treaty or other agreement to the tax authorities of the country in which the Non-U.S. Holder resides. Unless the Non-U.S. Holder complies with certification procedures to establish that it is not a United States person (as defined in the Code), information returns may be filed with the IRS in connection with the proceeds from a sale or other taxable disposition of a Bond, and the Non-U.S. Holder may be subject to backup withholding tax (currently at a rate of 24%) on payments on the Bonds or on the proceeds from a sale or other taxable disposition of the Bonds. The certification procedures required to claim the exemption from withholding tax on interest described above generally will satisfy the certification requirements necessary to avoid the backup withholding tax as well.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules will be refunded or credited against the Non-U.S. Holder's U.S. federal income tax liability, if any, provided the required information is timely furnished to the IRS.

FATCA

The Foreign Account Tax Compliance Act ("FATCA") generally imposes a U.S. federal withholding tax at a rate of 30% on interest payments on obligations that produce U.S. source income to certain foreign entities, including interest payments on the Bonds. Under current provisions of the Code, gross proceeds from a sale or other disposition of obligations that can produce U.S.-source interest, such as the Bonds, also can be subject to the FATCA withholding tax. Treasury regulations have been proposed, however, that would eliminate FATCA withholding tax on such gross proceeds. According to the preamble to such proposed Treasury regulations, taxpayers generally may rely on the proposed Treasury regulations until final Treasury regulations are issued (which regulations could be subject to change).

In the case of payments made to a foreign financial institution ("FFI"), whether as a beneficial owner or intermediary, FATCA withholding tax generally will be imposed, subject to certain exceptions, unless such institution enters into and complies with an agreement with the IRS to, among other things, collect and provide to the U.S. tax authorities certain information regarding U.S. account holders of such institution (which would include certain equity and debt holders of such institution, as well as certain account holders that are foreign entities with U.S. owners), or qualifies for an exemption from the FATCA rules. In the case of payments made to a foreign entity that is not a FFI, FATCA withholding tax generally will be imposed, subject to certain exceptions, unless such foreign entity provides the withholding agent with a certification that it does not have any substantial U.S. owner (generally, any specified United States person that directly or indirectly owns more than 10% of such entity) or that identifies its substantial U.S. owners or qualifies for an exemption from these rules and provides documentation (such as an IRS Form W-8BEN-E). We will not pay additional amounts to holders with respect to any amounts required to be withheld under FATCA. Prospective investors are encouraged to consult their own tax advisors regarding the implications of FATCA to their acquisition, ownership and disposition of the Bonds.

THE U.S. FEDERAL INCOME TAX DISCUSSION SET FORTH ABOVE DOES NOT PURPORT TO COVER ALL OF THE U.S. FEDERAL INCOME TAX CONSIDERATIONS THAT MAY BE RELEVANT TO HOLDERS BASED ON THEIR PARTICULAR CIRCUMSTANCES. PROSPECTIVE HOLDERS ARE URGED TO CONSULT THEIR OWN TAX ADVISORS WITH RESPECT TO THE TAX CONSEQUENCES TO THEM OF THE PURCHASE, OWNERSHIP AND DISPOSITION OF THE BONDS, INCLUDING THE TAX CONSEQUENCES UNDER STATE, LOCAL, FOREIGN AND OTHER TAX LAWS AND THE POSSIBLE EFFECTS OF CHANGES IN U.S. FEDERAL OR OTHER TAX LAWS.

Table of Contents

UNDERWRITING (CONFLICTS OF INTEREST)

The Company and the underwriters for the offering named below, for whom Barclays Capital Inc., Mizuho Securities USA LLC, PNC Capital Markets LLC and RBC Capital Markets, LLC are acting as Representatives, have entered into an underwriting agreement with respect to the Bonds. Subject to certain conditions, each underwriter has severally, but not jointly, agreed to purchase the principal amount of Bonds indicated in the following table:

Underwriters	Principal Amount of Bonds
Barclays Capital Inc.	$ 100,000,000
Mizuho Securities USA LLC	$ 100,000,000
PNC Capital Markets LLC	$ 100,000,000
RBC Capital Markets, LLC	$ 100,000,000
Huntington Securities, Inc.	$ 20,000,000
Regions Securities LLC	$ 20,000,000
SMBC Nikko Securities America, Inc.	$ 20,000,000
WauBank Securities LLC	$ 20,000,000
AmeriVet Securities, Inc.	$ 5,000,000
Mischler Financial Group, Inc.	$ 5,000,000
Roberts & Ryan, Inc.	$ 5,000,000
Siebert Williams Shank & Co., LLC	$ 5,000,000
Total	$ 500,000,000

The underwriters are committed to take and pay for all of the Bonds being offered, if any are taken. The offering of the Bonds by the underwriters is subject to receipt and acceptance and subject to the underwriters' right to reject any order in whole or in part.

Bonds sold by the underwriters to the public will initially be offered at the initial price to the public set forth on the cover of this prospectus supplement. Any Bonds sold by the underwriters to securities dealers may be sold at a discount from the initial price to the public of up to 0.525% of the principal amount of the Bonds. Any such securities dealers may resell any Bonds purchased from the underwriters to certain other brokers or dealers at a discount from the initial price to the public of up to 0.350% of the principal amount of the Bonds. If all the Bonds are not sold at the initial price to the public, the underwriters may change the offering price and the other selling terms.

The Bonds are a new issue of securities with no established trading market. We do not intend to apply for the Bonds to be listed on any securities exchange or to arrange for the Bonds to be quoted in any quotation system. The Company has been advised by the underwriters that the underwriters intend to make a market in the Bonds as permitted by applicable laws and regulations. The underwriters are not obligated, however, to do so and any such market making may be discontinued at any time without notice at the sole discretion of the underwriters. Accordingly, no assurance can be given as to the liquidity of, or trading markets for, the Bonds.

In connection with the offering, the underwriters may purchase and sell Bonds in the open market. These transactions may include short sales, stabilizing transactions and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of Bonds than they are required to purchase in the offering. Stabilizing transactions consist of certain bids or purchases made for the purpose of preventing or retarding a decline in the market price of the Bonds while the offering is in progress.

The underwriters also may impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the representatives have repurchased Bonds sold by or for the account of such underwriter in stabilizing or short covering transactions.

Table of Contents

These activities by the underwriters, as well as other purchases by the underwriters for their own accounts, may stabilize, maintain or otherwise affect the market price of the Bonds. As a result, the price of the Bonds may be higher than the price that otherwise might exist in the open market. If these activities are commenced, they may be discontinued by the underwriters at any time without notice. These transactions may be effected in the over-the-counter market or otherwise.

The Company estimates that its share of the total expenses of the offering, excluding the underwriting discount, will be approximately $1 million.

The Company has agreed to indemnify the several underwriters against certain liabilities, including liabilities under the Securities Act of 1933, as amended.

The underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include sales and trading, commercial and investment banking, advisory, investment management, investment research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services. Certain of the underwriters and their respective affiliates have provided, and may in the future provide, a variety of these services to the Company and to persons and entities with relationships with the Company, for which they received or will receive customary fees and expenses. In particular, certain of the underwriters or their affiliates are agents or lenders under the credit or other borrowing facilities of the Company and its affiliates.

In the ordinary course of their various business activities, the underwriters and their respective affiliates, officers, directors and employees may purchase, sell or hold a broad array of investments and actively trade securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments for their own account and for the accounts of their customers, and such investment and trading activities may involve or relate to assets, securities and/or instruments of the Company (directly, as collateral securing other obligations or otherwise) and/or persons and entities with relationships with the Company. Certain of the underwriters and their affiliates that have a lending relationship with us routinely hedge their credit exposure to us consistent with their customary risk management policies. Typically, such underwriters and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities, including potentially the Bonds offered hereby. Any such short positions could adversely affect future trading prices of the Bonds offered hereby. The underwriters and their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

It is expected that delivery of the Bonds will be made on or about the date specified on the cover page of this prospectus supplement, which will be the third business day (T+3) following the date of this prospectus supplement. Under Rule 15c6-1 under the Exchange Act, trades in the secondary market generally are required to settle within one business day (T+1), unless the parties to any such trade expressly agree otherwise. Accordingly, the purchasers who wish to trade the Bonds on the date of this prospectus supplement or the next succeeding business day will be required to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement. Purchasers of the Bonds who wish to trade the Bonds on the date of this prospectus supplement or the next succeeding business day should consult their own advisors.

Conflicts of Interest

Certain of the underwriters or their affiliates may hold a portion of the debt that we intend to repay using the proceeds of this offering. In such event, it is possible that one or more of the underwriters or their affiliates could receive more than 5% of the net proceeds of the offering, and in that case such underwriter could be deemed to have a conflict of interest under FINRA Rule 5121. In the event of any such conflict of interest, such underwriter would be required to conduct the distribution of Bonds in accordance with FINRA Rule 5121. If the distribution

Table of Contents

is conducted in accordance with FINRA Rule 5121, such underwriter would not be permitted to confirm a sale to an account over which it exercises discretionary authority without first receiving specific written approval from the account holder.

Notices to Prospective Investors

This prospectus supplement does not constitute an offer to sell to, or a solicitation of an offer to buy from, anyone in any country or jurisdiction (i) in which such an offer or solicitation is not authorized, (ii) in which any person making such offer or solicitation is not qualified to do so or (iii) in which any such offer or solicitation would otherwise be unlawful. No action has been taken that would, or is intended to, permit a public offer of the Bonds or possession or distribution of this prospectus or any other offering or publicity material relating to the Bonds in any country or jurisdiction (other than the United States) where any such action for that purpose is required.

Canada

The Bonds may be sold in Canada only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 *Prospectus Exemptions* or subsection 73.3(1) of the *Securities Act* (Ontario), and are permitted clients, as defined in National Instrument 31-103 *Registration Requirements, Exemptions and Ongoing Registrant Obligations*. Any resale of the Bonds must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus supplement or the accompanying prospectus (including any amendment hereto or thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 of National Instrument 33-105 *Underwriting Conflicts* (NI 33-105), the underwriters are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

European Economic Area

The Bonds are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("EEA"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (as amended, the "Prospectus Regulation"). Consequently, no key information document required by Regulation (EU) 1286/2014 (as amended, the "PRIIPs Regulation") for offering or selling the Bonds or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Bonds or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

This prospectus supplement and the accompanying prospectus have been prepared on the basis that any offer of the Bonds in any member state of the EEA will be made pursuant to an exemption under the Prospectus Regulation from the requirement to publish a prospectus for offers of the Bonds. This prospectus supplement and the accompanying prospectus are not a prospectus for the purposes of the Prospectus Regulation.

Table of Contents

Hong Kong

This prospectus supplement and the accompanying prospectus do not constitute nor are they intended to be an offer or invitation to the public in Hong Kong to acquire the Bonds. The Bonds have not been, and may not and will not be offered or sold in Hong Kong, by means of any document, other than (i) to "professional investors" as defined in the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder, or (ii) in other circumstances which do not result in the document being a "prospectus" as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32, Laws of Hong Kong) and which do not constitute an offer to the public within the meaning of that Ordinance. No advertisement, invitation or document relating to the Bonds has been, may be or will be issued, or has been, may be, or will be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to the Bonds which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" as defined in the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder.

The contents of this prospectus supplement and the accompanying prospectus have not been reviewed, endorsed or approved by any Hong Kong regulatory authorities, including the Securities and Futures Commission and the Companies Registry of Hong Kong and neither have they been nor will they be registered with the Registrar of Companies in Hong Kong. The Bonds may not be offered for subscription to members of the public in Hong Kong. You are advised to exercise caution in relation to the offer. If you are in doubt about any contents of this prospectus supplement and the accompanying prospectus, you should obtain independent professional advice. Each person acquiring the Bonds will be required, and is deemed by the acquisition of the Bonds, to confirm that such person is aware of the restriction on offers of the Bonds described in this prospectus supplement, the accompanying prospectus and the relevant offering documents and that such person is not acquiring, and has not been offered any Bonds in circumstances that contravene any such restrictions and that such person has complied with all relevant laws, rules and regulations applicable to it/him/her and the jurisdiction(s) where such person or its/his/her assets are located.

Japan

This offering of the Bonds has not been and will not be registered pursuant to Article 4, Paragraph 1 of the Financial Instruments and Exchange Act of Japan (Act No. 25 of April 13, 1948, as amended; the "FIEA"). Accordingly, the Bonds may not be offered or sold, directly or indirectly, in Japan or to, or for the account or benefit of, any "resident" of Japan (which term as used herein means any person resident in Japan, including any corporation or other entity organized under the laws of Japan), or to, or for the account or benefit of, others for re-offering or resale, directly or indirectly, in Japan or to, or for the account or benefit of, any resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the FIEA and any other applicable laws, regulations and ministerial guidelines of Japan in effect at the relevant time.

Switzerland

This prospectus supplement and the accompanying prospectus are not intended to constitute an offer or solicitation to purchase or invest in the Bonds. The Bonds may not be publicly offered, directly or indirectly, in Switzerland within the meaning of the Swiss Financial Services Act ("FinSA") and no application has or will be made to admit the Bonds to trading on any trading venue (exchange or multilateral trading facility) in Switzerland. Neither this prospectus supplement and the accompanying prospectus nor any other offering or marketing material relating to the Bonds constitutes a prospectus pursuant to the FinSA, and neither this prospectus supplement and the accompanying prospectus nor any other offering or marketing material relating to the Bonds may be publicly distributed or otherwise made publicly available in Switzerland.

Table of Contents

United Kingdom

The Bonds are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("UK"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (as amended, "EUWA"); (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (as amended, the "FSMA") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation 2017/1129/EU as it forms part of domestic law by virtue of the EUWA (the "UK Prospectus Regulation"). Consequently, no key information document required by Regulation (EU) 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "UK PRIIPs Regulation") for offering or selling the Bonds or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Bonds or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation. This prospectus supplement and the accompanying prospectus have been prepared on the basis that any offer of Bonds in the UK will be made pursuant to an exemption under the UK Prospectus Regulation from the requirement to publish a prospectus. This prospectus supplement and the accompanying prospectus are not prospectuses for the purposes of the UK Prospectus Regulation.

Table of Contents

EXPERTS

The consolidated financial statements of PPL Electric Utilities Corporation as of December 31, 2024 and 2023, and for each of the three years in the period ended December 31, 2024, incorporated by reference in this prospectus supplement by reference to PPL Electric Utilities Corporation's Annual Report on Form 10-K for the year ended December 31, 2024, have been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report. Such financial statements are incorporated by reference in reliance upon the report of such firm given their authority as experts in accounting and auditing.

VALIDITY OF THE BONDS

Troutman Pepper Locke LLP, Atlanta, Georgia, and W. Eric Marr, Esq., Associate General Counsel of PPL Services Corporation, will pass upon the validity of the Bonds for PPL Electric. Hunton Andrews Kurth LLP, New York, New York, will pass upon the validity of the Bonds for the underwriters. However, all matters pertaining to the organization of PPL Electric and PPL Electric's title to its property and the liens of the Mortgage upon PPL Electric's properties will be passed upon only by Mr. Marr. As to matters involving the law of the Commonwealth of Pennsylvania, Troutman Pepper Locke LLP and Hunton Andrews Kurth LLP will rely on the opinion of Mr. Marr. As to all matters involving the law of the State of New York, Mr. Marr will rely on the opinion of Troutman Pepper Locke LLP. Hunton Andrews Kurth LLP acts, and in the past has acted, as counsel to certain affiliates of PPL Electric in various matters.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that PPL Corporation, PPL Capital Funding, Inc. ("PPL Capital Funding"), PPL Electric Utilities Corporation ("PPL Electric"), Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU") have each filed with the Securities and Exchange Commission, or SEC, using the "shelf" registration process. Under this shelf process, we may, from time to time, sell combinations of the securities described in this prospectus in one or more offerings. Each time we sell securities, we will provide a prospectus supplement that will contain a description of the securities we will offer and specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. You should read both this prospectus and any prospectus supplement together with additional information described under "Where You Can Find More Information."

We may use this prospectus to offer from time to time:

- shares of PPL Corporation Common Stock, par value $.01 per share ("PPL Common Stock");
- shares of PPL Corporation Preferred Stock, par value $.01 per share ("PPL Preferred Stock");
- contracts or other rights to purchase shares of PPL Common Stock or PPL Preferred Stock ("PPL Stock Purchase Contracts");
- stock purchase units, each representing (1) a PPL Stock Purchase Contract and (2) PPL Preferred Stock or debt securities or preferred trust securities of third parties (such as debt securities or subordinated debt securities of PPL Capital Funding, preferred trust securities of a subsidiary trust or United States Treasury securities) that are pledged to secure the stock purchase unit holders' obligations to purchase PPL Common Stock or PPL Preferred Stock under the PPL Stock Purchase Contracts;
- PPL Corporation's Depositary Shares, issued under a deposit agreement and representing a fractional interest in PPL Preferred Stock;
- PPL Capital Funding's unsecured and unsubordinated debt securities ("PPL Capital Funding Debt Securities");
- PPL Capital Funding's unsecured and subordinated debt securities ("PPL Capital Funding Subordinated Debt Securities");
- PPL Electric's First Mortgage Bonds issued under PPL Electric's 2001 indenture, as amended and supplemented, which will be secured by the lien of the 2001 indenture on PPL Electric's electricity distribution and certain transmission properties, subject to certain exceptions to be described in a prospectus supplement;
- LG&E's First Mortgage Bonds issued under LG&E's 2010 indenture, as amended and supplemented, which will be secured by the lien of the 2010 indenture on LG&E's Kentucky electricity generation, transmission and distribution properties and natural gas distribution properties, subject to certain exceptions to be described in a prospectus supplement; and
- KU's First Mortgage Bonds issued under KU's 2010 indenture, as amended and supplemented, which will be secured by the lien of the 2010 indenture on KU's Kentucky electricity generation, transmission and distribution properties, subject to certain exceptions to be described in a prospectus supplement.

We sometimes refer to the securities listed above collectively as the "Securities."

PPL Corporation will fully and unconditionally guarantee the payment of principal, premium and interest on the PPL Capital Funding Debt Securities and PPL Capital Funding Subordinated Debt Securities as will be described in supplements to this prospectus. We sometimes refer to PPL Corporation's guarantees of PPL Capital Funding Debt Securities as "PPL Guarantees" and PPL Corporation's guarantees of PPL Capital Funding Subordinated Debt Securities as the "PPL Subordinated Guarantees."

Table of Contents

Information contained herein relating to each registrant is filed separately by such registrant on its own behalf. No registrant makes any representation as to information relating to any other registrant or Securities or guarantees issued by any other registrant, except that information relating to PPL Capital Funding's Securities is also attributed to PPL Corporation.

As used in this prospectus, the terms "we," "our" and "us" generally refer to:

- PPL Corporation with respect to Securities, PPL Guarantees or PPL Subordinated Guarantees issued by PPL Corporation or PPL Capital Funding;
- PPL Electric, with respect to Securities issued by PPL Electric;
- LG&E, with respect to Securities issued by LG&E; and
- KU, with respect to Securities issued by KU.

For more detailed information about the Securities, the PPL Guarantees and the PPL Subordinated Guarantees, you can read the exhibits to the registration statement. Those exhibits have been either filed with the registration statement or incorporated by reference to earlier SEC filings listed in the registration statement.

RISK FACTORS

Investing in the Securities involves certain risks. You are urged to read and consider the risk factors relating to an investment in the Securities described in the Annual Reports on Form 10-K of PPL Corporation, PPL Electric, LG&E and KU, as applicable, for the year ended December 31, 2023, and incorporated by reference in this prospectus. Before making an investment decision, you should carefully consider these risks as well as other information we include or incorporate by reference in this prospectus. The risks and uncertainties we have described are not the only ones affecting PPL Corporation, PPL Electric, LG&E and KU. The prospectus supplement applicable to each type or series of Securities we offer and our other filings incorporated by reference herein and therein may contain a discussion of additional risks applicable to an investment in us and the particular type of Securities we are offering under that prospectus supplement.

FORWARD-LOOKING INFORMATION

Certain statements included or incorporated by reference in this prospectus, including statements concerning expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements that are other than statements of historical fact are "forward-looking statements" within the meaning of the federal securities laws. Although we believe that the expectations and assumptions reflected in these statements are reasonable, there can be no assurance that these expectations will prove to be correct. Forward-looking statements are subject to many risks and uncertainties, and actual results may differ materially from the results discussed in forward-looking statements. In addition to the specific factors discussed in the "Risk Factors" section in this prospectus and our reports that are incorporated by reference, the following are among the important factors that could cause actual results to differ materially and adversely from the forward-looking statements:

- strategic acquisitions, dispositions, or similar transactions, and our ability to consummate these business transactions or realize expected benefits from them;
- pandemic health events or other catastrophic events such as fires, earthquakes, explosions, floods, droughts, tornadoes, hurricanes and other extreme weather-related events (including events potentially caused or exacerbated by climate change) and their impact on economic conditions, financial markets and supply chains;

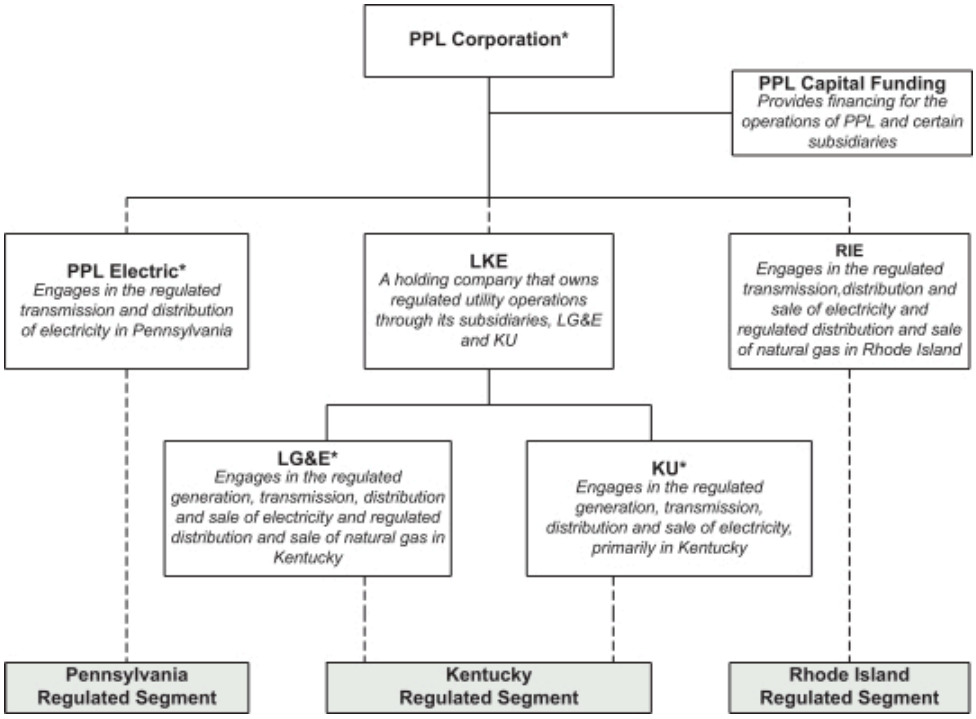
Table of Contents

- capital market conditions, including the availability of capital, credit or insurance, changes in interest rates and certain economic indices, and decisions regarding capital structure;
- volatility in or the impact of other changes in financial markets, commodity prices and economic conditions, including inflation;
- weather and other conditions affecting generation, transmission and distribution operations, operating costs and customer energy use;
- the outcome of rate cases or other cost recovery, revenue or regulatory proceedings;
- the direct or indirect effects on PPL or its subsidiaries or business systems of cyber-based intrusion or the threat of cyberattacks;
- significant changes in the demand for electricity;
- expansion of alternative and distributed sources of electricity generation and storage;
- the effectiveness of our risk management programs, including commodity and interest rate hedging;
- defaults by counterparties or suppliers for energy, capacity, coal, natural gas or key commodities, goods or services;
- a material decline in the market value of PPL's equity;
- significant decreases in the fair value of debt and equity securities and their impact on the value of assets in defined benefit plans, and the related cash funding requirements if the fair value of those assets decline;
- interest rates and their effect on pension and retiree medical liabilities, asset retirement obligation liabilities, interest payable on certain debt securities, and the general economy;
- the potential impact of any unrecorded commitments and liabilities of PPL and its subsidiaries;
- new accounting requirements or new interpretations or applications of existing requirements;
- adverse changes in the corporate credit ratings or securities analyst rankings of PPL and its securities;
- any requirement to record impairment charges pursuant to Generally Accepted Accounting Principles with respect to any of our significant investments;
- laws or regulations to reduce emissions of greenhouse gases or the physical effects of climate change;
- continuing ability to access fuel supply for LG&E and KU, as well as the ability to recover fuel costs and environmental expenditures in a timely manner at LG&E and KU and natural gas supply costs at LG&E and Rhode Island Energy ("RIE");
- war, armed conflicts, terrorist attacks, or similar disruptive events, including the ongoing conflicts in Ukraine, the Red Sea and Gaza;
- changes in political, regulatory or economic conditions in states or regions where PPL or its subsidiaries conduct business;
- the ability to obtain necessary governmental permits and approvals;
- changes in state or federal tax laws or regulations;
- changes in state, federal or foreign legislation or regulatory developments;
- the impact of any state, federal or foreign investigations applicable to PPL and its subsidiaries and the energy industry;
- our ability to attract and retain qualified employees;
- the effect of changing expectations and demands of our customers, regulators, investors and stakeholders, including views on environmental, social and governance concerns;

Table of Contents

- the effect of any business or industry restructuring;
- development of new projects, markets and technologies;
- performance of new ventures;
- collective labor bargaining negotiations and labor costs; and
- the outcome of litigation involving PPL and its subsidiaries.

Any forward-looking statements should be considered in light of these important factors and in conjunction with other documents we file with the SEC.



New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time to time, and it is not possible for us to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking statement speaks only as of the date on which such statement is made and, we undertake no obligation to update the information contained in the statement to reflect subsequent developments or information.

Table of Contents

PPL CORPORATION

PPL Corporation, headquartered in Allentown, Pennsylvania, is a utility holding company, incorporated in 1994. PPL Corporation, through its regulated utility subsidiaries, delivers electricity to customers in Pennsylvania, Kentucky, Virginia, and Rhode Island; delivers natural gas to customers in Kentucky and Rhode Island; and generates electricity from power plants in Kentucky.

PPL Corporation's principal subsidiaries are shown below (* denotes a registrant hereunder):

PPL Corporation conducts its operations through the following segments:

Kentucky Regulated

The Kentucky Regulated segment consists primarily of the regulated electricity generation, transmission and distribution operations conducted by LG&E and KU, as well as LG&E's regulated distribution and sale of natural gas. As of December 31, 2023, LG&E provided electric service to approximately 436,000 customers and provided natural gas service to approximately 335,000 customers in Kentucky, and KU delivered electricity to approximately 573,000 customers in Kentucky and Virginia. See "Louisville Gas and Electric Company" and "Kentucky Utilities Company," respectively, for more information.

Pennsylvania Regulated

The Pennsylvania Regulated segment includes the regulated electricity transmission and distribution operations of PPL Electric. As of December 31, 2023, PPL Electric delivered electricity to approximately 1.5 million customers in eastern and central Pennsylvania. See "PPL Electric Utilities Corporation" below for more information.

Table of Contents

Rhode Island Regulated

The Rhode Island Regulated segment consists primarily of the regulated electricity transmission and distribution operations and regulated distribution and sale of natural gas conducted by RIE. As of December 31, 2023, RIE delivered electric service to approximately 500,000 customers and natural gas service to approximately 270,000 customers in Rhode Island.

PPL Corporation's subsidiaries, including PPL Electric, LG&E, KU and RIE, are separate legal entities and are not liable for the debts of PPL Corporation, and PPL Corporation is not liable for the debts of its subsidiaries (other than under the PPL Guarantees of PPL Capital Funding Debt Securities and PPL Subordinated Guarantees of PPL Capital Funding Subordinated Debt Securities). None of PPL Electric, LG&E, KU or RIE will guarantee or provide other credit or funding support for the Securities to be offered by PPL Corporation pursuant to this prospectus.

PPL CAPITAL FUNDING, INC.

PPL Capital Funding is a Delaware corporation and wholly owned subsidiary of PPL Corporation. PPL Capital Funding's primary business is to provide PPL Corporation with financing for its operations. PPL Corporation will fully and unconditionally guarantee the payment of principal, premium and interest on the PPL Capital Funding Debt Securities pursuant to the PPL Guarantees and the PPL Capital Funding Subordinated Debt Securities pursuant to the PPL Subordinated Guarantees, as will be described in supplements to this prospectus.

PPL ELECTRIC UTILITIES CORPORATION

PPL Electric, headquartered in Allentown, Pennsylvania, is a wholly owned subsidiary of PPL Corporation, incorporated in Pennsylvania in 1920 and a regulated public utility that is an electricity transmission and distribution service provider in eastern and central Pennsylvania. As of December 31, 2023, PPL Electric delivered electricity to approximately 1.5 million customers in a 10,000 square mile territory in 29 counties of eastern and central Pennsylvania. PPL Electric also provides electricity to retail customers in this area as a provider of last resort under the Pennsylvania Electricity Generation Customer Choice and Competition Act.

PPL Electric is subject to regulation as a public utility by the Pennsylvania Public Utility Commission, and certain of its transmission activities are subject to the jurisdiction of the Federal Energy Regulatory Commission ("FERC") under the Federal Power Act.

Neither PPL Corporation nor any of its subsidiaries or affiliates will guarantee or provide other credit or funding support for the Securities to be offered by PPL Electric pursuant to this prospectus.

LOUISVILLE GAS AND ELECTRIC COMPANY

LG&E, headquartered in Louisville, Kentucky, is a wholly owned subsidiary of LG&E and KU Energy LLC ("LKE") and a regulated utility engaged in the generation, transmission, distribution and sale of electricity and distribution and sale of natural gas in Kentucky.

As of December 31, 2023, LG&E provided electric service to approximately 436,000 customers in Louisville and adjacent areas in Kentucky, covering approximately 700 square miles in nine counties and provided natural gas service to approximately 335,000 customers in its electric service area and eight additional counties in Kentucky.

Table of Contents

LG&E is subject to regulation as a public utility by the Kentucky Public Service Commission ("KPSC"), and certain of its transmission activities are subject to the jurisdiction of the FERC under the Federal Power Act. LG&E was incorporated in 1913.

Neither PPL Corporation nor any of its subsidiaries or affiliates will guarantee or provide other credit or funding support for the Securities to be offered by LG&E pursuant to this prospectus.

KENTUCKY UTILITIES COMPANY

KU, headquartered in Lexington, Kentucky, is a wholly owned subsidiary of LKE and a regulated utility engaged in the generation, transmission, distribution and sale of electricity in Kentucky and Virginia.

As of December 31, 2023, KU provided electric service to approximately 545,000 customers in 77 counties in central, southeastern and western Kentucky, approximately 28,000 customers in five counties in southwestern Virginia, covering approximately 4,800 non-contiguous square miles. As of December 31, 2023, KU also sold wholesale electricity to two municipalities in Kentucky under load following contracts. In Virginia, KU operates under the Old Dominion Power name.

KU is subject to regulation as a public utility by the KPSC and the Virginia State Corporation Commission, and certain of its transmission and wholesale power activities are subject to the jurisdiction of the FERC under the Federal Power Act. KU was incorporated in Kentucky in 1912 and in Virginia in 1991.

Neither PPL Corporation nor any of its subsidiaries or affiliates will guarantee or provide other credit or funding support for the Securities to be offered by KU pursuant to this prospectus.

The offices of PPL Corporation, PPL Capital Funding and PPL Electric are located at Two North Ninth Street, Allentown, Pennsylvania 18101-1179 (Telephone number (610) 774-5151).

The offices of LG&E are located at 220 West Main Street, Louisville, Kentucky 40202 (Telephone number (502) 627-2000).

The offices of KU are located at One Quality Street, Lexington, Kentucky 40507 (Telephone number (502) 627-2000).

The information above concerning PPL Corporation, PPL Capital Funding, PPL Electric, LG&E and KU and, if applicable, their respective subsidiaries is only a summary and does not purport to be comprehensive. For additional information about these companies, including certain assumptions, risks and uncertainties involved in the forward-looking statements contained or incorporated by reference in this prospectus, you should refer to the information described in "Where You Can Find More Information."

Table of Contents

USE OF PROCEEDS

Except as otherwise described in a prospectus supplement, the net proceeds from the sale of the PPL Capital Funding Debt Securities and the PPL Capital Funding Subordinated Debt Securities will be loaned to PPL Corporation and/or its subsidiaries, and PPL Corporation and/or its subsidiaries are expected to use the proceeds of such loans, and the proceeds of the other Securities issued by PPL Corporation, for general corporate purposes, including repayment of debt. Except as otherwise described in a prospectus supplement, each of PPL Electric, LG&E and KU is expected to use the proceeds of the Securities it issues for general corporate purposes, including repayment of debt and for capital expenditures.

Table of Contents

WHERE YOU CAN FIND MORE INFORMATION

Available Information

PPL Corporation, PPL Electric, LG&E and KU each file reports and other information with the SEC. The SEC maintains an Internet site that contains information PPL Corporation, PPL Electric, LG&E and KU have filed electronically with the SEC, which you can access over the Internet at http://www.sec.gov.

PPL Corporation's Internet Web site is www.pplweb.com. Under the "Investors" heading of that website, PPL Corporation provides access to all SEC filings of PPL Corporation, PPL Electric, LG&E and KU free of charge, as soon as reasonably practicable after filing with the SEC. The information at PPL Corporation's Internet Web site is not incorporated in this prospectus by reference, and you should not consider it a part of this prospectus.

In addition, reports, proxy statements and other information concerning PPL Corporation, PPL Electric, LG&E and KU, as applicable, can be inspected at Two North Ninth Street, Allentown, Pennsylvania 18101-1179.

Incorporation by Reference

Each of PPL Corporation, PPL Electric, LG&E and KU will "incorporate by reference" information into this prospectus by disclosing important information to you by referring you to another document that it files separately with the SEC. The information incorporated by reference is deemed to be part of this prospectus, and later information that we file with the SEC will automatically update and supersede that information. This prospectus incorporates by reference the documents set forth below that have been previously filed with the SEC. These documents contain important information about the registrants.

Table of Contents

Additional documents that PPL Corporation, PPL Electric, LG&E and KU file with the SEC pursuant to Sections 13(a), 13(c), 14 or 15(d) of the Exchange Act, between the date of this prospectus and the termination of the offering of the Securities are also incorporated herein by reference. In addition, any additional documents that PPL Corporation, PPL Electric, LG&E or KU file with the SEC pursuant to these sections of the Exchange Act after the date of the filing of the registration statement containing this prospectus, and prior to the effectiveness of the registration statement, are also incorporated herein by reference. Unless specifically stated to the contrary, none of the information that PPL Corporation, PPL Electric, LG&E or KU files or discloses under Items 2.02 or 7.01 of any Current Report on Form 8-K that have been furnished or may from time to time be furnished with the SEC is or will be incorporated by reference into, or otherwise included in, this prospectus.

Each of PPL Corporation, PPL Electric, LG&E and KU will provide without charge to each person, including any beneficial owner, to whom a copy of this prospectus has been delivered, a copy of any and all of its filings with the SEC. You may request a copy of these filings by writing or telephoning the appropriate registrant at:

Two North Ninth Street
Allentown, Pennsylvania 18101-1179
Attention: Treasurer
Telephone: 1-800-345-3085

No separate financial statements of PPL Capital Funding are included herein or incorporated herein by reference. PPL Corporation and PPL Capital Funding do not consider those financial statements to be material to holders of the PPL Capital Funding Debt Securities or PPL Capital Funding Subordinated Debt Securities because (1) PPL Capital Funding is a wholly owned subsidiary that was formed for the primary purpose of providing financing for PPL Corporation and its subsidiaries, (2) PPL Capital Funding does not currently engage in any independent operations and (3) PPL Capital Funding is a finance subsidiary and does not currently plan to engage, in the future, in more than minimal independent operations. See “PPL Capital Funding.” Accordingly, PPL Corporation and PPL Capital Funding do not expect PPL Capital Funding to file such reports.

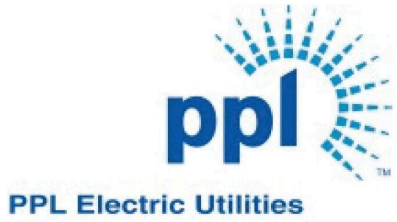
EXPERTS



The consolidated financial statements of PPL Corporation and PPL Electric Utilities Corporation and the financial statements of Louisville Gas and Electric Company and Kentucky Utilities Company incorporated by reference in this Prospectus by reference to their Annual Reports on Form 10-K for the year ended December 31, 2023, and the effectiveness of PPL Corporation's internal control over financial reporting have been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their reports. Such financial statements are incorporated by reference in reliance upon the reports of such firm, given their authority as experts in accounting and auditing.

VALIDITY OF THE SECURITIES AND THE PPL GUARANTEES

Davis Polk & Wardwell LLP, New York, New York, and W. Eric Marr, Esq., Senior Counsel of PPL Services Corporation will pass upon the validity of the Securities, the PPL Guarantees and the PPL Subordinated Guarantees for PPL Corporation and PPL Capital Funding. Bracewell LLP, New York, New York and Mr. Marr will pass upon the validity of any PPL Electric Securities for PPL Electric. Bracewell LLP and John P. Fendig, Esq., Senior Counsel of PPL Services Corporation will pass upon the validity of any LG&E and KU Securities for those issuers. Hunton Andrews Kurth LLP, New York, New York will pass upon the validity of the Securities, the PPL Guarantees and the PPL Subordinated Guarantees for any underwriters or agents. Bracewell LLP, Davis Polk & Wardwell LLP and Hunton Andrews Kurth LLP will rely on the opinion of Mr. Marr as to matters involving the law of the Commonwealth of Pennsylvania and on the opinion of Mr. Fendig as to matters involving the laws of the Commonwealths of Kentucky and Virginia.

Q.3. State what coverage requirements or capital structure ratios are required in the most restrictive of applicable indentures/charter tests and how these measures have been computed.

A.3. PPL Electric Utilities Corporation is the borrower under a credit agreement that contains a financial covenant requiring that the debt to total capitalization not exceed 70%. The manner in which the interest coverage ratio is computed is provided in Attachment III-F-3.

PPL ELECTRIC UTILITIES CORPORATION

Debt to Total Capitalization Credit Facility Covenant

PPL Electric Utilities Corporation is the borrower under a credit agreement, dated December 6, 2021, pursuant to which it has the ability to make cash borrowings and to request the lenders to issue letters of credit. This credit facility contains a financial covenant requiring that the debt to total capitalization not exceed 70%. The covenant and pertinent definitions from the credit agreement are as follows:

Section 6.09 Consolidated Debt to Consolidated Capitalization Ratio. The ratio of Consolidated Debt of the Applicable Reporting Entity to Consolidated Capitalization of the Applicable Reporting Entity shall not exceed 70%, measured as of the end of each fiscal quarter

"Consolidated Capitalization" means, with respect to each Borrower, the sum of, without duplication, (A) the Consolidated Debt (without giving effect to clause (b) of the definition of "Consolidated Debt") and (B) the consolidated shareowners' equity (determined in accordance with GAAP) of the common, preference and preferred shareowners of the Applicable Reporting Entity and minority interests recorded on the Applicable Reporting Entity's consolidated financial statements (excluding from shareowners' equity (i) the effect of all unrealized gains and losses reported under Financial Accounting Standards Board Accounting Standards Codification Topic 815 in connection with (x) forward contracts, futures contracts, options contracts or other derivatives or hedging agreements for the future delivery of electricity, capacity, fuel or other commodities and (y) Interest Rate Protection Agreements, foreign currency exchange agreements or other interest or exchange rate hedging arrangements and (ii) the balance of accumulated other comprehensive income/loss of the Applicable Reporting Entity on any date of determination solely with respect to the effect of any pension and other post-retirement benefit liability adjustment recorded in accordance with GAAP), except that for purposes of calculating Consolidated Capitalization of the Applicable Reporting Entity, Consolidated Debt of the Applicable Reporting Entity shall exclude Non-Recourse Debt and Consolidated Capitalization of the Applicable Reporting Entity shall exclude that portion of shareowners' equity attributable to assets securing Non-Recourse Debt. "Consolidated Debt" means, with respect to each Borrower, the consolidated Debt of the Applicable Reporting Entity and its Consolidated Subsidiaries (determined in accordance with GAAP), except that for purposes of this definition (a) Consolidated Debt shall exclude Non-Recourse Debt of the Applicable Reporting Entity and its Consolidated Subsidiaries, and (b) Consolidated Debt shall exclude (i) Hybrid Securities of the Applicable Reporting Entity and its Consolidated Subsidiaries in an aggregate amount as shall not exceed 15% of Consolidated Capitalization and (ii) Equity-

Linked Securities in an aggregate amount as shall not exceed 15% of Consolidated Capitalization.

"Debt" of any Person means, without duplication, (i) all obligations of such Person for borrowed money, (ii) all obligations of such Person evidenced by bonds, debentures, notes or similar instruments, (iii) all Guarantees by such Person of Debt of others, (iv) all Capital Lease Obligations and Synthetic Leases of such Person, (v) all obligations of such Person in respect of Interest Rate Protection Agreements, foreign currency exchange agreements or other interest or exchange rate hedging arrangements (the amount of any such obligation to be the net amount that would be payable upon the acceleration, termination or liquidation thereof), but only to the extent that such net obligations exceed (1) in the case of the Company or the Guarantor, $150,000,000 and (2) in the case of the Designated Borrower, $75,000,000, in each case, in the aggregate and (vi) all obligations of such Person as an account party in respect of letters of credit and bankers' acceptances; provided, however, that "Debt" of such Person does not include (a) obligations of such Person under any installment sale, conditional sale or title retention agreement or any other agreement relating to obligations for the deferred purchase price of property or services, (b) obligations under agreements relating to the purchase and sale of any commodity, including any power sale or purchase agreements, any commodity hedge or derivative (regardless of whether any such transaction is a "financial" or physical transaction), (c) any trade obligations or other obligations of such Person incurred in the ordinary course of business or (d) obligations of such Person under any lease agreement (including any lease intended as security) that is not a Capital Lease or a Synthetic Lease.

"Non-Recourse Debt" means, with respect to a Borrower, Debt that is nonrecourse to any Applicable Loan Party, or any asset of any Applicable Loan Party.

"Applicable Reporting Entity" means, (a) with respect to the Company, the Guarantor, and (b) with respect to the Designated Borrower, the Designated Borrower.

"Loan Parties" means the Guarantor and each Borrower or, as the context requires, the Applicable Loan Parties

Q.4. A schedule of comparative financial data shall be supplied for the test year, the most immediately available annual historical period, prior to the test year, and the 2 calendar years most immediately preceding the test year. Changes in Moody's/S&P ratings, noted on this schedule, shall be accompanied by the Moody's/S&P write-up of such change, if available. The following financial data and ratios shall be supplied for the utility's parent, where applicable, if not available for the utility.

a) Times interest earned ratio - pre-tax and post-tax basis.
b) Preferred stock dividend coverage ratio - post-tax basis.
c) Times fixed charges earned ratio - pre-tax basis.
d) Earnings per share.
e) Dividend per share.
f) Average dividend yield (52-week high/low common stock price).
g) Average book value per share.
h) Average market price per share.
i) Market price-book value ratio.
j) Earnings-book value ratio (per share basis, average book value).
k) Dividend payout ratio.
l) AFUDC as a % of earnings available for common equity.
m) Construction work in progress as a % of net utility plant.
n) Effective income tax rate.
o) Internal cash generations as a % of total capital requirements.

A.4. Attachment III-F-4a provides the requested comparative financial data.

Attachment III-F-4b provides the requested write-up from S&P.

Attachment III-F-4c provides the requested write-up from Moody's.

Research Update:

PPL Corp. And Subsidiary Ratings Affirmed On NECO Purchase, Outlook Stable; PPL Electric Utilities Upgraded To 'A/A-1'

May 27, 2022

Rating Action Overview

- PPL Corp. announced that it has completed its purchase of Narragansett Electric Co. (NECO) from National Grid North America Inc. for $3.8 billion and assumed NECO's debt of roughly $1.5 billion. We view NECO as core to PPL's group under our group rating methodology.
- We affirmed our 'A-' long-term issuer credit rating on PPL and its U.S.-based subsidiaries PPL Capital Funding Inc. (PPL Capital), Louisville Gas & Electric Co. (LG&E), and Kentucky Utilities Co. (KU).
- PPL Electric Utilities Corp.'s (PPLEU) stand-alone financial measures have consistently remained at or above our upgrade threshold. Therefore, we raised our long-term issuer credit rating on PPLEU to 'A' from 'A-' and our issue-level rating on its senior secured bonds to 'A+' from 'A'. Additionally, we raised our short-term and commercial paper ratings on PPLEU to 'A-1' from 'A-2'.
- The stable outlooks on PPL, PPL Capital, LG&E, and KU incorporate our view that following the purchase of NECO, PPL's business will almost entirely comprise U.S. regulated utility operations. In addition, we expect its funds from operations (FFO) to debt to be in the 17%-19% range in 2023 and 2024, which supports our 'A-' long-term issuer credit rating.
- The stable outlook on PPLEU reflects our stable outlook on its parent PPL and our belief that the utility's financial measures will consistently be in the higher end of our range for its financial risk profile category. Specifically, we expect PPLEU's stand-alone FFO to debt to be in the 19%-21% range though 2024.

Rating Action Rationale

We affirmed our ratings on PPL, PPL Capital, LG&E, and KU after PPL completed its purchase of NECO. PPL completed its purchase of NECO for $3.8 billion in cash and the assumption of $1.5 billion of the company's debt. Following the acquisition, we expect PPL's consolidated FFO to debt

THIS WAS PREPARED EXCLUSIVELY FOR USER BREANNE KENT.
NOT FOR REDISTRIBUTION UNLESS OTHERWISE PERMITTED.

to be in the 17%-19% range in 2023 and 2024, which is consistent with the middle of the range for its financial risk profile category.

We consider NECO to be core to PPL's group. Under our group rating methodology, we consider NECO to be core to the company's group. This reflects our view that NECO is highly unlikely to be sold, is integral to the group's overall strategy, and possesses a strong long-term commitment from senior management.

We raised our ratings on PPLEU. Our upgrade reflects that PPLEU's stand-alone financial measures have consistently remained at or above our upgrade threshold. It also reflects our assessment that the cumulative value of its insulating measures are sufficient to support a rating on the subsidiary one-notch higher than our group credit profile. This assessment incorporates our view of PPLEU's financial performance, funding arrangements, and operational independence. We view the utility as operationally separated from the group because it holds itself out as a separate entity, its financial performance is highly independent from the group, it has no significant operational dependence on other group entities, and it maintains its own records and funding arrangements and does not commingle funds, assets, or cash flows. There is also a strong economic basis for the group to preserve PPLEU's credit strength and we do not expect a default at PPL or its other entities to directly lead to a default at PPLEU. PPLEU functions independently, both financially and operationally, by filing its own rate cases, issuing its own debt, and is regulated independently. The utility also accounts for about 40% of its parent's EBITDA and acts as a material source of cash to fund its dividends, which provides an economic incentive for PPL to preserve PPLEU's credit strength.

On a forward-looking basis, we expect that PPLEU's stand-alone financial measures will consistently be in the higher end of our range for its financial risk profile category. As such, we revised our comparable ratings analysis modifier to positive from neutral to reflect the strength of its financial measures.

The stable outlook on electric utility PPLEU reflects our stable outlook on its parent. The stable outlook reflects our stable outlook on its parent PPL and our view that the utility's stand-alone financial measures will consistently be in the higher end of the range for its financial risk profile category, including FFO to debt in the 19%-21% range through 2024.

Outlook: PPL, PPL Capital, LG&E, And KU

The stable outlook on PPL reflects our expectation that its business risk profile will not weaken and its consolidated financial measures will remain stable. Specifically, we expect FFO to debt in the 17%-19% range through 2024.

Downside scenario

We could lower our ratings on PPL over the next 24 months if:

- Its business risk remains unchanged; and
- Its core credit ratio weakens such that its FFO to debt falls consistently below 16%.

**THIS WAS PREPARED EXCLUSIVELY FOR USER BREANNE KENT.
NOT FOR REDISTRIBUTION UNLESS OTHERWISE PERMITTED.**

Upside scenario

Given our assessment of its business risk and our base-case assumptions, we do not anticipate raising our rating on PPL during the next 24 months. However, we could raise our ratings if:

- The company's S&P Global Ratings-adjusted FFO to debt exceeds 21% on a consistent basis; and
- It maintains or improves its business risk.

Outlook: PPLEU

The stable outlook on PPLEU reflects our stable outlook on its parent PPL and our expectation that the utility's stand-alone financial measures will consistently be in the higher end of the range for its financial risk profile category. Under our base-case scenario, we assume stand-alone FFO to debt in the 19%-21% range through 2024.

Downside scenario

We could lower our ratings on PPLEU if:

- We lower our ratings on PPL; or
- Its stand-alone financial measures decline such that its FFO to debt remains consistently below 18%.

Upside scenario

We could raise our ratings on PPLEU if:

- We raise our ratings on PPL;
- PPLEU's business risk does not increase; and
- Its stand-alone financial measures consistently improve, including FFO to debt of more than 23%.

Liquidity

We assess PPL's liquidity as adequate because we believe its sources of cash will likely be more than 1.1x its uses over the next 12 months and meet its cash outflows even if its EBITDA declines by 10%. Our assessment also reflects the company's generally prudent risk management, sound relationships with banks, and satisfactory standing in the credit markets. We also believe PPL could absorb high-impact, low-probability events with limited need for refinancing.

Principal liquidity sources:

- Estimated cash FFO from existing operations of about $2.4 billion; and
- Credit facility availability of about $3 billion.

Principal liquidity uses:

THIS WAS PREPARED EXCLUSIVELY FOR USER BREANNE KENT.
NOT FOR REDISTRIBUTION UNLESS OTHERWISE PERMITTED.

- Debt maturities, including outstanding commercial paper, of about $915 million;
- Capital spending of about $2.3 billion; and
- Dividends of about $750 million.

Issue Ratings – Subordination Risk Analysis

Capital structure

- PPL's capital structure comprises about $13 billion of debt, of which about $11 billion is priority debt. Following the completion of the NECO purchase, PPL's total debt and priority debt have increased by about $1.5 billion.

Analytical conclusions

- We rate PPL's unsecured debt one notch below our long-term issuer credit rating because its priority debt exceeds 50% of its consolidated debt, which is consistent with our criteria.
- We base our 'A-2' short-term rating on PPL and our 'A-1' short-term rating on PPLEU on our long-term issuer credit ratings on the respective companies.
- We rate PPL Capital Funding's junior subordinated debt obligation, which is effectively an obligation of PPL because it unconditionally guarantees the subsidiary's obligations, two notches below our long-term issuer credit rating. This reflects the security's greater credit risk, including its permanence, subordination in liquidation to all senior debt obligations, and deferability features.

Issue Ratings - Recovery Analysis

Key analytical factors

- PPLEU's first-mortgage bonds benefit from a first-priority lien on substantially all of the utility's real property owned or subsequently acquired. Collateral coverage of over 1.5x supports a recovery rating of '1+' and an issue-level rating one notch above the long-term issuer credit rating.

PPL Electric Utilities Corporation

Update to credit analysis

Summary

PPL Electric Utilities Corporation's (PPLEU, A3 stable) credit profile reflects the generally stable and predictable nature of its regulated electric transmission and distribution (T&D) utility cash flow, and the credit supportive regulatory environments under the purview of the Pennsylvania Public Utilities Commission (PAPUC) and the Federal Energy Regulatory Commission (FERC). PPLEU contributed approximately 46% of its parent company's (i.e., PPL Corporation, Baa1 stable) cash flow over the last three years and accounted for about 39% of PPL's rate base in 2024. We expect PPLEU to generate a cash flow from operations before changes in working capital (CFO pre-WC) to debt ratio to range 20% - 22% over the next 12-18 months.

Exhibit 1
Historical CFO Pre-WC, Total Debt and CFO Pre-WC to Debt

All data based on adjusted financial data, which follow our Financial Statement Adjustments in the Analysis of Nonfinancial Corporations methodology. LTM = Last 12 months.
Source: Moody's Financial Metrics™

Credit strengths

» Low business risk profile

» Supportive regulatory frameworks under the PAPUC and FERC

» Transparent and predictable cash flow

Credit challenges

» Large capital investment program

» Increasing leverage to support robust capital expenditure plan

Rating outlook

The stable outlook for PPLEU reflects the company's low business risk as an electric T&D utility in Pennsylvania, where we view the regulatory environment to be credit-supportive. The stable outlook also incorporates our view that the utility will continue to produce consistent cash flow and execute a balanced equity and debt funding plan for its capital investments.

Factors that could lead to upgrade

PPLEU's ratings could be upgraded if the regulatory environment improves materially, and if its financial metrics increase such that its CFO pre-WC to debt ratio rises above 20% on a sustained basis.

Factors that could lead to downgrade

A rating downgrade could be considered if there is significant deterioration in the credit supportiveness of the regulatory environment, or if its financial metrics continue to weaken such that CFO pre-WC to debt falls below 17% for an extended period.

Profile

PPLEU is a wholly-owned regulated utility subsidiary of PPL that transmits and distributes electricity to approximately 1.5 million customers in eastern and central Pennsylvania. Like other Pennsylvania T&D utilities, PPLEU provides electric supply in its service territory as a provider of last resort (POLR).

PPL is a utility holding company with operations in Kentucky, Pennsylvania, Rhode Island and Virginia. Its Kentucky regulated utilities include Louisville Gas & Electric Company (LG&E, A3 stable) and Kentucky Utilities Co. (KU, A3 stable), which operate under a traditional vertically integrated utility model. Also, KU serves approximately 28,000 million customers in five counties of Virginia. Narragansett Electric Company (NECO, A3 stable), is the largest electric T&D and gas distribution company in Rhode Island, serving approximately 515,000 electric and 280,000 gas customers. NECO was acquired by PPL in May 2022.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on https://ratings.moodys.com for the most updated credit rating action information and rating history.

Detailed credit considerations

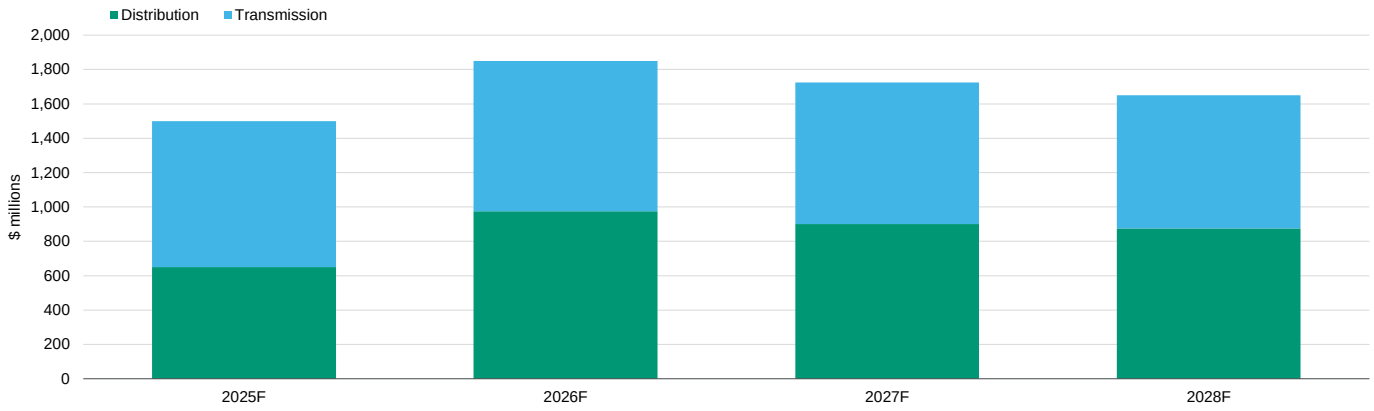
Low risk T&D utility operating in credit supportive regulatory environments

PPLEU is a low risk electric T&D utility in Pennsylvania regulated by the PAPUC and FERC, both with regulatory frameworks that we view as above average compared to other states. In Pennsylvania, the PAPUC allows utilities to use a fully projected future test year in rate proceedings, a credit positive, as it provides companies with the ability to forecast costs and earn a return on investments in a timely manner. PPLEU also utilizes a distribution system improvements charge (DSIC), a smart meter rider and other recovery mechanisms to recover discrete investments. These mechanisms provide the opportunity for accelerated cost recovery that will help support PPLEU's credit metrics during a period of elevated capital investments.

PPLEU's last general distribution rate case concluded in November 2015 when a settlement was reached and approved. However, PAPUC reviews the utility's Distribution System Infrastructure Charge (DSIC) filing on a quarterly basis. The current authorized return on equity (ROE) for the DSIC is 10% credit supportive since it is higher than average utility ROE. In April 2024, PPLEU filed a request to increase the 5% revenue cap to 9%. On 28 February 2025, the PAPUC issued its written order permitting a revenue cap increase to 7.5% for bills rendered on or after 13 March 2025, until the effective date of rates established in PPLEU's next rate case or the end of their 2023-2027 Long-term Infrastructure Improvement Plan, whichever occurs first, at which time it will return to 5%. This allows the utility's investments to increase, while costs are recovered on a contemporaneous basis, a credit positive. PPLEU's DSIC eligible investments increased to over $700 million from $500 million in the prior investment plan. Under the various mechanisms, PPLEU continues to recovery approximately 75% of its costs near real-time, including its transmission investments.

Compared to other electric utilities, a high percentage of PPLEU's rate base consists of FERC regulated transmission assets. As of year-end 2024, PPLEU's transmission rate base was approximately 56% of its $10.3 billion rate base. We consider FERC regulation to be predictable and more credit supportive due to the formulaic nature of its rate case mechanisms. PPLEU's current allowed ROE for its

transmission rate base is 10%, which became effective 1 June 2023. PPLEU also continues to include a 50 basis point adder for its RTO membership in addition to the allowed ROE.



The risk associated with commodity exposure is minimal given the transparent purchased power cost pass-through mechanisms in place in the state. PPLEU also enters into full requirements supply agreements to serve its POLR customers. The latest PJM market capacity auction resulted in a significantly higher capacity price, clearing at around $270 per MW-Day for the 2025-2026 planning year. The prior planning year result was around $50 per MW-Day. The auction results led in a material rate increase for customers across PJM. However, the rate increase resulting from the PJM capacity auction result for PPLEU's customers has been more manageable given the various durations of the electric supply contracts as well as pricing schemes to serve customers choosing default service from PPLEU. On 7 November 2024, the PAPUC approved PPLEU's default service plan for the period of 1 June 2025 through 31 May 2029.

Large capital investments with timely cost recovery mechanisms

PPLEU will continue its robust capital investment program through 2028, estimating a total spend of about $6.7 billion. Key areas of the plan will include the continued hardening and reliability improvements for its distribution system, advance smart grid technology and digital capabilities. For its transmission system, PPLEU will also focus on supporting the addition of new clean energy technologies and automation as well as potential additional demand growth associated with data centers. As of May 2025, approximately 11 GW of additional load from potential data center customers is in advanced stages, which would increase PPLEU's transmission investment by $700 - $850 million. Currently, $400 million is included in PPL's 2025-2028 capital investment plan.

We view the company's distribution investments as having low construction and execution risk, in general. Moreover, regulatory provisions such as a smart meter rider and the aforementioned DSIC mechanism significantly improves the timeliness of cost recovery by allowing PPLEU to earn a return on qualifying investments in less than six months.

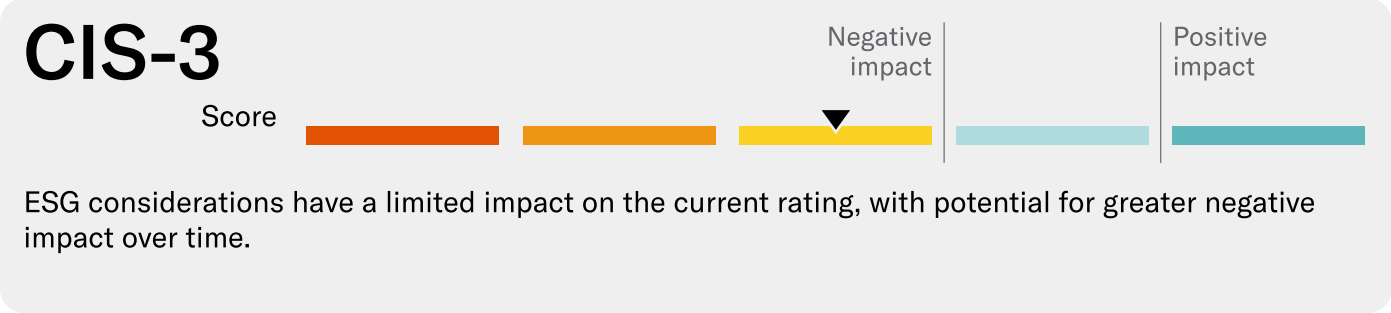
Exhibit 4
Projected Capital Investment Plan 2025-2028

Source: Company filings

The majority of PPLEU's investments will be for its transmission system. While large transmission projects are more difficult from an execution standpoint, we view that FERC has an effective regulatory framework for mitigating cost recovery risk. Additionally, PPLEU's transmission projects will be small to moderate in scale and scope for the next four years, excluding any potential new investments related to data center support, and the utility has a demonstrated track record of effectively managing costs and completing transmission projects on time.

Stable credit metrics albeit at lower than historical levels

PPLEU had historically exhibited stronger financial metrics than currently with a CFO pre-WC to debt ratio between 22% and 25% from 2018 through 2020. However, metrics weakened in 2021 with the utility exhibiting a CFO pre-WC to debt ratio of 19.8%, reflecting the 2020 and 2021 impact due the change in the FERC allowed ROE. PPLEU's base transmission formula ROE was adjusted to 9.95% from 11.18% per a settlement it reached with the PP&L Industrial Customer Alliance (PPLICA) and other parties in November



2021. Beginning on 1 June 2023, PPLEU's ROE increased to 10% based on the terms of the settlement and the company will continue to include a 50 basis point adder for its RTO membership. As of the latest twelve months (LTM) period ending 31 March 2025, CFO pre-WC to debt was 21%.

We expect the utility to produce stable and strong credit metrics, albeit slightly lower than historical averages, including CFO pre-WC to debt of around 21%, despite increasing capital expenditure over the over the next 2-3 years.

ESG considerations

PPL Electric Utilities Corporation's ESG credit impact score is CIS-3

Exhibit 5
ESG credit impact score

Source: Moody's Ratings

PPLEU's **CIS-3** indicates that its ESG considerations have a limited impact on the current rating, with potential for greater negative impact over time. It incorporates the company's environmental risk which includes physical climate risks that could potentially damage its assets as a result of extreme weather patterns and events; the inherent social risk for regulated utilities that are tied to demographic and societal trends; and governance considerations that do not pose a particular risk.

Exhibit 6
ESG issuer profile scores

Source: Moody's Ratings

Environmental

PPLEU's **E-3** issuer profile score reflects the company's physical climate risk that could increase the potential for damage to assets as a result of extreme weather patterns over time. It also incorporates limited carbon transition risk as it is an electric T&D utility as well as neutral to low water management, and waste and pollution risks.

Social

PPLEU's **S-3** issuer profile score is primarily related to the company's customer and regulatory relations as well as demographic and societal trends. The company's regulatory environment, as well as its ability to manage customer affordability, are important in considering the company's social risk.

Governance

PPLEU's **G-2** issuer profile score reflects our view that governance considerations do not pose a particular risk for the company. As a subsidiary of PPL Corp. and as a regulated utility, governance considerations include the financial policy and risk management of PPLEU's parent company as well as what is dictated by regulatory outcomes.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moodys.com. In order to view the latest scores, please click here to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Liquidity analysis

We expect PPLEU to maintain an adequate liquidity profile over the next 12-18 months. We anticipate that its liquidity will be supported by relatively stable and predictable cash flow and good access to the capital markets.

PPLEU's liquidity is supported by a $750 million syndicated credit facility that expires in December 2029. This credit facility is used primarily as a backstop for PPLEU's $650 million commercial paper program and to issue letters of credit. As of 31 March 2025, the credit facility had $694 million of available capacity. PPLEU's credit facility contains one financial covenant, a limitation on the ratio of debt to capitalization of 70%, which the company was in compliance with as of 31 March 2025. The facility does not contain a material adverse change clause for new borrowings.

Over the LTM period ending 31 March 2025, PPLEU generated cash flow from operations of approximately $1.15 billion, spent about $1.34 billion in capital investments and paid $435 million in dividends, resulting in negative free cash flow of approximately $625 million. Based on the company's planned capital investments, we expect PPLEU to remain in a negative free cash flow position over the next 12-18 months.

PPLEU's next long-term debt maturity is in February 2027, when $108 million of pollution control revenue bonds become due.

Parent company PPL is an important source of liquidity for PPLEU. As of 31 March 2025, PPL had consolidated bilateral and syndicated credit facilities totaling $3.65 billion (approximately $2.8 billion of it unused) and $312 million of cash on hand on a consolidated basis.

Rating methodology and scorecard factors

Moody's evaluates the financial performance of PPLEU under the Regulated Electric and Gas Utilities Methodology.

Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at ir.moodys.com under the heading "Investor Relations — Corporate Governance — Charter and Governance Documents - Director and Shareholder Affiliation Policy."
Moody's SF Japan K.K., Moody's Local AR Agente de Calificación de Riesgo S.A., Moody's Local BR Agência de Classificação de Risco LTDA, Moody's Local MX S.A. de C.V, I.C.V., Moody's Local PE Clasificadora de Riesgo S.A., and Moody's Local PA Calificadora de Riesgo S.A. (collectively, the "Moody's Non-NRSRO CRAs") are all indirectly wholly-owned credit rating agency subsidiaries of MCO. None of the Moody's Non-NRSRO CRAs is a Nationally Recognized Statistical Rating Organization.
Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.
Additional terms for India only: Moody's credit ratings, Assessments, other opinions and Materials are not intended to be and shall not be relied upon or used by any users located in India in relation to securities listed or proposed to be listed on Indian stock exchanges.
Additional terms with respect to Second Party Opinions and Net Zero Assessments (as defined in Moody's Ratings Rating Symbols and Definitions): Please note that neither a Second Party Opinion ("SPO") nor a Net Zero Assessment ("NZA") is a "credit rating". The issuance of SPOs and NZAs is not a regulated activity in many jurisdictions, including Singapore. JAPAN: In Japan, development and provision of SPOs and NZAs fall under the category of "Ancillary Businesses", not "Credit Rating Business", and are not subject to the regulations applicable to "Credit Rating Business" under the Financial Instruments and Exchange Act of Japan and its relevant regulation. PRC: Any SPO: (1) does not constitute a PRC Green Bond Assessment as defined under any relevant PRC laws or regulations; (2) cannot be included in any registration statement, offering circular, prospectus or any other documents submitted to the PRC regulatory authorities or otherwise used to satisfy any PRC regulatory disclosure requirement; and (3) cannot be used within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.

PPL ELECTRIC UTILITIES CORPORATION

Exhibit Regs. § 53.53

Part IV – Rate Structure and Cost Allocation

Docket No. R-2025-3057164

This book contains responses to each of the pertinent items contained in § 53.53, Part IV (Rate Structure and Cost Allocation) of the Commission's Regulations.

Pa. PUC v. PPL Electric Utilities Corp.

Docket No. R-2025-3057164

Index for Part IV of Filing Requirements

No.	Witness
IV-A	Various
IV-B	K. Arnold G. Olsen
IV-C	S. Wishart C. Schram
IV-D	S. Wishart B. Rimal
IV-E-1	B. Rimal
IV-E-2	S. Wishart

Q.1. Provide a summary schedule of the individual rate effects. For each state jurisdictional rate, show the following information for the test period elected:

1. Rate schedule designation.

2. For existing rates:
   a) Customers served as of the end period.
   b) Annual KWH sales
   c) Base rate revenues adjusted for any changes in base rate application that may have occurred during the test period.
   d) Tax Surcharge revenues.
   e) Energy Cost Adjustment clause revenues.
   f) Revenues received from other clauses or riders separately accounted for.
   g) Total of all revenues.

3. For proposed rates:
   a) Estimated number of customers whose charges for electric service will be increased or decreased as a result of this filing.
   b) Base rate revenues:
      i) Annual dollar amount of increase or decrease.
      ii) Percent change.
   c) Estimate Tax Surcharge revenues based on the assumption that the base rate changes proposed were in place.
   d) Estimate Energy Cost Adjustment clause revenues.
   e) Revenues received from other clauses or riders separately accounted for.
   f) Total of all revenues:
      i) Amount of total annual dollar changes.
      ii) Percent change.

4. Supplement the revenue summary to obtain a complete revenue statement of the electric business, that is, show delayed payments, other electric revenues, FERC jurisdictional sales and revenues, and all other appropriate revenue items and adjustments.

5. Develop the grand total showing total sales and revenues as adjusted and the various increases and decreases and percent effect as described above.

A.1. Schedule D-3 of Exhibit Fully Projected Future 1 provides the requested information.

Q. Provide a description of changes proposed for the new tariff:

1. For each rate schedule proposed to be modified.
2. For each rate schedule proposed to be deleted.
3. For each new rate schedule proposed to be added.

A. Please see PPL Electric St. Nos. 13, 14, 18 as well as PPL Electric Exhibits GEO-1 and LN-1.

Q. The annual revenue effect of any proposed change to any rate must be supported by a billing analysis. This may consist of the use of bill frequency distributions or individual customer billing records for the most recent annual periods available. All billing determinants should be displayed. The blocking and corresponding prices of the existing rate and the proposed rate should be applied to the determinants to derive the base rate revenues under both present and proposed rates. The derived base rate revenues should form the basis for measuring the annual base rate effect of the rates in question for the test periods.

A. Attachment IV-C provides a comparison of total base rate revenue under present rates and proposed rates.

The bill frequency distributions were prepared from customer records for the 12-month period July 1, 2024, through June 30, 2025. The attachment also includes total revenue calculations for the periods July 1, 2025, through June 30, 2026 (FTY) and July 1, 2026, through June 30, 2027 (FPFTY).

Current and proposed rates are applied to the appropriate billing volumes to calculate total revenues. Note that the lumen values provided for the SLE rate schedule are reflective of current lumen values.

Q. The effects of the proposed rates on monthly billing conditions should be provided as follows:

1. Residential Bill Comparisons

For each rate applicable to residential service, provide a chart or tabulation which shows the dollar and percentage effect of the proposed rate base rate on monthly bills ranging from the use of zero KWH to 5,000 KWH at appropriate intervals.

2. General Bill Comparisons

For each rate that requires both a billing demand (KW) and KWHs as the billing determinants, provide a tabulation or graphical comparison showing the percentage effect of the proposed rate base on monthly bills using several representative demand (KW) levels, the monthly KWH for each demand selected to be in load factor increments of 10% starting at 0% and ending at 100%730H), or by hours use increment that covers approximately 95% of the bills.

A. 1. Attachment IV-D provides a tabular comparison of monthly residential bills under PPL Electric's current rates and proposed rates for usage levels ranging from 0 to 5,000 kWh. The table provides the total dollar impact as well as the percentage change.

2. Attachment IV-D also provides a tabular comparison of average monthly bills with total dollar and percentage impacts for PPL Electric's General Service rate schedules. The tables include several representative demand levels and load factors ranging from 0% to 100% in 10% increments.

Q.1. Provide a costs study which allocates the total cost of service to each proposed tariff rate schedule. Tariff rate schedules may be combined for this purpose provided they are of a similar supply or end use nature. A statement describing which rates were combined and the reasons therefore should be submitted.

The rates of return for each tariff schedule as defined above should be determined at both the present and proposed rate levels. Base rate revenues should be used for there purpose unless there are good and sufficient reasons to include revenues derived from other sources. Should the latter be the case, an explanation of other revenue sources included and reasons therefore should accompany the cost allocation study.

The method selected for use in allocating costs to rate classes should include costs analyses based on:

a. Peak responsibility.

b. Average and excess, on a non-coincident demand basis.

c. Company preferred method if different from the above-referenced methods, with rationale behind the selection.

This study should include a statement of the source and age of the load data used in the determination of demand responsibilities, a description of any special studies used to prepare the cost study, and the most recent overall system line loss study.

The cost data used in the allocation study may be based on the test year.

A.1. Exhibits BR-1 and BR-2 provide the requested information.

Q.2. Provide comparisons in either graphical or tabular form showing cost, as defined in the cost of service study, and proposed base rate revenues and usage for all residential and demand/energy rate schedules. Demand shall be for representative loads for each demand/energy rate schedule.

A.2. Attachment IV-E-2 provides cost comparison tables for all residential and demand/energy rate schedules.

Q.3. Provide supporting schedules which indicate the procedures and calculations employed to develop the original cost plant and applicable reserves to the test year end as submitted in the current proceeding.

A.3. Attachment V-A-3a provides PPL Electric's plant in service as of June 30, 2026 based on actual plant balances as of June 30, 2025, as adjusted for 12 months of projected additions, retirements, and adjustments.

Reserves as of June 30, 2026 are based on actual reserves as of June 30, 2025, as adjusted for 12 months of projected depreciation provisions, retirements, and adjustments.

Attachment V-A-3b provides PPL Electric's plant in service as of June 30, 2027 based on projected plant balances as of June 30, 2026, as adjusted for 12 months of projected additions, retirements, and adjustments.

Reserves as of June 30, 2027 are based on projected reserves as of June 30, 2026, as adjusted for 12 months of projected depreciation provisions, retirements, and adjustments.

Projected additions are based on PPL Electric’s capital budget forecast for 2026 and 2027. Capital additions are identified by FERC plant account based on projects expected to be placed in service during the future and fully projected future test periods and retirements are estimated based on historical experience.

Projected depreciation provisions are based on projected plant balances and projected capital additions during the future and fully projected future test periods.

Q.4. Provide a schedule showing details of rate case adjustments.

A.4. The following adjustments have been made in the Fully Projected Future Test Year:

Original Cost Electric Plant in Service (in $000):

	Original Cost as of June 30. 2027
Distribution	
363.205 Computer Software (5 Yr)	$3,085
363.210 Computer Software (10 Yr)	$3,782
363.215 Computer Software (15 Yr)	$5,596
	$12,463
General	
397.210 Computer Software (10 Yr)	$327
397.215 Computer Software (15 Yr)	$13,090
	$13,417
Total	$25,880

Accumulated Book Depreciation and Depreciation Expense (in $000):

	Book Depreciation Reserve	Calculated Annual Accrual Amount
Distribution		
363.205 Computer Software (5 Yr)	$806	$806
363.210 Computer Software (10 Yr)	$303	$303
363.215 Computer Software (15 Yr)	$306	$306
	$1,415	$1,415
General		
397.210 Computer Software (10 Yr)	$3	$3
397.215 Computer Software (15 Yr)	$408	$408
	$411	$411
Total	$1,826	$1,826

Q. Provide a comparison of calculated depreciation accruals versus book accruals by function and by account if available.

A. Attachments V-B-1a and V-B-1b provide PPL Electric's calculated and book accruals by function and by account for the future test year ending June 30, 2026 and the fully projected future test year ending June 30, 2027, respectively.

Q. Supply a schedule by account or by depreciable group showing the survivor curve or interim survivor curve and annual accrual rate estimated to be appropriate:

a) For the purpose of this filing.

b) For the purpose of the most recent rate filing prior to the current proceeding.

c) Supply an explanation for any major change in annual accrual rate by account or by depreciable group.

d) Supply a comprehensive statement of major changes made in depreciation methods, procedures and techniques and the effect of the changes upon accumulated and annual depreciation, if any.

A. a) Attachment V-B-2a, columns 4 and 5, provides PPL Electric's survivor curve and annual estimated accrual rate for the future test year. Attachment V-B-2b, columns 4 and 5, provides PPL Electric's survivor curve and annual estimated accrual rate for the fully projected future test year.

b) Attachments V-B-2a and V-B-2b, columns 2 and 3, provide PPL Electric's survivor curve and annual estimated accrual rate for the most recent filing with the Commission.

c) Attachments V-B-2a and V-B-2b, column 6, provide an explanation for any change in annual accrual rate by account. Changes reflect plant and reserve activity, life characteristics and amortization of certain accounts.

d) The depreciation methods and procedures used in this filing are the same as those used in the previous filing. The survivor curve estimates are based on a service life study as described in Exhibit JJS-2 in the section titled, "Estimation of Survivor Curves," beginning on page II-2.

Q. Where the retirement rate actuarial method of mortality analysis is utilized, set forth representative examples including charts depicting the observed and estimated survivor curves and a tabular presentation of the observed and estimated life tables plotted on the chart. Other analysis results shall be subject to request.

A. Exhibit JJS 2 provides the observed and estimated survivor curves and life tables for all accounts analyzed by the actuarial method.

Q. Provide the surviving original cost plant at the appropriate test year date or dates by account or functional property group and include claimed depreciation reserves. Provide annual depreciation accruals where appropriate. These calculations should be provided for plant in service as well as other categories of plant, including but not limited to, contributions in aid of construction, customers' advances for construction, and anticipated retirements associated with construction work in progress claims, if applicable.

A. Attachments V-D-1a and V-D-1b provide PPL Electric's surviving original cost electric plant in service, accumulated book depreciation reserve, annual depreciation expense accruals, survivor curve, future depreciation accruals, and composite remaining life for the future test year as of June 30, 2026 and the fully projected future test year as of June 30, 2027. No claim is being made in this rate case filing for contributions in aid of construction or customer advances.

Q. Provide representative examples of detail calculations by vintage at account or at a more detailed level, as performed for these purposes. Other vintage detail calculations shall be subject to request.

A. Examples of detailed depreciation calculations by vintage within account at June 30, 2025 are set forth on pages II-7 through II-147 of Exhibit JJS 1; at June 30, 2026 are set forth on pages VII-7 through VII-148 of Exhibit JJS 2; and at June 30, 2027 are set forth on pages II-7 through II-148 of Exhibit JJS 3.

Q. Provide a description of the depreciation methods utilized in calculating annual depreciation amounts and depreciation reserves, together with a discussion of the significant factors which were considered in arriving at estimates of service life and forecast retirements by facilities, accounts or sub-accounts, as applicable.

A. The depreciation methods utilized in calculating annual and accrued depreciation are discussed in the section titled, “Calculation of Annual and Accrued Depreciation,” beginning on page IV-2 of Exhibit JJS 2.

Q.1. Provide the following unadjusted detailed schedules by function and by FERC account for the claimed test year and for each of the 3 preceding comparable years:

Balance sheet, in the form available.

A.1. Attachment VI-A provides the requested information.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025-3057164

PPL Electric Utilities Corporation

Statement No. 12

Direct Testimony of Andrew Elmore

Topics: Taxes

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Andrew W. Elmore. My business address is 645 Hamilton Street, Allentown, PA.

Q. By whom are you employed and in what capacity?

A. I am employed as Vice President – Tax by PPL Corporation ("PPL Corp."), which is the parent company of PPL Electric Utilities Corporation ("PPL Electric" or the "Company").

Q. What are your responsibilities as Vice President – Tax?

A. I have held this position since September 2020, and in that role, I am responsible for all aspects of PPL Corp.'s income tax compliance and planning, tax accounting, and financial reporting for Securities and Exchange Commission ("SEC") and regulatory purposes related to tax matters.

Q. What is your educational background?

A. I earned a Bachelor's degree in French and political science from the University of Massachusetts in Boston in 1989 and a Juris Doctor degree from the University of Kentucky in 1993.

Q. Please describe your professional experience.

A. From 1993 until 1996, I was employed as an associate at a law firm in Providence, RI. I then worked at Arthur Andersen in Boston until 2000 and subsequently at Deloitte in Boston until 2004. In the same year, I assumed a position at United Technologies Corporation in Hartford, CT until 2006. I then worked for Zimmer Biomet in Indiana until 2011 when I was employed by PPL. From 1996 through 2019 my primary practice area was international tax.

Q. What is the purpose of your testimony?

A. My testimony and accompanying exhibits describe and support PPL Electric's calculation of certain tax-related ratemaking adjustments to the retail rate base and operating expenses contained in the historic test year ("HTY"), future test year ("FTY"), and fully projected future test year ("FPFTY") retail rate base and operating expenses. In addition, my testimony describes the impacts to PPL Electric of significant federal tax legislation that has been enacted since the filing of the last rate proceeding.

Q. Are you sponsoring any exhibits in this proceeding?

A. Yes. I am sponsoring PPL Electric Exhibits AE-1 and AE-2 and portions of Part II of the filing requirements as noted on its index.

II. TAX ADJUSTMENTS

Q. Are you sponsoring any schedules in Exhibits Historic 1, Future 1 and Fully Projected Future 1?

A. Yes. I am sponsoring the following: Schedules B-5, C-6, D-16, D-17, D-18, and D-19 of Exhibits Historic 1, Future 1, and Fully Projected Future 1.

Q. What is shown on Schedules B-5 of Exhibits Historic 1, Future 1, and Fully Projected Future 1?

A. Schedules B-5 of Exhibits Historic 1, Future 1 and Fully Projected Future 1 set forth the Company's detailed statement of taxes for the 12 months ended June 30, 2025, June 30, 2026, and June 30, 2027, respectively. Those taxes include, but are not limited to, state and federal income taxes, state and federal taxes other than income taxes, and deferred taxes.

Q. What is shown on Schedules C-6 of Exhibits Historic 1, Future 1 and Fully Projected Future 1?

A. Schedules C-6 of Exhibits Historic 1, Future 1 and Fully Projected Future 1 reflect the balances of deferred income taxes at the end of the respective test years, including the tax deferrals related to Accelerated Cost Recovery System ("ACRS") and Modified Accelerated Cost Recovery System ("MACRS") property. The applicable ACRS/MACRS statute provides for mandatory normalization of federal tax benefits on post-1980 property. Accordingly, PPL Electric has claimed federal income tax normalization associated with ACRS/MACRS-related property in this filing, as well as

deferred income tax balances associated with plant-related book and tax basis differences such as Contributions in Aid of Construction ("CIAC"), tax repairs deduction under Internal Revenue Code Section ("Section") 162, tax capitalization of Section 263A costs and Section 174 Research and Development ("R&D") costs, etc. (collectively "basis differences") related to ACRS/MACRS property. It should be noted that the amounts shown for ACRS/MACRS property and basis differences have been reduced by deficient deferred taxes related to net operating losses which gave rise to those deferred tax balances. Please see testimony below discussing the Tax Cuts and Jobs Act for discussion on deficient deferred taxes. For the Historic and Future test years, deferred tax related to riders (Distribution System Improvement Charge and Smart Meter) have been removed from the ending balances. For the FPFTY, the incremental deferred tax liability arising from the items discussed are calculated on a prorated basis in accordance with Treasury Regulation Sec. 1.167(l)-1(h)(6)(ii).

Q. Please explain the "Adjustment to Taxes Other Than Income" shown on Schedules D-13.

A. Schedules D-13 of Exhibits Historic 1, Future 1, and Fully Projected Future 1 reflect Pennsylvania Gross Receipts Tax ("GRT") and Public Utility Realty Tax Act ("PURTA") adjustments, which are discussed in detail below. Any differences between actual tax amounts and the amounts reflected in these schedules will be captured in the State Tax Adjustment Surcharge ("STAS") rate filing and reflected in rates commencing on January 1 of each year after this proceeding.

Q. Please explain the Pennsylvania Gross Receipts Tax shown on Schedules D-16.

A. The adjustment to GRT is shown on Schedules D-16, page 1 for Exhibits Historic 1, Future 1, and Fully Projected Future 1. This adjustment reflects the GRT liability changes that will result from base rate revenue projections generated by the annualization of sales under present rates. The GRT impact of these revenue projections is reflected on page 2 of those schedules.

Q. Please explain the adjustment for PURTA on Schedules D-16.

A. The PURTA is calculated under present rates based on the state taxable value and PURTA millage rate as of the December 31, 2024, tax year per the Pennsylvania Department of Revenue's Public Utility Realty Tax Notice of Determination Letter dated July 30, 2025. The tax expense per books for the 12 months ended June 30, 2025, and the tax expense per budget for the 12 months ending June 30, 2026, and June 30, 2027, are deducted from the respective test year's amounts above to determine the adjustment for PURTA.

Q. Please explain the adjustment of federal and state income taxes, shown on Schedules D-17.

A. Schedules D-17 show, in column 1, the tax computation as recorded for the 12 months ended June 30, 2025, and as budgeted for the 12 months ending June 30, 2026, and June 30, 2027. Column 2 shows adjustments required to exclude revenues, expenses and income tax adjustments associated with the various Automatic Recovery Clauses and Riders. These clauses and riders include:

Generation Service Charges ("GSC-1" and "GSC-2")

Act 129 – Energy Efficiency Rider Phase 4 ("ACR 4")

Transmission Service Charge ("TSC")

Universal Service Rider ("USR")

Competitive Enhancement Rider ("CER")

Purchase of Receivables ("POR)

Merchant Function Charge ("MFC")

Distribution System Improvement Charge ("DSIC") (excluded in 12 months ended June 30, 2025, and June 30, 2026)

Smart Meter Rider – Phase 2 ("SMR 2") (excluded in the 12 months ended June 30, 2025, and June 30, 2026)

Tax Cuts and Jobs Act ("TCJA")

Storm Damage Expense Rider ("SDER")

Column 3 shows the derivation of the revenues, expenses and tax adjustments for PPL Electric's combined transmission and distribution ("T&D") operations only. Column 4 shows the various adjustments for a proper computation of taxable income on a pro forma basis at present rates. Column 5 shows the pro forma income tax computation at present rates.

Taxable income and the tax computations are adjusted in Column 4 for the following reasons:

- To reflect the effect on taxable income of adjustments to revenue and expense set forth on Schedules D-2 and to reflect other changes in taxable income.

- To eliminate the effect of prior year tax adjustments, provisions for possible tax deficiencies and non-plant deferred taxes under flow-through ratemaking on the books for the 12 months ended June 30, 2025.
- To eliminate the effect of the non-plant deferred taxes under flow-through ratemaking reflected in the forecasts for the 12 months ended June 30, 2026, and June 30, 2027.

Q. Please describe how depreciation is calculated for tax purposes.

A. In general, depreciation for tax purposes is computed starting with the tax basis of the property and using various depreciation methods and rates that differ from those used in computing book depreciation. Tax depreciation is typically, if not invariably, higher than book depreciation, resulting in lower tax basis in assets compared to book basis.

In computing tax depreciation for this filing, PPL Electric applied the same methods used in its prior base rate proceedings and its Federal and Pennsylvania income tax returns. That is, for property acquired after 1980, PPL Electric uses the ACRS, as provided for in the Economic Recovery Tax Act of 1981, and the MACRS, as provided for in the Tax Reform Act of 1986. In addition, PPL Electric adopted, for income tax purposes, a broader view of "unit of property" related to its ACRS/MACRS property. As a result, those components of property that are "functionally interdependent" can be considered a distinct unit of property and, as such, certain expenditures for repairs to this property can be currently deducted for tax purposes.

Q. Can you elaborate on the adjustment related to annualized interest?

A. This adjustment is the result of adjusting the interest deduction based on the test year-end rate base, as shown on Schedules D-17, page 3. Because customers pay a return on only these amounts, the interest associated with this investment is properly applied to PPL Electric's T&D operations for ratemaking purposes.

Q. Please summarize the effects of these tax adjustments.

A. Recognition of all tax adjustments reflected on Schedules D-17 results in a net decrease in taxable income for the HTY, FTY, and FPFTY. Taxable income is the basis for computing both federal and Pennsylvania income taxes.

The actual Pennsylvania Corporate Net Income Tax rate is being phased down over several years, starting with 8.49% for 2024, 7.99% for 2025, 7.49% for 2026 and 6.99% for 2027. The test years will reflect a blended Pennsylvania Corporate Net Income Tax Rate due to test year activity over two calendar year periods with different state tax rates. The federal income tax is computed at the current 21% tax rate. For federal income tax purposes, the amount of Pennsylvania income tax is an allowable deduction. Details of the computations of all taxes incurred as a result of the proposed revenue increase are shown on Schedules D-17, page 4.

Q. Please explain Schedules D-18 "Adjustment to Provision for Deferred Income Taxes" for the test years.

A. Normally, deferred taxes arise in connection with expenses which, for various reasons, are recorded on the books as an expense in a different year and/or amount than the same

item is allowed as an income tax deduction. This is referred to as a book/tax timing difference. Generally Accepted Accounting Principles ("GAAP"), which are prescribed by the Financial Accounting Standards Board ("FASB"), require that the tax savings related to an expense item be recorded on the books at the same time as the expense item is recorded. For example, if the expense item is deducted for book purposes in a year subsequent to the year it is deducted for tax purposes, a deferred tax charge is recorded on the income statement and a liability for such tax is recorded on the balance sheet in the year the tax deduction occurs. The same principle also applies to revenue items.

Schedules D-18 show the normalization of the net deferred taxes recorded on the books for the 12 months ended June 30, 2025, and as budgeted for the 12 months ending June 30, 2026, and June 30, 2027. For all test years, the specific items covered by deferred taxes arise in connection with timing differences, as discussed above.

Regarding Schedules D-18, PPL Electric uses ACRS/MACRS in computing tax depreciation on post-1980 property additions. Schedules D-18 reflect the mandatory deferral of the federal income tax effects of ACRS/MACRS based on the tax plant balances at June 30, 2025, 2026, and 2027. Schedules D-18 also reflect the deferral of income taxes associated with basis differences related to ACRS/MACRS property.

Deferred taxes are adjusted in column 4 for the following reasons:

- To remove deferred taxes on non-plant related timing differences to reflect Pennsylvania flow-through ratemaking.
- To eliminate the effect of prior year tax adjustments and provisions for possible tax deficiencies recorded for the 12 months ended June 30,

2025.

- To reflect the deferred tax impact of pro forma adjustments on plant-related timing differences discussed above.

Q. Please explain Schedules D-19 "Adjustment to Amortization of Deferred Investment Tax Credit."

A. Schedules D-19 adjust the amortization of the investment tax credit to reflect a full year's amortization based on the remaining balance of unamortized investment tax credit as of June 30, 2025, 2026, and 2027. If applicable, Schedules D-19 will also include new investment tax credits for the test years.

II. ACT 40 REQUIREMENTS

Q. Mr. Elmore, are you familiar with Section 1301.1 of the Public Utility Code, which is otherwise known as Act 40 of 2016?

A. Yes, I am. The legislation, among other things, eliminated the use of consolidated tax savings adjustments for setting rates for public utilities in Pennsylvania. Subsection (b) of Section 1301.1 requires a utility to demonstrate that it shall use at least 50 percent of what otherwise would have been the revenue requirement associated with a consolidated tax savings adjustment to support reliability or infrastructure related to the rate-base eligible capital investment and that the other 50 percent shall be used for general corporate purposes. However, it is also my understanding that this subsection (b) "shall no longer apply after December 31, 2025," under its own terms. 66 Pa. C.S. § 1301.1(c)(1). My understanding is predicated in part on the advice of counsel.

Q. Has the Company calculated what would have been the ratemaking level of a consolidated tax savings adjustment for PPL Electric prior to the enactment of Section 1301.1 of the Public Utility Code?

A. As explained above, subsection (b) no longer applies after December 31, 2025. Because the Commission's Final Order in this proceeding will be entered after the expiration of subsection (b), the Company maintains that it is not required to present that calculation.

Notwithstanding, a calculation of the consolidated tax adjustment for that purpose, using the modified effective tax rate methodology traditionally used by the Commission prior to the enactment of Act 40, is set forth in PPL Electric Exhibit AE-1.

Q. If Section 1301.1(b) of the Public Utility Code no longer applies as of December 31, 2025, and the Company's claim in this case is based upon an FPFTY that ends after the date that it no longer applies, why is the Company providing this calculation in this proceeding?

A. It is my understanding that Section 1301.1(c)(2) of the Public Utility Code states that Act 40 "shall apply to all cases where the final order is entered after the effective date of this section." Also, the Commission theoretically could opt not to suspend the proposed rate increase for seven months, although it is my understanding that is the Commission's typical procedure in base rate cases. Therefore, the proposed rates technically could become effective before Section 1301.1(b)'s December 31, 2025 expiration date. Due to this timing, the Company is providing what would have been

the ratemaking level of a consolidated tax savings adjustment for PPL Electric prior to the enactment of Section 1301.1 of the Public Utility Code.

Q. Is the Company's presentation in this filing consistent with the Commission's and the Commonwealth Court's treatment of PA Act 40 of 2016?

A. Yes. I believe that the Company's presentation in this filing is consistent with the Commission's determination on Act 40 in UGI Utilities, Inc. – Electric Division's 2018 Base Rate Proceeding at Docket No. R-2017-2640058 as well as the Commonwealth Court's order affirming the Commission's order on appeal.

III. TAX LEGISLATION

Q. Please explain the significant changes made by the TCJA?

A. The TCJA was enacted in 2017 after PPL Electric's previous rate case. The more significant changes applicable to regulated public utilities were: (1) the reduction in the U.S. federal corporate income tax rate from a top marginal rate of 35% to a flat rate of 21%, effective January 1, 2018; (2) limitations on the tax deductibility of interest expense, with certain exceptions from such limitations, including an exception for regulated public utilities; (3) full current year expensing of capital expenditures with an exception for regulated public utilities that qualify for the exception to the interest expense limitations; and (4) the continuation of certain rate normalization requirements for accelerated tax depreciation benefits.

Q. Please explain how TCJA impacted PPL Electric?

A. On the date of enactment, PPL Electric remeasured its deferred tax assets and liabilities due to the reduction of the U.S. Federal Corporate income tax rate to 21%. The changes in accumulated deferred income taxes ("ADIT"), described as excess or deficient deferred taxes, were, in large part, recorded as an offset to either a regulatory asset or regulatory liability to be reflected in future rates charged to customers. A combination of IRS normalization requirements and utility commission approvals dictate how the excess and deficient deferred taxes reflected in the regulatory assets and liabilities are amortized and included in customer rates. Excess ADIT balances related to federal method and life book and tax depreciation differences, known as "protected" ADIT, are governed by IRS normalization requirements and must be amortized using the Average Rate Assumption Method ("ARAM"). All other excess ADIT balances ("unprotected ADIT") are amortized in accordance with regulatory approvals. The Commission's orders at Docket Nos. M-2018-2641242 and P-2019-3013366 provided a temporary methodology to pass the tax benefits of the amortization of excess ADIT to customers until utilities within the state filed their next rate case. PPL Electric has not filed a rate case following the enactment of the TCJA until the current year. Consequently, PPL Electric has prepared the Commission-issued templates to include the amortization of excess and deficient ADIT and tax rate changes on taxable income in a TCJA rider to pass the tax benefits of TCJA to customers. The TCJA customer credits will no longer be administered through the TCJA rider when new customer rates go into effect.

Q. Can you explain the provisions and impacts of Public Law No: 119-21 (H.R. 1, 119th Congress), otherwise known as the One Big Beautiful Bill Act ("OBBBA")?

A. As a general matter, the OBBBA will not have a material impact on PPL Electric. For purposes of clarity regarding the relevant provisions of the OBBBA, please see attached PPL Electric Exhibit AE-2 for a summary of the tax-related provisions of the OBBBA.

Q. Does this conclude your direct testimony?

A. Yes, it does.

PPL Electric Utilities Corporation

The One Big Beautiful Bill Act ("OBBBA" H.R. 1) Analysis
All references to sections are to sections of the Internal Revenue Code of 1986, as amended, unless otherwise indicated

OBBBA Section	OBBBA Section Title	Corresponding IRC Section	IRC Description	Company Analysis
Sec. 70301	Full expensing for certain business property.	168	Bonus depreciation	Regulated utilities are not permitted to take bonus depreciation. Section 168(k)(9)(A) provides "any property which is primarily used in a trade or business described in clause (iv) of Section 163(j)(7)(A)" does not constitute qualified property for the bonus depreciation deduction. Section 163(j)(7)(A)(iv) provides that the term "trade or business" does not include public utilities.
Sec. 70302	Full expensing of domestic research and experimental expenditures.	174A	Research and experimental expenditures	Under The OBBBA, research and experimentation costs can now be expensed immediately for tax years beginning after 12/31/2024. Additionally, taxpayers are required to reduce domestic research or experimental expenditures by the amount of any research credit under section 41; alternatively, the taxpayer may elect to claim a reduced research credit. The Company is evaluating the changes to the applicable statute, but does not anticipate material impacts.
Sec. 70303	Modification of limitation on business interest.	163	Business interest limitation	The Company is exempt from the limitation as a regulated business pursuant to section 163(j)(7)(A)(iv), as enacted by the Tax Cuts and Jobs Act of 2017.
Sec. 70304	Extension and enhancement of paid family and medical leave credit.	45S	FMLA tax credit	In general, the OBBBA makes the family and medical leave credit permanent and lowers the employee eligibility threshold from 12 months to 6 six months. The Company is evaluating the changes to the applicable statute, but does not anticipate material impacts.
Sec. 70305	Exceptions from limitations on deduction for business meals.	274	Business meals	This section amends the limitation on the deductibility of meals provided at the convenience of an employer under Code section 274(o). Code section 274(o) refers to the sell of food and beverages to customers and also providing meals to their employees (e.g., restaurants), and for fishing vessels. Not applicable to the Company.
Sec. 70306	Increased dollar limitations for expensing of certain depreciable business assets.	179	Expensing depreciable business assets	The Company exceeds the dollar limitations of section 179(b)(1) and therefore cannot avail itself of section 179. No impact to the Company.
Sec. 70307	Special depreciation allowance for qualified production property.	168	Depreciation on qualified production property	No impact to current Company practice. The Company does not qualify under this provision because, among other things, it does not produce agricultural production and chemical products under section 168(n)(2)(E).
Sec. 70308	Enhancement of advanced manufacturing investment credit.	48D	Advanced manufacturing investment credit	The OBBBA provides for a 35% credit for qualified investments in an advanced manufacturing facility that produces semiconductors or semiconductor manufacturing. Not applicable to the Company.
Sec. 70341	Coordination of business interest limitation with interest capitalization provisions.	163	Business interest limitation	The Company is exempt from business interest limitation as a regulated business pursuant to section 163(j)(7)(A)(iv), as enacted by the Tax Cuts and Jobs Act of 2017. The Company does follow the capitalized interest provisions under section 263A, among others, Accordingly, the Company is not impacted from this change.

OBBBA Section	OBBBA Section Title	Corresponding IRC Section	IRC Description	Company Analysis
Sec. 70342	Definition of adjusted taxable income for business interest limitation.	163	Business interest limitation	The Company is exempt from business interest limitation as a regulated business pursuant to section 163(j)(7)(A)(iv), as enacted by the Tax Cuts and Jobs Act of 2017. Additionally, the Company has no foreign operations. Accordingly, the Company is not impacted from this change.
Sec. 70501	Termination of previously-owned clean vehicle credit.	25E	Previously-owned clean vehicle credit	The OBBBA terminates the section 25E credit for vehicles acquired after September 30, 2025. No impact to the Company.
Sec. 70502	Termination of clean vehicle credit.	30D	Clean vehicle credit	The OBBBA terminates the section 30D credit for vehicles acquired after September 30, 2025. No impact to the Company.
Sec. 70503	Termination of qualified commercial clean vehicles credit.	45W	Qualified commercial clean vehicles credit	The OBBBA terminates the section 45W credit for vehicles acquired after September 30, 2025. No impact to the Company.
Sec. 70504	Termination of alternative fuel vehicle refueling property credit.	30C	Alternative fuel vehicle refueling property credit	The OBBBA terminates the section 30C credit for refueling equipment placed in service after June 30, 2026. No impact to the Company.
Sec. 70507	Termination of energy efficient commercial buildings deduction.	179D	Efficient commercial buildings deduction	The OBBBA terminates the section 179D deduction for certain energy efficient buildings beginning construction after June 30, 2026. No impact to the Company.
Sec. 70509	Termination of cost recovery for energy property.	168	Cost recovery for energy property	The OBBBA terminates the five-year accelerated depreciation for energy property where construction begins after December 31, 2024. However, energy property that qualifies for section 45Y PTC or section 48E ITC will continue to be treated as five-year MACRS property under section 168(a). The Company does not anticipate any impacts based on anticipated timelines of contemplated energy property construction.
Sec. 70510	Modifications of zero-emission nuclear power production credit.	45U	Nuclear power production credit	The OBBBA applies Foreign Entity of Concern (FEOC) restrictions for specified foreign entities for taxable years beginning after enactment. Not applicable as the Company does not qualify for 45U credits.
Sec. 70511	Termination of clean hydrogen production credit.	45V	Clean hydrogen production credit	The OBBBA terminates the section 45V credit for projects beginning construction after December 31, 2027. No impact to the Company.
Sec. 70512	Termination and restrictions on clean electricity production credit.	45Y	Clean electricity production credit	The OBBBA terminates the production tax credit for wind and solar facilities that are placed in service after December 31, 2027. The termination does not apply to solar and wind facilities where construction begins within 12 months after the date of enactment. The Company does not anticipate any impacts based on anticipated timelines of contemplated energy property construction.
Sec. 70513	Termination and restrictions on clean electricity investment credit.	48E	Clean electricity investment credit	The OBBBA terminates the investment tax credit for wind and solar facilities that are placed in service after December 31, 2027. The termination does not apply to solar and wind facilities where construction begins within 12 months after the date of enactment. The Company does not anticipate any impacts based on anticipated timelines of contemplated energy property construction.
Sec. 70514	Phase-out and restrictions on advanced manufacturing production credit.	45X	Advanced manufacturing production credit	The OBBBA terminates the 45X credit for certain components beginning in years 2028 and beyond. Not applicable as the Company does not qualify for 45X credits.
Sec. 70515	Restriction on the extension of advanced energy project credit program.	48C	Advanced energy project credit	The OBBBA restricts funds returned from forfeited section 48C credits from being later reissued. The Company does not qualify for 45C credits.

OBBBA Section	OBBBA Section Title	Corresponding IRC Section	IRC Description	Company Analysis
Sec. 70521	Extension and modification of clean fuel production credit.	45Z	Clean fuel production credit	This credit relates to certain transportation fuel. The OBBBA extends the period in which this credit can be claimed to December 31, 2029. The Company does not qualify for 45Z credits.
Sec. 70522	Restrictions on carbon oxide sequestration credit.	45Q	Carbon oxide sequestration credit	The OBBBA equalizes the credit values for carbon oxide disposed in secure geological storage and that which is used as a tertiary injectant and disallows the credit for any taxable year after the date of enactment in which the taxpayer is treated as either a specified foreign entity or foreign-influenced entity. The Company does not qualify for 45Q credits.
Sec. 70523	Intangible drilling and development costs taken into account for purposes of computing adjusted financial statement income.	56A	Intangible drilling costs	The OBBBA permits a deduction for purposes of the 15% corporate alternative minimum tax for intangible drilling and development costs for oil, gas, and geothermal wells for taxable years beginning after December 31, 2025. Not applicable to the Company.
Sec. 70524	Income from hydrogen storage, carbon capture, advanced nuclear, hydropower, and geothermal energy added to qualifying income of certain publicly traded partnerships.	7704	Definitions	Not applicable as the Company is not a publicly traded partnership.
Sec. 70603	Excessive employee remuneration from controlled group members and allocation of deductions.	162	Excessive employee remuneration	The OBBB adds an entity aggregation rule in section 162(m) and provides that remuneration paid to a specified covered employee by any member of the controlled group is aggregated to determine the loss of deduction for amounts over $1 million. No impact to current Company practice.
Sec. 70426	1-percent floor on deduction of charitable contributions made by corporations.	170	Charitable contribution deduction	Beginning in 2026, the OBBBA provides that corporate taxpayers may claim a charitable deduction for any taxable year only to the extent that the aggregate of total contributions exceeds 1% of the corporation's taxable income and does not exceed 10% of its taxable income. The Company is evaluating the impact of the statute, but does not anticipate material impacts.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025-3057164

PPL Electric Utilities Corporation

Statement No. 13

Direct Testimony of Katelyn Arnold

Topics: **Cash Working Capital**
Roll-in of Riders
CER Elimination
Uncollectible Accounts, Purchase of Receivables Program, and Merchant Function Charge
Storm Damage Expense Rider
Revenue Forecast

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Katelyn Arnold. My business address is 827 Hausman Road, Allentown, PA 18104-9392.

Q. By whom are you employed and in what capacity?

A. I am employed by PPL Services Corporation ("PPL Services"), a subsidiary of PPL Corporation and an affiliate of PPL Electric Utilities Corporation ("PPL Electric" or the "Company") as Manager – Regulatory Strategy & Rates.

Q. What are your responsibilities as Manager – Regulatory Strategy & Rates?

A. I am responsible for developing, monitoring, and communicating PPL Electric's positions on and responses to regulatory, legislative, and public policy issues at both the state and federal level; primarily, in the areas of industry structure, retail and wholesale markets, rates, customer impacts, and other related topics. I am also responsible for the development and execution of rate-related revenue analysis and reporting, including auditing controls and requirements, rate compliance, rate case success for the regulated electric business, and ad-hoc analysis to optimize business planning.

Q. What is your educational background?

A. I graduated from Lafayette College in 2017 with a Bachelor of Arts in Government & Law and Economics. I graduated from Lehigh University in 2022 with a Master of Business Administration degree.

Q. Please describe your professional experience.

A. In 2018, I was employed by PPL Services as a Financial Analyst in the Treasury Department where I supported the Accounts Payable function. In 2020, I moved into a Regulatory Policy Specialist role in PPL Services. In 2022, I was promoted to Sr. Regulatory Policy Specialist. In 2023, I assumed the role of Manager – Regulatory Strategy & Compliance, and in July 2024 my role was expanded to Manager – Regulatory Strategy & Rates, which is my current role.

Q. What is the purpose of your testimony?

A. I will testify about the Company's cash working capital, the roll-in of various riders into base rates (including the revenues and plant associated with the Distribution System Improvement Charge ("DSIC")), the elimination of the Company's Competitive Enhancement Rider ("CER"), the Company's uncollectible accounts (including their relation to the Purchase of Receivables ("POR") Program and Merchant Function Charge ("MFC")), the Company's modifications to its Storm Damage Expense Rider ("SDER"), and the Company's revenue forecast.

Q. Are you sponsoring any exhibits in this proceeding?

A. Yes, I am sponsoring Exhibit KEA 1.

Q. Are you sponsoring any schedules in this proceeding?

A. Yes. I am sponsoring filing requirements I-A-3, and II-B-4 and co-sponsoring filing requirement IV-B. I am also sponsoring or co-sponsoring Schedules C-4, D-8, D-9, and D-13 in Exhibits Historic 1, Future 1, and Fully Projected Future 1.

II. CASH WORKING CAPITAL

Q. Schedules C-4 of Exhibits Historic 1, Future 1, and Fully Projected Future 1 show details of PPL Electric's claim for cash working capital. Would you explain these schedules?

A. Schedules C-4 of Exhibits Historic 1, Future 1 and Fully Projected Future 1 are computations of PPL Electric's average investment in cash working capital. There are four major components in this computation: cash working capital required for operation and maintenance ("O&M") expenses; funds invested in prepayments; an adjustment for accrued taxes and an adjustment for interest payments.

Q. Please explain these four components.

A. Page 2 of Schedules C-4 shows the first component, which is cash working capital required for O&M expenses. There are two components to this calculation: revenue lag and expense lag. With respect to the revenue lag, PPL Electric bills its customers once every month, but the due date for payment varies between 15 and 30 days from the billing date. On this basis, there is a considerable span of days between the time electricity is furnished to a customer and the time the customer pays for such electricity. This span commonly called the revenue lag, averages 36 days for customers with 15-

day due dates, 59 days for customers with 20-day due dates, and 42 days for customers with 30-day due dates. The average lag in receipt of revenues from all these sources is 47.8 days on a dollar-weighted basis.

With respect to the expense lag, in most instances, PPL Electric must pay its bills for payroll, employee benefits, support group costs and other operating expenses prior to the time it is able to collect the amount due for the service giving rise to these expenses. PPL Electric has examined its records to determine, as to the major categories of expense, the average span of days between the time an expense is incurred and the time it is paid. On page 2 of Schedule C-4 of Exhibit Historic 1, the average span of days for major categories of expense is shown. This lag ranges from 12 days to 67 days for various types of costs. The overall average for all expenses is 42.6 days. Thus, the average net lag between the payment of expenses and the receipt of the related revenue is 5.2 days (47.8 days less 42.6 days). To cover its expenses and continue to conduct its business during this time lag, PPL Electric must provide a cash investment, which is the first component of its cash working capital claim.

The second major component of cash working capital is funds invested in prepayments, which the Company uses to pay for an expense in advance. This amount is shown on page 3 of Schedules C-4. In conducting its electric business, PPL Electric must pay certain costs prior to the time such items are properly charged to expense for accounting and ratemaking purposes. For example, the Commission's annual assessment must be prepaid but is expensed monthly over the period to which it applies. Costs of this nature initially are recorded in FERC Account 165, Prepayments, and subsequently are charged to expense from this account.

The claim for prepaid expenses is based on the 13-month average of the various items included in Account 165. This amount has been claimed as a component of cash working capital for each of the three test years presented in this proceeding.

The third component of cash working capital is the adjustment for accrued taxes, which is shown in detail on page 4 of Schedules C-4. In the case of federal income tax, estimated payments must be made on April, June, September and December 15 of the year to which the tax is applicable. Because revenues are collected from customers monthly, these funds are temporarily available for payment of other costs. PPL Electric's computations indicate that funds available from these taxes average 11.62% of the federal income tax due.

Presently, the Pennsylvania income tax has the following pattern of required estimated payments:

- 25% on March 15
- 25% on June 15
- 25% on September 15
- 25% on December 15

PPL Electric's computations indicate that the funds available from these taxes average 9.54% of the Pennsylvania income tax due.

The Pennsylvania gross receipts tax must be paid on an estimated basis by March 15 of the year to which the tax is applicable. Because revenue is collected from customers monthly, funds must be provided by investors to pay these taxes prior to the collection of revenues from customers. PPL Electric's computations indicate that the funds which must be provided for this purpose average 27.96% of the tax due. This

adjustment is based on the total Pennsylvania gross receipts tax which must be paid at the 59 mill rate actually in effect.

The Pennsylvania Public Utility Realty Tax must be paid on an estimated basis by May 1 of the year to which the tax is applicable. Because revenue is collected from customers monthly, funds must be provided by investors to pay these taxes prior to the collection from customers. PPL Electric's computations indicate that funds which must be provided for this purpose average 7.13% of the tax due.

The net effect of these various accrued tax adjustments is an increase in PPL Electric's cash working capital requirement as shown on page 4 of Schedules C-4.

The fourth component of cash working capital is an offsetting adjustment for the funds applicable to debt interest payments, which are shown on page 5 of Schedules C-4. PPL Electric "theoretically" has unrestricted use of these funds from the time of the monthly collection from customers until the payment of interest and on a semi-annual or quarterly basis. PPL Electric does not agree with the appropriateness of such a reduction to the rate base. However, this adjustment has been made to facilitate the adjudication of this filing and in compliance with the Commission's current policy.

Q. Has PPL Electric changed the methodology that it uses to calculate its claim for cash working capital from that used in previous base rate proceedings?

A. No. PPL Electric has not changed the methodology used to calculate its claim for cash working capital. My understanding is that the Company has used the same methodology for more than 30 years, and this Commission has approved the Company's use of this methodology in numerous base rate proceedings during that period.

III. ROLL-IN OF RIDER MECHANISMS

Q. What rider mechanisms does the Company propose rolling into base rates?

A. First, the Company proposes to roll in the Tax Cuts and Jobs Act ("TCJA") Rider into base rates. The new corporate tax rate established by the TCJA is reflected in the Company's base rates in this proceeding, so the rider mechanism is no longer necessary. Additionally, the Company is eliminating the TCJA Rider from its Retail Tariff as of June 30, 2026, as required by the Commission's Orders dated May 17, 2018, at Docket No. R 2018 3000775, and at Docket M-2018-2641242.

Second, regarding the Smart Meter Rider – Phase 2 ("SMR-2"), PPL Electric proposes to roll the remaining net rate base for the Smart Meter Pilot Programs into base rates, and to close the existing SMR tariff provisions effective June 30, 2026. The Company's smart meter technology essentially has been fully deployed, so the rider mechanisms are no longer necessary.

Third, the Company has included the costs of its existing DSIC in base rates, as required by Section 1358(b) of the Public Utility Code. The Company is proposing to include the capital investment, associated depreciation, and tax effects for the DSIC in base rates. The Company will then reset its DSIC to 0% upon implementation of new base rates. As a result, the cap for the DSIC will be reset to 5% instead of the 7.5% approved by the Commission in PPL Electric's recent DSIC Cap Waiver proceeding.[1]

[1] *See Petition of PPL Electric Utilities Corp. for a Waiver of the Distribution System Improvement Charge Cap of 5% of Billed Revenues*, Docket Nos. P-2024-3048732, et al. (Order entered Feb. 28, 2025).

IV. ELIMINATION OF COMPETITIVE ENHANCEMENT RIDER (CER)

Q. What is the CER?

A. The CER was designed to recover the annual costs associated with the Company's competitive retail electricity market enhancement initiatives and related consumer education programs. Currently, the CER charge is negative $0.01 through December 31, 2025.

Q. What is the Company proposing with respect to the CER?

A. PPL Electric proposes to eliminate the CER from its tariff. Currently, the only costs being recovered through the CER are the costs associated with administering the Eligible Customer List ("ECL"), which will now be updated every five years.[2] As such, PPL Electric proposes to eliminate the CER and, instead, to rely on base rates to recover the costs of administering the ECL. As seen in Schedules D-8 in Exhibits Historic 1, Future 1, and Fully Projected Future 1, the Company has made pro forma adjustments to reflect the recovery of these costs through base rates as opposed to the CER, which is being eliminated.

V. UNCOLLECTIBLE ACCOUNTS, PURCHASE OF RECEIVABLES (POR) PROGRAM, AND MERCHANT FUNCTION CHARGE (MFC)

Q. What is the Company's claim for customer uncollectible accounts expense in this proceeding?

A. The Company's claim for uncollectible expense for the fully projected future test year

[2] *See Guidelines for Eligible Customer Lists*, Docket No. M-2010-2183412 (Order entered Mar. 13, 2025).

("FPFTY") is $38 million. The claimed bad debt write-off percentage is 1.80% for residential customers, 0.26% for small commercial & industrial ("C&I") customers and 0.30% for large C&I customers. The calculation of the Company's claim is set forth in Exhibit KEA 1, which is attached to this testimony.

Q. Is PPL Electric proposing to use these percentages for the MFC and POR Program?

A. Yes. The Company proposes to use a value of 1.80% for residential POR and MFC and a value of 0.26% for small commercial & industrial POR and MFC.

VI. STORM DAMAGE EXPENSE RIDER (SDER)

Q. Please describe the Company's SDER.

A. Approved as part of the Company's 2015 Rate Case, the SDER is a Section 1307(a) automatic adjustment rider that recovers only actual, experienced storm damage operating and maintenance expenses. These storm damage expenses are appropriate for recovery through this surcharge mechanism because they are easily identifiable and outside the Company's control. The SDER currently applies only to expenses from Commission-reportable storms.[3] The storm damage expenses from non-reportable storms are currently recovered through base rates and not through the SDER. The SDER recognizes that base rates currently provide for recovery of $14.7 million annually in storm damage expenses for reportable storms. The SDER recovers from

[3] Reportable storms are those that cause unscheduled service interruptions in a single event to 2,500 or more customers for six or more consecutive hours; non-reportable storms are all other storms. See 52 Pa. Code § 67.1(b).

customers or refund to customers, as appropriate, only applicable expenses from reportable storms that are less than or greater than $14.7 million recovered annually through base rates. Of note, there is another $5.3 million in current base distribution rates associated with the amortization of extraordinary storms as approved in the Company's 2015 distribution base rate case. Combined, this reflects the approximately $20 million used as the baseline in the annual SDER rate filing.

Storm damage expenses consist of those expenses incurred to remediate storm damage to the Company's distribution system, including, but not limited to: (1) overtime and premium wages of the Company's employees; (2) costs of outside service providers and mutual aid utilities employed by the Company during storm restoration efforts; (3) materials and supplies used to repair or replace damaged property; (4) overhead charges associated with storm damage expenses, including wages and benefits; (5) transportation; (6) purchasing and stores charges; (7) expediting expenses for the reasonable and extra costs to make temporary repairs and to expedite the permanent repair or replacement of damaged property; and (8) expenses of providing services to customers whose electric service has been interrupted. Straight-time wages and benefits and expenses reimbursed by others are excluded from the SDER, and capitalized costs of repairing or replacing damaged facilities are excluded from the SDER.

Under the Commission-approved SDER, expenses from major storm events are recovered over three years, with interest. The purpose of this extended recovery period is to improve the stability of rates under the SDER. Otherwise, the SDER could vary, from time to time, especially following major storm events such as the Winter Storms

Riley & Quinn in March 2018.

Furthermore, the SDER caps the total annual revenues collected under the SDER at an amount not to exceed 3% of the total intrastate operating revenues billed to customers, exclusive of amounts recovered under the State Tax Adjustment Surcharge ("STAS").

Q. Is the Company proposing to change the amount of storm damage expenses associated with Commission-reportable storms that are recovered through base rates?

A. Yes. The current, assumed level of $14.7 million in storm damage expenses for reportable storms is insufficient based on the Company's experience. As explained by PPL Electric witness Lookup (PPL Electric St. No. 16), the Company has been experiencing Commission-reportable storms in greater number, severity, and frequency. As a result, an increasing amount of storm damage expenses associated with Commission-reportable storms have been recovered through the SDER. Because the SDER is capped at 3% of total intrastate annual revenues, PPL Electric must update the base level of storm damage expenses associated with Commission-reportable storms, or else the Company may lose the opportunity to timely recover those associated costs. As such, PPL Electric proposes to increase the amount of storm damage expenses in its base distribution rates associated with Commission-reportable storms to $32 million.

Q. Has the Company exceeded this 3% cap in the past?

A. Yes, the Company exceeded the 3% cap in 2024 for the 2025 rate period. As a result,

PPL Electric recorded a regulatory asset totaling $11,336,169.67 for SDER-eligible storm costs in excess of the cap and is requesting recovery of that regulatory asset in this proceeding as shown in Schedules D-9 of Exhibits Historic 1, Future 1, and Fully Projected Future 1. PPL Electric is on track to exceed the 3% cap again in 2025 for the 2026 rate period.

Q. Are there any other proposals that the Company is making with respect to the SDER?

A. Yes. PPL Electric proposes to update the SDER such that the mechanism recovers from customers or refund to customers, as appropriate, only applicable expenses from non-reportable storms that are less than or greater than $10.5 million that are proposed to be recovered annually through base rates. In that respect, the Company would treat the storm damage expenses associated with non-reportable storms similarly to the costs associated with reportable storms.

Q. Why is this proposal reasonable and appropriate?

A. There are several reasons to support the Company's request. First, as explained by PPL Electric witness Lookup (PPL Electric St. No. 16), the Company is experiencing non-reportable storms in greater number, severity, and frequency. Although that experience and data supports an increased amount of storm damage expenses that should be recovered through base rates, they also justify a treatment of non-reportable storms similar to reportable storms. Critically, these storm damage expenses are easily identifiable and outside the Company's control, as are the expenses associated with

reportable storms.

Q. Why does the Company believe that this approach for the recovery of storm damage expenses associated with reportable storms and non-reportable storms is fair?

A. An important benefit of the SDER is that it is designed to recover only actual incurred storm costs, and if the Company has not incurred the level of storm costs recovered through base rates, it will refund, with interest, the difference to customers in a subsequent period. The amount of eligible storm damage expenses recovered through the SDER is based on actual storm damage expenses incurred through the 12-month period of December 1 through November 30 prior to the SDER effective date. Stated otherwise, the SDER only recovers actual storm damage expense experienced during the prior year. The SDER will recover from customers or refund to customers, as appropriate, only applicable expenses from reportable and non-reportable storms that are less than or greater than eligible storm damage expenses for reportable and non-reportable recovered annually through base rates. Moreover, by enabling the Company to timely recover these costs, PPL Electric can help reduce the risk of regulatory lag and potentially provide opportunities for the Company to optimize its expense budget. Thus, customers will not be subjected to overpaying for storm costs that are included in base rates between rate cases, nor will the Company suffer financially at the hand of storms for which recovery may be delayed for years until its next base rate case.

Q. How does the Company propose to handle the remaining amortization of major storms?

A. Under the Commission-approved SDER, expenses from major storm events are recovered over three years, with interest. recent examples, the event that occurred on February 13, 2024, qualified as an extraordinary storm. The Company deferred a total of $12,366,189 for this event and began amortizing the expense in 2025. As of June 30, 2025, there is an unamortized remaining balance of $10,272,167 from that event. Additionally, an event on November 21, 2024, qualified as extraordinary and resulted in expenses of $20,613,295 plus a remaining accrual amount of $87,052 for a total of $20,700,346. The Company will begin amortizing that balance over three years in the 2026 rate period.

VII. REVENUE FORECAST

Q. Please describe the development of the Company's revenue forecast.

A. The revenue forecast is developed by applying the forecast of sales (kWh or KW) by rate class and the forecasted number of customers by rate class as provided by the Sales Analysis and Forecasting group and described in the testimony of Mr. Schram (PPL Electric St. No. 4) to the applicable rate schedule pricing as set forth in PPL Electric's currently-effective Tariff-Electric PA P.U.C. No. 201 for base distribution rates and to forecasted rates for distribution riders. Schedule D-3, page 2 in Exhibit Fully Projected Future 1 provides a breakdown of the revenue forecast for the FPFTY. Schedule D-3, page 3 in Exhibit Fully Projected Future 1 illustrates the impact of that Company's proposed rate increase on the revenue forecast for the FPFTY.

Q. Do you believe the forecasted billing determinants for the forecasted test period are a reasonable basis for developing revenue forecasts?

It is my understanding that, based on Mr. Schram's testimony, the sales and load forecasts consider several factors which influence revenues, including number of customers, customer demand, and customer kWh. Given that, I believe it is appropriate to use the billing determinants as a basis for forecasting revenue.

Q. Does this conclude your direct testimony?

A. Yes, it does.

PPL Electric Utilities Corporation

Projected Write-offs by Customer Class

		Projected 7/1/26 to 6/30/27
Residential		
Total Residential Write-Offs	$	49,527,936
Total Estimated Residential Revenue[(1)]	$	2,749,464,155
As a % of Residential Revenue		1.80%
Small C&I		
Total Small C&I Write-Offs	$	3,921,487
Total Estimated Small C&I Revenue[(1)]	$	1,481,346,315
As a % of Small C&I Revenue		0.26%
Large C&I		
Total Large C&I Write-Offs	$	771,063
Total Estimated Large C&I Revenue[(1)]	$	260,659,058
As a % of Large C&I Revenue		0.30%
Total Write-offs	$	54,220,485

(1) Estimated revenue includes forecasted non-shopping base distribution and rider revenue and a forecast of estimated of shopping dollars received.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025-3057164

PPL Electric Utilities Corporation

Statement No. 14

Direct Testimony of Gregory Olsen

Topics: **Retail Tariff**
Street Light Replacement Program

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Gregory Olsen, and my business address is 827 Hausman Rd. Allentown, PA 18101

Q. By whom are you employed and in what capacity?

A. I am employed by PPL Electric Utilities Corporation ("PPL Electric"), a subsidiary of PPL Corporation ("PPL Corp."), as Supervisor – Distribution Interconnections & Tariff Rules.

Q. What are your responsibilities as Supervisor – Distribution Interconnections & Tariff Rules?

A. I am responsible for establishing PPL Electric's interconnection procedures, enforcing interconnection standards, interpreting and applying PPL Electric's Tariff and Rules for Electric Metering and Service Installations ("REMSI") for internal and external stakeholders, run load flow analysis for all new large Distributed Energy Resources (DER) customers and accurately scope the necessary system reinforcements to maintain PPL Electric's high standard of reliability and safety. This role also includes frequent customer interactions to help facilitate their projects from the start of the interconnection process, through completion when they are granted Permission to Operate ("PTO").

Q. What is your educational background?

A. I have a bachelor's degree in electrical engineering with a focus on power systems from Drexel University.

Q. Please describe your professional experience.

A. I have 2 years of experience as a Transmission Protection and Control Engineer where I gained technical experience developing protection relay settings for capacitor banks, 69 kV facilities, as well as compliance experience leading PPL Electric through a Reliability First audit. From that position I went to Operations where I became a PPL Electric Transmission System Operator for roughly 2 years where I monitored the Bulk Electric System ("BES") stability. My current role is in Distribution Planning described above.

Q. What is the purpose of your testimony?

A. My testimony supports the Company's proposed changes to its retail tariff, which are presented in Original Electric Pa. P.UC. No. 202 (PPL Electric Exhibit GEO-1) and are summarized in a prepared list of tariff changes (PPL Electric Exhibit GEO-2). I also will testify about the Company's Street Light Replacement Program.

Q. Are you sponsoring any exhibits in this proceeding?

A. Yes, I am sponsoring PPL Electric Exhibits GEO-1 and GEO-2 and co-sponsoring Exhibit Regs. IV-B.

II. TARIFF CHANGES

Q. You stated that you are sponsoring PPL Electric Exhibit GEO-1. Please briefly describe this document.

A. This exhibit contains a copy of Original Electric Pa. P.U.C. No. 202, which is the updated and proposed version of PPL Electric's retail tariff. Two copies of the retail tariff are presented in PPL Electric Exhibit GEO-1: (1) a clean version; and (2) a blackline version, showing all the changes to the Company's current tariff as of September 2025, in blackline. This retail tariff sets forth the rules and regulations, rate schedules, and rates applicable to services to end-use customers in the Company's service territory. Additionally, PPL Electric Exhibit GEO-2 provides a list of proposed revisions to PPL Electric's current retail tariff.

Q. Could you please describe some of the more substantial changes to the retail tariff?

A. Many of the changes involve grammatical and typographical edits, pagination changes, and other minor revisions. Some of the more substantial changes are as follows:

- Adding a Tariff Definitions section to the retail tariff;
- Changing Basic Utility Supply Service ("BUSS") terminology to default service;
- Updating Rule 3 governing line and service extensions;
- Updating Rule 5's submetering provisions;
- Revising Rule 6's standby service provisions and eliminating Rule 6A;
- Eliminating the automatic meter reading fee under Rule 8; Removing the separate water heating service provisions in Rate Schedule RS;

- Eliminating the Residential Thermal Storage (Rate Schedule RTS) and moving customers to residential Rate Schedule RS.
- Removing the separate space conditioning and water heating service (Rate Schedule GH-2) provisions in Rate Schedule GS-1.
- Updating Rate Schedule LP-5 regarding data centers and customer-owned substations;
- Updating Generation Supply Charge – 1 ("GSC-1") and Generation Supply Charge – 2 ("GSC-2") to reflect the Company's proposal to assign customers to those rates based on their "maximum registered peak load," as defined in the proposed tariff;
- Adding the Electric Vehicle ("EV") Time-of-Use ("TOU") Charging Rebate Program Rider;
- Updating PPL Electric's Net Metering for Renewable Customer-Generators Rider to include a deposit requirement for interconnection applications where the proposed generation facility requires the Company to undertake distribution system upgrades;
- Eliminating Smart Meter Rider – Phase 1 ("SMR 1") and Smart Meter Rider – Phase 2 ("SMR 2");
- Eliminating the Tax Cuts and Jobs Act Temporary Surcharge ("TCJA Rider");
- Eliminating the Competitive Enhancement Rider ("CER");
- Rolling-in and setting to 0% the Distribution System Improvement Charge ("DSIC"); and
- Updating the Storm Damage Expense Rider ("SDER").

Q. Please explain why the Company is adding a Definitions section to its retail tariff.

A. Currently, the definitions of various terms used in the Company's retail tariff are scattered throughout the entire tariff, which can make it difficult to find terms' definitions easily and, by extension, read and understand the tariff. By housing all the definitions in a Definitions section at the beginning of the retail tariff, PPL Electric believes that its tariff will become more reader-friendly and accessible to its customers and interested stakeholders. Additionally, through the process of compiling all those definitions into a single Definitions section of the retail tariff, PPL Electric has updated the definitions of certain terms or added definitions for other terms that were previously undefined. Those updates and additions are intended to provide more clarity and to reflect the other tariff changes being proposed by the Company in this proceeding.

Q. Why is the Company changing the BUSS terminology to "default service"?

A. From the Company's perspective, "default service" is a more commonly used term and is more easily understood by customers and interested stakeholders. Also, as currently defined in the Company's retail tariff, BUSS only includes the provision of "electric capacity and energy" to customers and does not include the provision of transmission service. Because the generation and transmission service components are included in default service rates, PPL Electric has updated the tariff to also include "transmission" in addition to "capacity" and "energy" when referencing the default service provided to default service customers.

Q. Please explain the Company's changes to the tariff rules governing line and service extensions.

A. Currently, the retail tariff provisions governing line and service extensions are spread across multiple rules, including Rule 4 that governs the supply of service to customers. In the proposed retail tariff, PPL Electric has reorganized those provisions and housed them in Rule 3, so that all the relevant line and service extension provisions (with the exception of the line and service extension provisions for Rate Schedule LP-5 customers that I describe later in my testimony) are contained within a single retail tariff rule. PPL Electric believes that this will make the tariff easier to read and apply.

In addition, PPL Electric proposes to require that customers record any line extension guarantees ("LEGs") with their deed. Right now, the Company believes that its current tariff and contract language can be improved to guarantee that, upon transfer or sale of property upon which a LEG exists, responsibility for the LEG will pass on to other entities, tenants, and future property owners. However, the Company's proposed change will ensure that the contractual obligations under a LEG will be fulfilled by future entities, tenants, or property owners upon transfer or sale of property upon which a LEG exists. This is important considering that the Company's current LEG contracts in total amount to $3,569,394.80, which amounts to $781,889.49 per year.

Q. What changes are being made to Rule 5's submetering provisions?

A. In the new Rule 5(F), PPL Electric has, among other things, adjusted the provisions about submetering, such that the Company can, at its discretion, permit submetering of electric service at both existing and new service locations when: (1) it is impractical for

the Company to separately bill each tenant; (2) each tenant has control of the majority of their electric energy use; (3) the customer is part of a U.S. Department of Housing and Urban Development ("HUD") funding Housing, Assisted Living, Nursing Home Care Rehabilitation facilities, Student Housing – higher education – Federal/State/County/City/Municipal/Public Housing; and/or (4) at the Company's discretion, it is not beneficial for the Company to meter individual tenants. The latter two conditions are not a part of the Company's retail tariff and would provide more flexibility for the Company to permit submetering when it is reasonable and appropriate.

Q. Please describe the changes being made to Rule 6 regarding standby service.

A. The current retail tariff contains Rule 6 (Auxiliary Service for Non-Qualifying Facilities) and Rule 6A (Standby Service for Qualifying Facilities). As explained in the direct testimony of PPL Electric witness Steven Wishart (PPL Electric St. No. 8), the Company is proposing changes to Rule 6 that would govern standby service and is proposing to eliminate Rule 6A as a result. For additional details and support for these changes, please see Mr. Wishart's direct testimony.

Q. What is the Company proposing with respect to its automatic meter reading fee?

A. Currently, Rule 8(G) of the retail tariff prescribes that "[u]pon customer request, the Company will secure an in-person meter reading to confirm the accuracy of an automatic meter reading when a customer disconnects service, or a new service request is received." The fee for that meter test is $30. PPL Electric is proposing to eliminate that fee. Instead, all meter testing fees will be governed by Rule 8(D), which should

simplify the tariff and avoid customer confusion over the applicable meter testing fee. PPL Electric has installed smart meters across its entire service territory which now enables the Company to read accurate metering information via the Advanced Metering Infrastructure ("AMI") network, eliminating the need for field personnel to visit customer locations to verify accuracy of metering information.

Q. Please explain the Company's proposed changes to the separate water heater service provisions in Rate Schedule RS.

A. PPL Electric proposes to remove those provisions from Rate Schedule RS. Under the current tariff, it states that separate water heating service is available only to service locations served under this application on and continuously after April 26, 1985. PPL Electric currently has approximately 100 customers who are receiving this service. However, it has become administratively burdensome to maintain this separate rate for that number of customers. Therefore, the Company proposes to remove the separate water heating service provisions and convert those customers' separate accounts to regular Rate Schedule RS.

Q. Please explain the Company's proposed changes to Rate Schedule RTS.

A. PPL Electric proposes to eliminate Rate Schedule RTS. Under the current tariff, it states that rate schedule is available only to service locations served under this application prior to December 31, 1995, and thereafter for the life of the existing thermal storage units. PPL Electric currently has approximately 11,500 customers who are receiving this service. However, it has become administratively burdensome to maintain this

separate rate for that number of customers. Therefore, the Company proposes to eliminate Rate Schedule RTS and convert those customers' separate accounts to regular Rate Schedule RS.

Q. Please explain the Company's proposed changes to the separate meter general space heating service provisions in Rate Schedule GH-2.

A. PPL Electric proposes to remove Rate Schedule GH-2. Under the current tariff, it states that separate meter space heating service is available only to service locations served under this application on and continuously after August 21, 1972. PPL Electric currently has approximately 1,508 customers who are receiving this service. However, it has become administratively burdensome to maintain this separate rate for that number of customers. Therefore, the Company proposes to remove the GH-2 rate schedule and transfer those customers to the regular Rate Schedule GS-1.

Q. Could you please describe the updates to Rate Schedule LP-5 concerning data centers and customer-owned substations?

A. As explained in PPL Electric witness Joseph Lookup's direct testimony (PPL Electric St. No. 16), the Company is making certain proposals to address large load interconnections, primarily with data centers, in the Company's service territory. In particular, the Company is proposing specific line and service extension provisions applicable to Rate Schedule LP-5 customers. Among other things, those provisions require the customer to pay all costs associated with line and service extensions to receive service under Rate Schedule LP-5, except when, in the Company's discretion,

it is determined that certain line extensions will provide reliability or other benefits to the Company's transmission system. Also, the provisions set forth the requirements for the revenue guarantee agreements that such customers must enter into with PPL Electric. Lastly, PPL Electric proposes adding a provision that would enable a Rate Schedule LP-5 customer to request, subject to the Company's discretion, that the Company construct, own, operate, and/or maintain the customer's transformation equipment. Collectively, these provisions would provide clear rules for data centers and other large load interconnections that would receive service under Rate Schedule LP-5, as explained in more detail in Mr. Lookup's direct testimony.

Q. Please explain the Company's proposed changes to GSC-1 and GSC-2 regarding the assignment of customers based on their maximum registered peak load.

A. The proposed changes to GSC-1 and GSC-2 are necessary to implement the Company's proposal to assign customers to GSC-1 or GSC-2 based on their maximum registered peak load. The justifications and details for that proposal can be found in the direct testimony of PPL Electric witness Castanaro (PPL Electric St. No. 15).

Q. Would you please describe the EV TOU Charging Rebate Program being incorporated into the tariff?

A. The Company is incorporating the terms and conditions of its proposed EV TOU Charging Rebate Program into its proposed retail tariff. For details about the EV TOU Charging Rebate Program proposal, please see the direct testimony of PPL Electric witness James Conrad (PPL Electric St. No. 20).

Q. Could you please explain the deposit requirement for certain interconnection applications that the Company proposes to incorporate into the tariff?

A. Yes. In the Net Metering for Customer-Generators Rider, the Company proposes to incorporate an explicit deposit requirement for interconnection applications, where the applicant's generation facility would require the Company to upgrade its distribution system in order to interconnect the facility safely and reliably. Specifically, the proposed tariff provides in pertinent part:

> When the Company determines that upgrades to its distribution system are necessary to interconnect the interconnection applicant's generating facility safely and reliably, the interconnection applicant shall be required to pay a deposit in advance of the Company performing final engineering and construction of the system upgrades. The amount of the deposit is in the discretion of the Company to ensure timely payment of system upgrade costs. If the interconnection applicant fails to pay such deposit within the communicated timeline of the Company's demand for the deposit, the interconnection applicant's project shall be removed from the interconnection queue. Unspent portions of the deposit shall be fully refundable. The interconnection applicant must pay all actual costs of the system upgrades, including but not limited to, the cost of studies, engineering, administering the interconnection request, equipment, and construction costs prior to interconnection of the interconnection applicant's generating facility. Any deposits paid by the interconnecting applicant will be credited towards what is owed to the Company in connection with the interconnection request.

(PPL Electric Exhibit GEO-1.)

Q. Why is the Company making this proposal?

A. There are two principal reasons. First, PPL Electric seeks to encourage "shovel-ready" projects in the interconnection queue, that is, projects that are ready to move forward, through its deposit requirement. In recent years, there has been an influx of Level 3

interconnection applications, which require the Company to study the distribution system upgrades necessary to interconnect the applicants' generation facilities in a safe and reliable manner. Many of these projects, however, do not move forward for a variety of reasons, such as the project's loss of financing or its failure to obtain necessary permits and approvals. The cancellation of projects has had downstream, negative effects on other applications in the queue, as those projects were waiting on that application's project to move forward and may have been relying on that application's project to cover the distribution system upgrade costs.

Second, the deposit requirement is designed to protect ratepayers from bearing unnecessary costs associated with these projects. Specifically, the Company incurs costs under its Interconnection Impact Review ("IIR") process, where PPL Electric: (1) models the impact of the proposed project on the Company's distribution system based on the project's design, location, and size; (2) performs several load flow and power flow analyses to determine how the distribution system will respond to the project's interconnection; and (3) based on the results of those analyses, accurately scopes the system reinforcements, if any, that are required to safely and reliability interconnect the project. Without a deposit, interconnection applicants would not have to pay toward those costs and, instead, those costs get passed onto ratepayers. Given that these costs are being incurred for these specific projects, PPL Electric believes that the interconnection applicants should pay toward them.

Q. What changes are being proposed to SMR 1 and SMR 2?

A. The proposed retail tariff eliminates SMR 1 and SMR 2 for the reasons provided in the direct testimony of PPL Electric witness Katelyn Arnold (PPL Electric St. No. 13).

Q. What changes are being proposed to the TCJA Temporary Surcharge?

A. The Company is proposing to eliminate the TCJA Temporary Surcharge Rider ("TCJA Rider"). The TCJA Rider was implemented to reflect tax savings realized by PPL Electric arising out of the Tax Cuts and Jobs Act between base rate cases. With this rate case, the Company is incorporating current tax rates into its revenue requirement, so the TCJA Rider is no longer needed.

Q. What modifications are being made to the CER?

A. As explained in PPL Electric witness Arnold's direct testimony (PPL Electric St. No. 13), the Company is proposing to eliminate the CER. The elimination of the CER is reflected in the proposed retail tariff. For details on the proposed elimination of the CER, please see Ms. Arnold's direct testimony.

III. STREET LIGHT REPLACEMENT PROGRAM

Q. Please describe the Company's proposed Street Light Replacement Program.

A. The Company is proposing a mass conversion of all street and area lights from Mercury Vapor ("MV") and High-Pressure Sodium ("H.P.S.") assets to Light Emitting Diode ("LED") assets. The Company is doing so due to the increased cost and significant decrease in availability of materials to support MV and H.P.S., as well as improving the

quality of system assets. These LED conversions will reduce the amount of asset failure, which in turn will reduce the amount of truck rolls required to replace failed equipment, leading to a reduction in Operating and Maintenance ("O&M") expense.

There are two ways in which LED conversions will occur. One will involve MV and H.P.S. customers initiating the process by utilizing an online web portal. The second will involve the Company proactively converting all remaining MV and H.P.S. assets. The MV and H.P.S replacements will also be bundled with required pole replacements to reduce the total cost and maximize efficiency of crews' time when possible. The H.P.S. assets will be replaced proactively upon six months' notice to the customer if their current SHS contracts are expired.

The Company is currently proactively replacing existing Rate Schedule SA assets containing MV and H.P.S. with LED assets to provide a cleaner and brighter area light for its customers at no additional charge for conversion. This SA LED equivalent will lower the customers' bill when compared to the MV and H.P.S. alternatives.

Q. How will the Company's proposal with respect to mass replacement of streetlights affect the Company's street light rate schedules?

A. The removal of the MV and H.P.S. assets will result in an elimination of the SM and SHS rate schedules. Once the conversion is complete, only three rate schedules will remain for street and area lighting: (i) SLE, for LED assets; (ii) SE, for customer-owned assets; and (iii) SA, for area light assets.

Q. What is the Company's current replacement procedure for MV and H.P.S. lighting assets?

A. The Company currently has a like-for-like replacement procedure, wherein a failed MV or H.P.S. asset will not be replaced with an LED asset, but with another MV or H.P.S. lighting asset. The Company only replaces MV and H.P.S. assets with LED assets on a per-request basis. Like-for-like spot replacement is an extremely inefficient strategy compared to proactive group re-lamping due to the amount of time required per replacement, largely due to the driving time for crews to get on site. Keeping MV and H.P.S. lighting assets is harmful to the Company due to the increase in cost per replacement with MV and H.P.S. assets, especially with lower quality of materials available on the market. The availability of the MV and H.P.S. materials is becoming increasingly scarce; in fact, it is unlawful to procure MV materials per Energy Policy Act of 2005 – Section 135 H.R. 6-39. MV and/or H.P.S. also fail considerably more frequently than LED assets, which cost the Company significantly more O&M annually.

Q. Does this conclude your direct testimony?

A. Yes, it does.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025-3057164

PPL Electric Utilities Corporation

Statement No. 15

Direct Testimony of Andrew Castanaro

Topics: **Maximum Registered Peak Load**

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Andrew Castanaro. My business address is 827 Hausman Road, Allentown, Pennsylvania 18104.

Q. By whom are you employed and in what capacity?

A. I am employed by PPL Services Corporation ("PPL Services"), an affiliate of PPL Electric Utilities Corporation ("PPL Electric" or the "Company") that provides services to PPL Electric, as the Energy Procurement Manager.

Q. What are your responsibilities as Energy Procurement Manager?

A: My primary responsibilities include managing PPL Electric's Default Service auctions and related activities; managing energy contracts and associated credit provisions; and managing the alternative energy credit ("AEC") contracts and associated state reporting obligations. I am also responsible for similar programs in other jurisdictions in which PPL Electric affiliates operate.

Q. What is your educational background?

A: I graduated from Columbia University in 2006 with a Bachelor of Arts in Economics.

Q. Please describe your professional experience.

A. I began my career in 2010 with PPL Services in the Risk Management Department as a Market Analyst. In 2015, I joined Talen Energy, where I held the same title. In 2016,

I returned to PPL Electric as a Financial Analyst. In 2017, I joined the Financial Planning & Analysis Department within PPL Services. In 2023, I was promoted to Manager of Energy Procurement within the Regulatory Affairs Department of PPL Services, which is the position I currently hold.

Q. What is the purpose of your testimony?

A. I will testify about the Company's proposal to assign default supply customers on the Generation Supply Charge ("GSC") to Rate GSC-1 and Rate GSC-2 based on their maximum registered peak load, as defined by the Company's proposed retail tariff submitted in this proceeding.

Q. Are you sponsoring any exhibits in this proceeding?

A. Yes, I am sponsoring PPL Electric Exhibits AC-1 through AC-3.

II. MAXIMUM REGISTERED PEAK LOAD

Q. Why is PPL Electric proposing to change how it classifies customers under GSC-1 and GSC-2?

A. When it comes to assigning a GSC rate schedule, accurate customer classification is essential to ensure that costs are allocated and recovered fairly and that the rate structure reflects the realities of energy usage and generation patterns. The Company is making changes to how customers are classified, specifically in response to evolving trends in net metering installations and their impact on the existing rate classes.

A key driver of this change is the notable increase in "no load" net metering installations. These projects typically feature generation capacities exceeding 1 MW and can reach up to the maximum allowed 3 MW. Unlike traditional commercial and industrial customers, these installations have little or no onsite electric load—meaning they consume minimal energy from the grid—but they generate large amounts of electricity, and export significant excess generation back to the system. Under the current structure, the split between GSC-1 ("Small C&I") and GSC-2 ("Large C&I") customers is determined by a threshold of 100 kW peak demand. Customers with demand below this limit are categorized as GSC-1. However, no load net metering installations, despite their substantial generation output, have negligible net demand and, therefore, fall into the GSC-1 Small C&I category.

This classification does not account for the true nature or impact of these projects. While labeled as "small," these customer-generators often have infrastructure, financial investment, and grid impacts more akin to those of Large C&I entities. Under net metering rules, when these customers generate excess energy and receive compensation, the costs associated with paying for this excess generation are recovered from the same customer class as the customer-generator. Currently, this means the costs are allocated to Small C&I (GSC-1) customers taking default service—even though the scale and influence of these installations align more closely with Large C&I customers. This misalignment can result in an unfair distribution of default service costs. Small C&I customers taking default service end up bearing the financial burden for projects that, by virtue of their size and output, should be classified as Large C&I. This undermines the principle of equity in cost recovery and can distort the rate structure for

default service customers in the Small C&I class. The Company is proposing to revise the definition of "maximum registered peak load" in its tariff to account for not only peak demand, but also peak export to rectify this misalignment.

Q. Could you please provide background on the "maximum registered peak load" as defined by the Commission's regulations?

A. Although I am not an attorney, my understanding is that the Commission's regulations define "maximum registered peak load" as "[t]he highest level of demand for a particular customer, based on the PJM Interconnection, LLC, 'Peak Load Contribution Standard,' or its equivalent, and as may be further defined by the [Electric Distribution Company ('EDC')] tariff in a particular service territory." 52 Pa. Code § 54.182. Based on this authority, PPL Electric proposes to further define "maximum registered peak load" in its retail electric service tariff and utilize that new definition for the purpose of classifying customers into their respective rate schedules.

Q. To your knowledge, are there any other regulatory provisions relevant to the "maximum registered peak load" and its impact on customer classification?

A. Yes. The Commission's regulations provide:

> (h) Default service rates may not be adjusted more frequently than on a quarterly basis for all customer classes with a maximum registered peak load up to 25 kW, to ensure the recovery of costs reasonably incurred in acquiring electricity at the least cost to customers over time. DSPs may propose alternative divisions of customers by maximum registered peak load to preserve existing customer classes.
>
> (i) Default service rates shall be adjusted on a quarterly basis, or more frequently, for all customer classes with a maximum registered peak load of 25 kW to 500 kW, to ensure the recovery of costs reasonably

> incurred in acquiring electricity at the least cost to customers over time. DSPs may propose alternative divisions of customers by maximum registered peak load to preserve existing customer classes.
>
> (j) Default service rates shall be adjusted on a monthly basis, or more frequently, for all customer classes with a registered peak load of equal to or greater than 500 kW to ensure the recovery of costs reasonably incurred in acquiring electricity at the least cost to customers over time. DSPs may propose alternative divisions of customers by registered peak load to preserve existing customer classes.

52. Pa. Code § 54.187(h)-(j).

Q. What is the Company proposing with respect to "maximum registered peak load"?

A. In its proposed retail tariff filed in this proceeding (PPL Electric Exhibit GEO-1), "maximum registered peak load" is defined as "a customer's net demand contribution impact to the Company's default service procurement activity, as determined upon the net power flow from or into the Company's distribution system." The maximum registered peak load used to assign customers to their applicable rate schedule will be the customer's highest maximum registered peak load (kW) in the most recent 12-month period ending September 30. For new customers without a 12-month billing history, the maximum registered peak load shall be based on the Company's estimate using factors such as, but not limited to, similarly equipped buildings, and similarly utilized buildings and square footage. As related to customer-generators, this estimate shall also be inclusive of the nameplate capacity of the generation system.

Q. Why is the Company making this proposal?

A. PPL Electric is projecting a substantial increase in the number of customer-generators participating in net metering who do not have independent load to offset their electric

usage. As a result, those customer-generators by design produce excess generation that is banked until the end of the PJM Planning Year on May 31, at which point their banked generation is cashed out at the Price-to-Compare. The costs associated with the net metering credits and cash-outs are recovered from the default service customers in the customer-generators' respective customer classes.

The Company's currently effective tariff, which was last updated in the 2015 Rate Case, does not classify customers based on their maximum registered peak load as set forth in the proposed retail tariff. Instead, for example, a small commercial customer's demand is determined based on their load independent of the nameplate capacity of any behind-the-meter generation. This current practice fails to reflect the stress that the behind-the-meter generation puts on PPL Electric's distribution system. Additionally, the current classification results in non-net metering Small C&I default service customers disproportionately subsidizing the annual cash-outs of customer-generators that are, effectively, merchant generators.

Q. You mentioned that the Company is projecting a substantial increase in the number of customer-generators participating in net metering that do not have independent load to offset their electric usage. What do you mean by independent load?

A. By independent load, I mean load that would rely on PPL Electric's system for a separate purpose other than to operate the customer's generation.

Q. What is the impact of such customer-generators on the annual net metering cash-outs for the Small C&I customer class?

A. As of March 31, 2025, the annual net metering cash-outs for the Small C&I customer class totaled approximately $11 million. However, based on the level of interconnections projected over the next few years, PPL Electric estimates that the annual cash-outs for the Small C&I customer class will be approximately $60 million to over $300 million by 2029. (PPL Electric Exhibits AC-1 through AC-3.)[1]

Q. If the proposal is approved, what will be the impact on the large no-load customer-generators?

A. The large no-load customer-generators will be reclassified as Rate Schedule GSC-2 customers. This means that their excess generation will be paid out based on the GSC-2 rate. Likewise, the costs to pay for the excess net-metered generation will be recovered from the GSC-2 rate class, as opposed to the Small C&I customers in the GSC-1 rate case. The GSC-2 is calculated using real-time pricing based on the hourly generation needs of the customer class. This differs from the Small C&I GSC-1 rate, which is based on a combination of load following 12 and 24 month full requirements contracts. The majority of Large C&I customers are more sophisticated in managing their energy needs and are less likely to be impacted by an increase in default service rates because of an influx of net-metered generation. The real-time nature of the GSC-2 rate, and the sophistication of the Large C&I customers in the GSC-2 rate class

[1] PPL Electric Exhibits AC-1, AC-2, and AC-3 show projections based on cancellation rates for interconnection projects of 36%, 50%, and 75%, respectively.

mitigates the risk that there will be cross-subsidization between Small C&I customers and the large no-load customer-generators.

Q. How would the Company implement its maximum registered peak load proposal?

A. The Company would calculate the customers' maximum registered peak load annually and provide that information to the billing team, which would then determine which accounts need to be reclassified. Updated classifications would then be communicated to the affected customers approximately 30-60 days before service under their new rate schedule begins in June.

Q. Has the Commission approved any proposals that are similar to the Company's maximum registered peak load proposal?

A. Yes. In the Default Service Plan V ("DSP V") proceeding for UGI Utilities, Inc. – Electric Division ("UGI Electric") at Docket No. P-2024-3049343, *et al.*, the Commission approved a very similar proposal, under which UGI Electric classifies customers based on their "supply peak load impact." Although the Company is using the term "maximum registered peak load" instead of "supply peak load impact," the customer classification methodologies are effectively the same. It is my understanding that the Commission's February 20, 2025 Opinion and Order in that proceeding is currently on appeal before the Commonwealth Court of Pennsylvania as of the date of submitting this testimony.

Q. Does the Company believe that any waivers of the Commission's regulations are required to implement its proposal?

A. No. As I noted above, the Company maintains that its proposal is authorized by the existing provisions in the Commission's regulations. However, to the extent necessary, PPL Electric respectfully requests a waiver of the customer groupings recommended in 52 Pa. Code §§ 54.187 and 69.1805, along with any other Commission regulations or requirements that may be necessary to implement its proposal.

Q. Does this conclude your direct testimony?

A. Yes, it does.

Year of Reconciliation/Cashout:	2024	2025	2026	2027	2028	2029	PTC at 12/1/30

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025-3057164

PPL Electric Utilities Corporation

Statement No. 16

Direct Testimony of Joseph Lookup

Topics: **Reliability Performance**
Storm Restoration and Planning
Large Load Interconnections

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Joseph Lookup, and my business address is 827 Hausman Road, Allentown, Pennsylvania 18104.

Q. By whom are you employed and in what capacity?

A. I am employed by PPL Services Corporation ("PPL Services") as Vice President – Transmission and Distribution Planning and Asset Management and provide services to PPL Electric Utilities Corporation ("PPL Electric" or the "Company").

Q. What are your responsibilities as Vice President – Transmission and Distribution Planning and Asset Management?

A. I oversee the Transmission Planning, Asset Strategy, Portfolio Management, Project Development, Real Estate, Project Management and Construction Management Groups. This includes responsibility for Transmission system reliability, investment strategy and project execution.

Q. Please describe your professional experience.

A. Prior to working at PPL Electric, I worked as a consultant providing engineering, project management, construction management services for utility, industrial, commercial, and educational clients. At PPL Electric, I have worked in Engineering, Project and Construction Management, and Asset Management in various engineering and project leadership, and management roles.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is as follows:

- To explain the Company's reliability performance and describe proposals aimed at improving reliability performance;
- To discuss trends that the Company is seeing with respect to storms and describe Company's plan for addressing storm restoration for more frequent and intense storms; and
- To describe how the Company is meeting the challenges associated with interconnecting new large load customers.

Q. Are you sponsoring any exhibits in this proceeding?

A. No.

II. RELIABILITY PERFORMANCE

Q. Please describe your assessment of the Company's electric system reliability.

A. The Company's system reliability is generally better than most national utility peers, based on comparisons using the Institute of Electrical and Electronics Engineers ("IEEE") Annual Reliability Benchmarking Survey as well as the Edison Electric Institute ("EEI") Reliability Survey. The 2024 IEEE survey reported on reliability for over 70 million customers represented by 73 operating companies. PPL Electric has been a top quartile IEEE System Average Interruption Frequency Index ("SAIFI") performer since 2014. PPL Electric's 2024 IEEE SAIFI value was 0.661, versus an

IEEE panel median of 1.45. Similarly, PPL Electric ranked 11th out of 80 utilities for IEEE SAIFI on the 2024 EEI survey.

The Customer Average Interruption Duration Index ("CAIDI"), or average duration of a customer interruption, is slightly underperforming the median of 124 minutes with a value of 136.6. However, the Company's customers experience fewer annual minutes without electric service than do peer utilities. The Company's System Average Interruption Duration Index ("SAIDI"), or total minutes an average customer is without service in a year, is better than most peers (90 annual minutes per customer in 2024 and 92 minutes in 2023, versus panel medians of 137 minutes in 2024 and 119 minutes in 2023.). For Customers Experiencing Multiple Interruptions ("CEMI"), on the 2024 EEI survey PPL Electric ranked 14th out of 55 companies reporting values for percentage of customers seeing 3 or more interruptions ("CEMI3+") in 2024.

Although PPL Electric has generally performed well compared to its peers, the Company recognizes that improvement is still needed in this area to improve the overall customer experience. This was highlighted in the Pennsylvania Public Utility Commission's ("PUC" or "Commission") Management and Operations Audit issued in June 2024, and actions are in place to improve the Company's CEMI, CAIDI and SAIDI metrics, in addition to ongoing plans around SAIFI and Momentary Average Interruption Frequency Index ("MAIFI"). In particular, the Company will continue to evaluate opportunities for new storm hardening programs or acceleration of existing mitigation programs and/or projects for reliability to minimize outages associated with increased storm activity (as explained further below).

Q. Does the Company consider other factors as it reviews the reliability of its electric distribution system in addition to SAIFI, CAIDI, and SAIFI?

A. Beyond SAIFI, SAIDI, and CAIDI, PPL Electric routinely considers other reliability measures such as CEMI, Worst Performing Circuits, Worst Performing Segments, Customers Experiencing Recent Interruptions ("CERI") at the 7-day, 30-day, and 90-day measures. Customers Experiencing Long Interruption Duration ("CELID") and MAIFI are also considered. PPL Electric also monitors the reliability and health of assets through asset monitoring, routine maintenance activities, voltage monitoring, and tracking and trending of equipment failures.

Q. Please describe your overall assessment of the effectiveness of management as a result of your reliability analysis.

A. PPL Electric's analysis of reliability performance supports the Company's view that it is being effective and well-managed with respect to reliability. Benchmarking through vehicles like IEEE and EEI shows that performance in a variety of reliability measures is better than most peers, which management believes reflects the efforts and investments that have been made over the years to build a smarter, more resilient electrical infrastructure. The Company is a leader in the use of new technology in the industry, primarily due to the established culture that empowers management and personnel to innovate and never settle for status quo. Management uses a broad suite of dashboards and key performance indicators ("KPIs") to understand the leading and lagging indicators of reliability performance. These metrics allow management to make investment and operational decisions that are designed to improve the overall customer

experience and help ensure the Company meets its first quartile operational goals. In addition, the Company prides itself on being a learning organization, always finding ways to improve processes or procedures and learning from the past.

PPL Electric's culture of innovation is evidenced by the industry innovation awards it has won, including the 2025 Smart Electric Power Alliance ("SEPA") Resilience Power Player Award for predictive failure technology that proactively identifies failing electrical components before they cause outages; the 2024 Thomas F. Farrell II Safety Leadership and Innovation Award presented to Bill Farber for outstanding safety leadership; and the 2023 Charles Steinmetz Top Innovator Award from Public Utilities Fortnightly, recognizing Sal Salet and his team for advancements in smart grid automation, downed power line detection, and renewable energy integration. These honors reflect the Company's commitment to pioneering solutions that enhance grid reliability, safety, and sustainability.

Q. What programs, policies, or actions has the Company specifically implemented to achieve a level of reliability that is indicative of the Company being well-managed?

A. The Company began its increased investment in aging infrastructure following the development of its 2009 Maintenance Optimization Strategy ("MOS") Report to stem the increase of failures and reliability issues due to an aging fleet. Much of the investment was made into the transmission system since then, primarily focused on rebuilding aging 69kV transmission lines, replacing wood poles with more resilient steel structures, and replacing aging substation assets. As a result of these investments, the

Company's transmission system has seen a 90% improvement to transmission SAIFI over the years 2012-2024.

The Company also invested in replacing aging infrastructure on the distribution system over that period, but only enough to maintain existing reliability levels. Many of the improvements to distribution SAIFI came because of the Company's Smart Grid program in 2015. That program enables the Company to automatically identify and isolate faults on the distribution system and then sectionalize and restore customers without human intervention, restoring customers often in seconds or minutes.

The Company has recently experienced its worst storm performance and worst SAIFI performance in recent history due to a record number of storms in 2024. The Company is confident that an increased investment in the distribution system is needed now to strengthen and harden its system to be more resilient to the increase in storm and weather-related events and to improve the overall customer experience.

Q. How does PPL Electric determine what are the right investments to make?

A. PPL Electric has a comprehensive governance process in place to guide its capital investment decisions. This process ensures that investments are aligned with both system and customer needs, regulatory requirements, and corporate objectives. There are three main components of this governance process as I will describe below.

Asset Management Process: The Transmission and Distribution Asset Management department is responsible for identifying work and developing associated costs for infrastructure investments. These investments, once approved by management, are included in the business plan and ultimately approved at the PPL

Corporation board level. The department also reviews projects periodically, considering factors such as need, prioritization, cost, schedule, and scope of work. Project reviews and authorizations are conducted monthly through the Transmission Accountability Meeting ("TAM") and Distribution Accountability Meeting ("DAM") processes.

Business Planning Process: PPL Electric prepares a five-year business plan annually, which is aligned with PPL Corporation's overall business plan. The business plan includes capital investments that have been approved through the Asset Management Process. This iterative process involves submitting the plan to PPL Corporation until it is approved by the Board of Directors. The business planning process is informed by system needs, customer interconnections, regulatory requirements, and customer service needs.

Governance and Approval: Projects included in the approved five-year business plan move on to the Governance and Approval process. The Governance and Approval process includes several stages, from planning and development, engineering, construction, in-service, and close-out. This structured approach ensures that all projects are thoroughly evaluated and approved at various levels, including Director and Vice President levels, in accordance with Delegation of Authority policies and procedures.

This governance framework ensures that PPL Electric's capital investments are strategically planned, thoroughly evaluated, and aligned with both internal and external requirements. Additional discussion of PPL Electric's governance process can be found in the direct testimony of PPL Electric witness Dennis Urban (PPL Electric St. No. 2).

Q. Are there other factors that affect the Company's reliability performance?

A. Yes. While the Company has robust reliability measures and programs in place, as discussed above, that does not mean it is immune to external factors which can have an impact upon system reliability. As mentioned above, the Company has seen a record number of storms in 2024 and one of the worst years in recent history for reliability. The increase in storms has caused an extensive amount of outages and damage primarily due to trees and vegetation falling into lines. Because of this trend, there is a strong need to harden the Company's system to withstand these events. The Company has developed design and construction standards that will allow us to harden its facilities, including stronger poles, insulated conductor, and underground facilities. Implementing these solutions now is necessary to improve the system's reliability and the overall customer experience. The Company also has a program to manage vegetation, as explained in the direct testimony of PPL Electric witness Nicole Howell (PPL Electric St. No. 17). Vegetation management factors heavily into the Company's system reliability, especially considering dealings with invasive species, such as the emerald ash borer and spongy moth.

Q. Please explain further the problems caused by invasive bug species.

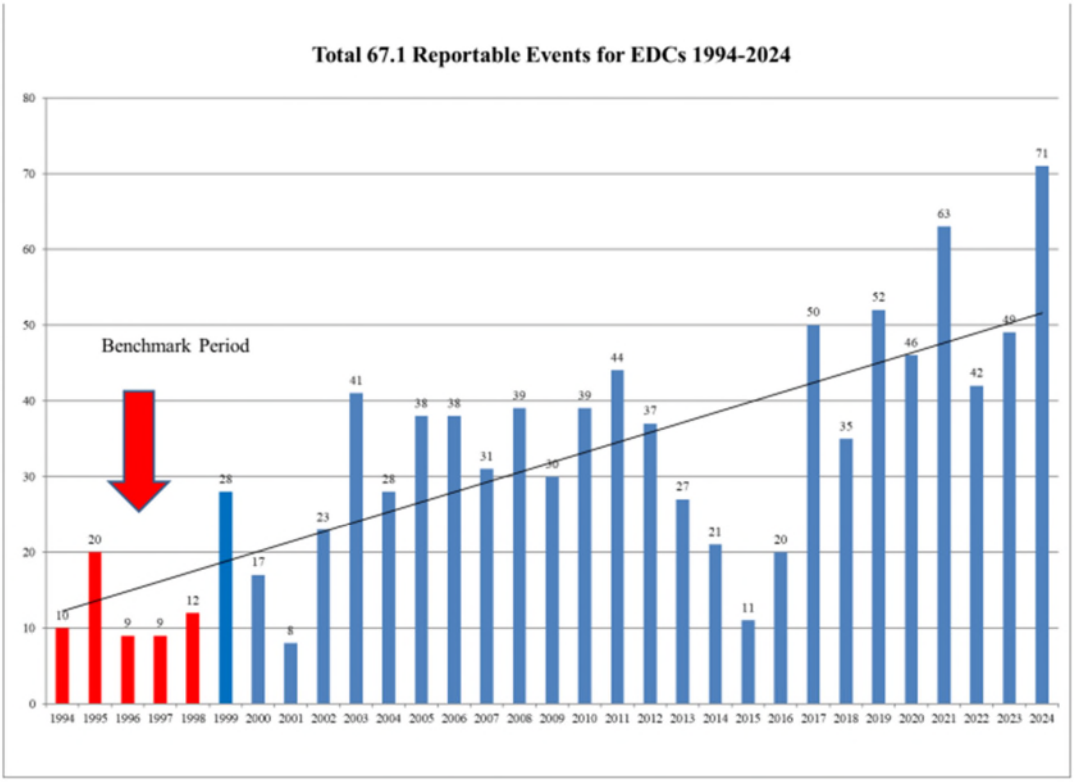
A. The invasive emerald ash borer and spongy moth are causing the mortality of Ash and Oak trees to rise across the Company's service territory. When these trees defoliate and die, they can fall on to Company infrastructure and cause outages. Approximately 30% of the trees that the Company removes are Ash Trees.

Q. Please describe the Company's proposal with regard to invasive bug species.

A. As discussed in the direct testimony of PPL Electric witness Nicole Howell (PPL Electric St. No. 17), the Company intends on increasing its vegetation management budget to proactively address invasive bug species. PPL Electric is also proposing a program to expand right-of-way ("ROW") rights to address off-ROW trees.

III. STORM RESTORATION AND PLANNING

Q. One of the three reasons for which the Company filed its last rate case in 2015 was because of the accelerated capital investments it was making to maintain and improve system reliability in the face of major storms. Briefly describe the Company's outlook on the frequency and severity of storms in 2015.



A. Concerns over storm hardening in the 2015 rate case stemmed from several recent major storms that the Company had experienced, namely Hurricane Irene in August 2011, the Halloween Snowstorm in October 2011, and Hurricane Sandy in October 2012. These storms prompted the Company to conduct a review of its system to determine how to reduce the impacts of major storms. From the Company's 2012 base rate proceeding to the Company's 2015 base rate proceeding, the Company had made efforts and undertaken initiatives to improve storm response and outage management. Part of this effort included the implementation of a Storm Damage Expense Rider ("SDER"). In the 2015 rate case, the Company proposed changes to the SDER which would, in part, address concerns regarding the unpredictable nature of storms.

Q. How has the Company's experience with the frequency and severity of storms changed since the 2015 rate case?

A. I would note that the frequency and severity of storms, as well as outages related to these more frequent and severe storms has increased for the Company and for Pennsylvania electric distribution companies ("EDCs") as a whole. In the Commission's most recent 2024 Pennsylvania Electric Reliability Report,[1] 2024 had the most reportable events for all EDCs in Pennsylvania since 1993. A copy of Table 4 from the 2024 Pennsylvania Electric Reliability report is reproduced below:

[1] https://www.puc.pa.gov/media/3565/24_electric-reliability-report_final.pdf,

Table 4 – Total 67.1 Reportable Events for EDCs 1994 through 2024

As seen above, EDCs across the Commonwealth experienced 71 reportable outage events in 2024, as compared to 49 events in 2023. Specific to PPL Electric, the Company experienced a significant number of storms, which resulted in 17 reported outage events in 2024. While it did not record a Major Event in 2024, it experienced 11 storms of 600 cases or higher, including six storms of over 1,000 cases.

However, reportable storms data does not tell the whole story. PPL Electric has experienced and expects to continue to experience increases in the number, severity and frequency of non-reportable storm events as well. In 2024, the Company experienced 20 non-reportable storm events, as compared to 31 in 2023 and its historic prior 10-year average of 17. In 2025, PPL Electric is on pace to be a record storm count year with 39

total storms (30 non-reportable) through September 14th, the most ever by this time of year. With respect to severity, PPL Electric notes that the trend in the average number of damage locations (cases) per PUC Reportable storm has been increasing by approximately 3% per year from 2016 to 2025. And, with respect to frequency, PPL Electric notes that it experienced an average of 40 total (reportable and non) storms per year from 2021-2024, versus and average of 23.6 for the 10 years prior to that period. Importantly, from an operational perspective, the costs incurred from non-reportable storms are of a similar nature as costs incurred from reportable storms and should be granted similar opportunities for cost recovery, as discussed further in the direct testimony of PPL Electric witness Katelyn Arnold (PPL Electric St. No. 13).

Essentially, 2024 presented one of the most challenging years for electric utilities, including PPL Electric, in history. The Company anticipates that these weather trends will continue, and that the number and frequency of severe storms will increase going forward, noting that 2025 is currently on pace to record the highest storm count in any single year.

Q. How has the Company's focus on storm response and proactive storm hardening evolved since the last rate case was filed?

A. Related to storm hardening, pursuant to its inspection and maintenance ("I&M") practices, PPL Electric recognizes that while it cannot control the frequency and severity of weather events it can implement proactive measures that prevent outages from occurring. In particular, PPL Electric has a specific focus on equipment performance,

and has four programs implemented under its I&M plan that are designed to improve equipment performance:

(1) Asset Health Management, which focuses on the use of data-driven failure probability models to optimize addressing aging infrastructure, the capturing of asset health and critically scores to refine its programs to deliver the most effective reliability impact per dollar invested, and the Company's Long-Term Infrastructure Improvement Plan ("LTIIP") that includes proactive installation of measures aimed at improving reliability and customer experience;

(2) Chronic Reliability Remediation, which most recently focuses upon the Company's 2024 initiative to "harden" its circuits including those most impacted by weather events given the increased number of storms that have been experience, and proactive circuit analysis that reviews every circuit on a four-year cycle to address operational and reliability characteristics for each circuit;

(3) Engineering Design Standards, which include the Company's Reliability Principles and Practices that ensure the Company plans, protects, and operates its electric distribution system under a consistent sent of principles to ensure system safety and reliability; and

(4) Smart Grid, which includes efforts by the Company since its last base rate case to enable it to react rapidly to changes occurring on the distribution system due to weather (or other) events.

PPL Electric also has robust vegetation management practices related to tree pruning, removal, re-clearing, and herbicide application inside of the ROW. PPL Electric also removes hazard trees outside of the ROW when possible. Additional information

regarding the Company's current and proposed enhanced vegetation management practices is provided by PPL Electric witness Nicole Howell (PPL Electric St. No. 17).

In summary, based upon the increased frequency and severity of weather events, the Company has enhanced its focus and its multi-faceted approach to both: (1) improve response and repair time to help ensure fewer customers are affected by storms outages for a shorter period; and (2) harden the distribution system to prevent weather-related outages from occurring in the first place.

Q. How is this additional focus on storm response and storm hardening measures driving the need for rate relief in this matter?

A. The Company's enhanced focus on storm response and storm hardening measures is one of the primary drivers of rate relief in this proceeding. Although the Company continues to ensure that it is allocating resources in an efficient manner (i.e., by ensuring that its portfolio of activities produces the best reliability result for a given expenditure), this involves additional expenditures in the form of both capital investments designed to improve system resilience and reliability, and O&M expenses designed to respond to storm events and improve how the system is maintained and decrease the risk of storms impacting existing facilities.

IV. LARGE LOAD INTERCONNECTIONS

Q. Please explain why the subject of data centers and other large load interconnections in the Company's service territory has emerged as an important issue.

A. Data centers and other large load customers are increasing in Pennsylvania. While these customers will provide the opportunity for significant economic development within the Company's service territory, they also represent a large load influx onto PPL Electric's system presenting new challenges. Pennsylvania is fast becoming an epicenter for data center innovation, and PPL Electric is seeing a significant portion of this growth in its service territory. Large load customers are attracted to the Company's modern and robust electric grid, and PPL Electric has an increasing number of data center projects in advanced development. The pipeline of projects exceeds the Company's current peak load of 7.8 GW. In practical terms, that means the Company is preparing to more than double its system demand in just 5–6 years—growth that took over a century to reach. This large-scale growth directly enhances the lives of PPL Electric's 1.5 million customers in eastern and central Pennsylvania. It drives down costs, improves grid reliability, and helps ensure that households and communities reap the rewards of robust infrastructure while supporting economic revitalization and job creation across the region. PPL Electric provides a robust transmission system that data centers need to operate efficiently, offering both high reliability and high capacity.

Q. What impact does the Company anticipate from the development of data centers and the resulting demand?

A. Data centers are driving substantial load growth at an unprecedented level. PPL Electric will need to make significant investments in the transmission system to interconnect these new customers. This will include investments that are paid for by the customer and investments that are paid for by the Company. With respect to investments that are put into rate base, the Company is mindful not to create stranded asset risk for other customers. Additionally, PPL Electric must account for the resource adequacy challenges created by this significant load growth. By carefully planning and executing these investments, PPL Electric aims to support the growth of new customers without compromising the service quality for existing customers.

Q. Does the Company have a planned response to the expected impact of data centers and other large load interconnections?

A. Yes, the Company is already implementing this plan through its existing electric service agreement ("ESA") process. Notably the current ESA includes minimum load guarantees (80% of contracted load until service commitment is satisfied), load ramp schedules, and security instruments to ensure that the customer pays enough in revenue to cover the cost of rate-based investments. Additionally, the agreement outlines early termination terms and conditions to protect both the Company and other customers from stranded cost risk. By adhering to these provisions, the Company aims to maintain a balanced and sustainable approach to managing the increased demand while mitigating stranded cost risk to other customers.

Q. Is PPL Electric proposing to adjust its tariff to address these issues as a part of this proceeding?

A Yes. The Company is proposing to revise its Rate Schedule LP-5 to mirror what it is currently requiring in its ESA with large customers. Under the proposed tariff language, any large load customer that requires upgrades that will be socialized through rates must provide adequate security that it will meet a revenue guarantee equal to the amount of costs placed into rates. As explained earlier, this involves minimum load guarantees for the term of the service commitment and security instruments covering the obligation in the event that the customer defaults.

Q. How has the Company handled such large load interconnection requests up to this point?

A. Under the Company's current retail tariff, service at or above 69 kV is provided under Rate Schedule LP-5, which generally requires the customer to pay for all interconnection costs. Historically, this approach has worked well, as the system upgrade facilities needed to interconnect the LP-5 customer only benefited the interconnecting customer, justifying the customer covering the cost. New large load customers have created the situation that they are necessitating upgrades that provide benefits to the entire grid. These include reliability benefits arising out of upgrading the networked bulk electric system. The Company has been extending service under its LP-5 rate schedule and including load commitment guarantee terms in the customer's ESA. The load commitment language in the ESA is similar to the Company's line extension

guarantee terms in Rule 3 of the tariff for lower voltage line extensions. In addition to the customer's contribution in aid of construction ("CIAC") obligation, the customer guarantees to take service in an amount that the customer will pay electric service rates equal to the upgrade costs that are socialized through transmission rates. This is designed to ensure that the investments to interconnect these customers are justified and that other customers will not be left paying for stranded assets.

Q. Has the Company's existing treatment of new large load interconnections in this manner been successful?

A. Yes. Although it is still early in the large load development trend, and there are not any current large load customers in service that are subject to the new ESA terms, the Company has not experienced any significant pushback to the ESA terms and has successfully executed ESAs with these terms for load additions in the pipeline.

Q. If the Company's use of its existing ESA process for new large load interconnections has been successful, why is the Company proposing to revise its Rate Schedule LP-5?

A. PPL Electric utilized its existing ESA process to try to meet the needs of the new large load customers. However, in the long term the Company wants to memorialize its large load interconnection terms in its tariff for transparency and consistency.

Q. How does the Company protect, or plan to protect, other customers from the risk that a planned large load may not materialize?

A. The proposed revisions to the LP-5 rate schedule require a customer to provide security in an amount that equals the costs being put into rates. In the event that the customer stops taking service prior to PPL Electric receiving revenue equal to the rate-based costs, the Company will draw down the security and apply those funds to reduce its plant in service amount. This has the effect of backing these costs out of rates, so that other customers do not pay for upgrades needed for load that did not materialize.

Q. Are there any benefits to other customers from interconnecting new large load customers?

A. Yes. First the upgrades to the bulk electric system will improve the reliability and resiliency of the transmission grid. In certain instances, these upgrades may create new transmission paths which will allow for additional generation to be brought online. Second, customers should see significant reductions in their transmission costs. PPL Electric recovers its costs for its transmission system through its Federal Energy Regulatory Commission ("FERC") formula rate. These costs are allocated to customers by the amount they contribute to the system peak. When these large loads are interconnected, they will represent a significant percentage of PPL Electric's system peak, and as a result lower the portion other customers are responsible for paying.

Q. Does this conclude your direct testimony?

A. Yes, it does.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025-3057164

PPL Electric Utilities Corporation

Statement No. 17

Direct Testimony of Nicole Howell

Topics: **Vegetation Management**

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Nicole Howell, and my business address is 827 Hausman Road, Allentown, PA 18104.

Q. By whom are you employed and in what capacity?

A. I am employed by PPL Electric Utilities Corporation ("PPL Electric" or the "Company"), a subsidiary of PPL Corporation, as Manager – Vegetation Management & Program Management.

Q. What are your responsibilities as Manager – Vegetation Management & Program Management?

A. I am responsible for leading the distribution and transmission vegetation maintenance program and the Pole Attachments Services program across the PPL Electric service territory.

Q. What is your educational background?

A. I obtained a Bachelor of Commerce from Toronto Metropolitan University in Toronto, Canada and a Master of Business Administration from Moravian University in Bethlehem, PA.

Q. Please describe your professional experience.

A. I have served in my current role since January of 2024, overseeing both Vegetation Management and Pole Attachment Services. I have held various positions over the past 10 years at PPL Electric, including Field Metering, Work Management and Portfolio Management.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to describe the Company's current vegetation management program and proposed enhancements to that program.

II. VEGETATION MANAGEMENT

Q. Please describe the Company's service territory with respect to vegetation management.

A. The vegetation coverage across PPL Electric's service territory is diverse and substantial, with a mix of urban, suburban, rural, and forested landscapes. Over 50% of PPL Electric's overhead distribution lines are tree exposed.

Q. What are the benefits of vegetation management?

A. Vegetation management improves system reliability, allows electric utilities to provide safe electric service, and plays a role in reducing wildfires. Vegetation encroachment into Company assets can make it difficult to access facilities during storm restoration. Providing clearance between PPL Electric's assets and vegetation will support safer

working conditions for line workers and tree trimmers and will allow for quicker restoration of service to customers after a storm.

Q. Please explain any issues that the Company faces within its service territory regarding vegetation management.

A. Approximately 46% of outages that PPL Electric customers experience is caused by vegetation (based on past 10 years of data). During storm events, about 77% of outages that PPL Electric customers experience is caused by vegetation. And, due to an increase in storm frequency and intensity as explained further in the direct testimony of PPL Electric witness Joseph Lookup (PPL Electric St. No. 16), instances of these vegetation-caused outages are increasing year-over-year.

Q. Please describe the Company's current vegetation management program.

A. PPL Electric employs a five-to-eight-year inspection and maintenance cycle for its distribution circuits. The vegetation on PPL Electric's transmission and distribution rights-of-way ("ROWs") is maintained utilizing a variety of vegetation management activities. These activities include tree pruning, tree removal, brush control, and herbicide application. Vegetation maintenance activities are budgeted and planned based on proximity and risk to PPL Electric's assets.

Q. How does the Company's current vegetation management program address the issues laid out above?

A. PPL Electric currently employs a condition-based five-to-eight-year inspection and maintenance cycle for its distribution circuits. The inspection and maintenance activities include trimming, removing hazard and danger trees (if permitted by ROW agreement or landowner permission), and brush control. To safeguard the reliability of its electric distribution system, PPL Electric employs this comprehensive program to manage vegetation around power lines. Keeping trees and other vegetation away from distribution lines is vital, as tree contacts can result in short-circuits and subsequent service outages. PPL Electric uses vegetation risk models to prioritize vegetation activities at the circuit and sub-circuit level. To combat the impact of storm season, PPL Electric uses vegetation risk models to prioritize circuits within its inspection and maintenance workplan. The risk models account for tree exposure, overstrike risk, and previous outage history to prioritize the potential for highest impact to customers from a vegetation outage risk perspective. The Company also deploys integrated vegetation management ("IVM") techniques including the use of herbicide applications. IVM is the most effective treatment approach known to maintain system reliability and safety by promoting desirable species for a more cost-effective way to manage vegetation. The Company prepares for the impacts of storm season by front-loading priority vegetation maintenance activities before the summer months, while balancing work and resources through the remainder of the year.

Q. Do you believe that the Company's current vegetation management program is sufficient to address the Company's vegetation management needs?

A. No. As I discussed above, PPL Electric is seeing more frequent and higher intensity storms. The Company also has experienced declines in forest health led by invasive species impacts like the emerald ash borer and spongy moth, which have significantly increased the number of unhealthy trees that are at risk of falling into distribution lines. Vegetation is the largest contributor to outages during storm events and is a significant area of opportunity to improve reliability for customers. Considering that over 50% of PPL Electric's distribution circuits are tree-exposed (see Table A below), the Company's reliability metrics are projected to see great improvements by decreasing the trim cycle in its vegetation management plan. A decreased trim cycle would allow the Company to better combat vegetation growth across its service territory.

Table A

Single-Phase		Multi-Phase		Total	
Tree Exposed Miles	% Exposure	Tree Exposed Miles	% Exposure	Tree Exposed Miles	% Exposure
11,864	62%	3,860	45%	15,724	57%

Q. Please explain the Company's proposal to enhance its vegetation management program.

A. To address the Company's ongoing challenges with vegetation management, a comprehensive two-pronged approach is being proposed. The first component involves an increase in the vegetation management budget in the Fully Projected Future Test Year ("FPFTY"). This expanded budget will support a higher frequency in the cycle of vegetation inspection and maintenance. By dedicating additional resources, the

Company aims to proactively identify and mitigate potential vegetation-related risks, thereby improving system reliability and reducing the likelihood of outages or safety hazards. The second prong of the strategy focuses on addressing off right-of-way ("Off-ROW") trees—those that exist beyond the current distribution ROW but nevertheless pose a threat to the distribution system. The Company plans to implement a program to acquire enhanced distribution ROW rights. This initiative will seek to obtain easement rights that will allow the Company to remove hazard and danger trees that are currently outside of PPL Electric's ROW. It will also allow the Company to return distribution corridors to width and height specifications that promote greater system reliability.

Q. Can you describe what PPL Electric is proposing with respect to its vegetation management budget?

A. The Company's budget for the distribution vegetation management program in the Historic Test Year ("HTY") is $35.6 million and Future Test Year ("FTY") is $31.8 million. PPL Electric is proposing an increase in the Fully Projected Future Test Year ("FPFTY") over present budget levels to approximately $50 million.

Q. What improvements will the Company achieve by increasing investment in the vegetation management program?

A. The Company's proposed investment will prioritize core vegetation maintenance and reliability enhancing vegetation activities. Specifically, PPL Electric will be able to increase the frequency of its vegetation maintenance cycle, return distribution ROW

corridors to Company specifications, mitigate potential wildfire risk, and improve safety for the public.

Q. Can you describe PPL Electric's plan with respect to the frequency of its vegetation maintenance cycle?

A. As mentioned above, PPL Electric currently performs a condition-based five-to-eight-year vegetation maintenance cycle. This means that every distribution circuit will be inspected and have any necessary maintenance activities performed at least once every five to eight years. The Company is proposing to increase its target frequency to once every 5 years. The increased inspection and maintenance frequency will allow the Company to proactively identify and address vegetation that may cause issues in the future. This has the benefit of potentially eliminating the cause of an outage before it happens, which improves reliability for customers and lessens storm response costs.

Q. How will the increased budget help the Company restore its distribution ROW corridors to Company specifications?

A. There are some instances where PPL Electric has inadequate easement rights to maintain its ROW corridor to current specifications. This has created a situation where there are circuits on the system with clearances less than the Company specifications of 15 feet for single-phase lines, and 25 feet for multi-phase lines. Additionally, the Company wants to strategically target areas with the highest reliability risk, and clear up to 30 feet for single phase, and 40 feet for multi-phase lines in certain areas. The increased budget

will allow the Company to maintain its distribution circuits to Company specifications making it less likely that the current established tree line will be below specifications.

Q. How does the Company's proposal help mitigate wildfire risk?

A. Proper vegetation management can contribute to a reduction in the ignition, spread, flame lengths, and severity of wildfires. Wildfire risk in Pennsylvania is greatest at the beginning and end of storm season – i.e., during the spring and fall months. Vegetation and its proximity to power lines plays a key role in the prevention of wildfire. It is important for the Company to maintain clearance across its distribution circuits to limit ignition sources.

Q. Describe how the Company's proposal promotes public safety.

A. An increased investment in vegetation maintenance activities will also provide a safer environment for PPL Electric's customers. Trees falling into lines can become a path to ground, potentially impacting members of the public who are in the area of a downed tree or wire from a vegetation hit. Additionally, limiting downed trees and wires makes it safer for first responders who may be responding to incidents in and around PPL Electric facilities.

Q. Can the Company quantify any projected reliability benefits from increasing its vegetation management budget?

A. PPL Electric is anticipating a 5% improvement within the next 5 years to System Average Interruption Frequency Index ("SAIFI") over the past 3-year performance as a result of increasing its vegetation management budget.

Q. Can you describe the Company's proposal to acquire additional ROW?

A. PPL Electric wishes to acquire additional rights which will allow it to clear vegetation more easily and eliminate further risk to its power lines and other assets. Specifically, the Company wants to acquire rights that will allow it to address hazard and danger trees outside of its existing ROW.

Q. Why does the Company need additional rights?

A. There are three primary reasons why the Company needs acquire targeted enhanced ROW rights. First, a significant portion of the Company's distribution facilities are located within public road ROW. This is an efficient use of public infrastructure but does not give PPL Electric rights on private property outside of the public road ROW to address vegetation maintenance.

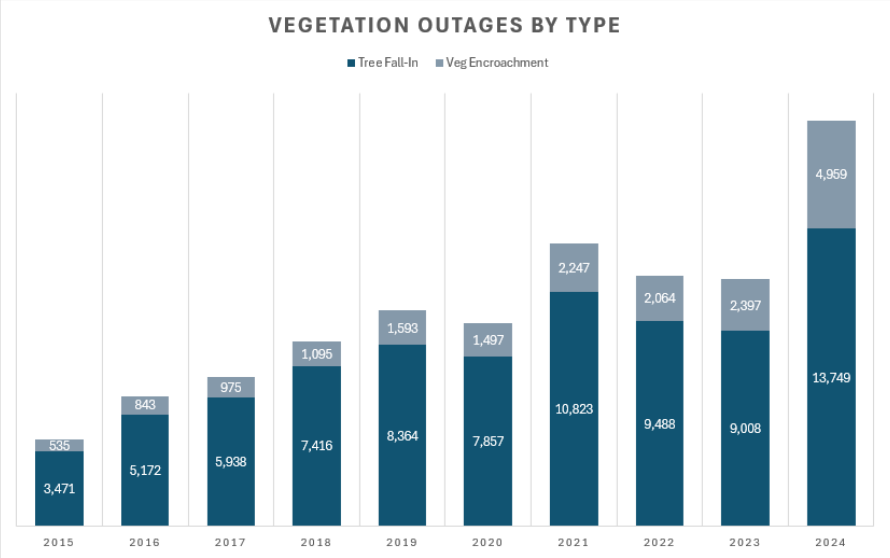
Second, over the years PPL Electric's standards and specifications have changed. This creates a situation where an easement was acquired decades ago that was adequate for then current specifications but no longer provides enough rights to comply with current specifications.

And third, the Company has a portion of easements that were never recorded and only allow the Company to maintain vegetation to the current established tree line. I discuss the problems with unrecorded easements in more detail below.

Historically, although the Company obtained distribution easements which permitted it to clear and maintain a distribution line corridor and address hazard and danger trees outside of the corridor, these easements were not consistently recorded. Therefore, the easements did not run with the land if the property owner from whom PPL Electric originally obtained the easement sold the property, and the Company's rights to maintain an easement were restricted to where it has historically cleared and maintained the distribution corridor (commonly referred to as the "current established tree line"). The Company's current specifications for distribution line corridors are 15 feet for single-phase lines and 25 feet for multi-phase lines, but in many instances, trimming to the current established tree line is less than these specifications.

As I mentioned previously, the Company wants to enhance its current specifications to 30 feet ground to sky for single phase, and 40 feet ground to sky for multi-phase lines in certain areas that are prone to vegetation related outages. The enhanced vegetation management program, and specifically the proposal to acquire easement rights, will allow PPL Electric to restore, adopt and maintain a consistent, system-wide specification for distribution line easements, clearing rights and hazard and danger tree rights.

Q. Can you describe the Company's acquisition of ROW proposal in detail?



A. To address Off-ROW trees, the Company is proposing a program under which it will approach and negotiate with landowners to acquire and record enhanced easement rights, which will include hazard and danger tree rights. PPL Electric will seek these rights in targeted areas that can benefit the most from hazard and danger tree removal. It is anticipated that the identified hazard and danger trees will be removed soon after the additional hazard and danger tree rights are acquired. Furthermore, PPL Electric is proposing to capitalize the first removal of hazard and danger trees after the acquisition of these additional rights because this initial removal will permit PPL Electric to return its ROW to standard specifications, thereby improving the condition of the ROW.

Q. Are Off-ROW trees a problem on PPL Electric's distribution system?

A. Yes. In particular, the Company is increasingly concerned about the impact of Off-ROW trees on reliability. Approximately 82% of outages that occurred over the past 10 years have been caused by Off-ROW trees. PPL Electric has seen an increase in Off-ROW tree-related outages not only due to more variable weather events, but also due to large defoliation events that have led to forest health impacts and subsequent tree decline from invasive species like the emerald ash borer, spongy moth, and beech leaf disease. However, PPL Electric is limited in its ability to address Off-ROW trees because in many instances it lacks easement rights to remove hazard and danger trees.

As shown in the graphic below, Off-ROW "tree fall-ins" or trees failing and falling into PPL Electric's power lines account for approximately 80% of vegetation

caused outages. The remaining vegetation caused outages are associated with encroachment issues such as branches falling into power lines.

By attaining additional tree rights and prioritizing additional tree clearing of Off-ROW trees, PPL Electric can provide a safer and more reliable system for customers and the general public.

Q. Why are Off-ROW trees becoming an increasing cause of system outages?

A. It is mainly a combination of two factors. First is the increased volume and intensity of storms experienced across PPL Electric's service territory, and second is the impact of invasive bug species. The increased volume and intensity of storms is discussed in Mr. Lookup's direct testimony (PPL Electric St. No. 16). Storms stress the vegetation in the Company's service territory, and when there are more and stronger storms, it increases the likelihood of an outage being caused by vegetation. This is why the Company must proactively address Off-ROW trees to improve reliability.

With respect to invasive bug species, the emerald ash borer and spongy moth have caused the mortality of Ash and Oak trees to rise across the Company's service territory. When these trees defoliate and die, they can fall on to Company infrastructure and cause outages. Over the past 3 years, up to 30% of the trees the Company removes annually have been Off-ROW Ash trees that are dead or dying from the emerald ash borer.

Q. Will the Company target specific areas of its service territory to acquire enhanced ROW rights?

A. Yes. The enhanced ROW acquisition program will focus on areas where an engineering and construction solution is not feasible, therefore requiring additional tree removal, enhanced trimming or corridor widening. The targeted enhanced ROW acquisition program will focus on areas with the highest risk for customer interruptions based on tree risk conditions and outage impact. Specifically, PPL Electric will look to acquire enhanced ROW in areas where storm hardening work is already being performed. The Company will also identify and prioritize this enhanced vegetation reliability work by utilizing a combination of remote sensing and risk modeling techniques to map vegetation presence and model tree conditions/risk system wide. Models are developed using data sources, such as satellite imagery, Light Detection and Ranging ("LiDAR"), historical vegetation maintenance information, and outage data. This approach will also aid in the strategic acquisition of additional ROW with hazard and danger tree rights.

Q. Does the Company have a budget to acquire the enhanced ROW rights to address Off-ROW trees?

Y. Yes. PPL Electric has included $25 million in its capital budget for the FPFTY to acquire additional ROW rights. This will include the acquisition of the new easement rights, and costs associated with the first pass of restoring the ROW width and addressing Off-ROW hazard and danger trees. The Company anticipates that it will continue to pursue the program in the years after the FPFTY, which will be addressed in future rate cases.

Q. Will PPL Electric compensate landowners for these additional ROW rights, and if so, how will the compensation be determined?

A. It depends on the particular negotiations with landowners. There may be some landowners who are willing to grant additional ROW rights at no cost because the Company will remove dead or dying trees that put the landowner's property at risk. If the landowner wants compensation the Company will develop an offer based on the fair market value of similar property in the area.

Q. If a landowner is unwilling to grant additional easement rights will the Company pursue condemnation?

A. It is unlikely that Company would pursue condemnation against landowners who are unwilling to grant additional ROW rights. If the Company cannot negotiate additional ROW rights, it will likely pursue engineering and construction solutions to address reliability concerns. This could include storm hardening efforts like undergrounding or

the use of Hendrix cables. Only if the acquisition of additional ROW is the only option to resolve the reliability concern will the Company consider using eminent domain.

Q. Will PPL Electric record the new ROW rights?

A. Yes. Unlike past practices, it is the Company's intent to record these new easement rights in public land records to preserve them in perpetuity. Given the capital investment in these rights the Company believes it is prudent to record these rights so that they can be maintained into the future.

Q. Is the Company projecting any reliability improvements from acquiring enhanced ROW rights?

A. Yes. The Company is projecting an additional 7% improvement to SAIFI from acquiring these additional ROW rights over the next 5 years. This improvement will be achieved from activities that occur after the FPFTY, but the investment included in this rate case is needed to start the program to achieve the anticipated reliability benefits.

Q. Is the Company's proposal with respect to vegetation management consistent with industry best practices?

A. Yes. PPL Electric's proposal to increase its vegetation management budget and to acquire enhanced ROW rights to address Off-ROW trees is consistent with industry best practices. PPL Electric performed an internal review and industry benchmarking effort from 2024 to 2025 to enhance its vegetation management program for safety, reliability, efficiency, and customer experience. This benchmarking effort was performed through

the Southeastern Electric Exchange peer survey. As a result of this effort, the Company identified the above-described management program that combines cyclical maintenance activities to gain clearance with data driven, reliability enhancing vegetation activities. The enhanced ROW rights program focusses on areas where an engineering and construction solution is not feasible, therefore requiring additional tree removal, enhanced trimming or corridor widening. This proposal will enhance PPL Electric's vegetation management activities and is consistent with leading practices across the industry to ensure optimal reliability is delivered to customers.

Q. Does this conclude your direct testimony?

A. Yes, it does.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025- 3057164

PPL Electric Utilities Corporation

Statement No. 18

Direct Testimony of Lisa Norden

Topics: **Customer Service Performance**
Customer Benefits of IT Upgrades
Payment Transaction Fees
Universal Services Program Salaries and Wages
Universal Services CAP Cost Recovery Offset
Supplier Tariff

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Lisa Norden, and my business address is PPL Electric Utilities 827 Hausman Road, Allentown, PA 18104.

Q. By whom are you employed and in what capacity?

A. I am employed by PPL Electric Utilities Corporation ("PPL Electric"), a subsidiary of PPL Corporation, as Vice President Customer Services.

Q. What are your responsibilities as Vice President Customer Services?

A. I lead PPL Electric's customer service team, which is one of the most customer-facing functions at the Company. I oversee a broad range of customer relationship functions, such as metering system operations, contact center and support operations, billing, revenue collection, supplier services, universal service programs, energy efficiency programs and the key accounts team. I work to make sure that all activities within the team are conducted safely and in an efficient manner that enhances the overall customer experience.

Q. What is your educational background?

A. I have a Bachelor of Science degree in Accounting and Finance from the University of Maine.

Q. Please describe your professional experience.

A. I have been in my current role with PPL Electric from 2022 to present. Prior to that, I was the Chief Operating Officer of Reybold Group in 2021, held multiple positions with Qurate Retail Group from 2013 to 2020 (the last being Senior Vice President, Fulfillment), was the Principal Consultant for Portland Enterprise Partners in 2012, held multiple positions with L.L. Bean, Inc. from 1990 to 2011 (the most recent being Vice President, Customer Satisfaction) and was a Senior Auditor with Coopers & Lybrand from 1985 to 1989.

Q. What is the purpose of your testimony?

A. I will address the Company's customer service performance and planned initiatives to maintain and improve that level of performance. I will discuss changes to the Company's customer services Information Technology ("IT") investments to improve the Customer Information System ("CIS") and Customer Experience ("CX") systems. Additionally, I will testify about PPL Electric's proposals to include the cost of payment transaction fees in base rates, include the internal universal service employee salaries and wages to the universal service program rider, and eliminate the Customer Assistance Program ("CAP") cost recovery offset. Finally, I will testify about the Company's proposed changes to its supplier tariff, which include charging suppliers for the cost of electronic data interchange ("EDI") costs incurred to support them and adjusting the purchase of receivables ("POR") write off discount.

Q. Are you sponsoring any exhibits or schedules in this proceeding?

A. Yes, I am co-sponsoring Schedules D-11 of Exhibits Historic 1, Future 1, and Fully Projected Future 1. I am also sponsoring PPL Electric Exhibit LN-1, which is the Company's proposed Supplier Tariff, and PPL Electric Exhibit LN-2, which is a summary list of the proposed changes in the Supplier Tariff.

II. CUSTOMER SERVICE PERFORMANCE

Q. How much does the Company focus on its customer service performance?

A. Customer service is at the heart of the Company's vision, mission, and values. PPL Electric's employees are dedicated to providing the highest quality, safe, and affordable service to all customers at reasonable rates. To achieve those goals, PPL Electric emphasizes listening to the Company's customers, treating them with respect, and seeking their input to better service their needs. The Company also provides customers with useful information about their energy usage and billing and focuses on creating and maintaining programs that support their needs.

Q. Has the Company performed any surveys regarding its customer service?

A. Yes. The Company strives to make every customer interaction a positive one, and customer satisfaction is an important measure of PPL Electric's performance. The Company measures customer satisfaction through a collection of objective data generated in part through customer feedback. For example, when contacting the customer service department, customers are offered the opportunity to take a survey conducted by a third party to rate their satisfaction with the phone contact center

interaction. Using a scale of 1 to 5 (1 being Not Satisfied and 5 being Completely Satisfied), the "CE" customer experience rating from these surveys gives the Company critical information on the service experience through the phone contact channel. In 2024, PPL Electric's CE rating was 4.4 on 5.0 scale, which exceeded the Company's target of 4.0.

The Company also regularly monitors its J.D. Power survey data, which measures overall customer satisfaction for utility safety and reliability, billing and payment, corporate citizenship, customer care, price, and communications. PPL Electric ranked in the top half in the Large East region by J.D. Power in electric residential customer satisfaction among its peers in 2023, 2024 and year to date in 2025. These recognitions reflect the high level of commitment and resources the Company has consistently dedicated to customer satisfaction.

Q. Has the Company received any accolades for its customer service?

A. Yes. In 2025, PPL Electric received Escalent's Utility Trusted Brand & Customer Engagement study for "Easiest to do business with" utility award. The Company also received the following Hermes Creative Awards for its "Real Savings for Real People" campaign: (1) Platinum Award for an Integrated Marketing Campaign; (2) Platinum Award for a TV Ad Campaign; and (3) Gold Award for Interactive Creative. In 2024, PPL Electric received the ENERGY STAR Partner of the Year Award – Sustained Excellence and the ENERGY STAR Residential New Construction Market Leader Award, along with Escalent's Utility Customer Champions Award – Residential and the MarCom Platinum Award for Overarching Energy Efficiency Campaign. PPL Electric

also received the ENERGY STAR Partner of the Year Award – Sustained Excellence and the ENERGY STAR Residential New Construction Market Leader Award in 2023. Although the Company continually strives to maintain and improve on its current level of customer service performance, these awards recognize PPL Electric's success and achievement of goals.

III. CUSTOMER SERVICE BENEFITS OF IT UPGRADES

Q. Does the Company have any planned customer service system upgrades?

A. Yes. As discussed in PPL Electric witness Daniel Johnson's direct testimony (PPL Electric St. No. 19), the Company is undertaking upgrades to its IT systems.

Q. Please describe the Company's current Customer Information System ("CIS") and why updates are necessary.

A. The Company's current CIS is Customer/1 (CSS) and went into production for PPL Electric in 1999. As Mr. Johnson explains in his direct testimony, implementation of the new CIS will mitigate key risks, most importantly, cybersecurity and obsolescence risks with the Company's current systems.

Q. What is the new CIS platform the Company will be implementing?

A. PPL Corporation has chosen to implement SAP SE's ("SAP") cloud-based system as its CIS. This will enable PPL Electric to continue delivering high quality customer service.

Q. Please describe the Company's current Customer Experience ("CX") platforms and the proposed changes.

A. The Company's current CX platform includes several applications that allow customers to self-serve, including the Company's website (pplelectric.com) and Interactive Voice Response ("IVR") system, which is an integrated software-based call center platform with Natural Language Processing ("NLP") intended to help customers self-serve through human like conversation. PPL Electric also offers an event-based notification system for customers via multiple communication mediums including e-mail, phone and short message service ("SMS"). PPL Corporation plans to create more integrated CX platforms that better facilitate self-service for customers and allows customers to begin a transaction on one channel like phone, mobile app, and web or electronic communications and complete the transaction at a later time on another channel. The planned CX upgrades will allow for this capability and provide a better customer experience with the Company.

Q. What customer service benefits are expected to be created through the new CIS and CX?

A. These initiatives align with PPL Electric's commitment to improving customer service, providing better overall service to customers, providing customers with more options, and adding convenience. It also aligns with customers' expectations to be able to interact with the Company in a manner that is convenient and addresses their specific needs.

IV. PAYMENT TRANSACTION FEES

Q. Does PPL Electric have any specific proposals with regard to payment transaction fees?

A. Yes. PPL Electric wants to include the costs of payment transaction fees in base rates, rather than making the customer cover the transaction fee separately. This would apply to credit and debit card fees as well as electronic payment methods such as Venmo and PayPal. It has become an expectation of customers to be able to make payments in a method that is most convenient to them. Removing the separate transaction fee enables customers to focus on making payments on their accounts and is designed to improve customer satisfaction.

Q. How does PPL Electric currently handle payment transaction fees?

A. Currently, a customer who makes a one-time payment using a credit or debit card or makes a payment via a walk-in location, such as through Western Union or Fiserv, is charged a separate fee set by the outside vendor. The amount of that fee depends on the method and amount of the payment. Specifically, the current credit/debit card fees online or through apps such as Venmo and PayPal are $2.50 per transaction of up to $1,000 for residential customers and $7.50 per transaction of up to $1,500 for non-residential customers. The walk-in fee is $2.00 per transaction. PPL Electric proposes to no longer directly charge individual customers making one-time electric payments for those fees and, instead, recover the costs associated with the fees through base rates.

Q. Why does PPL Electric propose this change?

A. Customers expect convenient options for payment of their bills. Chief among those convenient options is payment of bills through devices connected to the Internet through mobile or online applications. However, the fees assessed for these transactions make these payment options less convenient and desirable. As a result, customers may be less willing to make timely payments for their electric service accounts. On the other hand, if these fees are recovered through base rates, the cost of the transaction fee would no longer play a part in the customer's decision-making. Instead, customers could simply pay their bills using the method that is most convenient for them.

Accordingly, the Company's proposal would provide the following benefits: (1) help customers avoid termination of service or late payments; (2) eliminate the burden of the transaction fee on customers; (3) reduce confusion between the third-party transaction fees and the Company's charges for electric service; (4) increase customer satisfaction; and (5) reduce the inconvenience of customers sending a check via mail.

Q. How may the Company's proposal benefit low-income customers specifically?

A. PPL Electric's proposal is particularly beneficial for low-income customers. By eliminating the separate assessment of these transaction fees on customers making the payments, PPL Electric's low-income customers will have a significant monetary burden lifted from their shoulders. In fact, PPL Electric estimates that low-income customer payments accounted for approximately 5.3 million of the 16.4 million total transactions that were assessed these fees. Moreover, low-income customers' transaction fees were approximately $2.1 million of the $3.8 million total fees assessed

between November 2023 and October 2024.[1] Therefore, while low-income customers accounted for approximately 32% of the transactions, their fees accounted for approximately 56% of the total transaction fees. Thus, low-income customers are poised to benefit greatly from the Company's proposal.

Q. Would the Company be working with any third-party vendors to implement this proposal?

A. Yes. PPL Electric plans to work with third party vendors to implement the proposal. The Company currently uses a third-party vendor today for the processing of these fees. The Company anticipates that the continued use of third-party vendors will make processing these transaction fees more efficient.

Q. What are the estimated costs associated with this proposal?

A. The estimated annual expense for this proposal is approximately $4.98 million. My understanding is that these costs will be allocated to the appropriate customer classes. The estimated costs were developed based on the Company's historical data for the transaction fee activities and assuming a 30% growth rate. The Company is anticipating a 30% growth rate in transaction fees because it is expecting more customers will utilize electronic payment methods now that they do not have to pay a separate transaction fee.

[1] This time period was chosen to include payment trends outside of and during the winter moratorium.

Q. Have any other electric and gas utilities operating in Pennsylvania made similar changes?

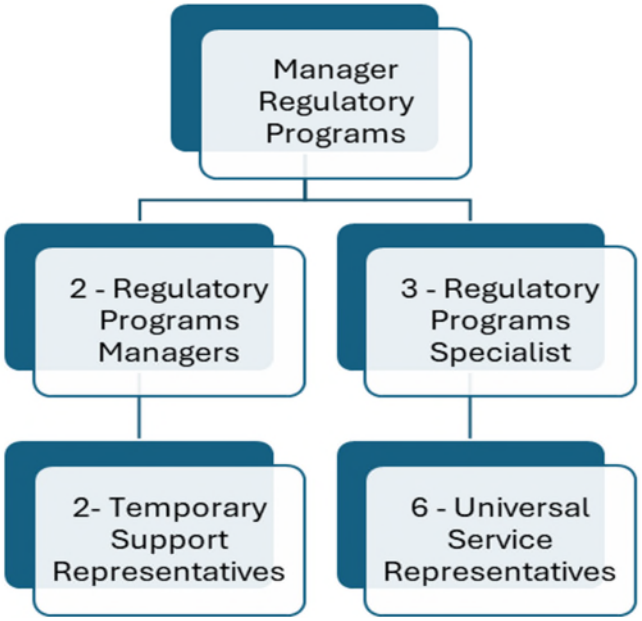
A. Yes. I am aware that Duquesne Light Company, FirstEnergy Pennsylvania Electric Company, and Philadelphia Gas Works recover the costs associated with one-time electronic payment fees in base rates.

V. UNIVERSAL SERVICES PROGRAM SALARIES AND WAGES

Q. Does the Company have any proposals regarding recovery of Universal Service and Energy Conservation Plan ("USECP") Employee salaries and wages?

A. Yes. PPL Electric proposes to recover those costs through its Universal Service Rider ("USR") as opposed to base rates.

Q. What are the USECP employees' job duties?



A. The employees administer the programs under the Company's USECP, which collectively provides several forms of assistance to customers to help them pay their electric service bills and pay down their balances in arrears. Specifically, the USECP contains the following programs: (1) OnTrack – PPL Electric's Customer Assistance Program ("CAP"); (2) WRAP – PPL Electric's Low-Income Usage Reduction Program ("LIURP"); (3) Operation HELP – PPL Electric's Hardship Fund; and (4) Customer Assistance and Referral Evaluation Service ("CARES") - PPL Electric's Special Referral Service for Customers with Temporary Hardships. In administering these programs, the USECP employees, among other things, conduct customer outreach, respond to customer inquiries, work with Information Technology ("IT") personnel to

update the Company's IT systems to incorporate regulatory requirements, and coordinate the operations of contractors and community-based organizations ("CBOs") that help implement the USECP. Below is a chart outlining the employees' roles and responsibilities.

Manager Regulatory Programs	Responsible for all Universal Service Programs, including regulatory requirements, strategic planning, and department management.
Regulatory Program Managers	Responsible for the design and implementation of the Universal Service programs including program strategy, communications, customer outreach, and resource management.
Regulatory Programs Specialists	Responsible for management support, auditing, quality assurance, and primary contact for partner organizations and contractors.
Universal Service Representatives	Support daily/weekly account level work associated with Universal Service Programs.
Temporary Support Representatives	Support daily/weekly account level work associated with LIHEAP.

Q. How many USECP employees does the Company have?

A. There are 14 employees that perform these tasks. Below is the organization chart for these employees.

Q. Why is it appropriate to recover those employees' salaries and wages through the USR, as proposed by the Company?

A. There are several reasons. First, by recovering these expenses through the USR instead of base rates, PPL Electric can better adapt and budget its internal staffing needs for the USECP programs, which are a critical component of the Company's electric service to low-income customers. Second, all other USECP program costs are recovered through the USR, so the inclusion of internal USECP employee salaries and wages in the USR will simplify the recovery of the USECP program costs. Third, the Company currently recovers the internal employee salaries and wages for its Act 129 Energy Efficiency and Conservation ("EE&C") Plan through its Act 129 Compliance Rider ("ACR"), so the Company's proposal would treat internal employee salaries and wages for the USECP programs essentially the same but through the USR instead of the ACR. Fourth, by including the expenses in the USR, the expenses will be subject to reconciliation,

assuring that any over- or under-recovery of these expenses will be trued up and subject to interest. If the costs are recovered in base rates, the salary and wage expenses would not be revisited until the Company's next base rate case. Finally, the Company's proposal would eliminate the regulatory lag in recovering USECP costs experienced through recovering internal salaries and wages through base rate recovery.

Q. What would the incremental impact of the Company's proposal be on the costs recovered through the USR?

A. PPL Electric estimates that approximately $1.4 million in internal employee salaries and wages for the USECP programs would be recovered through the USR in the Fully Projected Future Test Year ("FPFTY"). That additional cost would represent an overall increase of 1.1% in the amount of costs recovered through the USR currently. PPL Electric also projects that the incremental costs of approximately $1.4 million recovered through the USR under this proposal would result in a very minor increase in the USR charge. For example, if the approximately $1.4 million were included in the current USR charge of $0.01111 per kWh that is effective through December 31, 2025, the charge would increase to $0.01121 per kWh.

Q. Are there any tariff changes needed to implement this proposal?

A. Yes. The Company has updated the language in its tariff to reflect the recovery of the USECP employees' salaries and wages through the USR, which can be found in the Company's proposed retail tariff. (PPL Electric Exhibit GEO-1.) Please see the direct

testimony of PPL Electric witness Gregory Olsen, who is sponsoring the proposed retail tariff. (*See* PPL Electric St. No. 14.)

VI. UNIVERSAL SERVICES CAP COST RECOVERY OFFSET

Q. Could you please provide background on the current USR offset credit for Customer Assistance Program ("CAP") customers?

A. Under Paragraph 47 of the Commission-approved 2015 Rate Case Settlement, it provides:

> To address the bad debt, arrearage forgiveness, and Cash Working Capital issues raised in OCA Statement No. 4, PPL Electric will provide a fixed Universal Service Rider ("USR") credit of $100 per month for all CAP customers above 44,000. The Joint Petitioners further agree to evaluate further revisions in the USR credit and arrearage forgiveness and to recommend additional changes in the Company's next universal service proceeding. The Joint Petitioners retain the right to review and file testimony concerning any such proposals as permitted by the normal Commission process for review of the Universal Service Plan.

Q. Is the Company proposing any adjustments to that $100 credit?

A. Yes. PPL Electric proposes to eliminate that $100 credit.

Q. Why does the Company want to do this?

A. PPL Electric's proposal to eliminate this CAP recovery offset should be approved because it more appropriately reflects how the Company recovers its bad debt expense. Specifically, when non-CAP customers fail to pay their bills, that bad debt expense is included in the Company's normalized claim for bad debt expense in a base rate case. When CAP customers have balances in arrears written off due to their participation in the program, PPL Electric recovers the written-off balances with other USECP costs

through the USR. The Company does not include projections of bad debt expense from CAP customers in its base rates.

Furthermore, although the number of CAP customers can change over time, my understanding is that the CAP recovery offset is still unnecessary. As currently constructed, the offset only works in one direction, that is to reduce the USR's recovery if CAP customer participation goes above a specified level after distribution base rates are established. However, if CAP customer participation goes below the amount, the Company's base rates remain the same.

In addition, I am advised by counsel that the Commission has recently rejected OCA's proposed inclusion of a bad debt offset in a universal service rider Specifically, in PGW's 2023 Rate Case, the Commission rejected the OCA's proposed bad debt offset in PGW's Universal Service and Energy Conservation ("USEC") surcharge.[2] Therefore, although I am not a lawyer, I believe that the Company's proposal aligns with this recent decision.

VII. SUPPLIER TARIFF CHANGES AND PAYMENT FOR ELECTRONIC DATA INTERCHANGE (EDI) TRANSACTIONS

Q. Is the Company making any proposals with respect to its Supplier Tariff?

A. Yes. PPL Electric is proposing to adopt a new Supplier Tariff, Tariff – Electric Pa. P.U.C. No. 2S. Both clean and blackline versions of the proposed Supplier Tariff are provided in PPL Electric Exhibit LN-1. The Company's current Supplier Tariff initially became effective back on August 27, 1998, during the advent of retail electric supply

[2] *Pa. PUC v. Phila. Gas Works*, Docket Nos. R-2023-3037933, *et al.*, at 238-39 (Order entered Nov. 9, 2023) ("*PGW 2023 Rate Case Order*").

market. Although some provisions have been modified since that time, the Supplier Tariff is well overdue for an update to address current policies and procedures governing PPL Electric's interaction with and charges to EGSs and other issues.

Q. Is there a list of changes that summarizes the proposed tariff changes?

A. Yes. This list can be found in PPL Electric Exhibit LN-2.

Q. Are there any of those changes to the Supplier Tariff that you would like to point out specifically?

A. Yes. PPL Electric proposes to charge Electric Generation Suppliers ("EGSs") for the costs that the Company incurs to process their EDI transactions. To do so, the Company would offset its payments to EGSs by an allocated amount of the EDI transaction fees incurred by PPL Electric. To the extent that any EGSs do not participate in the POR Program, PPL Electric would bill those EGSs for the EDI transactions separately in the Coordination Services Charge on a monthly basis. Each EGS's allocated amount will be based on the EGS's number of EDI transactions compared to the total EDI transactions for that payment period.

Q. Are there any other costs associated with the EDI transactions that PPL Electric is proposing to charge EGSs as part of this proposal?

A. Yes. PPL Electric also will include the costs of testing a new Data Universal Numbering System ("DUNS") that the Company needs to set up for each EGS. There are two types of fees: (1) "Full" testing, which is to test DUNS activity for a new supplier; and (2)

"Abbreviated" testing, which is to test DUNS activity for an existing supplier requesting an additional DUNS number. Currently, these costs are $4,867.20 for full testing and $2,215.98 for abbreviated testing. These costs will be directly assigned to the EGS and included in the Coordination Services Charge.

Q. Why does PPL Electric propose to implement this change?

A. PPL Electric believes that these costs are better recovered from the entities directly causing the costs' incurrence (i.e., EGSs) as opposed to the Company's general customer base, which includes both shopping and non-shopping customers. Moreover, these EDI transactions and testing costs are a necessary component of the EGSs' ability to do business in PPL Electric's service territory, so it is reasonable and appropriate for them to be responsible for the costs associated with those transactions. Furthermore, the EDI transaction costs will be applied on a per-transaction basis. This methodology will encourage EGSs to more efficiently use Company resources.

Q. What is the annual expense associated with the EDI transactions that PPL Electric currently incurs?

A. Over the 12-month period July 1, 2024, through June 30, 2025, the EDI transaction fees totaled approximately $929,000. For the FPFTY, the Company projects that the EDI transaction fees will total approximately $960,000. PPL Electric projects an increase in these fees based on the estimated level of shopping for the FPFTY. If the Company's proposal to charge EGSs for these transaction fees is not adopted, PPL Electric should

be permitted to recover the projected costs associated with those EDI transaction fees for the FPFTY through base rates to ensure that the Company still recovers those costs.

Q. Would the Company need to adjust its revenue requirement if it is not permitted to charge the DUNS and EDI transaction costs to suppliers?

A. Yes. The proposed FPFTY budget assumes that the DUNS and EDI transaction costs will be recovered from suppliers. If this proposal is not approved, the Company would need to adjust its revenue requirement to recover these costs in base rates.

Q. Does this conclude your direct testimony?

A. Yes, it does.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025-3057164

PPL Electric Utilities Corporation

Statement No. 19

Direct Testimony of Daniel Johnson

Topics: **IT Upgrades**

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Daniel Johnson. My business address is 280 Melrose Street, Providence, Rhode Island 02907.

Q. By whom are you employed and in what capacity?

A. I am Senior Vice President, Chief Information Officer for PPL Services Corporation ("PPL Services"), a subsidiary of PPL Corporation and an affiliate of PPL Electric Utilities Corporation ("PPL Electric" or the "Company").

Q. What are your responsibilities in that role?

A. I am responsible for innovation, digital technology, customer technology, field operations technology, grid-pipeline-generation technology, enterprise technology, infrastructure and technology operations, and Agile transformations. I supervise all technologies, applications, enterprise architecture, including security and middleware, data analytics, and Artificial Intelligence ("AI") platforms. I lead a team of 7 senior management professionals.

Q. What is your educational background and professional experience?

A. A complete statement of my education and work experience is attached to this testimony as Appendix A.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to explain the current state of the Company's information technology ("IT") infrastructure and discuss the need for upgrades to modernize and streamline this infrastructure. I will report on the state of the Company's customer-facing, business-facing, operations, and cybersecurity IT systems, as well as the Company's multi-year assessment of the operational risks of the current systems. I will explain why investment in upgrades to IT systems is necessary to secure critical infrastructure, streamline customer service and billing processes, ensure cost efficiency across all systems, and better evaluate and leverage new technologies in the future.

II. IT INFRASTRUCTURE OVERVIEW, RISKS, AND SYSTEMS

Q. Please describe the role of IT Infrastructure in the Company's operations.

A. The Company's IT infrastructure is essential to every part of its operations. Operating an efficient, modern utility means storing, processing, and utilizing large quantities of data every single day. In the past, the number of employees that were directly accessing and working with the Company's IT was limited. However, in an interconnected, modern utility, nearly everyone relies on dependable IT systems to do their jobs. Whether they are linemen, generation unit engineers, accountants, or customer service personnel, the Company's employees constantly transmit and receive information and important communications through the Company's platforms. To continue providing reliable and reasonably priced electric service to customers, the Company must ensure that this information is safe from predatory outside groups, maintained on a stable platform, and efficiently organized so it can be used effectively.

Q. Describe how the IT landscape has changed since the Company's 2015 rate case and the challenges presented by those changes.

A. Both the utility and technology industries have seen significant changes in the past decade. It has been a decade-long sprint through innovation, disruption, and reinvention. We have seen societal shifts in how we live, work, and connect with people. The pandemic accelerated remote work adoption, but the groundwork was laid prior to the start of the pandemic. Since the filing of the last rate case in 2015, the Company has achieved significant operating efficiencies via remote meetings, file sharing systems, and other mainstream workflow software.

But evolution of technology has also introduced new and complex challenges to the Company' IT operations. These challenges include rapid growth of new technologies associated with demand side management ("DSM") programs, and increasingly complex behind-the-meter generation operations. These advancements have added new complexity to what was previously a simpler, one directional movement of energy to customers. To meet the challenges presented by this complexity, now more than ever, accessing understandable, useful real-time information is critical to effective operations.

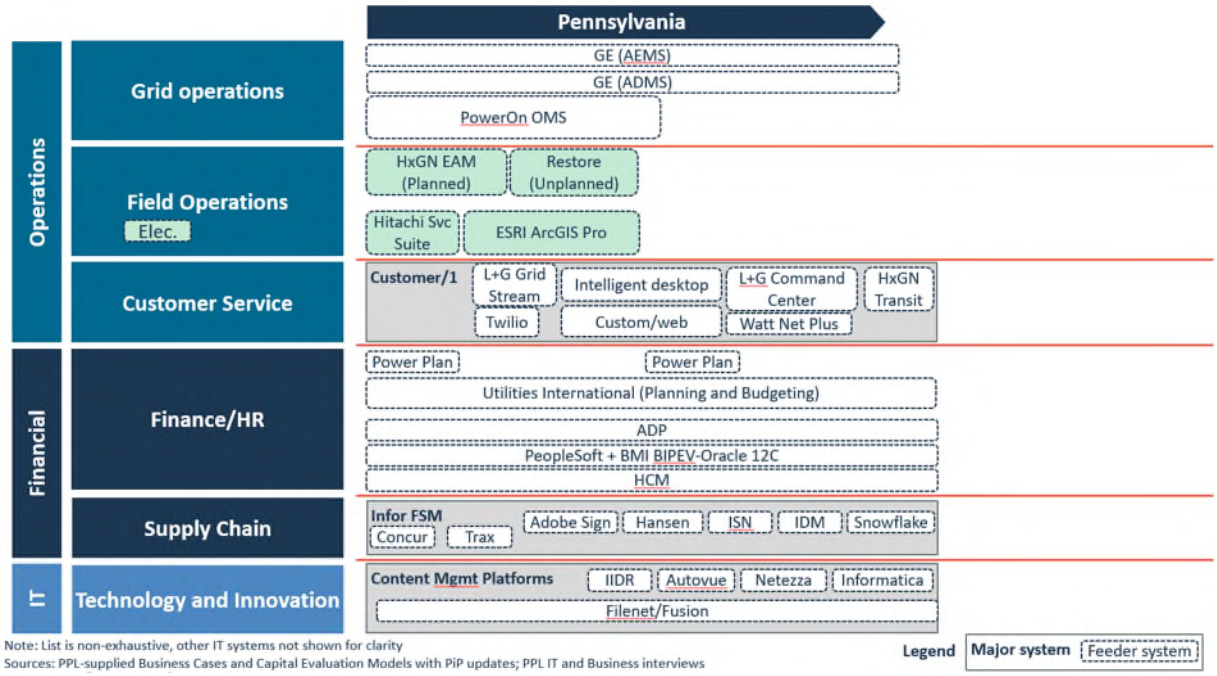
There are also new expectations for customer service. The electrification of vehicles and homes has made customers more conscious of their energy bills. This has led to customer demand for transparent, accessible information about their bills and energy usage so that customers can maximize their savings. As customer needs continue

to evolve, it is likely that the Company will become even more dependent on an efficient, stable IT infrastructure to meet these new expectations.

Most importantly, the Company's IT infrastructure is more essential than ever to keeping its operations secure. The Company is responsible for both critical energy infrastructure and vast amounts of highly sensitive customer, business, and contractor information, all of which is subject to threats by hostile actors. These hostile groups are constantly adopting new tactics, so outdated security systems or unwary staff can create a significant risk that critical information and systems will be compromised. The rapid evolution of AI has made these attacks even more effective and frequent.

Q. Describe the Company's current IT infrastructure.

A. The Company's current IT infrastructure consists of an array of interconnected platforms that fall into a handful of categories. Field operations, cybersecurity, business-side IT (often called enterprise resource planning, or "ERP"), customer-side IT, and content management platforms. Many of these components are currently run "on premise" using the Company's own hardware. Current software applications include:



- **Field Operations:** The Company's field operations rely on Hexagon EAM product suite and Oracle's Primavera for work scheduling, resource, and cost management. In addition, the Company uses Environmental Systems Research Institute, Inc.'s ("ESRI") suite of Geographic Information Systems ("GIS") tools for system mapping needs.

- **Grid Management:** The grid management systems include Advanced Distribution Management System ("ADMS") for the distribution system, and Advanced Energy Management System ("AEMS") for the transmission system. These grid management systems are utilized to provide safe and reliable power to the Company's customers during normal day-to-day operation, as well as in the event of unplanned disturbances to the grid. These systems are provided by GE Vernova ("GEV").
- **Cybersecurity:** The Company uses an array of cybersecurity products to ensure that staff and customers are protected against unauthorized security breaches or cyberattacks, and it employs numerous staff who are dedicated to cybersecurity on a full-time basis.
- **ERP:** The Company operates its finance systems on the PeopleSoft General Ledger (GL) platform and its human resources system uses Oracle HCM (Human Capital Management) including timekeeping. Oracle HCM was implemented in May 2020 and has a vendor subscription agreement and support through May 2028. Because the PeopleSoft GL system does not have all the functions needed to meet the Company's financial requirements, including treasury, remittance processing and budgeting, the Company supplements the system with additional applications including FIS (treasury management system and accounts payable hub), Deluxe (utility customer remittance processing), Utilities International (budgeting and forecasting). And, because Oracle HCM does not have all the functions to meet the Company's human resources requirements, including recruiting and goals plus performance management, the Company must supplement the system with

additional applications including iCIMS (recruiting) and PeopleFluent to fill these gaps. Additionally, native Oracle HCM shortcoming requires the Company to invest in middleware to connect Oracle HCM to multiple legacy systems.

- **Customer Information System ("CIS"):** The Company currently uses the Accenture Customer/1 customer system that is COBOL-based and challenging to support. PPL Electric's instance of Customer/1 in PA was first implemented 25 years ago.
- **Customer Experience ("CX"):** The Company's CX platform – which powers the channels that customers use to interact with the Company – consists of the Twillio platform for multichannel communication.
- **Content Management Platforms:** The Company relies on an array of different content management platforms to share projects and information between groups and with third parties.

A visual representation of these systems is depicted in the table below:

Q. Does the Company's existing IT infrastructure position it to efficiently serve customers in the future?

A. No. Although the Company's current IT infrastructure remains capable of carrying out day-to-day functions in the near term, managing these disparate systems and maintaining aging hardware and software infrastructure requires roughly 90% of the Company's IT resources. This leaves few IT resources remaining to identify and work on applications, systems, and software that will position the Company to serve its customers reliably in the future.

In addition, there are barriers to sharing information across the disparate platforms within PPL Corporation, which are only overcome through manual entry, requiring time and effort from non-IT staff. In short, the Company's current IT infrastructure could maintain the status quo in the near term, but is growing increasingly costly, is becoming less reliable, and, ultimately, is hampering the Company's ability to

find forward-thinking, more efficient ways to serve its customers. This is not a sustainable approach to managing this important part of the Company's long-term success.

Q. What specific risks and challenges have been identified in the Company's IT infrastructure?

A. Many systems are either aging, nearing the end of their service contracts, or reaching "end-of-life," which is the point at which an IT product is no longer maintained or supported by its manufacturer. Obsolescence is looming for many of the Company's existing systems. For example:

- Customer/1: This system is rigid and built for cost times consumption-based rates. To adapt and customize Customer/1 to new rate structures such as time varying rates or compliance with Federal Energy Regulatory Commission ("FERC") Order 2222, the Company will have to engage in the costly and inefficient coding of rates. Customer/1 is out of support with the vendor and makes integrations with third party technologies such as Meter Data Management Systems ("MDMS") increasingly difficult to support. Support costs are expected to rise, as is the complexity to support Customer/1.
- Financial and HR Systems: PPL Corporation recognized the importance of moving to a more integrated operating model, and appreciated the business, cost, and personnel efficiencies that could be realized by such a change. As a result, beginning in 2021, PPL Corporation began to pursue a "One PPL" strategy, aiming to create a shared services model where decision-making, maintenance, and

business activities would happen at the PPL Corporation enterprise level, with input from individual operating companies. PPL Corporation has recognized many benefits the transition to such a strategy could provide, but the disparate software that currently supports PPL Corporation's different operating companies is not equipped for the complex needs of a modern-day utility. PPL Corporation has determined that a key element to support the move to a "One PPL" strategy and improve current business processes is the implementation of a single Enterprise Resource Planning system ("ERP"). This ERP system will manage all HR, Supply Chain, and Finance functions across all four operating companies and will improve not only functionality at the operating company level, but greatly improve information gathering, reporting, and the ability to make data-driven decisions across the entire business.

As these platforms lose vendor support and vendors move towards offering cloud-based services, the Company's IT infrastructure – which is not well-suited for a migration to cloud-based services – will likely require bespoke, fit-for-purpose software patches and fixes to maintain the existing systems.

Q. Do the Company's IT infrastructure challenges affect the cost of providing utility service?

A. Yes.

Q. How so?

A. As stated above, most of the Company's IT resources are spent keeping systems running – fixing hardware, patching software errors, and keeping the IT infrastructure stable so that the Company can carry out its day-to-day obligation to provide service. The cost-burden that this places on PPL Electric's customers is two-fold.

First, as these systems continue to age and lose support resources, the Company will be forced to invest more to keep its infrastructure at an acceptable level of efficiency, safety, and reliability. These necessary expenses will eventually be borne by customers, leading to higher rates with no consequent improvements for the customers; rather, those higher rates will be incurred to maintain aged systems.

Second, making capital investments to maintain these aging and inflexible IT systems stunts innovation and improvement. Focusing the efforts of the Company's IT personnel on keeping day-to-day operations running prevents the Company from taking a long-term view of its IT operations. If the Company's IT staff is solely dedicated to the day-to-day, they cannot evaluate new ways to leverage IT systems and new processes to improve customer experience, streamline operations-side efficiency, and allow the Company to most effectively use its resources to serve its customers.

III. PLANNED IT UPGRADES

Q. How does the Company plan to address the challenges you have identified in your testimony?

A. The Company has developed a five-year plan to overhaul its aging IT infrastructure, reorient the Company's IT expenditures towards improving its IT operations, and

develop an understanding of how to use emerging technologies to effectively improve its operations. The plan was created as part of PPL Corporation's efforts to operate more efficiently by improving cooperation and information sharing across its jurisdictional utilities. Beginning in late 2023, PPL Corporation determined that it needed to better align the IT systems maintained by different utilities within the organization and to identify and study weaknesses and risks in the IT infrastructures of each utility. To carry out this goal, PPL Services engaged in a comprehensive IT systems review.

Q. What was the scope of that review?

A. PPL Services examined the systems supporting the field, grid, customer service, ERP, and data management operations of its different jurisdictional utilities. In all, these systems account for between 50-60% of all IT expenditure across PPL Corporation's jurisdictional utilities.

Q. What were the findings of PPL Services' review?

A. Overall, the review confirmed what PPL Corporation had already suspected – that the lack of a consolidated organizational platform created inefficiencies for the organization. The review also identified numerous risks stemming from the age, complexity, and inflexibility of its current IT infrastructure. Overall, PPL Services concluded that a number of the utility's systems were not meeting the needs of its customers or employees and were hindering PPL Corporation's efforts to operate

efficiently, share ideas within PPL Corporation's jurisdictional utilities and adapt to new challenges.

Q. Please provide some examples of the issues that the IT infrastructure was experiencing.

A. The comprehensive IT systems review identified the following issues, for example:

- More frequent than desired outages to high and middle priority IT systems;
- Few applications and systems running on the cloud;
- Low rates of resolution for help tickets handled by automated systems with no human intervention;
- Proliferation of applications across operating utilities, many performing similar functions, and lack of integration of those systems at the Company level;
- Higher levels of expenditure on hardware maintenance and software patching than on preventative maintenance; and
- Many systems are at or near obsolescence risk, with as many as 10% of the operating systems, 32% of storage systems, and 52% of the network switches reaching end of life at or before 2025.

Q. How has PPL Corporation responded to the findings of its IT systems review?

A. PPL Corporation determined that in addition to immediate repairs to stabilize and secure its IT infrastructure, it must make strategic changes to how it manages and maintains IT infrastructure. In 2024, PPL Corporation launched a targeted and strategic plan to consolidate its systems, overhaul its processes, and become more flexible to future

changes in IT. This plan includes the consolidation of platforms used across PPL Corporation's jurisdictional utilities into one unified platform to be used across all of the jurisdictional utilities. PPL Corporation anticipates that this migration to a unified platform will establish one set of shared costs that can be allocated across different affiliates, resulting in savings relative to each affiliate maintaining its own system

Q. Please explain PPL Corporation's plan to upgrade IT systems.

A. PPL Corporation organized its plan around a number of different "value streams" – which are simply categories of solutions and people who build those solutions for a broader business objective. The value streams included in the plan are: (1) Advanced Customer Operations and Engagement, which includes CIS, customer experience platforms, and metering modernization; (2) Predictive Field Operations and Asset Management, which includes Work and Asset Management Consolidation; (3) Grid and Pipeline of the Future, which includes unified GIS and intelligent grid operations across all utilities; (4) Enterprise Technology, which includes human resources solutions and corporate and financial enterprise solutions; (5) Data analytics and AI; (6) Cybersecurity; and (7) Infrastructure and Other. Across all value streams, PPL Corporation's plan further includes three overlapping phases: Run, Grow, and Transform. The "Run" phase of plan is focused on stabilizing and securing day-to-day operations by replacing obsolete hardware and software systems. During this phase, PPL Services will also free up its IT resources for more proactive projects by contracting these more basic IT support operations to a managed services company. The "Grow" phase will focus on preparing PPL Corporation's different utilities and employees to

implement a more cohesive and efficient IT infrastructure. Finally, the "Transform" phase of the plan will focus on bringing PPL Services' IT systems and capabilities into the future.

IV. RUN PHASE

Q. How will day-to-day operations change during the "Run" phase?

A. The Run phase of the IT upgrade strategy, which began in 2025, focuses on making changes that will meet the immediate needs of the Company's employees and customers while freeing up resources to carry out PPL Electric's long term IT goals. This is expected to produce short-term improvements by reducing the number of recurring IT incidents, increasing the number of issues resolved through automated fixes, reducing backlogs, and adding new and improved security services.

Q. How does the Company plan to free up IT employees and focus on long-term goals?

A. The Company has entered into a Managed Services Agreement with a vendor to manage and stabilize its day-to-day IT and cybersecurity operations.

Q. What services are included as part of the Managed Service Agreement?

A. The Managed Services Agreement covers three primary IT functions previously performed by PPL Electric employees: (1) application managed services; (2) managed security services; and (3) infrastructure managed services. By transferring these functions to an outside vendor, PPL Electric expects to reduce IT operations risk, reduce duplication of applications and systems, increase automation, and add new and

improved IT security services, thereby making the Company's systems more secure and more efficient.

Q. How will the Managed Services Agreement create cost-savings?

A. The Managed Services Agreement includes a commitment by the vendor to reduce PPL Electric's IT operations costs for functions within the scope of the MSA by 50% over a five-year span. In addition, the vendor has agreed to partner with PPL Electric to share in the costs to transition to the managed services structure.

Q. How will the Managed Services Agreement enable PPL Electric to focus on its long-term IT goals?

A. By transferring employee time devoted to day-to-day operations and cutting IT operation costs, the Managed Services Agreement will free up PPL Electric's employee capacity for investment in skills training as well as identifying and implementing its new consolidated platforms.

V. GROW PHASE

Q. Why does the IT upgrade plan contain a "Grow" phase?

A. The Grow phase is intended to make sure that the correct IT policies, organizational structures, and talent are in place before PPL Electric makes extensive investments in new operations.

Q. Describe the policies that PPL Electric will implement to ensure that the upgrades to IT systems are cost effective.

A. To use new IT systems to meaningfully improve its operations, PPL Electric will maximize the value the new systems can bring, measure that value, and ensure that employees are positioned to take advantage of value-added systems. To that end, the Grow phase will implement the following policies:

- **Modernize IT Financial Management:** IT Financial Management is a way for companies to track the financial performance of their IT infrastructure. By adopting tools and identifying metrics that will track the performance of its IT systems in real time, the Company will be better able to evaluate the state of its IT infrastructure and the actual benefits produced by different IT system changes.
- **Scaled Agile Framework (SAFe):** PPL Electric will train its employees to implement the SAFe approach. SAFe relies on groups of employees from across different operations teams and prioritizes flexible decision making, collaboration, and solutions that best serve PPL Electric's end-goal. The Company will implement SAFe training for its business, IT, and Field Operations Teams, alongside more conventional IT skills development.
- **Value Realization Office:** The creation of a Value Realization Office, with a staff of individuals dedicated to overseeing the IT upgrades, tracking and reporting the effectiveness of different parts of the plan, and assisting operations teams in implementing these new systems.

- **Assessment and Preparation for New Programs:** PPL Electric is undertaking an organization-wide assessment of its work efficiency and determining the best way to incorporate new IT systems to make its operations more efficient and effective.
- **Skills Development:** PPL Electric is investing in training its employees to adjust to working with the new, consolidated platforms and managed services arrangements, learning how SAFe will function, and implementing uniform cybersecurity best practices.
- **Data & AI:** PPL Electric is actively recruiting individuals who have a background in data analytics and AI to build a team that will be able to determine how to implement new machine learning and AI technologies in a way that meaningfully improves operations.

Q. When will these policies be implemented?

A. While implementing these policies and programs will be an ongoing project, the majority of these policies and organizational changes will be fully adopted by the end of 2025. Programs such as building up the capabilities of the Data & AI value stream and identifying automation efficiencies are expected to be ongoing throughout the implementation of IT upgrades.

VI. <u>TRANSFORM PHASE</u>

Q. Describe the Transform phase of the Company's plan to upgrade IT systems.

A. The Transform phase is the implementation of PPL Electric's selected next-generation IT systems through different value streams, and the creation of a Data and AI team

within IT dedicated to studying advancements in and possible uses for AI and other emerging technologies.

Q. Will the Company implement all of these IT changes simultaneously?

A. No. The Company will roll out platform changes over time, beginning with its CIS and ERP operations.

Q. Has the Company determined which platforms it will use for its CIS and ERP platforms?

A. Yes. The Company has chosen to implement SAP's cloud-based systems as its "wall-to-wall" CIS and ERP platforms.

Q. How did the Company select the SAP platform?

A. PPL Electric issued a request for quotes ("RFQ") to qualified vendors that have experience in the utility industry and have the capabilities necessary to meet current and future needs. PPL Electric then reviewed and evaluated the responses to the RFQ using standardized criteria.

Q. What CIS and CX needs did the Company identify?

A. The Company determined that adequate CIS and CX platforms deployed across all jurisdictional utilities would need the following:

- **Billing:** PPL Electric's billing involves multiple rate structures, such as time-of-use, time variable (real-time pricing), demand-based, and tiered pricing. The CIS

platform must support these complex billing models, ensuring that customers are billed accurately. In addition, automated billing, payment processing through various channels (online, mobile, paper), and integration with financial institutions are critical.

- **AMI & Smart Grid Integration:** The CIS platform must be able to integrate with advanced metering infrastructure ("AMI") technologies. This integration allows for real-time data collection and analysis, supporting load forecasting, outage management, and efficient resource allocation. Processing these large datasets and generating useful recommendations will help the Company maintain grid reliability.
- **Customer Self-Service:** Modern customers expect transparency and control over their utility accounts. PPL Electric's next CX platforms must include intuitive web and mobile self-service portals where customers can view usage data, make payments, and report issues. The systems should also use different communications channels – such as e-mail and SMS text messages– to ensure that customers receive timely notifications about outages, billing updates, and other critical information.
- **Automated Regulatory Reporting:** Given the regulatory landscape, the CIS must facilitate automated reporting to various oversight agencies. An effective regulatory reporting system should provide secure data management, audit trails, and features that help the utility maintain compliance with state and federal regulations. This not only minimizes legal risks but also builds trust with customers and regulators alike.

Q. What risks are managed or mitigated by the implementation of a new CIS?

A. Moving forward with one modern CIS system will address a number of key risks, most importantly, cybersecurity and obsolescence risks with the Company's current systems. A modern, integrated CIS will enable consistent and centralized security procedures across PPL Corporation's operating companies as opposed to the inconsistent approvals and versions they currently work in.

Q. What are the expected capital costs to the Company for the Advanced Customer Operations and Engagement projects?

A. As I noted earlier in my testimony, CIS and CX are considered along with other system upgrades and enhancements as a suite of solutions in a value stream called "Advanced Customer Operations and Engagement." PPL Electric expects to spend $82 million in capital on this suite of solutions, including CIS and CX, during the Fully Projected Future Test Year ("FPFTY"). Capital spending for this area during the Historic Test Year ("HTY") was $73.3 million. Capital spending for this area during the Future Test Year ("FTY") will be $82 million.

Q. What ERP needs did the Company identify?

A. The Company determined that an adequate ERP system would need the following:

- **Financial Management:** An ideal financial management system would enable accounting and budgeting to occur at the same level of detail. The ERP system must support utility-specific financial management functions, including budget and forecasting, as well as multi-entity financial consolidation. Accurate financial

reporting and regulatory compliance are essential for ensuring transparency and stakeholder confidence.

- **Asset and Supply Chain Management:** An ERP platform must offer asset management features for the full lifecycle of an asset. This includes an asset's procurement, maintenance, maintenance scheduling, and eventual replacement planning. Effective supply chain management is vital to ensure that parts and equipment are available at all these stages.
- **Human Capital Management ("HCM"):** An ERP system that incorporates human capital management can streamline workforce scheduling, payroll processing, and compliance with labor regulations. This is especially important for managing the Company's crucial Field Operations. An effective HCM module ensures that the right personnel are available to handle operational tasks.
- **Business Intelligence and Analytics:** PPL Electric's next ERP platform will include analytics capabilities that track key performance indicators ("KPIs"), predict maintenance needs through AI, and support long-term thinking.

Q. Did the Company consider any other factors in selecting a platform?

A. Yes. In addition to these criteria, PPL Electric evaluated the platforms based on their ability to integrate with other systems, vendor support, adaptability to new conditions such as regulatory requirements, and total cost. Additionally, PPL Electric determined that a cloud-based platform was optimal due to overall advantages in support, reduced overhead, and cyber-security support. For example, many vendors are investing in new capabilities and features for cloud-supported products that are not available for legacy

on-premises systems. Cloud-based systems are also advantageous in that system updates are automatically pushed to customers, eliminating the need for scheduling and implementation of updates, some of which may be critical to system security. Cloud-hosted products also offer additional business continuity and disaster recovery capabilities by increasing redundancy and decreasing the costs of conducting disaster recovery testing. Cloud providers offer multiple data centers and include redundant infrastructure to enable secure data storage. This redundancy protects against significant downtime or failure of infrastructure. Cloud-hosted products also decrease dependence on internal resources for disaster recovery testing and planning.

Q. When will the Company implement the new systems?

A. By the end of 2027, the SAP platform will be fully implemented for ERP operations PPL Corporation wide and for CIS operations for PPL Electric. However, portions of this platform will be in service by the end of the FPFTY, which is why there are capital costs associated with the ERP platform are included in this rate case.

Q. What are the expected capital costs of the Company for the planned upgrades to the ERP and other Enterprise Technology?

A. For the Enterprise Technology value stream, which includes ERP but also standard enterprise-level projects, the Company expects to spend approximately $36 million in capital during the FPFTY. Capital spending in this area during the HTY was approximately $11.6 million. Capital spending in this area during the FTY is expected to be approximately $37 million.

Q. What other IT infrastructure improvements will the Company implement?

A. Over time, all PPL utilities will implement additional changes to customer service interfaces and across grid and field operations. On the Customer side, the Company plans to create more integrated customer experience ("CX") platforms that better facilitate self-service for customers and allow them to switch seamlessly between phone, mobile app, and web or electronic communications with the Company. This will include upgrades to the current IVR systems.

For field operations, the Company plans to implement updated systems that will modernize field-time entry, enable real-time field information sharing by its employees, and will examine the use of predictive technologies to improve vegetation management.

Finally, the Company's grid and pipeline operations plan to unify its GIS systems with PPL Corporation's other jurisdictional utilities, use predictive weather models to better assess system risks, and employ the use of drones for asset inspections.

Q. Has the Company determined what system it will use to implement these new improvements?

A. Not yet, but we are nearing final selection of some systems that will serve the functions described above. We are continuously monitoring industry implementation of technological improvements and – as with the ERP and CIS platforms – determine the criteria for selecting the right systems.

Q. What are the expected capital costs to the Company for the planned upgrades to IT systems to support Grid & Pipeline and Field Operations and Asset Management?

A. For the Grid and Pipeline of the Future value stream, the Company expects to spend approximately $7 million in capital during the FPFTY. Capital spending for this area during the HTY was approximately $30 million. Capital spending for this area during the FTY is expected to be approximately $23 million.

For the Field Operations and Asset Management value stream, the Company expects to spend approximately $9 million in capital during the FPFTY. Capital spending for this area during the HTY was approximately $16 million. Capital spending for this area during the FTY is expected to be approximately $20 million.

Q. How do you plan to manage reliability risks from implementing new technologies?

A. Given the critical role that the Company serves and the importance of IT systems in supporting that role, careful evaluation of emerging technologies is even more important. The goal of the Transform initiative is not to place the Company on the bleeding edge of technological advancement – it is to carry out long-term, thoughtful assessments and implementations of emerging technologies and their use cases. By thinking about transformative technologies early and carefully, we will be positioned to implement any technological innovations in a way that makes financial and practical sense for the Company and its customers.

Q. How will AI be utilized in the Transform phase of the upgrade plan?

A. Developments in AI include promising technologies that may revolutionize grid management, cybersecurity, customer engagement, and data processing. If these technologies live up to their billing, the potential benefits to customers in the form of savings and operational efficiency will be significant. However, the Company's top priority remains the safe and reliable delivery of energy to customers, and there are still serious questions about these technologies that must be resolved before they can be relied on in sensitive parts of operations.[1] Therefore, the Company is committed to closely studying industry use-cases to determine where AI can create efficiencies, and where it creates unacceptable risks.

Q. Are there any areas where the Company expects to implement AI?

A. Yes. PPL Electric believes that there are ways to immediately free up resources using AI and other automation systems to carry out low-level, time-consuming, and repetitive tasks. These include cataloguing incidents, maintaining data sets and processing data to generate reports, managing login credentials and user access, and fixing and patching routine IT problems. In addition, the Data & AI team will use AI to examine asset planning and look for other organization-wide efficiencies.

[1] *See DOE Delivers Initial Risk Assessment on Artificial Intelligence for Critical Energy Infrastructure*, DOE (Apr. 29, 2024), https://www.energy.gov/ceser/articles/doe-delivers-initial-risk-assessment-artificial-intelligence-critical-energy.

Q. What are the expected capital costs to the Company for the planned upgrades to IT systems to support Data & AI and any other IT Infrastructure?

A. For the Data & AI value stream, the Company expects to spend approximately $9.1 million in capital during the FPFTY. Capital spending for this area during the HTY was approximately $3 million. Capital spending for this area during the FTY is expected to be approximately $6.5 million. For the Infrastructure and Other value stream, the Company expects to spend approximately $17 million in capital during the FPFTY. Capital spending for this area during the HTY was approximately $12 million. Capital spending for this area during the FTY is expected to be approximately $20 million.

VII. CYBERSECURITY

Q. What is the primary goal of the Company's cybersecurity operations?

A. The primary goal of the Company's cybersecurity operations is to protect critical infrastructure, which includes grid operations and the operational technologies and the IT systems that keep these operations running.

Q. What is the current state of the cybersecurity landscape for utilities?

A. Like the rest of its business operations, the current cybersecurity landscape for utilities has been complicated by new technologies such as interconnected management systems and smart grid systems. These interconnected technologies produce new layers of sensitive data containing customer and business information such as personal data, usage information, time of use information, and other information that can be exploited by savvy threat actors. Utilities in general are susceptible to cyberattacks due to their

broad geographic footprint and the number of "smart" devices deployed in the field and the interdependence between those devices and the software required to make them valuable.[2] They are also targets for sophisticated cyber criminals and nation states because of the potential scope of disruption that can be caused by a successful cyberattack.

In short, cybersecurity incidents pose tremendous risks to utilities and their customers and have the potential to result in disruption of energy delivery, destruction of physical and cyber assets, exposure of sensitive business and customer data, and disruption of day-to-day business operations, among other risks.

Q. What common cybersecurity threats does the Company experience?

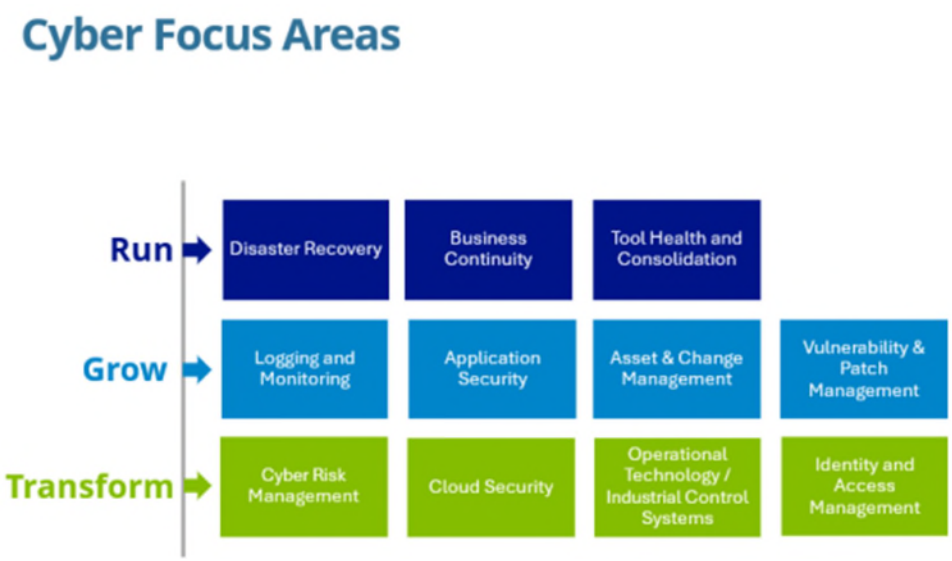
A. The Company is generally faced with two major forms of cybersecurity threats. Computerized attacks, such as malware and ransomware, are designed to exploit vulnerabilities in the Company's IT systems to extract information or halt operations. Social engineering attacks, such as phishing, attempt to deceive employees or others with access to sensitive information or system access information into revealing that information to gain unauthorized access to systems. These two types of threats are often used together – for example, a social engineering attacker may include malware in a document, or a computerized attack may have been set up by obtaining sensitive information about IT systems through social engineering.

[2] E.g., The energy-sector threat: How to address cybersecurity vulnerabilities. | McKinsey.

Q. Please explain how cybersecurity strategy has evolved to combat these new threats.

A. In the past, utilities typically viewed cybersecurity as a one-time investment – vendors sold technology that met perceived threats, utilities purchased these solutions, and they then updated them as needed. Today, cybersecurity requires continuous attention, maintenance, employee training, and updates. Given the Company's reliance on its IT infrastructure to run their critical infrastructure, cybersecurity is now a central focus of our security operations, and a regular topic of discussion for all of the Company's operations.

Q. Does the current IT infrastructure contain vulnerabilities that could be exploited by threat actors?



A. Yes. Certain potential vulnerabilities were identified in PPL Electric's overall review of its systems. Many of the identified issues stem from the absence of a consolidated IT infrastructure with standardized processes and information access policies. As long as the Company maintains different systems across operating companies, many of these vulnerabilities will continue to exist.

Q. Will the planned IT upgrades address these vulnerabilities?

A. Yes. Overall, the planned upgrades will improve cybersecurity across the PPL Corporation utilities by consolidating all IT systems, which will mitigate many of the risks identified in PPL Electric's overall review of its systems. In addition, PPL Electric will reassess and strengthen different parts of cybersecurity infrastructure during each stage of the upgrade plan.

Q. Please explain how the different phases of the planned upgrades will support the Company's cybersecurity infrastructure.

A. The "Run," "Grow," and "Transform" phases of the upgrade plan will support the Company's cybersecurity infrastructure. In the "Run" phase, through its managed services agreement, the Company will solidify its recovery planning operations, which will ensure that in the event of an incident the Company will be capable of restoring its systems. The Company will also assess the different cybersecurity tools in use and consolidate them into one modern cybersecurity toolkit. As the upgrade plan moves into the "Grow" phase, we will assess application security, develop better protocols for vulnerability management and threat monitoring, and invest in cybersecurity skills training for employees. These are intended as organization wide preparations to make it easier to implement future cybersecurity programs. In the "Transform" phase, once a set of uniform protocols and systems is in place, our cybersecurity operations will implement advanced cybersecurity risk management, cloud security programs, more advanced identity and access management systems, and investments in specialized staff to secure the Company's operational technology. A visual depiction of the plan is included below:

Q. Does the Managed Services Agreement include cybersecurity protection?

A. Yes. Although the Company plans to maintain its own technology security team, the Managed Services Agreement will help the Company with additional cybersecurity resources for 24x7 security monitoring and detection, along with disaster recovery and business continuity operations when faced with cybersecurity threats or incidents.

Q. What are the expected capital costs to the Company for the planned upgrades to the cybersecurity value stream?

A. The Company expects to spend approximately $8.4 million in capital for cybersecurity initiatives during the FPFTY. However, once the systems and processes described in my testimony are fully implemented, the capital costs for cybersecurity are expected to decrease. Capital spending in this area during the HTY was approximately $3 million. Capital spending in this area during the FTY is expected to be approximately $8.1 million.

VIII. BENEFITS OF PLANNED IT UPGRADES

Q. Will the planned IT upgrades create benefits for the Company's customers?

A. Yes. While the primary motive for the upgrades is the long-term security and stability of IT systems and the Company's critical infrastructure, they will also create long-term benefits for the Company's customers. PPL Electric witness Lisa Norden summarizes the customer-services benefits of the upgrades in more detail in her testimony (PPL Electric St. No. 18), but they include new and enhanced self-service options for customers that will operate across integrated platforms, along with the ability for customers to begin interactions on one device and continue on another device.

Q. How will the upgrades drive operational efficiencies that will benefit customers?

A. The upgrades are expected to achieve the following operational efficiencies, among others: (1) support and licensing of multiple systems and efficiencies through centralized support at the PPL Corporation level; (2) streamlined implementation of new system functionality across all operating companies, including potential implementation of AI advancements; (3) reduction in manual data reconciliation and data collection to support enterprise-wide insights and analysis; (4) billing and process automations and handling time efficiencies for customer services operations; (5) reduction in clerical, engineering, and scheduler manual administrative work to support field operations; and (6) overall reduction in system maintenance and manual process for enterprise services.

Q. Does this conclude your direct testimony?

A. Yes, it does.

Appendix A

DANIEL JOHNSON

Slingerlands, NY 12159 | (917) 860-8850 | daniel.james.johnson@gmail.com | LinkedIn

CHIEF TECHNOLOGY OFFICER

Technology Innovation | Revenue Growth | Cost Control | Process Improvements | Team Leadership & Development

Innovative technology executive offering a proven record of success directing global teams, developing, and leading a forward-looking support structure and scalable infrastructure, along with delivering an architecture that fully aligns with business needs while allowing future development and growth. Valued for providing technical leadership for enterprise systems and security architecture, engineering, and implementations, specializing in digitization, automation and operational streamlining. Demonstrated ability to build and lead technical and non-technical teams that deliver high-performance in the maintenance, management, and enhancement of secure and stabler computing environments. Highly purposeful and driven by data-driven decision-making, consistently striving for measurable results and continuous improvement.

Core Competencies

- IT Strategy Development
- Information Security
- Enterprise Implementations
- Artificial Intelligence (AI)
- Technical Project Management
- Solution Design, Testing, Deployment
- Enterprise Vendor Management
- Disaster Recovery / Business Continuity
- Cross-Functional Team Leadership
- IT Governance
- Service Delivery
- Mergers & Acquisitions
- Process Optimization & Automation
- Budget Planning / Management
- Executive & Board Presentations
- Public & Private Clouds
- DevOps / Data Center Virtualization
- Data Analytics & Insights

Professional Experience

2024 – Present • PPL • Providence, RI

Chief Information Officer

Manage an organization of over 500 individuals with an annual IT budget exceeding $450 million. Responsible for innovation, digital technology, customer technology, field operations technology, grid-pipeline-generation technology, enterprise technology, infrastructure and technology operations, and Agile transformations. Supervise all technologies, applications, enterprise architecture, including security and middleware, data analytics, and AI platforms. Lead a team of 7 senior management professionals.

- Delivered technology solutions for a $9B US utility business offering a wide range of products and services across Kentucky, Pennsylvania, and Rhode Island.
- Implementing a 5-year IT reinvention strategy with an investment of $1.5 billion to enhance digital customer experience, modernizing grid and field operations, adopting a cloud-first infrastructure, enabling data-driven decision making, upgrading ERP systems, and establishing an agile IT operating model.
- Achieving a reduction in net operating costs, with projected IT Operations and Maintenance (O&M) savings of $128 million over five years. These savings are anticipated to be realized by 2029 through strategic optimization and cost management initiatives.
- Stabilized IT operations and drove operational excellence by targeting a 10% reduction in Mean Time to Recover (MTTR) from incidents by Q4 2025, enhancing system reliability and response efficiency.
- Enhanced planning and delivery effectiveness by advancing SAFe Agile practices, targeting the launch of 20+ Agile Release Trains (ARTs) by 2026 to drive enterprise agility and alignment.
- Increased financial visibility and transparency by driving a 3x improvement in speed to financial and value insights in 2025, enabling faster, data-driven decision-making.
- Upskilled the workforce by launching 20+ technology learning paths by 2026, fostering continuous learning and strengthening organizational technical capabilities.
- Enabling growth and innovation by driving a 4x increase in capital allocation toward growth-focused investments by 2029, aligning funding with strategic priorities.
- Improved ease of doing business for customers and colleagues by driving 85%+ adherence to out-of-the-box functionality and delivering a unified technology platform to enable a consistent colleague experience by 2025.
- Delivering business outcomes across value streams by enabling $261 million in IT reinvention lead Operations & Maintenance (O&M) savings over 5 years, aligning technology transformation with enterprise cost optimization goals.

2013 – 2024 • GUARDIAN LIFE • New York, NY

Chief Technology Officer and Head of Technology

Directed an organization of 2,800+ individuals with an annual $400+ MM IT budget, overseeing innovation, divisional CIOs, digital technology, enterprise technology, technology operations, and Agile transformations. Oversee divisional CIOs, enterprise technologies, all applications, enterprise architecture, including security and middleware, data analytics, and AI platforms. Manage a team of 8 senior management professionals, including one in India. Serve as a voting member of strategic investment leadership team.

- Delivered technology solutions for a $12B insurance business offering a wide range of products and services.
- Evolved a technology portfolio spanning 5 decades, including systems such as a policy admin system built 52 years ago and the recently launched digital consumer business, GuardianDirect.com.
- Led the modernization of workplace technology by implementing Office365, streamlining communication and collaboration tools, and enhancing productivity across the organization.
- Spearheaded the innovation of the desktop experience by introducing Macs, providing users with a more intuitive and efficient computing environment while ensuring compatibility with industry-standard software and tools.
- Orchestrated the migration of 80% of applications to cloud-based platforms, leveraging the scalability, flexibility, and cost-efficiency of cloud computing to modernize the organization's technology infrastructure.
- Established a robust data lake on cloud infrastructure, enabling advanced data storage, processing, and analysis capabilities to drive informed decision-making and support data-driven initiatives across the organization.
- Significantly enhanced reporting and analytics capabilities by implementing over 30 machine learning models, empowering the organization with actionable insights and predictive analytics to drive strategic decision-making and operational efficiency.
- Successfully migrated the customer experience to digital platforms, expanding the organization's digital footprint to over 25 million customer touchpoints, resulting in increased accessibility, streamlined interactions, and enhanced customer satisfaction.
- Integrated digital technologies into various aspects of business process, operations, and customer experiences.
- Spearheaded the use of technologies including cloud computing, data analytics, artificial intelligence, and automation to enhance efficiency, agility, and innovation, resulting in significant increases in digital adoption and digitally enhanced capabilities.
- Drove a cloud-first strategy, leveraging 120+ Software-as-a-Service solutions, migrating 80% of total applications to AWS, and achieving the highest levels of system stability over the past 20 months.
- Enabled a truly data-driven organization with advanced analytics, intelligent automation, data visualization, and reporting.
- Supported the collection, processing, and scheduling of data to inform human and automated business decision making, including claim fraud detection and predictability of claim incidence.
- Implemented artificial intelligence-enabled solutions across the enterprise including automated digital customer experience, cognitive agents, process optimization, digital enrollment, computer vision for dental claims review, and email automation.
- Fostered a culture of innovation, cultivating strong partnerships, hackathons, thought exchanges, and technology roadmaps, resulting in the submission of 4450+ ideas and the launch of new capabilities benefiting consumers and colleagues.
- Worked closely with the business teams to launch over 100 teams, 39 of which are organized into 8 Agile Release Trains.
- Trained over 3800 resources with 60+ employees certified as SAFe professionals, resulting in an average team happiness rating of 4 out of 5.
- Collaborated with deal teams to identify and diligence potential direct investments in start-ups, prototype and pilot commercial solutions, and leverage insights for Guardian’s core businesses.

2007 – 2013 • NBC UNIVERSAL, COMCAST • New York, NY

Chief Technology Officer and Senior Vice President

Led a technology organization of 800 individuals and managed an annual budget of $190 MM, overseeing architecture, engineering, and 24/7/365 operations for all technology, from desktop to data center. Implemented an IT Service Provider model, fostering collaboration across digital, workplace, software, platform, infrastructure, service delivery, and service management teams.

- Provided cutting-edge technology solutions for a $26B media & entertainment business spanning 10 industries and 40+ brands, with major operations in New York, Los Angeles, Washington DC, Miami, and London.
- Led the evolution of a robust technology portfolio encompassing 120 projects, 800 applications, 2,300 application platform instances, 8,000 servers, 11 petabytes of storage, 5 data centers, and 2,800 network devices connecting 26 countries with 500 circuits and 40,000 desktops, tablets & smartphones.

- Spearheaded the 5 most productive years for Technology during historic times, delivering over 600 business initiatives, including high-profile events such as the Super Bowl, (5) Olympic Games, (5) US Elections, SAP ERP, Ad Sales Upfronts, Universal & Comcast Integrations, and prevented 35,000 defects from being released into production.
- Partnered with NBC Olympics to design, build, and support technology solutions for the 2012 London, 2010 Vancouver, 2008 Beijing summer and winter games, ensuring rapid deployment and flexibility to deliver cost-effective content acquisition, production, and distribution solutions.
- Collaborated closely with the NBC News Elections team to provide uninterrupted event coverage support for 200+ hours during 22 Live Primaries, ensuring 100% uptime during the 24-hour studio coverage for Super Tuesday, resulting in significant cost savings through innovative network solutions.
- Introduced fresh perspectives on modernizing the technology portfolio, creating flexibility, reducing costs, and enhancing performance. Implemented full-stack application private cloud solutions, achieved $15MM in savings, and drove adoption of Enterprise Data Warehouse environment across key business areas.
- Successfully leveraged public and private cloud technology to host services related to human resources, payroll, employee benefits, and corporate systems during the NBCUniversal and Comcast merger, driving innovation and improving financial performance.
- Collaborated with business partners to consolidate worldwide financials, supply chain, and human resource systems into a centralized SAP system, ensuring compliance with banking and reporting standards and providing a seamless solution for multiple currencies, time zones, and languages.
- Worked closely with the Ad Sales and Research team to improve data warehouse loads by 25%, streamlining access to critical ratings and sales data, optimizing data schemas, and enabling informed decision-making on $6 billion of revenue.
- Introduced game-changing technologies at every layer of the technology stack, including enterprise data warehousing (Teradata), virtualized desktops and servers (VMWare), SAN Replication (RecoverPoint), backup deduplication (Data Domain), Nexus network switching (Cisco), and core WAN (ASR 9000).

2004 – 2007 • NBC UNIVERSAL, GENERAL ELECTRIC (GE) • New York, NY

Vice President, Technology Governance

Established and spearheaded the inaugural Technology Governance organization at General Electric, overseeing a global team of 80 individuals and managing a sizable $15MM budget. Cultivated strategic partnerships with senior business leaders, leveraging four years of relationship-building to gain insight into their challenges and devise optimal technical solutions. Directed Information Security, Quality Operations, 24/7/365 IT Operations Center, Technical Account Management, and International service delivery to ensure operational excellence and client satisfaction.

- Pioneered and enforced compliance for critical processes, including Technology Green Light (NTI), Technology Stack Standardization, Top 40 (Demand Management), Bottom 10, 2-Minute Drill, Design Reviews, Organizational Maturity, Change Control, Long-Term Triage, and Resource Allocation, ensuring adherence to industry standards and best practices.
- Drove the consolidation, design, and implementation of regional core compute solutions across multiple regions, resulting in a substantial annualized savings of $11MM. Enhanced the compute infrastructure in Washington DC by significantly boosting bandwidth and storage capacity, consolidating compute functions, refreshing network components, and migrating to a new IP core at News Channel. Successfully delivered a $1.4MM project focused on technology and operations consolidation for NBC News, CNBC Europe, and Universal properties based in London.
- Headed the integration of Media Technology, facilitating the acceleration of Digital Media growth by consolidating Internet & Broadband, Software Development, and Air & Production technology teams, and transitioning over 250 personnel into new roles.
- Orchestrated the infrastructure divestiture for TVS Media General, facilitating the sale of four sites for $600MM and ensuring seamless transition within 61 days of the announcement. Completed the extensive planning required to sustain services post-close or transition systems from NBCU to MG control, minimizing disruption to the stations' operations.
- Led the integration of iVillage for NBC Universal with a budget of $2.8MM, streamlining back-office infrastructure, launching new business initiatives, and providing technical solutions for channel expansion and divestiture, all while optimizing resources and maximizing efficiency.
- Oversaw CTO service delivery for Olympic Games in 2006 Torino and 2004 Athens, collaborating with centralized technology teams and the NBC Olympics team to build a robust infrastructure supporting online, event, and remote operations.
- Steered the increased utilization of shared services within the Television Operations & Production Services organization, optimizing projects such as Artworks, Today Show HD, WNBC HD, NFL HD, Edit CoE, Elections 2006, Start-Over (Time Warner), Disaster Recovery, NOC Firewall Audit, and Media Content Distribution for NBC Network Projects.

2000 – 2004 • GENERAL ELECTRIC (GE) • New York, NY

Client CIO, Business Solutions

Headed a dynamic team of 110 contractors and employees, managing a substantial $17MM budget while spearheading IT strategy, software development, business digitization, technology rationalization, and Six Sigma delivery for the GE Energy Products Commercial and Finance divisions, driving operational excellence and fostering innovation.

- Quarterbacked the digitization of a $900MM China deal involving 5 customers, 4 design institutes, and 2 joint ventures, establishing infrastructure, implementing applications, and providing comprehensive training and support across 9 locations. Empowered 40 design reviews over 5 months, yielding significant $1MM savings. Leveraged the success of the China Bundle Buy digitization to develop and deploy a model for European projects, resulting in $3MM in savings in 2004.
- Managed the stabilization of the Customer Collaboration tool, the most accessed application on gepower.com, catering to over 20,000 registered users, 12,500 unique users, and 1.4MM page views per week. Enabled $12MM in savings in 2002 by renegotiating supplier contracts, achieving a 25% reduction in license payments and a decrease in on-going maintenance from 20% to 13% of the license fee. Led a cross-functional team to stabilize performance and availability, improving response time by 24% and decreasing variation by 68%.
- Conceptualized and implemented the pioneering Materials Management (eTag) program, recognized as the leading use of RFID technology for Asset Management in the industry and featured in Info Week. Forged a strategic partnership with IBM for a for-profit collaboration, highlighting a keen ability to leverage industry-leading technology for operational excellence.
- Achieved a remarkable 50% reduction in fixed costs, amounting to $1MM in 2003, through the strategic rationalization of applications, scope reduction to break-fix, and leveraging GDC contractors, demonstrating a strong commitment to enhancing efficiency and optimizing resources.

Education & Certifications

Double Master of Business Administration (MBA) Information Systems and Finance
Fordham University, New York, NY

Bachelor of Science, Management Information Systems (MIS)
LeMoyne College, Syracuse, NY

Training & Professional Development

Guardian: Justice, Equity, Inclusion, and Diversity (J.E.D.I) Master
Six Sigma Certification: Certified Black Belt, led team delivery of $1MM in savings over 15 projects (2001-2003)
Executive Leadership: Graduated Experience Information Management Programs (2021)
GE Crotonville: Attended several leadership training courses (2000-2006)

Professional Affiliations

Member, NPower National Advisory Council (Creates pathways to economic prosperity by launching digital careers for military veterans and young adults from underserved communities.)
President, Bethlehem Lacrosse Club (a 501c3 organization that provides an enjoyable development experience with the program while learning lacrosse for boys and girls from Kindergarten to 6th grade.)

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025-3057164

PPL Electric Utilities Corporation

Statement No. 20

Direct Testimony of James Conrad

Topics: Electric Vehicles

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is James Conrad, and my business address is 827 Hausman Road, Allentown, PA 18104.

Q. By whom are you employed and in what capacity?

A. I am employed by PPL Services Corporation ("PPL Services"), a subsidiary of PPL Corporation and an affiliate of PPL Electric Utilities Corporation ("PPL Electric" or the "Company") as Senior Director of T&D Smart Grid & Automation.

Q. What are your responsibilities as Senior Director of T&D Smart Grid & Automation?

A. As Senior Director of T&D Smart Grid & Automation, I direct several teams that support the Company: PPL Electric's Distribution Control Center ("DCC") Engineering team that supports the Company's ADMS system and its advanced applications; the Company's Transmission and Distribution ("T&D") Supervisory Control and Data Acquisition ("SCADA") team that provides engineering and programming of remote devices; the Company's Distribution Automation team that performs programming of pole-top device controllers; its DER Management team that supports the PPL Electric Distributed Energy Resources ("DER") Management Pilot Program; and the Company's team that sets the enterprise strategy for integrating DERs and two-way power flow into the Distribution system.

Q. What is your educational background?

A. I received a B.S. degree in Electrical Engineering from Pennsylvania State University in May 2005 and a Master's degree in Systems Engineering from Pennsylvania State University in December 2010.

Q. Please describe your professional experience.

A. I have worked at several companies since I graduated from Penn State in May of 2005, including 13 years in the energy industry and 7 years in the defense industry. Below is a list of my positions since joining the Company in 2016.

- January 2016 – November 2016 – Senior Engineer at PPL Electric – I was responsible for developing Engineering and Construction Specifications, programming, and work methods, primarily around remote-operable Distribution sectionalizing devices.
- November 2016 – December 2018 – Supervisor of Distribution Standards at PPL Electric – I led a group of engineers responsible for creating Engineering and Construction specifications for Distribution system hardware.
- December 2018 – June 2020 – Manager of Relay Test at PPL Electric – I led a group of 50 supervisors, engineers, and technicians supporting the testing, troubleshooting, and installation of relay equipment at Distribution and Transmission substations.
- June 2020 – April 2021 – Manager of Distribution Control Center at PPL Electric – I led a group of 50 supervisors, operators, and dispatchers supporting the 24/7 real-time operation of the electric distribution grid, which included storms and emergent work.

- April 2021 – May 2022 – Director of Distribution Operations at PPL Electric – I led a group of about 120 operators, linemen, and engineers. This group was responsible for overseeing the 24/7 operation of the electric distribution grid, which included storms and emergent work. My duties also included work towards the Company's DER Management Pilot and emerging strategies and technologies.
- May 2022 – September 2024 – Director of IT Product at PPL Services Corporation – I oversaw an IT product portfolio including Asset Management, Electric Control, and Gas Management applications. My duties included successful implementation and integration of these technologies at Rhode Island Energy as part of PPL Corp.'s acquisition from National Grid.
- September 2024 – present – Senior Director of T&D Smart Grid & Automation – My job responsibilities are listed above.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to describe the Company's proposed Electric Vehicle ("EV") Time-of-Use ("TOU") Charging Rebate Program, which is designed to help ensure that the distribution system is prepared to handle the challenges presented by EV charging.

Q. Are you sponsoring any exhibits in this proceeding?

A. No.

II. ELECTRIC VEHICLES

Q. Please describe the challenge that EVs pose to the distribution system.

A. As EV adoption accelerates across Pennsylvania, it presents both opportunities and significant challenges for PPL Electric, particularly in how the Company plans, operates, and invests in its distribution system. While EVs represent a critical step toward decarbonizing the transportation sector, their widespread adoption introduces new dynamics that were not contemplated in traditional electric load growth models or infrastructure design standards.

At present, the most significant operational impacts can stem from load variability, unpredictability, and congestion risks at the distribution level. EV charging behavior (particularly residential Level 2 charging during evening hours) tends to increase net load during PPL Electric's peak demand periods. This can create operational stress on local feeders and substations such as increased transformer loading, especially in high-adoption neighborhoods. While this evolution requires careful planning and investment, it also presents the potential to improve grid flexibility, reliability, and overall system efficiency.

Q. What is the Company doing to meet future challenges to the grid presented by vehicle electrification?

A. To help mitigate future impacts of EV charging on the PPL Electric distribution grid, particularly during peak periods, the Company is proposing a Residential EV TOU Charging Rebate program.

Q. Please provide a description of the Company's proposed Residential EV TOU Charging Rebate program.

A. The program's parameters are set forth in the proposed retail tariff submitted in this proceeding (see PPL Electric Exhibit GEO-1). As described therein, program participants will agree to charge their EVs using Level 2 chargers during the off-peak hours established for this program (i.e., 4:00 PM to 7:00 PM in the summer months of June, July, and August, and two daily periods in the winter months of December, January, and February - 6:00 AM to 9:00 AM and again 6:00 PM to 8:00 PM). Customers will register for this program through the Company's website, and their charging sessions will be verified via approved telematics, Level 2 EV chargers, or both. Scheduling the charging sessions will be the customer's responsibility.

If the customer conducts at least 80% of their charging during the off-peak hours in the applicable billing period, the Company will provide a flat rebate of $10 to the customer in each billing period for which the criteria are met. All residential customers who own or purchase an EV will be eligible for the program, provided their EV charging is conducted with equipment that is on a list of compatible equipment certified by the Company. The program will be open to all residential EV owners for participation, but the participation will be capped at 2,000 customers. Additionally, PPL Electric may conduct targeted marketing to customers in areas where EV growth is forecasted to start causing system constraints in the next 5-7 years.

Q. Why is the Company proposing this program?

A. First, the program could help mitigate the operational challenges that EV charging poses to the distribution system and potentially defer distribution system improvement projects, the costs of which are passed onto customers. Although residential EV interconnections typically do not require system upgrade costs to be borne by the customer; if installed in large enough quantities, residential EV charging could cause constraints on the distribution system that are traditionally alleviated by new capacity projects on feeders and substations – thereby increasing the cost to all customers. However, given the nature of EV charging, the grid likely only needs to serve this type of load for short periods. As such, if PPL Electric planners were confident that EV charging would occur substantially off-peak, capacity projects could potentially be deferred.

Second, the program could help determine the capability to shift load caused by EV charging, enable PPL Electric to gather data on the magnitude of load that can be shifted through customer incentives, and help develop future EV charging programs or adjustments to this program as tools that can improve grid reliability.

Q. Describe the data collection and verification that the Company plans in connection with this proposed program.

A. Charging session validation and data collection will be conducted via approved telematics or Electric Vehicle Supply Equipment ("EVSE") platforms. Customers will authorize data collected to be used by the Company for internal planning and operational purposes. Data collected as part of this program will be used by PPL Electric's

engineering teams to improve planning practices, update standards and improve operational efficiency. Some examples of the ways in which this data may be used include: (1) determining EV charging load shapes, peak kW loading, and kWh capacity; (2) identifying or confirming the location of EV charging and associated growth rates for more accurate load forecasting and project planning; and (3) forecasting day-ahead load and associated distribution system constraints.

Q. Are you aware of similar programs that other electric utilities have implemented?

A. Yes. PPL Electric's proposed Residential EV TOU Charging Rebate program is informed by other utilities' residential EV charging programs that both relieve grid strain and provide consumer incentives. For instance, Duquesne Light Company's Smart Charging Rewards program offers up to $80/year to customers by pausing their EV charging during up to 15 summer events.

Q. Does this conclude your direct testimony?

A. Yes, it does.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025-3057164

PPL Electric Utilities Corporation

Statement No. 21

Direct Testimony of Jason Hunt

Topics: **Economic Development**

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Jason Hunt, and my business address is 320 Market Street, 4th Floor, Strawberry Square, Harrisburg, 17101.

Q. By whom are you employed and in what capacity?

A. I am employed as Manager of Business and Economic Development by PPL Services Corporation ("PPL Services"), a subsidiary of PPL Corporation.

Q. What are your responsibilities as Manager of Business and Economic Development?

A. As the Manager of Business and Economic Development, I work to help companies locate and expand their businesses within PPL Electric Utilities Corporation's ("PPL Electric" or the "Company") service territory. In this role, I work in partnership with consultants, economic developers, and state government stakeholders.

Q. What is your educational background?

A. I have a Bachelor of Arts degree in Political Science and History from Duquesne University. I also have a master's degree in international relations from the University of Chicago.

Q. Please describe your professional experience.

A. Prior to joining PPL Electric in 2024, I served as the director of international business attraction for the Pennsylvania Department of Community and Economic Development's Office of International Business Development ("OIBD"). On the OIBD team, I oversaw authorized investment representatives abroad and a team of project managers in Harrisburg. This group worked with partners across Pennsylvania to help international companies to choose Pennsylvania for their U.S. business expansions. Before joining OIBD in 2016, I worked in Washington, D.C. for four years, where I focused on international economic development, peacebuilding, and foreign policy in roles with the United States government and internationally focused nonprofits.

Q. What is the purpose of your testimony?

A. I will testify about the Company's economic development proposal, which will help support communities and spur economic development in PPL Electric's service territory.

Q. Are you sponsoring any exhibits in this proceeding?

A. No.

II. ECONOMIC DEVELOPMENT

Q. What is the Company's economic development proposal in this proceeding?

A. PPL Electric proposes to implement its Opportunity Pennsylvania Program, which is a proactive initiative to support communities in securing funding through the

Pennsylvania SITES ("PA SITES") initiative and other state, federal, or regional programs. In total, the economic development proposal would have an annual budget of $400,000.

Q. Why is economic development important to the Company's customers?

A. Economic vitality in the communities served by PPL Electric is critical, and I believe that the Pennsylvania Public Utility Commission has an important role to play in furthering economic development. Economic development ensures better-paying jobs for families, increased tax revenues for local governments, and an overall higher quality of life for residents. By supporting business attraction, retention, and expansion through reliable infrastructure and strategic partnerships, PPL Electric can help foster sustainable growth and prosperity across its service territory.

Utility investment in economic development directly benefits customers by creating stronger, more resilient communities and a more efficient, cost-effective electric system. When utilities extend electric infrastructure to support new business sites, those upgrades—whether to transmission lines, substations, or distribution networks—often do not just serve the new customer. They can improve reliability and resiliency for the entire system. Every investment in the grid has the potential to reduce outages, enhance service quality, and prepare the system for future growth.

Also, as new companies connect to the grid, they increase overall system utilization, which helps spread fixed costs across a broader customer base. This helps put downward pressure on rates and improve affordability for all customers. In other words, a more efficiently used grid is a more cost-effective one.

The benefits extend well beyond the technical upgrades. The proposed Opportunity Pennsylvania Program is intended to support the Company's communities by catalyzing site development across both developed and underserved regions. It is designed to attract new industries that generate jobs and stimulate local economies. Construction activity alone creates demand for materials, contractors, and services. Once operational, these businesses require everything from logistics and legal support to restaurants and retail—creating opportunities for small businesses and entrepreneurs to grow.

For residential customers, especially in areas that previously lacked major employers, this means access to new career paths, workforce training, and higher household incomes. Property values often rise in areas experiencing infrastructure investment and economic growth, giving homeowners increased equity and communities a stronger tax base. That, in turn, supports better schools, emergency services, and public amenities.

In short, utility investment in economic development is not just about powering new businesses, it is about empowering opportunity. It strengthens the grid, supports affordability, and helps communities thrive.

Q. What are some of the factors impacting economic development and site selection today?

A. Site selectors, or site selection consultants, are professionals that help companies find new business locations and they are widely recognized as influencers and experts in the economic development field. In a recent study done by the Site Selectors Guild, a trade

association for site selectors, utilities/infrastructure was the number one factor impacting the manufacturing site selection last year. Large manufacturing projects and data centers became more prevalent within the last year and a half, and these projects are the primary drivers of the site selectors feedback. Workforce/labor availability was the second most noted factor, followed by the availability of development-ready sites.

Q. What is the Company proposing to help address some of these concerns?

A. PPL Electric commissioned a third-party analysis in 2024 to better understand how these national dynamics were playing out in its service territory. This study identified opportunities and challenges from an economic development and site selection perspective. One key finding was that PPL Electric's service territory had few high-quality industrial sites being marketed. Additionally, the territory was underrepresented in the first round of PA SITES awards from the Pennsylvania Department of Community and Economic Development, largely due to uncompetitive or absent applications. Recognizing this gap, PPL Electric aims to encourage economic development by helping communities prepare stronger applications and improve site readiness, thereby creating more sites for impactful investment projects and ultimately driving long-term growth and regional vitality.

Q. What is the Opportunity Pennsylvania Program?

A. The Opportunity Pennsylvania Program is a proactive economic development initiative that offers two key forms of support to communities within PPL Electric's service

territory: (1) reimbursement funding for completed site development work; and (2) technical assistance to help communities secure additional state and federal funding.

Under this program, PPL Electric would provide direct reimbursement funding to local governments and nonprofit economic development organizations to support site studies, due diligence, and infrastructure improvements. These grants would not only prepare strategic sites for future development but also serve as private sector match funding—an important criterion for PA SITES competitiveness.[1]

In addition, the program would fund expert consultants or grant writers to help communities—especially those with limited capacity—to prepare and submit competitive PA SITES applications. This technical support would enable communities to improve existing sites or gain control of strategic land, increasing their readiness for future development. As PA SITES funding is time-limited, this technical assistance ensures communities can act quickly to access available dollars. If successful, this support could be extended beyond PA SITES lifespan and adapted to help communities pursue other state or federal funding opportunities.

The Opportunity Pennsylvania Program is modeled after a successful program implemented by the Company's regulated affiliate utilities, Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU"), in Kentucky. The affiliate utilities have been recognized as top utilities in economic development by *Site Selection Magazine* in 12 of the last 15 years. While PPL Electric's operations are structured differently here, the Company plans to build on its affiliates' experience and implement many of the best practices they have developed to position PPL Electric's

[1] https://dced.pa.gov/programs/pennsylvania-strategic-investments-to-enhance-sites-program-pa-sites/

communities for growth and investment. In particular, the program in Kentucky is a reimbursement grant program. For the Opportunity Pennsylvania program, however, the Company proposes adding a technical assistance component, aimed at directly addressing some of the weaknesses identified by the above-referenced third-party analysis. Specifically, communities in PPL Electric's service territory with land available are not taking full advantage of the PA SITES funding that is only available to them for a limited time. Many communities in PPL Electric's service territory do not have the level of site preparation experience needed to prepare successful applications. The Company believes that the proposed program with the provided technical assistance will help fill this gap and encourage the communities served by PPL Electric to utilize resources that are available to them.

Q. What will be the focus of the Opportunity Pennsylvania Program?

A. The Opportunity Pennsylvania Program is designed to help communities take a proactive approach to attracting job creation and private investment through strategic site development. The goal is to improve "speed to market," helping communities become more competitive for high-impact investments and advancement of economic development.

Through a combination of technical assistance and reimbursement grants, the program encourages communities to complete key pre-development activities—such as geotechnical studies, environmental reviews, zoning and permitting, land clearing, and grading. These foundational steps are often underfunded but are essential to making sites competitive and ready for investment. Infrastructure remains a key consideration

in site selection and this initiative would support initial due diligence for communities in preparing a site for development, including assessments of electric infrastructure requirements. As part of this critical groundwork, the Company will provide insights on electrical infrastructure upgrades or extensions required to serve high-impact projects on a subject site.

The program also is intentionally flexible to meet the diverse needs of different sites. PPL Electric proposes to provide a mix of technical assistance to help communities prepare strong applications for PA Sites funding and other state or federal programs, and/or reimbursement grants to cover the cost of completed site readiness work.

This dual approach ensures that communities are not only rewarded for taking initiative but also equipped to leverage additional public funding sources. By reimbursing eligible work after it is completed, the program ensures that funding supports real progress and maximizes impact.

Further, by making sites within the Company's service territory truly investment-ready, the program will help catalyze job creation and attract new and expanding businesses, which has benefits for infrastructure investments in the Company's service territory and overall economic expansion.

Q. Are there other reasons why the costs associated with this economic development proposal are appropriate for recovery in the Company's distribution rates?

A. PPL Electric maintains that the costs associated with economic development are prudently incurred to provide service and contribute to the economic well-being of the community. Additionally, by attracting and retaining large customers, economic

development spending can help the Company avoid losing load and the associated revenue. This reduces the risk of fixed costs being spread over a smaller customer base. By reducing that risk, it can lead to lower rates for existing customers than would otherwise be implemented without those additional customers.

Q. How will the Company administer the Opportunity Pennsylvania Program?

A. PPL Electric will administer the Opportunity Pennsylvania Program directly, utilizing a set of guidelines and a governance structure based on its affiliates' Opportunity Kentucky Program. To ensure that PPL Electric's communities can benefit fully from the PA SITES program, the Company plans to go beyond the reimbursement grant model in Kentucky and utilize third-party vendors to provide the technical assistance that some of the communities may require to conduct due diligence and submit competitive grant applications for PA SITES funding. No vendors have been selected yet, but costs of such resources would be included within the proposed $400,000 total program budget.

Q. What experience does the Company have in administering economic development programs?

A. As noted previously, the Opportunity Pennsylvania Program is modeled after a successful program implemented by the Company's Kentucky affiliates, LG&E and KU. Since the inception of the Opportunity Kentucky Program in 2020, those companies have invested $2.2 million in communities across their service territories, resulting in 893 new jobs and $347 million of capital investment. The Opportunity

Kentucky Program investments have helped communities served by LG&E and KU draw in an additional $62 million in state funding, multiplying the impact of its investments.

The proposed Opportunity Pennsylvania Program draws upon that experience and adapts this program to a Pennsylvania context. For the reimbursement grant portion of the Opportunity Pennsylvania Program, the Company will utilize similar program guidelines, processes, and governance. The technical assistance portion of the Opportunity Pennsylvania program is uniquely adapted to the needs, challenges, and opportunities before the communities that PPL Electric serves in Pennsylvania. While the Opportunity Pennsylvania Program will be new, it will be rooted in the successful experience in Kentucky.

Q. Does this conclude your direct testimony?

A. Yes, it does.

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2025-3057164

PPL Electric Utilities Corporation

Statement No. 22

Direct Testimony of Sharon Leskowsky

Topics: Filing Requirements and Exhibits

Dated: September 30, 2025

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Sharon Leskowsky, and my business address is 645 Hamilton Street, Suite 9, Allentown, PA 18101.

Q. By whom are you employed and in what capacity?

A. I am employed as Assistant Controller by PPL Corporation, which is the parent company of PPL Electric Utilities Corporation ("PPL Electric" or the "Company").

Q. What are your responsibilities as Assistant Controller?

A. My responsibilities include financial accounting and reporting for PPL Corporation's utility operating companies including PPL Electric. This includes oversight of Regulatory, Revenue, Asset and Gas Accounting and FERC and Pennsylvania Public Utility Commission ("PUC" or "Commission") reporting.

Q. What is your educational background?

A. I have a Bachelor of Science degree in Accounting from Pennsylvania State University.

Q. Please describe your professional experience.

A. A complete statement of my professional experience is attached to my direct testimony as Appendix A.

Q. Have you previously testified as a witness in other Commission proceedings or any other jurisdiction's proceedings?

A. No.

Q. What is the purpose of your testimony?

A. I will sponsor or co-sponsor certain of the Company's filing requirements and exhibits in this case, particularly those concerning PPL Electric's accounting and financial records and the Company's pro forma adjustments for interest on certain amounts, such as customer deposits.

II. FILING REQUIREMENTS AND EXHIBITS

Q. Could you please provide a list of the filing requirements and exhibits that you are sponsoring?

A. Yes, I am sponsoring or co-sponsoring the following filing requirements and exhibits submitted by the Company in this proceeding:

- Schedule II-B-3;
- Schedules II-D-1, 3 through 5, 7, and 9 through 13;
- Schedule III-A-2;
- Schedules III-F-1 and 4;
- Schedules V-A-3 and 4;
- Schedules VI-A through D;
- Exhibit Historic 1, Schedules B-1 through 4;
- Exhibit Historic 1, Schedules C-2, 3, and 5;
- Exhibit Historic 1, Schedules D-4, 5, 9, 10, 12, and 15;
- Exhibit Future 1, Schedules C-2 and 3;
- Exhibit Future 1, Schedules D-9, 10, and 15; and
- Exhibit Fully Projected Future 1, Schedules C-2 and 3, and D-9, 10, and 15.

Q. Were the filing requirements and exhibits that you are sponsoring or co-sponsoring prepared by your or under your supervision?

A. Yes.

Q. Is the information set forth in those filing requirements and exhibits true and correct to the best of your information, knowledge, and belief?

A. Yes.

Q. Could you please explain the adjustments to operating revenues shown in Exhibit Historic 1, Schedules D-3 and 4?

A. Schedule D-3 reflects the annualizations of sales and base rate revenues for changes in customer usage and growth which is discussed in more detail in PPL Electric St. No. 4, the direct testimony of Charles Schram. Schedule D-4 reflects the adjustment made to normalize distribution operating revenue for the test period by eliminating unbilled revenue.

Q. What adjustments are being made to Wages and Benefits in Exhibit Historic 1, Schedule D-5?

A. The number of PPL Electric employees can vary throughout any given year. This, in turn, impacts the wages and benefits incurred or projected for that period. Schedule D-5 annualizes transmission and distribution wages, payroll taxes and benefits based on the number of transmission and distribution-related individuals to be employed at the

end of each test year, and the corresponding average monthly T&D-related wages to expense per employee.

Q. Would you please describe the adjustments to Deferred Storm Expenses shown in Schedules D-9 in Exhibits Historic 1, Future 1, and Fully Projected Future 1?

A. On April 3, 2014, the PUC approved PPL Electric's Storm Damage Expense Rider ("SDER") to be used for recovery of storm damage expenses exceeding the $14.7 million in base rates at Docket No. R-2012-2290597. The Order caps the amount to be recovered in base rates at 3% of the Company's total intrastate operating revenues to be billed to customers, permits the Company to establish a regulatory asset for eligible storm costs in excess of the 3% cap, and allows the Company to request recovery of those excess expenses in its next base rate case. The Company established a regulatory asset of $11,336,169 for the portion of the costs that would be recoverable from customers in its next base rate case. PPL Electric is proposing to amortize these costs over 5 years. PPL Electric witness Katelyn Arnold provides more details in her direct testimony (PPL Electric St. No. 13).

Q. Could you please explain the adjustment for Infrastructure Investment and Jobs Act ("IIJA") deferral shown in Schedules D-10 in Exhibit Historic 1, Exhibit Future 1, and Exhibit Fully Projected Future 1?

A. Pursuant to the PUC's Order issued on July 13, 2023, at Docket No. P-2022-3032929, PPL Electric submitted notice that the Company established a regulatory asset for certain IIJA-related incremental expenditures for costs incurred in order to prepare,

apply, administer, and otherwise execute on IIJA funding opportunities. PPL Electric is making a claim for approximately $633 thousand, amortized over three years for a claim of $211 thousand.

Q. What adjustments are being made to Interest Expense on Customer Deposits in Exhibit Historic 1, Schedule D-12?

A. The adjustment on Schedule D-12 shows the adjustment for interest related to customer deposits for projects. The Commission, in its Final Order at Docket No. R-80031114, determined that it was appropriate to include the interest expense on customer deposits in PPL Electric's operation and maintenance expense when the deposits are used as a reduction to rate base. The interest rate applied is in accordance with the Company's Tariff – Electric Pa. P.U.C. No. 201 as well as the proposed No. 202.

Q. Please explain what is presented in Schedules D-14 of Exhibit Historic 1, Exhibit Future 1, and Exhibit Fully Projected Future 1 regarding the Company's proposed capitalization of certain Information Technology ("IT") expenditures.

A. As explained further in the direct testimony of Christopher Garrett (PPL Electric St. No. 3), the Company is requesting capital treatment of certain IT costs. Schedule D-14 shows the adjustments to operating expenses and depreciation expense should capital treatment be approved and the regulatory asset is reclassified to property, plant, and equipment in the fully projected future test year.

Q. Could you please explain the adjustment to Depreciation Expense shown in Schedules D-15 in Exhibit Historic 1, Exhibit Future 1, and Exhibit Fully Projected Future 1?

A. As part of PPL Electric's distribution base rate filing, it prepares and provides a depreciation study and requests approval of new depreciation rates. Schedule D-15 provides an adjustment to depreciation expense to account for the change in depreciation rates.

Q. Does this conclude your direct testimony?

A. Yes, it does.

Accrued Taxes
12 Months ended June 30, 2025
(Thousands of Dollars)

Line No.	Description	Amount	12-Month Accrued Factor (a)	Accrued Taxes
1	Federal income tax (D-1, line 6, col. 5)	$76,262	-11.62%	($8,864)
2	PA income tax (D-1, line 7, col. 5)	23,240	-9.54%	(2,217)
3	PA gross receipts tax (D-16, page 3)	55,294	27.96%	15,460
4	PA capital stock tax (D-16, Page 2)	0	0.00%	0
5	PA public utility reality tax (D-16, page 4)	3,110	7.13%	222
6	Total accrued taxes			$4,601

(a) The 12-month average factor represents, in the case of Federal and State income tax and capital stock tax, the portion of the tax liability which is available to the Company for the payment of other costs. This situation exists because revenue is available from customers prior to payment dates of the taxes. The factors for the other Pennsylvania taxes represent the portions of those tax liabilities which must be provided by the Company due to payment of the taxes before the revenue is available from customers. Exhibit Historic 1, Schedule C-4, pages 7 through 12 reflect the computation of such factors.

[b)] This adjustment is for annualization.

PPL ELECTRIC UTILITIES CORPORATION

Adjustment to Operating Revenues for Unbilled Revenue
Year Ended June 30, 2025
(Thousands of Dollars)

This adjustment was made to normalize distribution operating revenue for the test period by eliminating unbilled revenue shown on Schedule D-3, page 1.

Line No.	Description	Amount
1	Unbilled revenue- distribution	$ 1,432
2	Net increase in distribution operating revenue	$ 1,432

PPL ELECTRIC UTILITIES CORPORATION

Adjustment to Wages and Benefits
12 Months Ended June 30, 2025
(Thousands of Dollars, except wages per employee)

This adjustment was made to reflect the average number of transmission and distribution-related employees and the level of wages and benefits in effect at the end of the period.

Line No.	Description		Amount
1	Average monthly T & D-related wages, benefits, and payroll tax to expense per employee	$	5,055
2	T & D-related personnel employed at the end of the period		1,407
3	Annualized T & D-related total wages, benefits, and payroll tax to expense (line 1 x line 2 x 12 months)		85,350
4	Less: Actual T & D-related wages, benefits, and payroll tax to expense for the twelve months ended June 30, 2025		82,243
5	Increase in wages to expense		911
6	Increase in benefits expense		696
7	Increase in payroll taxes		1,500
8	Total increase in T&D-related wages, benefits, and payroll tax expenses	$	3,107

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Rate Case Expense
12 Months Ended June 30, 2025
(Thousands of Dollars)

Rate case expenditures are charged to expense when incurred. The Company's claim for 2025/2026 distribution rate case expense is based on a normalized amount as shown below.

Line No.	Description	Amount
1	2025 distribution rate case expense	$ 2,222
2	Normalized amount (line 1 / 3 years)	$ 741
3	2025 distribution rate case expense per budget	$ 194
4	Net increase/(decrease) in distribution operating expense	$ 547

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Economic Development Proposal
12 Months Ended June 30, 2025
(Thousands of Dollars)

This adjustment was made to reflect the expenses associated with the Company's economic development proposal - Opportunity Pennsylvania Program. See PPL Electric Direct Testimony Statement No. 21.

Line No.	Description	Amount
1	Economic Development Proposal Expense	$ 400
2	HTY Economic Development Proposal expense per budget	$ -
3	Net increase in distribution operating expense	$ 400

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Competitive Enhancement Rider Roll-in to Base Rates
12 Months Ended June 30, 2025
(Thousands of Dollars)

This adjustment is made to roll the Competitive Enhancement Rider (CER) costs into base rates. Costs eligible for the CER include the eligible customer list which is updated every 5 years in accordance with Commission Order dated March 13, 2025 at Docket No. M-2010-2183412.

Line No.	Description	Amount
1	HTY Competitive Enhancement Charge Expense	$ 500
2	Normalized amount (line 1 / 5 years)	$ 100
3	Less: Amount per books	$128
4	Net increase in distribution operating expense	$ (28)

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Deferred Storm Outage Costs
12 Months Ended June 30, 2025
(Thousands of Dollars)

On April 3, 2014, the PUC approved PPL Electric's Storm Damage Expense Rider (SDER) to be used for recovery of storm damage expenses exceeding the $14.7 million in base rates, at Docket No. R-2012-2290597. The Order caps the amount to be recovered through SDER at 3% of the Company's total intrastate operating revenues billed to customers, permits the Company to establish a regulatory asset for eligible storm costs in excess of the 3% cap, allows the Company to request recovery of those excess expenses in its next base rate case. In accordance with Generally Accepted Accounting Principles (GAAP), the Company established a regulatory asset of $11,336,169 for the portion of the costs that would be recoverable from customers in its next base rate case.

Line No.	Description		Amount
1	Total net deferral amount for storm outage costs	$	11,336
2	Normalized amount (line 1 / 3 years)	$	3,779
3	Less: Amount per books	$	-
4	Net increase in distribution operating expense	$	3,779

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Deferred IIJA-Related Incremental Expenditures
12 Months Ended June 30, 2025
(Thousands of Dollars)

Pursuant to the Pennsylvania Public Utility Commission's Order issued on July 13, 2023 at Docket No. P-2022-3032929, PPL Electric submitted notice that the Company established a regulatory asset for certain Infrastructure Investment and Jobs Act ("IIJA")-related incremental expenditures for costs incurred in order to prepare, apply, administer, and otherwise execute on IIJA funding opportunities.

Line No.	Description	Amount
1	Total net deferral amount for IIJA-Related Incremental Expenditures	$ 633
2	Normalized Amount (line 1 / 3 years)	211
3	Less: Amount per books	$ -
4	Net increase in distribution operating expense	$ 211

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Universal Service Rider (USR) Salaries
12 Months Ended June 30, 2025
(Thousands of Dollars)

This adjustment was made to reflect the removal of USR salaries from distribution base rates. USR salaries are proposed to be recovered through the USR. See PPL Electric's Direct Testimony Statement No. 18 - Lisa Norden

Line No.	Description	Amount
1	HTY USR salaries per budget	$ 1,400
4	Net decrease in distribution operating expense	$ (1,400)

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Interest Expense on Customer Security Deposits
Year Ended June 30, 2025
(Thousands of Dollars)

The Commission, in its Final Order at Docket No. R-80031114, determined that it was appropriate to include the interest expense on customer deposits in PPL Electric's operation and maintenance expense when the deposits are used as a reduction to rate base. The interest on customer security deposits is computed at an interest rate calculated in accordance with 66 Pa. C.S. § 1404 (c) (6) and the Company's Tariff - Electric Pa. P.U.C. No. 201.

Line No.	Description	Residential Amount	Non-Residential Amount	Total
1	Customer security deposits	$ 1,977	$ 4,576	$ 6,553
2	Interest rate	7.00%	4.19%	
3	Total increase in transmission and distribution expense (line 1 x line 2)	$ 138	$ 192	$ 330

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Company Use Generation Supply Purchases
For the Period Ending June 30, 2025
(Thousands of Dollars)

This adjustment was made to reflect the distribution operating expense associated with PPL Electric's purchase of generation supply for the facilities that it owns, i.e., Company Use.

Line No.	Description		Amount
1	Kilowatt-hour usage for the period July 1, 2024 through June 30, 2025	51,580,830	
2	Average June 2025 generation supply purchase price per kilowatt-hour	$ 0.09114	
3	Total estimated generation supply expense July 1, 2024 through June 30, 2025 (line 1 x line 2)		$ 4,701
4	Less: Actual amount per books		4,362
5	Net generation supply expense (line 3 - line 4)		$ 339
6	Portion assigned to PPL Electric		91.1%
7	Net increase in distribution operating expense (line 5 x line 6)		$ 309

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Certain IT Expenditures Requested to be treated as Capital
12 Months Ended June 30, 2025
(Thousands of Dollars)

Pursuant to the prior practice and precedent, PPL Electric is requesting capital treatment of certain IT costs. This reflects the adjustments to Operating Expenses and Depreciation Expense should capital treatment be approved and should the regulatory asset be reclassified to capital/plant-in-service in the fully projected future test year.

Line No.	Description	Amount
1	Proforma to Adjust for IT Capital Request: Reclassification of Regulatory Asset Amortization in O&M Budget to Depreciation Expense - Reduction of O&M Expense	0
2	Less: Amount per budget	$ -
3	Net decrease in distribution operating expense	$ -
4	Proforma to Adjust for IT Capital Request: Reclassification of Regulatory Asset Amortization in O&M Budget to Depreciation Expense - Increase to Depreciation Expense	$ -
5	Less: Amount per budget	$ -
6	Net increase in depreciation expense	$ -

PPL ELECTRIC UTILITIES CORPORATION

Adjustment to Annual Depreciation Expense
Year Ended June 30, 2025
(Thousands of Dollars)

This adjustment was made to Annual Depreciation Expense in the future and fully projected future test years. This page is included for consistency between Exhibits Historic 1, Future 1 and Fully Projected Future 1.

Line No.	Depreciation - Electric Plant In Service (a)	Amount
	No adjustment to depreciation expense

Summary of Rate Base & Rate of Return

Year Ended June 30, 2026

This book contains a series of schedules (see Table of Contents) which are grouped as follows:

A - Statement of Reasons

B - Financial Statements, Cost of Capital and Capital Structure

C - Rate Base

D - Operating Income and Adjustments

PPL ELECTRIC UTILITIES CORPORATION

Table of Contents

Section A- Reasons for Proposed Increase

A-1 Statement of Reasons

Section B - Book Statements

B-1 Balance Sheet at June 30, 2026

B-2 Electric Service - Statement of Net Utility Operating Income - Year Ended June 30, 2026

B-3 Electric Service - Operating Revenues - Year Ended June 30, 2026

B-4 Electric Service - Operation and Maintenance Expenses -Year Ended June 30, 2026

B-5 Electric Service - Detail of Taxes - Year Ended June 30, 2026

B-6 Historical (Embedded) Cost of Long-Term Debt Capital at June 30, 2026

B-7 Capital Structures - Years Ended June 30 2021-2026

B-8 Rate of Return at June 30, 2026

Section C - Rate Base

C-1 Rate Base and Rates of Return

C-2 Electric Plant in Service

C-3 Electric Plant Held for Future Use

C-4 Working Capital

C-5 Plant Materials and Operating Supplies

C-6 Accumulated Deferred Taxes on Income

PPL ELECTRIC UTILITIES CORPORATION

Table of Contents

Section D - Operating Income

D-1 Operating Income Pro Forma at Present Rates and Proposed Rates

D-2 Adjustments to Income

D-3 Adjustments to Operating Revenue

D-4 Adjustment to Operating Revenues for Unbilled Revenue

D-5 Adjustment to Wages and Benefits

D-6 Adjustment for Rate Case Expense

D-7 Adjustment for Economic Development Proposal

D-8 Adjustment for Competitive Enhancement Charge

D-9 Adjustment for Excess Storm Expenses

D-10 Adjustment for IIJA Deferral

D-11 Adjustment for USR Salaries

D-12 Adjustments to Interest Expense on Customer Deposits

D-13 Adjustment for Company Use Generation Supply Purchases

D-14 Capital Treatment of Certain IT Expenditures

D-15 Adjustment to Depreciation Expense

D-16 Adjustments to Taxes Other Than Income

D-17 Adjustment to Federal and State Income Taxes

D-18 Adjustment to Deferred Income Taxes

D-19 Adjustment to Investment Tax Credit

PPL Electric Utilities Corporation

Working Capital Required for Operation and Maintenance Expenses
As of June 30, 2026
(Thousands of Dollars)

The Company bills its customers every month. On this basis, there is a considerable span of days between the time electricity is furnished to a customer and the time the customer pays for such electricity.

In many instances, the Company must pay its bills for payroll and other O&M expenses prior to the time it is able to collect the amount due for the service which requires the incurrance of such expenses. Thus, the Company has examined its records to determine, as to the major categories of expense, the average span of days which exists between the time an expense is incurred and the time it must be paid. Schedule C-4, page 2, of Exhibit Historic 1 sets forth the individual components which result in the days lag between payment of expenses and receipt of the related revenues used in the determination of the working capital required for the pro forma O&M expense for the test year ending June 30, 2025.

Line No.	Description	Amount
1	Net pro forma O&M expense (a)	400,055
2	O&M expense per day (line 1 divided by 365 days)	1,096
3	Average lag in days between payment of O&M expenses and receipt of revenue (b)	5.2
4	Working capital requirement (line 2 x line 3)	$ 5,699

(a) Total pro forma operation and maintenance expense (D-1 col. 5 lines 2-4) $ 826,132

Less: Non-cash items

Uncollectible accounts expense per books less property damage	8,234
Deferred Storm Outage Costs	3,779
Deferred IIJA Costs	211
Depreciation (D-1 col. 5 line 3)	413,853
Net pro forma O&M expense	$ 400,055

Accrued Taxes
Year Ended June 30, 2026
(Thousands of Dollars)

Line No.	Description	Amount	12-Month Accrued Factor (a)	Accrued Taxes
1	Federal income tax (D-1, line 6, col. 5)	69,693	-11.62%	($8,101)
2	PA income tax (D-1, line 7, col. 5)	19,236	-9.54%	(1,835)
3	PA gross receipts tax (D-16, page 3)	55,304	27.96%	15,463
4	PA capital stock tax (D-16, page 2)	0	0.00%	0
5	PA public utility reality tax (D-16, page 4)	3,110	7.13%	222
6	Total accrued taxes			$5,749

(a) The 12-month average factor represents, in the case of Federal and State income tax and capital stock tax, the portion of the tax liability which is available to the Company for the payment of other costs. This situation exists because revenue is available from customers prior to payment dates of the tax. The factors for the other Pennsylvania taxes represent the portions of those tax liabilities which must be provided by the Company due to payment of the taxes before the revenue is available from customers. Exhibit Historic 1, Schedule C-4, pages 7 through 12 reflect the computation of such factors.

PPL ELECTRIC UTILITIES CORPORATION

Adjustment to Operating Revenues for Unbilled Revenue
Year Ended June 30, 2026
(Thousands of Dollars)

This adjustment was made to normalize distribution operating revenue for the test period by eliminating unbilled revenue shown on Schedule D-3, page 1.

Line No.	Description	Amount
1	Unbilled revenue- distribution	$ (159)
2	Net decrease in distribution operating revenue	$ (159)

PPL ELECTRIC UTILITIES CORPORATION

Adjustment to Wages and Benefits
Year Ended June 30, 2026
(Thousands of Dollars, except wages per employee)

This adjustment was made to reflect the average number of transmission and distribution-related employees and the level of wages and benefits in effect at the end of the year.

Line No.	Description	Amount
1	Average monthly T & D-related wages to expense per employee	$ 5,143
2	T & D-related personnel employed at the end of the year	1,465
3	Annualized T & D-related total wages to expense(line 1 x line 2 x 12 months)	90,408
4	Less: Actual T & D-related wages to expense for the year ended June 30, 2026	90,840
5	Decrease in wages to expense (line 3 - line 4)	(432)
6	Decrease in benefits expense (line 5 x 11.8%)	(51)
7	Decrease in payroll taxes (line 5 x 8.5%)	(37)
8	Total decrease in T&D-related wages, taxes and benefits expenses (line 5 + line 6 + line 7)	$ (520)

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Rate Case Expense
12 Months Ended June 30, 2026
(Thousands of Dollars)

Rate case expenditures are charged to expense when incurred. The Company's claim for 2025/2026 distribution rate case expense is based on a normalized amount as shown below.

Line No.	Description	Amount
1	2025 distribution rate case expense	$ 2,222
2	Normalized amount (line 1 / 3 years)	$ 741
3	2025 distribution rate case expense per budget	$ 2,124
4	Net increase/(decrease) in distribution operating expense	$ (1,383)

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Economic Development Proposal
12 Months Ended June 30, 2026
(Thousands of Dollars)

This adjustment was made to reflect the expenses associated with the Company's economic development proposal - Opportunity Pennsylvania Program. See PPL Electric Direct Testimony Statement No. 21.

Line No.	Description	Amount
1	Economic Development Proposal Expense	$ 400
2	FTY Economic Development Proposal expense per budget:	$ -
3	Net increase in distribution operating expense	$ 400

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Competitive Enhancement Rider Roll-in to Base Rates
12 Months Ended June 30, 2026
(Thousands of Dollars)

This adjustment is made to roll the Competitive Enhancement Rider (CER) costs into base rates. Costs eligible for the CER include the eligible customer list which is updated every 5 years in accordance with Commission Order dated March 13, 2025 at Docket No. M-2010-2183412.

Line No.	Description	Amount
1	FTY Competitive Enhancement Charge Expense	$ 500
2	Normalized amount (line 1 / 5 years)	$ 100
3	Less: Amount per budget	$ -
4	Net increase in distribution operating expense	$ 100

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Deferred Storm Outage Costs
12 Months Ended June 30, 2026
(Thousands of Dollars)

On April 3, 2014, the PUC approved PPL Electric's Storm Damage Expense Rider (SDER) to be used for recovery of storm damage expenses exceeding the $14.7 million in base rates, at Docket No. R-2012-2290597. The Order caps the amount to be recovered through SDER at 3% of the Company's total intrastate operating revenues billed to customers, permits the Company to establish a regulatory asset for eligible storm costs in excess of the 3% cap, allows the Company to request recovery of those excess expenses in its next base rate case. In accordance with Generally Accepted Accounting Principles (GAAP), the Company established a regulatory asset of $11,336,169 for the portion of the costs that would be recoverable from customers in its next base rate case.

Line No.	Description	Amount
1	Total net deferral amount for storm outage costs	$ 11,336
2	Normalized amount (line 1 / 3 years)	$ 3,779
3	Less: Amount per budget	$ -
4	Net increase in distribution operating expense	$ 3,779

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Deferred IIJA-Related Incremental Expenditures
12 Months Ended June 30, 2026
(Thousands of Dollars)

Pursuant to the Pennsylvania Public Utility Commission's Order issued on July 13, 2023 at Docket No. P-2022-3032929, PPL Electric submitted notice that the Company established a regulatory asset for certain Infrastructure Investment and Jobs Act ("IIJA")-related incremental expenditures for costs incurred in order to prepare, apply, administer, and otherwise execute on IIJA funding opportunities.

Line No.	Description	Amount
1	Total net deferral amount for IIJA-Related Incremental Expenditures	$ 633
2	Normalized Amount (line 1 / 3 years)	211
3	Less: Amount per budget	$ -
4	Net increase in distribution operating expense	$ 211

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Universal Service Rider (USR) Salaries
12 Months Ended June 30, 2026
(Thousands of Dollars)

This adjustment was made to reflect the removal of USR salaries from distribution base rates. USR salaries are proposed to be recovered through the USR. See PPL Electric's Direct Testimony Statement No. 18 - Lisa Norden.

Line No.	Description	Amount
1	FTY USR salaries per budget	$ 1,400
4	Net decrease in distribution operating expense	$ (1,400)

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Interest Expense on Customer Security Deposits
Year Ended June 30, 2026
(Thousands of Dollars)

The Commission, in its Final Order at Docket No. R-80031114, determined that it was appropriate to include the interest expense on customer deposits in PPL Electric's operation and maintenance expense when the deposits are used as a reduction to rate base. The interest on customer security deposits is computed at an interest rate calculated in accordance with 66 Pa. C.S. § 1404 (c) (6) and the Company's Tariff - Electric Pa. P.U.C. No. 201.

Line No.	Description		Amount
1	Residential customer security deposits	$	1,643
2	Residential interest rate		7.000%
3	Residential interest	$	115
4	Non-residential customer security deposits	$	3,788
5	Non-residential interest rate		4.19%
6	Non-residential interest	$	159
7	Total increase in transmission and distribution expense (line 3 + line 6)	$	274

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Company Use Generation Supply Purchases
For the Period Ending June 30, 2026
(Thousands of Dollars)

This adjustment was made to reflect the distribution operating expense associated with PPL Electric's purchase of generation supply for the facilities that it owns, i.e., Company Use.

Line No.	Description		Amount
1	Kilowatt-hour usage for the period July 1, 2025 - June 30, 2026	68,520,975	
2	Generation supply purchase price per kilowatt-hour	$ 0.09114	
3	Total estimated generation supply expense July 1, 2025 - June 30, 2026 (line 1 x line 2)		$ 6,245
4	Less: Actual amount per budget		$ 4,406
5	Net generation supply expense (line 3 - line 4)		$ 1,839
6	Portion assigned to PPL Electric		91.1%
7	Net increase in distribution operating expense (line 5 x line 6)		$ 1,675

PPL ELECTRIC UTILITIES CORPORATION

Adjustment for Certain IT Expenditures Requested to be treated as Capital
12 Months Ended June 30, 2026
(Thousands of Dollars)

Pursuant to the prior practice and precedent, PPL Electric is requesting capital treatment of certain IT costs. This reflects the adjustments to Operating Expenses and Depreciation Expense should capital treatment be approved and should the regulatory asset be reclassified to capital/plant-in-service in the fully projected future test year.

Line No.	Description	Amount
1	Proforma to Adjust for IT Capital Request: Reclassification of Regulatory Asset Amortization in O&M Budget to Depreciation Expense - Reduction of O&M Expense	0
2	Less: Amount per budget	$ -
3	Net decrease in distribution operating expense	$ -
4	Proforma to Adjust for IT Capital Request: Reclassification of Regulatory Asset Amortization in O&M Budget to Depreciation Expense - Increase to Depreciation Expense	0
5	Less: Amount per budget	$ -
6	Net increase in depreciation expense	$ -

PPL ELECTRIC UTILITIES CORPORATION

Adjustment to Annual Depreciation Expense
Year Ended June 30, 2026
(Thousands of Dollars)

Line No.	Depreciation - Electric Plant In Service	Amount
1	Intangible Plant	$ -
2	Transmission Plant	190,148
3	Distribution Plant (a)	158,663
4	General Plant	65,042
6	Total	413,853
7	Less: Depreciation expense per books (a)	381,756
8	Net decrease in depreciation expense	$ 32,097

(a) Depreciation expense related to DSIC and SMR2 are excluded from this total

PPL ELECTRIC UTILITIES CORPORATION

Adjustment to Taxes Other Than Income
Taxes Year Ended June 30, 2026
(Thousands of Dollars)

Line No.	Description	Amount
	PA Gross Receipts Tax	
	Adjustment to provide for gross receipts tax on pro forma revenue at present rates	
4	Gross receipts tax recoverable through base rates (D-13, page 2)	$ 55,304
5	Less: Gross receipts tax on T&D operations per budget (Sch B-5, page 1, line 1 plus Sch D-14, page 1, column 2, line 5)	55,839
